Mr. and Mrs. Peter Thompson and family, of Paton, Iowa. came Tuesday for a visit at the Pete Merkel home. Mr. Thompson is a brother of Mrs. Merkel.

Art Schoenwetter, wife and their daughter, autoed to Nora Springs, Iowa, Sunday. Miss Myrle Schoenwetter of Garner accompanied them on the trip.

Mr. Cramer, of Des Moines was a business caller in Klemme Tuesday. He is looking for a store and was here to get some pointers from the good stores in Klemme.

Mr. and Mrs. T. F. Mitchell of Swea City, Iowa, autoed down from there Saturday night to make an over Sunday visit with relatives and friends here. They returned to their home Sunday evening.

J. N. Day and family, Mr. and Mrs. Will Smith and daughter Mabel drove to Lake Okoboji Sunday. They went there to be present at the dedication of the Nissen Memorial building a the Methodist Camp.

Mr. and Mrs. H. J. Waterstreet and two children from Winnebago, Illinois, came Sunday for a visit at the home of Mr. and Mrs. R. B. Irwing, and other Klemme relatives and friends.

Fred Shipley, of Spencer, is visiting at the B. Richards home this week. He was in town Tuesday evening meeting old friends.—Garner Signal. Fred was at one time the editor of this paper and is well known here.

Mr. and Mrs. Wm. Lamar, the druggist of Goodell was here Sunday for a visit with Mr. and Mrs. E. S. D. Kahrs. In the afternoon they drove over to Clear Lake.

R. A. Jorgenson was a business caller at Goodell last Friday.

Miss Annetta Schuldt left for her home at Gladbrook, Iowa. last week Thursday. She has been spending a couple of weeks here visiting friends and relatives. She will attend the Morningside College at Sioux City this year.

Clarence Larsen and family, of this place, accompanied by Mr. and Mrs. Buford Meyer, of Mason City, drove to Iowa Falls Sunday, returning the following day. They went there for a visit with relatives and friends.

Dr. R. N. Rueber received official notice last week that he has been appointed on the staff of the new Lutheran Hospital at Mason City.

Mr. and Mrs. Floyd Thayer of Belmond were shopping in Klemme yesterday.

We are glad to state that little Willis Busch is recovering at the hospital at Mason City, where for a time it was feared he would develope lock-jaw. His condition was not very encouraging for a time but he is now on the road to recovery.

Mrs. Agnes Tamke and daughter, of Valley City, North Dakota, who have been visiting at the home of Mrs. Lena Schroeder and other relatives here for the past three weeks, left last Wednesday for their home in North Dakota. Mrs. Tamke is a cousin of Mrs. Schroeder.

Ben Katter and family and Mrs. Ralph Elder and daughter, Reva, left Saturday in Ben's car for Vernon Center and Garden City, Minn., for a week's visit with relatives and friends.

Mrs. Rev. Albert Bock, and ch ren, of Beulah, North Dakota rived Friday for an extended with relatives and friends her

Mr. and Mrs. T. Blank and da ter, Marie, and Minnie, took in band concert at Belmond Sat evening.

MESERVEY MAN KILLED IN RUN AWAY—DIED WEDNESDAY

August Prelipp, a farmer living eight miles south east of Klemme was fataly injured in a run away accident Tuesday afternoon of last week.

Mr. Prelipp had hitched up a team of young horses to a hay rack and as he was about to step up on the wagon tongue behind the team to get into the wagon. they started to run and Prelipp was thrown under the wagon, it is thought, which then passed over him causing fatal internal injuries. Medical aid was summoned and attention was given him at once. A nurse was also called to care for him and Wednesday it was thought he would recover, but that night he passed away.

Funeral services were held at Meservey Sunday to which a large number of Klemme people went as he was well known here and was well liked by all who knew him.

Too Much Talk

With all the news I kept in touch, and I am forever reading of delegates who talk too much, whose tongues are always spreading. And some are men of high estate, and some obscure and humble; and when they're caled on to orate, like busy bees they humble. They see a large attentive crew, to hear their speel collected, and they tell all they ever knew, and they're ever suspected. Warmed by grape juice or lemon pop they set the language flowing,they can't remember when to stop, or don't know where they're going. And when the ghastly morning breaks they get the morning papers and read with many piebald aches. the story of their capers. When they behold their words in print, and know they left their bases, and sweat, of deep magneta tint, rolls when in cold dispair they rise, and frame excuses neatly: "The blamed reporters blink their eyes, misquoted us completely." But none believes this towdry tosh, none likes the whinning groaner, and stale excuses will not wash when one has pulled a boner. Man would such dire disaster dodge if he would can the spieling, and spend the long hours in his lodge, and knock flies off the cieling.—Walt Mason.

DYNAMITE STARTS IT

A retired farmer living in the neighborhood of Ledyard has a gasoline engine that is not inclined to work except on special ocasions or rather he did have. He had it repaired numerous times and trouble seemed to follow in its footsteps. Recently he took the engine to a repair shop in Ledyard and had it thoroughly repaired and remarked upon paying the bill and getting the engine that if it didn't work alright he would put a stick of dinamite under it and blow it to Hades. The engine was taken home and as usual refused to work and true to his word Mr. Farmer hoisted it heavenward with a stick of dynamite. The dynamite did the work in a most successful manner as the engine was sure shot to pieces. Everything went strictly according to schedule, the engine went skyward and troubled its owner no more. however just a minute after the fuse had been lit, the owner happened to remember that he had failed to put any gasoline in the tank when he tried to start it, but alas too late, the engine was no more. There is a moral to this story which has been recited perfectly true—it pays to look into maters quite thoroughly before passing judgement and condemning anything from a balky engine to a neighbor.— Bancroft Register.

Motor Plants Increase Force

Detroit. Aug. 18.—The Packard Motor Car Co. added 700 men to its payroll Aug. 1 and the Dodge plant increased its force 300 men.

This goes to show that "better times" are coming close again.

FARMERS EXTENDED $1,000,000 ADDITIONAL CREDITS IN FOUR MONTHS

Harding Administration Has Kept Faith With Agricultural Interests

Washington, Aug. 18,— The enlargement of the powers of the War Finance Corporation, recently recommended by the President to the Congress in connection with the financing of agricultural products will, if adopted, mean adequate financing of the 1921 harvests for the purposes of foreign and domestic trade. Under the powers already possessed by the War Finance Corporation, it has either advanced, or is negotiating advances in the agregate sum of $63,471,000, approximately 93% of which covers agricultural commodities.

The largest transactions relate to cotton and represent in the aggregate the financing of a million bales. The corporation has already closed loans on cotton in the sum of $16. 560,000 and has negotiation loans in the sum of $15,225,000. It is negotiating an advance of $7,500,000 on approximately 10,000,000 bushels of wheat. Assistance has als been given in the exportation of 7,000 hogsheads of tobacco, representing an expenditure of $1,180,000 and another transaction covering 18,000 hogsheads, representing an investment of $6,500,000. The corporation has also agreed to advance $8, 500,000 on exports of condensed milk, $250,000 to co-operate associations on exports of canned goods and is negotiating an additional expenditure on canned goods of $550, 000.

Inasmuch as a cotton planter, as a rule, buys most of his cereals and other food from the north and is, in common with all other consumers, a patron of industries which manufacture household necessities, clothing and farm machinery giving employment to millions of workmen, who in turn consume food, it is believed that the financing of cotton exports will immediately start millions of dollars ino circulation in the various channels of American industry and immediately stimulate the market for the food products of the northern grain and cattle growers.

Other Loans To Farmers

In addition to the above mentioned advances on agricultural commodities made by the War Finance Corporation, a banking loan of $50,000, 000 has been organized and is in operation for the relief of the live stock industry. This fund was created largely upon the initiative of Secretary of the Treasury Mellon. It became operative about the middle of July and already over $5,000,000 has ben loaned out of it.

In addition to this provision, Congress has enacted a law increasing a amount of loans available for farm loans by the Federal Farm Loan Bank. This is known as the Curtis Nelson Bill and became a law July 1st.. It immediately increased available farm loans in the sum of $20,-000,000 and under the provision of the act this sum will be still further increased. A bill to increase the rate of interest paid to investors in Farm Loan Bank bonds has passed the Senate and will pass the House in a few days. This will enable the Farm Loan bonds to compete in the market with commercial bonds and thereby increase the funds of the Farm Loan Banks.

In addition to all this, the reduction of the discount rates by the Federal Reserve Banks and the extension of time on agricultural paper to six months, twice that exended on commercial paper, will relieve the tension in agricultural sections and make it easier for the financing of agricultural commodities.

All told, the Republican administration, through Congress, the Secretary of the Treasury and other mediums, has within the past ninety days provided approximately $100, 000,000 in extra credit to the agricultural interests of the counry.

NAVY TO CUT FORCE 12,000

Washington, Aug. 18,—In order to keep within the reduced appropriation allowed the Navy Department, the Navy will discharge 12,-000 enlisted men. Upon their request, enlisted men whose enlistments expire between now and July 1, 1922 (with the exception of certain classes of skilled and technical men, such as radio operators, signal men, etc.) will be given their honorable discharge now.

ALL GRAIN MOVEMENTS IN HISTORY BROKEN BY THIS YEAR'S SALES

Chicago, Aug. 18.—Farmers, first to feel the pinch of the nation-wide economic depression, now are beginning ahead of any other classes of business men to experience a return to prosperity. One of the greatest grain movements in history now is crowding the facilities of the railroads. Grain shipments during the six weeks broke all records in the history of the trade. Farmers are crowding grain to market in such quantities that in some places there is not sufficient elevator storage space. Difficuly in handling grain receipts was reported at Chicago and Galveston.

STEEL MILLS COMING BACK TO NORMAL

Youngstown, O., Aug. 18,—Steel plants of the Youngstown district began this month with a decided increase in operation over previous weeks. The Sharon Steel Hoop Co. placed in operation blast furnaces which have been in idleness since the middle of May. The Carnegie Steel Co. schedule for the first week in August was 85 per cent operation. Increases were made in schedules of all of the rolling mills and sheet mills in this locality.

Arm Broken In Tractor Accident

Klemme Creamery Beats Others In Northern Iowa

FARMERS MEETING WELL ATTENDED

The farmers meeting which was held at the Idle Hour last Friday evening was well attended.

The speakers, Mr. Bien, a farmer from Cerro Gordo county, and Mr. Woods, of Des Moines, brought out some very good points. In order for the farmer (and this also includes all other lines of business in the mid western states) to get legislature to benefit this state and locality, they must perfect an organization which will be strong enough to demand and be recognized. Mr. Woods had many good, sound ideas which if put into effect would solve many of the problems of the farmer and the merchant and other business men in a farm community. There were no "radical or bolshevik" ideas in Mr. Wood's program. but facts which will demand attention when properly put to work.

His talk was enjoyed by all who heard him.

WATCH POULTRY FOR ROUP

Disease Often Attacks Late Hatched Flocks After Wet Weather

Fall flocks, especially those having late hatched birds, are susceptible to roup, say the poultry experts at Iowa State College and much damage is done unless care is used to prevent the occurrence of the disease.

This disease of which there are two forms, contagious and diphtheric is easily detected by the condition of the bird. Contagious roup takes the form of a cold, a watery discharge from the eyes and nose and the coughing and sneezing of the birds. They soon lose their appetites, and the feathers are ruffled. Diptheric roup is distiguished from the other by the presence of membranes in the thoats of the birds. These membranes fill up the nasal passages and the chickens die of suffocation.

The cause of the disease, which is supposed to be of bacterial origin, is generally the result o damp, overcrowded quarters. This condition can be remedied by making sure that the yards are large enough to accomodate the birds. See that clean water is present and not subject to contamination. Ventilation of poultry houses is also essenial.

Where the disease is suspected applications of a tablet of 7.3 mercuric chloride in a gallon of water in a non metallic container.

Birds that have died from the disease or that have the disease in malignant forms should be disposed off and those which are ailing in the &ock should be separated immediately so that the healthy birds will not be exposed to the disease.

Unless the birds are of extra value it will not pay to treat the birds singly for the disease.

The following news was overlooked in getting out last week's paper: Mr. and Mrs. John Dunkel, of Kouts, Indiana, came last Friday for a few days visit with Mr. and Mrs. Leonard Sampson and family. Mrs. Dunkel and Mrs. Sampson are sisters.

C. W. Wiles and son, Howard. left in their car last week Wednesday for Morris, Minnesota. They went there to thresh the grain on Mr. Wiles' farm. He reports the crop was just average this year but as good as any here. Morris is about 350 miles from here. They got back to Klemme yesterday, driving the entire distance in one day. way has been clear sailing.

The Klemme Band was strengthened last night by the addition of the Garner Band and a consolidated concert was given. It is the plan to have a consolidated concert here each week on Wednesday. In turn the Klemme Band will play with the Garner band on Tuesday night at Garner. Quite a number of Garner people came over last night to hear the concert.

KLEMME CREAMERY HEADS THE LIST

The Klemme Creamery is one of the best in this part of the state and they are continually heading toward the front ranks of the industry for northern Iowa.

They report they are doing a fine business in the amount of cream received and butter made. They have the largest make of any other creamery in North Central Iowa.

Last Friday 97 tubs, containing 63 pounds each of butter, were shipped to Jersey City, N. J., and in addition to that amount 15 tubs were sold locally, in the form of print butter. This amount represents a one week's output. This sure speaks well for the Klemme Creamery and Buttermaker Gimer and his assistant, Ralph Elder.

"Now that we have quantity," says Mr. Gimer, "let all patrons deliver quality cream, which will insure the future success of the creamery."

All Klemme and surrounding community can well feel prowd of the record made by this local concern.

WRESTLING MATCH HERE TOMORROW EVENING

There will be a good wrestling match at the Idle Hour Theatre tomorrow night (Friday).

The main bout will be a two best out of three fall between Hans Willer of this place and Stephen Goffe of near Forest City. These men were on the preliminaries at the recent Parcaut-Prehn match at Garner and worked hard for thirty minutes with no fall on either side. It promises to be a good match as there is a lot of rivalry between the boys as to who is the best man in a finish match.

A good preliminary has also been lined up. Sam Harvey and Homer Butcher will settle their little dispute as to who can throw the other. Leipziner, of this place, will meet an "unknown" from Kanawha.

If you are a wrestling fan then plan to attend.

USE CARE WITH HORSE FEED

Full Rations Require Plenty Of Starchy Food

Horses that are mature and working require a different ration. say the animal husbandry experts at the Iowa State College, than do the younger horses. Also, horses are more suscepable to sudden changes in the diet than any other farm animal and much care should be exercised in selecting their rations. Corn and timothy hay are much better food than alfalfa or bran for the horse since the latter foods are too high in proteins for the horse's stomach. Oats are fine for horses because they contain enough protein and are rich in starch which horses need.

Due to the small stomach capacity of the horse he will have better wind and be in better working shape if fed small quantities of hay and a regular grain ration. The average horse's stomach holds only 19 quarts while that of a cow holds 270 quarts.

A good ration for horses doing moderate work consists of 1¼ lbs. hay, and 3-4 lb. of grain to every hundred pounds of weight. altho horses doing extra heavy work can be given as much as 1¼ pounds of grain.

As soon as horses are taken off of the heavy work the grain ration should be cut for a full ration when the animal is idle will result in stocked legs. Be sure that horses not working are given plenty of chance to exercise or damage will result in a short time.

SENDS DISARM INVITATION TO 5

Harding's Bids to Britain, France, Italy and Japan Are Identical.

WILL MEET ARMISTICE DAY

Preliminary Negotiations Have Made Certain the Acceptance of Invitations—No Preliminary Conferences Will Be Held.

Washington, Aug. 13.—Formal invitations were sent to Great Britain, France, Italy, Japan and China to attend the conference on disarmament and Far Eastern questions at Washington November 11.

The invitations are identical and brief, except to China. They will be sent directly to the foreign office and copies handed to the diplomatic representatives of the powers here.

The communications place no limitation on the scope of the discussion to be had.

It is suggested, however, that the question of naval armaments "may naturally have first place," though it has been thought best not to exclude questions pertaining to other armament from the subjects to be considered by the conferees.

It is not the purpose of the United States government, the invitation adds, to define the scope to the Pacific and Far Eastern discussions, "but rather to leave this to be the subject of suggestions to be exchanged before the meeting of the conference."

The communication to China does not include an invitation to the disarmament conference, but only a request to participate in the Pacific and Far Eastern discussions.

Preliminary negotiations have made certain the acceptance of the invitations and of agreement to open the conference on Armistice day. It is expected that the acceptances will make clear how many representatives each nation expects to send and incidental exchanges with the State department are expected to show the total number of individuals who will come with each mission to assist the official representatives as experts and otherwise.

Upon the receipt of this information, details of caring for the visitors can be worked out. Questions of housing the missions and selection of a building for the principal conference meetings and the many minor conferences are being studied here, and within a few days an estimate of the money required will be submitted to Director of the Budget Dawes.

Further exchanges of opinion on the agenda will probably continue. All thought of preliminary conferences has been abandoned, but the State department has made it clear to the representatives of the invited powers that there is every disposition here for a full and frank preliminary expression of opinion on what subjects should be discussed.

The final arrangement of the agenda, however, probably will be made only after the conference meets.

BURCH HELD FOR MURDER

Son of Evanston Minister Charged With Slaying Man in Los Angeles, Cal.

Chicago, Aug. 10.—Arthur Courtenay Burch, son of a retired minister, Evanston, Ill., was locked up in the Las Vegas (Nev.) jail on a charge of having murdered John D. Kennedy. Later he started in the custody of officers for Los Angeles. Mrs. Madelyn Obenchain, a former Northwestern university co-ed, still is held as a material witness in Los Angeles.

Burch, a son of Rev. and Mrs. William A. Burch of Evanston and son-in-law of Bishop William A. Quayle of St. Louis was taken from a Santa Fe train in Las Vegas while on his way home to Evanston. He waived extradition and agreed to go back to Los Angeles.

REFUSE RAIL MEN'S PLEAS

Thirty-Three Roads of Eastern Group Turn Down the Demands of Brotherhoods.

New York, Aug. 13.—Demands of the railroad brotherhoods for restoration of the wage scale effective June 30, and for the withdrawal of all demands for further decreases, were refused by 33 railway presidents, meeting here.

The conference was attended by heads of all railroads coming within the so-called "Eastern group," including railroads east of Chicago and north of the Ohio.

It heard the report of a committee of three which had conferred with heads of the four railroad brotherhoods and switchmen.

Loot Brule (Wis.) Bank.

Brule, Wis., Aug. 13.—Bandits blew the safe of the Brulé State bank and escaped in an automobile with $1,450 in silver. Seventy thousand dollars in securities were left behind by the burglars.

Judge William C. Hook Dead.

NEWS REVIEW OF CURRENT EVENTS

Revenue Bill Makers Find Way to Reduce Taxes by About Half a Billion.

GOVERNMENT EXPENSES CUT

Income Tax Allowance for Dependents Doubled—Grain Exchange Regulation Bill Passed by Senate—Silesian Question Referred to League of Nations.

By EDWARD W. PICKARD.

Although it has been freely and generally predicted that the Republicans would be unable to carry out this year their party pledge to lower taxes, that the revenue bill would show only revision and not reduction because of the necessarily large expenses of government, it now appears they have found a way to fulfill the promise. President Harding and the majority leaders of the house got together last week and agreed on a program by which government expenditures will be cut $516,000,000. This calls for the raising of $3,075,000,000 from internal taxation, which is $495,000,000 less than the total which the treasury estimated would be the yield of the present law during the fiscal year, 1922. The total to be raised from all sources, but not including postal receipts, will be $4,034,000,000.

According to the agreement, saving in the various departmental appropriations will amount to $35,000,000, and a plan was devised whereby the public debt expenditures will be reduced $150,000,000.

It was the earnest desire of the Republican leaders that the imposition of new taxes be avoided, and under the present plan the proposed $10 tax on automobiles, the 3-cent postage and 2-cent stamp on bank checks will be unnecessary.

Of more immediate interest, perhaps, to the average citizen was the action of the ways and means committee of the house, which is framing the revenue bill, concerning the personal income tax. It was voted that the allowance for each dependent shall be $400 instead of $200 as at present, which means a greatly increased exemption for the man with a large family. A proposition to increase the present exemption of $1,000 for single persons and $2,000 for heads of families to $1,500 and $2,500 respectively was voted down. This would have meant a loss of revenue of nearly fifty million dollars. Another change adopted was the reduction of the tax on very large incomes. There will be no tax above the 32 per cent now levied on incomes of $66,000—which will be a relief to about ten thousand of our wealthiest citizens, but will not call for cheers from the rest of us.

The committee also decided on a complete repeal of taxes on freight, passenger and Pullman transportation, and increased the flat corporation tax from 10 per cent to 15 per cent. In this and other respects the committee disagreed with the results of the conference with the President, and the changes it has made to date lower the yield from internal taxes to $3,020,000,000. Of course all these things are dependent on further action by the committee and acceptance by the house and senate.

The losses in revenue below the present law which will result from the program as it now stands include $450,000,000 from repeal of the excess profits tax, $90,000,000 from the reduction in the higher surtaxes, $145,000,000 from repeal of the tax of 3 per cent on freight, $100,000,000 from repeal of the tax of 8 per cent on passenger transportation, $8,000,000 from the repeal of the 8 per cent tax on Pullman charges, $25,000,000 from the repeal of the soda fountain tax, $15,000,000 from the repeal of the tax on proprietary medicines, besides a few smaller items which bring the total up to $891,000,000.

Increases made offsetting these losses in revenue included $263,000,000 additional from changes in corporation taxes, $66,000,000 additional from the new soft drink taxes, and $8,000,000 from the new tax on proprietary medicines, making a total of $337,000,000.

President Harding signed the Sweet soldiers' relief act and at once appointed Col. Charles R. Forbes, director of the veterans' bureau created by that law. Colonel Forbes has authority to supplement the hospital construction program by contracting with state, municipal and private hospitals for the immediate accommodation of disabled veterans whose need of care is pressing; and his greater work will be in the line of vocational rehabilitation of the former service men.

After hearing Senator Capper denounce the Chicago board of trade as "the biggest gambling hell in the world," the senate passed the bill for federal regulation of grain exchanges. Some of the more drastic features of the bill as adopted by the house were eliminated and the differences must be adjusted in conference. As passed by the senate the measure seeks to:

Abolish transactions known as "indemnities" or "puts and calls" by levying a prohibitive tax.

Admit co-operative associations of producers to membership in grain exchanges.

Permit dealing in futures, but only in certain markets, 13 in number, designated by the secretary of agriculture.

Empower the secretary of agriculture to compel grain exchanges to make regulations preventing manipulation of the markets.

Require exchanges to exercise diligence preventing dissemination of false crop reports.

Require exchanges to keep records of all transactions for inspection by the secretary of agriculture or department of justice.

President Griffin of the Chicago board of trade says that institution will in good faith attempt to function under the provisions of this law.

Another thing which the senate did last week was to pass the Campbell-Willis bill prohibiting physicians from prescribing beer as medicine. But while the senators thus yielded to the extreme drys, they also adopted some amendments which change the Volstead act in ways that are displeasing to the prohibitionists. One of these especially made the dry leaders howl. It provides a fine of $1,000 and imprisonment for one year for a prohibition agent or any government employee engaged in enforcement of prohibition or any other law who searches or attempts to search property or the premises of any person without a search warrant.

After agreeing that no reinforcements should be sent to Upper Silesia, the supreme council, in session in Paris, undertook to settle the question of the boundary line between Germany and Poland in that region. Lloyd George advocated the so-called Sforza line, which gave Poland the western part of the industrial district and Germany the rest. Briand objected to this plan, and a deadlock was imminent. The French premier admitted that Upper Silesia amounted to nothing compared with the friendship between the British and French people, but evidently he was afraid of the influence of the French extremists. A complete break was averted by a decision to refer the whole question of the partition to the League of Nations.

Premier Briand first proposed that the United States be asked to arbitrate the matter, but Lloyd George preferred that it be left to the league. This disposition of the question was made under the second clause of article 11 of the Versailles treaty, together with articles 12 and 13. These are parts of the covenant of the League of Nations and provide for reference to that body of "any circumstances whatever affecting international peace or the good understanding between nations upon which peace depends."

While waiting for the report of the experts on the Silesian matter, the council discussed the Greco-Turkish question and, on motion of Mr. Lloyd George, adopted a resolution declaring the strict neutrality of the allies without interference with trade. In the course of this discussion Ambassador Harvey, representing the United States as an observer, replied to a question from Lloyd George that America's traditional policy gave traders the right to sell arms to either belligerent in the Near East.

Mr. Harvey was questioned also concerning Mr. Hoover's plans for the relief of the Russians, and said he would cable to Washington for full information. The allied premiers agreed that the Russians must be helped, and a committee was named to decide on the best means. It was admitted that the co-operation of the soviet government was indispensable. Lloyd George is willing to deal with the soviet government, for that purpose only, and Briand thinks it best for the allies to associate themselves with the American Relief administration and enter into relations with the Russian people through the assistance of the Czechoslovak government. Lenin and his colleagues are not helping matters much, for their appeals for aid are directed only to the "working class" and continually revile all non-soviet governments. They have released seven of the Americans who were held prisoners in Russia and have offered guarantees that all other Americans in Russia will be permitted to leave the country at their own convenience.

De Valera's reply to the British proposals to Ireland was sent to London on Thursday and forwarded by airplane to Lloyd George in Paris. The premier started home almost immediately and laid the document before his cabinet. At this writing the public has been given no intimation of the nature of the Irish reply, but it is feared another crisis is imminent. However, leading Irishmen thought de Valera's note was not of such a nature that negotiations would be broken off.

Formal invitations to the conference on disarmament and far eastern questions were sent out from the State department last Thursday to Great Britain, France, Italy, Japan and China, and the date for the opening of the meeting was announced as November 11, Armistice day. There will be no preliminary conferences, and the government has rejected the suggestion of several Pacific coast cities that one of them be selected for some of the sessions dealing with Pacific questions. Conversations on the agenda are still going on and the program probably will not be finally arranged until after the conference begins.

It is reasonably certain that the report of the Wood-Forbes mission to the Philippines will be adverse to granting immediate independence to the islands, but the Filipinos will be considerably mollified by the announcement that General Wood has been offered the governor generalship of the islands and has expressed his willingness to accept the post. The general was familiar with conditions there even before he went on the present mission, and if there is any man in whose capacity and sympathy the natives have full confidence, that man is Leonard Wood. In accepting the appointment his sense of public duty leads him to give up the lucrative and honorable position of head of the University of Pennsylvania to which he had been elected.

If Governor Small of Illinois is sincere in his statement that he desires an early trial of the charges of fraud and embezzlement of public funds for which he is under indictment, provided it is not in Sangamon county, there is a good chance that his innocence or guilt will soon be determined. The states attorney of Sangamon county has offered to agree to a change of venue and has said the prosecution is ready to go to trial at once. Mr. Small avoided arrest in Springfield for a week or so by the simple expedient of staying away, and then returned to the capital and accepted service from the sheriff under protest and gave bonds. Now his lawyers seem to be spreading a net of legal technicalities while he issues statements scoring the political enemies and newspapers which, he says, are responsible for the charges against him.

RELIEF WORKERS READY TO START

Greatest Movement of the Kind in History to Cost $10,000,000,000.

WILL BEGIN IN SEPTEMBER

Supreme Council Appoints Commission for Succor to Stricken Russia—Hoover Says Work of Relief Will Begin Immediately.

Paris, Aug. 12.—The greatest relief movement in the history of the civilized world is scheduled to begin in September when an army of workers and millions of tons of supplies will invade Russia by way of Odessa and Riga under the joint direction of Herbert Hoover and Lord Curzon. They will co-operate with the soviet government.

This paramount fact, which involves recognition of the soviet government by the entire world, became a practical certainty following the appointment of a commission by the supreme council. The commission was ordered, to "sit day and night and reach a decision this week as to ways and means to succor Russia, considering only the humanitarian, and not the political viewpoint."

Lord Curzon outlined the three points on which the relief will be based. Co-operation of the soviet government is absolutely essential, owing to its control of transportation.

Premier Briand, who had previously urged recognition of Kerensky and the overthrow of the soviets, appeared to be convinced in favor of the new plan.

The soviets must agree to co-operate in order that the international relief organization may have supreme authority in its field.

The third necessary step will be enlistment and mobilization of thousands of experienced workers.

It was indicated that Secretary Hoover would be asked to collaborate with Lord Curzon, who, Lloyd George stated, had solved the problem of 70,000,000 starving in India.

The international organization will work on the following broad lines:

Great depots will be established to which millions of tons of grain and all supplies will be rushed.

All railways will be reconstructed and put into the work of carrying relief.

Factories will be opened to provide work in congested areas.

A chain of hospitals will be established.

It is indicated that the work will probably last for at least two years, employing at least 20,000 workers and costing the world, as a minimum figure, $10,000,000,000.

Washington, Aug. 12.—Russian relief work will be started immediately, Secretary of Commerce Hoover announced, after an hour's conference with President Harding at the White House.

Walter Lyman Brown, European director of the American relief administration, of which Mr. Hoover is the head, is due to arrive in Riga, it was stated. He will enter into immediate conferences with the soviet authorities on the problem of distribution.

GRAVEYARD OF STOLEN AUTOS

Plan to Get Insurance Seen as Fourteen Cars Fished From Quarry Pool Near Chicago.

Chicago, Aug. 13.—What appears to be a "graveyard" for automobiles has been found by the Summit police at the bottom of an abandoned stone quarry pool at the DesPlaines river and the Atchison, Topeka & Santa Fe railroad tracks near Summit. Fourteen automobiles have been discovered already and search, with the assistance of a diver, may reveal more cars, it is believed.

Insurance companies will be notified, and it is believed a band that has specialized in the disposal of lost or stolen cars may be uncovered.

DROPS TRANSPORTATION TAX

Ways and Means Committee Also Agrees to Raise Children's Exemption From $200 to $400.

Washington, Aug. 12.—The house ways and means committee agreed to wipe out all transportation taxes, including Pullman chair and berth taxes; to increase the income tax exemptions for children from $200 to $400 and to allow a $500 exemption for dividends on stock in building and loan associations.

The soda water tax will be repealed, it was agreed.

Taxes on bottled beverages will be repealed and a manufacturers' tax substituted.

Body in Trunk Sunk in Lake.

Seattle, Wash., Aug. 10.—A trunk containing a body, believed to be that of Mrs. Kate M. Mahoney, wealthy Seattle woman who disappeared last April, was found by divers in Lake Union.

Noted Western Broker Dies.

San Francisco, Cal., Aug. 11.—Richard E. Mulcahy, a broker credited with bringing about continuous telegraphic service between the New York and Chicago stock exchanges and the Pacific coast, is dead here.

Government Maintains Paid Hunters

Strange as it may appear, the government employs hundreds of hunters. The biological survey between four hundred and five hunters whose sole duty is to trap wild animals. In 1920 these professional hunters "bagged" skins and scalps, divided among various animal tribes as follows: Wolves, 584; coyotes, 27,100; mountain lions, 149; bobcats, 4,123; lynxes, 43. To the average citizen this country, especially in the thoroughly domesticated East, these figures might not convey practical information, but to the farmers of the western ranges they mean a saving in stock of about five million dollars.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands highest for the reason that it has proved to be just the remedy needed in those cases where upon thousands of distressing cases Swamp-Root makes friends quickly because its mild and immediate effect is often realized in most cases. It is a great healing vegetable compound.

Start treatment at once. Sold by druggists in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Effective Toothbrush.

To eliminate a great number of petty inconveniences that go with washing the teeth in the morning, a fountain toothbrush is a practical recent invention, says Popular Mechanics Magazine. Within the brush handle is a narrow container designed to carry a tube of paste. To wash the teeth, the bristles of the brushes are wetted and then paste from the inner tubes introduced to them by turning a knurled collar at the end of the handle, which forces it out.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura Soap, Ointment and Talcum are for, but if Soap, Ointment and Talcum are used for all toilet purposes. Advertisement.

Carefully Reared.

The business man had decided to get a girl secretary, and was interviewing applicants for the job.

He eyed, rather suspiciously, a young thing, who wore a V-cut blouse, a short skirt, gray silk stockings and a lot of gaudy "jewelry."

"I—er—hope you were carefully brought up?" he stammered nervously.

"Oh, rather, old bean!" replied the damsel. "Old Bill, who works the lift, is an old flame of mine, and wouldn't hurt me for worlds."

There is one place you can express your opinion without being insulted—the ballot box.

t not damage the safe, as precious collection inside," g.

r majesty," replied Mr. X, need even to damage the X looked with a profes- t the safe.

raid you will find it a diffi- as it is a Chubb Special," said the king. Mr. X inserted the wire, felt with the wire inside, delicately twisted it here and there, then opened the safe door.

"Here, your majesty, your safe is opened."

The king was very much astonished, and said: "You are the most dangerous man I have ever met." Mr. X replied: "I would be were I not honest."

Mr. X is rarely in his store, as his fame has traveled abroad and he is often telegraphed for to start at a moment's notice. Before the war he was called many times to Berlin to open the ex-kaiser's safe and he was recommended also to Francis Joseph, who often left his keys inside his secret safe, and would allow no one but Mr. X to open or try to open it.

Many Diplomats Call Him.

Diplomats, lawyers, doctors, all call him when they need a reliable doctor for their safes. When asked how he did the trick, Mr. X said: "It is purely a question of touch. I am like a specialist who, without operating, can tell by examining a patient, by touching him what is the matter inside. Jamming of safes is like a case of lockjaw. With my wire I can locate the trouble inside the lock. Besides, my experience I inherited from father, who in his time was the only lock specialist in the world."

Sometimes it takes five minutes, and often he has to probe for 20 minutes or half an hour, but never in his life has he had to damage a lock in order to open a safe. He is the most expert lock specialist in Europe and with this talent has remained always an honest man who glories in his profession.—New York Tribune.

Jailed for Beating 80-Year-Old Mother.

Machias, Wash.—Jack Vance has been jailed on a charge of assaulting his mother, who is more than eighty years old. Finger marks were found on the throat of his mother and bruises on her face and chest. Too much moonshine was the explanation given by Vance.

COUNTESS WEDS YANKEE

A recent portrait study of Countess di Nogarole Meehan, wife of Maj. Charles Meehan of New York. The countess met the major during the war, when both were engaged in Red Cross work. Recently they were married at the Vatican and blessed by the pope.

Haunted Years; Victim Is Alive

Missourian Meets Man He Thought He Had Killed in Quarrel 14 Years Ago.

LIVES IN PERPETUAL TERROR

Man Falls From Train During Fight Which Resulted From Disagreement Over Dice Game and Antagonist Thought Him Dead.

Kansas City, Mo.—Reuben E. Hall of Paris, Mo., met face to face in a Denver (Colo.) street a man whom he thought he had killed 14 years ago and the memory of whose alleged death had haunted him all these years.

A letter telling of the remarkable case came from Denver to I. H. Shatzer, manager of the Tool Specialty company. It was from Shatzer's half brother, Reuben E. Hall.

Hall, a young farmer near Paris, Mo., went to the Kansas harvest fields to work in 1907. He disappeared. The letter received by Mr. Shatzer was signed with a strange name, Harry E. Thomas. It contained this story of the disappearance of the new name:

In Perpetual Torment.

For 14 years Hall, under the name of Harry E. Thomas of Denver, has quaked at the sight of a police officer. He has avoided all persons he knew when he was Hall. He has spent wakeful nights, fearing arrest for murder. A wife and then a child served to add to his anxieties. What, if they should discover he had killed a man?

But the worry is over. Thomas was walking recently on a Denver street. He met the man for whose murder he believed he was hunted, the letter states. The two recognized each other at the same time. The "murdered" man held out his hand in greeting.

"I thought I killed you," Thomas gasped.

"Land, no," the "victim" replied. "I was only bruised a little."

In the 14 years since his disappearance Hall's family has mourned him as dead. Relatives after a diligent search, took steps to collect his insurance, but lacking proof of death, were unable to do so.

Of what happened after Hall, with $175 in wages, left the harvest fields the letter has this to say:

"I got into a dice game. I won $750. One of the heavy losers was John Williamson. He and I fought over the game, then patched up our differences. Friendly, we climbed into a box car to go to Kansas City. We quarrelled again, fought, and Williamson fell from the train in the fight.

Not Guilty of Murder.

"The next day I read in a paper that the body of an unidentified man had been found on the railroad right of way. I was not guilty of murder, but to prove it was a different thing. Others had seen us quarrel.

"I went West, changed my name to Thomas and grew up with the country. Finally I settled in Denver, was married and now have a daughter six years old.

"You cannot imagine the relief now. Williamson went home with me, and we told my wife and daughter. I am the happiest man in the country. We are coming to see you and all the rest of the folks right away. I can hardly wait."

MISH TENACITY WINNING OUT

ating Efforts of Peas- estore Flanders Fields.

Working to Rebuild Homes lvage Barren Lands, Aided by Loans of Motors.

s.—"No Man's Land" again to the brave Belgian peas- pparent miracle having been in Flanders fields by these us people, who, with the help elgian government, have re- e ground which once seemed d beyond rehabilitation. Not with the deaths of soldiers, of women and children and on of cities, the German in- ught to wipe out nature en- their efforts were in vain. very places where, two years armies were rushing to lib- gium, and where the sea wa- ding uncovered grinning skeletons of German soldiers, buried in the mud of the Yser river banks, wheat and barley, corn and potatoes, flowers and young apple trees are now flourishing.

For two years the Belgian peasants lived in huts, the ruins of their homes, or in German concrete shelters, suffering untold hardships in winter, but imbued with the spirit of regeneration. They worked to remove the barbed wire and unexploded shells, and many of them lost their lives when the plow met some buried shell. But perseverance won. From 313,000 souls in 1914 the population dwindled to nothing in 1918, and back to 185,000 in 1919. There is now a population of 237,000.

The ministry of agriculture, under the management of Baron Ruzette and his staff of specialists, with M. Boerenboom at their head, organized the relief work. Motor tractors were loaned by the government. The fields, soaked with sea salt, were revived with chalk and chemicals, and Flanders awakened from her deadly sleep and is again bright with vegetation. The farms are bigger than ever before, and the concrete shelters which, two years ago, heard the German officers yelling to the unfortunate soldiers, "schweinhunde," now hear the grunting of little pigs, for the thrifty Flemish peasants have turned to account all of the salvaged implements of warfare which could be used.

Here and there are sacred spots, bright with bloody poppies, marking the final resting places of the brave Belgian, French, British and American soldiers, untouched by the regenerating hands of the Flemish workers.

Crook Is Temperamental.

Vienna.—Forcing his employer's safe and finding only about $20 worth of crowns, Rudolph Twrdik hanged himself, leaving a note that the disappointment after so hard a job was more than he could stand.

A new lawn swing can be operated by hand levers as well as the feet of occupants.

SOMETHING TO THINK ABOUT

By **F. A. Walker**

WHAT A MAN READS.

SOMEONE has said that Charles E. Hughes, the secretary of state, did not read novels or verse while he was at the university, and that he was so absorbed in science as to miss all the poetry and romance of college life.

To disprove this statement the librarian of the John Hay library at the recent commencement of Brown university showed in a glass case the very books that Mr. Hughes had taken out. They included the regular novelists that everybody is supposed to read, and such poets as Tennyson and Longfellow.

• • •

Variety in reading is just as necessary as variety in food.

Some good people did not understand this when they objected to novels on principle as frivilous and a waste of time.

A celebrated man of science of the latter part of the Nineteenth century used to find himself losing interest in his work every now and then. When this took place he would shut himself up with a great supply of dime novels and read nothing else for a week. Then he would go back to his laboratory as fresh as ever.

• • •

On the other hand, a certain French novelist, whenever he found himself in need of a mental rest used to read the Criminal Code.

Charles Darwin as he grew older lost all interest in poetry, but found recreation in novels with good lively plots that held his attention.

One reason why detective stories are so popular with all sorts of readers is because they appeal to the love of mystery which is almost universal.

• • •

It has been said of Poe that he would have made a good detective because of his gift for fitting together a criminal mystery. The idea was that he would have been able to take criminal puzzles to pieces as well as put them together. One side of his work kept him interested in the other.

When a boy is at school or college his reading is divided into two sorts —"voluntary" and "involuntary." He reads for pleasure and he reads for business.

As nobody's education is ever finished the same division should mark later life.

• • •

Mrs. Asquith in her celebrated "Autobiography" tells how she belonged to a sort of society the members of which agreed to do an hour's serious reading every day.

Doctor Johnson said that if a man read any subject for an hour daily he could not help becoming "learned." His own great difficulty was that he was unsystematic.

By reading certain things for recreation and at the same time following a course laid down in advance, a person gets the additional benefit of discipline.

In the Eighteenth century they thought nothing of reading through Homer, Virgil and Shakespeare once a year. No wonder they were able to think in those days.

THE ROMANCE OF WORDS

JACK.

WHILE this name is, of course, the diminutive of John—or, rather, the Anglicised form of the French Jacques—it appears in English in a number of ways which apparently have no connection with the name. Among these may be mentioned boot-jack, jack-knife, lumber-jack, black-jack, Union-jack and jack-tar.

The reason for this usage is because the proper name or nickname, "Jack," has for many years past been applied in England to servants or laborers as a class. Jack is a handy and easy name for a waiter or a caddy, or a groom, much as many Americans apply the name George to any negro porter. For this reason, many appliances which are subject to rough usage or which perform the tasks of a laborer are known by the prefix "jack," with a noun which designates the use to which they are put. The expression "Jack of all trades" is another exemplification of the same usage, while the substitution of the name "Jack" for the "knave" in a pack of cards is an indication of the hard usage which this gentleman undergoes at the hands of the queen, king and ace.

SCHOOL DAYS

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

TRAINING SALESWOMEN

IT WAS a thriving little store in a small village in New England. I had some chintz to get, and she was a real help in finding something, though the stock was necessarily limited. But she had taste, and a sense of color, and she was interested.

I found that she had graduated that year from high school, and gone into the store to earn money during the summer, and that she meant to go to the city and try for the position of saleswoman in one of the large department stores. She asked me what I thought of her chances.

I advised her to go to the highest-class store of the kind she wished to work for.

"Take a lot of pains with your appearance. Remember that you are not only applying for the job that is now open to you, when you are ignorant and untrained, but for the job in the future when you have got your training and when you know your possibilities."

There are splendid opportunities for saleswomen nowadays. It is one of the big professions now open to women. But it is a difficult one, with much competition and an almost endless amount of training. It requires hard work and natural aptitude. I think the girl I met that day is going to succeed. She had the right idea and the love for it, too. But don't think, when you hear of the big salaries and wonderful opportunities in that profession, that you can get these without deserving them.

LYRICS OF LIFE

By DOUGLAS MALLOCH

THE EASY CURE.

YOU had a little hurt today,
I know it by your face,
A hurt you hoped to hide away,
And yet it left a trace.
You tried to wear the usual smile,
Yet futilely you tried—
That little trouble all the while
Was hurting you inside.

My, my, I wish that money, too,
Would earn the interest
That ordinary troubles do
We carry in our breast!
Inside ourselves deposited
They grow and grow and grow,
But not in gold—a load of lead
Is all we ever know.

Now, I've a simple little plan
I've used with little ills,
I'm glad to tell to any man
Who's blue around the gills:
Just ask yourself: "This little ache,
This trouble, anyhow,
Just how much difference will it make
A year or so from now?"

What was it that you used to want?
What was it made you sore?—
Your woes a year ago you can't
Remember any more!
The thought of troubles you forgot
Will cut the new in half;
And then, I bet, as like as not
You will not smile—but laugh!

MOTHER'S COOK BOOK by Nellie Maxwell

This is a difficult world indeed
And people are hard to suit.
The man that plays the violin
Is a bore to the man with a flute.

FAVORITE DISHES.

WHEN it comes to cooking for the family, the housemother does indeed have a hard time to suit all members, if they are not normal in their appetites.

Honey Mousse.

Heat one cupful of well-flavored honey. Beat four eggs slightly and pour the hot honey over them. Cook until smooth and thick; when cooked add a pint of cream, whipped. Put the mixture into a mold, pack in salt and ice and let stand three or four hours.

Carrots a la Poulette.

Wash and scrape eight medium-sized carrots. Cut them into thin slices, cook in a small amount of salted boiling water with one thinly sliced onion; season with pepper. When tender add two tablespoonfuls of butter mixed with flour, stirring constantly, and just before serving stir in the well-beaten yolks of two eggs. Serve as soon as the eggs are cooked.

Tomatoes With Ham.

Cut medium-sized tomatoes in halves, dip in seasoned flour and fry brown on both sides. Fry in another frying pan as many small round slices of ham as there are halves of tomatoes. Broil the ham until crisp. Place a slice of ham on the tomato and pour over the ham gravy. Serve sprinkled with chopped parsley.

Apple and Banana Salad.

Scoop out apple balls, cover with lemon juice, and prepare banana balls, using a small French potato cutter. Heap on head lettuce, sprinkle with paprika and serve with a highly seasoned French dressing or a rich mayonnaise.

String Beans With Beurre Noir.

Prepare a quart of beans cut into inch pieces. Cook in boiling salted water; drain and place on a hot dish. Pour over the following sauce: Melt one-fourth of a cupful of butter until a delicate brown, add four tablespoonfuls of vinegar; when hot pour over the beans and serve at once. Salt pork cut in small dice and fried until brown may be used in place of butter for this dish. Pour the fat, with the bits of browned pork over the beans.

Delmonico Peach Pudding.

Turn a pint can of peaches into a pudding dish. Scald two cupfuls of milk in a double boiler. Mix two and one-half tablespoonfuls of cornstarch with three tablespoonfuls of sugar and one-half teaspoonful of salt. Stir into the hot milk; cook, stirring until the mixture thickens, then cover and cook for fifteen minutes. Beat the yolks of two eggs, add a tablespoonful of sugar and stir into the hot mixture. When the egg is set pour over the peaches. Beat the whites of the eggs very light, add four tablespoonfuls of sugar, spread over the pudding. Dredge with a teaspoonful of sugar and bake in a moderate oven to cook the meringue. Serve hot or cold.

"OLD SKEESICKS" ALL RIGHT

Maybe He Is a Little Too Careful About Money, but Consider the Good He Does.

That is what the boys call him, perhaps because he wears clothes that are not of the best and talks sometimes about the duty of being careful about spending money unnecessarily. "Old Skeesicks!" they whisper when they see him coming, and I sometimes think he hears what the thoughtless boys and the more thoughtless men say about him. Edgar L. Vincent writes in Farm and Life. But he just smiles and goes on about his work.

I saw "Old Skeesicks" night before last coming out of a home where things are not going very well just now. Father sick, mother worried to get things her little folks need to make them comfortable and bills crowding hard, now that the winner of the daily bread is laid on his back. A bit curious to know more about "Old Skeesicks," visit, I slipped over after supper and found them all cheery, no clouds in sight, and they told me with a glad light in their eyes that the good old farmer man had left a bushel more or less of good things to eat and he had told them if they needed it he would let them have money to tide over the hard spell.

Since then I have thought of some other things "Old Skeesicks" has done, and somehow I wish no one ever would speak disrespectfully of our old neighbor again. Trips to town after a coat for Tony Kingle, sitting up all night with Perry Potter when he was sick enough to die, plowing all day in the raw November wind for old man Hawley because he had the rheumatism so he could scarcely put one foot before the other, and always so good and kind and pleasant to meet. "Old Skeesicks?" Boys, let's never call him that, and let's be a bit more careful how we say things about other folks, anyway. We cannot always tell what is back of the old clothes and the rough outside. Under the tattered waistcoat may beat the truest, kindest heart ever given a man. If "Old Skeesicks" is a mite overcareful about the use of money it is only that he may do good with it. He was brought up in the school of economy. His heart is all right, though, and some day I am sure he will hear the Sweet Voice saying to him: "Inasmuch as ye have done it unto one of the least of these, my brethren, ye have done it unto me."

Aviation in France.

Speaking at the Aero Club of France recently, M. Flandin, under-secretary for aeronautics, said that, whereas in 1919 the aggregate distance flown in France was 218,750 miles, the distance flown in the first ten months of this year totaled 937,500 miles. Likewise the number of passengers carried grew from 960 in 1919 to 6,750 in the ten months of this year, while the amount of mails carried increased from 9 hundredweight in 1919 to well over 5 tons this year. The cost to the state in subsidies amounted to about $600,000. He went on to say that there were now 2,800 miles of routes in France in regular operation. The ratio of accidents was one to every 62,500 miles flown, and the fatal accidents worked out to one for every 134,374 miles.

Really Had No Use for Him.

An East Liberty woman who attends church, and who would faint if accused of being a "swearer," was much given to the use of the word "devil." Finally her five-year-old daughter began following suit and his nibs was called into the conversation oftener than was altogether nice and polite. This worried the mother and she began to be more careful. But the kiddie kept going on high until the parent was forced to chide her.

"What the devil's the matter with you, mommy?" queried the innocent. "You know I don't like the devil and I don't care how mad he gets when I swear. I never did like him!"—Pittsburgh Dispatch.

Love of Pictures Universal.

Mankind has always loved pictures. Races, without a written language, have left behind them rude carvings and murals to attest the fact. When an industry arose that appealed to this ancient appetite with pictures that moved, it did not have to wait long to see whether it would die or flourish. A dozen years ago the motion picture business, as we now know it, did not exist. Today the American public supports 16,500 moving picture theaters, makes 5,000,000,000 visits to them a year and spends $750,000,000 annually for this amusement. —The Nation's Business.

Plant at Victoria Falls.

The project to erect a power plant at Victoria Falls, on the Zambesi river, in South Africa, has been revived and it is exceedingly likely that a 250,000 horsepower plant will soon be under way at that place. It has been under discussion for many years, but the one thing which stood in the way was the proximity of cheap coal, but this fuel is now at such a price that there is a demand for hydro-electric power. Current will probably be conveyed to the Rand mines, 600 miles away.

King George Now "Black Pig."

King George has received a new title and is now a member of the Black Pig Order of Great Britain. It is a social organization of men who are interested in raising the famous Berkshire pigs, and particularly interested in making them reach unusual size. King Alfonso also is one of the Black Pigs.

HAD BEEN GREAT TRAVELER

Philadelphian Who Recently Passed Away Probably Held Record for Number of Ocean Passages.

America's "unofficial ambassador" to Great Britain has made his last crossing of the Atlantic. Death claimed T. H. Van Ingen, wholesale buyer of woolen cloth, in his eighty-first year, after his having made 162 trips across the big wet. His round-trip crossings were made twice a year. He was in many respects the most remarkable ocean traveler in the world, writes a New York correspondent of the Philadelphia Ledger. His trips were business journeys, yet no one who was fortunate to be on the same ship with him will ever forget his rugged personality; as a scholar with a fresh point of view, full of wit and anecdote, he was the life of every company of passengers he entered.

Throughout the great war he kept going, just as if there were no such pesky annoyances as submarines. He told me once on the steamship Lapland that he should have been a sailor; in fact, to the officers and stewards of the Atlantic he was always addressed as "Commodore Van Ingen." His hobby was better relations between the two English-speaking nations. The way he conducted his business, which grew until it was the leading wholesale woolen house patronized by our merchant tailors, was his best contribution in the direction of better relations between the United States and England.

His rival in business and close personal friend, William P. Willis, succeeds him as the champion voyager of America. Mr. Van Ingen's last earthly voyage was westbound in November. He came off the Olympic saying that he was "feeling fine." He died a few hours before Christmas. In the woolen trade he is known as the man who stabilized that industry. A thorough American, intensely patriotic, he could always find much to admire and praise in our "British cousin," and his friends were legion upon both sides of the ocean.

Recent Discovery Important.

Interesting, though technically incomplete, reports from Denmark signal the recent discovery, by two engineers, that an electric current passed through such a substance as lithographic stone sets up attraction phenomena of an apparently new order, says the Popular Mechanics Magazine. A novel form of electroscope of extreme sensitiveness and simplicity has been built, and a number of curious wireless experiments performed. Use of the new principle in constructing radio apparatus is declared to increase the speed of both transmission and reception about twenty times, and a special receiving instrument developed a capacity of 600 words a minute. Wireless-telephone messages were made to record themselves on paper, and a loud-speaking wire telephone was arranged with two violins as the transmitter and receiver, one of them loudly repeating the words spoken into the other.

Dueling Safe Outdoor Sport.

Dueling in Mexico is much less dangerous than a jaunt thorugh the streets of New York. As a harmless outdoor sport it is in a class with croquet or Lenox avenue pool. Not a week passes in Mexico City but that some one is insulted and demands a duel. "Pistols at twenty paces in the Bosque of Chapultepec" is the watchword.

When deputies in the chamber make tirades against others, the offended parties agree to meet. The event is widely advertised and the participants meet on the field of prospective carnage. Just then a messenger steps up and declares that the duel is forbidden by the government. All are satisfied and pleased.

Cows Highly Prized.

The cows of Periguex, France, which serve not only as milk givers, but as draft animals, are highly prized by their peasant owners, and nothing that can add to the comfort of the valuable animals is neglected. They are protected from the annoyance of swarms of flies which infest that part of France by quaint hand-crocheted veils which cover the entire head and hang down almost to the ground. The veils themselves are works of art, with long silky fringes of varying hues, or borders of crocheted lace. In schools which are aided by the Junior Red Cross of America, French children are taught to crochet, and so can make these useful veils.

Steel Airplane.

According to a recent report from Reuter's, Paris, a giant airplane is being built by the Breguet company, which, when completed, will be a veritable aerial ship. It is constructed with an engineroom in the nose of the machine, the total motive power being 1,000 horse-power, and a comfortable saloon for passengers has been placed in the fuselage. The wings are of a new design, and the machine is being built entirely of steel.

Some Flying.

During the year just passed pilots at March field have flown a distance equal to forty-six times around the globe. Jules Verne's hero accomplished the feat of going once "around the world in 80 days." According to March field statistics, this record would be far and away beated, as forty-six times around in 365 days would reduce the time for one circumnavigation to 7 days 26 hours and 26 seconds, to get down to minute details.

School Supplies

We have just added a full line of School Supplies to our Stationery Line have just bought—

1,000 Tablets

All kinds sizes, and prices, besides a big supply of

Pencils, Penholders

KILLIAN'S 9 CENT SALE

Ends Saturday August 27th

"Making New Bargain History in North Iowa"

The Killian Store

Mason City's Shopping center

Mason City Iowa

Mr. and Mrs. Wm. Messelheiser of Meservey were Klemme callers Saturday.

Mrs. Alice Withers and son from Belmond were visiting with Mrs. J. W. Brooks yesterday.

Hugo Neff, now of Goodell, was a Klemme visitor Saturday and Sunday.

Mrs. Williams, of Chicago, is here visiting at the home of her cousin, Mrs. Harry Brooks, and the family.

I am prepared to do dressmaking and ladies tailoring. Prices reasonable. Mrs. Green. A18-4

Editor Tierney and family of Garner were calling on Ye Editor and wife last evening.

Mrs. Henry Helps and daughter returned Monday from Clarion, Ia., where they went to attend a funeral

Mr. Wm. Kirkwood was visiting relatives and friends at Estherville this week.

Herb Bailey and family drove to Lake Okoboji last Friday to attend the Methodist Camp meeting which is in session there this week.

The fair is on at Mason City this week. Quite a number of Klemme people went over, especially Monday to see the races.

Mrs. J. Jorgenson, of Garner was a visitor at the home of Ye Editor Monday. She came down to see her grandson we presume.

A "little bird" told us that the wedding bells will soon be ringing in Klemme. Now that will give the women something to think about.

Mr. Ed. Wiepert and family of Persia. Iowa, came Sunday for a few days visit with Pete Merkel and family.

Mrs. John Hesselhaus went to Marshalltown last Thursday for a week's visit with relatives and friends.

Mr. and Mrs. John Wiesbrod of Fenton, Iowa, were calling on Rev. and Mrs. A. H. Meyer Saturday. Rev Meyer formery preached at Fenton.

Mrs. Clarence Arnold was operated on at a Mason City hospital last Thursday. She is reported as getting along fine.

Clifford Gimer, of Abbott, Iowa, came last Wednesday for a visit at the home of his uncle and aunt, Mr. and Mrs. A. D. Gimer and family.

Public Notice--As my son Clarence has left home will not be responsible for his debts. Mrs. Alma Louden. A-18-25p.

Ben Katter is somewhat under the weather at present as he is suffering with an attack of inflamatory rhuematism.

Ben Katter and family, and Mrs. R. W. Elder and daughter, Reva, returned from their Minnesota trip last week Wednesday evening.

Henry and Jake Krause came from Elkport, Iowa, Saturday for a visit with Klemme relatives and old friends.

Mr. and Mrs. Hero Frohling, of Belmond were over Sunday visitors at the home of their daughter here, Mrs. Harry Brooks.

Anybody wanting stock, Durocs or Blacks, will sell at reasonable price if taken soon. C. W. Dorweger, Britt, Ia., Klemme Phone 3607. 2

Mrs. Fred Orr, of Amery, Wis., is visiting with her daughter, Mrs. Harvey Stille and Mrs. Frank Kluckhohn.

Mr. Christ Behrens. of Littleport, Iowa, arrived in Klemme Tuesday for a short visit with the J. W. Waterman and Aug. Lau families.

Remember the Hancock County Fair, Britt, Iowa. Something doing every minute. August 30, 31, September 1 and 2. Day and night.

Do not fail to see the exhibits in the Floral Hall at the Hancock Co. Fair, Britt, Iowa, August 30, 31, September 1 and 2, day and night.

Levi Klotzbach is taking his summer vacation this week. Marlin Croner is assisting at the Jacobs store during his absence.

Henry Stromer, wife and son Paul, and Mrs. Art Schoenwetter and daughter, Ethel, went to Becker, Minnesota, Tuesday evening for a visit with Wm. Ax and family there.

NOTICE—I will not be responsible for any debts incured by my children. Mrs. Emma Schwichtenberg. A-11-28-p

The City Store--

Many of our customers will take long auto trips this fall and nearly every one will attend one or more County Fairs and possibly a State Fair.

Now then, we beg of you, when you get into the "Big Cities" stop and visit the City Store; look at their goods, remember their price.

Then when you get home, study your Kleme Store, and you will be a more satisfied customer, and you will boost for your own store at Klemme.

Here are thereasons why we can and do sell cheaper than the City Store:—

City people go to the store often and they buy just a little every time they buy; frequently they want that little delivered to their home for them, the result is it takes lots of sales people to wait on the little buyers and the average sales ticket in general stores is less than one dollar, and then it takes people and autoes to deliver the goods.

Now in Klemme, our customers are busy farming people; they haven't time to come to town every day, so when they do come they buy ten times as much as the average City Shopper and they do it quick, and load up their own goods and go home.

The result is it takes fewer clerks for the same volumn of business in our Klemme Store as it does in similar City Stores. In fact each of Wellemeyer's Clerks sells three times as much in a year as the average Sales Girl in the City Department Store.

So, dear Customer, when you visit the Ctiy Store and see these things, don't do as one of our Klemme fellows did. He walked up to the Proprietor of a Des Moines Store and called him a Robber.

These City Stores are not Robbers exactly; they must get more money for their goods than we do or they will "go broke," their expense is tremendous.

Wellemeyer Dept. Store

"A GOOD PLACE TO TRADE"

Klemme Iowa

Trunks, Traveling Bags, Suit Cases

The season is here. You are possibly anticipating a vacation or maybe getting ready to attend college somewhere. We wish to say that we have a full and complete line of the above mentioned line, and priced within your limit. Come in and see what we have to offer.

Just recived a shipement of Hart Schaffner and Marx Suits. You'll have to see these new styles and models to appreciate them. All the rich colors and mixtures in Brown, Green, and Gray.

Call at store within the next week or so and see the new gaments that are coming in from time to time.

You will note that clothing is cheaper-- consequently lower prices to the consumer. Shoes, neckwear shirts, hats, etc., arriving daily.

JACOBS & SON

A BRAGGING ROOSTER.

MRS. HENNY HEN had a large family of chickens and I am sorry to tell you that sometimes they did not behave, but pecked and flew at each other, quarreling just as some little children do, bothering their mother very much.

Little Rooster Chick thought because he was the brother that he was braver than the sister chicks, and he also thought they should mind him and do just as he told them.

Of course, this made sister chicks very angry and caused many quarrels,

but one day something happened which changed all this and made little Rooster feel very foolish.

One warm day Mrs. Henny Hen took her family under the bushes out of the heat and told them to keep quiet, but little Rooster began to brag that he was very brave and that some day he would be the cock of the yard and that all the others would have to obey him.

"I shall drive out all the other roosters and I shall have all the corn I want to eat before I let any of the hens eat a bit," said little Rooster.

"I guess you will have to be braver than you are now," said one sister chick. "I saw you run when the cat chased you the other day and Mother had to drive her away."

"I wasn't afraid of that old puss," fibbed little Rooster. "I wanted to see her run, and when I grow up I shall drive her out of the barnyard."

But his sisters did not believe this, and they all told him he was afraid and not brave enough to be the ruler of the barnyard.

"I am brave," piped up little Rooster. "I will show you how brave I am some day when a hawk comes to carry off mother. I will fly right at him and drive him away."

Mrs. Henny Hen did not hear her children quarreling, for she had left the shade of the bushes and was scratching for worms a little way off, and just then she clucked to her children to come and have part of the feast she had found.

All the chicks ran, but little Rooster reached her side first, and just as his mother was dragging from the ground a large, plump worm a very large Mr. Blackbird, who was sitting on a limb of the tree just over Mrs. Hen, flew down and grabbed the worm.

He did not get it, because Mrs. Hen was too quick for him, but little Rooster, thinking it must be a hawk, peeped loudly and ran as fast as he could back to the bushes.

All his sisters peeped and fluttered about, calling him a "fraidy chick" and telling him he would never be a brave Rooster who could protect the barnyard fowl.

Little Rooster felt very foolish, but it cured him of bragging, for every time he began to talk of his bravery all his sisters would peep, "Who was afraid of Mr. Blackbird?" and little Rooster would stop bragging right away.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

ADDRESSING LETTERS.

The true, strong and sound mind is the mind that can embrace equally great things and small.—Johnson.

NEVER use the form "Dear Friend." This was once in good form but it is decidedly out of favor now.

Never address a letter intended for various members of the same family thus: "Mrs. John Smith and family." Instead use this form: "Mrs. John Smith; The Misses Smith."

A simpler way is to address the envelope of the letter to the head of the family and explain within that your letter is intended for the whole family.

Never enclose a postage stamp in anything but a business communication when you ask for a reply. This is not necessary if you are transacting business in which your request is not in the nature of a favor.

Never even in a business letter use the expression, "Let me know by return mail," or "Send by return mail." As a matter of fact mails are so frequent between big cities now that it would probably be quite impossible to return by the next outgoing mail and obviously there is no return mail now save in some place like Bermuda where a boat bringing mail actually carries off the next outgoing mail. Any way there is a certain abruptness about the expression that makes it unsuitable even for business which should always be courteous even though to the point. "At your earliest convenience" is a better expression. But why use any of those stereotype expressions that are seldom used anywhere but in letters? The man now who writes the best business letters writes as he would talk and says instead "as soon as you can" or "as soon as possible," or something of that sort.

Don't use the ending "very truly yours," in anything but a business letter. It is no longer the right ending for social purposes or letters between personal friends.

Don't use the ending "respectfully yours" in ordinary business correspondence. It is the correct ending in an official or business letter addressed to the President, it might properly be used in addressing the vice president or justice of the Supreme court, but to use it simply because you are writing to someone whom you wish to do business with has an air of too great obsequiousness.

How It Started

THE KODAK.

IN 1732 J. H. Schultze accidentally discovered that silver chloride was darkened by light. Hellet, in 1737, made the same discovery about silver nitrate. Wedgweed, in England, made silhouette profiles by the use of this chemical. In 1839 Herschel discovered the fixing solution, or "hypo." These independent discoveries were united in 1840, when Miss Dorothy Catherine Draper posed for the first picture ever taken. The next year Talbot discovered the developing fluid, and the art of photography was born. The invention of the roll film instead of the glass plate started the kodak.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

EDNA.

IF THERE was ever a name without home or country antecedents or parentage it seems to be Edna. Etymologists record frankly nothing in the case of Edna. She seems to have just appeared. Something about her is reminiscent of the Norse and we can imagine Valkyries or the daughters of Vikings bearing such a name, but history fails to back up our fancy.

It must seem then that Edna came in some way from the ever popular masculine Edward. It may, indeed, be a contraction of the feminine form Edwina. Such being the case, Edna's ancestress must have been the famous Frau Uote, mother of Krieminga, who interpreted her dream and predicted the early death of her bridegroom.

She is the original source of Edwin and from her came Auder, a female Viking, one of the first Icelandic settlers who was later known as Alda.

There were three famous Aldas; one the wife of Orlando the Paladin; one a queen of Italy 926, and another a lady of the house of Este in 1393.

The masculine forms, Edwin, Edward, Edgar and Edmond, were flourishing in England, especially among royalty, and the name of Edward, the greatest of the Plantaganets, was carried by his granddaughter to Portugal where its honor was well sustained by her noble son.

Edna's talismanic gem is rightfully, then, the royal ruby, which gives power and courage and invincibility to its bearer. It is the king of gems and one who wears it is assured kingly qualities, so the old legend goes. Monday is Edna's lucky day, 7 her lucky number, and the poppy is her flower.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"MAD" AND "ANGRY."

FEW words are more frequently misused than "mad" and "angry." It must be confessed, however, that there is some excuse for the misuse of the words, since many psychologists hold that it is difficult to tell, when the emotions of a person are aroused, just where anger ends and madness begins. But in grammar there is a sharp distinction between "angry" and "mad." The former means to be vexed or out of patience, while the latter indicates madness, insanity. A person who is insane is mad, but a person whose mail is delayed is not mad, but merely angry. There is a figurative use of the word "mad"—that is, a use in which the words are not to be taken literally—such as "mad with pain," "mad with terror," etc.

"I am mad at that fellow," says a man; "he cheated me in a stock deal." He should say, "I am angry at that fellow," etc.

(Copyright.)

Increase in American Egrets.

A gratifying report telling of an increase in American egrets noted on a plantation on the Cooper river in South Carolina has been received by the bureau of biological survey, United States Department of Agriculture, from a correspondent there. Two years ago, the writer said, he saw on his plantation two birds of this variety: last season he counted ten; and this year he found twenty-nine on two different occasions. Officials express themselves as much pleased with such results of the protection afforded migratory birds under the federal bird treaty act.

A Shady Business.

Home Town Helps

COURT SETS VALUE ON TREES

Decision That Will Be of Interest to Many Communities Throughout the Country.

In Salem, Mass., a resident sued the town gas light company for damages caused by the killing of five shade trees through the escape of gas from a leaky main. A verdict for $1,000 against the company was rendered—$200 a tree. The decision is said to have been awaited with a good deal of interest by surrounding towns, for tree killing from this cause is a common thing. It has happened many times in Indianapolis, according to report, though complaints have not been heard lately with the frequency that characterized them back in the days when natural gas was piped through the streets, hastily and no doubt often carelessly.

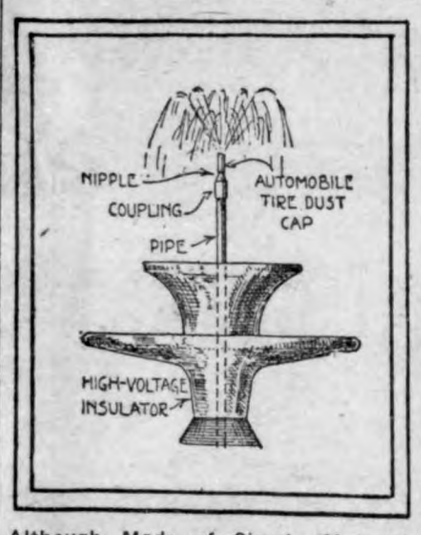
The killing of a thrifty, well-grown shade tree is usually a distinct loss to any property, commonly lowering its value. In view of the time required for the growth of such trees $200 is a moderate sum in the way of damages, and no amount of money, when it comes to that, can really recompense the owner of the trees. They have to him, especially if he planted and cared for them, a sentimental value that dollars cannot measure. They have added beauty to his home and he has counted them among his treasures. To a real tree lover, a beautiful tree, whether his own or not, seems almost to possess a personality of its own and to see it struggle for life and gradually die, brings real sorrow. It is to view a calamity.—Indianapolis Star.

SIMPLE FOUNTAIN FOR LAWN

Easily Constructed of Cheap Materials, and Adds Greatly to Attractiveness of Grounds.

This fountain has a double bowl or basin formed by placing a high-voltage insulator about 18 inches in diameter over a ¼-inch pipe that is connected with the water-line.

On the end of the pipe is a coupling having a smal nipple and over this is



Although Made of Simple Material, This Fountain Is Attractive.

attached an automobile-tire dust-cap, which is pierced with many holes about as small as the point of a pin. This cap fits down to the shoulder of the coupling.—Popular Science Monthly.

Advancement Everywhere.

The national agencies engaged in rural social work are reported as beginning to co-operate in their programs. The rural church is grappling with its peculiar problem in a dynamic manner. The rural home is being reconstructed in a new and encouraging way as a center of all social organization. Rural government and legislation are undergoing a far-reaching change. Country communities are thinking about country planning and art as integral parts of community life. Road building in country districts is proceeding with unprecedented rapidity, and the country life movement is on the verge of an international understanding.—Exchange.

Untactful.

Brown was the possessor of very large feet and a very bad cough. He entered a boot shop and the young assistant turned the shop upside down to find something to fit him. Brown had just tried on the fortieth pair when he started coughing.

"Nasty cough" said the assistant.

"Yes," gasped Brown. "Doctor says I've got one foot in the grave."

"I shouldn't worry," said the assistant. "You'll never get the other in; it's too big!"

Solved.

Uncle Hi had just passed his first night in a hotel and was still curious.

"Son," he inquired of a bellhop, "what's that funny contraption out the window?"

"That's the fire escape," replied the youth.

"By hickory! I wondered what made it so dad-blamed cold in here last night."—American Legion Weekly.

Too Much to Expect.

Jud Tunkins says he doesn't hope for a general drop in prices to equal the one that takes place when you come to sell a brand-new flivver that you have run a couple of days.

DAIRY

MILK DELIVERED TO CITIES

Figures Announced by Department of Agriculture on Total Cost to Ultimate Consumer.

(Prepared by the United States Department of Agriculture.)

The total cost of milk delivered to the consumer's door in Columbus, O., during the first six months of 1920, ranged from 11.3 cents up to 15.3 cents per quart, if the costs of one company which does business in "certified" milk are omitted, according to the figures recently announced by the United States Department of Agriculture. The cost of the raw milk delivered at the dairy ranged from 8.7 cents to 10 cents per quart. The total cost of operating the dairy plant, including the pasteurizing and bottling of the milk, ranged from 1 cent to 1.4 cents per quart, and the cost of delivering the milk from the dairy to the consumer ranged from 1.61 cents to 3.9 cents per quart.

The item of administrative expense varies widely, being as low as two-tenths of a cent per quart for one small company and as high as 1 cent per quart for a large concern.

Two of the seven companies covered were small concerns which produced their own milk supply. The cost of producing the milk for these companies in 1920 was 8.9 cents per quart, which is very similar to the price paid for milk by the larger concerns.

One of the items of cost which has attracted most attention among students of the milk business is the so-called "bottle loss." The department's study indicates that for the companies covered in Columbus this item ranges from one-tenth to two-tenths of a cent per quart.

Great difficulty was experienced in getting any satisfactory information concerning the shrinkage which takes place in the handling and delivery of milk, but according to the best data available this item amounts to between 2.3 per cent and 5.5 per cent of the total volume of milk.

Columbus is a city of 237,031 population, which is reported to consume about 27,000,000 quarts of milk per annum. This milk is supplied by over 2,000 producers, from 15 different counties, and is transported to Columbus from a territory having a radius of 35 miles. Conditions appear to be

Keeping Account of Feed Given to Cows Is Necessary to Determine Cost of Producing Milk.

fairly representative of many Middle Western cities.

The investigation covered seven companies, which sold about 16,500,000 quarts of milk and cream in 1920, or approximately 65 per cent of the total quantity consumed. The companies ranged in size from a very small one-wagon concern up to the largest, which operated 40 milk routes.

From the point of view of the farmer and the consumer, the important question is, What does it cost to handle the milk from the farm to the consumer? The cost of raw milk was between 63 per cent and 75 per cent of the total cost of the milk as it reaches the consumer.

During the period under study the retail price of Grade A milk in Columbus, as quoted by the dealers investigated, ranged from 15 cents to 14.5 cents per quart, though during 1920 the two small dealers sold their milk, which comes from tuberculin-tested cows, for 15 cents per quart. At the same time the wholesale price of milk ranged from 12 cents to 12½ cents.

The average number of customers per route in 1920 ranged from 169 to 297, and the number of quarts per wagon ranged from 178 to 378, the average being 262. It is noteworthy that the most profitable company was the one having the largest average wagonload.

TEACH YOUNG BULL TO LEAD

Calf Can Be Halter Broken With Little Effort If Taken in Hand at Right Time.

A bull that is to be kept for service should be taught to lead while he is a small calf. He can be halter broken at this time with a few minutes' effort. He should not only be taught to lead without a tight rope, but also should be taught to stand. If given this lesson while young, in after life, when he is led out for visitors to look over or to be photographed, he makes a much better appearance.

FARM STOCK

KEEP PRODUCERS INFORMED

Farmers Advised to Study Market Reports In and Out of Season to Keep Posted.

(Prepared by the U. S. Department of Agriculture.)

How can the farmer and stock raiser turn the live stock reports of the bureau of markets, United States Department of Agriculture, into dollars is frequently asked.

The answer is for the farmer to get so much information out of the reports that he can conduct his breeding, feeding and marketing operations a little more intelligently in the future, and therefore more profitably than in the past.

Market reports are history, and the chief value of history is the basis which it provides on which to forecast the future. In other words, what has happened in the past will probably occur again under the same or similar circumstances.

Small benefit is generally derived from reading a single market report or one covering a short period of time. Markets move in cycles, and the man who would keep informed must follow them diligently in season and out. This is a matter of particular importance to the stockman, because his business is, to an unusual degree, a long-time speculation. He must prepare now and lay his plans today in light of what he thinks the market will be anywhere from six months to two years hence. But how will the department's reports assist him in doing this?

First of all, he should take into account potential supplies of the particular class of live stock in which he is interested. Assume that cattle is his line. The monthly report, Stock at Stockyards, gives the number of cattle and calves marketed from month to month through 68 central markets. If such movements are unusually heavy for any considerable time, it may indicate a cattle shortage during the next year or two, and a shortage of any commodity usually means higher prices.

This same report also shows the number of cattle and calves that went back to the country as stockers and feeders. If such movements were exceptionally light, it would help to confirm the belief that a comparative shortage in cattle was impending. On the other hand, heavy stocker and feeder shipments would go a long way toward neutralizing the importance of

Market Reports Are Read With Much Interest by Progressive Farmers.

the heavy receipts, for the stockmen would know that most of these cattle going back to the country must be returned to market during the next few weeks or months and enter consumption channels.

Having established in this fashion a broad basis for his operations, let us assume the stockman is feeding a lot of steers for the market. He must now give market reports more careful and persistent attention than before. It is quite important that he know what kind of cattle are in best demand on the principal markets. If there is a steady inquiry for heavy finished cattle, and that kind are selling at a premium over lighter weights, it will probably pay him to "feed his cattle out," unless the cost of feed is exceptionally high.

If, however, consumptive demand seems to be drifting steadily toward lighter retail cuts of meat, or, because of general business depression or some other cause, is centering chiefly on the lower and cheaper grades, he may find it more profitable to market his cattle at an earlier age and before they have attained great weight.

Abundant information along this line will be found both in the live stock market reports and the reports dealing with meat-trade conditions in the large consuming centers.

In this connection the stockman will also be interested in keeping advised as to whether the slaughter of meat is increasing or decreasing and whether the movement applies equally to all classes of meat, or whether slaughter of beef is decreasing while that of some other class is increasing. This information is obtainable from the statistical report covering the live stock and meat situation, which is based on the federal meat-inspection reports of the bureau of animal industry and is also published monthly by the bureau of markets.

HOW TO FIGURE COST OF CROPS

Farmer Enabled to Compute for Himself Expense of Producing Various Crops.

REQUIREMENTS OF EACH CROP

If Precise Records Are Not Available on Labor and Material Expenditures Close Estimate Can Be Made of That Section.

(Prepared by the United States Department of Agriculture.)

Figures from which the farmer can compute for himself the cost of production of corn, corn for silage, wheat, oats, and hay, under given conditions, are presented in a preliminary report on labor and material requirements of those crops, recently issued by the United States Department of Agriculture. These figures cover the normal hours of man labor and horse labor, and quantities of seed, fertilizers, etc., required per acre for each crop, as determined by surveys by the office of farm management and farm economics.

Apply Basic Factors.

The money cost is found by applying to these basic factors the current rates for labor, seed, etc. Inasmuch as it has been found that, in general, labor and material costs approximate 80 per cent of the total operating cost for these crops, it is easy to find this total when the labor and material costs are known.

The figures given represent average crop requirements for the regions where investigations have been made. If the farmer does not have precise records of labor and material expenditures for his own farm, he can estimate them pretty closely by taking the average for his own region as a basis and applying current rates for labor and materials, with due allowance for any unusual conditions that may exist in his own case. The method of computation is as follows:

1. Determine the total cost of labor and material per acre by applying current rates to the quantities of labor and materials obtained from the individual's own records, or, if such are not available, use those given in the table.

2. Determine the total operating expense per acre by dividing the cost of labor and material by the percentage figure given for each region.

3. Determine the total acre cost of production by adding the interest charge or the cash rent paid for the use of land.

4. To determine the cost per bushel or ton divide the total acre cost by the yield per acre.

The following example shows how this method worked out in figuring the cost of corn for silage on an Iowa farm:

	Amount.	Estimated rate.	Cost.
Man-hours	27.9	$0.35	$9.76
Horse-hours	61.8	.25	12.95
Seed, pounds	9.9	.08	.79
Manure, tons	2.2	2.00	4.40
Gasoline, gallons	2.8	.25	.70
Coal, pounds	14	.005	.07
Twine, pounds	3.6	.25	.90
Total labor and material (80 per cent of operating expense)			29.57
Total operating expense (100 per cent)			36.96
Interest on 1 acre of land ($200 at 5 per cent)			10.00
Total cost			$46.96

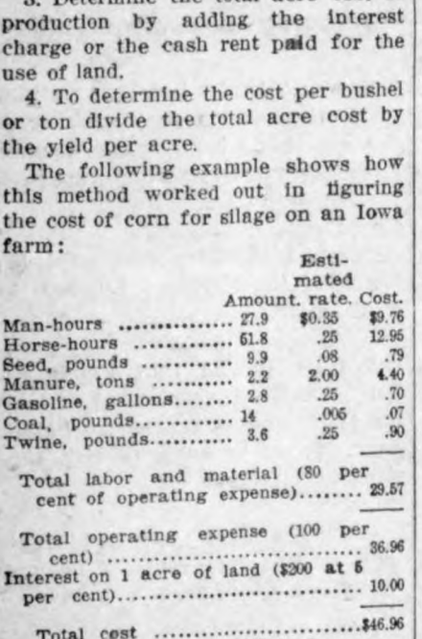
Average yield per acre, 9.8 tons.
Average cost per ton, $4.80.

VARIOUS CLUBS GOING GOOD

Reports of Returns of Work Done by Boys and Girls With Poultry and Other Lines.

(Prepared by the United States Department of Agriculture.)

Supervision of boys' and girls' poultry clubs by the United States Department of Agriculture, in co-operation with state agricultural colleges, was continued during the last fiscal year in seven states, where there were 1,-



Canning Club Girls Inspecting a Club Garden.

186 clubs with 29,480 members, of which 12,786 made reports from which the following totals have been compiled: Eggs set, 731,709; chicks hatched, 510,478; value of products sold, $94,791.32; value of stock on hand, $382,277.37; exhibits held, 712; members exhibiting, 5,615; prizes received, $9,681.11. A feature of progress was the improvement in quality of fowls bred by club members.

SPRAYING CELERY TO PREVENT LEAF SPOTS

Application of Bordeaux Mixture Is Recommended.

Treatment Should Continue Throughout Growing Season and More Especially in Moist, Cool Weather—Apply With Pump.

(Prepared by the United States Department of Agriculture.)

Celery plants should be sprayed with bordeaux mixture every ten days to two weeks to prevent leaf diseases, which often seriously injure the crop for market purposes. These leaf spots occur generally in celery-growing districts in the United States during cool, moist weather. Home-made bordeaux, composed of 4 pounds bluestone (copper sulphate) and 4 pounds stone lime to 50 gallons of water, is the cheapest and best fungicide for the purpose. The spraying should be begun while the plants are still in the seed bed and continued throughout the season. The sprayings should be more frequent during moist, cool weather favorable to the development of the leaf spots

Healthy Stalk of Celery.

and farther apart in dry, hot periods. Apply the mixture thoroughly with a pump which will give a very fine misty spray that will cover the plants but not run down the stalks and thus disfigure the stems.

Since the disease is carried over winter on the seed and in the soil where diseased celery was grown the previous year, it is important that new soil be used in the seed bed or the old soil sterilized by steam, hot water or formalin solution and that disease-free seed be planted.

DON'T CROWD GROWING CHICK

Where Space Is Limited Youngsters Become Overheated, Causing Outbreak of Colds.

Growing chicks must not be confined to crowded quarters at night. If they are, they will become overheated and this, in turn, will lead to the development of colds of which it is very difficult to rid the flock and which may be carried along through the summer and fall, causing a serious outbreak of colds in the laying flocks the following winter.

How can one tell whether or not the chickens have enough room? One of the best indications is the condition of the plumage. If the plumage is bright and clean it is a good sign that the birds are doing well and have room enough. If the plumage is soiled by droppings, it is an indication that there is not room enough for all of them on the roosts, with the result that some are compelled to rest on the floor beneath the roosts and thus become soiled.

A trip to the growing houses after dark will also determine whether enough room is being provided. If there is not space enough so that all the chickens can find room on the roosts, the quarters are too crowded and some of the chickens must be taken out. If all can find room on the roosts comfortably and if the house is well ventilated, the quarters are not crowded and the youngsters should do well.

CONCRETE FLOORS ARE BEST

Promote and Protect Health of All Farm Animals and Increase Profits for Farmer.

A concrete barnyard makes a fine exercise lot in all kinds of weather and always affords a dry spot for the animals' bed. Every shower washes the surface clean and flushes the droppings into the manure pits. Concrete yards lighten the work of the housewife, as there is no mud to be tracked on the walks and kitchen floor. The use of rubber boots is unnecessary. On concrete floors not a particle of grain need be wasted. The way to the water trough is always dry, smooth and passable. Concrete floors promote and protect the health of farm animals and increase the profits of farming, stock raising and dairying.

POULTRY

GUINEAS FAVOR FREE RANGE

Fowls Can Be Depended Upon to Pick Up Considerable Portion of Their Food.

(Prepared by the United States Department of Agriculture.)

Most guinea raisers allow their breeding stock free range of the entire farm at all times, and this helps to keep the birds strong and vigorous. During the winter the breeders should have been fed a grain mixture of corn, wheat and oats twice a day, and where no green feed was available, vegetables, such as potatoes, turnips, beets and cabbage. Animal feed is essential to best results and can be supplied by feeding meat scrap or skimmed milk. Given free range, where the supply of natural feed during the winter and early spring are ample, as it usually is in the southern portion of the United States, the guineas can be left to pick up a considerable part of their feed, say poultry specialists of the United States Department of Agriculture. Free access to grit, charcoal, and oyster shell is necessary throughout the breeding season. Avoid having the breeders too fat, but keep them in good, firm flesh.

Like quail and most other wild birds, guinea fowls in their wild state mate in pairs, and this tendency prevails among domesticated guineas, also, provided the males and females are equal in number. As the breeding season approaches, one pair after another separates from the remainder of the flock and ranges off in the fields in search of a suitable nesting place. Once mated this way, the male usually remains with his mate throughout the laying season, standing guard somewhere near the nest while the hen is laying, and ready to warn her of any approaching danger.

However, it is not necessary to mate them in pairs under domestic conditions to secure fertile eggs, and most breeders keep but one male for every three or four females. When mated in this way the hens are more apt to lay near home, and several usually lay in the same nest, thus making it much easier to find the nests and gather the eggs.

While guineas can be kept in the best breeding condition upon free

Guineas Can Be Confined if Necessary, But They Do Best When Given Free Range.

range, still they can be confined, if necessary, and satisfactory results obtained. One extensive guinea raiser has confined as many as 45 hens and 15 males in an acre pen throughout the breeding and laying season and been successful. This pen is inclosed with a wire fence five feet high, and the birds are prevented from flying over by clipping the flight feathers of one wing. Within the pen is a grass pasture with bushes here and there where the hens make their nests by scratching out a bowl-shaped hollow in the ground. The winters being severe, a roosting shed is provided, having a cleated board reaching from the floor to the roosts for the wing-clipped birds to walk up.

GEESE GOOD GRAZING STOCK

Fowls Play Important Part in Utilizing Waste Grain About Stables and Feeding Pens.

Geese have an important part in the endless war on waste. They are in a class with chickens in utilizing waste grain about stables and feeding pens. In a larger measure than chickens or any other kind of poultry they are a grazing stock, getting their living in large part from the ordinary grasses of the pastures, say poultry specialists of the United States Department of Agriculture. When it is considered that the demand for geese is steady, and extended over almost the whole year, not confined to holidays, as in the case of turkeys, that geese excel all other poultry as producers of fat, the importance of geese in the poultry scheme is realized.

Human Dissatisfaction.

"The neighbor next door annoys me incessantly by the racket he makes with the lawn mower."

"How about the neighbor on the other side of you?"

"The way he lets his lawn go without attention is a disgrace to the street."

Formula.

The only way to get along with women is to let them think they are having their way, and the only way to do that is to let them have it.—Life.

SURELY DESTINED TO SHINE

Youth's First Performance an Assurance of His Future Distinction as an Architect.

A Chicago man stopped an architect in the street.

"Good morning, Harkins," said the architect. "Are you thinking of building again?"

"No; I stopped you to inquire whether you could take my son into your office as an apprentice. With training I believe he would some day prove a magnificent architect."

"He has shown some talent, has he?" asked the architect, glumly, for he was disappointed at not getting another contract.

"Talent! Genius, sir; positive genius!"

"What has he done?"

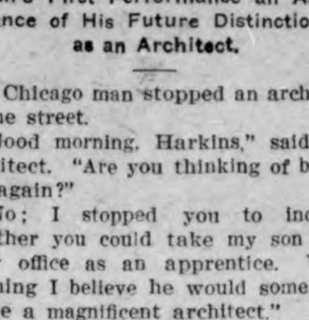
"He designed a garden for our Christmas tree."

"Well, what is there so remarkable about that?"

"Why," answered the father, "he designed that garden for $8 and it cost $32!"—Philadelphia Ledger.

ASPIRIN

Name "Bayer" on Genuine



Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicycacid.—Advertisement.

SCREENED FROM VULGAR EYES

Only a Short Time Ago the Japanese Emperor and His Heir Lived Lives Apart.

There must be many Japanese still living who can remember when their countrymen would have regarded with horror the manner in which the crown prince allows himself to be gazed upon by foreign crowds.

So late as 1867 no Japanese was allowed to look upon the emperor, who lived a life apart in the seclusion of his palace. All that was seen of him by those who waited on his commands was his back. When the rule was first modified to the extent of his leaving the palace, all shutters had to be put up, all blinds drawn, and even the crevices covered with paper, and no one was permitted in the streets.

Vast changes have taken place since then, but even today it is not considered quite proper and respectful by the masses of the people to look at the emperor or his heir when they drive through the streets.

Automobile Lighting Law to be Enforced Sept. 1

CE AUTO LIGHTING LAWS BY SEPTEMBER 1

hts Must Have Lens Approv- By Highway Commission

wide enforcement of the bile headlight law will be un- September 1.

in the last week notices to ect have been mailed to every treasurer in the state. Lists es which the state highway ssion have thus far passed on proved have also been mailed. ther. that the manufacturer nclude with each set of lenses h stipulations as to installa- s may be made by the Iowa Highway Commission in plac- lenses upon an approved list, r with such explanatory mat- will enable the buyer to in- he lenses strictly in accord- with such stipulation.

Must Have Tilt

lenses must be installed with ial tilt sufficient to cause the f the beams to be horizontal the condition of load, which ause the maximum upward re- n of the beam. The head- on all Ford cars taking cur- from the flywheel generator, be tilted nine inches per 75 n addition to the above speci- itial tilt.

dimmer requirements are set in section 25 of the motor ve- law. The section on dimmers evised somewhat by the last ature.

Dimmers Required

now declares that auto lights be of sufficient illuminating to be visible at a distance of eet and to "reveal any persons. e or substantial object seventy eet ahead of the lamps."

her provisions of the law in- : "It shall be unlawful to use vehicle of any kind and lighting e of over four candle power, ped with a re&ector, unless the shall be so designed or arrang- hat the directly re&ected and used beam of such light when ured seventy-five feet or more d of the light shall not rise e forty-two inches from the lev- face on which the vehicle stand r all conditions of load."

Spotlight Rules

a spotlight is used on a motor le it shall be unlawful for any n to direct its rays toward the of the driver or occupants of pproaching vehicle, or to the of the center of the traveled when meeting another vehicle. o person shall operate a motor le on any highway of this state pped with an electric bulb or r lighting devices of a greater city than thirty-two candle pow- o matter how the same may be ed, covered or obscured.

ny person who shall turn all or of his motor vehicle's lights off the purpose of avoiding arrest identification shall be deemed y of a misdemeanor and upon riction subject to a fine of $100 mprisonment for a period of not xceed thirty days of both fine and risonment."

L GRANGE TO MANAGE THE SINESS FOR THE NORTHERN LUMBER CO. HERE

he many Klemme friends of Mr. l Grange will be pleased to hear he will return to Klemme as nager for the Northern Lumber yard here. Paul arrived in mme yesterday to resume his old only before he was assistant to Palmer.

Paul understands the work thoro- and will make the company a d manager, we are sure. Mr. ard Doyle who has managed the iness temporarily will remain as istant in the yard.

We are indeed glad to welcome l back to Klemme.

We have not had an interview h him but suppose he will move Klemme as soon as he can locate esidence.

He is in the creamery business at bster City with Mr. Uben and we not know whether or not he has d his interest there or not.

Given Life Sentence

HAROLD GRUETZMACHER AND MAE WARNOCK MARRIED!

On Honeymoon Trip in Minnesota

Harold Gruetzmacher, of this city, and Miss Mae Warnock, of Iowa Falls, were married at Hampton, Iowa, Saturday, August 20th.

The above announcement came as a complete surprise to their Klemme friends.

They immediately left for Northwood where they spent Sunday and from there they went to Minneapolis for a couple of days and are now at Duluth. Minnesota, spending a few days with relatives. They made the trip in Mr. Gruetzmacher's car.

Both of these young people are well known here. Harold is the only son of Mr. and Mrs. Frank Gruetzmacher of this city. He completed the Klemme schools and finished the high school course at Garner and then took work at Iowa Falls College, later taking two years electrical engineering at Ames. He answered the call of Uncle Sam when war broke out. He is an ideal young man and is well liked by all.

The bride's parents reside at Iowa Falls. She is also well known in this city as she taught school here for a couple of years, later teaching in the Gowrie schools. She is a very fine young lady and made a great many friends here during the time she resided in Klemme. She is a very satisfactory teacher.

Both Mr. and Mrs. Gruetzmacher will teach in the Belmond schools this year..

They will move to Belmond as soon as school opens where they have rented a house and will go to housekeeping.

There many Klemme friends wish them a happy journey through life.

THE DAIRY CATTLE CONGRESS AND INTERNATIONAL BELGIAN HORSE SHOW

Waterloo, Ia., Aug. 25. Special—Some of the most prominent men in the agricultural world, including Secretary of Agriculture Henry C. Wallace, Sen. W. S. Kenyon from Iowa, and James R. Howard, President of the American Farm Bureau Federation may be seen and heard at the Dairy Cattle Congress and International Belgian Horse Show this year.

Several new features will be struck in the general program of these two livestock exposition which will be held here September 26 to Oct. 2, this year. Among the innovations will be a special Farm Bureau Day.

According to E. S. Estel, secretary-manager of the shows, efforts to procure the services of Pres. Howard, Secretary Wallace, Sen. Kenyon and leaders in farm bureau work in Iowa will be made for the occasion and the prospects that these men will be present are rather bright. This will be the first time in history of the Dairy Cattle Congress that such a day has been held and if successful he management will make it a regular feature each year.

Gov. N. E. Kendall and his staff will be honored on Iowa Day, as has been the custom in the past. Special preparations will be made to make the 1921 Iowa Day the greatest of all and Mr. Estel had intimated that several surprises are in store for the visitors that day.

Waterloo day will also be celebrated as usual. All the leading business houses in the city will more than likely close their doors on this day and visit the grounds. Special speakers will be provided for this day as well as the other two special days.

While it has been definitely decided to have the above three special days. Farm Bureau, Iowa, and Waterloo—the exact dates have not yet been decided upon. Mr. Estel will know definitely within the next few days, whether or not the men under consideration for these days will be able to attend the show.

ADMINISTRATIONS PRACTICAL METHODS TO LIMIT ARMAMENTS

Inclusion of Discussion of Eastern Problems Prove Wisdom and Sincerety

Washington, Aug. 25.—Not only have the interested powers agreed to without qualification President Harding's invitation to a conference in Washington to discuss the limitation of armaments but they have acquiesced in the proposition to discuss also the related problems of the Far East. This is another victory for that candor of purpose, directness of speech and sincerety of action which is once more distinguishing American diplomacy and characterizes this nation's dealings with other powers.

When President Harding issued his call for the conference, he especially and clearly set forth the purpose to be twofold,—the limitation of armaments and the discussion of those Far East problems which are so intimately related to the question of armaments. Since then partisan critics and those who are apposed to any move in the direction of disarmament, have endeavored to stir up a public sentiment that the President had undertaken to do too much—that he should have confined his call to discussion of armaments and not have included any of the problems effecting the Orient and the Pacific ocean.

Realize Harding's Sincerety

Whatever its motive and source, this propaganda has signally failed. This country is even more solidly and earnestly back of the conference than it was at the time it gave such an enthusiastic reception to the President's call. The growth of approving sentiment in this country is matched only by the growth of a similar sentiment in other countries, particularly the countries included in the invitation. People have been quick to see not only the wisdom, but the sincerety, back of the President's linking the question of armaments and Pacific problems. Any discussion of the reduction of armaments without some settlement of the problems of the Far East, would be merely academic and herefore a sham and a pretense.

To discuss. however solemnly, the reduction of armaments without going back to first principles and discussing international differences which make armaments necessary would be a futile and hypocritical proceeding, productive of nothing good or enduring and calculated only to serve the ends of political expediency. President Harding and Secretary Hughes realized this when they included the discussion of the causes of disarmaments.

Did Not Dodge Responsibility

There is no doubt that both of them appreciated the difficulties of such a conference which discusses seriously the causes of international friction and attempts to remove them, goes o the very roots of war and attempts to uproot them. It would have been much easier to have limited the conference to an academic and idealistic discussion of universal peace and adjourn without accomplishing anything practical, but to have done so would have been a cheap political trick, designed to fool the American people and the result would have broken the hopes of all the people.

It is because both the President and his Secretary of State, and all of his advisors in the Administration and the Congress, desired sincerely to remove the causes of armament and thereby surely hasten the day of universal peace, that the subject mat ter of the proposed conference was widened to include the Far East problems. Nothing testifies more to the sincerity of the Administration than this one fact.

Not only are the critics at home silenced, but skeptics abroad are convinced. Those powers which exhibited reluctance to agree to discussion of Pacific problems were pardonably suspicious of the proposition at first. The State Department has been able to reassure such powers that there is "nothing back of" the invitation of the President to sit down face to face and talk hings over, no "bag of ricks," nothing "up our sleeve," no preliminary commitments or promissory notes. With a world full of suspicion and dissatisfaction as the aftermath of the Paris Conference it was a task of no small magnitude for Secretary Hughes to get the interested powers back to a correct perspective.

JUST ANOTHER REASON WHY THE PURE MILK ORDINANCE SHOULD BE PASSED HERE

The Times has been agiating the pure milk question in several issue the past month and citing instances why a pure milk ordinance should be made a law in Klemme.

This week's issue of the Garner Signal contained the following item and shows how owners of fine dairy cattle feel about the tuberculin test:—

"Some weeks ago we reported that several head of cattle were condemned under the tuberculin test and sent to the slaughter house. Ray Durant had a high priced Holstein bull and one cow among the lot. Both showed tuberculosis when they were slaughtered but Ray will receive part of their value from the state. I has since been learned that the herd where Ray got the bull was tested and all were condemned except one calf. While Ray will lose in dollars and cents at this time by losing his cattle, yet as he says, in time his entire herd would have become infected, beside the family taking the chances of contracting the diease. He will buy nothing more until it has been tested and this will place his herd at a premium. Ray has a fine herd of Holsteins started and in a few years will have a bunch to be proud of.

Burglars Steal Dentit's Tooth Filler

The Garner Signal says "Dr. Morrison was robbed one night last week of all his gold—that is, all the gold he had in his office for dental work. About the same time two dental offices at Clear Lake were also robbed." If the dentist needs metal perhaps he can borrow some linotype metal from Bro. Clark which would make an ideal filling or a crown.

Klemme People To Cross Plains To Sunny California

Willer Takes Match

WILLE RDEFEATED GOFFE IN MATCH HERE FRIDAY

The wrestling match which was held here at the Idle Hour last Friday evening drew out a good crowd.

The main match was between Willer of this place and Goffe of Forest City. Willer threw Goffe two straight; the first fall in 5:30 and the second in 19:00. He had a body scissors on Goffe both times along with a full Nelson. Both men put up a good match, althoug Goffe had Willer out-weighed a number of pounds.

The preliminaries were a regular comedy. Homer Butcher and Sam Harvey went to the mat to decide the "middle weight championship of the world." They whestled a few minutes and then rested up a bit, took a drink of water and went to it again. They stayed by each other 12 minutes and decided to leave the championship for some future date when they had better wind. They were about equally matched and the honors were split.

The "unknown" from Kanawha, who was to wrestle Liepziner, evidently had a case of cold feet which he could not thaw out—he failed to show up and no one could be found to take on this fast Klemme lad.

All enjoyed the match and the promoters will perhaps stage another match at a later date.

IMMENSE CANDLE TO BURN 5,000 YEARS FOR CARUSO

New York, Aug. 24.—An eighteen foot candle that can be burned on every All Soul's Day for 5.000 years is being made here as a memorial to Enrico Caruso from the inmates of an orphan home, to which the Metropolitan opera star contributed $10,000 a year for many years. It will be placed in the church of the Madonna of Pompei at Naples, Italy.

Antonio Ajello, maker of the candle has erected a derrick in his shop, by means of which the candle is dipped thice daily into boiling tallow. It will be completed in ten weeks, and will weigh about 1,000 pounds. Mr. Ajello has figured that the candle would burn continuously for thirteen years and seven months.

AMERICAN LEGION DAY AT THE HANCOCK COUNTY FAIR

At the Hancock County Fair, Britt Iowa, on American Legion Day, Friday, September 2nd., all Ex-service men in the county will be admitted free—under the following condition:

Members of the American Legion will call on their respective posts, prior to September 2nd, and obtain a ticket.

Those who are not members of the Legion will present their discharge papers at the gate, September 2nd., and will be admitted free.

Schultz Family Have Re-union

Garner Leader—Mrs. Jas. Manuel, Jr. of Mora, Minnesota, is visiting at the home of her mother, Mrs. Schultz. Sunday there was a reunion of the Schultz family at the home of Mrs. Oscar Musfeldt at Clarion. There were present Mrs. Schultz, Mrs. H. Greiman, Mrs. Musfeldt, Miss Rose and Arthur of this place and the Walter Schultz family of Klemme.

LAND SELLS AT $500 ACRE

Deal Was Sash and at Top Price

Early, Ia., Aug. 24.—Jacob Hartsell this week sold his well improved farm west of Early to Alvin Yender, who will take possession on March first.

This farm which contains 86 acres and has the finest of farm buildings, was purchased by Mr. Hartsell several years ago at $100 per acre, and was sold to Mr. Yender at $500 per acre. One feature of this sale which is especially noteworthy now is that the deal was cash.

TO LEAVE FOR CALIFORNIA OVERLAND NEXT WEEK

Motor Propelled House Will Take Them Over Western Plains

We were up to see Chas. Stiehl Tuesday to ask him a few questions about his intended trip to the west.

Charlie has his outfit complete now and we will say that it is sure a fine rig to make the long journey in. Mrs. Stiehl will accompany him on the trip as will also Arthur Kuck, the latter will supply the fish and game for the meals while Mrs. Stiehl will take charge of the house work and Charlie will do the driving.

We started out to tell about the "house on wheels." Charlie has built a regular house on his Ford truck. The house is 6 by 12 feet and is plenty of room inside. The frame is made of 2x4 and 2x2 material, with a pine floor. The frame was first covered with 12 oz. canvas and over this is waterproof auto top material, this extends up the sides to within about a foot of the roof and his open part is screened, and has curtains on the outside that roll up out of the way and can be let down over the screen in case of rain or cold weather. The outside of house is black and is trimmed with brass strips, which also help hold on the waterproof cloth. The shape of the house is square from the back up to the drivers seat where it comes in and joins the wind shield. There are doors on each side of the driver which have glass in the upper part with curtains also. Then there are also two other windows just back of the seat a trifle which will enable the other occupants to see the road ahead plainly from any place in the house. A good sized door is also on the back, which is partly screened. A step on the rear admits one to the house. All doors are fitted with Yale locks. The interior of the car is very conveniently arranged. The stove will set in the rear corner. A table will be in the center and there will still be room for Charlies favorite rocking chair and other chairs. The cot on which Art will sleep will be in "the upper story" as Charlie says. It rests on cleats in the front of the car near the drivers seat and in the day time it will be taken down and leaned against the side. The other bed is a full sized bed which will be fastened to one side of the house and the table pushed aside. In the day time it will also fold against the side. The interior will be divided off by a curtain which can also be pushed to one side when not in use. An average person can easily stand up inside the house on wheels.

We think that the above descibes the house quite well.

Mr. and Mrs. Stiehl and Art Kuck will leave in the car at nine o'clock next Thursday morning, Sept. 1st., rain or shine. to begin their long trip through the west.

From Klemme they plan to go to Hay Springs, Nebraska, by way of Sioux City. They will visit Charlie's brother Lou there. From that place they will start for Casper, Wyoming, where Chas. has some investments in an oil well and he will try to find the well.—if there is any.

They will also stop at Salt Lake City, Utah and from there their trip has not been determined. They may go through the Yellowstone or may wait until the trip home. They will spend a few weeks in California and other western states. They expect to stay several months and will not return to Klemme until late in the spring. They will ake their time in going and coming and will have lots of time to hunt and fish along the way.

They will have a fine trip and we hope they enjoy every minute of the vacation.

To Their Discredit.

Those who are the most accomplished do not always accomplish the most.—Boston Transcript.

Happiness Not All.

There is in man a higher than love of happiness; he can do without happiness and instead thereof find blessedness.—Carlyle.

THE SUNSHINE FAIRY.

"GOOD morning," said Father as little Henry came into the dining room, "isn't this a nice, bright morning, son?"

Henry did not answer. He jerked his chair from the table and slid into it with a sullen air, for Henry was cross because his mother had not let him put on his new shoes that morning.

"Heavy black clouds seem to be bothering you," said Henry's father. "Better drive them away or you will have an unhappy day."

But Henry did not answer. He kept his eyes on his plate, and a frown on his face, but when he pushed his dish

away from him and spilled the cream his father told him to go to his room and stay there until the cloud cleared from his face.

Henry did not quite understand about the "heavy, black cloud," but he did know, of course, that he had behaved badly, so he went to his room feeling that everyone was treating him unkindly.

"Have not got a heavy cloud on my face," he said, looking in the mirror. Then he drew the shade because someone had once told him that little fairies danced in the sunlight when it streamed into the room.

"Get out of my room," said Henry. "I won't have any fairies in here. I don't like girls, and all fairies are girls. Anyway, I don't believe in fairies, only those in picture books."

Henry was very cross as you see, and he did not want to see the sunshine, so he threw himself on his bed on his back to think over how cross everything was that morning.

All at once he heard some one crying. It seemed to come from outside his window. So Henry jumped up and peeked out.

The tiniest creature dressed in silver sat on the sill of the window crying.

"What are you crying about?" asked Henry, who really was a very kind little boy.

"I can't get in to do my work," said the little creature. "It is all dark inside and they shut me out. I am the sunshine fairy and I have to dance when the sun shines and make people happy. But how can I when they will not let me in?"

Henry raised the shade and up jumped the little fairy and danced into the room on the sunshine as it streamed in.

"Oh, haven't you any face?" asked the little creature, "or is it behind old black cloud? Sometimes he does hide faces, but I most always can drive him away."

Henry went to the mirror, and sure enough this time he found that in place of his face there was a heavy black cloud, through which he could see but dimly.

He looked at the sunshine and the little fairy had been joined by hundreds of others who were dancing about in the jolliest manner.

Henry forgot all about the cloud as he watched them, and presently a stream of sunshine cleared away the cloud and Henry jumped up, for you see he was dreaming all the time he had fallen asleep.

The wind had blown the shade and into the room came the bright sun, but Henry could not find the fairies though he looked everywhere.

"They did drive away heavy black cloud," thought Henry, "and I do feel happier. Perhaps there are some fairies in the sunshine after all."

Dorothy Dalton

Being given the chance to display her cleverness in emotional parts has brought merited fame to handsome Dorothy Dalton, a famous "movie" star known to the patrons of the motion picture houses. Her work in leads has been crowned with glory and she has pleased her thousands of admirers.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

WHEN SHE WALKS.

"A little neglect may breed mischief."—Franklin.

WHEN walking with a woman it is customary for the man to ask to carry any parcels she may be burdened with. It is a woman's privilege to insist on carrying them herself, but remember that it is very embarrassing for a man to walk with a woman who is burdened as, besides feeling regret that he cannot aid her, he is put in a false position by those whom he may meet.

Every well-bred woman should know that it is no longer considered the right thing for a man to take her arm in walking unless she is feeble or the way hazardous. If she happens to be accompanied by a man who is not aware of this fact she should not take offense, but if he takes her arm she should ascribe it to his ignorance of that rule of good breeding and restrain him by simply assuring him that she can manage much better when unaided.

If a woman is overtaken or overtakes a man of her acquaintance she is privileged to ask him to accompany her as far as their ways go together, though needless to say she would say this only to a close acquaintance. She should not do this, however, when he is accompanied by another woman and would not usually wish to when he was accompanied by another man.

When taking a pleasure walk together it is always the woman's privilege to set the pace and make suggestions as to the direction in which the walk should be taken.

If a woman chances to see that a stranger has dropped something, what should she do? This is a question that sometimes comes up. She should not stop to pick it up unless the man is decidely older than she and she is very young. She should courteously attract his attention to the fact that he has dropped the article and leave him to pick it up for himself. However, if she is walking behind the one who has lost the article and not to pick it up for him might mean that it would be trodden upon she may in common sense stoop and get it.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

THERESA.

ONE of the prettiest of feminine names which for some reason has always been associated with France and yet is essentially English, is Theresa. It is one of the many feminine names which come from the harvest and its original source is a Greek word meaning to reap or gather in a crop.

The first to bear the name was a Spanish lady, the wife of a Roman noble called Paulinus. Both Paulinus and his wife were devotees of St. Jerome. The name Theresa had great vogue in Spain and is finally found as Teresa on a throne in Leon in the Tenth century.

The most noted Teresa appears in the Sixteenth century when the Roman Catholic church produced the remarkable saint of that name through the Spanish connection of the house of Austria; the princesses of Spain and Germany were frequently christened Teresa.

In France it became Terrese through the queen of Louis XIV and Provence called it Terezon. The empress-queen added greatly to its fame, her noble spirit winning all hearts.

St. Theresa of course brought it to England through the Roman Catholic religion, though its vogue there did not begin until after the Reformation.

England also calls her Terry and Tracy; France makes her Therese. She is Theresa in Portugal and Teresa and Teresita in Spain, Italy uses Teresa and Teresina, in Germany she is Theresia.

Theresa's talismanic stone is amber. It promises her good health, wards off evil spirits and warns approaching illness by paling in color. Thursday is her lucky day and three her lucky number.

How It Started

THE REAPING MACHINE.

ALTHOUGH we are accustomed to regard reaping by machinery as a modern art, there are records that in Pliny's time the Gauls used a crude comb-shaped affair of knives to strip the heads from the standing grain. The first real patent on a reaping machine was granted to John Boyce of England in 1799. Richard French and J. J. Hawkins received the first American patent rights in 1803. But it remained for McCormick, in 1831, to make and demonstrate the first practical reaping machine.

JANE'S SHARK

By MARY A. MURDOCK.

(©, 1921, by McClure Newspaper Syndicate.)

Jane's glance triumphantly swept the long stretch of deserted beach. Not a soul in sight! For an hour at least she might confidently expect to keep all this wonder to herself. Gleefully she visioned the chagrin of Tom, not to mention her half-dozen other satellites, when they should have discovered her to have already taken her morning dip, without their ubiquitous ministrations.

It was five o'clock, and half an hour before sunrise. Jane waded out towards a not distant sand bar, her eyes fixed on the eastern sky, where the gray mist was parting, to reveal hidden color treasure of orange and gold. She felt suddenly awed. How big everything was! How tiny her hands seemed, buoyed in front of her on the surface of the water. At that moment she half wished for a chance to snub the owner of a certain steadying if presumptuous arm, then shaking off the weakness and determined to glory in her new found freedom, she plunged, squealing irrepressibly, into an oncoming wave and swam with an even, sure stroke for the bar.

Once there, she turned to glance at the hotel, oddly somnolent in the half light, then with a superior sniff, intended for its lazy inmates, she stretched luxuriously on the sand and gave herself up to the enjoyment of the spectacle to the eastward. For a full half-hour she watched and marveled and dreamed. How trivial now seemed yesterday's preplexities and intrigues! Her unaccountably poor showing at the tennis tournament, that cataclysmic error which had caused her partner to view her in stunned surprise—how little such things really mattered. She remembered with a certain sense of shame the flirtations which had marked her stay at this most popular of beach resorts. What poor sport it was, after all. Henceforth she determined to repress the eternal Eve in her and to save her smiles for—him. And a delightful speculation gripped her as to who—he might be.

A cold tongue of water lapped her bathing slipper and she jumped up, shivering. The tide had risen. Jealous waves were already trying to edge her off her perch. She fussed with her cap in preparation for the swim back, pausing for a last look at the King of Day, now well over the rim of the world.

For a while she stood there, a charming figure in her modish sea suit, eyes agleam with youth's love of life, curling tendrils of gold whipping her creamy throat. Suddenly she stiffened and a sharp cry escaped her.

Cradled between two of the larger overlapping waves she had espied something sinister and white, a gleaming mass that moved and glowed in the long rays of the morning light. A sort of numbness seized her, as through her mind there flashed all the stories she had heard recounted of the white-bellied terror which many of the hotel habitues were reputed to have glimpsed thereabouts, always from the asylum of a dock.

Jane viewed despairingly the fast-diminishing strip of sand. Ten minutes at the most, and she would have to take her chances with the thing in the water. On the verge of fainting, she yet managed to find her voice. At first thin and weak, desperation lent it strength. A favoring breeze aided her, and the cry which roused half a hundred sleepy vacationists from their beds was that of "Tom!"

Tom heard with the rest, and not one of the wondering watchers saw anything grotesque in his pajama-clad figure, as it flew to the water's edge.

"Get a boat, Tom," Jane screamed, then toppled and fell.

But Tom didn't go back. A few minutes and he had in his arms a strangely docile Jane, who could only whisper faintly, "Tom, darling Tom," and who clung piteously to him.

As he swam back to the beach, now thronged with half-clad people, his precious burden held close, he was too deliriously happy to wonder why Jane, conceded the best swimmer in the crowd, had not dared negotiate the short distance. Time enough for explanations later—for the present life was very sweet, with that soft "Tom, darling Tom" in his ears.

Through a haze of joy, he was conscious that one of his vigorous strokes brushed away something which felt like seaweed, but which was apparently a white satin petticoat, and he wondered from whose clothesline it was missing.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"TO STOP AND TO STAY."

HOW frequently do we hear some one say, or read in a newspaper, "He is stopping at the Waldorf-Astoria hotel." A moment's reflection should tell the writer or speaker that a person does not "stop" at a hotel unless he walks or drives to the hotel and halts his progress there. It is proper to say, "The parade stopped at the hotel," meaning that the parade ceased its motion when it reached the hotel. But the parade could not "stay" at the hotel. A person makes a "stay" at a hotel, not a stop, and he stays there. One should not say, "I stopped at the summer resort six weeks," but "I stayed there six weeks."

The true meaning of the word "stop" was well understood by the man who did not invite his professed friend to visit him. He said: "If you come at any time within ten miles of my house just stop," says one authority of English.

Acted as Wedge to Stimulate Dairy Interest and Promote Better Methods in South.

(Prepared by the United States Department of Agriculture.)

An example of how bull associations, organized through the help of the United States Department of Agriculture, act as a wedge to stimulate dairy interest and promote better dairy methods in a community is illustrated by the work which has been done in Spartanburg county, S. C. Five years ago little dairying was done in this county, according to dairymen of the department, but now the industry is making rapid progress and up-to-date methods are being practiced largely as a result of the organization of a bull association.

The interest in dairying dates from the beginning of the purebred bull movement in the vicinity of Campobello in 1916. At that time a breeder, in

The Best Way to Improve a Dairy Herd Is by the Introduction of a Purebred Sire.

the hope of starting an interest in better stock and creating a demand for his animals, presented a purebred bull to the community. Little interest was taken, and the gift was accepted with reluctance. The community was made up of small farms and there were few cows.

Following this a dairymen's picnic and exhibition of live stock was held, and as a result of extension work carried on by the dairy division of the department in co-operation with Clemson Agricultural college more people became interested and bought cows. In 1917 a co-operative bull association was organized, from which developed a live stock show, and the members of the association developed a keen interest in comparing the dairy animals they raised.

Another show was held in 1920, at which prizes, offered by merchants and bankers consisting of cash, merchandise, and savings accounts were awarded. One of the features of the show was a program of short talks on local problems by the county agent, leading farmers, and representatives of the commercial club and the State Jersey Breeders' association. As an indication of the interest that was aroused those attending the show voted unanimously to hold a community fair next fall, to include not only dairy stock but other agricultural products.

SPRAY TO KEEP FLIES AWAY

Best Time to Apply Repellent Is in Morning After Milking or Early in Afternoon.

To keep cows quiet and contented they should be sprayed to keep flies off. A good time to spray is after milking in the morning and before milking time in the afternoon.

With a portable cart, made from a half barrel by attaching wheels and a spray pump and nozzle, two men can spray 40 cows in five minutes. Thirty gallons of mixture will spray 40 cows twice a day for 10 days.

Formula: 4½ quarts coal tar dip, 4½ quarts fish oil, 3 quarts coal oil, 3 quarts whale oil and 1½ quarts oil of tar. Dissolve 3 pounds laundry soap in water, add the above ingredients and bring the whole up to 30 gallons with lukewarm soft water.

PUREBREDS REPLACE SCRUBS

Nothing but Registered Sires Being Used at the Louisiana State Normal School.

"Within the past ten days we have sold to the butcher five scrub cows. We are now keeping only high grades and purebreds." With this explanation an official of the Louisiana State Normal school in Natchitoches parish enrolled in the "Better Sires, Better Stock" movement conducted by the United States Department of Agriculture and the various states. All the live stock on the school farm, which includes cattle, swine and poultry, are being bred only to purebred sires.

BEST TIME TO SELECT CALF

If Dam Is Wide, Deep-Bodied Cow Giving Liberal Supply of Milk Useful Animal Is Assured.

The best time to select a cow is at a few months of age, when it may be seen with its mother, or, at any rate, before it is weaned. Observe the calf's mother. If she is a wide deep-bodied cow with plenty of size and is giving a liberal supply of milk, you may be reasonably sure that the calf, if sired by a good bull and properly cared for, will grow into a useful breeding animal.

An Ominous Possibility.

"Pretty bad fire you had here last night," commented the recently arrived guest.

"Eh-yah!" replied the landlord of the Petunia tavern. "The fire company had it pretty nearly put out and then the mayor came and took personal charge of the conflagration and yelled orders till he got the firemen so mixed up that they couldn't do anything. And I reckon if it hadn't begun to rain directly the whole unmolested town would have been razed. But I s'pose it might have been worse—"

"How could it have been worse?"

"Why, the governor or a congressman might have come and took charge instead of the mayor, and it might not have rained."—Kansas City Star.

Cuticura Soothes Baby Rashes

New Cause for Lightning.

An old negro preacher in a southern rural district accounted for the lightning in this way:

"Ever' time Satan looks down and sees de Lawd's work gwine on, he flashes f'um his eyes. Dat's lightnin'. An' w'en he falls ter his church wid it he lays back and hollers. Dat's de thunder."

"But, parson," said an old deacon, "whar is Satan in de winter time? He don't have no lightnin' den."

The preacher studied a minute and then said: "Well, hit may be, Brer Williams, dat hell's froze over den."—Atlanta Constitution.

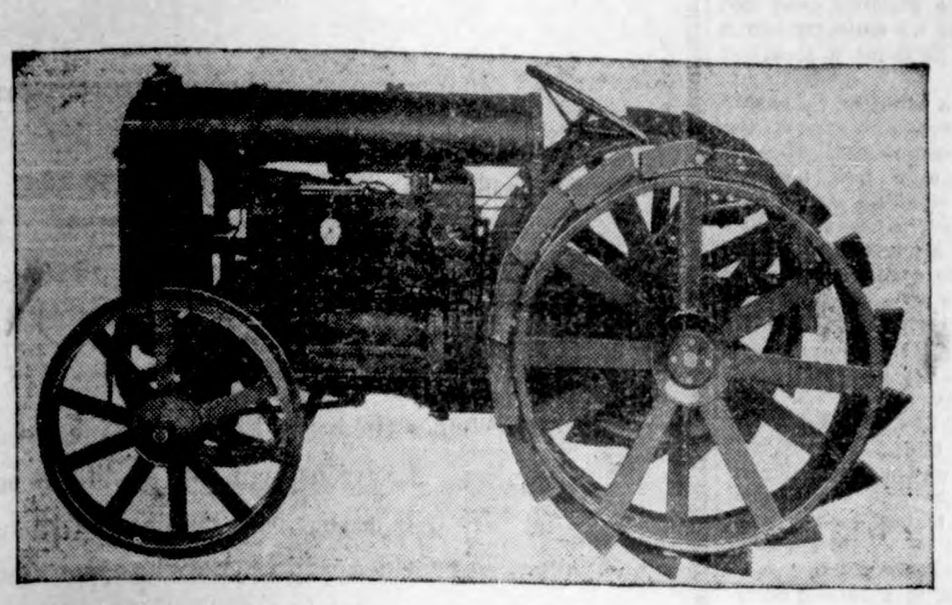
FORDSON



"In the tractor the farmer has now has a machine in which is harnessed one of the most adaptable, effcient, economical scources in the world— the internal combustion engine-

"The tractor will multiply the productive capacity of each individual farm worker from three to four times over.

"It will put the farmer on a par with the city manufacturer. It will put his produce-produced factory—for that is what a farm is—on to an efficient production basis.

"It will enable each worker to earn so much more that he can be paid more and still leave a greater profit for the man who hires him. It will enable the farmer to work fewer hours in a day, giving him more time to enjoy life.

"I believe the tractor will make farming what it ought to be—the most pleasant the most healthful, the most profitable business on earth."

O. B. ANDERSON

Fomerly Klemme Auto Co.,

DOES NOT PAY TO BURN CORN

Iowa Coal is Much Cheaper As A Fuel and Feed the Corn For Profit

Recent suggestions that corn may be used as a fuel in Iowa this winter due to its low price, have again brot up the question: Is corn a cheap fuel?

Iowa State College investigators believe it is not. They say coal will have to go much higher or corn become almost valueless before it will pay to burn the latter. They base their belief on experimental work carried on by the engineering experiment station in which corn was analyzed in comparison with coal for heating qualities.

The engineering experiment station in the laboratories found that Iowa coal which generally sells around $10 per ton would have to sell at $20 per ton before it would begin to pay to burn corn worth 47 cents for a 75 pound bushel. They also found that corn is a poor burner. acting like green cord wood and requiring a lot of attention in firing.

Corn with 10 per cent moisture, the winter average, gave off only 7540 British thermal units of heat per pound while Iowa coal gave off 12,000 B. T. U. per pound. At this rate, they claim, corn could become very cheap and still be expensive fuel.

Members of the agricultural staff say that cheap corn can be utilized as feed and shipped to market as meat products and give a real profit. Cheap corn means that feeding operations can be handled with more profit to feeders since corn is the basic ration in the middle west.

TAKE CARE OF ALL PIGS

Extra Care Will Lessen Costs in Production to Farmer

Fall pigs which are farrowed the latter part of August of the first of September can be produced nearly as cheaply as spring pigs if they are given the opportunity to make good growth before cold weather sets in. According to R. G. Anderson of the animal husbandry department at Ia. State College, this can be accomplished by a little extra care.

In order to overcome the handicap of cold weather and the lack of green crops in raising fall pigs, a little extra care must be taken with their feed. While the pigs are still sucking the sow get them to eating a little dry feed. A self feeder in a creep containing corn, oats, and tankage will give them a balanced ration and keep them growing. Or the pigs may be given a slop of whole or skim-milk and white wheat middlings.

After the pigs are weaned they should be fed liberally at all times of a well balanced ration, to keep them in a thrifty condition. Give them plenty of salt at all times. Fall pigs need a good, warm, dry, and well ventilated place to sleep, with plenty of clean, dry dedding.

PUT NEW SILAGE ON OLD

Partly Empty Silo Can Be Refilled With No Damage

Where a silo still contains a part of last year's filling of ensilage there is no danger of placing new silage on top of the old. say the farm crops department of Iowa State College. By taking the proper precautions the difference between the new and the old silage can hardly be detected a year later.

When filling starts, be sure and remove the top layer of moldy silage from the last years silage. Then place the new silage right on the old and wet it down thoroly so as to exclude iar from this section.

In filling last years silo it is a good plan to examine all the doors and see that they are in good condition so that air will not enter thru cracks or places where boards are cracked. Air soon causes chemical acion in the silage which will spoil it for uses as feed.

A Record Auto Trip

Art Schoenwette drove to Becker, Minn., last Friday and made the entire distance of 232 miles in exactly twelve hours, which is going right along. He went up there to get his wife and daughter who had been visiting at the Wm. Ax home, as also had Mr. and Mrs. Henry Stromer and Paul. On the return trip Mrs. Ax accompanied them for a few days visit with Klemme friends.

But what we started out to tell abou was he fine record Art made on the return trip. There were seven passengers in his car coming home and the total expense for the trip home was $6.66. or less than $1 per passenger, and that amount included gasoline, oil and meals for the crowd. Traveling by auto is one of the ways to beat the high cost of railroad traveling. If this party had made this trip by rail it would have cost them about $70.

CARLYLE'S "OLD HOME TOWN"

Great Writer Seems Not to Have Been Properly Appreciated in the Place of His Birth.

Thomas Carlyle, as well as Sir James Barrie, is not appreciated in his native village, says Kenna Quhar in the London Daily News.

"I was speaking to some old men the other day who remembered him well," the writer says. "It was the custom to speak of the sage in rather a contemptuous manner. This was common talk in Ecclefechan, long after Carlyle had become famous: 'Och, Tam Carlyle! A reckless kind o' body; no vera fond o' wark!'"

The birthplace is a queer, old-fashioned house, bisected by a wide pen. The little Kubach mentioned in Sartor Resartus still goes "gushing kindly by." Before the house was acquired by the Memorial trust the tenant of it was considerably inconvenienced by visitors. The birth room was occupied by his family; and so to save trouble he showed visitors the small room over the pen-close as the real birth room. One can imagine him having many a chuckle over the misplaced rhapsodies of the visitors. There is something to be said for the point of view of an old native in this connection: "If folk maun gush, whit's the odds whaur they gush?"

The old meeting-house is no longer used as a church, but it still stands, converted into workmen's dwellings. There is a new system of church finance, called the envelope system, being much talked of just now as the solution of the church's financial difficulties. It is supposed to be an American invasion. It will interest some to know that this system of numbered weekly envelopes for all purposes has been in use in Carlyle's old congregation for over 40 years. It is thought that some of the countless Americans who visited his shrine may have taken the idea back to America.

The quiet grave in which Carlyle sleeps is just around the corner from the house in which he was born. There are many living who remember the day of the funeral; but the town was only faintly interested, and thought that some folks had little to do who came so far to a burial.

This Critical World.

It's impossible to please everybody, and if a girl has what we, in our ignorance, consider a good figure the neighbor women say she is bunchy.—Ohio State Journal.

NATIONAL PARK WORTH VISIT

The "Pinnacles" in California One of the Most Imposing of America's Natural Wonders.

In the early California days when the stage coach was the only means of transporting bullion from the mining camps banditry was a profitable venture.

One of the favorite hiding places of these men of the trail was the pinnacles of San Benito county. Here, among these spearlike formations, rising from 600 to 1,000 feet from the canyon floor, they were safe from pursuit.

The area of 2,091 acres, which includes the pinnacles, was set aside as a national monument in 1908. They form a landmark which is visible for many miles. Their sides are so precipitous that many of them cannot be scaled. The caves, which are formed by the bases of the rocks, vary in size.

The best known of these caves is called the Banquet hall, and is about 100 feet square, with a ceiling thirty feet high. Several of these immense rock spires are wonderfully balanced and seem as if they must topple over from the force of the wind.

The visitor is awed by the majesty of these strange pinnacles with the domes, caves and subterranean passages. He can readily appreciate the effectiveness of this labyrinth as a retreat for highwaymen.

Springs of excellent driking water are found near both the two groups. The entire region abounds in wild game, which is protected by special laws.

The pinnacles are not easily accessible and can only be reached by private conveyances. The nearest towns are Solidad or Gonzales, in Monterey county, California, or Hollister, in San Benito county. The tourist and lover of nature will find a visit to this monument well worth while.

Had About Given Up Hope.

A certain Dormont mother had occasion to scold her five-year-old son, the tad taking the call-down very much to heart. After the operation was completed, son disappeared. His failure to reappear caused the mother to worry and she began looking about to locate the culprit. In the bathroom she found him. There he was, with the door closed and talking to himself.

"Johnny," the mother heard him say, "you are a bad boy. You are a very, very bad boy. You are too bad for this family and ought to be taken away. You are a disgrace; you are a son-of-a-gun."

That was enough for the mother. Soon there was a hugging match, and sonnie was assured that he was none of the things he had been calling himself. Still, it took some time to convince him.—Pittsburgh Dispatch.

That Caproni Giant.

For a long time back rumors have been coming to us of the remarkable giant machine being constructed by the Caproni brothers of Italy. Now we learn that this machine, a huge flying boat with a capacity of 100 passengers, is completed. It has cost $800,000 to construct, and over four years of constant labor. The machine is remarkable for the absence of a tail. It is composed of three sets of three planes each, above a long fish-shaped boat. Passengers are carried in the cabin, which forms the boat body. The length of this machine is 75 feet, and the width 108 feet. It is equipped with eight 12-cylinder motors. The total lifting capacity is 26 tons.—Scientific American.

Boy of Eighteen Gets Action.

Midshipman J. L. Storey, a boy of perhaps eighteen, the sole surviving officer of the Queen Mary, reported to his C. O. on the loss of his ship!

That midshipman, by the way, bore a charmed life. At Jutland he was picked up unconscious after sinking twice. He was with Cradock at the battle of Coronel, escaping in the Glasgow after the flagship and the Monmouth had been sunk with not a man saved; with Sturdee in the battle of the Falklands, and in many engagements in the Dardanelles. And, after all, he was the sole surviving officer of one of our largest ships.—London Saturday Review.

Soiled Bills Help Banks.

The fact that nearly all paper money in circulation now is badly worn and soiled has been one of the reasons why bank deposits have increased, says an up-state banker who was in the city.

"People like to handle clean, crisp bills," he said, "but are afraid of the torn, soiled ones. There is always the chance of getting some disease. Small checking accounts have increased a good deal lately, and this is undoubtedly one of the reasons for it. When new bills come in again the accounts may become fewer. But once people get the habit of using checks they generally stick to it."—New York Sun.

New Alloy Promises Much.

A metal lighter than any yet known and as strong or stronger than steel has for years been the dream of many, and every now and then rumors are circulated to the effect that at last it has been discovered. The latest report relates to a new magnesium alloy said to have been discovered by a metal company in Montreal. The new alloy, it is stated, is only two-thirds the weight of aluminum, and is "as strong as steel." It is said to be especially suitable for pistons and connecting rods of aero and motor car engines, where strength and lightness are desirable.

MARKS LEFT AS A WARNING

Significance to Others of His Kind in "Imprint" Left by Bear on the Forest Trees.

Bears can give a plain warning to other animals that they are well able to take care of themselves. One autumn morning, says a contributor to Outing, my wife and I were ascending a long ridge leading to the summit of a high mountain peak in the Cascades when some distance away and slightly above us we suddenly saw a big black bear finishing a breakfast of berries.

Every once in a while he would stop eating and roll over and over on the soft mountain meadow sod. Then he would sidle up to a tree, turn his back to it and, standing on his hind legs, stretch himself to the utmost and rub the back of his head against the rough bark; or he would turn, face to the tree, and bite off a piece of bark. Sometimes he varied the act by knocking off a piece and scratching the tree as high as he could reach with his sharp claws.

I had read of this odd habit, but that is the only time I actually witnessed a bear's way of indicating to other bears that he was a big fellow now, capable of taking good care of himself, and that he would allow no trespassing on his berry patch.

The year before, in a remote mountainous region of the Washington national forest, we noticed that a line of traps had been marked, or blazed, along the upper reaches of the Little Beaver creek. The trapper had been catching marten and had used snowshoes to follow up his line of traps. The snow had been unusually deep, and his guiding axe marks now were from seven to ten feet above the ground.

We had noticed the enormous tracks made by a gigantic bear in many places along the soft creek bed before we had gone far enough to find the trapper's blazes. Then we saw that the big fellow had methodically placed his "mark" on each tree blazed by the trapper; and in spite of the height of the axe cuts from the ground his deep scratches were in each instance well above them. And where the one-hundred-and-eighty-pound forest ranger made no imprint with his shoes that bear had left marks with his feet on the thickly carpeted forest floor.

The Way to Do It.

A local principal had been having trouble with a "gang" of little boys who fought on the way home from school. She made a thorough investigation of their trouble and found that one little fellow was the chief offender. He had started the trouble every time. Accordingly she wrote his mother a note asking her to call at the schoolhouse and see about the affair.

That afternoon the little culprit brought her a note. It was from his mother. Opening it the principal read: "I hain't time to come to school, but I can tell you how to end that trubble. Just giv those boys a good lickin' so they will know enough to keep out of my Joey's way."—Exchange.

Set Him to Thinking.

He was a present-day type of man, good at heart, but forgetting the teachings of his early youth, when a loving mother guided him past the church portals. The distractions of golf and auto riding had their allurements on his days of leisure.

Recently he became ill and his physician ordered him to a hospital for a rest and cure. It was his first experience, and the nurse in charge, as is the custom, after taking his name, asked: "What is your religion?"

For a minute he was stumped, he had even forgotten the name of the place he used to attend. Finally it came to him and he blurted out: "Methodist—but not working."

New Seeds Being Tested.

Seeds of a number of unusual plants have been recently received at the quarantine station of the United States Department of Agriculture, Washington, from J. F. Rock, one of the department's explorers in Siam. Among these are a black-kerneled rice which is said to be extensively eaten by the natives of Siam, and another is a brown-tinted cotton, not hitherto known in this country. The seeds will be propagated in the plant-detention station to guard against spreading any lurking plant disease which may have clung to them, and the second-generation seed will be tested out in various parts of the United States.

Vaccine in Whooping Cough.

Reports on the use of vaccine in 408 cases of whooping cough have been collected by an Italian physician, showing excellent results in a large proportion, but in 100 other cases there was no apparent benefit. Improvement, with a marked lessening or disappearance of the spasms, was the rule when the injections were made in the first ten days of the disease. In advanced stages, a few cases showed great benefit, but improvement was mostly only transient.

Not Kidding, Either.

Carl Jobe, who for several years has sold newspapers at Washington and Meridian streets, and who is always available when inquiring strangers ask any directions, was accosted by an out-of-town visitor the other day. The stranger inquired:

"Where does Edison keep his phonograph shop?"

"The man wasn't kidding, either," Jobe said.—Indianapolis News.

ENGLISH KIND TO ANIMALS

Visitor to London Impressed by Fearless Behavior of Dogs and Cats in the Metropolis.

The English are the kindest people in the world to dumb animals. Coming to England for the first time—and not from a foreign country but from one of the dominions—I was struck by this almost universal kindness, writes a correspondent of London Spectator. London, I think, is the only city in the world where that artful animal, the cat, sitting out on the suburban wall or parapet, views passers-by with equanimity, and even permits them to give her a stroking as they pass.

Clearly, the cat has not been "chivvied" for some generations. Setting out in search of rare opportunities to enjoy the sun, pussy keeps a wary eye open for dogs. Man she knows to be tolerant and kind, even man in the stage of boy. I have not noticed the cat so confident in any other part of the world, and what the cat does not know of the people whom she allows to be her hosts is very little.

It is possible to laugh at the degree to which kindness to dumb animals is carried in England; for instance, the organized society to guard against cats being left to starve through inadvertence during the absence of householders on holidays. That seems a little ridiculous at first, especially as the cat is probably the least gracious, though the most graceful, of man's friends among the brutes. But, thinking it over, I have come to the conclusion that the somewhat fussy degree of care for the inferior creatures among the people of these islands is a natural manifestation of the spirit which has made us the great colonizing, empire-building people of the earth.

Tolerance, kindness, sympathy with the weak—these have been the secrets of our imperial success, just as much as adventuresomeness, courage and endurance. The Englishman who does not chivvy a cat does not harass a savage. It is the spirit of live and let live.

World's Most Famous Basilica.

The basilica of St. Mark is a famous Venetian basilica, founded in 830 to receive the relics of the evangelist brought from Alexandria, rebuilt in 976 and given its definitive form in 1052 It is the most famed Byzantine structure of western Europe, cruciform in plan, with five great domes on pendentives, and many smaller domes in subordinate positions. The outer aisle or atrium was added later; with its five deep, many-columned arches, repeated and fantastically canopied above, its rich mosaics, and the wonderful color of its incrusted marbles, it gives, with the domes and many pinnacles, to the exterior its picturesque and unique character. The four celebrated bronze horses in front of the upper middle arch came from Constantinople, and probably adorned originally a Roman triumphal arch. The interior, though it measures only 205 by 164 feet, is one of the most impressive in the world. Almost the whole surface of walls, domes and arches is covered with magnificent mosaics, representing Old and New Testament scenes on a gold ground. Most of the capitals of the columns are by the finest Byzantine, though some are classical; and the road-screen, surmounted by its long row of statues, is at once beautiful and venerable. Externally and internally, and despite regrettable restorations, St. Mark's is the most superb piece of architectural coloring in the world.

Legion Post for Blind.

The American legion post to be formed by the blind soldiers, sailors and marines now at Evergreen hospital will be organized officially as soon as all of the eligibles for membership in the post are able to attend a general meeting at the hospital, according to the Baltimore Sun.

Lieut. Raymond Day, himself sightless, who is taking the lead in the movement, has called a meeting to decide on by-laws and means for organization. While the members of this post, which it is proposed to call Evergreen post, ultimately will be scattered all over the country, it is planned to hold the organization together by means of correspondence that will be intelligible to the blind. Only men made sightless by the war will be eligible.

The national headquarters of the American legion has taken an interest in the post, and it has been tentatively proposed that the other posts of the American legion take steps for getting to the post composed of blind members news of the whole legion and of all activities in the country.

New Skin Disease Reported.

A skin infection of Japanese farmers, which they have associated with manure, has been under investigation by Dr. N. Anto. Treatment is not usually sought, but the symptoms appear to be well marked, and the trouble is liable to recurrence. It is common among persons who weed the fields early or late in the day, when wet with dew or rain. It is more rare in dry weather, though it does not attack laborers in flooded fields, and it is unknown in winter. It is first noticed as an itching of bare hands or feet, small red spots soon appearing. In three or four days the symptoms change to a violent cough, which may continue three to twenty days, and is sometimes attended by bloody expectoration. Though the trouble gradually disappears without treatment, oils and vaseline are thought to be effective in dealing with it. The investigator concludes that this is another disease due to worm larvae that penetrate the skin, after the manner of hookworms.

PLEA FOR THE HEN

Surely Poor Biddy Is Entitled to Some Consideration.

Writer Points Out How Modern Inventions Have Made Her Work Harder to Perform—Latest Is the Airplane.

There seems to be no rest in this world for the busy and useful hen. While devoting all her spare time to the work of producing eggs for mankind to eat, she is obliged to put her well and favorably known intellectual processes to the task of studying the strange characteristics of those for whom the eggs are laid. Always with anxiety, and often with fear and trembling and with accompanying cackling, she watches the new devices which man produces for her destruction. Long ago, it seems now, she was startled by that strange demon of the road that man called a bicycle. When it came along she could never tell which side of the road was the safer, so she fluttered aimlessly and almost without hope from one side to the other.

In the course of time and with the aid of experience, frequently painful and sometimes fatal, she learned that it was safer to stay where she was than to try to dodge the thing. Then came along that still more fearful contrivance, the automobile, to interfere with her career and to interrupt the important business of getting the eggs laid. Many a hen has lost her head because of the automobile, while many others merely lost their nerve. But the automobile has become so frequent a sight upon the country roads that the hen has generally come to regard it with a certain measure of indifference. She has practically ceased to be frightened away from her steady job of egg-laying, and goes about her business as usual, in spite of the smelling, noisy, careless and uncertain devil wagons.

But now comes along another terror. Pro Bono Publico, a famous citizen of every community, has written about it to the Daily News of St. John's, Newfoundland. "As one who protested against the bicycle nuisance 20 years ago," he writes, "I desire to join in the present agitation to prevent motorcars from using the public roads," and he tells a moving tale of the discomforts they cause and the trouble they produce. But this is all preliminary to his real complaint. That is directed against the airplane ocean voyagers who have flocked to Newfoundland for the hop-off. Of these he says:

"I also wish to voice a protest against airplanes being allowed to fly over the city, frightening our poultry, and thereby interfering with the supply of eggs, so important during the present shortage of food. This nuisance is only just beginning, and now is the time to stop it before the airplane becomes as great a pest as the bicycle and the motorcar."

The hen is doing her best to perform her duty to man and to keep up with man's vagaries, but it is a severe strain on her intellect. If man wants her to supply his table with eggs, he should be more considerate.—Hartford Courant.

Rent Profiteering in Manila.

Landlords, owners of residences and business buildings in Manila, says the Times of that city, are taking advantage of the paucity of home and commercial structures to raise rents abnormally. Workers for salaries or wages, and firms and companies in mercantile pursuits complain bitterly of the demands of the owners or lessors of houses and stores, factories and bodegas.

Most of the victims have to yield to the increased rents because they have no recourse. One man who paid $40 a month for his small, uncomfortable home, has been informed that he must pay $50.

The Times has urged that the city authorities establish a rental commission to which lessees and renters who believe they are being gouged can appeal for adjustment. We have commissions for fixing rates for travel for men, animals and freight. How much more necessary one to regulate the charges for one's home or place of business. We refuse utility companies the right to exact more than a certain sum for certain service, and yet permit landlords to mulct the renter who must suffer the injury or move into the open air.

War Sets New Standard for Wives.

Practically every able-bodied man in the French colonies of North Africa saw service in the war. The sojourn of so large a proportion of these Moslems in Europe in close contact not only with European troops but with the American "dough boys" is a fundamental factor in the breaking up of prejudice against Christianity. A changed attitude toward women is noticeable in the fighting men from North Africa as another result of the war's influence. A number of Moroccans and other tribesmen married French girls of the lower classes while in France. Although the lot of these girls is indeed a hard one, because of the primitive conditions under which they must live in their adopted country, they have opened the eyes of the men to the fact that a woman can be something more than a chattel.

Schools for girls in both Algiers and Constantine are beset at times by Moslem men seeking wives with more learning than those of former days.

Dead Towns and Live Towns

In your auto travels, my customer, you will find two kinds of Towns—"Dead Towns and Live Towns."

It is easy to tell the difference just by driving through; and it is still easier to tell the difference by talking to the Citizens of the place. In a Dead Town the people "knock" against their Town, talk as if they were ashamed of it, complain about their neighbors, seem mad at the world in general, and give the impression that they only stay in the Dead Town because they are too poor to get away.

In a "Live Town" you find the inhabitants are glad they live in such a good town, they like their neighbors, and they speak well the farmers and other classes whom they serve and are genuinely proud of the Town and Community where they live.

"Dead Town" Stores are most always run by Old Men with lazy clerks, and their shelves are loaded with Out of Date merchandise, and their customers are forced to patronize Mail Order Houses in order to get the much needed supplies not carried in stock by these Dead Town Merchants.

Live Town Stores are run by young men with active clerks and their shelves are loaded with New Merchandise and Snappy Novelties, and the Live Town Customer likes his store and seldom finds it necessary or profitable to "send away."

Here are a few facts about Klemme. We ship out more live stock and other Farm Products than any other town on this branch of the Rock Island.

Considering our size, our depot receives less shipments of mail order merchandise than any station on the Rock Island System west of Chicago—our agent will verify the above statement.

The Klemme Creamery, right ,now leads all of Northern Iowa in quantity production of butter.

Then think of our Klemme Doctors with their wide acquaintence and many friends. And say, we have a new Dentist, he likes this Community. He is careful and steady and knows what he is at. I like his work and you will like him too when you try him.

Last, but not least, let me remind you of this fact:—

Klemme has the Largest Retail Store in Hancock County—that's us—and we are Big because we are a "Live Store" in a Live Town, serving a "Live" and Prosperous Community.

JACOBS & SON

BEAUTY IN OLD AMSTERDAM

Canals of Dutch City Have Caused It to Be Named the Venice of the North.

Amsterdam is notable for two possessions above all others: its old canals and its old pictures, writes E. V. Lucas in "A Wanderer in Holland." Truly has it been called the Venice of the North; but very different is its somber quietude from the sunny Italian city among the waters.

There is a beauty of gaiety and a beauty of gravity; and Amsterdam in its older parts—on the Keizersgracht and the Heerengracht—has the beauty of gravity.

In Venice the canal is, of course, also the street; gondolas and barcas are continually gliding hither and thither; but in the Keizersgracht and the Heerengracht the water is little used.

One day, however, I watched a costermonger steering a boatload of flowers under a bridge and no words of mine can describe the loveliness of their reflection. I remember the incident particularly because flowers are not much carried in Holland, and it is very pleasant to have this impression of them—this note of happy gaiety in so dark a setting.

In the main Amsterdam is a city of shade, of hurrying business men, of ceaseless clanging tramcars and crowded streets. but on the Keizersgracht and the Heerengracht you are always certain to find the old essential Dutch gravity and peace.

No tide moves the sullen waters of these canals, which are lined with trees that in spring form before the narrow, dark, discreet houses the most delicate green tracery imaginable; and in summer screen them altogether. These houses are for the most part black and brown, with white window frames, and they rise to a great height, culminating in that curious stepped gable (with a crane and pulley in it) which is, to many eyes, the symbol of the city. I know no houses that so keep their secrets.

In every one, I doubt not, is furniture worthy of the exterior; old paintings of Dutch gentlemen and gentlewomen, a landscape or two, a girl with a lute . . . old silver windmills; and plate upon plate of serene blue Delft.

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

Repairing a Buckled Ship.

In the great explosion at Halifax the British ship Curaca had her back broken. When the vessel was refloated it was found that she was buckled to the extent of nine feet two inches at the bow and six feet six inches at the stern. In that condition, says the Scientific American, she was temporarily repaired and brought to New York, where she was put in dry dock, and the water was pumped out until she touched the keel blocks amidships. Next, the plating on both sides of the ship was cut at the point where the vessel had buckled, and more water was pumped out, until both ends settled gently down upon the keel blocks and the vessel was once more straight. The task of joining the two parts was comparatively simple.

Season's Best Joke.

"What's the cause of the loud hilarity in the real estate office next door?"

"A stranger dropped in and solemnly announced that he wanted to rent a house."—Birmingham Age-Herald.

Sometimes it seems to us that things in this old world of ours are pretty badly mixed up these days. It is quite fashionable to say: "We never saw anything like this." Things might be a great deal worse with us than they are. And everything is coming out all right, but you and I must bring them out right, or they never will be right.

All our friend knew was that all the days are simply fine. He could not have known a greater thing.

GOODELL AND VICINITY

Rev. Father Eardley, of Belmond, was a Goodell caller Friday.

Jay Griggs was a business caller in Garner Saturday.

Elmer Griggs and family of Crystal Lake visited at the Jay Griggs home Sunday.

The Sunday School held a picnic at West Lake Friday. A large crowd was present and everybody enjoyed themselves.

Ethel Hughes, of Garner, is visiting with friends in this vicinity Friday.

Mildred Fuller. Beulah Harberts, and Ruthie Rust returned from summer school Saturday.

The Ball Game between Belmond and Kanawha at Lake Side Sunday was in favor of Kanawha.

The Corner Stone for the new church will be laid next Sunday.

Mrs. Larner is enjoying a visit from her daughter and two children from Ft. Dodge.

Lloyd Carpenter was a Sunday caller at the M. Gailbrath home near Meservey.

Many from here attended the fair at Mason City.

W. L. Sherwood and family autoed to Iowa Falls Sunday.

Leslie Johnson of Rake, Iowa, is visiting at the C. Engeseth home this week.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10:00 o'clock.

Sunday school at 11:00 A. M.

Union Services in the evening at 7:30 o'clock.

Liberty Township Sunday school at 10:15 A. M.

Epworth League at 8:00 P. M.

Preaching service at 8:30 P. M.

A. H. MEYER, Pastor

Good Cow Test

Charles Stiehl reports that he had his Guernsey herd tested the other day. Here is the result of the cream test as he gave it to us:—

No. 1 tested 440
No. 2 tested 360
No. 3 tested 630
No. 4 tested 480
No. 5 tested 560

Charlie has a fine herd and the test is pretty good. He has some valuable cows as the test shows.

Picnic at "Lovers' Leap"

Last Thursday night a number of Klemme's popular young people journeyed to "Lovers' Leap," which is located no so many miles from town, where they spent the evening roasting weiners and toasting marsh mallows. The lunch consisted of hot coffee, sandwiches, pickles, olives and fresh fruit. Those who were absent sure lost tou on a good time.

ODD FELLOWS AND REBECCAS HAVE BIG PICNIC AT M. C.

Nearly all of the Klemme Odd Fellows and their wives went to Mason City Sunday to take in the big Odd Fellow-Rebecca Picnic there on that date. A picnic dinner was served and a social good time was had at East Park. Later all visited the fine Odd Fellow's home near the City.

All report that they had a fine time.

But a good wheeze—
I'll leave it to you

I LOVE the ladies.
BUT LIKE most men.
I OFTEN guess wrong.
ON WHAT will win.
A SMILE from them.
I ALWAYS say.
IT'S BETTER to laugh.
THAN EVER to worry.
SO ONCE, when.
THE DAM broke, and.
A FLOOD hit town.
I THOUGHT I'd just.
CHEER UP my wife.
AND SO I said.
"IF THE worst comes.
YOU CAN float down.
THE RIVER on.
THE FAMILY music-box.
AND I'LL accompany you.
ON THE piano."
WHICH WAS all wrong.
POOR HUMOR, she said,
WAS OUT of place.
IN TIME of danger.
SO KIPLING was right.
"A WOMAN is only.
A WOMAN, but a good cigar,
IS A smoke;" only.
HE SHOULD have made it.
MY CIGARETTES because.
YOU'RE BOUND to get.
A SMILE from them.
THEY ALWAYS "satisfy."

Air-Tight Tins of 50

Ask your dealer to show you the new vacuum-sealed tins of 50 Chesterfields. A compact, convenient and absolutely AIR-TIGHT packing—the cigarettes keep fresh indefinitely.

TAKE the silky, tender leaves of choicest Turkish; blend them with the best Domestic tobacco that money can buy—*blend them* in the exclusive, can't-be-copied Chesterfield way—and you get a "smoke." Yes, and something more—you get a cigarette that honestly "satisfies."

They Satisfy **Chesterfield**
CIGARETTES
LIGGETT & MYERS TOBACCO CO.

Announcement--

We are pleased to announce the return to Klemme of

Mr. Paul Grange

who will manage the business of this Company assisted by Mr. Howard Doyle.

We Feel sure that our friends and patrons will be pleased to renew thier acquaitance with Mr. Grange and we extend a hearty invitatiou for you all to call and welcome hiw home

Yours very truly,

Northern Lumber Company

SOMETHING TO THINK ABOUT

By F. A. Walker

THERS MAKE MEN.

UEL MATTHEWS VAUCLAIN, ad of the Baldwin Locomotive in Philadelphia, has had wide ence in the selection as well as ndling of men,

admits that he has a method, a in making his selections.

FINDS OUT WHAT KIND OF THER A BOY HAS, and pays tention to the father. In the of a long business life he has few exceptions to this rule.

* * *

theory of Mr. Vauclain has a ve as well as a positive side. explains not only why so many inguished fathers have distind sons, but also why so many who are failures have sons re successful.

re are two sides to the question. ne thing there is a tendency on rt of a boy to derive his pret traits from his mother.

another, the mother is obvious- re instrumental than the father creating the environment which a large part in the development sons.

* * *

the average home the problem providing a minimum of income—ich is the duty of the father—is less complicated than the prob- making both ends meet—which problem of the mother.

before statesmen ever dreamed dget system, that method was r to the women. In one gen- after another they have had their way with resources that t increase in proportion as the s grew.

carefulness, prudence and fore- that a woman displays in run- er house naturally show them- in the bringing up of her men. If she is incompetent and s in one direction, she will be e in the other.

* * *

mother, as distinguished from her, has played a leading part formative period of men of con- s genius who have lifted them- "by their bootstraps" into places t eminence.

mothers of Abraham Lincoln apoleon Bonaparte supply the ailable explanations of the rise lership of two men who are f success, under the most dif- rcumstances.

ch case a powerful, dominant er made possible the passage log cabin to the White House m Corsica to the leading place pe and an imperial throne.

In our own time the supreme qualities of Marshal Foch are traceable to the powerful individuality of his mother.

* * *

From the dawn of history to the present day, in sacred and secular affairs, the influence of the mother has always been the greatest factor in the development of ability or genius. She has been the source of inspiration as she was the source of being.

Sometimes she has pulled the children, handicapped by the father's characteristics up to her own level.

Sometimes she has pushed them above both herself and the father by an indomitable determination that neither poverty nor ill fortune of any kind should interfere with her ambitions.

Mr. Vauclain's plan of selection will serve its purpose in the great majority of instances. He is safe in concluding that if the boy had the right kind of a mother he can count on his being the right kind of a boy.

LYRICS OF LIFE

By DOUGLAS MALLOCH

LADY SEEKING BEAUTY.

LADY seeking beauty, who
Beautiful would be,
Where is beauty? Near to you
Waiting quietly
If you will but see.

Nature is articulate;
Can't you hear her call?
You need only imitate
Beauty by your wall,
Nature, that is all.

Here is beauty: 'Tis a rose,
'Tis a rose of red;
Yet she does not all disclose—
Beauty, be it said,
Shown too much is fled.

Only dignity may dare
Crimson harmonies,
Only women wise may wear
Colors such as these,
Lady, if you please.

Here is beauty: Quietness,
Modesty, repose;
Beauty is not fair unless
Dignity it knows—
Lady, here's a rose.

SCHOOL DAYS

POULTRY CACKLES

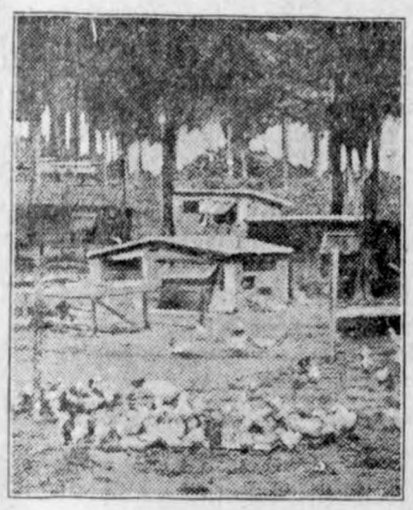
CARING FOR GROWING CHICKS

Essentials to Best Growth Are Good Coops, Cleanliness, Feed, Water and Free Range.

(Prepared by the United States Department of Agriculture.)

The care of growing chicks, especially during warm weather, is most important, say specialists of the United States Department of Agriculture. Every boy or girl member of a poultry club should give them the best of attention if success is to be had. The baby chicks may be smart little fellows from strong, vigorous parent stock, and they may have been brooded carefully for the first two or three weeks, but unless they receive proper care and management during their later growing period they will not develop properly, and many of them will be lost through disease or sickness. The chief essentials to proper growth are good coops or houses, cleanliness, proper feed and water, shade, and free range.

Every coop or poultry house used for growing chicks should be kept clean at all times. Sickness or disease starts usually in unclean quarters, and in such places lice and mites are always more plentiful. Coops and houses should be cleaned and sprayed once a week, and clean shavings, chaff, or sand put on the floor. Examine the chicks and houses often for lice and mites, and if found they should be got rid of at once by following the directions in Department Circular 16, Lice, Mites and Cleanliness, which may be had, free, upon application to the division of publications, United States Department of Agriculture.



Young Incubator Chicks Allowed to Run Out on Government Farm at Beltsville.

A variety of feeds, with fresh, clean water, is necessary if chicks are to grow properly. Perhaps the three most necessary for rapid growth are grain feed, green feed and dry mash. Poultry specialists of the department say that in addition to the green feed and dry mash, which should be provided regularly, a grain mixture should be fed night and morning, giving as large a quantity as the chicks will eat clean, but no more. A good grain mixture for growing chicks consists of three parts cracked corn, two parts wheat, and two parts hulled oats. When available, kafir or rolled or hulled barley may be substituted for hulled oats. In localities where hulled oats, kafir, or rolled barley cannot be obtained, or are too expensive, a mixture of cracked corn and wheat only may be fed until the chicks are old enough to eat whole oats, when two parts may be added to the corn and wheat mixture.

A reasonable supply of fresh green feed is almost as necessary as grain for growing chicks. If allowed liberty they will get much of it for themselves, but if confined, or if in quarters where green feed is not abundant, it should be supplied regularly. Lawn grass, beet tops, cabbage and lettuce are excellent feeds. When chicks are confined to brood coops with runs, they should be placed on ground where the grass is green and tender, and as fast as it is eaten off, the coop and run should be moved to a place where the grass is plentiful.

In addition to green feeds and grain, dry mash should be kept before growing chicks at all times after they are three or four weeks old. It is best to feed it in a hopper inside the building, or where it will not be exposed to rain or wet. Here is a good dry mash mixture: Two pounds corn meal, two pounds middlings, one pound oatmeal, two pounds wheat bran, one pound beef scrap and one-fourth pound charcoal. Grit and oyster shell also should be provided.

SMALL FLOCK IN BACK YARD

Two Hens for Each Member of Family Are Recommended as Best by Poultry Specialists.

The average novice can reasonably expect to get an average of at least 10 dozen eggs per hen per year from his small flock in the back yard. On the basis of two hens to each member of the family this will give 20 dozen eggs a year to each person, which amount is about halfway between the average of farm and city consumption. No backyard poultry keeper should be satisfied with less than this, say poultry specialists of the United States Department of Agriculture. Every backyard poultry keeper should try to get as much more as possible. To provide an egg a day for each person, two hens would have to lay 183 eggs each a year.

LIVE STOCK NEWS

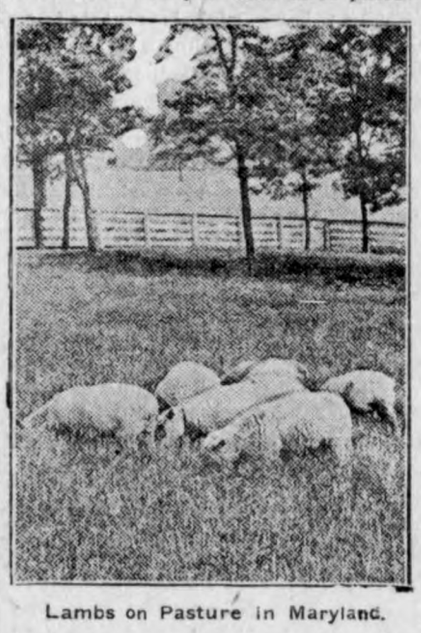
TEMPORARY SHEEP PASTURES

Results of Experiment Made by Department of Agriculture on 30-Acre Field in Maryland.

(Prepared by the United States Department of Agriculture.)

On a 30-acre field in Maryland, used by the United States Department of Agriculture to test the carrying capacity of temporary pastures for sheep, sufficient pasturage was produced to furnish an average of 505 days' grazing on each acre for a mature ewe. This is equivalent to about two sheep an acre for a season of 250 days, or two and one-half sheep for a 200-day period.

This pasturage is much more than could be obtained from perennial grass grown on land of the character and value of that used in the experiment, the department sheep specialists say, but not more than can be obtained from the best blue-grass pastures. Good land used for such a succession of temporary pastures should produce from 50 to 100 per cent more pasturage than was obtained in this instance.



Lambs on Pasture in Maryland.

In such a system as the one under trial there is not much choice of crops to be used in different months. It is chiefly necessary to make sure of having one crop ready when the preceding one is finished. All the crops used in 1919, the third year of the experiment, stimulated a good flow of milk in the ewes, produced good growth in the lambs, and, after weaning, put the ewes in good condition for fall breeding.

The ewes and lambs were all pure-bred Southdowns. Some of the ewes raising lambs received a half-pound of grain each daily until May 10, and 22 head of ewes in a fall-breeding experiment received a light feed of grain during September and October. All the lambs were kept for breeding purposes and were fed some grain throughout the summer. In calculating how far the feed actually produced would go for grown sheep it was considered that a lamb ate one-fourth as much as a sheep until July 1, and after that one-half as much. A total of 520 hours' work for a man and a team was required for plowing and seeding the 60 acres used in 1919.

Under the conditions of this experiment fall-sown wheat and spring seedings of oats and peas sown together at the rate of 1½ bushels per acre have been most satisfactory for grazing in spring and early summer. Soy beans are ready for grazing about the middle of July and furnish most of the feed until October. In November fall-sown wheat and rye have been used most, though late seedings of corn and velvet beans were used in 1919 for the first time on 1½ acres that had received an extra top dressing of manure.

The number of days of grazing from one acre of each crop in 1919 was as follows, calculated on its pasture value for one mature ewe:

	Days.		Days.
Rape	392	Cowpeas	210
Soy beans	313	Alfalfa	882
Oats and peas	319	Barley	278
Wheat	309	Rye	180

TYPES OF BABY BEEF COWS

Three Important Factors Should Be Kept in Mind in Making Selection of Breeders.

In selecting cows from which baby beef is to be produced, three very important factors should be kept in mind:

1. The cows should have at least a fair amount of beef blood. Pure-breds are not necessary, but two or three crosses of such breeding is essential. Cows with a preponderance of dairy blood will not do for the production of baby beef.

2. Cows best suited for this type of breeding usually weigh 900 pounds or over in thrifty breeding condition. So long as early maturity is not sacrificed, the heavier cows are the most suitable for baby-beef production. Size of frame rather than weight should govern in selecting cows which are to be used for this purpose.

3. The cows used to produce baby beeves should produce enough milk to keep the calves fat and growing without much additional feed up to weaning time.

In addition to these three factors, such things as constitution, uniformity of breeding, color, size and early maturity should be considered.

MINISTER DISCUSSES HIS WIFE'S TROUBLES

Rev. A. H. Sykes, former pastor of the Watkins Park Presbyterian church, Nashville, Tenn., says:

"After seeing what Tanlac has accomplished in my wife's case, I am convinced that it is a medicine of great power and extraordinary merit. I do not think I have ever seen anything give such prompt results. Mrs. Sykes had been in delicate health for ten months, suffering from stomach trouble and nervous breakdown.

"I frequently sought medical advice but Tanlac is the only thing that gave her any relief. After taking the medicine only a short time, she was able to sit up and help with the household duties. I think it only a short time until her health will be fully restored."

Tanlac is sold by leading druggists everywhere.—Advertisement.

Equal to the Occasion.

"Before we were married," said the young wife, "you used to bring me flowers every day. Now you never even think of buying me a bunch of violets."

There were tears in her eyes. But he was equal to the occasion.

"My darling," he said, with great tenderness, "the pretty flower-girls don't attract me now as they used to do."

After which, of course, he told her that she didn't really care much for flowers.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

No Fire-Eaters Need Apply.

They were in the midst of the most thrilling part of "The Treasure of Mystery Island."

"Say what you will, there is one thing about the silent drama that is particularly fine," said the old man, a lover of the picturesque plays.

"And that is—?"

"The hero can't make the villain eat his words."—Cartoons Magazine.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

About All Summer Cottage Has.

A Kentucky woman swallowed five teaspoons. That woman would put the average summer cottage completely out of business.

THE ROMANCE OF WORDS

"GOSSIP."

"GOSSIP" or "gossib," as Chaucer spelled it, was the name given by the Hampshire peasantry to the persons who acted as sponsors in baptism, the godfathers and godmothers. It was a compound word, made up of the name "God" and the word "sib," still used in Scotland in the sense of "akin"—the meaning being that the gossib was akin to God and stood in this relation to the child, a sense which is still extant in our own word "godparent."

Considering "gossip" in its ordinary use as one addicted to tattling or prattling or the carrying of tales and it appears to bear little relation to the word as originally coined. But it should be remembered that the "gossibs" were brought by a common sponsorship into a close familiarity with one another, which led eventually to trivial, idle talk and the carrying of information from one to another. That this failing is not peculiar to Anglo-Saxon godparents is evident from an examination of the French word commerage and the fact that commere has passed through precisely the same stages as its English equivalent.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

OFFICE JOBS, PENURY.

I VISITED a woman who I greatly respect; the sort of woman who is a credit to America and an asset to her neighborhood. She has three daughters, the oldest just fifteen, and as we sat over our tea she began to discuss her plans in regard to the future of her girls.

I thought that it would be well to give them training in some business capacity.

"Yes. But I don't want them simply to be fit for an office job and penury. And I rule out teaching. The life is too hard—and, again, too poorly paid. I want them to know how to do something that will lead to freedom, not slavery. And I want them to work at something that will grow an interest, not become a bore."

It was quite a large order, and yet reasonable. One of the girls was distinctly an artist, and her mother was going to give her a course in commercial designing. The second daughter was to be trained in domestic science and catering, and the oldest girl was to take an agricultural course. For each girl the mother had invested a sum of money that, while not large, would give the required start in their different professions.

If there were a little more of this sort of scheming for girls, things would be a lot easier for them. Most girls are driven to office jobs as the easiest road to follow. Which is one reason why they are so poorly paid.

Garner will hold their annual baseball tournament on September 6, 7 and 8th. The competing teams this year will be Dows, Belmond, Lake Mills and Forest City. The American Legion are putting on the event this year.

"Scoop" Larsen, of Garner was a visitor with his folks here Sunday. "Scoop" is kept so busy at the Garner meat market that he does not get down here very often.

Notice—Mr. Henry Medaus will have charge of my business during my western trip and those wanting cement blocks can get them of Mr. Medaus. Chas. W. Stiehl. 2-wp

Paul and Lester Stille and Adolf Lauritzen drove to McCallsburg, last Thursday and returned Sunday. The town was celebrating American Legion days there Friday and Saturday and the boys were running a consession.

Helen and Ruth Lenz, who have been visiting their sister at Charles City, returned to Klemme Monday for a visit with their sister and husband, Rev. and Mrs. A. H. Meyer. Helen left for Dows Tuesday evening for a few days visit with her sister there, Mrs. Heuer.

Mr. Walt Bloom. of Los Angeles, California, came last Friday for a visit with his many old time Klemme friends; and while here will also look after business details. Walt is always welcome in Klemme and he has spent so many years here that he really seems like a part of the town.

As I am going away I want all my accounts paid at once.
Dr. George Zinn.

The Klemme Band boys went to Garner Tuesday evening to help out the Garner Band. The concert was fine with the consolidated band and attracted quite a bit of atenion. The nex night, or last night the Garner band returned the favor and a consolidated concert was given here. It is the plan to change each week and thus give both the towns a better band concert each week.

Arthur Wellemeyer and family had quite a lot of company Friday of the past week. Those who were at their home that day were Mr. and Mrs. Ed. Irnscher; Mr. and Mrs. Clifton, and Miss Grave Holscher, all of Earlville, Iowa. They were making an extended auto tour through this state and the Dakoas visiting relatives and friends. From here they went to Charles City. Iowa, for a visit with Mrs. Mary Wellemeyer. where they spent Sunday. Mr. Irnscher hadn't been in Klemme for twenty years and he said he could hardly beleive his eyes when he saw the many improvements we had here and the fine buildings and residence places.

was an auto accident north- Garner yesterday afternoon Miss Mamie White of Goodell ured but just how seriously t yet be determined. A. D. and wife and their daughter and a cousin of Mr. White, a R. White of Virginia who has siting the Whites at Goodell ming west on the detour road lear Lake. It had been rain- when at a point east of Fred h's the car skidded into the and tipped over on its side. amie and L. R. White were in k seat of the Ford sedan, and hite was on the under side as r tipped. A tank they were g in the car fell onto her and hite on top of the tank. He is man.

. White who was driving man- o get the door open and the nd Mrs. White got out. but hite could not get out without She was taken to the Dietrich and Dr. McMahon was called. not make an examination to hether any bones were broken She was brought to town on in Shannon's truck and was to Goodell on the evening She could move her limbs but was a possibility of some in- injury. They intended to take me and have an X-ray taken ermine whether there was any- of this nature, and if anything d in the X-ray they would take the hospital at Hampton this ng.

White had the car hauled onto the road and drove it to r. Two glasses were broken he side and the top was broken

He Ditched His Tools

ermore Gazette—Got any car- r tools you want to sell? Mr. Snyder who works at the Catho urch is in the market for some used tools. He visited his at Fort Dodge over Sunday. e and his wife celebrated the ion by carving a watermelon or but they evidently keep no pigs, are averse to throwing melon out onto the public highway the manner of some Livermore e, so his wife suggested that ace them in a box, take them to train when he went to buy a to Livermore, and when he out of town a mile or two, throw out the car window. So he avored to carry out her instruc ; but the carpenter tools and elon rinds were in boxes that mbled each other very much; all too late he discovered that ad ditched the wrong box. At earliest convenience he went re-visited the scene of his aken identity, but the box of had disappeared, somebody g beaten him to it. We have earned if he still is saving the n rinds.

. and Mrs. Harold Gruetzmach- Klemme's newest newly-weds turned from their honey moon spent in Duluth, Minn. They ed here yesterday and went to Falls immediately to back up goods to take to Belmond, e they will begin house keeping few days. Mr. and Mrs. Gruetz- her will teach in the Belmond ols this year.

. Geo. Zinn left last week for field, Iowa, where he will visit nephew, Dr. Edgar Zinn, for a days and then went on to Des es to take in the State Fair. Zinn has sold his interest in the Reuber & Zinn firm here to Dr. ber, who now has charge here. Zinn plans to go to Canada to d some time with his aged fath- nd will pehaps be there in the er. He has no definite plans the future.

FARMER PAYS INCOME ON SIX ACRE PATCH

SPENCER, Iowa.—Date Hall, of Peterson in Clay county, paid an income tax in 1920 and he only farmed six acres. Not only was he successful in his truck gardening, but he utilized land that was being wasted, for he rented the six acres from a railroad which had been using it for a right of way. In 1921, he probably will have to pay another tax as he has another bumper crop.

Several years ago Hall leased the land along the Northwestern railroad and started in hauling manure from the stockyards nearby. He worked the patch up to a high state of cultivation.

This summer he has an acre of muskmelons which he is sure will net him over $1500. Last year he had a bumper crop and according to people in Spencer where he markets the fruits of his farm, they are "some melons." There are so many on this acre that they have trouble finding room to grow on. On another acre he has 1300 tomato vines. Other patches have peppers, egg plants. onions and potatoes.

Hall is sending some nutmeg muskmelons to the Iowa state fair which are especially fed and weigh 14 pounds each. He is sure that proper care and cultivation will make money for the gardener.

Rev. A. E. Buriff and family, H. B. Bailey and Family, W. H. Trafford and family, Bert Mathews and Miss Mabel Smith, formed an auto party to Clear Lake Monday evening, where they enjoyed a picnic supper.

Mr. Wm. H. Trafford has sold his residence property across from the city park to Mr. Chris Meigne, of Goodell. Mr. Meigne has lived on his Goodell farm for about fifty years and will retire the first of March when he moves to Klemme.

Marvin Weigmann, of Garner, began work in the First National Bank this morning. Marvin has worked there before so is not new to the people of Klemme. We are glad to see him back in Klemme again.

Mr. and Mrs. Charles Stiehl and Art Kuck left at nine o'clock this morning in their auto house on their way to the west. Everybody was out on main street to see them pull out.

Mrs. Fred Skow. and daughter, who have been visiting Klemme relatives for the past two weeks, left Monday for their home at Watertown, South Dakota. Mrs. Show is a sister of J. N. Day and Mrs. John Baumgartner.

The following students who finished the eleventh grade here last spring will go to Garner to take the twelfth grade work there this year: Arthur and Mildred Johnson, Earl Josten, Fred Arnold, and Chos. Gibbs. The Garner school will be gainers with these fine young people enrolled as students in their school. The boys are all fine athletes and we also expect to see Mildred make good in basket ball and girls' athletics.

B. E. ERWIN,
Clerk of District Court.
(SEAL) Sept. 1-8-15

Only 8 Per Cent of World's Savers Are Americans; French Thriftiest

Notwithstanding the fact almost 30 per cent of the world's savings are in this country and that the average depositor in the United States has a greater sum to his credit than his neighbor overseas, only 8 per cent of the total number of the world's savers are Americans.

In proportion to population, a number of foreign countries exceed this nation in numbers of depositors, according to a statement given out by the savings division of the United States Treasury department.

Through centuries of struggle for mere existence, many European peoples have been trained to the most rigid economy, while Americans have found the fight for a livelihood a comparatively easy matter. Until quite recently, the average American family operated on the plan of "paying expenses first and saving what's left—if there is anything left."

In France, one out of every five inhabitants has a savings account. The economy of the French people has been their protection against the "death thrusts of centuries." The thrift and economy of the French people is given a high place in the winning of the World war.

One of the objects of the savings division of the United States Treasury department is to increase the number of savers in this country, and the government is offering the safest and most profitable means to help the people along to independence. It is offering securities, backed by the full strength of the nation, in denominations attractive to rich and poor alike. Twenty-five-cent Thrift Stamps, $1 Treasury Savings Stamps, $5 War Savings Stamps and the $25, $100 and $1,000 Treasury Savings Certificates represent the savings securities available at any time.

Latest Washington News

FEDERAL FARM BANKS ARE GIVEN $25,000,000 MORE MONEY TO USE

Explanation of How Increase Is No Expense to Government

Washington, Aug. 31,—There appears to be some confusion in the public mind regarding the exact provisions of the recent amendment to the Federal Farm Loan Act, the amendment known during its discussion as the Curtis-Nelson bill. notwithstanding both Senator Curtis and Representative A. P. Nelson fully explained the amendment when it was before the Congress.

The following is a brief explanation of it.

The capital stock of the Federal land banks is $25,000,000. The original farm loan act authorized the Secretary of the Treasury, in his discretion, upon request of the Federal Farm Loan Board, to deposit for the temporary use of any federal land bank any money in the U. S. Treasury not otherwise appropriated, provided that the aggregate of all sums so deposited with all the federal land banks should not exceed the sum of $6,000,000. It required that the land banks in which such deposits were made should issue to the Secretary of the Treasury a certificate of indebtedness for the deposit, secured by farm loan bonds or other collateral satisfactory to the Secretary, and bearing a rate of interest not in excess of the current rate charged for other Government deposits.

The land banks took up these certificates of indebtedness and returned the deposits to the U. S. Treasury as fast as they sold their bonds. With the proceeds of the bonds they made new loans until the funds were exhausted when they repeated the process. This amount of $6,000,000 has been deposited with the land banks and paid back many times since the law was enacted. It is handled in exactly the same manner as the Federal Reserve banks which receive deposits from the Treasury upon which they pay interest.

The Curtis-Nelson amendment provides that in addition to this $6.-000,000, the Secretary of the Treasury may deposit with the farm banks in his discretion, a sum not exceeding the difference between the capital stock of th farm banks ($25,-000,000) and $50,000,00O. Under the law with every loan made there must be a subscription to the capital stock of the bank equal to 5 per cent of the loan, so the capital stock of the farm banks is increasing constantly at the rate of 5 per cent of their total loans.

To prevent the possibility of land banks needlessly calling for these deposits, the Curtis-Nelson amendment provides they must pay interest on these deposits of oone-half of one per cent more than the rate of interest on he land bank bonds. This makes it desirable on the part of the banks to sell their bonds to get funds rather than use deposits of the U. S. Treasury.

At the same time it enables the farm banks always to have access to $56,000,000: their present capital stock of $25,000,000, the difference between their capital stock and $50,-000,000, which at present is $25,-000,000 and the original provision of $6,000,000. As fast as the capital stock is increased, the difference between it and $50,000,000 will correspondingly decrease, and the U. S. Treasury will be subject to correspondingly less deposits.

While this makes ample provision for funds for the farm banks it is also a good bargain for the government and the public taxpayer. Farm bank bonds now bear 5 per cent interest. As stated above farm banks pay the U. S. Treasury one-half of one per cent more for use of the deposits than they pay for their bonds. or 5½ per cent. This is a higher rate of interest than the government gets from other deposits.

GRIND THE CORN FOR COWS

It Pays to Prepare Corn for Dairy Cows Rations, Test Shows

Corn fed to dairy cows will more than pay for itself if ground and then fed instead of feeding in the ear, according to the dairy section of the Iowa Agricultural Experiment station who have recently completed an experiment with corn as feed.

Corn as a food for other animals has been studied extensively but out side of one investigation this is the only test conducted to determine the influence of the preparation of corn on the production of milk and butter fat.

Cows used were all in good milking condition, good feeders and typical dairy cows. They were fed a basalration of corn, silage, clover hay and a grain mixture of four parts wheat bran, four parts cottonseed meal and one part ground oats by weight. In addition they were fed the kinds of corn under test. Salt was given at free will and the cows were watered twice daily.

When the ear corn was compared to corn meal it was found that corn meal produced 7 percent more milk and 14 percent more fat than the ear corn. Where corn-and-cob meal was compared with corn meal it was found that the corn meal was slightly the best producer. There was a difference of 2 per cent in butterfat in favor of the corn meal.

On a basis of 14 per cent moisture in the corn, it was found that 100 pounds of corn meal had the same feed value as 125 pounds of corn-and cob meal and 140 pounds of ear corn. The corn and cob meal has the advantage of providing bulk in the ration, due to the presence of the cob, and all cows need plenty of bulk.

Production costs on the basis of $1.25 per bushel for ear corn show that where corn meal replaced the ear corn the net return was increased $8.84 for the period of the test. There was a slight difference in cost between the corn meal and corn and cob meal. so that there would be very little choice between these two feeds. It will, however, pay to grind the ear corn that is to be fed.

Miss Doris Buriff, who has been spending her summer vacation with her parents here, Rev. and Mrs. A. E. Buriff, since completing her studies in the Illinois University, left Tuesday evening for Salt Lake City, Utah, where she will instruct in one of the colleges. Miss Buriffff will teach music.

How Farw Costs Are Estimated By U. S. Government

HARD LUCK FOR THE KIDS

DES MOINES, Aug. 31.—From now on the school boy who doesn't wash the back of his neck or clean his teeth or bathe or do the other "healt cores" is going to be in bad.

It's going to count against his monthly grade. What's more he is not going to be considered a good American citizen.

The new citizenship manual prepared as a result of an act of the legislature two years ago is just out. It devotes a great many pages to a course in health throughout all the grades. It says that the practice of health habits and not just merely he study of hygiene and physiology shall be a part of the course in American citizenship. It recommends the Modern Health Crusade which is the system of teaching health habits promoted by te Iowa Tuberculosis Association. In addition to this it provides for nutrition work, weighing and measuring, regular physical inspection.

In order to get across the idea of practical health instruction to all the teachers and to as many parents as possible, Supt. of Public Instruction P. E. McClennahan and Dr. G. H. Sumner of the State Department of Health have entered into a triparate arrangement with the Iowa Tuberculosos Society recognizing this organization as a co-operating agent to assist the public departments of health knowledge. Miss Theresa Dansdill director of the Modern Health Crusade work of the Tuberculosis Association is made official representative without pay of these state offices. Miss Dansdill will organize a corps of lecturers for teachers' institutes, will prepare health programs and teaching outlines, and otherwise by literature, publicity and personal visits will encourage the observance of the health program laid down for all the schools of the state by the citizenship text.

This plan is considered by educators and health workers throughout the country as an instance of fine co-operation between public and private agencies and as an advanced step of unique and exceptional merit in the field of health education methods.

Mrs. Wm. Ax returned to her home at Becker, Minn., yesterday, after a few days visit at the home of her parents, Mr. and Mrs. Herman Ludeke, of this city.

Rudolph Fritsch and sister Margaret were Klemme visitors Monday. Mr. Fritsch came down to take some photographs of Charlie Stiehl's big "auto-house."

M. O. Hocum, P. M. Griesemer, Walter Bloom, Joe Johnson and A. L. Emerson went to Des Moines Tuesday in the former's car to attend the state fair for a few day.

Mr. and Mrs. John Velau and Mr. and Mrs. Chas. Velau returned from their Minnesota trip Saturday. They were up as far as the Canadian boarder.

J. N. Day and family, and Mr. Day's sister, Mrs. Fred Skow and her daughter,, and Mrs. Wm. Smith formed an auto party to Mason City Friday where they visited relatives.

Dorothy and Homer Ridder returned to their home at Watertown, South Dakoa last Thursday. They have been spending their summer vacation visiting with Klemme relatives and friends.

Mr. Elmer Weisbrod, and family of Fenton, Iowa, came Saturday for a few days visit with Klemme relatives and friends. Mrs. Weisbrod is a daughter of Mr. and Mrs. Herman Ludeke of this city.

Mr. and Mrs. Henry Ludwig, and G. H. Ludwig. of Nevada, drove up here Saturday for a Sunday visit at the home of Mr. and Mrs. E. S. D. Kahrs.

Mr. and Mrs. Sylvan Johnson are the proud parents of a fine baby boy who arrived at their home Sunday morning in time for breakfast. Oh yes, Sylvan is stepping pretty lively alright.

Fred Gates and family. who have been in this vicinity for about a month visiting their daughters, Mrs. Ben Riemer, Mrs. Ben Ridder and Mrs. Roy Schaefer, left Tuesday for their home at Ingram, Wisconsin.

HOW FARM COSTS ARE COMPUTED AND COMPARED

Washington, Aug. 31.—One method of determining what systems of farming in a community are more profitable or require less labor than others is to analize all the farms in an area and compare the data thus secured with a resurvey of the same farms a year or more later. This is the plan used by the United States Department of Agriculture in a number of communities and is known as area work. By obtaining cost figures on the same farms each year, or at longer regular intervals, the department is able to compile very practical information relative to farm management.

This work was started by the department in Indiana in 1910, when all the farms in a given area were studied. A resurvey was made on the same farms in 1913 and each year since. The same method of farm management studies is being conducted in general farming areas in Ohio and Wisconsin, on citrus and truck farms in Florida, on 150 farms in the Shenandoah Valley of Virginia and in several other states. Studies have been made on owner and tenant farms showing the economic effect of crop rotation, the effect different systems have on yield, the comparative merits of feeding the crops raised on the farm or selling them, and the advantages of labor saving equipment.

Since the first surveys were made tractors have been purchased and are now in use on some of the farms under observation, thus giving an opportunity to study their efficiency and to compare systems of management before and after they were used. Comparative studies are also made on farms using tractors and neighboring farms where horses supply all farm power.

LAND PRICES ARE ON THE HIGH LEVEL

Davenport—Henry Kallenbach has sold to John L. Meyer of Walcott, a fine 120-acre farm in Clinton county north of Grand Mound. The price is $36,000 or $300 per acre.

Clarion—The C. J. Gillett farm southwest of Clarion, consisting of 200 acres, has been sold to Harry Sumners at a consideration in excess of $200 per acre. Mr. Gillett. who now lives at Oskaloosa, has been up on his place looking after the harvest for some weeks past and during his stay the deal went thru. Mr. Sumners gets possession of the newly acquired property on September 1, subject to the lease of the present tenant, Geo. Turner, which expires March 1, next. This place joins Mr. Sumner's farm on theso. and has fair improvements and at the price paid is surely a good buy.

Ackley—The World-Journal says: "A Tama county newspaper has a real estate agency that advertises some forty farms for sale in the vicinity of Traer, ranging in price from $225 to $425 an acre. That doesn't look like bankruptcy, and certainly it is not a bluff on the part of the farmer. Land values are down, but they will come back, well up to where they were when the price of oats was 60 cents a bushel and corn around the $2 mark—but first European nations must be given financial credit with which to buy; without more than a local demand, prices will continue to slip and be uncertain."

Grundy Center-The Trey Hayunga farm, located seven or eight miles southwest of Ackley, in Grundy co., was offered at auction sale to the highest bidder last Wednesday. The highest bid received was $182 an acre. Those who gathered at the scene of the sale were given every opportunity to make the bids higher if they so chose, but $182 an acre was the highest dollar and the 160 acres knocked down at that price to Mr. Trey of Parkersburg. It is understood that an offer of $350 an acre for the entire farm was made and refused a year ago. One of the principal heirs of the estate is a daughter of the late L. B. Trey. She lives in Germany, but visited at the home of her father hear several years prior to his death.

HOME TOWN HELPS

WHAT TO KNOW ABOUT TOWN

Matters on Which Prospective Citizen Will Do Well to Satisfy Himself Before Locating.

In the opinion of one who has given much thought to the question of civic betterment along various lines, the following points should be settled to his satisfaction before decision to make a home in any town is definitely arrived at:

Living—Can we live reasonably and well in that town? Are the best of modern conveniences available for its residents—electricity, gas, telephone, etc.? Are the housing and shopping conditions favorable? Rents, taxes, and prices fair? Hotels good? Home and truck gardens and dairy products plentiful?

Accessibility—Can we go and come easily? Does the town have adequate railroad connections and train service? Street car lines? Interurban lines? Well-marked automobile routes and hard-surface roads?

Business—Can I make good use of capital in that town? Are there banking facilities? Manufacturing interests? Up-to-date stores? Good shipping facilities? Favorable labor conditions? A prosperous farming territory? Active co-operation among business interests?

Employment—Can I get a job in that town at fair pay and with good prospects for the future? Can I count on co-operation from organizations making it their business to help introduce and establish new commercial interests and to welcome new citizens?

Progressiveness—Shall I find that I am in a town having a progressive city government, active civic organization, modern fire protection, and a pull-together spirit in everything—a town with a future?—L. N. Flint, Department of Journalism, University of Kansas.

EXPECT RESULTS FROM CLUBS

Organizations Formed in Alabama to Beautiful Sections Are Hailed With Much Enthusiasm.

The "beautiful mile" idea, we understand, originated in the mind of Billie Maltby, the manager of the club, who is actively engaged in working out the details of the club. In our opinion he has conceived an idea which is going to result in great good in the building of better roads, better homes, and the making of a better citizenship. The idea is taking root in other sections, and we would not be surprised to see "beautiful mile" clubs organized all over Alabama within the next 12 months. The idea will be carried into the towns and cities and "beautiful street" clubs will be organized. Everybody will want to live on a "beautiful mile" road or a "beautiful street." And, in the language of the Birmingham News, Billie Maltby has started something which is going to keep the eyes of the public on the original "beautiful mile" club. They are going to see what it does and how it does it. Here's hoping that they come up to the full expectations of those who are looking on.—Southern Democrat, Oneonta, Ala.

Billboards in the Clean-Up.

The clean-up campaign fostered as a preparation for the American Legion convention is progressing well. Individuals have taken hold in good shape. People are cleaning up their yards and painting their houses. That is about as far as individuals can go.

Now it is up to the city to take a hand in the beautification program by banishing the billboards from the residence districts. Nobody has a right to damage his neighbor's property by setting up a big sign across the street from a residence, or next to a residence. Nobody has a right to damage the community by introducing glaring signs on a boulevard or into a residence district.—Kansas City Star.

Industrial Plants in Small Towns.

The small town as a potential industrial asset has already been utilized to some extent by manufacturers, chiefly those seeking relief from labor troubles in the cities. In some industries, where there is an enormous production of standardized parts, the only difficulty to be met is transportation, and it is reasonable to believe that good roads and motor trucks will solve that problem. If so, the small town may again become the backbone of the United States.

What Muskrats Did for Maryland.

Maryland has many muskrat farms. Owners of the marsh land of Dorchester county harvest from 100,000 to 125,000 muskrat skins a year. There is a market for the meat as well as for the fur. A single Baltimore firm handles 25,000 to 30,000 muskrat carcasses a year and is unable to supply the demand at that. Hotels in Maryland offer them on their bill of fares as "marsh rabbit." Marshes formerly considered valueless are now worth $30 to $40 an acre for muskrat culture.

Getting Higher-Up Men.

"Four robbers seized 20 stories in air." Talk about getting men higher up!—Providence Journal.

NEWS REVIEW OF CURRENT EVENTS

Structural Weakness Apparent Cause of Tragedy of the Giant Airship ZR-2.

FAULTS KNOWN IN ENGLAND

Congress Takes Thirty-Day Recess After Discarding Anti-Beer Bill—Panama Yields Coto to Costa Rica at Uncle Sam's Command, and Goes Into Mourning.

By EDWARD W. PICKARD.

"The hull structure is, in general principles, of standard type such as used in Zeppelin airships and in earlier British types, but a very considerable saving of structural weight has been effected by a large number of improvements in details."

This excerpt from the official British description of the ZR-2 seems to explain the disaster which befell the giant dirigible while on its trial trip last Wednesday. The saving of structural weight was effected at the expense of the entire airship and the lives of 46 of the men who manned her. According to survivors, an abrupt change of direction when the vessel was above Hull strained the framework beyond its strength. It broke in two in the middle and fell into the Humber river with terrific explosions. Included in the dead were Commander Louis H. Maxfield and 15 more of the American crew which was to bring the airship to the United States, and British Air Commodore I. M. Maitland and 29 of the English crew. Only one American, a rigger, was among the survivors.

ZR-2 was the largest airship ever constructed and was built by the British government for the United States navy. The price was to be $2,000,000. Of course, as she had not yet been turned over to the Americans the financial loss does not fall on the American government. The catastrophe was not a great surprise to those in England who had watched the building and tests of the airship. On several preliminary trials defects and weaknesses were uncovered, and the final trial flight which ended so disastrously had been postponed repeatedly though the weather seemed entirely favorable. It is said that enlisted men of the British air service stationed at Howden had offered to bet ten to one that the dirigible never would get across the Atlantic; that they declared it was structurally weak, and impossibly large, with unreliable engines and a framework incapable of standing the strain of its own 33 tons of dead weight while in the air.

News of the disaster reached Washington while a congressional committee was listening to arguments in favor of an appropriation for the completion of ZR-1, an American-built companion ship of the ZR-2, on which more than a million dollars already has been expended. Officers of the naval bureau of aeronautics are confident that the navy will be permitted to continue its rigid airship building program notwithstanding the loss of ZR-2.

Plans for the ZR-1 call for an airship of slightly smaller size than the ZR-2, a length of 670 feet, diameter about 80 feet, and gas capacity of approximately 2,200,000 cubic feet. The total cost is estimated at $2,500,000. Her designers have adhered more closely than the British to the structural plans of the Germans, who were the original builders of rigid airships. The naval gas extracting plant at Fort Worth already has stored enough helium gas to fill the envelope of ZR-1. Helium is far less dangerous than hydrogen gas, being noninflammable.

Late Wednesday night congress adjourned for a 30-day recess, or until September 21. The senate finance committee remains on the job to continue its work on the permanent tariff and the tax revision measures which the house has passed. Among the bills passed at the closing session were the agricultural credits measure, the shipping board deficiency bill of $48,500,000, with its amendment carrying $200,000 for expenses of the disarmament conference, and the measure extending the dye embargo until January 1.

Chief interest in the senate centered about the anti-beer bill, which was attacked at length by Senators Reed and Stanley. The dry leaders found by test votes that the measure could not be carried, so they allowed it to be thrown into the discard. They failed even in their effort to have it made the unfinished business when the senate reconvenes. The more fanatical of the prohibition leaders are to be blamed for the failure of this bill, for they rejected all compromise and by their stubbornness led the wets to form a temporary coalition with the agricultural bloc. The members of the latter helped kill the anti-beer measure in return for the support of the wets for the farm export credits bill which was in danger of being caught in the jam and held up indefinitely.

This credits bill empowers the War Finance corporation to issue $1,500,000,000 of its own bonds and to lend $1,000,000,000 for financing agricultural exports. The house refused to agree to senate provisions which would allow the corporation to lend directly to European purchasers of the commodities, but the compromise will allow the Finance corporation to lend to anybody, provided satisfactory collateral is furnished to it for the sums advanced.

Japan has formally accepted the invitation to the Washington conference and its embassy is obtaining accommodations for a delegation of about eighty persons. A large residence, an office building and a section of one of the hotels have been rented. Since the meeting of the Japanese diet probably will keep Premier Hara at home, the Japanese delegation is likely to be headed by either Foreign Secretary Uchida or Viscount Chinda. In its note of acceptance the Japanese government expressed the hope that the agenda of the conference on Far Eastern affairs would be arranged prior to the meeting in accordance with its suggestion that matters concerning only a few nations, or which are accomplished facts, be not brought into the discussion. So far nobody has shown any intention of supporting this proposition of the Japanese, which, of course, is put forward solely in behalf of their own selfish interests. They do not wish to be asked about Shantung, or Yap, or Manchuria.

Great Britain also accepted the invitation to the conference last week in a graceful note that contained no restrictions or qualifications. The representatives of the republic of South China are still asking recognition in Washington and a bid to the meeting. They assert that the people of South China have set up a government of their own that owes no allegiance to the Peking government, and that they constitute a full half of the population of China.

The republic of Panama is officially in mourning. President Porras has ordered the flag displayed at half-mast on all public buildings for one month because Costa Rica gets the disputed territory of Coto. Panama will not seek by force to prevent its neighbor from occupying the district, because the United States last week told her that the terms of the White award must be accepted and that warfare between Panama and Costa Rica would not be permitted. Porras then had no other course than to yield, though his political foes probably will take advantage of his plight and attempt to oust him from office. It is said they are trying to organize a revolution, and this may give some occupation to the battalion of American marines that was sent down to the isthmus ostensibly to protect American property and lives if the Panamans did not give in.

When bids for the "wooden fleet" were opened by the United States shipping board there was but one bidder for the entire fleet—the Ship Construction and Trading company of New York. This concern offered to take the 205 vessels "as is" at $2,100 each or a total of $430,000. Although this was less than the estimated average cost of one of the ships, the board agreed to accept the offer. Most of the vessels have been lying idle in the James river and it has been costing the board almost $50,000 a month to care for them. Twenty ships were reserved to be sold at highest prices and fifty others may be kept for use as pontoons for the building of the proposed bridge across the Hudson river.

The peace treaty with Germany has been completed and last week was shown to the members of the senate committee on foreign relations, and also to other senators. All who saw it expressed their approval of the pact, and it was to be signed in Berlin. It must now be ratified by the senate and the reichstag. The treaty provides for the resumption of diplomatic and commercial relations between the two countries, awards the United States the fruits of victory specified in the Versailles treaty, and provides for the payment by Germany of American war damage claims. A similar treaty has been negotiated with Austria and signed at Vienna.

Unless the Dublin correspondents are wrong, another impasse in the Irish peace negotiations has been reached. De Valera, Dail Eireann and the Irish republican council, after long debate, have drawn up their reply to Lloyd George's offer and dispatched it to London. Presumably its contents will be made public before this reaches the reader. It is asserted now that the British offer has been rejected and no counter-proposition made by the Irish, but that the way is left open for further negotiation. The Sinn Fein leaders believe the premier is not sincere when he says Great Britain has made its ultimate offer; they think the truce will not be broken by their rejection and that Mr. Lloyd George will make further concessions.

The Roman Catholic church intervened in the Irish controversy last week with a message to De Valera "from the highest authority," delivered by the lord bishop of Dromore. The source of the message and its purport were not made public.

Federal officials have punctured a $50,000,000 financial bubble, they assert, in the arrest of Charles W. French, partner of John W. Worthington, already in custody, and a number of his associates in various parts of the country. These men, it is charged, were selling stock in 20 companies, all organized by French, and having a total capitalization of more than $21,000,000. The federal agents have seized about $27,000,000 in suspicious "paper" and are getting confessions from several of the gang. Developments in the case are coming daily.

Of concrete interest in the South and at least academic interest in the rest of the country is the decision of Federal Judge Boyd in Greensboro, N. C., holding unconstitutional the federal law imposing a tax of 10 per cent on the profits derived from products on which child labor is employed. Regulation of labor, Judge Boyd ruled, is one of the powers retained by the states and not delegated to the federal government. State child labor laws are adequate to care for the situation and provide a penalty, not a tax, as is proposed by the act of congress, the decision said. The attempt of the federal government to regulate labor within the state is a usurpation of authority and a violation of the sovereign rights of the state, the judge decided.

The Pennsylvania Railroad company has again challenged the right of the federal railway labor board to dictate the road's policy in dealing with its employees, and has renewed the fight for the open shop. The Pennsylvania, in an application filed by Samuel Rea, president, denied the legality of the board's refusal to recognize a recent election of representatives of the railroad's employees. The ballots which selected them made no provision for unions as such, and the board ordered a new election, prescribing the form of the ballots. Agreements entered into subsequent to the first election were declared void.

THE LIGHT

By MOLLIE MATHER

© 1921, Western Newspaper Union.

Time lagged, with the vacation party at Hamstead on the beach. It was Marcia Cole who spoke from her hammock at the far end of the hotel veranda.

"Let us," she suggested, "take a boat ride over to the lighthouse. Miriam Evans says it is most interesting. There's an old Scotch keeper there, who lives like a hermit. His floors are as white as snow, and old brasses shine upon the walls. He has a corner of books, a reading lamp by a tiny fire place, and his only companion is a Scotch collie dog. The old man told Miriam the sad story of his life."

Laughingly Marcia stopped.

"I have been rambling on," she said. "Ramble some more," Phyllis encouraged, "and tell us the sad story."

"Miriam was with Peggy the day she went out to the light," Marcia went on; "she seemed to remind the old fellow of his own daughter who had, he insisted, deserted him; though Miriam concluded that the girl had but grown tired, naturally, of an isolated life and escaped. They lived, then, in some old house in a remote village. His daughter, the old man declared, was 'the light of his life.' Her mother had died in the girl's infancy, and he, the father, had tried in his care for her to take the place of both. Miriam said she could fancy as he talked, how tender and absorbing that care had been. Tears raced down his rugged cheeks, as he told of a 'lover lad' who was evidently his choice for the girl, as a husband. Miriam could picture that girl, too, as selfish, accepting the devotion of the two men as merely her due, and casting it aside for the new arrival who stirred her romantic fancy. He came from the city, an illustrator, idly traveling about and sketching here and there. He made experimental sketches of the Scotchman's beautiful daughter; her piquant face pleased him. And then—before the very eyes of the father and his young trusted friend—the lover, this artist, carried the girl who pleased him away to the city—to marry her. Oh, yes, to marry her. And, as usual, she accepted the homage as her due. But he was ashamed of the crude old Scotchman and the girl's humble surroundings. He thought that a year of travel and study under his married sister's care would improve this girl who had touched his heart, and would make her in time a fit mate and companion for himself. The sister, who adored her gifted brother, willingly undertook the task. But here is the tragedy—the father never heard from his daughter from the moment when she waved him a careless good-by to this day, when he tends the light in the tower, and sadly smokes his pipe as night hours go by—just thinking of her. He sold the village home when two years had passed, with no word from his daughter. The jilted lover, so the old man told Miriam, is his one comfort. 'Davey rows over often to see me,' he said."

Janet Rae was on her feet.

"I want to go over to the light," she said.

The guests objected.

"It's quite a story," Phyllis agreed, "but I have more cheerful plans for the afternoon. When you hear who is coming out on the evening boat, you will want to be here at the hotel," she told Marcia Cole. A pretty matron came forward.

"And you, Janet, dear," she advised, "will wish to be here, too. Gregory is also coming!"

Janet made no reply. Her eyes widened as she gazed out over the tossing waters.

"Tell Gregory not to look for me," she said.

The matron shrugged her shoulders.

"Who," she quoted smilingly, "can fathom the ways of Janet?"

It was a rowboat that the girl found and she bent to the oars herself. It was twilight when the tiny craft made shore. Janet Rae sprang out and climbed the rocks in her ridiculous little slippers. There was no person in evidence about the place, so she passed breathlessly through the white-floored kitchen up on the stair to the balcony light. Far beyond she could see like a vision past, the hotel on the bluff, where guests would now be assembled in the great dining room—gayly clad women, men like Gregory—exacting, critical. The wind tore suddenly at Janet's light skirts, the balcony door blew shut with a metalic snap. When she tried it, it would not open. She huddled back against the stone wall, wondering, as the stars came out, how soon he would find her—the poor disappointed old keeper of the lighthouse.

The old keeper had long been buffeted by winds and rains of sorrow. He found the girl later clinging there, when he went to make sure that the tower door was closed. His flashlight illumined her stained pale face.

"Janey," cried the old man, "Janey, my girl!"

Through tears she looked up at her father.

"Yes, it's Janey," she said, "come home to stay."

But it was David, following wonderingly up the stair, who carried her down in his arms.

MERCHANT TELLS OF A REMARKABLE

Writing from Maxey's, Ga., Gillen, proprietor of a large ment store at that place, says:

"I have a customer here who bed for three years and did not a meal at any time. She had sicians and they gave her up bottle of Tanlac got her up second bottle she commenced house and on the third she did cooking and housework for a of eight."

This sounds really incredible comes unsolicited from a highly itable source and is copied from the letter.

Tanlac is sold by leading everywhere.—Advertisement.

IN HER FATHER'S FOOTS

Professor Doubtless Had Often ried Out an Idea, and Small Daughter Copied Him.

Barbara was a professor's four years of age.

One day Barbara disappeared after vainly searching for her all the neighborhood, her father got his motorcar and began a search streets. About a half an hour found her walking as fast as she go toward a nearby woods, a tiny basket in her hand.

"Where have you been, Barbara and for goodness' sake where are going?" her father asked, worried "You have nearly worried your mother and me to death."

"Well, I had an idea and I thought I'd carry it out," replied Barbara, an impish grin.—Indianapolis News.

WOMAN AVOIDS AN OPERATION

Hope Nearly Gone, but L. E. Pinkham's Vegetable Compound Saved Her

Star, N. C.—"My monthly gave me so much trouble, some they would last weeks. I treated by two tors without and they both I would have to an operation. my trouble four and was unfit anything, and given up all hope ever getting better. I read your medicine 'Primitive Baptist' paper and decided try it. I have used Lydia E. Pinkham's Vegetable Compound and Lydia Pinkham's Liver Pills for about months and now I am able to do work. I shall never forget your medicine and you may publish this if you want to as it is true."—Mrs. J. HURSEY, Star, N. C.

Here is another woman who adds testimony to the many whose letters have already published, proving Lydia E. Pinkham's Vegetable Compound often restores health to suffering women even after they have gone so that an operation is deemed advisable. Therefore it will surely pay any woman who suffers from ailments peculiar to her sex to give this good old fashioned remedy a fair trial.

Apt Definition.

Jack came home from visiting new boy in the neighborhood.

"His mother is so petty," complained Jack to his own mother.

"Do you mean she is cross?" asked the surprised woman.

"No, she is petty and awful mean," returned Jack.

"But how can she be nice if she is petty?" called big sister.

"Don't you know?" said Jack. "She pets her boy, and calls him pet names."

Cuticura Soap for the Complexion

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

God's Judgment.

But if our unrighteousness commend the righteousness of God, what shall we say? Is God unrighteous, who taketh vengeance? God forbid: for then how shall God judge the world? —Romans 3:5, 6.

Find the Cause

It isn't right to drag along feeling miserable—half sick. Find out what is making you feel so bad and try to correct it. DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

The SANDMAN STORY

HER TO THE BEAR

DPA COON sat in the door- smoking when Mrs. Coon her little ones came clawing tree nearby and ran toward of Grandpa Coon.

certainly do act like them," ndpa as the little Coons came over him, "yes, my children, the 'Little Brothers of the ure enough."

big bears cannot be our " said Timmy Coon, who ore questions than his broth- y, Grandpa, they are bigger are."

help it, sonny," replied taking his pipe from between

th. "The coon is called the Lit- ther to the Bear, and if you sit down and keep very still you how it came about."

y Coon and his brothers were itting in a row in front of a Coon, for they were very f his stories, and with their ide open and ears sticking up could listen to every word they for him to begin.

was a long, long time ago, you honeys," said Grandpa Coon, back long before I was born or my grandpa, either, that all this happened.'

The eyes of all the little coons grew bigger still with the goggle-like rings around their eyes.

"Yes, siree," said Grandpa, "it was a long, long time ago that day when Mr. Dog was a-chasing young Swifty Coon after he jumped from the tree where he thought he had him 'treed' for sure.

"Swifty heard Mr. Dog a-coming behind him, and as he was running as fast as he could he knew that something had to be done right off quick or he would be a dead coon in a very few minutes.

"Swifty thought of the tree ahead, but he knew that Mr. Dog would just sit under it and bark and wait for Mr. Man to come with his gun and then all his trouble would have been for nothing.

"Right then Swifty saw ahead of him Mr. Bear's house with the door wide open, just as if he was expecting company, and he was going to have company only he did not expect it.

"Well, into Mr. Bear's house tumbled Swifty and ran right under the table, where Mr. Bear was a-sitting reading.

"'Oh, save me, Mr. Bear!' said Swifty. 'That awful Mr. Dog is chasing me and back of him, I expect, is Mr. Man.'

"Mr. Bear, he jumped right up, for he was not a bit afraid of Mr. Dog, but he did not care for Mr. Man at all.

"When Mr. Dog came up to the door there stood great big Mr. Bear looking very cross and growling.

"'What you doing here?' he asked, showing his mouthful of teeth, 'you been chasing my little brother, and if you don't run off home this very minute I shall eat you up.'

"Mr. Dog, he just dropped his tail and he legged it for home so fast that Mr. Man never did know where he went, and he had to go home, too.

"And ever since that time we have been called the 'Little Brother to the Bear.'"

The little Coons waited for a minute to see if Grandpa Coon would not tell another story, but his pipe fell from his hand on the grass and Grandpa's head began to nod, and they knew there would be no more stories that day.

Lois Wilson.

Miss Wilson, a well-known screen star, entered the moving picture field after winning a beauty contest conducted by an Alabama newspaper. She has steadily climbed until today she is playing leading roles in some of the most popular pictures. She is the typical sweet, home-loving type. Before going into pictures she was a school teacher.

LIVE STOCK

NOT WISE TO OVERLOAD CARS

Death or Injury of Animals Means Heavy Loss to Shipper—Temptation to Crowd Is Great.

(Prepared by the United States Department of Agriculture.)

It makes quite a difference in the profits of the farmer stock raiser whether he obtains 8½ cents per pound for his hogs as meat or from ½ to ¾ cent per pound for them as dead hogs and soap-grease material. Which of these prices he obtains depends upon how the animals are loaded in the cars. Many shippers, either through ignorance or in an effort to save a small amount of freight, overload or improperly load their live stock when sending it to market, and thereby run great risks of sustaining serious losses through crippled or dead animals, say specialists of the bureau of markets, United States Department of Agriculture.

With freight rates at their present levels there is a strong temptation to economize on this item of expense by crowding a few more animals into an already well-filled car. Representatives of the department, however, who see thousands of carloads of live stock unloaded at the great central markets, are of the opinion that if farmers and stockmen could see the condition in which much of the live stock reaches the stockyards they would be impressed not only with the folly of overloading, but also with the absolute necessity of taking every precaution against injury and death of the animals while in transit.

Overloading is one of the commonest, and at the same time most serious, mistakes made by the inexperienced or careless shipper. It seems such an easy matter to crowd just a few more animals into a car, and the fact that once in a great while an overloaded car will go through without serious mishap seems to urge the shipper on to tempt fate just once more. The wise shipper, however, will have nothing to do with this false economy, say specialists of the department. He will lay down a hard and fast rule to load only as many animals in the car as can ride comfortably, and from this rule he will not deviate.

The chances of loss through overloading are greater in warm weather than in cold. Temperatures may be such at the time of loading that the animals are fairly comfortable, but before they reach market the weather turns suddenly hot, with the result

Dead Stock on Unloading Docks.

that anywhere from one to 12 animals suffocate. This is particularly true of hogs. The shipper should remember that stock cars frequently stand in freight yards completely hemmed in by trains of box cars. Under such circumstances, if the animals are crowded in the car and the weather is hot, overheated and dead animals are almost certain to result.

Another mistake frequently made is to load mixed stock without proper partitions. When two or more species of live stock are shipped in the same car they should generally be kept separate by building strong partitions. This is particularly important when large animals are shipped with smaller ones.

It has been found that shipping live animals any considerable distance is an undertaking always fraught with some risk. This risk, however, may be materially reduced, in the opinion of department specialists.

The exact number of animals that should be shipped in a car, naturally, varies with the size of the car, the size and kind of animals, the length of haul, the season of the year, and weather conditions. There can be no variation, however, in the general rule that the animals should have sufficient room to be reasonably comfortable, and that the car should be so partitioned that large animals cannot trample the smaller ones, and that aggressive and quarrelsome animals cannot injure those with a more quiet and timid disposition.

Even at the present comparatively low price of live stock a single dead or crippled animal invariably represents a substantial loss, and in many instances wipes out the profit on the entire shipment.

POULTRY

GOOD FENCES ARE REQUIRED

Fowls Running at Large Destroy Gardens and Flower Beds—Confine Them in Yards.

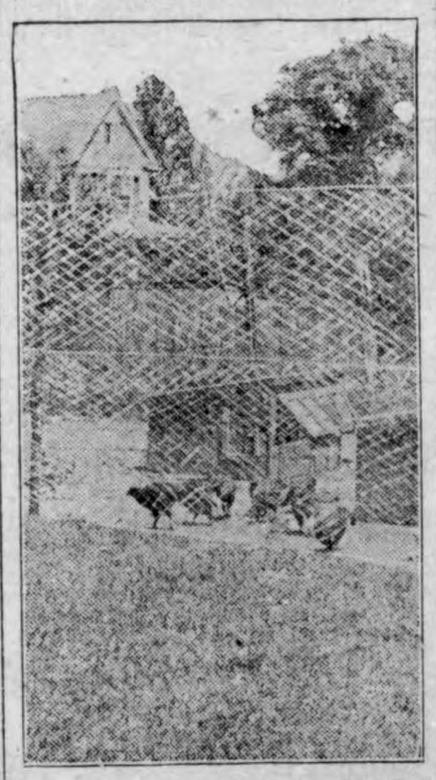
(Prepared by the United States Department of Agriculture.)

Confine the back-yard flock; otherwise the hens will stray into neighbors' yards and gardens, where they may cause damage and are almost sure to cause ill feeling. The yard should be inclosed by a board or wire fence. Wire fencing is preferable, as it is cheaper and the hens are less likely to fly over it, say poultry specialists of the United States Department of Agriculture. If cats prove troublesome where one is raising chickens, it may be necessary to cover the top of the yard with wire also. A board should not be used at the top of a wire fence, as this gives the hens a visible place to alight and tends to teach them to fly over.

A 5-foot fence is high enough for most conditions, but if the hens show a tendency to fly over such a fence the flight feathers of one wing should be clipped. Leghorns need a 6-foot fence. The larger the yard which can be provided the better the hens will do, as it not only gives them greater opportunity to exercise, but also makes it possible to maintain a sod on the yard. In most cases not enough land will be available so that a sod can be maintained.

If the yard is fairly large, it can be divided into two parts and green crops, such as oats, wheat, rye, or Dwarf Essex rape allowed to start in one yard while the hens are confined to the other. The green crops should be sown very thick, and the following quantities will be found satisfactory for a yard 25 by 30 feet: Wheat, 2¾ pounds; oats, 1½ pounds; rye, 3¼ pounds, rape, 5 ounces. When the growing stuff reaches a height of 3 to 4 inches the hens can be turned upon it and the other yard be similarly sown.

Where it is inadvisable to divide the yard it is possible to keep a supply of green stuff growing by using a wooden frame 2 or 3 inches high covered with 1-inch-mesh wire. A frame made of 1 by 2-inch lumber, 6 feet long and 3 feet wide, with an additional piece across the center to support the wire when the hens stand on it, will be found desirable for a small yard. A part of the yard as large as this frame is spaded up and sown, the frame placed over it, and the material allowed to grow. As soon as the green sprouts reach the wire the hens



Common Poultry Netting Makes a Very Satisfactory Fence.

will begin to pick them off, but since they cannot eat them down to the roots the sprouts will continue to grow and supply green material. This frame can be moved from place to place in the yard, and in this way different parts cultivated.

The yard should be stirred or spaded up frequently, if not in sod, in order to keep it in the best condition. This will not only tend to keep down any odors which might arise, but also allow the droppings to be absorbed into the soil more readily, and, therefore, keep the yard in better condition for the hens.

Although it is necessary to keep the hens confined to their yard most of the time, it is sometimes possible to let them out where they may range upon the lawn for an hour or so in the evening when some one can be at hand to watch them or at certain seasons of the year to allow them to run in the garden plot. This will be enjoyed greatly by the hens and will be very beneficial to them.

CONTROL INTESTINAL WORMS

Best Way Is to Change Ground Upon Poultry Run, Especially if Fowls Are Crowded.

Changing the ground upon which poultry run is the best means of controlling intestinal worms in poultry, because the worms or eggs of the worm will stay over in the ground from one season to another, especially if the poultry is overcrowded.

DAIRY

CHOOSING BREED OF CATTLE

Market for Dairy Products, Climatic and Other Conditions Have Important Bearing.

(Prepared by the United States Department of Agriculture.)

In selecting the breed of dairy cattle suited for his particular locality, the farmer should give close consideration of two sources of income from this kind of stock, say specialists of the bureau of animal industry, United States Department of Agriculture. One part of the income is represented by the sale of products, either milk or butterfat; and the other comes from the sale of surplus stock. Often the latter may amount to a considerable sum, even though the herd is composed of grade animals.

Another point that he should bear in mind is that no single breed is altogether superior to all others; it may excel in certain features, but not in all. It is best, therefore, to select the breed which comes the nearest to meeting the necessary conditions.

Most of the milk sold in towns and cities is subject to certain requirements as to quality, among which are standards for the butter fat and milk solids. For much milk, payment is based upon quantity by weight, without special reference to any butter-fat content above the legal standard. Local requirements differ greatly as to the content of butter fat and solids.

Consumers, as a rule, much prefer milk of a deep, rich color, which usually is considered to be an indication of a large cream content. A distinct and deep cream line in the milk bottle is another feature by which the quality of milk is judged. Although generally the consumer does not want to pay more for a better quality of product, occasionally it is possible to create a demand for rich milk at a higher price.

Very often the benefits of co-operative effort are lost through the exercise of an inborn spirit of independence. Consequently, it frequently happens that in the selection of a breed no consideration is given to the fact that another breed already may be established in the locality. The predominance of a certain breed in a community offers many advantages.

Where There Is One Breed in Community It Is Easier to Dispose of the Surplus Stock.

A market is established which, because of the availability of large numbers of animals, attracts those who buy large consignments. Under such circumstances all surplus stock may be disposed of to better advantage, and co-operative advertising also may be used effectively. In addition, bulls may be bought co-operatively or exchanged with facility, thus very materially reducing the cost of service in the herd.

Any necessary additions to the herd can be obtained, without expense for travel, from neighbors' herds with whose history the buyer is thoroughly familiar. These advantages apply not only to the breeder of purebred cattle, but also to the owners of grades.

In this country there is a very wide range of conditions, as to both topography and climate. On rich, level pastures all breeds thrive, but on rough, hilly land, where pasturage is scant, they do not show equal adaptability. In the extreme cold of the North, with its long winters, different resisting qualities are needed as compared with the almost tropical heat in the southern parts of the country.

In the United States four breeds of dairy cattle have attained considerable prominence, namely the Ayrshire, Guernsey, Holstein-Friesian and Jersey. These breeds have been developed carefully for a long time for the purpose of dairy production, and in consequence each transmits its characteristics with regularity to its offspring. Certain distinct features distinguish each breed from the others, but all possess ability as milk producers. There is, of course, considerable variation in the characteristics of individuals within each breed.

GRAIN MIXTURE FOR CALVES

Equal Parts of Cornmeal, Ground Oats and Wheat Bran Is Good for Young Animals.

A good grain mixture for the young calves is equal parts of cornmeal, ground oats and wheat bran. To start the calf on grain, sprinkle a small amount in the bucket after he has finished his milk. There is no danger of over-feeding him on grain, and he should be given all that he will eat.

OW DO YOU SAY IT?

By C. N. LURIE

mmon Errors in English and How to Avoid Them

RANSPIRE" AND "OCCUR."

) OCCUR means to take place, to happen, to come to pass; to transpire means to become n, to escape from secrecy, to be public. It is quite common, esly in ordinary speech and in gs in newspapers and magato hear and see the verb "transused instead of "happen" or r." Such usage is, however, incorrect, and is condemned by s in England and America. "It pired yesterday, at the meeting e common council, that permis- was withheld," etc., wrote a re- r, but he should have written, appened yesterday," etc.—or, bettill, he should have omitted the e and begun his sentence with and omitted "that."

llowing is a case of the proper f the verb "transpire": "At the ing of the common council yesy it transpired that last week's n on the street-railway franchise not final"—that is, it became n.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

ABOUT INTRODUCTIONS

We are more sensible of what is done against custom than against nature.—Plutarch.

NO ONE has any good excuse for not being able to make introductions easily and in good form. It is simply a matter of knowing the right form and then in a little practice. It is an act that requires no originality and no special talent. But there are a lot of people nevertheless, who always do bungle an introduction, and this for the simple reason that they do not give the subject sufficient thought or do not trouble themselves to look up the right way to do it.

The other day I observed a stalwart young corporal, proud to have his cheery-faced little mother visiting him, and eager to introduce her to his friends.

"Mother, meet Sergeant Jones," he said as one of his friends approached, and again, "Smith, know my mother."

To be sure this answered the purpose and as every one was very happy on the occasion it probably didn't make much difference how the introduction was made. But the form was far from courteous.

In the first place a man should always present or introduce his men friends to his mother, or any other woman, and he should use a form of introduction that shows that he is making the introduction in this way. Moreover the abrupt manner of saying simply, "Meet Mr. Brown," or "Know my friend Jones," which has recently become so popular is really too abrupt to be in good form for any purpose save possibly for men to introduce men to each other in a purely business connection. It should never be used in introducing women. The right way for the young soldier to have gone about it would have been to say, "Mother, I want to present Sergeant Jones." "Jones," this is my mother," or "Let me introduce Sergeant Jones to you, mother; Sergeant Jones I wish to present you to my mother." In a case like this it is not necessary to give the mother's name. The only occasion where it would be, would be in the case the mother, through remarriage, bore a name different from the one of the son who introduced her.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

NATALIE.

ATALIE is another holy name, originally coming from the Latin title of "Dies Natalis," the birthof our Lord. The word Natalie furnished the title of the feast all the Romance portion of Eue.

rance made the word Noel from it, ning Christmas, and soon Noel me a Christian name there. In y it appeared as Natale. Spain Portugal used the name Natal.

here is a feast celebrated on the of September by the Greek church he festival day of St. Natalia, the oted wife who attended her hus- St. Adrian, in his martyrdom. is the same Adrian whose relics d the Netherlands and whose name me celebrated in the West where wife Natalia was long neglected. The East, however, reversed the arrangement and Natalia is popular there, while her husband is forgotten.

Natalia was one of the favored Greek Christian names. Russia adopted her and, adding the usual consonants of its language, calls her Natalija, Nataschenka, and Natascna. The first of the three names is extremely popular there today, or until the Bolsheviki came into power and withdrew the attention of etymologists from the study of feminine names.

France is said to have secured Natalie from Russia, though there is record of a Natalie at Cambrai in 1212. England preferred Natalie to any of the other forms, rejecting Natalia as too Latin in its influence. Whether American Natalies are representative of the English, or taken direct from France, is a matter of personal preference.

The pearl of purity is Natalie's talismanic gem. It promises good fortune for its wearer and makes her gentle, kind, and lovable. Thursday is her lucky day and 4 her lucky number.

New Yorkers Are Cleanly.

A noted German surgeon, visiting New York, was asked what impressed him most.

"The cleanliness of the people as a mass," he said. "Everybody in your crowded subways seems accustomed to daily baths and to wear freshly laundered linen. Otherwise your subway crowds would be unendurable."

How It Started

THE FINGER PRINT SYSTEM.

THE British authorities in India, desiring to impress the natives with their omniscience, hit upon the idea of taking the finger prints of everybody. Later the scheme was brought to Scotland Yard, the police headquarters in London. From there it spread till it is now in universal use.

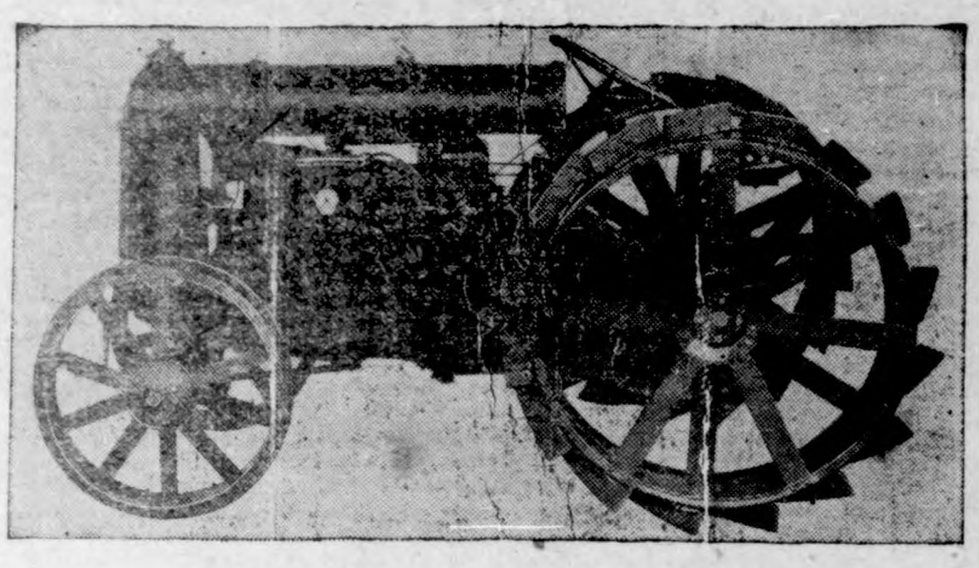
ULTIMATE OBJECTIVE

Old Mr. Multirox—And so, you are willing to make me happy by becoming my wife?

Young Miss Goldilox—Yes, I suppose I'll have to be your wife in order, eventually, to become your widow.

FORDSON



"In the tractor the farmer has now has a machine in which is harnessed one of the most adaptable, effcient, ecnomical scources in the world— the internal combustion engine-

"The tractor will multiply the productive capacity of each individual farm worker from three to four times over.

"It will put the farmer on a par with the city manufacturer. It will put his produce-produced factory—for that is what a farm is—on to an efficient production basis.

"It will enable each worker to earn so much more that he can be paid more and still leave a greater profit for the man who hires him. It will enable the farmer to work fewer hours in a day, giving him more time to enjoy life.

"I believe the tractor will make farming what it ought to be—the most pleasant the most healthful, the most profitable business on earth."

SEPTEMBER STORE NEWS

Come to our store often during this mild month and see the new things first—Fall Merchandise is arriving daily.

COATS——

New Coats for Women and children are now in stock; the quality is very good, and new prices are attractive.

We are closing out 18 Ladies Coats at $5.00 each which were worth up to $25.00 each—these coats are nice enough to wear anywhere, they also could be made over into childrens coats, and some would make over nicely into Ladies Sport Skirts. If you are handy with the needle this is a chance to get a **real bargain.**

Twenty Seven Childrens Coats, sizes 5 to 14 we offer at from **$2.90 to $4.50 each.**

HOUSE DRESSES——

In order to make September a busy month, we offer 1 lot Ladies House Dresses and Aprons at, each $1.00

SCHOOL DRESSES——

100 Gingham Dresses for School Girls at Special Prices during September.

SWEATERS——

We have a big new line of Sweaters and Knit Coats for Ladies, prices range from **$1.00** up, and the highest priced Ladies Sweater in the store is only **$7.50**, quite different from last year.

Chidrens Sweaters are also much reduced in price. Our line is large and quality god.

Everybody wants a Sweater for Fall and early winter use—get yours next time you come to town.

STOCKING CAPS——

Everybody is doing it, everybody is buying a Knit Cap. One big lot at **25c each**, others at **50c and 75c each.**

MANTILLAS——

We have a nice line of large Knitted Scarfs to throw over the shoulders. It's just the time, Ladies, to wear them. Prices range from **$5.00 to $15.00 each.**

PIECE GOODS——

If you like to sew—here are the goods at a bargain:—

3 pieces fleeced goods, at per yd **20c**
10 pieces Cotton Suitings, at per yd. **25c**
6 pieces Cotton Wastings, at yd **44c**
3pieces Satin Finish Shirting, at yd **85c**

OUTING FIANNELS—

Are of the Good Old Fashioned quality this year, and the prices look like old times too, mostly 15c and 20c per yard.

STOCKINGS—

Childrens wihite cotton hose, pair **10c**
Childrens black cotton hose, pair ..**15c**
Ladies white cotton hose, pair **20c**
Ladies black cotton hose, pair **25c**

BOYS' SCHOOL PANTS—

Knee pants, in Army Kahki, pair..**65c**
Knee pants, wool suiting, pair ..... **$1.50 to $2.85**

MEN'S SOCKS—

Rockford Socks, pair **10c**
Iron Clad Socks, pair **15c**
Specials in Dress Socks, pair **25c**

MEN'S LEATHER VESTS—

At less than half of last year's price, good values at $10.00 and up, others as cheap as, each **$6.00**

Big new line to select from.

SWEATERS FOR MEN AND BOYS—

Last year our highest numbers in Sweaters for Men and Boys reached $18.00 each—this year the price range is from **$1.00 up to $6.00**, with just a very few up as high as $9.

SUGAR—

We still advise our customers to buy Sugar from hand to mouth, we look for a drop in price just after the first killing frost. The beet crops are reported good all thru the U. S. and Europe too, and Cuba has a heavy carry-over of sugar from last year. Another thing that effects the situation is that the people of U. S. are only consuming about 1-2 the Sugar this year that they did last.

My guess is, that Sugar will retail at $5.00 per bag by Christmas time.

POTATOES—

There are not enough Potatoes in this community to feed us thru until another crop so will have to ship in several car loads.

The early potatoes, in the potatoe producing sections from which we usually buy are small, so we are keeping our eye on the late crop which are of better size.

Now then, if you want nice large eating Potatoes at the right price, leave your orders with us—Talk to our Grocerman next time you come to town.

Wellemeyer Departmen Store

"A Good Place To Trade"

Klemme — Iowa

SOMETHING TO THINK ABOUT

By F. A. Walker

WORD "GENTLEMAN."

A FRENCH critic, discussing the recent famous battle for the boxing championship of the world, expressed surprise that so many Americans should have favored the challenger from abroad.

Perhaps if he had stopped to think for a moment he would have realized that, after all, this is in the true sporting spirit.

That spirit is at times hard to cultivate. It is natural for a city to want its home team to win in baseball, and for a college to wish to see its young giants sweep all before them on the diamond, the links and the gridiron.

"To have and to hold" is the motto of national or international sport from yachting to polo.

* * *

It is reasonable for a nation not to wish to lose any championship once it has obtained it.

Various explanations have been given of the popularity of Carpentier, the best small man who stood up to the best big man in their business in the world today.

A ray of light is thrown on the matter by a word that was used by several experts in describing the affair. They said that the Frenchman fought like a gentleman and lost like one.

This involved no reflection on the champion, because nothing of an "ungentlemanly" nature was done by anybody on the memorable occasion in question.

The interesting thing is the use of the word "gentleman."

* * *

It is an expression that Americans have been shy of from the earliest days, partly because it conveyed a suggestion of class distinction in a country that has no "classes" and partly because the word was hard to define even in countries where it was in common use.

There is no doubt that in the strictest sense of the expression, George Washington, Thomas Jefferson and John Adams were "gentlemen."

Yet there can be equally little doubt that the first would have corrected anybody who defined him in that way by saying that he was a soldier, while the other illustrious two would have preferred to be called statesmen.

As for Benjamin Franklin, if anybody had called him a gentleman, he would have remarked probably that he preferred to be a printer.

* * *

Daniel Webster was entertained at the Jockey club in Richmond on a famous occasion. He surprised his hosts by saying that, though born in New Hampshire and a senator from Massachusetts, he could give three good reasons why he could claim to be a "Southern Gentleman." And he gave these amid a storm of laughter.

In fact, it is only in the army and the navy that the word "gentleman" survives in a technical sense. For "conduct unbecoming an officer and a gentleman" is the ground for one of the most serious charges that can be brought against anybody who holds a commission.

* * *

The great John Henry Newman, afterwards cardinal, in discussing "the iden of a university" gave a considerable part of his time to the effort to define a "gentleman."

He, of course, had no more sympathy than any American would have with the view, not uncommon in parts of Europe, that a "gentleman" is a man who has no profession or business; who has nothing to do but nothing.

In olden days a "gentleman" was supposed to be like Bayard, "without fear and without reproach; kind to women and children; gentle in peace and careless of his own safety when duty called him."

It is an interesting thing to find the word used in the case of a professional boxer.

SCHOOL DAYS

MOTHER'S COOK BOOK

by Nellie Maxwell

The glory of our life below
Comes not from what we do or what we know,
But dwells forevermore in what we are.

GOOD THINGS FOR THE FAMILY.

FOR those who enjoy hot cakes and gems for breakfast, the following recipe will be one to try:

Popovers.

Mix and sift one cupful of flour, one-fourth teaspoonful of salt, seven-eighths of a cupful of milk, one-half teaspoonful of butter, and two eggs. Beat the batter with a Dover egg beater until light. Pour into deep hissing-hot iron gem pans well greased and bake in a hot oven for thirty minutes. If baked in buttered earthen cups the popovers will have a glazed appearance.

Apple Fritters.

Sift one cupful of flour with one teaspoonful of powdered sugar and one-fourth teaspoonful of salt. Add two-thirds of a cupful of water, beating constantly. Add one-half tablespoonful of olive oil and the white of one egg beaten stiff. Core and pare tart apples, sprinkle with lemon juice, dredge with sugar and let stand half an hour. Dip in fritter batter and fry in deep fat. Serve with lemon sauce.

Trifles.

Break one egg into a bowl, add one-fourth of a teaspoonful of salt, and one and one-half tablespoonfuls of powdered sugar. Add flour, stirring until the mixture will take no more. Turn on to a floured board, divide into three parts and roll as thin as possible. Cut into narrow strips or squares and fry in deep hot fat. Sprinkle with powdered sugar mixed with cinnamon.

Fritter Batter.

Mix and sift together one cupful of flour and one-fourth of a teaspoonful of salt. Add two-thirds of a cupful of milk gradually, and two eggs beaten thick, one tablespoonful of olive oil and the whites of the eggs folded in after being beaten stiff. Bananas cut in quarters, sprinkled with lemon and sugar, let stand half an hour, then dipped in the batter and cooked as the apple fritters, are delicious. In fact any fruit may be used for fritters.

THE ROMANCE OF WORDS

"TARTAR."

"TARTAR," as applied to the wild tribes which inhabit middle and central Asia, is one of those words in which a wrongly assumed derivation has modified the spelling and the very shape in which we now have it, for the people usually designated by this name are not "Tartars," but "Taters."

The interpolation of the "r" in the first syllable came about when these hordes burst into Europe during the Thirteenth century and swept everything before them. Many persons claimed that the ravages of the invading cavalry constituted a fulfillment of the prophecy in the ninth chapter of Revelation concerning the opening of the bottomless pit and the loosing of the inhabitants of the infernal regions. From this belief ensued the change of their name from "Taters" to "Tartars," the latter being an outgrowth of Tartarus, or hell, whence these implacable hordes were supposed to have come.

The bravery of the invaders, together with their stoic disregard for pain and the manner in which they turned upon their guards when captured, also gave rise to the expression "catch a Tartar" or "he caught a Tartar," which is in use to this day as a synonym for being taken by surprise, particularly when a person thinks that he has made an easy conquest.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead
How to Make Good

By JESSIE ROBERTS

FARM OPPORTUNITIES

I AM constantly in receipt of letters from women tired of office work who ask what chance they would have in investing their savings in a small farm. They want a home, they want to be their own masters, they long for the country after years of confining labor at a desk.

Success in farming requires training and experience as well as a wish for that type of work. A good business training and initiative are excellent as stock in trade, but there should be more than that. Farming is no easy job.

Two young women tell me that they are making money with a small sheep farm. There is plenty of demand both for the wool and the meat. But these two women also run an apiary, marketing their honey, in a distinctive package. It is the finest honey, and they charge a high price for it. They have worked up a trade with a list of private purchasers, and sell through the mail.

The thing is to have only the very highest class of produce, to charge high for it, to put it into attractive and striking packages that are an advertisement in themselves, and to sell direct to the consumer. With the parcel post this is possible. We find it better to specialize in several things rather than in one. Establish a market for one of your items and you establish it for all.

This sounds like good talk, and I recommend it to my readers who may be thinking of turning to the farm as a source of income.

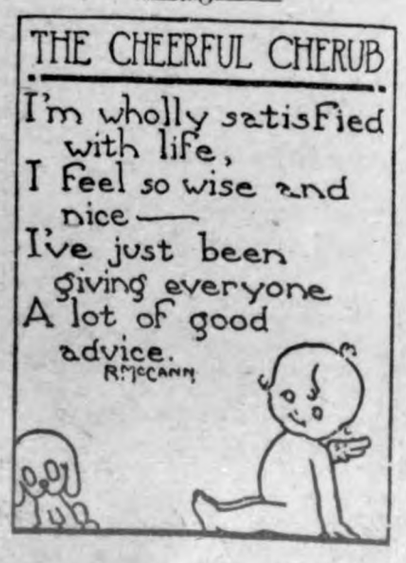
Shrewd Traveler.

An Englishman traveled from Petrograd to Moscow with no other passport than an English tailor's receipted bill. This document of identification had a big printed heading with the name of the tailor, some English postage stamps attached and a flourishing signature in red ink. He flaunted the document in the face of the officials, assuring them it was a diplomatic passport issued by the British embassy.

THE CHEERFUL CHERUB



Makes Photo of Astral Thumb

California Surgeon's Experiment Raises Interesting Question Among Scientists.

HOLD DISCOVERY VALUABLE

Doctor Believes He Has Provided Basis for Far-Reaching Biological Research—Etheric Double of Amputated Member Pictured.

San Francisco.—The recent announcement by Dr. P. S. Haley, local surgeon, that he has photographed the etheric double of a man's thumb, which had been cut off at the joint, has aroused an interesting scientific discussion.

Scientists say Doctor Haley's experiment raises the question of whether man possesses within himself dormant energy to reproduce parts of himself, such as an arm or leg, when he loses them.

Doctor Haley does not profess that his experiment proves such a theory, but declares that he believes he has provided the basis for far-reaching biological research.

Likewise he insists his experiment in no wise is of a "spiritualistic" nature.

"My own contribution is simply to show by photography that crystalization of energy exists. Scientists may go much further and possibly in time demonstrate that such crystallization of energy may be made permanent instead of momentary, such as my photographs show," Doctor Haley said.

"Likewise it may prove that 'ghosts' are not supernatural, but simply a natural and material compound of externalized energy. It is certain that some animals see things not visible to human eyes. Likewise certain persons are psychically sensitive to things which others are not. There is a great field for investigation opened by my experiment."

Thumb Off; Felt Pain.

Doctor Haley's subject in his interesting test was a woodworker who had lost his thumb. The woodworker believed himself conscious to pain when a pin was inserted where the thumb once was. For the experiment the stump was placed on highly sensitized paper in a photographic solution. Four impressions were taken ranging in time from one-half to a minute and a half.

"My theory is that the etheric double remains attached to the member, and, under influence of will power and with the aid of other factors possibly not understood, the body energy radiates from the point where the stump is, filling in the etheric double," said Doctor Haley, illustrating with one of the photographs.

"In such an event as the photographs show the etheric double acts as a 'blue print,'" continued the doctor. "Externalization of energy is a fact that has been known for years and which fact I took into consideration in my work.

Holds Discovery Valuable.

"This sort of work may throw light on many of the biological problems, such as heredity, and should have an application on medicine. The experiment is not exactly along my line of work, and it is my intention to turn what facts I have over to the University of California or the California Academy of Science for further consideration, if they care for them.

"The value of my discovery will be a possible diagnostic factor in neurology and a contribution to biological knowledge, I believe," said Doctor Haley, when asked what his findings might be used for.

"The 'etheric double' is not spiritualistic, but, as I say, biological and, aided by the power of the human body and psychic mechanism effects on the body, it may be applied to medicine. It is my firm belief that a system of medical diagnosis may eventually be founded on the theory," the doctor concluded.

Doctor Haley said he had been working on his latest experiment but one month.

SABIN AND HIS SHELL

To J. O. Sabin, sailor on the Wyomette, and who has been at the Chicago Pageant of Progress navy display, fell the honor of firing the first shot in the navy in the late war. Sabin, while a gun pointer on the naval auxiliary collier Jupiter, fired the first shot in the Bay of Biscay June 1, 1917, at a German submarine; and at Chicago very recently acted as gunpointer of the crew that sank the German submarine U-97. He is seen here with the case of the first shell.

Plans Airplane Flight to Pole

New York Physician Will Take Three Experienced Pilots on Dash to Arctic Regions.

WILL USE ONLY ONE PLANE

Start Is to Be Made From Point Barrow, Alaska, and After Visit to North Pole Journey Will Be Continued to Scandinavia.

Washington.—Plans for an airplane flight to the north pole and across the Arctic zone from Alaska to Norway, to be attempted in September, were announced by Edwin Fairfax Naulty of New York, a physician long interested in polar exploration and aviation.

Mr. Naulty said the plans call for the use of only one airplane and a party of four, which would include himself and three experienced pilots, all ex-service flyers, and that his son, Leslie Fairfax Naulty, is going to Europe to take care of plans for continuation of the flight from North Cape via the Scandinavian capitals, to London.

Hop Off at Point Barrow.

The start of the scientifically important part of the attempt—the trans-polar and trans-Arctic flight—is to be made from Point Barrow, Alaska, Mr. Naulty announced, and the route to the pole will be, as far as flight conditions permit, along the meridian of 155 west. The distance from Point Barrow to the pole is 1,200 nautical miles, and it is the plan that the first stop will be made half way.

The second stop is to be made at the north pole or as near as there is a landing. The route will then be to Spitzbergen, landing west of Andree Point.

From Spitzbergen, the fourth leg of the flight calls for a landing at Bear Island, and thence to North Cape, Norway.

Only One Plane to Go.

Mr. Naulty said that only one plane would be used.

The complete route will be from Seattle to Ketchikan, Alaska; Ketchikan to Anchorage, Anchorage to Nome, Nome to Point Barrow, and thence across the polar regions to North Cape, Norway, and thence by taxi flights via Christiania and Stockholm to London.

From Point Barrow across the pole to Spitzbergen, a distance of 1,800 nautical miles, will be regarded as the transpolar flight. From Point Barrow to North Cape, a distance of 2,400 miles, will be regarded as the trans-Arctic flight.

Mr. Naulty said he had been convinced by years of study of data of ocean, ice, and wind currents that land exists in the form of an archipelago, isolated mountain peaks, or a low range of "tailing out" hills, in the region lying between 120 west and 135 east and 75 north and the pole.

Medals for Learning English

This is the silver medal presented by President Harding during the Pilgrim celebration to New Bedford school children of non-English-speaking families for their proficiency in the use of the English language.

UNEARTH GIANT WITH HORNS

Petrified Body Found by Tennessee Miners Is Six Feet Four Inches Long.

Knoxville, Tenn.—Workmen of the Keene-Strunk Coal company at Helenwood, Scott county, have found buried in the earth and petrified, a giant 6 feet 4 inches tall. Imbedded in the one-time flesh about its neck is a beautiful chain. The fingers are perfect, with long, tapering nails. The hands are folded across the breast. On either side of its head are two horns, each about four inches in length. Its weight is about 450 pounds.

It is on exhibition in Helenwood, where it is being visited by thousands.

Speeds Tax Collection.

Washington.—Collection of back taxes are to be speeded up in line with the policy of cutting down new taxes, Secretary Mellon announced.

MARSHAL JOFFRE IS BIG FEEDER

French Commander Packed in "Eats" as Marne Battle Raged.

His Chef Declares That Marshal Devoured Enough for Three Men as He Won Victory.

Paris, France.—The latest war reminiscences to be printed are those of the chef who presided over the destinies of the French general staff during the battle of the Marne and who prepared the simple but abundant menu that Marshal, then General, Joffre sat down to at very irregular hours.

If the chef's culinary accomplishments were not superior to his literary talent, one pities poor General Joffre, and it must have been a relief to the commander in chief to leave the mess table and return to the battle line.

"During the battle of the Marne," says the chef, "the general put away enough food to feed three ordinary men."

Then he adds naively:

"I hope monsieur le marechal won't mind what I say about the general."

One of the most amusing incidents related by the chef is that on September 12, when it became clear that the enemy was in full flight northward and that the battle was won, congratulations were in order, and he received instructions that the menu for the dinner should be as much of a banquet as his raw material would permit.

Just as the meal was about to be completed a British automobile came up to headquarters with a basket of champagne as a token of congratulation to the French staff. It came from a British unit "in liaison." The chef was just getting ready to serve it when he noted that the bottles bore a German mark, and he informed the officer of the fact. That worthy forbade him to serve the champagne to the staff, and ordered him to throw the bottles away.

"We did," says the chef, "but only the next morning they were empty."

Took Honey From Hives; Bees Put It Back Again

Some months ago, Wallace Lanning, a beekeeper of Milford, N. J., took over 100 pounds of honey from his apiaries and stored the honey in the garret of his home. When he went to the garret, a few days ago, to get some of the honey, all he found was the empty comb and frames, all the honey being gone.

Investigation revealed that the bees had entered the garret through a knot hole and had carried the honey back into their hives.

STANDS OFF A LOT OF DOCTOR BILLS

Recommends Pe-ru-na for Catarrh of the Stomach, Colds and Grip

"I have used Pe-ru-na for several years and can heartily recommend for catarrh of the stomach or entire system. I always get benefit from it for colds and grip. It stands off lots of doctor bills and makes one feel like a new person."

R. F. SUTTLES,
R. P. D. No. 3, Box 51, Waynesburg, Kentucky.

It is wise to keep a bottle of Pe-ru-na in the house for emergencies. Coughs and colds may usually be relieved by a few doses of Pe-ru-na taken in time. Nasal catarrh, indigestion, constipation, diarrhoea, rheumatism or other troubles due to a catarrhal condition of the mucous membranes all call for Pe-ru-na as the successful treatment. The health building, strength restoring qualities of this well known remedy are especially marked after a protracted sickness, the grip or Spanish Flu.

PE-RU-NA is justly proud of its record of fifty years as health protector for the whole family.

New Use for Phonograph.

Phonograph records are used in many Catholic colleges, seminaries, convents and churches for teaching the Gregorian chants. This style of music is notably difficult for the reason that it can be taught by oral methods alone. The talking machine solves the problem.

ASPIRIN

Name "Bayer" on Genuine

say BAYER

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

Made It All Right.

A new office boy had been sent to the post office by his chief with two important letters.

"Did you mail those letters?" asked the chief on his return.

"Yes, sir; just mailed them," was the reply. "But you made a mistake—you put a 2-cent stamp on the letter to Italy and the 5-cent stamp on the one to Seattle."

"How annoying," said his master. "What did you do?"

"Oh, I made it all right, sir," said the boy cheerfully. "I noticed it just in time, so I slipped into the post office and altered the addresses."

Psychology.

"What are those dreadful pictures hanging on the walls of your waiting room?"

"They illustrate some of the tortures of the Spanish Inquisition," replied the dentist.

"I should think they would be out of place here."

"Not at all. After my patients have seen what people suffered in the old days, having a tooth filled seems mere child's play."

Difficult Feat.

"I suppose," said a lady to a conducter, "if I pay the fare for my dog he will be treated the same as other passengers and be allowed to occupy a seat?"

"Of course, madam," the conductor replied politely "he will be treated the same as other passengers and can occupy a seat, provided de does not put his feet on it."

Might Have Been Both.

"This is a very sad moment," declared the duke of Devonshire, the retiring governor general, at a farewell luncheon at Ottawa. And now curious persons are asking if he referred to his departure or to the fact that he had first signed an order in council making Ontario dry on July 18.—Kingston (Ont.) Whip.

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Children Cry for Fletcher's Castoria

Something Lacking.

An irate fan, who had watched the home team go down to defeat stopped the umpire as he was leaving the park.

"Where's your dog?" he damanded.

"Dog?" ejaculated his umps. "I have no dog."

"Well, you're the first blind man I ever saw who didn't have a dog," returned the disgruntled one.—American Legion Weekly.

Love-Sighing, Crying, Dying, Lying.

"Love is the torch we carry into the Mammoth Cave of Life," according to the "Maxims of a Modern Maid." And it takes the modern couple about 15 minutes to reach the Star Chamber, where torches are extinguished.—Nashville Tennessean.

A diplomat is a person who can successfully substitute a lot of misfit information for the real facts.

DRAINAGE MAKES WET LANDS GOOD

Too Much Moisture in Soil Retards Cultivation and Reduces Yield of Crops.

PLANTING ALSO IS DELAYED

Drains May Be Either Open Ditches or Tile or a Combination of Both—First Make Careful Survey and Examination.

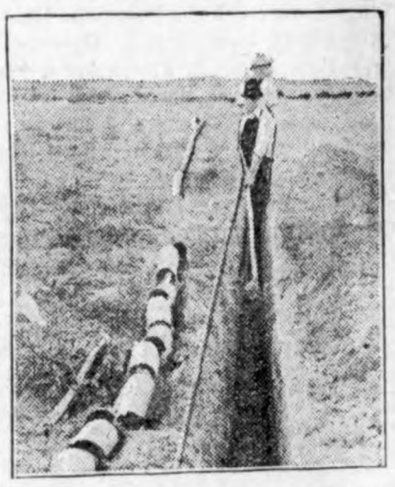
(Prepared by the United States Department of Agriculture.)

The effect of too much moisture is readily apparent in farming a wet area, although persons not acquainted with drainage do not always recognize the presence of too much water in soils that are not saturated, say specialists of United States Department of Agriculture. The low part of the field is not ready for plowing and planting as early in the spring as the higher parts; hence, unless the spot is to be abandoned, the farmer either must finish the task another day or leave the whole until such time as the wet place can be worked. Planting on all or part of the field is then delayed frequently seven to ten days later than on land better drained.

Undrained Land Slow to Warm Up.

The wet ground is cold, too, and the seed in it sprouts more slowly. The difference between the two parts or the two fields continues to grow as the season advances; the undrained land frequently cannot be cultivated until several days after heavy rains, and again coldness retards crop growth, as in the spring. The difference in temperature may be six to ten degrees between the drained and undrained soil. The effect of later planting and slower growth must be apparent in the harvest, especially where the growing season is cut short by frost. On a field not uniformly well drained the crop will mature unevenly, and not only will the yield be impaired in amount, but if uneven in quality the crop will be rated for market at a low value.

Farm drains may be either open ditches, or tile, or a combination of



Digging the Ditch Preparatory to Laying the Tile.

the two. The "blind ditches" of stones or poles covered with earth have been practically abandoned because they are not permanent, usually becoming clogged with earth in a few years. Open ditches are usually less costly to construct, especially when large capacity is required, and water on the ground surface will flow into them more readily, but for the smaller drains tile has a number of advantages.

Open ditches interfere with cultivation, especially where large machinery is used, but tile are buried deep enough to be out of the way of farming operations. The whole field may be cultivated when underdrains are used, but a system of open ditches necessarily takes up much tillable ground.

Before any expenditures are made there should be a careful survey and examination to determine the source of the water to be removed and its amount, the most economical arrangement of the drains, the grades obtainable, the proper sizes of drains and the amounts of tile and of labor.

Sometimes only a few drains are needed in the lowest part of the field; sometimes a uniform system is required with parallel lines underlying the whole area. In the latter instance experienced judgment is needed to decide what will be the proper depth and spacing for each kind of soil.

Free Flow From Outlet.

Of prime importance is the outlet, which not only must be the lowest point of the drainage system, but so located and arranged that it will discharge water at the time when drainage is needed and not be useless because of high water in the outlet ditch or creek. The construction work should be carefully done, under the supervision of someone at least qualified to see that the tile are laid properly. It is advisable to have a competent surveyor or engineer to aid in at least the leveling.

CHICKENS THRIVE ON WEEDS

Noxious Plants Growing in Fence Corners Make Good Eating for Confined Fowls.

Every summer one can find a lot of weeds that are going to seed in fence corners. If certain hens or chicks are yarded, it is a good idea to pull up these weeds and throw them into the pens. The birds will eat the seeds and leaves at least.

HEAVY FEED RESULTS IN BIG MILK YIELDS

Test Made With Purebreds on Government Farm.

Rations Made Decidedly More Liberal Than Those Called for by Any of Feeding Standards, Especially Grain Mixture.

(Prepared by the United States Department of Agriculture.)

During the last two years a number of the purebred Holsteins at the government farm at Beltsville, Md., have been run on official test. In order to increase their milk yield their rations were made decidedly more liberal than those called for by any of the feeding standards. During the milking period they received daily about 12 pounds of alfalfa hay, 20 pounds of corn silage, and as much grain as they could clean up without getting sick; they usually ate eighteen to twenty pounds a day of grain mixture F. They were fed heavily also before their calves were

One of Holstein Herd on the Government Experiment Farm.

born; for 60 days or more before calving they usually received about 15 pounds of grain mixture F, 12 pounds of alfalfa hay and 25 pounds of corn silage, a ration containing approximately four times as much protein and two and one-half times as much total nutriment as the routine ration fed to the dry cows of the general herd.

The cows on test gave from 15,000 to 20,000 pounds of milk in the year; that is, three to four times as much as most of the cows in the general herd. A part of this larger yield is due to the fact that the test cows were better bred, but a part also is due to the larger quantity of feed they consumed, say specialists of the United States Department of Agriculture in charge of the tests. How much of the increased milk yield to attribute to each of these factors is a question of great practical interest.

NEED OF BUSINESS PRACTICE

Many Co-operative Associations Have Failed Because of Lack of Financial System.

Lack of proper financial systems has been the cause of failures in many co-operative associations, say specialists of the bureau of markets, United States Department of Agriculture, who feel that now is an opportune time for emphasizing the need of good business practice among farmers.

The bureau of markets has much information on systems of accounts and business practice for co-operative associations, and either directly or through extension workers it is prepared to give assistance in installing good accounting systems for co-operative grain companies, cotton warehouses, country creameries, fruit shipping associations, egg circles, co-operative cheese manufacturing and marketing associations, and co-operative grain elevators.

Short courses of study in market accounting have been prepared and are used in a number of colleges throughout the country, and are also given at field points where marketing associations are numerous. Systems of accounts are furnished upon request, and advice and assistance relative to their installation is given through correspondence and by means of bulletins especially prepared for this purpose.

LIQUID MANURE IS HELPFUL

Of Particular Value in Garden When Vegetables Do Not Make Proper Growth.

American farmers, generally, are not familiar with the great value of liquid manure, and the way to apply it. It is exceptionally helpful in the garden and especially when any particular vegetable is not showing the proper growth. When any plants seem weak and standing still, an application of liquid manure once a week for a few weeks will work changes that will seem almost miraculous. Liquid manure is a reviver of dying plants, for it supplies nutrition in an easily assimilated form. It may be easily provided, and should be provided for every garden.

METHOD OF APPLYING LIME

Some Farmers Obtain Good Results by Using Manure Spreader With Beater Reversed.

Lime may be applied either in the fall or spring. The proper method of application is important from an economical standpoint. Scattering with a shovel is wasteful and the distribution cannot be uniform. The method used by some farmers with very good results is to reverse the beater of the manure spreader by crossing the drive chains. Then the apron may be covered with canvas to prevent the loss of the fine stone. With this method it is easy to get a uniform distribution.

GOOD PROOF OF RETICENCE

Testimony Should Have Convinced Jury That This Woman Was Able to Keep a Secret.

In a suit recently tried in Boston it happened that one of the witnesses was a personal friend of a lawyer on the other side and that it was his duty to cross-examine her. By reason of their friendship he was, if possible, a trifle more personal with her than he would have been with another witness.

"Can you be trusted with a secret?" he asked at one juncture of the cross-examination.

The woman drew herself up proudly. "You have known me for ten years, haven't you?" she asked in turn.

"Yes."

"Well, do you know how old I am?"

CATARRHAL DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

NEWS FROM GOODELL AND VICINITY

Mr. and Mrs. Tom Cashman of Polo, Illinois, are here visiting with friends and relatives.

Many from here attended the Barbeque at Thornton Thursday.

Mrs. Johnson and son, and daughter Lea Jane, of Spirit Lake, visited old friends here last week.

Jay Griggs was a business caller in Buffalo Center Friday.

Dorothy Lakore is visiting with her cousin, Ethel Hughs of Garner this week.

Several families from here autoed to West Bend Sunday to visit the Grotto.

May Griggs spent Sunday with Clara Johnson.

The kiddies are all getting very anxious for school to start so they may try the new swings and slide which have been erected.

Mr. and Mrs. Chas. Conklin are the proud parents of a baby girl.

Prof. Franson is visiting with old friends here.

Mr. Nutty was culling chickens at the V. A. Cook farm Saturday afternoon..

Mr. Sherwood of Iowa Falls is visiting with his son, Leon. this week.

Mr. and Mrs. E. A. Strasburg and daughter, Mae Elizabeth, visited at the Jay Griggs home Friday.

Iris Sherwood visited with her aunt at Iowa Falls last week.

A dance was held here Friday night.

Work on the new church is progressing very rapidly.

Mr. and Mrs. Wm. Kirkwood and Mrs. A. Kirkwood left Sunday morning in their car for Foreston, Minn., for a visit with Mrs. A. Kirkwood's daughter. Mrs. A. F. Hubbard. The Kirkwoods have closed thier boarding house in Klemme and will go to Goodell on their return where they will go into the hotel business.

MONEY TALKS

Youth is the time to build your light for the cloudy days of age. Start with a Bank Account

Spend all you earn and there is no considerable barrier between you and distress.

As you advance in years the hazard you run increases, for it involves the comfort and happiness of your family.

The years of strenght should be made to contribute to the years of declining power to execute and earn.

Five per cent interest paid on savings.

The tale of a dog- with a moral

THERE'S AN old gag.
THEY USED to pull.
SO OLD that nowadays.
PEOPLE THINK it's new.
ABOUT THE man who had.
TO SHOOT his dog.
AND A friend asks.
"WAS THE dog mad?"
AND THE first guy.
SAYS, "WELL, he wasn't.
SO DANG well pleased."
AND A chap told me.
THAT THIS described.
SOME SMOKES he'd tried.
THEY DIDN'T exactly.
MAKE HIM mad.
BUT HE wasn't.
SO VERY well pleased.
OF COURSE that was.

MY CUE to slip him.
A REAL cigarette.
AND AFTER he'd taken.
A GOOD pull or two.
INTO HIS constitution.
HE GRINNED and said.
"THE ONLY way these.
WILL EVER make you mad.
IS THE way.
YOUR FRIENDS eat 'em up.
I ONLY hope you've got.
A COUPLE of packs.
FOR THEY sure.
DO SATISFY."

Air-Tight Tins of 50

Ask your dealer to show you the new vacuum-sealed tins of 50 Chesterfields. A compact, convenient and absolutely AIR-TIGHT packing—the cigarettes keep fresh indefinitely.

YOU'LL enjoy Chesterfields. There's something in their mild smoothness that goes right to the spot. Choice tobaccos, Turkish and Domestic—a blend that literally *can't* be copied—a special moisture-proof wrapper for their extra protection—on every count, Chesterfields "satisfy."

They Satisfy **Chesterfield**

GREIMAN BROS. DEFEATED BY PROFESSIONALS ONLY AT STATE FAIR

Took All at County Fair

Henry and Ben Greiman, of this place made the professional horse shoe players at the Iowa State Fair set up and take notice. The Greiman boys gained recognition at the state fair for their wonderful horse shoe pitching and defeated all comers until they were matched against the professionals when they were defeated. They won ninth place in the state tournament.

One thing which was against our men was the ground on which they were forced to play at the fair. The stakes were laid out on a hillside and it was necessary to have to pitch with an added effort up hill and to hold back the shoes on the down hill pitch. This was against them as they had been used to playing on level ground. The professional men had been practising on the ground and so were used to it and had a big advantage over the other contestants. The Greiman boys are confident that they can defeat Jackson's team if given a fair show on level ground.

The first day Ben and Henry won 3 games and lost 3; the second day they went like wild fire and cleaned up 11 games out of 13; the third day they seemed to be in bad form and won one and lost one.

Best Amateur Team at the Fair

The Greiman boys were the only team at the fair who took 17 points from the professionals, the other teams had a much smaller score, 21 being the game, so the boys were not far from winning. This gave them a high ranking and won them recognition as being one of the fastest teams in the state.

They hope to go to the fair next year and trim up everything, even Jackson's team, and we are sure they can do it if given a level ground to pitch on.

Won County Tournament

Ben and Henry went over to the Hancock County Fair at Britt and swept all before them. It was easy pickings for the boys to take the county tournament. They won all the games they played and defeated all the fastest teams in the county.

Mr. Jackson, of Kellerton. holds the state championship horse shoe pitching but next year the title is very likely o rest with the Greiman Bros. here.

Train Crew to the Rescue

Members of a Northwestern freight train crew, as their train was speeding through east of Vail, saw at a distance something fluttering in the wind from beneath an overturned auto. The train was stopped and several of the crew went to the car where they found the Misses Matilda and Helen Moore buried beneath the wreckage of their car. The young women were released and aid called to take them home. Matilda was not badly hurt but her sister was cu seriously by the broken glass and had several bad contusions.

RUDD TO HAVE PAVED STREETS

The Whitlow Construction Co., gang started pouring concrete on Rudd's main street Saturday. While they are somewhat short of material, however they put down 420 feet on the east end of the street. By night they were out of gravel and stone, were unable to pour anything Monday. Sunday two cars of gravel were received. but the rain Monday morning put the roads in bad shape so they were unable to haul until Wednesday. They are now at it again and by the end of the week the greater part of main street will be paved.—Rudd Review.

RATS MAY SUPPLANT MAN; CAUSE HUGE ANNUAL DAMAGE

It costs the people of the United States $2,000,000 a day to feed the country's population of rats.

Rats cause an annual property damage in this country of $200,000-000.

It requires the constant labor of 200,000 men to produce the material destroyed by rats.

The authority for the foregoing is Mrs. Albert T. Leatherbee, ratologist of the Women's Municipal League of Boston, recognized as an authority on rats.

"Just as long as human beings continue to regard rats with apathy and furnish them with domiciles and food," she says. "they will increase and multiply until finally they will become equal rivals with man for existence and may possibly conquer him."

But it is not the property destroying tendencies of the rat which mosly alarms Mrs. Leatherbee.

It is this: rats immigrating to this country aboard ships coming from infected ports carry in their fur the parasite of bubonic plague. This says Mrs. Leatherbee, constitutes a menance which hangs over the head of every resident of the United States.

ACCIDENTAL DEATH

Going Thru Fence With Gun, Wire Pulls Trigger

LeMars, Ia., Aug. 31.—Emil Ladehoff, a farmer of Preston township, accidently shot and killed himself with a .22 caliber ri&e while attempting to climb a fence with the loaded weapon. The bullet passed thru one eye and entered the brain, causing instant death.

Ladehoff had started to the pasture to bring up his horses and had taken his gun with him expecting to get a shot at a skunk, which had been making raids upon his poultry yard. In climbing a wire fence he slipped and the gun was discharged.

The man was thirty seven years of age and leaves a wife and two children.

Fred Oxley met with what might have terminated in a serious accident last Sunday morning. When cranking his car, the engine started on the first turn of the crank. The car must have been in low gear for it went through the rear end of the garage, pushing Mr. Oxley ahead of it. Outside of a good shaking up Mr. Oxley feels no ill effects of the accident.—Corwith Hustler.

FIRST AND LAST SHOTS OF WAR FIRED BY IOWAN

J. O. Sabin, naval gunner, of Muscatine, Iowa, has the honor of firing the first and last shots in the United States navy during the world war, returned to Muscatine recently with the first shell, now his property, after exhibiting the latter o count less thousands at the Pagenat of Progress in Chicago.

Sabin, gunner on the U. S. S. Jupiter, collier to the ill fated detrooyer Cyclops, fired the navy's first shot June 5. 1917, in the Bay of Biscay, just off the French coast. A German U-boat, which attempted to sink one of a convoy of American ships bearing $9,000,000 worth of wheat to Bordeaux, was the target. The submarine was sunk by direct hits. Sabin's own vessel, maneuvering, narrowly missed destruction from a torpedo fired from the sub shortly before it sank.

In November, 1920, Sabin, then on leave, received orders to report for duty at Chicago aboard the U. S. S. Wilmette, a naval gunboat. As a member of the crew of this vessel he was awarded the honor of firing the last shot of the war, four years and two days after he fired the opening shot. It was a shell from his gun which sank the German submarine U-97 in Lake Michigan. June 7, 1921

The first shell, now converted into an artistic reading lamp, is on exhibition at Muscatine, attracting attention of hundreds. The beautiful designs on the shell proper were executed by the owner. The work was done entirely by hand, requiring intensive application during Mr. Sabin's spare time for a period of four months.

LIKES TO SEE 'EM PILE UP

Frank Walters, 16, who is held in the county jail at Altoona. charged with attempting o wreck a Rock Island passenger train "just to see how the cars would pile up," may be taken before the county sanity commission. James O'Brien, assistant county prosecutor believes the boy is deficient mentally and will ask the commission to pass upon his case. Walters lived at Altoona and has been working for the Rock Island as a day laborer. He confessed to Special Agent C. G. Graham, according to O'Brien, that he had attempted on three occasions to wreck Rock Island trains. Young Walters is accused of withdrawing spikes from a switch joint. Last February, Walters is said to have placed an iron follower plate on a switch frog. A passenger train was forced to stop when it struck the plate, but was no de-railed.

Latest Washington News

U. S. MAIL SERVICE SHOWS IMPROVEMENT SINCE REORGANIZATION

Washington, Sept. 8.—During the month of July, this year, the United States Air Mail Service was 100 per cent perfect in its performance from New York to Chicago; 99 per cent perfec from Chicago to Rock Springs Wyo; 98 per cent perfect from Rock Springs to San Francisco. This is a distinct improvement over the record for the year ending June 30, 1921, when the everage percentage of performance was only 86 per cent. The improvement in the service is due to Postmaster General Hay's reorganization of it. There has been a notable decrease in flying accidents since the service has been under the direction of the new administration.

The Postoffice Department expects to place in operation in the near future six new aeroplanes which will carry doublee the amount of mail now carried. These new machines now carry 800 pounds of mail, or 32,000 letters, with the same amount of fuel which is now consumed by planes in use carrying one-half so much. The new planes are one pilot machines and have a speed of 115 miles an hour. They are remodled army planes. The cost of remodling them was $3,000 each and the cost of new planes would have been $15.000 each. These planes have been inspected and passed and are now en route from New York to San Francisco.

The United Air Mail Service now employes 49 pilots, 380 mechanics; and 87 planes. There are air stations at New York, N. Y. Bellefonte, Pa., Cleveland, Ohio., Bryan, O., Chicago, Ill., and Iowa City, Ia., Omaha. Neb., North Platte, Nebr., Cheyenne, Wyo., Rock Springs, Why Salt Lake, Utah., Elko, Nev., and San Francisco, Cal. The Postoffice Department is now negotiating at other points for joint army and post-office fields.

Train Hits Truck

Passenger train No. 3 going west was delayed Wednesday at the crossing one half mile east of Britt. They smashed into a big sand truck with such force that the truck was totally demolished and carried a disance of two blocks before the train could be stopped. The driver of the truck was thrown up against the engine and landed on the platform above the cowcatcher. He was quite seriously injured, but we understand not fatally.—Wesley World-Journal.

An exchange tells of an artist who painted a dog so natural that the animal had hydrophobia during the hot weather. He's the same man who painted a copy of a beer bottle with such skill that the cork flew out just as he was finishing it. After he was married he painted a picture of a child so lifelike that it cried, and his wife spanked it before she discovered her mistake.

Sure, it rained again yesterday.

New Industry in Klemme Now Manufacturing Sorghum

EMIL LAU'S DUROC BOAR WINS GRAND CHAMPION PRIZE AT COUNTY FAIR

This is he first year that Emil Lau of this place ever entered anything at the Hancock County Fair, but the best of it is that he carried away the big prize.

Emil entered his fine Duroc Jersey boar at the fair which took First Prize in the Senior Yearling Boar Class and then took Grand Champion Prize over all.

Besides winning fame with his fine Duroc boar, Emil also had four gilts entered which came home with ribbons, they took two 4th prizes.

Emil is one of the young men in the thorough bred business but he is rapidly coming to the front. He has some mighty fine hogs in his herd and is always striving to make his herd better. He held his first sale last winter and made good and he also plans to hold two more sales this year.

He is to be congratulated on his good fortune at the fair.

THE CONTRAST BETWEEN EDITORS AND DOCTORS

A little boy was given the stunt by his father to write an essay on editors and here is he result.—

I"f an editor makes a mistake folks say that he ought to be hung; but if a doctor makes a mistake he buries it and people dassent say nothing because doctors can read and write latin. When the editor makes a mistake there is a lawsuit and a big fuss; but if a doctor makes one there is a funeral, cut flowers and perfek silence. A doctor can use a word a yard long without anybody knowing what it means; but if the editor uses one he has to spell it. If the doctor goes to see another man's wife he charges for the visit, but if the editor goes he gets a charge of buckshot. When the doctor gets drunk it's a case of being overcome by the heat and if he dies it's from heart trouble; when an editor gets drunk it's a case of too much booze and if he dies it's the jim-jams. Any college can make a doctor; an editor has to be born.

Thugs Rob Aged Couple of $1500

A couple of thugs robbed and beat up Mr. and Mrs. Hans Johnson, who live a short distance south of Sioux Rapids and obtained $1500 in cash. The old couple are about 70 years of age. They had $7,000 in cash hidden in their chicken house. The old gentleman was quite badly beaten up before he would tell where the fifteen hundred dollars was hidden. The $7,000 was immediately taken to their home bank and deposited. One man is in jail and is thought to be implicated in the crime.

A certain nearby editor threatened to publish the name of a certain business man who was seen hugging and kissing one of his pretty young clerks, unless his subscription to the paper was paid. Next day twenty-five business men sneaked in the rear door of the print shop, one at a time, paid their subscription to the paper two years in advance, ordered a lot of printing done, left a contract for a year's advertising and told the editor to pay no attenion to foolish rumors.

WESLEY FARM SELLS FOR $300 PER ACRE

On Monday a deal was consumated whereby James Cooney becomes the owner of the August Seimer 97 acre farm and Mr. Seimer the owner of the James Cooney 176 acre farm. Each farm situated within one mile of Wesley. The improved 97 acres on each farm was figured at $300, while Mr. Seimer paid $265.00 for the remaining portion of the Cooney farm. The reason for this sale was that Mr. Seimer wanted a larger farm for his amount or help and Mr. Cooney wanted a smaller farm as he has no help of his own. They are both desirable farms and farm homes.—Wesley World-Journal.

Henry Ludeke Making Fine Quality From His Three Acre Field

The newest industry in Klemme is a sorghum factory and the proprietor is Henry Ludeke.

Henry planted about three and a half acres of cane this year and is now making it into sorghum.

The sorghum plant is located at his place in the north west part of town.

The cane is first cut by hand. It could be cut with a machine but that would crush the stalks and it would become sour before it could be run through the mill. All leaves are also stripped off the staks and the top removed containing the seed. The stalks are then run through a crusher and the juice is drained into a tank.

Henry uses the steam evaporation process of refinning the juice and making it into sorghum. He has an eight horse power boiler to produce the steam for cooking the juice in the vats. The juice is put into a tank containing two sections; in the firs tank it is heated enough to bring he scum and impurities to the top. It is then run into a second tank where it is heated more and ready to be run into the vats for the cooking process. The cooking vats are contained in a tank about twelve feet long with a divider running the long way, the tank being about a foot square on the inside. The green juice travels through this vat in a manner which is quite interesting. In this vat the juices are kept apart due to the difference in their specific gravity; that is the green liquid is lighter than the liquid partly finished and as the liquid cooks it is gradually moving along the vat until it comes out finished sorghum.

They make about fifty gallons of fine sorghum a day and Henry says it will run about 120 gallons to the acre.

It is well worth anyone's time to go up to Henry's place and see the method he uses in making sorghum.

SUBSCRIBERS—LOOK AT THE LABEL ON YOUR PAPER

We have revised our entire mailing list and the label on the margin of the Times will show the correct date to when you are paid.

We have adopted a new form for dating the paper and all subscriptions are dated to the month—for instance if your paper was formerly dated Sept. 23-21, which means that it expired on the 23rd of September, 1921. Now all dates ending on or after the 15th have been dated ahead to the next month—for instance if your paper was formerly Sep. 15-21, we have advanced it to Oct. 21. We did this for the convenience of ourselves and also for the convenience of our subscribers as it is easier to keep tract of an even date than it is of an uneven one.

All subscriptions now give the month and year in which they expire like Oct. 22., etc.

If your subscription is dated on Sept. 21 or earlier it is past due and you should call at the office or remitt by check for another years subscription. All subscriptions are payable in advance for one year or more.

There are still a few who are in arrears and we ask them to please settle as soon as they can so that we can have our list up to date.

R. A. Jorgenson, Publisher.

The North Iowa Pike from Wesley to Whittemore will soon be graded and tiled. Work is progressing nicely along this road from Algona west to the county line. All trees along the highways are being pulled or cut off. When placed to grade and well tiled the Board of Supervisors will probably order the entire distance graveled. When times become normal this may be the first road in Kosuth County to be paved.—Titonka Topic.

THE PIFLE ABOUT PEP
By H. K. Ebert
..In Judge

Some of us can remember the time when judgement was respected in business,manners counted in social intercourse, and dignity seemed proper in the church.

Now the first thing they ask of a man is, "Has he any pep?"

Pep has put poise out of the count.

The quiet, steady thoughtful man who has his employer's interests honestly at heart is outshone by the shallowplate who gurgles with easy inthusiasm and imparts to his labors in noisy and feverish activity.

The courtious self contained gentleman seems dull and odd fashioned in comparison with the exuberant spirit who is hailed as "the life of the party."

The kindly benevolent preacher of years agone is fast giving place to a militant person who swears in the pulpit.

A dash of pepper adds a fine flavor, but two much spoils the dish.

This mania for pep has substituted for jazz music, sex stories for literature and slap stick stuff for humor.

It is responsible for short skirts and red cheeks; Charlie Chaplin mustaches and embezzlement; automobile accidents and the shimmy.

Children who ought to be spanked and sent to bed are gigled at by fond parents because they show pep.

Old folks who know better than dragging their poor complaining legs over the dance floor to show they still have pep.

Who started this preposterous piffle about pep anyway.?

—O—

VENICE—OLD AND NEW

To anyone familiar with the processes of modern the news that the people of Venice have discovered their city to be old fashioned and have decided to rebuild it to meet changed conditions will come to an unpleasant shock. The conquests of medieval beauty already consummateed seem quite sufficient. Factories have sprung up just outside cathedral closes; artistic exteriors have given way to stucco and the exigencies of plumbing; machine made decorations take the place of hand wrought stone. In becomming efficient, Europe tends to lose the grace that goes with liesure.

But Venice solves the problem in an original fashion. The old sity is to remain unchanged, the same vision of ivory palaces which ruled the Adriatic in the days of the Dodges, while a commercial port is to be erected across the lagoons to the west. Here, according to the plans, long piers will take care of an anticipated rush of shipping, tall stacks will belch smoke, wide spaces will be given over to the sort of houses that factory towns are supposed to have. A canal will connect the new and homlier Venice with the mother city and the sea. And the Venice of romance, of the gondola and the marble arches will keep its place unsullied in a hurried, bargaining world.

It will become, probably, a commuters' town, serving the bustling metropolis across the swamps, as The Hague serves Rotterdam, or as Brooklyn serves Manhattan. But there will be no other commuters paradise like it on this workaday earth.

Art And Power

Art and power will go on as they have done—will make day out of night, time out of space, and space out of time.—Emerson.

SHIPMENTS OF MEXICO OIL DROP 78 PER CENT

Shipments of oil from Mexico have rallen off about 78 per cent since July 1, when the new export tax went into effect. This was announced by Guy Stevens, director of the Producers of Petroleum in Mexico. He added:

"The attempt to place responsibility for whatever conditions prevail at Tampico upon American oil companies either grows out of a failure to look the facts in the face or a desire to obscure the facts. The falling of of shipments is a natural economis result of the imposition of taxes. Which are two high to permit of the oil being moved at a profit, and the Mexican government itself must resume responsibility for whatever local conditions arise as a result of the diminution of shipments. Thee fact that some oil is moving merely indicates that some companies have contracted commitments which they must refill, even if the shipment under present conditions, of the oil necessary to meet these commitments involves a loss to the companies."

—O—

Long Terms In Senate

Senator Lodge of Massachusetts, and Senator Overman of North Caoalina, tie for the longest continuous service of the present Senate. They have each served 28 years, coming to the Senate in 1893. Senator Francis Warren, of Wyoming, beats them in the number of years—all told he has served 29 years—but he was not in office for two years since he first came to the Senate in 1890, so that only gives him 27 years of continuous service.

Following closely behind is Senator Knute Nelson, of Minnesota, 26 years in the upper house, while Simmons, of North Carolina; Culberson, of Texas; McCumber, of North Dakota; Willingham, of New Hampshire, all have served more than twenty years. Reed Smoot, of Utah, is climbing steadily upward toward this class, with 18 years to his cedit, and Senator Brandegee, of Connecticut, is not far behind, with 16 years.

Thirty-four members of the present Senate have also seen service in the House of Representatives, an unprecedented average in this regard.

—o—

Owners Of Farms

More than one-half of all the farmers in the United States are operated by their owners, the census bureau announced in classifying the 6,488,366 farms in the United States as of 1920.

The number of farms operated by their owners, including owners who hired some additional land, in 1920, was 3,925,090, as compared with 3,948,722 in 1910, while those worked by tenants numbered 2,454,746, compared with 2,354,676 ten years ago. Farms operated by managers totaled 69,530 an increase of 10,000 since the thirteenth census.

Tenant farmers continued to increase in number during the past decade, with the Southern states showing the greatest relative gain, the census showed. Share tenants, or those who give for the use of the land a share of the crops produced, conducted 68 per cent of all tenant farms in the country, according to the announcement.

Youth Needs To Think

From the Syracuse, N. Y., Herald—

The thousands of university and college men who have been gone from the narrow limits of their student life have entered a world in which conditions are far from different than they have been in many years. They face a situation unlike any that has faced graduates in a long time. What President Lowell of Harvard, President Hadley of Yale, President Hibben of Princeton Chancellor Day of Syracuse and others have said in their baccalaureates, the admonition to think, is compelling.

The young men who enter the world of today have unbounded opportunity to exercise that thought which is not supposed that they can change the course of events in a year or two, but in due time the results of their early thinking are turned in the right direction now. It is a heritage that must be sustained on a high level. Clear thought was never more essential than today when economic conditions call for levelheaded judgement unbiased by theores that will not hold water.

Some of the biggest fist are still in sea; but others are spending their vacations elsewhere.

CANTALOUPES OF FINEST QUALITY

Early Picking Is Reason Given for Melons Reaching Market in Inferior Condition.

AVOID BRUISING IN PACKING

Load Immediately in Iced Refrigerator Cars and Furnish Ample Ventilation—Floor Racks Are Also Recommended.

(Prepared by the United States Department of Agriculture.)

Fully 10 per cent of the cantaloupes produced in the western states reach the consumer so green that they are practically worthless for food. If only 1 per cent were picked and shipped unripe it would mean transporting and marketing more than 40,000 crates, for more than 20,000 carloads—or four-fifths of the production of the United States—are harvested in Colorado, New Mexico, Arizona, Nevada, and California, and shipped on a six to twelve-day journey to middle western and eastern markets.

During three recent shipping seasons specialists of the United States Department of Agriculture conducted investigations in the western producing sections and chief eastern consuming centers, in order to determine the most satisfactory methods of handling cantaloupes for long-distance shipments. It was found that too early picking was one of the chief reasons why melons reached the market in an inferior, tasteless condition.

When to Pick Melons.

Green melons have a depressing effect on both demand and prices. While it is necessary that they be picked before they are entirely ripe, in order to provide the essential keeping qualities in transit, they may be picked at a stage of maturity that will afford good flavor as well as keeping quality when they reach consumers, cantaloupes should be picked just after they will slip cleanly from the stem; that is, at the full-slip stage of maturity.

If properly handled and promptly loaded they will carry in satisfactory condition, even to long-distance markets. Allowance must be made, however, for a certain amount of rough

Unwrapped Melons Cool Quickly, Thus Preventing Mold.

handling and for some delay in transit. As a general rule, therefore, cantaloupes should be picked just before they reach the full-slip stage. Such melons possess not only the desirable eating quality, but also the necessary carrying quality.

The keeping and carrying qualities of cantaloupes are directly dependent on the care exercised to prevent mechanical injuries in harvesting and preparation for shipment.

Use Care in Packing.

During the operation of packing, melons should be placed carefully in the crates, and not dropped or tossed into place, as is frequently done. Injury caused by squeezing can be prevented if packers are careful not to force in over-sized melons when finishing the crates.

The reduction of serious market losses from over-ripe and decayed melons is dependent to a large extent upon the promptness with which they are placed under refrigeration. They should be loaded immediately in iced refrigerator cars, and, while being hauled from packing shed to the car-loading platform, should be covered to protect them from the sun.

Cantaloupes should preferably not be wrapped. They do not refrigerate so well in transit nor do they reach the consumer in so good condition as unwrapped melons. Loading different types of packages may obstruct air circulation and thus seriously retard refrigeration. In cars equipped with these racks, as well as basket bunkers, salt may be effectively employed to hasten refrigeration. The ability of refrigerator cars to cool melon shipments quickly and to maintain desirable temperatures in transit depends directly upon proper bunker and bulkhead construction, and upon the quantity and quality of the insulating material used.

MOLTING PERIOD IS TRYING

Feathers That Must Be Made Are Rich in Nitrogenous Substance—Coated With Oil.

Many owners of hens think that because the hens are not laying during the molting period, they do not need feed. This period is harder on a hen than heavy laying, for the feathers that must be made are rich in nitrogenous substances and are coated with an oil.

GRAIN OF SUPERIOR QUALITY IN DEMAND

Frequent Use of Cleaning Equipment Is Profitable.

Financial Loss Caused by Presence of Impurities, Foreign Matter or High Moisture Content—Elevator Not at Fault.

(Prepared by the United States Department of Agriculture.)

While equipment for cleaning and conditioning grain is expensive, country elevators will find that its use frequently improves the quality of the grain and increases its market value, say specialists of the bureau of markets, United States Department of Agriculture. Sometimes grain comes to the elevator in poor condition, often being dirty, dusty, or with high moisture content, and unless the quality is improved by cleaning or drying the grain cannot be disposed of advantageously.

An Illustration of the Improvement Which May Result From Treating Seed With Formaldehyde as Smut Often Stunts the Plants.

Moreover, grain containing impurities, foreign matter, or a high moisture content is quite likely to become hot in transit, which greatly reduces its value and frequently results in serious financial loss. If the elevator is not provided with suitable equipment for this process, such grain must be shipped in the condition in which it is received.

The farmer should not place all responsibility for cleaning grain on the elevator, it is believed. It should be remembered that elevator managers do not pay grain prices for the dirt and water found in a farmer's grain. The price should be established by taking into consideration the necessary expense of placing the grain in marketable condition. The farmer who delivers clean, dry, sound grain should receive a premium over the price paid to the more careless farmer who delivers grain of inferior quality, specialists say.

GUINEAS UTILIZE ALL WASTE

Fowls Pick Up Material That Escape Chickens and Turkeys—Are Prolific Egg Layers.

Guinea fowls utilize waste that would escape both hens and turkeys, say poultry specialists of the United States Department of Agriculture. Taking a wider range than chickens, and yet not so wide as turkeys, keeping largely to thickets and weed patches, and committing fewer depredations against field and garden than either chickens or turkeys, requiring little feed at any time, being prolific layers during their season of eggs, that are thought by many to have a richer and finer flavor even than hens' eggs, the guinea fowl is well worth considering on any farm where a serious effort is made to convert all waste into meat and eggs.

AIR CONSERVES BOARD FLOOR

Free Circulation Underneath Prolongs Life of Lumber—Close Openings During Winter.

Board floors usually are short-lived unless air is allowed to circulate under them. This may be provided for by means of openings in the foundation walls, which should be closed during the winter. A board floor covered with one-quarter inch of fine sand, with scratching material on this makes a good floor. The litter and sand can be removed readily when desired, and fresh materials provided. If the wooden floors are constructed within two or three inches of the ground it is essential that the foundation walls be constructed in such a way that rats cannot gain access beneath the floor.

FOWLS REQUIRE GREEN FEED

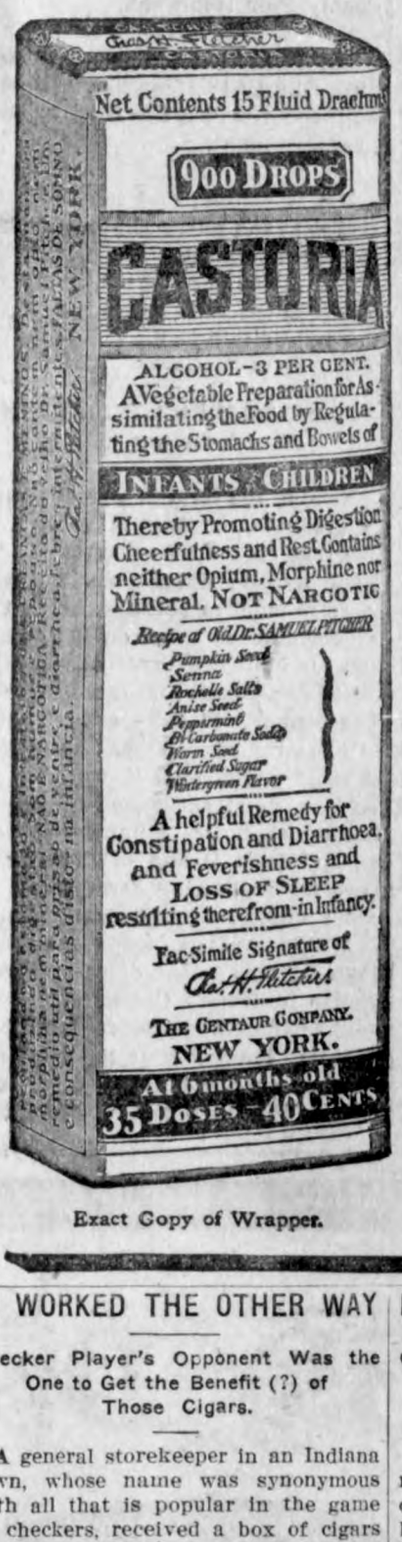
More Important During Summer Months Than in Winter—Give Them Clover and Weeds.

Remember that yarded fowls need greens and vegetable food during the summer months even more than in winter. If their yards are bare, add cut clover to the daily mash, and throw to the birds all the weeds that you pull in the garden as well as lawn clippings, etc.

Making History.

INFANT MORTALITY in past ages has been something frightful, something almost beyond belief, and even today it occupies the time and the mind of leading physicians in all countries. The death rate among infants is being gradually reduced through new methods of hygiene, new preventatives and new remedies for infants. This reduction in the death rate has NOT been accomplished by adapting the precautions taken and remedies used by adults. Rather has it been to keep clear of the old methods, and choose after long research the precautions and remedies specifically applicable to infants.

This being so, is it necessary for us to caution mothers against trying to give her baby relief with a remedy that she would use for herself? Will she remember that Fletcher's Castoria is strictly a remedy for infants and children?



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Of Course You Love Your Baby.

You love it because of its very helplessness, because it can't tell you what is the matter when it feels bad. It can only cry and look to you for help. But the more you love baby, the more you want to help baby, the more you ought to realize what a wonderful remedy Fletcher's Castoria is. It has been used for babies' ailments for over thirty years.

An experienced doctor discovered Fletcher's Castoria especially for babies' use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Doctors who know what is safe and best for babies have only good to say of it.

Don't neglect your baby. Get a bottle of Fletcher's Castoria and give baby a few doses of it. See how the little one smiles at you as if trying to thank you for helping it. Soon you will learn to depend on Fletcher's Castoria, made just for Infants and Children, and of course you would not think of using anything for them that was not prepared especially for Infants and Children. So keep it in the house.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

IT WORKED THE OTHER WAY

Checker Player's Opponent Was the One to Get the Benefit (?) of Those Cigars.

A general storekeeper in an Indiana town, whose name was synonymous with all that is popular in the game of checkers, received a box of cigars from an enthusiastic drummer from Chicago during the course of the merchant's last battle with an ex-champion from Missouri.

"With those cigars," said the donor, "you can beat the world."

"Well," said the storekeeper, quietly and significantly, "I have to play Jones this afternoon."

"Never mind, old man; with those cigars you will play all right."

Later in the day they met again, and the storekeeper informed the drummer that he had won a game from Jones that afternoon.

"Fine! Those cigars were a help?"

"I hardly think so," said the storekeeper.

"Didn't you smoke them?"

"Me smoke them?" cried the storekeeper. "No! I don't smoke. But I gave one to Jones."—Philadelphia Ledger.

"That's what Ferdie told me."

"But surely you don't believe what that idiot says, do you?"—Boston Transcript.

Ambition.

Every normal man has two great ambitions. First, to own his home. Second, to own a car to get away from his home.—Life.

IF IT HADN'T BEEN SUNDAY

Cook Certainly Would Not Have Overlooked the Use of That Insulting Pronoun.

The ritual of society, as women make it, is very exacting the world over, even in almshouses. In this relation there is told a story showing the serious difficulty that arose among a set of workhouse officials in a Western town.

The infirmary nurses, three in number, had demanded a separate sitting room and the delight of Sunday dinner therein, and the matron had sought to humble them by sending the cook to enjoy her Sunday dinner in their company. The brawny cook described what occurred as follows:

"Well, Nurse Jones, she comes down and gets inside the door. 'Four plates?' she says. 'Four? Who's the fourth?' 'Me,' says I. 'You!' she says, and with that she tosses her head and walks away."

Here the cook drew a long breath, and then continued: "If it hadn't been Sunday, gentlemen, I should have let her have it for calling me 'you!'"—Exchange.

Not Quite Alone.

Bobbie had been pouring scorn on girls and their ways till his little sister was ready to cry.

"Ugh!" said Bobbie. "You've no pluck! You daren't go into that dark room by yourself!"

"I dare!" said the little girl angrily. "I dare! You just come with me and see me do it!"—London Weekly Telegraph.

There is less in a name than in the way it is applied.

Misconception About Title.

There is no such office as "chief justice of the United States Supreme court." The proper title for the man who presides over the higher court in the United States—is "chief justice of the United States." The Constitution of the United States does not mention the chief justice, although he is the head of a co-ordinate branch of the government. Article III of the Constitution, which establishes the judicial department of government, provides that "the judicial power of the United States shall be vested in one Supreme court, and in such inferior courts as the congress may from time to time ordain and establish," but it does not mention the chief justice. Under this clause of the Constitution congress has assumed the power to declare how many Supreme court justices there shall be.

A Real Compliment.

Rub—You don't look like the pictures I've seen of you in the newspapers.

Dub—Thanks.—Judge.

Cholera Breaks Out In Iowa

ne Counties Suffer $10,000 Loss; despread Thruout State; Expert Gives Preventive Measures.

Some counties in Iowa have al-dy suffered losses as high as 10,1 from hog cholera this year and disease is prevalent thruout the te, according to K. W. Stouder, tension specialist in veterinary edicine at Iowa State College.

Preventive measures are especial-necessary this year, says Dr. Stou-, because of the scarcity of hogs d the fact that other states, which ually sell, will hold heir hogs this ar as a method of marketing the eap corn.

Dr. Stouder recommends the fol-ving measures in the fight against cholera:

1. Hog lots should be located a-y from streams and highways. e range. streams and irrigation ials help in the spread of cholera breaks.

2. Don't visit neighbor's hog lots allow them to visit yours if they ve sick hogs. Infection may also carried by teams and wagons from ghways. Keep dogs at home, for ey may carry infection.

3. Isolate for at least two weeks new stock hogs and those just re-rned from exhibitions and sales. n't borrow or lend hogs for breed-g purposes if cholera is prevalent.

4. Burn to ashes or bury four et deep all animals that die on the rm.

5. Immunize herds located dang-rously near infected centers and ive careful attention to the feeding nd handling of the herd, for mange, lice and worms lower the vitality of the hogs and render them suscep-tible to the disease.

6. If cholera appears in your herd, post warning notices so your neighbors will know about it.

7. Insist that the temperature of all hogs be taken at the ime of treat ment and an increased dose of ser-um given those showing a tempera-ture of 104 degrees F. or over.

8. Don't rely on serum to cure sick hogs—it is primarily a prevent-ative.

9. If the disease has run its course on your farm, disinfect thoro-ly all places where sick hogs have been. Burn all litter, rubbish and old troughs. Turn over portable hog houses, exposing the interiors to the sunlight. Thoroly clean pens and buildings and disinfect with com-pound cresol solution, 1 part to 30 parts of soft water.

PREDICTS SMALL POTATOE CROP

Iowa Yield Will Be Less Than Half of Normal Says Specialist; Other States Suffer

A potatoe crop far below normal in the great potatoe producing belt of Michigan, Wisconsin, Minnesota, Iowa and South Dakota, is predicted by A. T. Erwin. chief of the truck crops section of the Iowa Agricult-ural experiment station, who has just completed a survey of the po-tato crop prospects.

Mr. Erwin, who has just returned from the Mitchell county region, the chief potato producing center of Io-wa, says that the crop in this region will be one-third to one-half of norm al. Early Ohio's, which commonly average 150 bushels to the acre or better, are producing from 30 to 40 bushels. Under favorable weather conditions the late crop may bring up the average somewhat, but it will not exceed, he believes, more than half of normal.

The Wisconsin crop is estimated at from 60 to 70 per cent of normal. Michigan will produce about 18,870-000 bushels this year as compared with a yield 35.700,000 bushels in 1920. Minnesota will have from 50 to 60 per cent of a crop. South Dakota will have something over a 50 per cent crop.

Conditions are favorable in the western producing regions of Ne-braska, Colorado and Idaho, but as a whole these states are not heavy potato producers.

The long period of hot weather has been responsible for the low pro-ductin in the middle western states, says Mr. Erwin. Recent rains and cool nights may bring up the yield of late potatoes, Mr. Erwin believes, but the crop, under best conditions, will be far below normal.

Wm. Bell and son Fred, and Harry Buss shelled corn for A. D. Gimer the first of this week.

FIRST TRADEMARKED FARM

(Worth County Index)

Naming the farm is a practice that is gradually coming in use. It is one that should be encouraged. To name a farm doesn't make it any more productive perhaps, but it has a psychological effect on the farmer and his family, as well as upon the public in general, that is worth while The farmer will take greater pride in his farm after he has given it a suitable name, and it will also be held in greater esteem throughout the neighborhood. A number of stat-es, and Iowa is one of them, have laws for registering farm names to avoid duplication. Recently Ledru C. Willits, an Iowa farmer, asked the United States patent office to permit him to trademark the word "Hawk-eye" as the trademark for his farm. This was the first time the paten of-fice had ever had a request of this sort to deal with and upon careful investigation, it was found that there was nohing against trade-mark ing a farm. As a result, "Hawk-eye" is now the trademarked name of the Willits farm.

Under this name Mr. Willits may ship his products in interstate com-merce, if he so chooses, and be pro-tected as the owner of the trade-marked name. Should he decide to sell "Hawkeye" sausage all over the country. his right to that name would be respected and no one else can use it. This is a new idea and may appeal to other farmers. Mr. Willits is a breeder of registered hogs, cattle and sheep. A farm name that is registered in the state would have no standing outside the state, while a trade-marked name has.

Scientist Won Many Honors.

Lord Rayleigh, the scientist, whose death is announced at Terling place, Witham, England, was born in 1842, and had a brilliant career at Cam-bridge. He was senior wrangler and Smith's prizeman in 1865, and was for some years professor of experimental physics at Cambridge. Later he be-came professor of natural philosophy at the Royal institution. Honors were showered upon him. In addition to his O. M., he was a Nobel prize win-ner, a past president of the Royal so-ciety, and chairman of the aeronauti-cal advisory committee; and his list of honorary degrees was a long one. As a scientist he won fame for his theory of sound. His name, too, will always be associated with the discov-ery of argon. Lord Rayleigh owned about 7,000 acres in Essex, and be-came known as the peer shopkeeper when he opened several milk shops in London. He also opened two shops at Southend. He ran a co-operative system in connection with his farm-ing interests. Last year he presented a pig to each of a hundred married workers on his estates.

Cut Rag-Weed—Hay fever in Io-wa could be practically eliminated by prompt cutting of ragweeds, ac-cording to Prof. C. H. Farr of the department of Botany at the Univer-sity of Iowa. Both he larger and smaller species of ragweed are al-ready in bloom and the trouble has begun. More than 90 per cent of the cases of hay fever are caused by inhaling pollen from one or the oth-er of these ragweeds. The weed is in bloom nearly a month earlier this year, than ordinarily.

Miss Helen Lenz left Monday morning for Minneapolis after a two month's visit at the home of Rev. and Mrs. A. H. Meyer. She is a sister of Mrs. Meyer.

Marvin Weigmann, the good looking young man in the First National Bank, is now driving a new Ford Coupe. There are also a lot of nice young ladies in Klemme who would look good in the car.

A few from here went to Bayside on Labor Day (Monday) to see the ball games. Those who we know of that attended were Harve Stille, Howard Terhufen, Frank Kluckhohn and Dick Glanville.

Chester White Boars, Grand Champion blood lines, strong arched back good length and bone, quality thruout, new blood for old customers. Priced to sell. Ralph C. Ludeke, Klemme, Iowa.

The improvements on the building of the Northern Lumber Company are rapidly nearing completion. The entire front of the building will be built of brick. Practically the entire building is new now.

The town council is having all the cement crossings in town repaired which are in bad shape. also a few new ones are being put in where needed. This is a move in the right direction, so let the good work go on.

While burning brush at the lumber yard last week Howard Doyle discovered something moving under the ashes left by the fire. He poked around and found eight young rabbits. Some of them were burned so badly they had to be killed but three or four were no these he took home and is feeding them with a spoon. They seem to mode of living and will no doubt come out alright.

Supt. H. E. Wilson should be given a medal for long distance bicycle riding. Last week when he was on his way to Klemme from Cedar Falls he had to change depots at Nora Junction and then take the Milwaukee to Garner and then the Rock Island to Klemme. He figured that would be too long a wait so he got on his bicycle which he had checked to Nora Junction and started out on it to Klemme. The going was good as he had paved roads all the way between Nora Junction and Ventura.

This Critical World.

It's impossible to please everybody, and if a girl has what we, in our ignorance, consider a good figure the neighbor women say she is bunchy.—Ohio State Journal.

PRINCIPLE DOES NOT CHANGE

Argument That Immutability Is a Myth Is Easily Refuted by Any Sensible Thinker.

"Immutability is at last proved to be the myth it is; the ebb and flow of the so-called moral law is understood; things are now known to be stable only so long as men think of them as fixed." These words are taken from an unsigned article appearing in the English Review, and are supposedly those of its editor or indorsed by its editor, remarks the Rochester Post-Express. They are important simply as a sample of the absurd sort of thinking, or pretense at it, which people who write and get what they write printed are at nowadays.

Suppose an Eskimo who had never seen a horse, but had ridden behind his dog team for years, should suddenly come to southern climes and see our familiar horse-drawn vehicles. Suppose then he should counsel thus with himself. I perceive that dogs in this country are very different from what I have known. They are much bigger and have a different look altogether. Evidently a dog is not immutable. It is an animal of changing sort in different lands and times."

The sensible retort to our Eskimo would, of course, be: "These animals you see pulling vehicles are not dogs at all; they are horses."

Now, we have a lot of psuedo-philosophers who are just as illogical about morality as the Eskimo is about dogs. They look at the motives, the doctrines, the behavior of men at different times, and say: "See how different are all these now from what they were awhile ago. Morality is nothing but agreement." But the sensible thinker will ask at once: "What do you mean by morality? Do you mean agreement as to conduct and interpretation of circumstances as they occur? Or do you mean the reference of conduct to a standard that rests on the universal consciousness of sin?"

Changing names does not change the nature of the things to which names are applied. Calling a number of different things by one name does not make these things the same or equivalents. Calling morality one thing today and another thing tomorrow does not change morality; it simply gives the same name to two different things. We have taken morality—the term—and made it stretch to cover widely much that is not morality. But the principle of right and wrong we cannot stretch, no matter how we juggle our terms and theories.

Christianity in China.

Modern education is one of the great silent forces at work in the regeneration of China. A pioneer, and still one of the most important factors in this field, is Christian education. It is making the most important contribution to the building up of a system of popular education. Christian schools have furnished many of China's ablest leaders and most of those distinguished for character and unselfish service. About 200,000 students are under Christian instruction in a wide range of institutions from kindergarten to university and professional schools. The Young Men's Christian association in every city is conducting supplementary education more especially to prepare young men for commercial life.

Students educated abroad are increasing in number and influence and becoming an important factor in life, which makes it increasingly important that they be brought under right influences while abroad. An important advance of the year has been in connection with the college founded by the medical board of China. This institution, when completed, will rank with the best in any land and must have a large influence in producing qualified physicians and establishing new standards.—Exchange.

Rap Red Tape in U. S. Schools

National Survey Makes Charge That Politicians Hamper Efficiency of Education.

FINANCES ARE ANALYZED

Teachers' Salaries Aggregate 64 Per Cent of Total Current Expenses of Schools—377 Cities Covered by Survey.

New York.—Two prime causes of an alleged "deplorable" condition of American public schools are red tape and the handicapping of boards of education by politicians, according to a survey of public school boards and their receipts and expenditures, by the national committee for chamber of commerce co-operation with the public schools and the American city bureau.

The survey, which covered 377 cities, said that in 47 per cent of cases where boards of education were "independent" or free from political manipulation the most efficient administrative and educational results are obtained.

City Officials Hamper Schools.

"The best interests of the public schools," says the report, "cannot be served in a city where the budget of the board of education may be reduced and remodeled by city officials."

The survey shows that the school receipts in the 377 cities for the last fiscal year were $353,260,000 and that the expenditures of these same cities during that period were about $2,000,000 less than income.

The funds are from five sources and are supplied in the following proportions: From the states, 11.6 per cent; the federal government, 1.3 per cent; the county, 5.7 per cent; local taxes, 65.4 per cent; nonrevenue or miscellaneous sources, including income from sale of bonds or short-time loans, 17 per cent. The survey shows that of all cities reporting 70 per cent do not receive a dollar from the federal government. Teachers' salaries aggregated $180,000,000, or 64 per cent of the total of the current expenses of the school.

85 Per Cent for Buildings.

The relation of capital outlay, aggregating $51,727,554, to the total expenditures showed that nearly 85 per cent was utilized on sites and new buildings. A total of $1,341,000 was expended for medical inspection and dental and nurse service in the 377 cities named. The part of the total expenditure spent for the alteration and equipment of old buildings was only 1.8 per cent. Commenting on this, the committee said:

"The smallness of this amount is of particular interest in connection with the findings of this committee in their report on school housing conditions in American cities. This report shows that a large percentage of the children in the public schools are continually menaced by the unsanitary conditions and fire hazards in many old school buildings now in use. In Eastern cities the conditions are particularly bad."

The basis for the committee's survey was an inquiry sent to the superintendents of schools in cities with populations in excess of 8,000.

CHINESE TO STUDY TANNERY

University of Pekin to Have Modern Machinery for Working Leather.

Pekin.—The Pekin university is about to introduce into its curriculum a course in tannery. Students taking up "leather" will be required to spend twelve hours a week in the practice laboratory, which is being equipped with modern leather working machinery from the United States and stocked with the latest chemicals and dyes and the most improved tanning compounds.

Dr. H. S. Vincent and John Wang will be in charge.

DECRIES EAGLE SLAUGHTER

T. Gilbert Pearson, Head of Audubon Societies, Would Repeal Alaskan Bounty.

New York.—Protest against the wholesale slaughter in Alaska of the bald eagle, symbol of American independence, was voiced here by T. Gilbert Pearson, president of the National Associations of Audubon Societies. He said that according to the last authentic information he had from Alaska, the territory had paid bounties on over 15,000 eagles.

"When I first discovered this law," said Mr. Pearson, "I at once began a campaign to try to get the bounty law repealed. It is my contention that the killing of these birds should be stopped until the eagle can have its day in court. The late Governor Riggs, I am informed, expressed himself as feeling that the time had perhaps come when the bounty might be taken off the eagle, but so far as I am aware nothing has as yet been done."

Pricks Tire Dirt Bubble; Explosion Blinds Farmer

Lancaster, Wis.—Hobart Doll, farmer, residing in Beetown, near here, was seriously hurt and probably will be permanently blind as the result of the explosion of an automobile tire. Doll is said to have scratched a dirt bubble on the tire and the explosion followed, shooting dirt and sand directly into his eyes at 70 pounds pressure.

From Pole by Wireless Plan

Capt. Roald Amundsen Hopes to Talk With World While Locked in Ice.

WILL DRIFT PAST THE POLE

Believes Ocean Current Running Northeasterly From Cape Serdze Will Carry Him Past Pole and Into Atlantic Ocean.

Seattle, Wash.—From the remotest, most inaccessible spot on earth—the north pole—a wireless message will be flashed to the civilized world, if the plans of Capt. Roald Amundsen, discoverer of the south pole and famous arctic explorer, are carried out.

Captain Amundsen's schooner Maud, on which he hoped to drift past the pole with the ice floes, was disabled by a broken propeller off Cape Siberia, after he had spent two years in pushing around the eastward arctic passage from Norway. The explorer left his vessel and crew to await a break in the ice and proceeded to Nome, later coming to Seattle on a recent ship.

Will Install Wireless on Ship.

The Maud has no wireless apparatus, but Captain Amundsen expects to install one when the craft is brought here some time this summer to be repaired and refitted. Captain Amundsen explained that his party had been cut off from communication with other human beings for two years, with but one break—his trip out to Nome last year.

"The war was in its most critical period when we left the world," he recalled, "and for months we speculated in vain on the course of events. It was December, 1919, more than a year after the signing of the armistice, that we met a Russian trader who told us what had happened. Then I determined we would carry wireless."

To Sail Next Summer.

Captain Amundsen said he would spend the next year in the United States, probably most of it around Seattle, and would sail from this port next summer.

The last voyage tended only to confirm his previous theories about magnetic properties of the polar basin, the explorer affirmed. He expressed faith in his belief that an ocean current running northeasterly from Cape Serdze would carry him past the pole and eventually into the Atlantic ocean.

"It will take three years—perhaps longer," he predicted.

Captain Amundsen said that an important part of his equipment consisted of books, hundreds of them.

"I read mostly fiction," he said.

The Maud's crew includes Dr. H. V. Sverdup, a scientist; Oscar Wisting, G. Olonikin and seven natives. They left Norway in 1918 and remained buried in the ice 19 months.

Loses Wooden Leg, But Swims Ashore.

Gilbert, Minn.—While Harry Woodard, a good swimmer, was drowning, Roy Rhodda, minus his two wooden legs, which became loosened when a boat occupied by five men overturned, swam 300 yards to shore. Rhodda told friends that two of his companions utilized the wooden legs to aid them to reach shore.

Runs His Movie Camera With Motor

Frank Morris is here seen operating a movie camera from an airplane with his invention—the addition of a small motor driven by an 8-volt, 60-ampere battery which does away with the three cranks that the movie operator has to use and makes aerial movie photography steady and easy.

NEWS REVIEW OF CURRENT EVENTS

De Valera Rejects the British Offer and Dail Eireann Debates the Plan.

PEACE OR WAR FOR IRISH?

Bolsheviks Haggling Over American Relief Terms—Tax Revision Bill in the House—Ansell, Hunt and Cresson Accused of Conspiracy in Bergdoll Case.

By EDWARD W. PICKARD.

Ireland occupied the center of the world stage last week, and at this writing it is uncertain whether she will gain peace by accepting the British government's offer of dominion rule, or adopt the irreconcilable attitude of De Valera and the other Sinn Fein leaders and thereby probably bring upon herself a suicidal war with Great Britain. In the closing days of the week Dail Eireann, the Sinn Fein parliament, was in secret session debating the momentous problem. There was a slight chance that it would not indorse De Valera's rejection of the Lloyd George offer, and another chance that the plan would be submitted to a plebiscite by which the people of southern Ireland might instruct their leaders to accept the dominion rule offer.

It was made evident that the Sinn Feiners were trying to bring Ulster into accord with the South so that the conversations with the British government might be renewed and possibly a counter offer made to Lloyd George. The attitude hitherto assumed by Sir James Craig and his colleagues did not promise well for the success of that effort. Indeed, Ulster has been the stumbling block all through the negotiations.

To the unprejudiced mind the British offer seems extremely liberal, giving to Ireland equal membership as a dominion in the British empire, with full control of its finances, posts, army and internal government, and demanding little except loyalty to the empire, control of the seas about Ireland and certain military and aviation rights. It was specified, also, that coercion should not be employed against Ulster, and De Valera has declared southern Ireland can be brought into an Irish dominion without the use of force. He meant by the use of the commercial boycott and similar measures, but General Smuts is confident that time and experience will bring about the same result amicably.

In addressing Dail Eireann, De Valera declared Lloyd George had not offered to Ireland the status of a dominion government, because no Ireland was mentioned in the terms, only two broken pieces of Ireland; and because dominions have the right to secede, but Ireland must stay within the empire whether or not it wishes to do so. Said he: "Only on a basis of our recognition as an Irish republic will we deal with any nation or foreign country whatever. The only government the people of Ireland recognize is the ministry of the Dail Eireann.

He bitterly scored the British government, declaring it was practically impossible to negotiate with it because of its "lack of principle," and cited the many "inconsistencies" of Lloyd George; but the reservations in his speech, expressed and implied, seemed to leave the way open for further negotiations.

Although Lloyd George declared his offer was the utmost the British government could make, it is just possible a way may be found to satisfy the Irish principle of independence. Dublin correspondents call attention to the fact that England already has practically recognized the existence of the Irish republic by the dealings of the premier with De Valera and in many other minor particulars. Therefore, they hold, Dail Eireann, instead of accepting Lloyd George's proposals, might offer the same terms to Great Britain by a treaty as between two free and independent nations.

One thing is fairly certain: If the British offer comes to naught and warfare is resumed, the British government will start in whole-heartedly to "clean up the Emerald Isle," and that with the practically unanimous support of the people of the rest of the empire. All factions in the United Kingdom now admit that the premier has made a sincere effort to pacify Ireland and right her wrongs, and if he feels compelled to defend the government's position by force of arms, his course will be generally justified. Throughout the world the real friends of Ireland who have been watching her struggle with interest and concern will regret deeply the irreconcilability of her leaders. Already the British are preparing for a possible resumption of hostilities.

The League of Nations council will meet in Geneva probably on August 27 to consider the Silesian problem, and Premier Briand is quoted as saying it undoubtedly will be able to settle the disputed questions conformably with the terms and spirit of the peace treaty. Its labors may be lightened by the present attitude of the German industrial and political leaders and the Polish labor representatives in Upper Silesia. They have held secret conference in Kattowitz and pledged co-operation in the interest of their "common motherland." It was believed they would petition the league council to settle the Silesian trouble promptly by giving Upper Silesia all to Poland or all to Germany. All the conferees were opposed to the further use of force. Germans and Polish irregular troops had a fight near the villages of Sternalitz and Kostellitz, and the Germans killed 24 Poles and drove the rest across the frontier.

The Greeks resumed last week their offensive against the Turkish nationalists, and four strong columns advanced far toward the Kemalist seat of government at Angora while a fifth moved north toward Ismid, which the Turks were said to be evacuating. It was reported again that the nationalists also were giving up Angora. The Turks made a stand at the ancient city of Gordium, near the confluence of the Pursak and Sakaria rivers, which was used as a concentration camp by Alexander the Great when he invaded Persia.

It is almost incredible, but true nevertheless, that the Bolshevik rulers of Russia were still haggling last week over the terms on which Americans should be permitted to undertake the relief of the starving and pest-stricken millions of the Volga valley and southern Russia. Day after day Maxim Litvinoff, head of the soviet famine relief commission, fenced with Walter L. Brown, chief of the European section of the American relief administration, yielding slowly and reluctantly to Mr. Brown's demands, suspicious like his fellow Bolsheviks that any foreigners admitted to Russia will take advantage of the opportunity to conspire to overthrow the soviet regime. At this writing Litvinoff has given in on all points save one. He still insists that the Bolsheviks shall have the right to limit the number of relief workers and to expel any of them. Meanwhile the Russians are dying like flies for lack of food and medicines.

It is interesting to note that soviet Russia has abandoned prohibition. A decree has been issued permitting the manufacture and sale of beverages containing up to 14 per cent of alcohol, which will be heavily taxed. Nationalization of real estate also has been dropped and individuals are now permitted to buy houses or land from the government. Having made pretty much of a wreck of the country, Lenin and Trotzky are gradually receding from their impossible position.

China has cordially accepted the invitation to the disarmament conference in Washington, and Japan's note of acceptance has been prepared and submitted to the cabinet in Tokyo for approval. The Japanese reply, it is understood, asks limitation on the questions to be discussed. The acceptance of France, which was a mere formality, also was received early in the week, together with the assurance of Premier Briand that he will accompany the French delegate President Harding has named two the American delegates—Secretary State Hughes and Senator Lo That the administration will not m the conference the occasion for la expenditures is assured by its req for an appropriation of only $30 for expenses of the meeting. course the Republicans took advant of their chance to make comparis with the huge sum expended by Pr ident Wilson and his peace comm sion in Europe.

Mr. Dresel, our commissioner Berlin, has been busy negotiating terms of the peace treaty with G many, and has run against seve snags, among them a renewed oppo tion on the part of Germany to s mit its sole blame for the war. Am ica reserves to itself all the adv tages accruing under the treaty Versailles, and Germany demands se eral things, including restoration all German property seized in Am ica or the proceeds of the sale such property.

The tax revision bill was introduc into the house and the fight for adoption began promptly under a s cial rule which provided for final tion at three o'clock Saturday afte noon. There was little doubt that measure would be passed almost reported, but there was a chance t it might be changed in one import respect. Just before it was introdu the Republican members of the ho in caucus ordered that it be alte to provide that repeal of the exc profits tax, substitution of an creased corporation tax and reduct of the higher individual surta should become effective on income the calendar year 1922 instead 1921. This was not in accord wi the desires of the administrati which believed the party was commi ted to a revision of the tax la which would apply to 1921 income, a it was thought the action of t caucus might be reversed. The Dem ocratic members of the house als caucused and voted to fight the ta bill, declaring in a resolution that is "subversive of the principle th should govern taxation for the sup port of this government" and that "relieves profiteers and taxpayers large incomes from their just shar of the load of taxation and leaves a unfair portion of the burden to b borne by the people of moderate means." Fifty-two Democratic mem bers did not attend the party caucus

In a majority report of a specia investigating committee filed with the house of representatives last week Samuel T. Ansel, former acting judge advocate general of the army; Col. John E. Hunt and Col. C. C. Cresson were charged with conspiracy in con nection with the escape of Grover C. Bergdoll, the most despicable of the draft evaders. Ansell, it is charged was the master mind in the plot by which Bergdoll, whose attorney he was, was released from military prison under guard to dig up a pot of gold and the report recommends that he be disbarred from practicing in the courts of the nation "above whose safety and integrity he placed gold." Colonel Hunt is held directly responsible for the escape of Bergdoll because he neglected to have him handcuffed and adequately guarded; and Colonel Cresson is severely criticized for his "pretense of prosecution" of Colonel Hunt, who was tried by court-martial. The majority report was signed by Representatives Luhring of Indiana, Republican, and Flood of Virginia and Johnson of Kentucky, Democrats, Chairman Peters of Maine and McArthur of Oregon, Republicans, submitted a minority report dissenting from most of the findings of the majority.

The field of athletic sports provided a minor sensation in the breakdown of Suzanne Lenglen, famous French tennis player, while she was contending with Mrs. Molla Mallory, American champion, in the women's national championship tournament at Forest Hills, L. I. Mlle. Lenglen, who had landed only a day or so before, was suffering from a severe cough and after Mrs. Mallory had won the first set and two points of the second, the French girl quit, weeping, and defaulted. It is believed that these two remarkable players will have another match before Suzanne returns home.

WHEN DID MAN DIE IS PUZZLE

Stops Breathing, but Heart Beats on for Eight Hours.

Extraordinary Case in London Has Aroused Considerable Interest in Medical Profession.

London.—Much interest has been aroused in medical circles here by the extraordinary case of a man whose heart continued to beat for nearly eight hours after breathing had ceased. The question arises: When did death occur?

The man in question, a dustman, apparently had been in good health until Whitsun, when he became drowsy and often would have fallen asleep but for a severe pain in his head. He was admitted to a hospital suffering from drowsiness, stiffness of the neck muscles and headache, but there were no other prominent symptoms.

It was decided to test the spinal fluid, and accordingly at 11:20 o'clock in the morning the man's heart was sounded and tested, after which chloroform and ether were administered. The operation took only half a minute, but on being turned over on his back again he ceased to breathe, although the heart was beating well.

Artificial respiration was tried, and at 5:30 o'clock a tracing of the beats was taken. At 7:30 the heart ceased to beat.

At the post-mortem examination it was found that death was caused by a tumor on the right side of the brain and that this would have nothing to do with respiration ceasing while the heart remained beating.

An eminent specialist has given as his opinion that so long as his heart beats a man is not dead, and says that in sleeping sickness (from which the dustman was suffering), as in all brain disturbances, breathing may cease, though the heart continues to beat, a different nerve center being involved. But no explanation of how it could continue to beat for more than seven and a half hours after respiration had ceased is forthcoming.

OPERATED AT SEA BY RADIO

Captain of Ship, Directed by Wireless, Successfully Used Knife on Seaman's Hand.

Brooklyn.—A surgical operation 200 miles at sea, directed by wireless from Brooklyn, N. Y., was "performed" by Dr. Raymond Barrett. The captain of the tanker Vesta did the real work, under Doctor Barrett's directions, transmitted by a radio operator.

The operator heard the Vesta calling for aid for a man who had an infected hand. He telephoned to Doctor Barrett, who feared from the description that the man's whole arm would become infected.

Under the doctor's direction the captain used a kitchen knife for a scalpel and pieces of rubber for drainage tubes after anesthetic treatment. The operation was a success.

We handle a full line of Globe and Huron furnaces.

JACOBS & SON

FROM TWO POINTS

One May Consider the Meaning of a Handicap.

Uncle Jim, From the Mountaintop of Experience, Hands Out Some Words of Wisdom to Impatient Youth.

Bob and two of his friends drifted into the library where Uncle Jim was reading his newspaper, and sat down to talk. They were discussing very personal matters, but no one minded Uncle Jim.

"The trouble with my job," Tom Seymour was saying, "is that there's not the slightest chance of getting ahead. Why, the fellows in the office say that the older men just stick there to keep the younger ones down. There hasn't been a promotion—I don't know when. And fussy! Whew! Why, a fellow couldn't get on in that office! It isn't possible! And yet Mr. Bates tells dad that he'd be only too glad to move them up; and dad believes him, of course, and puts it up to me."

"Well, my trouble's exactly different," said Henry Norton. "There are promotions all the time over at my place. But if you notice, it's always somebody that has pull. I haven't any pull, so of course that settles my chances. I got the job by answering an advertisement, you know. Pretty nearly every other fellow there is somebody's nephew or grandson or something."

"You fellows make me tired," said Bob. "You don't even know your luck. You may have some troubles, but look at me! You're in business, at least, aren't you? Made a start, anyway. And look at me! Not even started yet! And going to college this fall for four years! Why, anybody could get to be a millionaire in four years! And most business men say that a college education is nothing but a drawback, too. Dad didn't go to college himself, but he thinks I ought to. Uncle Jim, of course, did go—but he's a lawyer. That's different. I want to go in for business."

As if in response to his name, Uncle Jim put down his paper and turned to face the little group.

"Hello!" he called genially. "It's a pleasure to hear somebody talking real business these days. Oh, that reminds me. Did you get out to the golf tournament at the club?"

The boys shook their heads. Their own interests were in the direction of tennis rather than of golf.

"Too bad you missed it. It was a very good tournament," said Uncle Jim; "the most interesting that the Country club's ever had, I think. Jack Partridge won the cup, as usual, and Thayer Stevens won the second prize. But I don't think either of them was half as pleased as old Mr. Painter; he was the most delighted person on those links."

"Why?" asked Bob. "Did he win anything?"

"No, not a thing; except what you fellows would call a drawback, I suppose. For the first time in all the years he's played there they handicapped him. He went round telling everybody about it. 'That proves that I'm beginning to be a real player, doesn't it?' he'd say over and over again."

An understanding look came slowly into Bob's face. "Oh," he said, "so that's why you switched off on golf tournaments! But we weren't talking about games. We were talking about business—about real life—and real life isn't a game, Uncle Jim."

"No," admitted Uncle Jim, "it isn't. But the laws that govern work and play are the same. Fair play is what everybody asks for, isn't it? And they don't mean just in games, either. Think over some of the recognized principles of good sport: teamwork and hitting the line hard and keeping your eye on the ball and not knowing when you're beaten. Oh, a score of little catchwords. They work out pretty well in business and in other walks of life, too, don't they? Even the matter of handicaps applies At first that seems different, maybe; but when a fellow has the right idea about it—when he sees, like old Mr. Painter, that a handicap is a compliment—why, there's nothing in the world that brings the right stuff out like a good, stiff handicap. You fellows just try looking at it that way, and see how it works out. I'm sure that the best thing that ever happened to me was having to work my way through college.

"You must permit me to add, Bob," he said, turning to his nephew with a smile, "that you have to know a handicap when you see one. I never heard old Mr. Painter speaking of the lessons that he took from Sandy McTaggart as a really serious handicap. So I have my doubts whether he'd regard four years at college in that light, either."—Youth's Companion.

Handing Things Down.

Mother was economical. Perhaps that was the reason that at times seven-year-old Bobby manifested the same trait. At any rate, he gave evidences of it the other day. Father was talking to mother. "I'll just have to get a new toupee," he said. "Why, I've got so bald recently that this one shows an inch of baldness all around its edge."

Mother agreed that a new one was necessary. Bobby then turned to father. "Is your old wig too little?"

"You bet," laughingly agreed father.

Bobby's face lighted with a glad thought. "Then we can give it to baby," he ventured. "It'll last her until her hair begins to come."

KNEW HIS TIME HAD COME

Wounded Airman's Remarkable Premonition Concerning the Fate of Enemy Who Had Killed Chum.

An incident in real life which outdistances any flight of Edgar Allan Poe's imagination, was told recently when a group of American and British officers were chatting together about their war experiences.

The conversation turned to one of the most dreaded of all war wounds—shell shock, which sometimes changes a strong, sane man into a helpless lunatic.

One of the party, turning to a young British air force officer, said: "I think I've heard you tell a strange yarn about your pilot who died from shell shock. Would you care to repeat it, old man?"

The young officer smiled slightly: "It is not often I tell this story, but I think you will agree with me it is rather weird," he said.

"My pilot was sent to a hospital near London, dying from shell shock. His father came to see him the evening after he reached the hospital. The father knew his son was dying, as did the boy—he was only 22 years old. 'It's all right, dad,' the young pilot tried to smile; 'I know I'm going to die. I'm not afraid. But I want to die within the next half hour, for in an hour's time there will be an air raid on London. They'll pass right by here and drop a bomb very close.

"'I must die soon—their squadron commander is the man who killed my chum, and I'm going to get him.'

"'He is only wandering,' said a nurse to the boy's father, 'and, besides, if there was to be an air raid the warning would have been given before now.'

"A few moments later the pilot lapsed into unconsciousness and almost simultaneously the raid warning was given—it had been delayed.

"A short time later a bomb fell within 20 yards of the hospital.

"Fifteen minutes later the pilot died.

"He had not been dead two minutes when the German commander's airplane was seen to crash to the ground, the occupants unwounded, but stone dead."

Illicit Whisky in Ireland.

The Irish police have lately been very active in capturing large quantities of illicit whisky such as is brewed by the Irish in the mountain solitudes, the Manchester (England) Guardian states. In County Roscommon 1,000 gallons of whisky were seized and six stills in perfect order were also confiscated, while on the borders of Sligo and Donegal ten stills were captured with some thousands of gallons of spirits.

This illict whisky has a peculiar name, being known either as "mountain dew" or "potheen." This latter admits of various spellings, "poteen" and "potsheen" and is an abbreviation of "nisget potin," "little pot whisky," "potin" being the diminutive of "pota," a pot. Marie Edgeworth in "The Absentee" wrote "Potsheen, please, your honor, because it's the little whisky that's made in the private still or pot, and sheen because it's a fond word for whatsoever we'd like and for what we have little of."

Potheen making dates back at least three centuries, and there are extraordinary types to be found among the makers. So well are the whereabouts of the stills kept secret that it is safe to say that for every gallon seized by the police, one hundred gallons will go down the Irishman's throat.

Long-Distance Talks.

To be able to address a crowd of tens of thousands of persons, extending for more than a quarter of a mile from the speaker's platform and to be heard distinctly in spite of the noise of a big city, was the feat accomplished during recent Victory Loan ceremonies. The seeming miracle of sound travel is due to vacuum tube amplifiers and the loud-speaking telephone.

Along several blocks of Park avenue, New York city, which has been rechristened Victory way, about 102 of these loud-talking machines had been installed. Each telephone was provided with a phonograph horn and was suspended from a cable stretched across the "way." Several loud-speaking telephones were suspended from each lateral cable and all the wiring led to a central point where the necessary connections were made.

And so a speaker on one of the stands on Victory way or in an airplane several thousand feet above conveniently addresed the assembled multitude on the avenue, assured that none of his valuable address was lost in the air.

Nature Covers Up War's Crimes.

Dame Nature has set her veto on the scheme by which certain portions of the Yser battlefield were to be preserved in all their gaunt vividness as witnesses of the great war. Already she has spread a green mantle on the torn earth and, in the words of the Belgian minister for war, "given the most tragic spots an almost smiling countenance." Even the shell holes are filling up, and the entire aspect of the ground is changing. Such being the case, the only thing that men can do is to submit and carry out their part of the reconstruction work, by rebuilding the roads and railway. This does not mean that a few characteristic works will not be preserved. At Nieuport, at Furnes, by the Yser canal, for example, such works as can easily be cared for will remain. Leugenboom, too, will preserve its big camouflaged gun.

He Nailed Himself Up Firmly.

The man who "painted himself into a corner" when he was renewing the kitchen floor has been excelled in unwariness by a citizen of Oak Harbor, Ohio. We agree with the Chicago Tribune, which tells the story, in thinking that he got himself into a much more distressing predicament than his famous predecessor.

Instead of getting up on the roof that he was making, John stood on a timber in the attic and thrust his head up between two rafters, in order to nail on some boards. Having driven his last nail, he tossed the hammer to the ground, and then discovered that he could not withdraw his head from between them. Imagination shrinks from contemplating what John must have gone through while he was being released.—Youth's Companion.

One Man in Island of Girls.

An ideal "select seminary for young ladies," at least as far as freedom from masculine intereference is concerned, was until recently situated on the island of Papaelise, in the Ellice group, just north of the Fiji islands, according to the Continental Edition of the London Mail. Only one man, a caretaker, lived on the island. But the teacher was the only white person in the vicinity, and the "young ladies" were of chocolate hue.

A school much of the same type as an English boarding school was conducted, according to Miss Jolliffe, who founded the institution. The curriculum, however, was adjusted to the tides, as the students lived on fish they caught themselves, and on coconuts, which are plentiful on the island.

Wonderful Collections of Violins.

What is probably the finest collection of violins in the world, says a correspondent, was left by the late Dwright J. Partello of Washington. It contains only thirty instruments, but four are by Stradivarius, two by Guiseppe Guarnerius, three by Nicolo Amati, and one by Carlo Bergonzi, which a world famous violinist has called the most exquisitely toned instruments in the world. Every one of the violins is a perfect specimen and the whole collection is valued at a quarter million dollars.

Enormous Damage by Rats.

The United States has a rat problem, and some astonishing figures are presented of the annual cost of this pest, says the Nation's Business. India suffers more. For there are large sections of that country where religious scruples prevent the killing of even a rat. Maj. J. C. C. Kunhardt of the Indian medical service has recently published the results of his survey of rat-damage in India, and he puts the annual loss at £1,250,000,000, or about one-seventh India's national income.

The New Hart Schaffner & Marx Styles for Fall are Here

There,s no shorter way to say everything you want to know about clothes. That headline tells it all.

You want the best style. Hart Schaffner and Marx create it.

You want fine quality Hart Schaffner and Marx sewing, tailoring and their fine fabrics cant be surpassed anywhere.

DRUGGIST KLEMME, IOWA

Every Person Should Save, Says Bosworth

Wm. B. Bosworth.

William B. Bosworth, director of sales for the government loan organization of the Seventh Federal Reserve district, is a veteran of the government's savings campaigns. Following a season in the offices of the savings division at Washington, Mr. Bosworth came to Chicago and linked up with the big work that is being carried on in the five states of the Seventh district—Illinois, Indiana, Wisconsin, Iowa and Michigan.

Mr. Bosworth seeks distribution as well as total of sales of the savings securities, for he believes that every man, woman and child in the populous district should own one or more of these securities.

"There is no better investment than the savings securities," said Mr. Bosworth recently, "and the various denominations make it possible for all the people to be practical partners with Uncle Sam, at the same time helping themselves. The government savings contests arranged by many states—all the states in the Seventh district are 'booked up'—should result in much good to the great savings movement conducted by the United States government. Postmasters who are leading these contests may feel sure that whatever the savings division can do to help them win their fights will be done gladly and earnestly. All they have to do is to write to the Treasury Department Savings Division, 25 East Jackson boulevard, Chicago, Illinois."

'THRILLS' TO BURN

Real Life Just One Adventure After Another.

Man Who Has Experienced Some of Them Rises to Ask Why One Should Seek Excitement in Pages of Books.

"Why burn the midnight oil on novels of romance and adventure, when our own lives are full of these things?" asked Leonard V. Whenne of the Interested Listener, according to Glenn M Farley in Seattle Post-Intelligencer.

"Things are moving faster than in the old days," said Whenne. "Nobody need acquire adventure from the pages of a book; he can get it from real life. You go out on the sound and the boat gets seaweed in her percolator, or her ignition is on the bum, or something, and somebody jumps overboard, or the dry squad stages the search-and-seizure act, or somebody is blown up by a bomb. Only the other day I read a sheriff's printed notice requesting the public to return any piece of flesh they might have picked up from a bomb explosion; they wanted to bury the deceased. Life is chock full of thrills, and in the most unexpected places.

"Here, the other day, I shipped a trunk over to the beach where I am intending to stay for a while, and Willie comes around to the dock for it in a rowboat that has been pulled up on shore all winter and leaks a bit. I get a 200-pound trunk in the stern, and Willie in the bow, and not noticing that she is pretty well down in the water, I pull for the shore, and here is water coming through the sides like a garden hose. It's a question of sinking at the dock in 50 feet of water, or pulling for the shore, so I pull for the shore, with Willie barking like a young wolf, chattering about the boat sinking and using some surprising language. I get all the high lights of shipwreck at sea; I am rowing frantically, the trunk sticking up high in the air, with the boat yawing at frightful angles, and I am catching a crab about every third stroke, and having visions of the family clothes being lost or, at the best, being soaked with salt water. I recall that a bunch of women berry pickers on the dock were intensely amused at it all, and it struck me at the time like somebody laughing at a funeral; you should have heard them cackle. Willie resisted all appeals to shut up, and bail out the boat, and insisted on raising his voice to the heavens, asking for information. He wanted to know if there was anywhere in the world a more confirmed and immovable bonehead than the party who was desperately trying to row the boat. Well, whether it was tragedy, comedy or high adventure, I won the shore finally, with the gunwale level with the water, and so far as perspiration goes, I might as well have fallen into the sound.

"Why read 'Treasure Island' when you can walk into something like that? All off-hand, mind you, and just out for a little recreation on a hand-painted spring day."

China's Development.

In respect to commerce and industry, China is entering a new era of development. This can but be true when we recall the numbers and proved ability of the people, the almost unlimited natural resources of the nation, the progress already made against great limitations, and the growing needs of China and the rest of the world. China's mineral wealth furnishes a basis for such progress. Twenty-six kinds of minerals are to be found in nearly every part of the country in greater or less quantities. In this article in Association Men, Charles W. Harvey tells what the American business man wants to know, says the Canton Times.

Much of this property is now being partially developed, and the 6,184 mining properties covering 910,016 acres, and containing coal, iron, antimony, gold, silver, copper, lead, petroleum, etc., have been registered with the government for development. The coal deposits are said to be sufficient to provide the needs of the world for 1,000 years at the present consumption of 1,000,000,000 tons annually; the present output is but 10,000,000 tons annually, as compared with America's annual output of 700,000,000 tons.

Pershing a Poor Dancer.

"He's some general, but not much of a dancer," declared a Columbus singer, according to the Dispatch of that city, Mrs. Gladys Petit Bumstead, in a recent letter home, commenting upon General Pershing, after attending a dinner and dance at which the general was present. It is hinted she will keep her badly-scratched shoes as a memento of her meeting with the famous soldier. "I was so glad to get to dance with him that I let him walk over my toes all he wanted to and didn't mind a bit," she continued.

This honor came to Mrs. Bumstead on France's peace day, when the entertainment company with which she is identified was chosen to be present at a dinner at general headquarters in honor of General Pershing. The Columbus soprano sang for him and later he asked her to dance. She has been with the Old Glory quintet at Paris and Le Mans for several months.

Rather a Lunatic.

An idealist is a fellow who thinks he can get 20 miles out of a gallon.—Philadelphia North American.

Start the school year right

You will find everything at this store to start the school year right- we can fit out the boys and girls from head to toe and flll there arms with School.

Milton Schaper left Monday morning by auto for Souix City where he will attend Morningside College. He was accompanied by a man from Garner.

DRAINAGE NOTICE

Hearing on Establishment of Drainage District No. 111, petitioned for by William J. Schlawin, et al.

To Charles Medaus, F. H. Ridder, Danial Webner, Peter Merkel, The Travelres Insurance Company, W. R. Bloom, State Savings Bank of Klemme, Iowa, William J. Schlawin, Aetna Life Insurance Company Trustees of Ell Township. and Peter Josten Twp. Clerk. and to all other persons in any way interested in any of the following described real estate situated in said district Hancock County. Iowa.

NW SE; SW SE; SE SW; NE SW; SW SW All in Section 26-95-23 - NW NE; NE NW; NW NW all in Section 35-95-23 and all roads and highways included within watershed of the district.

You and each of you are hereby notified that on March 23rd 1920 there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district and that a system of drains be constructed for the relief of said disrict.

You are further notified that on June 7th 1920 A. J. Lilly was appointed engineer to make a survey plat and profile and field notes of said proposed district, and that on Jan. 4th 1921 said engineer filed his report, recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said County and may be amended at any time before final action is taken by the Board of Supervisors, and that Oct. 20th 1921 at 10:00 o'clock A. M. has been fixed as the time of hearing thereon. All objections and claim for damages must be filed in the office of the County Auditor not less than five days before said day of hearing.

Witness my hand and official seal at Garner, Iowa, this 8th day of Sept. 1921.

SEAL Chris Jacobs,
Auditor of Honcock County.

S-15-2w.

To J. M. Bauman, the person assessed.

You are Hereby Notified that the following described real estate, situated in Hancock County, Iowa. to-wit:

Lot Seventeen (17) in Block Eight (8) of the Town Plat of Miller was sold for taxes of 1917 on the 9th day of December 1918 to F A. Chisel, that the certificate of sale thereof has been assigned, and is now owned by Floyd Chisel and that the right of redemption will expire, and a Treasurer's Deed for said land will be made, unless redemption from such sale be made within ninety days from the date of completed service of this notice.

You will govern yourselves accordingly.

Dated 10th day of September A. D. 1921

S-15-22-29 Floyd Chisel.

All Wool and a Yard Wide

TEST YOUR OWN HEADLIGHTS

Not Necessary to Use Lenses That Are Approved as Long as They Comply With the Law.

Iowa automobilists need not purchase lenses or pay any one a dollar for adjusting their lenses in order to comply with the new headlight law. Any one can test his own lights and can use any kind of glass for lenses as long as the lights provide driving light so that the driver can see a person or vehicle on the road 75 feet ahead and the light does not glare in the face of the approaching driver nor throw a beam of light higher than 42 inches at 75 feet or beyond.

This law is being inforced by the state automobile department of Iowa and not by the highway commission. The Iowa hihyway commission is merely testing any lenses that are sent in and listing them with the adjustments necessary for necessary operations. Anyone waiting a list of lenses that have been approved can obtain one from the highway commission at Ames.

Automobile owners need not go to a garage to test their lights or have a certificate that the lights have been tested as certificates will not exempt anyone from the law. It is not any more of a job to adjust lenses than it is to adjust a carburator, say the experts. All that is necessary is to get a copy of the law and then measure off the distance and see that the lights are properly set.

Motorcycles as well as automobiles must meet the requirements of the new law.

Ordinary lenses are impractible due to the fact that they would have to be tilted o such an angle as to make them impracticable and it is advisable to get a special lens, altho the use of these lenses is not a guarantee that the lights are within the law. since they must be properly adjusted.

Lists furnished by the highway commission gives this information so that all adjustments can be made but the highway commission has no authority to inforce the new law.

Latest Dispatch From Nation's 'Law Factory' At Washington

NEW TAX MEASURE IS EXPIDITED BY CUTTING OUT OPEN HEARNGS

Practice Likely to Prove Forerunner of Similiar Action by Other Committees

Washington, Sept. 15 — The Senate Finance Committee has temporarily laid aside the consideration of tariff legislation and is devoting its entire time to the study of tax measure. The committee announces it will have the measure ready for the Senate when it reconvenes September 21. The main reason for its asurance is a change in the manner of conducting hearings. Present plans of the committee do not contemplate any open hearings upon the tax bill. Senator Penrose, chairman of the committee, states, however that this "does not mean no opportunity will be given for interested parties to give the committee dat during the executive sessions."

The decision of the committee to abandon long drawn out public hearings is a forerunner of a procedure which is likely to be adopted by both house and Senate committees in the near future. Congressional committees are getting tired of giving weeks and sometimes months, to pub lic hearings during the course of which but very little information that is either new or useful is furnished the committee. A major por tion of the time devoted by the committees to public hearings is taken up by lobbyists pleading the interests of those who imploy them and by propagandists, advancing their pet theories. which they thus get printed and distributed at the government's expense.

Waste of Time and Money

This occurs usually twice in the consideration of any measure, once before the senate committee and once before the house committee where as a rule, these voluminous dissertations are duplicated, word for word, and are printed in reports of hearings of both committees, thus inflicting a terrific printing bill on the tax payers of the country.

Last year the congress spent over $65,000 employing extra stenographers to take down testimony of such witnesses. The government Printing office turned out 23, 905, 891, 608 pages of testimony taken at these hearings. The printed copies of the hearings are placed at the disposal of the special committee conducting the hearings and very frequently almost the entire issue of copies of hearings upon a bill are turned over to some person or organization interested in pushing the bill and mailed out by them under the frank of some number of congress. All this increases the expenses of the government hundreds of thousands of dollars in the course of the year.

Do Not Represent Public

Although the professional witnesses claim to represent the public, in fact they represent only those few who imploy them to lobby. Members of the Congress, though personal contract with their constituents. through the medium of heir home papers" and, hrough the hundreds of letters they receive are in much closer touch with the people than the lobbyist who insists upon being heard "in the interests of the people.

Furthermore the members of congresional committees before whom these garrulous witnesses appear, know more about the subject under consideration than the witnesses, who add absolutely nothing to the sum and total of human knowledge. Ninety percent of the time and money expended in public hearings is wasted.

The tendancy is to cut these hearings to the minimum, confine the witnesses to those who by reason of their training or experience are able to qualify as experts upon the subject and to present data that is reliable and valuable.

An income is something that comes in, but doesn't stay in.

Military Funeral Held Sunnay For Goodell Soldier

WE PRINT HEREWITH THE PLAT FORM OF THIS NEWSPAPER; ON THIS CREED WE STAND

I believe that running a good country newspeper which serves and represents its community is a bigger job than running the biggest metropolitan daily. Because of my belief:

I shall at all times be fair to everyone in my community excepting frequently to be charged with being unfair.

I shall not discriminate against the person who does not advertise in my paper or who does not buy printing of me.

I shall not be afraid to champion the poor man's cause for fear of the wrathwrath of the rich man.

Nor shall I be afraid to stand by the rich man when he is right, for fear of being charged with having sold out to him.

I shal temper justice ad mercy. My columns shal not shout aloud to my community the shame of an individual or of a family when that shouting can render my community no good.

On the other hand I shall not condone evil doing in high places lest in publishing the evil deed to my community my pocketbook shall suffer.

I shall scan what goes into my advertising columns as closely as that into my news columns, realizing that every column of my paper speaks to me.

I shall always remember that politics is not a game but a responsibility and when I write I shall make sure that motive is behind my utterances.

I shall not hate my competitor, but remember he is human and likely to err the same as I.

I shall belong to, pay my dues to, and attend regularly my local state, and national editorial associations.

I shall charge what my work is worth, realizing by so doing I can serve my community best.

I shall respect and honor my profession, believing that it is a high calling.

In brief. I shall conduct my newspaper like a gentleman and a Christian, realizing that no ministry is more sacrad than that of which I have been called.

—The Editor.

KEEP HOUSE AIR MOIST

Moisture in air Important for Heaith and Comfort

Moisture in the air of a house artificially heated is one of the most important features affecting the health and comfort of the occupans according o the engineering extension department of Iowa State College. Tre reason of this is that the body when surounded by dry air undergoes an evaporating process so that the person feels cool and will not feel the heat. If the air is moist the opposite is experienced and the individual is warmer easier.

In order to keep the air in a proper state of humidity water pans must be provided. In a air furnace this is easily done by placing water in the place provided in the furnace, Always keep plenty of water in this pan especially in cold weather when the hot fire causes evaporation.

When houses are heated with steam air can be kept moist by allowing some steam to escape into the room frequently. If hot water is used for heat then pans containing water should be placed where they will get enough heat for evaporation This can be accomplished thru special pans which are on the market.

To determine the moisture content of a room, a hygrometer is used but it is not necessary to have one. In winter a simple test is to wach the windows and if they frost over readily the room air is moist. Where they do not frost, water should be placed so that it can evaporae. A room wih properly moistened air will not have the furniture coming unglued or the wood shrinking in the floors.

A man who deliberately walks into a buzz-saw is crazy, but a lot of them walk into matrimony in the same spirit.

The remains of Kenneth Robbins, (in memory of whom the Kenneth Robbins Post of the American Legion at this place was named) were re-in-terred here on Sunday last, after being finally brought back from their temporary resting place in France, where he was killed in action, as a dispatch carrier in the offensive before St. Mihiel.

Kenneth, a son of Theo Robbins was born here and educated in our schools and he was universilly liked for his sterling qualities throughout the carrier which culminated in the heroic manner in which he repeatedly braved the enemy's fire before being struck by the shell which caused his instant death.

The military accorded as his meed was well carried out in detail—was attended by a crowd from all parts of Hancock and Wright counties and was most impresive.

The floral offerings were both numerous and costly and included one from Mayor, Council and citizens of Goodell. The music was supplied by Garner A. L. Band, the local choir and Mr. B. Nelson, soloist of Belmond.

The Rev. E. I. Doty. recently from the Philipines, formerly pastor of the U. B. Church preached the sermon and many recalled the scene a few years ago when Mr. Doty in the same edifice called Kenneth forward to receive the "goodbyes" of the congregation prior to his departure for the army service.

After the service the casket was conveyed on an improvised caisson to Evergreen cemetary and with military honors laid to rest among his near relatives.

CORN GROWERS PLAN SHOW

Will be Represented at International Show Also.

The Iowa Corn and Small Grain Growers at their meeting held during the State Fair at Des moines planned to hold their annual show at Ames during the short course Jan. 30 to Feb. 4, 1922.

They will also have representatives at the International show in Chicago to handle any exhibits that Iowans will make in the grain exhibits.

E. N. Bressman of Ames was elected assistant secretary and G. A. Lipis Marengo, was elected to be vice pres. of the ninth district.

DAIRY COURSE TO BE GIVEN

Six Montrs Course of Practical Instruction in Making Dairy Products Starts Sept. 26.

A dairy course, designed to give students practical instruction in the processes of manufacturing dairy products, will be given by the dairy department of the Iowa State Colege starting Sept. 26. The course covers a period of six months. and is divided into two three months periods so that the students can register for either or both terms.

The training acquired in the six month's course, together with practical experiance, enables the student to fit themselves for work indairy establishments. Butter ice cream and cheese factories and market milk plants all draw upon the six months course for men. Some of the students however, engage in the dairy business for themselves upon completion of their course. Astudent desiring to enter the six months course must be at least seventeen years of age, and must have satisfactorily completed the eight grade of the public schools or its equivalent. Students with some experience may be recommended for positions by the department after one three months term, but those wihout previous practical work are required to complete satisfactorily the six months course before receiving the recommendations of the department. A certificate is granted to those who complete the course satisfactorily and give evidence of having successfully operated a dairy establishment or a period of two years.

The ten day short course for experienced operators and managers of dairy plants is ginven from February 8 to 18, 1922. For further information, address Dairy Department Iowa State College, Ames, Iowa.

KEEPING WELL MEANS A CONSTANT FIGHT AGAINST CATARRH

Many diseases may be described as a catarrhal condition. Coughs, colds, nasal catarrh, stomach and bowel disorders are just a few of the very common ills due to catarrh.

Fight it! Fight catarrh with a remedy of assured merit, a remedy which has a reputation for usefulness extending over half a century—

DR. HARTMAN'S

PE-RU-NA

Tablets or Liquid — Sold Everywhere

A Good Time Coming.

There was company at dinner, and the son and heir listened to the conversation. During meal an animated discussion arose regarding the feeling which, someone maintained, still existed between the North and the South. The minister remarked:

"The time is coming not so far off, when there will be no north, south, east or west, and—"

"Won't that be splendid," interrupted little Willie.

"Why does that interest you?" asked the boy's astonished parent.

"Because it will be so much easier to learn geography."—Harper's Magazine.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicycacid.—Advertisement.

Petrified Apple.

Dr. C. E. Holt of Otis, Me., is puzzling local scientists with what appears to be a petrified apple. It was picked up on the shores of a near-by lake, and whether the "apple" is petrified, the work of nature, or of a clever stonecutter cannot be decided. It is perfectly formed, yellowish white in color, natural fruit shape, about two inches in diameter and exact even to the stem, leaf and a decayed portion of the skin.

Some artists pretend to be wedded to their art, whereas they have never been even engaged.

Hard to Solve.

Extracts from a book on self-helps: "Life is just what you make it. Don't do anything foolish. Get married in early life. Remember, one great mistake may last a lifetime." There is about as much help in that as there is in an income tax blank.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Like the Climate.

"When your wife gets angry does she cry?"

"Yes," said Mr. Meekton. "It isn't the warmth of her temper I fear so much as the humidity."

Deadly.

Artist's Model—Do you do much sketching from life?

Artist—Oh, no; mostly from the wife.

Taking a Chance.

"Why has the customer shut his eyes? A strange way to shop."

"S-h. He's picking out a cantaloupe."

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented convenient, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Advertisement.

Happy is the woman who has as many changes of gowns as she has of mind. Also unusual.

The bonds of matrimony would be more popular if they paid a cash dividends.

Mankind's salvation lies in education.

SOMETHING TO THINK ABOUT

By F. A. Walker

GOOD MANNERS.

A WISE Italian says that you can tell how civilized people are by the way that they behave in the street. He adds that if a man is considerate of his neighbor it shows that he has a proper respect for himself.

If a French peasant brushes against a stranger in the street or on the road, he touches his hat in apology. This sensitiveness to the rights of others is not found everywhere else in the world.

In fact, the tendency to hustle and bustle, to push others out of the way, has been growing of late nearly everywhere.

* * *

Gilbert Franhcu, the novelist, is so irritated by what he calls the bad manners of the day that he regrets the good old days when everybody carried some sort of weapon and was ready to use it, if offended.

Undoubtedly a man with a sword who was not inclined to fight would be careful about knocking against another who was similarly armed.

The Chinese have a proverb that "The fear of death is the beginning of discipline."

If this is true, there must be something in the theory that when people gave up wearing rapiers and pistols, they become undisciplined and careless.

In the same way, though the use of arms tended to cheapen human life and to encourage bragging and bullying, dueling and brawling, it also had an effect on manners.

* * *

In the wild Western "movies" politeness and "guns" go together and, as a row is settled offhand, without waiting for the sheriff with his star, everybody is very careful not to "start anything."

If a man may be insolent, selfish or unchivalrous without running any personal risk, there is a chance that he may go through life like a bull in a china shop.

But when everybody attended to his own quarrels, it was overdone, and false standards of "honor" were set up as in the case of dueling customs of certain European armies.

It is probably better to rely on the policeman and the law when we suffer an injury.

* * *

On the other hand, it is pointed out by Mr. Franhcu and the like that the law is a cannon that it takes many months to load.

Besides, the law does not bother about trifles, such as somebody's feelings. Actual injury must be shown.

Good manners may be a trifle. But they have a lot to do with happiness. And happiness is no trifle.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

REBECCA.

OF GOOD old Biblical stock is Rebecca, which is translated "noosed cord." It is said to come from the Hebrew word rabak—at least that was the origin of the first Rebecca, a name which seems to have been coined especially to be bestowed upon the wife of Isaac, of Biblical fame.

The Rebeccas of the world should make excellent wives, since the word Ribka, a later rendition of rabak, which means a cord with a noose, is given to convey the firmness of the marriage cord. The Septuagint and the Latin both give evidence of the name Rebecca in very early times. Another version, said to be the authorized one, makes her Rebekah. This latter form seems to be the one affected today by every young miss who is called by the name of the good old Biblical heroine.

Despite the religious significance which history has given to the name, Rebecca has been a great favorite with writers, who have employed her in more or less frivolous romances. Two Rebeccas who will never be forgotten by present-day readers are the "Becky" Sharp of Thackeray's immortal "Vanity Fair," and the charmingly quaint little "Rebecca of Sunnybrook Farm," which is endeared to the hearts of American admirers of Kate Douglas Wiggin.

The bloodstone is Rebecca's talismanic gem. It has the power to guard its wearer from all dangers and preserve her bodily health, and secure her consideration and respect. Moreover, it is said to guard her from deception, especially of her lover. Sunday is her lucky day and six her lucky number. The violet, signifying modesty, is her flower.

LYRICS OF LIFE

By DOUGLAS MALLOCH

THE JOYS WE SHARE.

THIS makes the songs of night so sweet:
They are not here before your feet
But over yonder; over hills
You hear the evening whip-poor-wills
Their notes melodious, their trills,
Repeat.

The unseen singers sweeter far
Than caged companions always are:
They do not sing for you, for me,
They sing for all humanity—
They are a part of grass, of tree,
Of star.

And so in life, the pleasures there
Are greatest common everywhere.
We ask so much for our own ease,
We seek so much so much to please,
Yet find our greatest joys in these
We share.

We must tear down the selfish wall;
Our song must be a comrade call.
Alone no happiness is had—
Each day will be increasing glad
If something to the joy we add
Of all.

SCHOOL DAYS

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

PUBLICITY WORK.

MANY women are making a success in publicity work, and it is a growing opportunity.

You do not need to know how to write yourself. What you require is the ability to get things into print, to know where to go for results, to handle the sort of material people are glad to hear and willing to pay for.

One way is to begin on speculation. Get something that wants publicity, and find your medium, and, if necessary, your collaborator. When you get the publicity you take the result to the firm who wanted it and are given the promised check. You may have to divide this up, but it's a beginning.

"I began in a very small way," I was told by a young woman who has just as much work as she can handle. "Just went about doing little jobs, getting something in here another bit there. I used to sit up nights thinking of original ways to exploit whatever it might be I had on hand, and I got all sorts of people to work with me on spec. Presently it began to pay, work kept on coming in, I got to know a lot of useful people, and now....

"And there's no better fun on earth," concluded my young friend. "It is work full of variety, full of human nature. I have a partner now, and she and I are both busy every minute, and we love it. Also, we are laying up a nice little nest egg for the future, when we mean to be able to travel and see the world and be as idle as old people should be."

(Copyright.)

Aircraft Garage.

The old joke of asking aviators: "Where is your garage?" has become passe with the establishment near London, England, of a bona fide aircraft garage intended for the use of aerial tourists and private plane owners. The company's announcement says: "A staff of highly skilled mechanics under fully qualified ground engineers. Petrol and oil supplies. Overhauls, modifications and repairs promptly executed."

And Usually Does.

The woman who tries to conceal her age is old enough to know better.—Cartoons Magazine.

The Spirit of "Color Discord" glares at you from certain walls. Disease casts its baleful shadows from unsanitary walls.

Cheerfulness, happiness, health, serene peacefulness, is the beautiful "Spirit" of Alabastine walls.

Brighten Up Your Walls This Fall

Have the walls of your rooms cheerful and sanitary, to reflect cheerfulness instead of gloom. Have walls that will harmonize with rugs and furniture, colors that will enhance and not detract from your gowns and personal appearance.

Alabastine

for Your Walls — Instead of Kalsomine or Wallpaper

Alabastine will give you that soft, pastel effect in neutral colors that so many are enjoying in the most attractive homes and public buildings. Alabastine is artistic, sanitary, durable and economical. Alabastine has distinctive merits recognized throughout the world; ready to mix and use by adding cold water.

Our Decorative Service Department

Our decorative department has the ability to serve you, and the desire to do so. We have the experience of planning interior decorations for thousands of the best homes and that experience is yours for the asking. Remember, there is only one quality of Alabastine and at a very economical cost.

You purchase the same identical material that goes into the home of the millionaire. The Alabastine packages always have the cross and circle printed in red and are identical in quality. This being the case, the question of whether your walls are artistically decorated depends on the proper treatment of colors.

Write us a postal that you are interested and we will send you a Chart that may be easily filled in with the information that will enable our artist to work intelligently and there will be no cost or obligation on your part. Our reason!

A properly decorated building is one of our best advertisements.

MOTHER'S COOK BOOK by Nellie Maxwell

The foundation of education consists in training a child to work, to love work, to put the energy of his entire being into work; to do that work which develops his body, mind and soul; to do that work most needed for the elevation of mankind.—Parker.

SEASONABLE SUGGESTIONS.

NOW is the time for the thrifty housewife to gather her stores for winter. Pickles of various kinds may be put up a few at a time without too much of a burden to the cook.

Cucumber Pickles.

Take one gallon of vinegar, one pound of good mustard, one cupful of salt, one-half cupful of sugar, mix well and add the fresh cucumbers each day as they are picked fresh from the vines. Cover and put away for winter use. Mixed spices and an onion or two may be added for flavoring, if desired.

Watermelon Marbles.

Cut out with a potato scoop from the center of a firm but ripe watermelon enough pink balls to fill a quart can. Prepare a heavy sirup, adding a slice or two of lemon and a piece of ginger root, drop in the melon marbles and cook until well scalded. Drop the balls into a can and pour over the sirup and seal. These are delicious preserves to use as pudding garnish or for ice creams.

Yellow Tomato Preserves.

Make a sirup of one-half pound of sugar and one lemon, juice and rind and enough water to dissolve the sugar. Add one pound of tomatoes and cook until well scalded through; skim out the tomatoes and boil down the sirup until quite thick. The lemon rind should be cooked in water until tender, the water used to add to the sugar.

Preserved Citron.

Peel, cut in pieces, remove seeds and cut in dice a citron melon; add one lemon cut in thin slices, seeds carefully removed. Cook the melon and lemon until tender in clear water. Drain and cover the fruit with sugar. Take the melon liquor, add sugar to make a heavy sirup and when thick add the melon cubes. Can boiling hot. This makes a fine garnish or conserve to be used in various ways.

Copyright, 1921, Western Newspaper Union.

Worth the Price.

Jud Tunkins says he never hesitates to lend an umbrella, because it's worth the loss of the umbrella to get rid of a false friend.

THE CHEERFUL CHERUB

Although life often puzzles
I won't waste time complaining—
I have those joyful feelings
That never need explaining.

Get your pipes here

If you need new stove or furnace pipes we can supply you all sizes and kinds. Give us your order now or call us up and we will send our man to repair your furace.

We handle a full line of Globe and Huron furnaces.

JACOBS & SON

PALACE MADE INTO REFUGE

Russian Embassy at Rome Put to Practical Use by the Authorities of the City.

The Russian embassy in Rome, a large and once magnificently furnished villa, standing in its own grounds in the aristocratic Porta Pia quarter, has been turned into a refuge, especially at night, for the many Russians who have swarmed in Rome since the disbanding of Wrangel's army.

The beautiful drawing rooms are reduced to a state of dirt and untidiness and a general dilapidation hard to describe; every nook and corner is crowded with some poor human victim of Russia's revolution. Princesses rub shoulders with peasant women, and men who figure in Russia's history are glad to make cigarettes at 75 cents a hundred to buy a little food. In any other circumstance the sanitary authorities would interfere and end the overcrowding.

For two reasons this human rabbit warren is allowed to exist side by side with rich men's palaces and foreign embassies. To begin with, no one has the heart to turn the refugees into the street, which would be the only place available for them in the overfilled city of Rome. But there is a political reason, too; Vodovsky, Lenin's emissary now in Rome, is moving heaven and earth to get the foreign ministry to evict the refugees, so that he may take possession of the embassy in the name of the soviet. And Count Sforza is determined that he shall not, because it would be tantamount to official recognition of Lenin's government.

As Vorovsky might possibly get his Italian communist friends to help him break into the villa, it is guarded day and night by those military police known as Guardia Regia. Never before has an embassy in Rome fallen to the depths of a night refuge or had such a guard of honor and of protection.

Concerning Color.

Blue is the coldest of the colors and green the next coldest, according to Good Housekeeping. Green is produced by mixing yellow—a warm color—with blue, hence it is less cold than pure blue. So long as it contains more blue than yellow, it is a "cool" color, but the moment the yellow overbalances the blue, a "warm" green begins to develop. Blue and blue-green are termed "receding" colors because a surface colored blue or green, particularly in light values, appears more distant than it actually is. These attributes of coolness and recedingness are true in different degrees of every color tinged with green or blue, including blue-lavender, blue-purple, and bluish and greenish gray. Pure gray is the only perfect neutral except black and white. It is normally a receding color, somewhat cool in effect. It becomes cooler as it is tinged with blue or green and warmer as it is tinged with pink or yellow. Gray and the modifications of blue and green make small rooms appear larger and help to counteract the effect of too sunny an exposure.

The Lust for Speed.

According to L'Air, France is still concerned with the problem of producing speed airplanes capable of defeating the existing world's speed records, the laws of resistance, and possibly the abilities of the best pilot to land on any airdrome smaller than the Gobi desert. It is stated that in a certain number of new monoplanes, possessed of engines of anything up to 600-horsepower, thick wings, retractable undercarriages, and the absence of outside bracing, the constructors are hoping for a speed of 220 miles per hour, with a mere landing speed of anything over 125 miles per hour. The firms concerned are Nieuport, Spad and Hanriot, and it is hoped that their efforts, at any rate to produce a really fast machine, will give rise to some remarkable constructions. — Scientific American.

Latest Form of Briquettes.

Briquettes, in the form of cones weighing about 6½ pounds, are made by a new Danish machine from the chips from turning, boring and filing in ordinary machine shop work. The material is forced into molds by compressed air power. The briquettes can be employed in the proportion of 15 per cent and upward for ordinary iron castings or for special castings such as engine cylinders and are claimed not only to produce tough and compact castings of greater strength than when pig and scrap iron are used alone, but also to provide a convenient means of adding silicon and manganese to the metals.

Origin of the Guinea.

The mystery of that dreadful uncoined unit of barter in England known as the "guinea" which is abstracted from the pocket in place of the pound very much to the damage of the metric and all other systems seems to have been solved at last. Now, the pound is 20 shillings and the guinea is 21 shillings so that it is cherished by hotels and lodging houses because it is divisible by seven. This is good as far as it goes, but why does a London doctor charge a guinea a visit when a quarter less (when exchange is normal) would do as well?—Scientific American.

Saving Syrup.

"What flavor?" asked the pretty girl dispenser.

"Never mind the flavor. Flavor it with a smile."

"That girl is going to save money for me this summer," said the druggist sotto voce. "I can see that."

Dogs Trained to Smuggle.

The Franco-Belgian frontier has long been a happy hunting ground of the smuggler, both amateur and professional. In the customs museum at Lille is a collection of exhibits which give a vivid idea of the tricks employed by smugglers.

There are chairs, brushes, pitchforks, masons' hods, widows' mourning bonnets, wheelbarrows, saws and boots, all hollowed out for stowing away tobacco. There are stacks of government papers concealed in a zinc tobacco receptacle, hollow roulette wheels in which coffee was smuggled, and workmen's drinking cans with only a few inches of liquor in a little vessel beneath the cork, the rest of the can being intended for tobacco.

There are numerous examples of spiked armor, spiked collars and harness furnished with a number of sharp spears, worn by the dogs trained to dash across from Belgium at night, and thus protected against the customs dogs trained to chase them.

Equals Twenty Tunnels.

The two enormous masonry-faced steel towers supporting the contemplated bridge connecting Manhattan with Jersey City will each of them be 840 feet high, or 48 feet taller than the Woolworth building.

The upper deck of the bridge, over which will flow all the automobile and motortruck traffic, will accommodate as many moving vehicles as ten two-track tubes such as the pair soon to be built under the Hudson river at Canal street, at a cost of $150,000,000.

The lower deck will carry ten railroad tracks.

The bridge is expected to cost $110,000,000. Tunnels under the river, equivalent to the bridge in traffic capacity, would, it is estimated, cost two and a half times as much. Not fewer than 20 of them would be required.

Swallowed Cigaret Holder.

Loo Va Lee, a Chinese boy of ten, was taken to the Shanghai hospital, a few weeks ago after "swallowing" a cigaret holder 2½ inches long, ⅜ inches in diameter at the wider end and ¼ inch at the lower end, with a linen band ⅛ inch in diameter. Examination showed that this object had lodged in his windpipe and that all his breathing was being done through it. An effort to get hold of the cigaret holder with forceps and pull it out failed, so the surgeon opened the boy's throat, got hold of the lower end and withdrew it that way.

Give the Boy a Chance.

"What have you named your baby, Rastus?"

"Sam Pro Tem Johnson, sah."

"What's the Pro Tem for?"

"To show that the name is only temporary, sah. We kinder thought Sam might like to choose his own name when he growed up, so we put in de Pro Tem as a warning to de public."—Edinburgh Scotsman.

OT WRONG "GIRL"

e Occasion When Monarch's Plans Went Wrong.

ght Be Difference of Opinion as to Whether Joke Was on Frederick or the Corporal.

Those who read history with an to the humorous as well as the pressive, sometimes stumble upon ny and witty happenings in which great were forced by humble be- s or by circumstance to play lu- rous parts, writes Mark Stuyvesant the Cleveland Plain Dealer. The lowing incident seems as though it been designed to swamp with ghter the carefully carried-out and en cruel plans of Frederick William of Prussia to have a corps of giant diers.

It is said that Frederick's agents rched the world for giants. Hag- rd, to whom we are indebted for this rmation, tells us that Frederick id an Irish giant, who was 7 feet gh, the sum of $6,500 to enlist, a ritable fortune in those days.

But Frederick, who was miserly, liked to pay such sums even to ieve his ambition for an army of nts. He determined to breed giants well as to buy them. Whenever he nd a tall young woman he had her rried to one of his tallest soldiers. thought of the desires of either s permitted to stand in the way of ambition. Sometimes Frederick orted to trickery to bring about his h.

ne day when Frederick was riding a forest, he came upon a beautiful about 6 feet in height. She did know the king by sight. This ederick realized when he stopped talk with her. He well knew the could not read, for very few wom- of his day, even of the highest nk, possessed this accomplishment. Frederick asked the girl if she ould like to earn a thaler or two by carrying a note to the commander a near-by fortress. She said she would like to have the money. So Frederick wrote a note. It read:

"Instantly have the bearer of this married to Corp. Fritz of the Gren- diers."

The unsuspecting girl took the note and left the king, who continued his way in the opposite direction. Sud- denly the girl realized that if she did the errand she would be late to an ap- pointment with her lover. So she hur- ried to the hut of a withered old woman, gave her half the king's money and the note to deliver. Then this beautiful, stately girl hurried away to meet the man she loved.

When Frederick rode into the for- tress that evening, he commanded the woman who had borne the note to be brought before him with her husband. Imagine the shock to the king when he saw the withered old woman, who had been married to the corporal!

Needless to say, the story did not remain a secret in the fortress. It ran the length and breadth of Prussia, and other nations also laughed.

Up-to-Date Barges.

It is a far cry from the Erie canal to the present barge canal of New York state, and just as far from the mule-hauled canal boat to the latest type of self-propelled barges which were recently built to run on the barge canal. These barges, five in number, were built in Duluth, and will be propelled by 140-brake-horsepower direct reversible Diesel engines. They are 250 feet long, 36-foot beam, 10-foot draft, with a displacement of 2,150 tons each. Besides being self-pro- pelled they are all thoroughly equipped with electric auxiliaries, having elec- tric hydraulic steering gear, electric anchor windlasses, and electric cap- stan. They are all electrically lighted, the electricity for the various pur- poses for which it is used being pro- vided on each barge by three 10-kilo- watt generators, driven by a 15-horse- power Deisel engine. The cargo ca- pacities range from 1,500 to 1,750 tons each which, to any one who remem- bers the old canal boats, will give an idea of the type of traffic to be ex- pected on the canal.

Somewhat Over-Particular.

Some of the British miners' families were very particular during the coal strike. In a certain mining village of North Ayrshire, where the strikers' children were being fed by the sub- scriptions which their parents extorted from the rest of the community, it was found that at the midday meal about 70 per cent of the children refused to take the soup which was offered to them, saying that they preferred bread or tea. The authorities, realizing that they were catering for a very exacting clientele, knew better than to take of- fense at this rebuff and announced that tea would be served at 5 o'clock, whereupon one starving child ex- claimed: "That's nae guid tae me; ma music lesson's at five!"

Cat Mothers Rabbit.

An interesting case of adoption has occurred on a farm in the humble dis- trict of East Lothian, Scotland. A cat, whose kittens had been given away as they were old enough to be removed from the mother, has adopt- ed a young wild rabbit, which she feeds and nurses with great care and affection. The cat was in the habit of killing and bringing in young rab- bits to feed its kittens, and it is re- markable that she now should show maternal affection towards an animal which hitherto she has regarded as prey.

"BLUFFERS" WHO MAKE GOOD

Not Infrequently It Is Essential to Gain the Neighbors' Confidence by Any Means.

There is an oil man out west—and if his name were printed every one would know it—who on one occasion was so near the rocks that when he walked his back hair dragged on the ground. He had about as much money as a chipmunk has diamond neck- laces, and his debts would sound like a statement of Europe's financial re- lations with the United States. But he had a good prospect. So he got together a group of investing possi- bilities and gave them the best dinner they had ever tasted, says a writer in an exchange.

"But how did you do it?" I asked. "You're after telling me that you had been living on rubber heels and old clothes for weeks and yet you gave them a dinner?"

"I bluffed," said the oil man. "I fooled 'em all, hotel man, waiters, cab- men, florist, every one else. If I had not put that proposition over I would have walked out of town that night if I had been lucky enough to get out of town. But I fooled 'em. And we all got rich out of it."

The theory on which he worked might be stated differently. The con- fidence of one's neighbors is essential to success in life, and sometimes it seems advisable to bluff in order to get it. It never pays to lop the un- der lip down on the breastbone and tell the world that you're a gone gos- ling. After all, only the man with real courage is able to bluff success- fully, and such a man is worth back- ing—so that one might unwisely argue it is safe to back bluffers. Best say that some bluffers are worth back- ing. Which recalls the story of George Graham Vest, for years one of the senators from Missouri. At the con- vention which later nominated him his rivals had promised what they would do if elected. In his turn Vest arose.

"I will only promise you," said he, "that if I am elected I will draw the salary with clock-like regularity and spend it like a gentleman."

That bluff won. But the bluffer who can make a bluff like that is no bluffer at all.

One Too Many.

A literary family in which a seventh child had just come was at a country house, and for a time a good deal of the care of the other six children devolved upon the father, who had Spartan ideas as to the upbringing of his sons. One morning he carried his two-year- old to the creek near his home to give him a cold plunge. The child object- ed lustily to this proceeding, but was firmly held and ducked, notwithstand- ing.

At the instant of the ducking, how- ever, a brawny hand seized the Spar- tan father by the shoulder and flung him back, while the angry voice of the farmer, who was his nearest neigh- bor, roared in his ears:

"Here! None of that! I'll have the law on you for this."

For some time the father endeav- ored to convince the farmer that he was not trying to drown the child. Even then he wasn't wholly convinced. To the very last minute he kept shak- ing his head skeptically and saying:

"Well, I dunno about that, I dunno. You got six besides this."—Harper's Magazine.

Census Reveals Odd Names.

What will be the strangest name on the British census paper? asks the London Morning Post. Last time the palm went to a Yorkshireman, who had been saddled with the name of Mahershalalhashbaz. The longest name was that of a Derby child whose parents had inflicted upon her Chris- tian names beginning with every let- ter of the alphabet. Of punning and other curious names there will be no end. Some of those revealed by pre- vious enumerations have been Arch Bishop, Arch Deacon, Rose Budd, Prim Rose, Righteous Williams, Temper- ance Sober Lane, Sudden Death, Pine Coffin, and Alfred Gott Barelegs. An- other factor is the astonishing fre- quency with which such high-sounding names as Lord George Smith, Lady Mary Brown, Marcus Cicero are found in the poorer quarters of our cities. Such names are usually select- ed from the cheap novels which form the chief reading of the parents.

Fowls' Peculiar Appetite.

In a village in Hants, England, a man had a pen of fowls, enclosed in a wire run of 1-inch mesh. Sparrows used to get in the run under the sides and the rooster one day killed and ate a young one. After that woe betide the sparrow that entered that pen, for the old hens acquired a liking for sparrow meat and they would chase a sparrow about until they caught and killed it. In the fall the fowls were moved to another farm and shortly after a wheat stack which was infested with mice was threshed. The rooster and hens were soon on the job and had a merry time catch- ing mice which they made short work of swallowing, after giving them a few raps on the ground.

Vote Against Bobbing.

"Well," announced the fair young thing at the dinner table. "I'm not going to get my hair bobbed after all."

"Praise be," said her father. "But why?"

"You see, it's like this," she dimpled in reply. "I didn't know whether the boys would be sure to like it, so I sent around a questionnaire. They all an- swered, and the result was that six of them said not to bob it, while only two were in favor, so I can't do it, really."

FOOD FOR SPIRITS

Young Children Considered Dain- ties in West Africa.

So When Great Man Dies, the Little Ones, With Slaves, Are Killed and Buried With Him.

Some strange superstitions of West African negroes are described by P. L. Tengely in the London Daily Mail. If he will, the juju man (witch doc- tor) of West Africa can tell you that when a man dies his spirit, or spirits, will remain behind and wander about the earth while he will "go away." It is not clear what is meant by "he" as distinct from his spirits, or where "he" goes when he does "go away," but obviously it is to a place where, if he be a big chief, he will want serv- ants to serve him, and therefore when he dies slaves are killed, and also young children. But these latter are killed for another purpose, as the following remarks will show.

These wandering spirits are of two kinds—good, or at least harmless, called "Duppies," and evil ones, known as "Jumbis."

"Duppies," the juju man will tell you, can be seen in various forms.

There used to be a resthouse on a beach in southern Nigeria which fell into disuse because, as many white men used to know, queer black forms, sometimes like monkeys, used to run about the veranda and the rooms at night making weird noises. They did no harm, being, as every native knew, only "duppies."

The "jumbi," however, is a terrible thing—so awful that whoever sees one goes mad.

His home is in the silk-cotton, or ceba tree, and he kills the person who cuts one down. Blacks of educated West Indian descent will never cut down a silk-cotton tree.

"Jumbis" eat dead bodies, preferring those of children, though there is noth- ing they like better than rice.

Hence when a man or woman dies a quantity of rice is placed near the grave under a cover resembling a can- dle extinguisher, only with holes in the sides. The object of the holes is to enable the thin, hungry "jumbi" to en- ter the receptacle, where he gorges himself until he is too fat to get out again.

A fresh supply of rice is daily placed under the dome to make up for what the "jumbis" have eaten. (There are lots of rats and ground pigs in West Africa.) The process is kept up until the ninth day, when a "wake" is held, and the "jumbis" are driven away by noise and fee-ack (native magic).

That is one way of keeping the "jum- bis" from the dead. But if a great man dies he has another chance of being undisturbed; for then young chil- dren are killed, and the "jumbi" eats them rather than the old person.

Many years ago, when King Take died, the then governor, in the hope of preventing any secret slaughter, or- dered that he should have a grand funeral, "white man fashion."

It was a great day for the natives, several white officials attending the burial in the center of the royal com- pound, where, by order, they remained until the grave was filled up.

But despite these precautions, at dead of night the juju priests had their innings. Take was dug up and re- buried in native fashion together with his slaves and several children.

"Why Southpaws."

The word "southpaw," used fre- quently in the course of references to baseball games, is a bit of slang which which has crept into the language dur ing the last few years—a colloquialism which has behind it rather more of a logical pedigree than most slang words can claim.

That the batter may not have to face the rays of the setting sun at any time of the year, a baseball dia- mond is usually laid out so that the batter's box faces due east. The pitcher, therefore, faces westward, while his right hand is toward the north and his left hand is toward the south. As the majority of pitchers are right-handed, it was only natural that an exception to this rule should be singled out for a certain specific title—and the name "southpaw" was adopted on account of the usual points of the compass in connection with the diamond itself. The eccen- tricities of Rube Waddell and other "southpaws" have made the name synonymous with "erratic," so far as baseball language is concerned, though there is no medical support for the theory that left-handed persons are more peculiar than those who use their right hands.

Aerial Time Tables.

So important has become commer- cial aviation in France that there is being published a monthly time table of all the air services operating in France and allied countries. This time table, known as L'Indicateur Aerien, gives such information as the time of departure and arrival, routes, type of plane employed, weight of lug- gage allowed, rates, and so on. The little publication appears on the first of every month.—Scientific American.

Call for Much Shelf Room.

Five miles of shelving will be erect- ed in a new building being constructed by the French government, for the filing of more than 100,000 volumes and almost as many pamphlets, etc., which they have collected. The col- lection of manuscripts, photographs and war records is appalling as to numbers, and there seems to be no limit to the gifts of collectors.

The Mystery of the Cook's Pet Parrot

A FUNNY paper recently.
SLIPPED ME a good laugh.
WITH A wheeze about.
A FAMOUS ventriloquist.
AND WHY he had quit.
THE VAUDEVILLE stage.
IT SAID he discovered.
HE COULD make more jack.
SELLING WOODEN parrots.
SO WHEN I got home.
I PASSED the joke.
TO OUR cook, who owns.
BOTH A speechless parrot.
AND A sense of humor.
BUT SHE muffed it.
BECAUSE SHE didn't know.
WHAT A ventriloquist was.
SO I had to explain it.
AND ON the way out.

I BLEW just a whiff.
OF CIGARETTE smoke.
AT HER amusing old.
FOOL OF a parrot.
WHICH NEVER talks.
AND I said, "Poll.
HOW D'YOU like it?"
AND TO this day.
IT'S GOT me guessing.
WHETHER IT was cook.
OR THE blamed bird.
WHICH SQUAWKED back.
"THEY SATISFY."

CHESTERFIELDS speak for themselves. They let you know you're smoking. They "satisfy" and yet, they're *mild*. An impossible combination, you say? Sure—everywhere but in Chesterfields. The blend does it and the blend *can't be copied!*

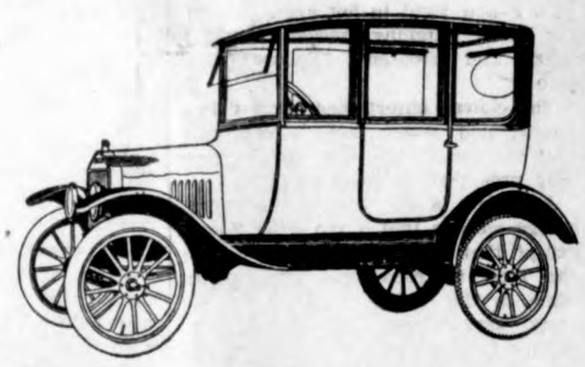
Ford
THE UNIVERSAL CAR



Mr Edsel B. Ford, President of the Ford Motor Company, makes the following announcement:

"We are making another reduction in the price of Ford cars and the Ford truck, effective today. The new prices average $70 under former prices, and are the lowest at which Ford cars and trucks have ever been sold. List prices, f. o. b. Detroit, are now as follows:

	New Price	Old Price	Reduction
Chassis	$295	$345	$ 50
Runabout	$325	$370	$ 45
Touring	$355	$415	$ 60
Truck	$445	$495	$ 50
Coupe	$595	$695	$100
Sedan	$660	$760	$100

"This is the third price cut during the past twelve months. On Sept. 22 1920 the price of the Ford touring car was reduced from $575 to $440; June 7th to $415, and now to $355, making total reductions in this type of $220, or 38 per cent. The same proportionate reductions have been made in all other types. One year ago the price of the Ford Sedan was $975; today it lists at $660 with the same equiptment.

"We aretaking advantage of every known economy in the manufacture of our products in order that we may give them to the public at the lowest possible price, and by doing that, we feel that we are doing the one big thing that will help this country into more prosperous times. People are interested in prices, and are buying when prices are right.

"The production of Ford cars and trucks for August again broke all previous high records with the total reaching 117,696. This is the fourth consecutive month in which our output has gone over the hundred thousand mark, the total for the four months being 463,074, which has gone a long way in making posible the present reduction. June this year, with an output of 117,247 was the previous record month.

"One noteworthy feature of our sales is the increased demand for Ford trucks and cars for salesmen. This class of commercial business has been gradually increasing the past sixty days and we interpet it as a very good sign of improvement in general business

"No reduction has been made in the price of the Fordson tractor, and none is contemplated."

Go over these new prices! See how little it costs to become the owner of a Ford car or a Ford truck. Can you really afford to do without one any longer? Let us tell you more about it, and advise you regarding the delivery of the particular type of a car in which you are interested.

SAW 'HER CLOWNS'

Sick Child's Life Saved by Celebrated Comedians.

Action of French Funmakers That Shines "Like Good Deed In a Naughty World."

The Fratellini brothers, celebrated clowns of Medrano (general favorites of the Continent), were recently the heroes of a singularly touching little incident.

It appears that the nine-year-old daughter of the Widow Colicourt, 31 Rue Francoeur, shortly after attending a performance in which the clowns had appeared, fell seriously ill. In her delirium the child was obsessed with the desire to see them again—the marvelous buffoons who made her laugh so on that evening of happy enchantment; she kept calling for "her clowns."

Months passed while the mother stubbornly fought for the life of her child, and gradually the illness responded to the treatment. The little girl, however, remained sad, pensive and lacking animation. The doctor shook his head, puzzled and alarmed by the child's listlessness. "She should have something to distract her," he said.

How entertain her? The mother was far from being a wealthy woman. Since, however, the child continually spoke of "her clowns," why should she not go to the [illegible] brothers, themselves, and ask [illegible] help? She reflected that these [illegible] artists were good men [illegible] generously to charity; that they sometimes went to the hospitals to entertain the inmates and bring them cheer. Why should she not go to them and ask them to help save her child?

The upshot was that two days later the widow went to the circus and requested an audience with the Fratellini brothers. They were, at the moment, on the stoge; she could hear their silly laughter as she stood in the wings and waited. When, presently, panting from their exertions, they came tumbling off, she made her request hurriedly, stopping them, tears standing in her eyes.

The three clowns are the fathers of 14 children, all told. They promised to go the very next day to see the little sick girl, adding that it would not cost the widow a penny.

And sure enough, the next day, arrayed in their most gorgeous costumes, grotesque, hilarious, altogether marvelous, they enacted from full hearts before the little invalid their most fantastic sketch, singing and dancing and grimacing. And the ecstatic child, mad with happiness and with a new light in her eyes, clapped her hands, laughing through exquisite tears, and shouted: "Encore! Encore!"

The clowns entertained her for two hours; and when they left—quietly and discreetly, as they had come—they promised to come again.

And that is the end of the story, as the mother told it the other day—except that the little girl is well on the road to recovery. The widow came to the writer and related the facts, very simply. And the story seemed to the writer a very good story, indeed.—From Le Petit Parisien.

Birth of a Star.

The vast black mass, 20,000,000 times larger than the sun, demonstrated to exist in the heavens by the Dutch scientist, Dr. Pannekoek, seems to upset all earlier astronomical calculations.

It is, comparatively speaking, so near us that Doctor Pannekoek suggests that the sun itself must move round it once in 2,000,000 years—drawing the earth with it.

"We believe that the black body must consist of dust, and that this is the first stage in the birth of a star," said an expert. "As it condenses it gets hotter until it becomes luminous and visible. Sudden 'flares' or 'new stars' have been seen in our lifetime, but the black cloud of dust appears to be the real beginning.

"The amazing feature is the nearness of the body. It is relatively as close to the earth as a foot rule would appear to be if only two feet away from the eye. It is quite possible that even vaster bodies of this kind exist." The nearness is relative. The body is 280,000,000,000,000 miles away.

Papal Titles More Costly.

Papal titles have gone up in cost according to a circular which has been sent out by the Vatican announcing an increase in the fees chargeable for the award of papal titles. The following list of titles and costs is given: Prince—Personal title, 10,685 lire. Hereditary title, 21,600 lire. Duke.—Personal title, 9,600 lire. Hereditary title, 19,500 lire. Marquis—Personal title, 7,500 lire. Hereditary title, 15,000 lire. Baron.—Personal title, 5,400 lire. Hereditary title, 10,880 lire. Payment. it is stiplated, is to be made in gold, which would bring the cost of a princely title to a hundred thousand lire. The nominal value of the lira is about 19 cents.

Circus to Travel in Motor Trucks.

An eastern circus organization will tour the country this year in motor trucks costing from $12,000 to $30,000 apiece. It is estimated the saving in rail charges will go a long way to pay for this equipment. The motorized circus will be able to travel anywhere and, being independent of train service, may make towns not often visited by large shows.

MAKES NEW BED

River Indus Changes Its Course With Regularity.

Inhabitants of Waziristan Face Perpetual Peril, as Water Constantly Moves in a New Direction.

The frequently heard news that an eastern river has changed its course with danger to property and life seems incredible until one has actually seen an active river "getting busy" on a new course, writes a correspondent from Waziristan, India.

Thus the Indus is a perpetual problem, and for this reason: All provisions must cross its broad waters, as Waziristan is on the west bank and in desert country.

Every October the river hibernates, and a bridge of boats temporarily solves the problem.

But each May it wakes up, shakes itself out of its sleep and probably out of its original course.

The bridge is hurriedly dismantled, and there ensues anxious speculation among the engineers.

Which way is the water coming?

After observations and soundings the new position of the port, quaintly called "Steamer Point," is fixed. There follows a procession of railway men, provision experts, coolies (laborers) and camels. Lines are laid, "dumps" arise and within a week the erstwhile lonely river bank is populated and becomes a "going concern."

Even then a wary eye has to be kept on the encroaching waters. Both the railway and the supply "dumps" have to be moved farther and farther back. Sometimes even in a single night the river will flow away into a new and unexpected channel; or, maybe, it will forsake a portion of its bed, leaving a yellow sandbank in its place.

The bank itself becomes jagged like a piece of bread into which a child has made large bites.

The water swirls ever inward and cracks appear ten feet within the bank; the cracks deepen, and without warning another large lump of shore crumbles away. A motor car that stopped on such a piece disappeared into the river and has not been seen since.

And some of these effects are curious.

A cluster of three palm trees, which were well away from the water last week, were little islands yesterday. This morning they had disappeared!

Probably they are miles down the stream for the current is swift and gives no quarter.

You may imagine these quiet trees, torn from their native soil, turning feverishly round and round at the mercy of the sweeping current.

The flotsam and jetsam of life and death go eddying past on the bosom of the stream. Here a dead camel, there a bevy of jam tins catches the eye and fades away downstream.

Yet with all the turmoil and trouble the Indus has a charm of its own, and it is most fascinating to watch the work of elemental nature.

This evening, as I saw the bank collapsing bit by bit, I could not help thinking of the story of the engineer who built his bungalow a comfortable mile from the river. The next year the water was lapping at his garden gate.

And I wondered if in a year or two the river would threaten our own little homesteads away back in the distance.

Is President of Assyria.

Just as George Washington in America became known to posterity as the "Father of His Country," the first woman president of a nation may be known as the "Mother of Assyria." Lady Surma, first executive of the new Assyrian republic, practically created the nation when she obtained from England the grant of 80,000 square miles of land in the Kurdistan mountains, and this, it is said in London, may win her the unique title.

Lady Surma was ambassador to England from the Assyrians—and incidentally the first woman ambassador in the world—when she obtained the grant of the new territory from Britain. Her brother, Mar Chinon, had been patriarch of the Assyrians, and following his murder a new form of government was outlined. When the new assembly of the Assyrians was organized, the ambassador who won for the country its new territory was at once urged for its ruler.

Lady Surma was educated by British tutors and is an accomplished linguist.

Arabic Literature Recovering.

Arabic literature, writes a correspondent to the London Morning Post, is recovering from a period of depression induced by the war. Of the books published during the last month or so one of the most interesting is "Nawadir al-Harb," containing rare and interesting comments on the war—rare in the sense that every fact is narrated from the standpoint of the Oriental philosopher. The little volume closes with appropriate comments on the powers and their post-war conditions culled from the works of the classical Arabic poets. Perhaps the most amusing passage is that which is selected for Montenegro: "I have sold my house and my donkey; I have, therefore, nothing above or beneath me."

Really Clever.

"Madge is an awfully clever girl."

"Why, she's a regular dummy with the men."

"That's where her cleverness comes in. She leads a man to believe that she thinks he is worth listening to."

Henry Lau & Sons

The SANDMAN STORY

IAN HELPS WIND.

night the Wind and the Rain t in a field and such a quar- as they began at once. "Get y way," said the Rain, "or I nch you until you cannot

ha," laughed the Wind. "I ou do not know to whom you nking. Why, I can drive you me and send you where I

made the Rain very angry and came faster and heavier than show how powerful it could

the Wind only blew harder ove the Rain against the trees shes until they lay flat upon und and the Rain stood in lit- ls.

across the field the Wind it until it struck the big farm gs and ran in great tears down es, splashing upon the ground. though the Wind blew and he Rain as it bragged it could, ain in little rivers and pools out that it would show its pow- n short time by making floods would rise high and cover the

as then that the Wind began k it must end the quarrel and e way that would stop the Rain, ough it knew the Rain could never overpower it, the Rain did not, and in trying to show its strength it would do great harm.

And then it was, too, that the Wind discovered that it could not do this alone, in spite of its bragging and being able to drive the Rain before it.

As soon as the Wind stopped blowing and began to think, the Rain came down faster and faster and the pools grew into little ponds, for now it was sure it had overpowered the Wind and was master of everything.

But this was not true, for over the tree tops and over the hills and mountains went the Wind, running swiftly toward the east, for there it knew was Mr. Sunman, and he could always make everything right.

"Oh, Mr. Sunman," called the Wind, "wake up quickly and get up. There is something terrible happening," and then it told Mr. Sunman all about it, taking its part of the blame.

It was very hard for Mr. Sunman to get up that morning for the Rain had thrown thick blankets of clouds over him while he slept, but with the help of the Wind he at last threw them off and up he got and away they ran.

Up higher and higher they went, and in a short time away went the Rain and even the ponds and little rivers and pools were soon taken care of, and all that remained of the dreadful quarrel were the tears of rain dropping from the leaves.

The Wind carefully ran among the trees and helped Mr. Sunman dry them, and by and by all was well in the land, and now the Wind always goes over the hill and mountain tops early in the morning to awaken Mr. Sunman and sometimes if you listen you can hear the sound of its heavy breathing as it runs.

Suggested Carelessness.

"Is Mrs. Gadder competent to drive her car?"

"I doubt it. In fact, I have no confidence in a woman driver who persists in calling the emergency brake a 'thingumbob.'"

Home Town Helps

OVERCOMING LACK OF WELL

Iowa Community Brought Ingenuity to Bear to Secure Supply of Suitable Drinking Water.

A rural school in Iowa, situated in a locality where suitable water for drinking purposes is to be procured only by driving a well to a considerable depth, met the situation by conserving the wash from the roof of the schoolhouse, passing it through a filter and holding it for use in a brick,

Iowa School Surmounts Difficulty.

underground tank provided with a tight curb. The filter is filled with layers of charcoal, sand, and screened gravel of small size which have been placed in the container in the order named. The water which comes from this "well" is highly colored but it is exceedingly cold and palatable. From a sanitary standpoint it is perfectly healthful. Before this means of procuring water for drinking purposes was installed the school children either went without water or were compelled to bring it a considerable distance.—Utica Globe.

COMPARES WELL WITH CITY

Average American Small Town, in Fact, Is Definitely More Pleasurable Abiding Place.

The churches in nearly every small town are centers of wholesome activity, nor is society in any of them like insipid gaucherie pictured to us as typical in an imaginary town of a "best seller." Small talk may predominate at any gathering, but that is true in the city, and there may be a lack of the super-refinements of manner and of dress, but whether that is to the credit or the discredit of the small town is at least debatable. As for brains and enterprise and energy, why, the small town in America is their breeding ground. It is from the small towns and the farms that the cities of America draw their vitality. How many of the men and women whose names are found in "Who's Who in America" are or were small-town people? Most of them. And those who left the small town for the city did so, as a rule, not because there was lack of beauty, of refinement or of taste at home, but because they sought larger opportunity. The small town is not gross, nor unlovely. It, speaking collectively, is the cherished abiding place of millions of Americans who compare in every worthy attribute with the inhabitants of cities, and whose faults and virtues are inherently the faults and virtues of America itself.—Exchange.

City Planning.

Primarily, city planning deals with real estate, with the streets which the people own, and with the ground on which they have erected their homes and places of business. We must realize that city real estate carries with it obligations as well as benefits. When citizens buy property they buy more than just so many feet of ground. They buy location, transportation, gas, electric light service, neighbors, good streets, proximity to parks or boulevards.

City planning is merely a co-ordination and conservation of these different elements which make up the value of property thus purchased by citizens contemplating residence in a given locality. A plan for a city, therefore, is quite like a plan for a residence. The latter has merely to do with an individual home, the former with a larger home—the city.—Exchange.

Towns With Zoning Regulations.

Sixty-seven cities of this country are reported to have some kind of zoning regulations now in effect, and 20 cities have complete comprehensive zone ordinances limiting the use of property, heights of buildings and area of lot that may be covered in every block within the city limits. Among cities adopting zoning during the last year are Milwaukee, Berkeley, Washington, D. C., Omaha, East Orange, Yonkers, Brockton, East Cleveland and a number of smaller cities.

From Sunshine to Storm.

"Mister, I have seen better days," began the wayfarer.

"They're always uncertain in spring," replied the man of the house.—Louisville Courier-Journal.

Sympathy is the very soul of life.

No man can make a mountain, but some men can make a big bluff.

Many a man who imagines that he is a wrestler can't even throw dice.

The greater the shortage in a man's accounts the longer it takes to find him.

You can't hold a skyscraper on a faulty foundation. Attend to the foundation first.

CATARRHAL DEAFNESS

is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

The Coming Contest.

"I see your town is going to vote on the question of issuing bonds for a water works system," said a guest. "What do you anticipate will be the outcome?"

"Hard to tell," replied the landlord of the tavern at Tumlinville, Ark. "The young people are mostly for it, and the folks that have traveled and like to show off, and the newcomers from the North, and so on. But the old-timers are unanimously ag'in it. They say they've never gone swimmin' in a house yet and it's too late now to learn old dogs new tricks, and, anyhow, they're opposed to paying for the privilege of going into Godalmighty's free water. So it looks like a standoff."—Kansas City Star.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

GIFTS FOR THE BRIDE

Never do a thing concerning the rectitude of which we are in doubt.—Pliny the Younger.

REMEMBER that wedding gifts are always sent addressed to the bride-to-be even though you may never have met her and you are a friend only of the bridegroom-to-be. If you receive invitations to the wedding or know of it before it occurs then the gift should always be sent before the ceremony and the present addressed in the bride's maiden name.

Silver and other articles to be marked with an initial should bear the first letter of the bride's maiden name, usually. There are, however, some young women who prefer to follow the continental European fashion and have their silver, etc., marked with their married initial. If you know this to be the case have your gift marked in this way.

If you do not know of the marriage until after it has occurred the gift should still be sent to the bride only, but it should of course be addressed to her married name.

A wedding gift may be something personal for the bride or something that is for both bride and groom as an article of household decoration or furnishing. It should never be something that is especially suitable for the bridegroom, as for instance, a smoking stand.

The understanding usually is that if you receive invitations simply to the wedding ceremony at the church no present is due, but that if you are invited to the house to the wedding or a wedding reception a present is in order. Now, it is never in reality bad form not to send a wedding present if you do not feel able or if you do not think enough about the persons from whom the invitation is received to wish to do so. If you do not send a present, however, simply through indifference, then do not attend the wedding party, but write timely regrets.

Even though you are not invited to the house or in fact are not invited to the wedding at all, if the one married is a dear friend you are quite right in sending a present if you wish to do so. In order not to give the bride something that she would not care for it is permissible to make inquiries concerning her wishes on the subject. It is better, perhaps, to make these through a third person and not to ask the bride personally, but rather a sister or close friend.

It is customary for the bridegroom to give the bride a present of some sort of jewelry on the occasion of the wedding, but this is by no means essential. The bride sometimes also makes the bridegroom a present at this time, but this is even less essential. In Persia the bridegroom gives the bride-to-be a present of two complete dresses, a ring and a mirror. In our own country the bridegroom must never make the bride a present of any part of her trousseau and, though he may give her jewelry that she wears on her wedding dress and her bouquet, he must supply no other part of her bridal array.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"HAVE WENT," "HAVE SAW."

"I SHOULD have went to the dance," said the girl, "but my mother would not let me." "I have traveled in many lands, but I have saw nothing like this," said the uneducated traveler. After the auxiliary verb "have," in any of its forms, it is proper to employ only the perfect participle of the principal verb; therefore, the girl should have said, "I should have gone to the dance," and the traveler should have said, "I have seen nothing like this."

"They have chose the wisest part" is an instance of this error cited by Goold Brown, the famous grammarian. The proper form of words to be employed is, "They have chosen the wisest part."

In this connection, it may be said, that this error is one of a large number which would be avoided with ease, were the speaker or writer to exercise a little care in the choice of words. But most of us speak or write hastily.

THE TRIALS OF A HOUSEWIFE

How They Have Been Endured and How Overcome by Lydia E. Pinkham's Vegetable Compound

Experience of a Providence Woman

Providence, R. I.—"I took Lydia E. Pinkham's Vegetable Compound for a female trouble and backache. It began just after my baby was born, and I did the best I could about getting my work done, but I had awful bearing-down pains so I could not stand on my feet. I read in the papers about Lydia E. Pinkham's Vegetable Compound and the good it was doing other women, and I have got dandy results from it and will always recommend it. You can use these facts as a testimonial if you wish."—Mrs. HERBERT L. CASSEN, 18 Meni Court, Providence, R. I.

Ohio woman for three years could hardly keep about and do her housework she was so ill. Made well by Lydia E. Pinkham's Vegetable Compound:

Fayette, O.—"For about three years I was very nervous and had backache, sideache, dragging-down pains, could not sleep at night, and had no appetite. At times I could hardly do my housework. I got medicine from the doctor but it did not help me. I saw Lydia E. Pinkham's Vegetable Compound advertised in a newspaper and took it with good results, and am now able to do my housework. I recommend your medicine to my friends and you may publish my testimonial."—Mrs. CHESTER A. BALL, R. 15, Fayette, Ohio.

An Illinois woman relates her experience:

Bloomington, Ill.—"I was never very strong and female trouble kept me so weak I had no interest in my housework. I had such a backache I could not cook a meal or sweep a room without raging with pain. Rubbing my back with alcohol sometimes eased the pain for a few hours, but did not stop it. I heard of Lydia E. Pinkham's Vegetable Compound, and six bottles of it have made me as strong and healthy as any woman; and I give my thanks to it for my health."—Mrs. J. A. MCQUITTY, 610 W. Walnut St., Bloomington, Ill.

The conditions described by Mrs. Cassen, Mrs. Ball, and Mrs. McQuitty will appeal to many women who struggle on with their daily tasks in just such conditions—in fact, it is said that the tragedy in the lives of some women is almost beyond belief. Day in and day out they slave in their homes for their families—and beside the daily routine of housework, often make clothes for themselves and for their children, or work in their gardens, all the while suffering from those awful bearing-down pains, backache, headaches, nervousness, the blues, and troubles which sap the very foundation of life until there comes a time when nature gives out and an operation seems inevitable. If such women would only profit by the experience of these three women, and remember that Lydia E. Pinkham's Vegetable Compound is the natural restorative for such conditions it may save them years of suffering and unhappiness.

There is hardly a neighborhood in any town or hamlet in the United States wherein some woman does not reside who has been restored to health by this famous medicine. Therefore ask your neighbor, and you will find in a great many cases that at some time or other she, too, has been benefited by taking it, and will recommend it to you. For more than forty years this old-fashioned root and herb medicine hasbeen restoring suffering women to health and strength.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Peters, of Omaha unced as the greatest six-horse team in the country, will be or the occasion. In this outfit anhoe and Blucher, winners of prizes than any other two horses known.

WIEGMANN—REUBER

The C. H. Weigmann home at Garner was the scene of a quiet wedding on last Thursday evening, September 15 at 5:30 o'clock when Miss Gladys, daughter of Mr. and Mrs. C. H. Weigmann was united in marriage to Dr. Roy Nelson Reuber of this city. Rev. A. H. Meyer of this city officiated.

Only the family an uncle and an aunt and grandmother of the bride were present to witness the ceremonies.

After the wedding Mrs. Weigmann ushered the party to the dinning room where she had plates laid for an elaborate dinner.

The Bride graduated from the Garner high school in 1917 and then went to the State College at Ames where she completed her course in Home Economics and received her degree this summer. She is a fine young lady with many accomplishments and will make an ideal home mate.

The Groom is a graduate of one of the leading medical schools of Canada, later taking a post graduate course at the Chicago University. He is a son of Mr. and Mrs. Henry Reuber of Hanover, Ontario. Canada and has practised medicine in Klemme for nearly two years with Dr. Zinn and recently buying the latter's interests here. "Doc" is a fine fellow and a worthy husband for the girl he has chosen as his wife.

We join the many friends of the couple in wishing them life's best.

JURY LIST

The following Petit Jurors were drawn to appear at the October term of Court on Tuesday October 18th at 9 o'clock A. M. This is the second week of the term. The Grand Jurors will appear for duty on Tuesday October 11th at 10:00 A. M. as usual, on the second day of the term.

HOMING PIGIONS RELEASED AT BRITT FOR LONG FLIGHT

BRITT, Sept., 20.—Agent C. C. Wiltse of the C. M. & St. P. turned loose two crates of homing pigions for their owner, William Rausche, of Milwaukee, allowing them to fly back to Milwaukee.

The racing of homing pigions is getting to be quite a sporting event in Milwaukee. When the pigions are turned loose here the agent telegraphs the owner the time of departure and when the pigions arrive home the time is checked. The number of miles traveled is known in advance. The record of each bird's flight is recorded on each trial trip and the swiftest flying pigions are kept for racing and breeding purposes while those showing les swiftness in flight are culled out. Britt and Spencer are the two Iowa points used by the Milwaukee ing less swiftness in flight are culled pigion clubs in their races.

Helping Hand

KLEMME PEOPLE DRAWN FOR JURY, OCTOBER TERM

Four Klemme people are drawn to appear on the jury for the Oct. Term, beginning Tuesday, Oct. 18. Three men and one woman are on the list from here. They are Albert Barz, Frank Looick, Fred Henschen and Mrs. Emma Meyer. (Wife of Rev A. H. Meyer.).

Klemme ladies are being drawn on nearly every jury and some have served.

GOLDEN WEDDING

Cards were received by relatives inviting them to attend the Fiftieth anniversary of te marriage of Rev. and Mrs. C. F. C. Suckow, of Philidelphia, Pa. Rev. Suckow is an only living brother of Grandpa Suckow of Klemme. Rev. Suckow visited relatives in and around Klemme about 22 years ago. He has been pastor of the Fifth Reformed church at Philidelphia the last 42 years and is still active in the work.

TOO MANY DEBTS

We have read of many accounts of late where farmers "went broke" and were compelled to take bankruptcy but we little dreamed that one of our Klemme farmers had come o nearly the same financial point.

Frank Glanville, who has been on the Ax farm a mile north of this town became engulfed in debt with no possible relief in sight and he undoubtedly figured that the easiest way out of the difficulty woul be to leave for parts unknown. This he did and with his family left in their car sometime last week, leaving the debts to look after themselves. He left crops, stock, machinery and all.

Stock and machinery will perhaps settle some of the largest accounts as he has about a hundred head of cattle, some hogs and horses. We understand his debts amount to several thousand dollars, but the approximate amount we have not learned.

Latest Dispatch From Every Part Of The State

Preparations are being made to pave 81 miles of highway in the vicinity of Dubuque.

School District No. 4. Big Creek township in Black Hawk county, has no pupils. There is no child of school age, 5 to 21 years living there.

C. W .Hunt, president Iowa Farm Bureau federation, addressed Washington township farmers at the Hampton fair grounds recently on the economic and industrial of the farming interests of the Hawkeye state.

While playing under a tree with several other children during a thunderstorm at Sidney recently, Leota Kearns, 7 year old, daughter of Mr. and Mrs. Ira Kearns, was killed by lightning. Her body was almost consumed by the high current which passed through it.

Leo, the 5-year old son of Mr. and Mrs. John Wellong, was killed instantly while playing in the yard at the rear of his father's pool hall in Struble. He was found in a pool of blood with his head crushed underneath an old counter which apparently had tipped over. Nobody saw the accident.

An attempt was made to rob the Cantril Savings Bank at Cantril, recently but failed because the robbers were unable to get into the vault or safe. They entered the bank through a rear door and damaged the vault by tearing out bricks around it. They escaped in a Ford.

Automobile census shows one motor vehicle for each five persons in Iowa. W. M. Calladay, superintendant of the state motor vehicle department, announced. The average in the United States as reported by the American Automobile Association it one to every 11 persons. On Aug. 1, 1921, 447,735 motor vehicles had registered for the year in Iowa, an increase of 31,000 over 1920.

Practically twenty-five cases of suspicious fire reported to the state fire marshall's office during the last few weeks have been under investigation and are being reported to county attorneys to be considered by the grand jurries. Last year 158 suspicious fires occurring in sixty counties were investigated and twenty one persons were placed under arrest and charged with arson.

Dancing and screaming with glee, a baby girl, the innocent cause of a fire in a street car at Council Bluffs and unconscious of its narrow escape from death, watched C. H. Keyes, a passenger, pulling himself over the grass on the parking to extinguish the blazing clothes. The child was playing in the middle of the car tracks and when seen by Motorman Charles Kyle, the car was too close upon it for the brakes to be effective. Endangering his own life and those of his passengers, he reversed the power of his car. The trolly stopped in time to save the child's life, but the sudden reversal of the current burned out the fuses and control boxes and Keyes was painfully burned.

Lieut. James Williams, an aviator must defend himself in court at Davenport because he violated a city ordinance that makes it an offence to fly over the business section of that city within 2,000 feet of the ground. All of which suggests that the next general assembly will be forced to pass measures regulating flying machines. A suit is pending in Lee county brot by a farmer because the team his wife was driving to Fort Madison ran away, frightened from the noise made by an airoplane flying very low. The woman was severly injured and heavy damages are asked. The airoplane has also projected the issue as to who owns the air. A land owner lays claim to everything that is in the earth beneath him. The question is whether or not he owns the sky above him.

Maybe you can fool some of the people all of the time—but not wives.

Ventura Boy Struck By Auto On Paving Sunday Dies

CARROLL — SCHULDT

Yesterday evening, Wednesday, September 21st, at 8:00 o'clock occurred the marriage of Miss Gladys Lurene Carroll, of Mason City, Iowa, to Mr. Henry F. Schuldt, of Klemme Iowa.

The wedding took place at the home of the bride's parents, Mr. and Mrs. J. H. Carroll of Mason City. The ceremony was witnessed by a large gathering of relatives and friends.

The groom is one of the popular young men of Klemme who is engaged in farming near town. He is the eldest son of Mrs. H. Schuldt of this city. and is a very fine young man who is ambitious and industrious.

The Bride is a daughter of Mr. and Mrs. J. H. Carroll of Mason City and is a talented young lady with a most pleasing disposition.

After a short honeymoon trip in Minnesota and Wisconsin, the young couple will go to housekeeping on the groom's farm and will be at home to their many friends about October first.

The Times extends congratulations

LETTER FROM KLEMME TOURISTS

Hay Springs, Neb.
Sept. 11, 1921.

Friend Jergey

As we hace reached Hay Springs, Neb.. I will send you a few lines as up to this date. We are still all well and happy. We reached this town today at 1:30 o'clock. So far we have had a very nice trip. The first day we made 71 miles and stoped 6 miles east of Emmetsburgh, Ia. second day at Taraber, Ia.. third day at Corerton Neb., fourth day at Randolf., fifth nite at Dorcy, Neb., sixth nite at Lynch Neb., seventh nite at Winner, S. D., eight nite at Cut Meek S. D.. ninth nite about twenty eight miles west of Martin, S. D., tenth day at Hay Springs, Neb., This is the way we traveled up to this date. The reason we drove in S. D. is because we had by far better roads otherwise we had to go through too many sand hills, and by going through S. D. we went clean through the Indian Reservations full length, for three days we never seen a train. The folks thought that was aufull. All we had was trails through the jungles.

So far we haven't done much fishing. I have only caught about 50 bull heads, and haven't seen any cayote, but seen one fox and one prairie chicken. We have seen lots of ducks, but they are very strict in these states about hunting. We are at Chas. brother, Lew. now and I guess we will stay here for a couple of days or more. Then I think we will hit for Cheyenne, Wy., next. Then to Salt Lake City. As far as Hay Springs we have made 767 miles

We average a little over 70 miles per day, but that's a good way to see the country, I wish we could have gone through the Black Hills, S. D. It sure is lots of fun for me. I read all the signs and watch the main roads and also shoot chicken hawks Well Jergie, we wish all the Klemme people good luck and tell the boy's "Hello". I'll write again in about ten days.

So Long,
Kuck, Stiehl & Family.

BIG WRESTLING MATCH NEXT WEDNESDAY NIGHT

The big wrestling event of the season will be held next Wednesday night at the Idle Hour theatre when Martin Jensen will meet Hans Willer the champion of Hancock county.

Willer holds the championship of the county and has defeated all comers. He is a good clean wrestler and works fast all the time.

Jensen is an "old timer" in the wrestling game and has defeated many good wrestlers and will be a good match for Willer.

The promoters also have lined up some good preliminaries for the mat program next Wednesday night.

If you are interested in wrestling then you should see this match as it promises to be a fast one as both are artists.

VENTRUA BOY DIES ON PAVEMENT WHEN AUTO HITS BICYCLE

Companion Escapes; Father Exhonerates Undertaker From Garner

James Ritchie, 13 year old, son of John Ritche, farmer and teamster residing at Ventura, died en-route to hospital at Clear Lake at dusk Sunday evening following the collision of the bicycle he was riding towards Clear Lake with a Ford auto driven by Rex Shannon, Undertaker at Garner. near the Prescott farm driveway just this side of Ventura on the primary road pavement.

Shannon has been completely exhonorated of all blame in the connection with the boy's death, according to the witnesses of the accident. The dead lad wih a companion Harold Kaster of Ventura also on a wheel, was riding behind a Ford driven by a woman and had been holding on to the fender as the car was going slowly. Just as the Shannon car approached he let loose his grip on the fender and the two boys emerged on the pavement directly in front of the on coming driver, who until that moment had not seen them.

Young Kaster was able to swerve and take the ditch where he fell off his wheel and was unhurt beyond minor bruises and scratches. But the Ritchie boy was not so fortunate his bicycle hitting the rear fender of the Shannon car throwing him to the pavement. The car did not pas over his body, but his head caved in as the result of the terrific impact with which he struck the pavement

Holds Boy in His Arms

Joe Holub, of Mason City, employed at the Peoples Gas and Electric Company and Henry Lewis of Klemme in another car, arrived on the scene within a few seconds after the boy was hit. Holub rushed to the boy and picked him up in his arms and held him, the streaming over his arms and clothing on the pavement. The boy gasped twice and then it is believed died, for he immediately relapsed into a state of coma from which he failed to emerge upon arrival to the hospital at Clear Lake where he was taken in the Klemme man's car after Holup had thrown a blanket over him.

With Mr. Shannon in his car at the time of the accident were his wife and family and friend. They stopped immediately and did all in their power to help, Shannon going on to Clear Lake and entering the hospital with the boy's body. The story told by the lad's companion on the other wheel, Harold Kastor, also exhonorated Shannon and John Richie, father of the dead boy stated last night according to the physician at the North Iowa clinic here who was at the Clear Lake hospital when the body was brought in, that he believed the Garner Undertaker was in no way the blame for the death of his son.

Sheriff F. E. Marsh was notified of the death Sunday night. Coroner W. E. Long was not called. There probably be no inquest held.

The bicycle ridden by the Ritchie boy was completely wrecked. It was stated today that it was believed that his handlebars were loose and that they might have been responsible for his having lost control of the wheel.

In July, another son, Keith, was run down by an unknown auto driver and was seriously injured. For a time it was thought he would die. He has just recovered from his injuries. The driver of the car was never found.

The government will soon radically change the form of its paper money, which has remained unaltered almost since the foundation of the republic. Economy is the primary reason for the change. The paper which is now being used, because of a secret process in the possession of the Crane Paper Mills of Dalton Mass., is only objectibnable at the high cost. The new bills will be about three-fourths the size of those now in use.—Herald Press

New Laws Cut Hunting Season

Bag Limit Now Includes Birds Killed by Persons Assisting the Hunters.

AIRPLANE SHOOTING BARRED

Tendency to Tighten Restrictions on Hunting of Birds and Big Game Is Shown in Federal and State Laws for 1921.

Washington.—A tendency to tighten the restrictions on the hunting of birds and big game is noted in the game laws for 1921, a summary of which, both federal and state, has been compiled by the federal biological survey. Among the notable changes made during the present year was the amending of the migratory bird treaty act regulations with respect to bag limits.

This amendment provides that the daily bag limit of any person shall now include "all birds taken by any other person who for hire accompanies or assists him in taking migratory birds." This will put an end to the abuse of privileges under the regulations regarding the prescribed daily bag limits by persons who claim that birds were killed by guides accompanying them.

Waterfowl Season.

The federal waterfowl season for California was fixed from October 1 to January 15, replacing the old season of October 16 to January 31, the season now being the same under both federal and state laws. Regulation 9, governing the issuance of federal scientific permits, was amended to permit the issuance of limited and special permits.

State legislation harmonized federal and state laws on waterfowl and shore birds in Kansas and Oregon, and on waterfowl in Pennsylvania and Rhode Island; Washington prescribed a statewide open season on all migratory game birds from October 1 to January 15, thus deviating from the federal regulations, which supersede the state law, east of the Cascade mountains, where it will now be possible to hunt migratory game birds only from October 1 to December 31, without violating either federal or state law; in Idaho the open season on migratory game birds has been shortened under state law two weeks by opening October 1, instead of September 16, and extending to December 31.

Idaho, Kansas, Montana, Nebraska, Oregon and Washington enacted legislation similar to the federal regulation prohibiting hunting from airplanes. Colorado reduced the bag limit on ducks from 20 to 15 a day, while Kansas increased the limit from 20 to 25. In New Jersey reedbirds were protected at all times by being placed in the nongame class. The open season for woodcock was shortened 25 days in Michigan, two weeks in New York and one month in Vermont. Doves were protected until 1924 in Colorado, and in Kansas an open season on them was provided from September 1 to October 15.

In general, seasons on big game were shortened and hunting further restricted. Buck laws were enacted in Michigan, Montana, Nevada, North Dakota, South Dakota, Vermont and in Washington east of the Cascades. Maine protected spike bucks and prescribed that one of the two deer allowed in the eight northern counties must be an antlered buck, and provided that in two of the counties only residents may hunt deer during the last two weeks of the open season. Bull moose were protected for five years in Maine.

Mother Says Her Lot Justifies Profanity

Arraigned on a charge of profanity, Mrs. Agnes White of Columbus, O., thirty-seven years old, and the mother of 14 children, said:

"Judge, anybody that had to live as hard a life as I do, would cuss."

Mrs. White testified that she was forced to take in washing and other work to support herself and her children. The judge dismissed her, after telling her to go and curse no more.

Home Gardening Beats Golf.

Detroit, Mich.—Thousands of Detroiters who acquired the gardening habit during the war have continued the practice of making and tending patches of vegetables and small fruits until it has become a hobby with a large proportion of men here. More interest is being taken in gardening than in golf, baseball or other sports during the summer months, according to those who have made a study of the situation.

Seek Mystery of Cahokia Mound

Prof. W. K. Moorehead to Open Illinois Relic of Prehistoric Inhabitants.

WORK SIMILAR TO THE AZTECS

Exploration May Develop Information of Surpassing Interest to Archaeologists—Greatest Structure of Kind in World.

East St. Louis, Ill.—Probing of the mysteries of the great Cahokia mound near this city has been begun by Prof. Warren K. Moorehead of Andover, Mass., upon the suggestion of the Smithsonian institution, universities and scientific associations. With a corps of experienced assistants he will open Cahokia and the chain of 72 other mounds in Madison and St. Clair counties which furnish the most remarkable memorials of North America. Exploration may develop information of surpassing interest and value to archaeologists.

Covering 16 acres, the Cahokia mound, which is 100 feet in height, is the greatest structure of its kind in the world. It was supposedly a religious temple. Archaeologists estimate that the settlement of the mound builders numbered not less than 150,000 inhabitants at the height of its prosperity.

At First Agriculturists.

The size of the settlement site, as it can be imagined from the ruins, the agricultural type of much of the work in flint, such as the great spades and hoes almost peculiar to that vicinity, and the rich alluvial bottomland combine to show that the Cahokians were probably at first agriculturists. They probably fished and hunted to some extent, but they, doubtless, depended for their subsistence upon their labor in the field and their staple food was unquestionably corn.

It is believed that the appearance of the bison resulted in the abandonment of agriculture and the development of the chase, with the result that the community became nomadic and gradually crumbled and dispersed to the four quarters of the continent.

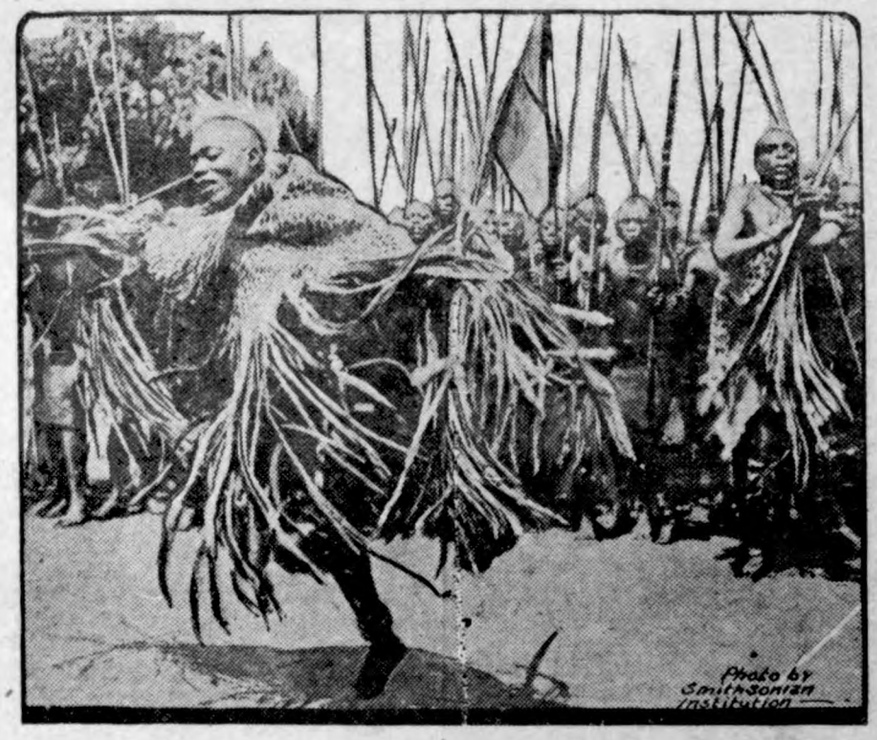
Believed to Have Come From Mexico.

The preponderance of evidence so far discovered is that the people of Cahokia were worshipers of the sun. There is so much about Cahokia that is similar to the works of the Aztecs that the conviction is forced upon the student that it was from Mexico that these people came to the Mississippi valley, bringing their religion, their priesthood, their corn, their mode of life and their middle order of primitive civilization.

Even if the exploration of the Cahokia mound is not followed by any important discoveries, it is certain that the control by the state will be given greater momentum when the people of Illinois are brought to a realization of its archaeological value.

Up to the present time the Cahokia and other table-like turmuli in the group have not been explored much more deeply than the plow and spade can work.

Wahutu Tribesmen Fine Dancers



Wahutu tribesmen dancing at Nyanza on the shores of Lake Tanganika, Africa. Their voices, jingling bells on the ankles and stamping feet add to the excitement of the scene. The Wahutu are considered great dancers. This interesting photograph was made by H. C. Raven of the Smithsonian institution expedition to Africa.

HOLDS HEART, PATIENT DIES

Surgeon at Clinic in Switzerland Criticized by Students for Unusual Act.

Geneva, Switzerland.—The cantonal government has ordered an inquiry into an extraordinary operation performed by the chief surgeon at a hospital, who extracted the heart from a man named Pasche.

Pasche shot himself, the bullet piercing his heart. The surgeon spoke for 20 minutes to the horrified students with the live heart in his hands.

At the end of the lecture, when the man was dead, the students protested to the surgeon, who dismissed their objections with the remark that the patient would have died anyhow within a few hours.

Authorities are not satisfied with this explanation, while the victim's relatives think of bringing a civil action for damages.

DOG LEADS WAY IN BOOZE RAID

Scotch Terrier With Nose for Hootch Helps Enforcement Agents Uncover Still

EASY FOR TRUCKMEN

Disguise Found Infallible in Inducing Bartender to Become "Reasonable"—At Least New York Sleuths Find It That Way.

New York.—If one is thirsty and desires to buy a drink get a truckman's disguise, put the feed box on the family mare in front of a wet spot, saunter in and the bartender will immediately become "reasonable."

That theory became a fact when "Izzy" Einstein, federal rum sleuth, accompanied by Moe Smith, Peter Reagar and a Scotch terrier, drove up in a truck in front of the Louis Romeo stables, 72 West Ninth street, Brooklyn. Years ago Einstein was a bartender and later a chauffeur in the Delancy street neighborhood.

"Romeo, my name is Julietta. Should you have a drink, ain't it?" the unkempt driver suggested to the stable owner.

"Sure I thought you were the junkman," said Romeo.

Dog Gets Busy.

The Scotch terrier then ran into a stall, the three "truckmen" and Romeo following. The dog whined, as if begging for food. Behind the stall was found a cave twenty feet long, in which was a large still and twenty gallons of some kind of strong smelling liquor. During the removal of the still and moonshine a large crowd gathered.

"Good for you, Izzy; it was bad hooch, anyway," somebody shouted.

The raid was made by order of Federal District Attorney LeRoy W. Ross, who had received an anonymous communication that the premises were being used in which to sell liquor. The letter complained that women as well as men were being poisoned by obtaining moonshine in the stable. Romeo was arrested.

The Dog Whined.

The truck then stopped in front of the saloon of John Sullivan, 579 Smith street. The feed bags were again put on the horses, the three "truckmen" entering the place, where it is alleged Sullivan served them three drinks of whiskey at 50 cents each. A quantity of whiskey was found concealed in a safe in the rear room.

Mrs. Bertha Weber of 426 East Seventy-ninth street was held in $1,000 bail by Magistrate William A. Sweetser in the Yorkville court on the charge of owning a large still and peddling whiskey in a baby carriage.

"KISS SHOWER" PARTS THEM

Wife of Indiana Man Didn't Like Too Much Affection and He Gets Divorce.

Richmond, Ind.—Lack of kisses has often been assigned as a reason for a legal separation of marital ties, but it remained for Samuel W. Ketron to allege that the abundance of kisses caused his wife, Minnie P. Ketron, to desert him.

"One day I grabbed her, and it sure did make her mad," he testified in Circuit court when his complaint was heard.

"When I returned that night she was gone. She did not want me to make love to her." He said his wife was living in Dayton, Ohio, now. Circuit Judge Bond granted a divorce decree.

Wooden Leg Saves Life.

St. Joseph, Mo.—A wooden leg saved the life of George Smith, fifty-two, owner of a houseboat on the Missouri river. When the boat capsized the artificial leg was caught in a door of the little vessel. In a frantic effort to escape, he battered the wooden leg with an iron rod until he broke it, effecting his release. His escapade was enacted under the water.

TWO WOMEN BURN SELVES AND BABIES

Tragedy Attributed to Demand They Give Up Charges to Care of Grandmother.

Cleveland.—Believed to have been crazed by their love for two babies left with them as boarders and who were about to be taken from them, two women of this city destroyed themselves and the children on a bed which they deliberately set afire in their home.

The women were Mrs. Eliza Moselman, a wealthy widow, seventy years old, and her daughter, Tillie, thirty-seven. Both were eccentric, the police say.

The baby victims were Helen Stankovich, three years old, and her two-year-old brother, Felix.

Clutching the helpless children in their arms, the two women set the bed afire, police say the evidence shows, and when a neighbor managed to break his way into the bedroom, through locked doors, the four burned bodies were found on the bed, the arms of the women encircling the babies. The room was damaged but little. The iron bed was red hot and all the bed clothing had been burned away.

Set the Bed Afire.

The children, who were motherless, had been left temporarily with the women by their father, John Stankovich, a former tenant, when he went to Virginia to work on July 1.

Today Mrs. Moselman received a letter from the children's father asking her to give his babies into the care of their grandmother, Mrs. Theresa White. It was this letter, police believe, that prompted the tragedy.

KILLS EAGLE ATTACKING BABY

Father Battles Bird Determined to Have Ten-Months-Old Child as Prey.

Butte, Mont.—While picking berries at a Sunday school picnic south of Butte this afternoon, Albert Pierce fought with and killed an eagle that attacked his ten-mouths-old baby, which he was holding under one arm. The bird, measuring four feet from tip to tip, seemed determined to have his prey, which in the clash was dropped into the grass.

The father, after beating off the attack first with a rock, seized a heavy stick and killed the eagle after a fight lasting ten minutes. The baby was uninjured, but the father's face was badly scratched and bruised. The bird was brought home as a trophy.

Fearing Famine, Pastor Buries 2 Tons of Food

Santa Ana, Cal.—The discovery of two tons of food, securely cased and buried deep in a canyon near here, caused an investigation by Sheriff C. E. Jackson.

The sheriff said he found the cache had been made by a local preacher and two members of his congregation, who explained they had acted on a Biblical passage that they believed foretold a time of famine. The sheriff declined to give their names.

FEARS GALLOWS HUBBY BUILT

Wife Says Spouse Threatened to Hang Himself on Gibbet Which He Erected on Farm.

Omaha, Neb.—Mrs. Ruth Wellensiek, wife of William Wellensiek, a wealthy farmer living near Beatrice, Neb., has filed suit for divorce, alleging that her husband had constructed a regulation gallows on the farm near their house, upon which he told her he intended taking his life.

Grasshoppers Committed Suicide.

Three Rivers, Can.—Tens of thousands of dead grasshoppers floated down the St. Lawrence river recently. At this place the insects covered the river from bank to bank. Agriculturists advanced the suicide theory. They explained that, having eaten everything behind them, the horde approached the river, failed to negotiate the broad jump and plunged ahead to their death.

625,000 BOTTLES SOLD IN NEW YORK

Biggest Thing of Kind Ever Seen in That State, Declares Big Wholesaler.

The fact that 625,000 bottles of Tanlac have been sold in the state of New York since its introduction there less than one year ago, is a big business item that will attract unusual attention throughout the entire East, for nothing like it has ever happened before. It breaks all records.

Mr. George B. Evans, manager of the Gibson-Snow Company, the well known wholesale druggists, with branches in Albany, Buffalo, Rochester and Syracuse, recently announced that the preparation was now selling in their trade territories alone at the phenomenal rate of approximately 500,000 bottles a year.

"If the present rate continues," said Mr. Evans, "this state alone will probably require considerably over 750,000 bottles a year. This is a tremendous figure, but I am really conservative in making this statement."

Tanlac is sold by leading druggists everywhere.—Advertisement.

Just a Rehearsal.

"Vampire!"

"Wretch, out of my sight!"

"I was a man when I met you."

"You're a worm now!"

"Gosh!" exclaimed the leading man as he paused to mop his brow, "this is warm work."

"We're not getting a nickel for this either," groaned the leading lady.—Birmingham Age-Herald.

CATARRHAL DEAFNESS

is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Circulars free. All Druggists.

F. J. Cheney & Co., Toledo, Ohio.—Advertisement.

Doesn't Mean Anything.

Creditor—Is Mr. Perkins home?

Maid—No, sir.

Creditor—But I see his hat and coat hanging on the hall tree.

Maid—That doesn't mean anything; my dress is hanging on the clothes line in the yard, but I'm not there.

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

A Double Reply.

Husband—What's your opinion of matrimony?

Slangy Wife—You've got me!—Inside Tales.

Weak and Miserable?

Does the least exertion tire you out? Feel "blue" and worried and have dull backache, lameness, headaches, dizziness, and kidney irregularities? Sick kidneys are often to blame for this unhappy state. You must act quickly to prevent more serious trouble. Use *Doan's Kidney Pills*, the remedy recommended everywhere by grateful users. *Ask your neighbor!*

An Iowa Case

Mrs. L. C. Johnson, 302 N. Washington St., Anamosa, Iowa, says: "Whenever I caught cold it settled on my kidneys. I would have sharp, cutting pains in the small of my back. I had dizzy spells and would feel as if I was going to faint. After using a couple of boxes of Doan's Kidney Pills I was given a lasting cure."

MARITAL LIFE ONE OF SURPRISES

His Nuptial Race Not "for Maidens" but "Previous Winners."

Instead of Getting Widow With One Child, Got Woman With Seven Children and Two Husbands.

New York.—Meyer Mauer's marital life was just one surprise after another.

He told the Supreme court about it when he asked for an annulment of the match and recited the list of unexpected events that came to him after he was duly wed.

When he married Becky Mauer, he says, she represented herself as a widow with one child. Surprise No. 1—Another child came to the home, calling his wife "mamma."

Surprise No. 2—Second child came along later, also child of wife.

"How come?" asked Meyer. "Thought you only had one child?"

"Oh, I merely forgot to tell you about this one," said his wife.

Surprise No. 3—Third child, also added starter, comes along to live with mother.

Surprise No. 4—Fourth unheralded infant adds itself to home circle.

"How much of a family have I?" asked Meyer.

Surprise No. 5—"There are two more," said the missus, and the family grew from the one listed child to seven.

Surprise No. 6—Meyer discovered that Mrs. Mauer had two other living husbands and then he decided to let the Supreme court put an end to his family surprise party.

"It is a case of fraud and misrepresentation," he said in asking annulment. "Here I thought I was getting a widow with one child and I find that I got a woman with seven children and two husbands."

The word reverend occurs only once in the Old Testament.

KING BARS CREAM HORSES

Famous British Hackneys Grow Too Small, Owing to Inbreeding.

London.—The famous six cream ponies, which were formerly part of the state pageantry of London, will never appear again drawing the royal coach through the London streets, as, owing to inbreeding, the stock has grown too small for ceremonial purposes and their places have been taken by the "royal blacks."

The stock of creams, however, will not be allowed to die out altogether, for the king has presented them to the army council, and in future they will be used as cavalry drum horses.

O. K." Barnyard Golf" Sunday.

Lincoln, Neb.—Sitting as a court, the Lincoln city council decided the game of horseshoes on Sunday is not a desecration of the Sabbath and is lawful. The action followed the arrest and fining of boys indulging in the game on Sunday at the suburban town of University Place.

The SANDMAN STORY

THE FIREFLIES

E night when the fairies came
campering out to play at the
ast sound of the last stroke of
ht they found their queen talk-
th a moonbeam fairy.
ad of joining in the revels as
r custom, she kept on with her
ith the little silvery fairy who
to have much to tell her.
the heltering, skeltering little
were tumbling over one another
me of tag with the Dust Fairies,
e Water Fairies were flying
and thither playing at hide and

after a while they began to
what the Moonbeam Fairy was

the Queen, and when she beck-
to them, as she did just then,
n to her side eager to listen to
he little visitor was saying.
was last night that I decided to
u about them," the Moonbeam
was saying, "for I did not know
how lonely they are."
w would you like some new play-
" asked the Queen when the
gathered around her. "Moon-
Fairy has been telling me about
ar Fairies who watch us all
here and want to visit us at
nd join in our revels."
y are very bright little crea-
said the Moonbeam Fairy, "but
they are very lonely for you. See, even the Moonbeam Fairies run down on the earth at night and they have no one up there to visit.

"So I stopped on my way home last night to chat with them awhile and it was then they asked me if I thought the Queen would take them into her big family and let them run down the Moonbeam path with us each night to the earth."

"What do you say, my children?" asked the Queen. "Shall we welcome the Star Fairies into our family?"

"Oh, yes, dear Queen, let them come," said all the little Fairies, clapping their hands and dancing about their Queen; "and why not send for them tonight while the Moonbeam path is bright and then they will not trip coming along?"

"Very well," said the Queen, "tell the Star Fairies that I will welcome them for the summer months. That is when we have our gayest revels."

So the little Moonbeam Fairy hastened away to tell the lonely little Star Fairies the good news, and down they came flickering and twinkling with joy over their good fortune.

All this happened a very long, long time ago, and if you have any doubt about this story being a really truly true one watch the stars smiling up in the sky as the Star Fairies fly hither and thither during the summer for though we mortals call them fireflies, the Earth Fairies call them their friends from far-away Land, the Star Fairies.

Viola Dana

Perhaps out of consideration of the feelings of her parents, Viola Dana, the dainty star, waited until she was quite grown up before going on the stage. Her first public appearance—she made her debut as a dancer—did not come, therefore, until Miss Dana was fully five years old. She was born in Brooklyn; has two sisters, both on the screen—Shirley Mason and Edna Flugrath.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

CHILDREN'S MANNERS

Whatever you do, do wisely and think of the consequences.—Lester Romanoun.

THE minute a child begins to eat with the assistance of its own small hands, the first lesson in table manners must begin. There is little excuse for the disgusting table manners of some children. They are due, really, to the fact that the mother or other caretaker finds it less trouble to let the child search aimlessly for its small mouth than to insist that it locate it daintily, surely and without experiment.

A very small child can be taught to eat nicely. Teach it that spotted bibs are beneath contempt. Patiently show it how to hold its spoon and cup, and help to eat slowly. The lesson is a hard one for the teacher as well as for the child. But perseverance is the only way. And once the child has learned to eat daintily, the slovenly ways of untrained children when they are eating will be as distasteful to it as you would find them in a grown person.

Remember that children ape the manners of their elders. For this reason the greatest care should be used in the choosing of nursemaids, governesses or any one else who comes in constant contact with the child. Many well known men have talked, when excited, to their dying day in the brogue or burr of their childhood nurses.

And who can doubt that much of the gentleness of character and strength of spirit of Robert Louis Stevenson were inspired in him by the dear old nurse to whom he dedicated his "Child's Garden of Verse?"

The imitative method is the easiest whereby a child may acquire its manners. The small boy who adores his gallant father seldom forgets to take off his hat and stand in the presence of women. The small girl who looks up to her mother with affection is the pattern of loving courtesy to her father. Children often affect the graces of their elders in a most laughable way. But don't laugh at them. They will outgrow this priggishness. It is only a case of their imitative acquisition of manners.

It is the vogue of the day for small girls, up to the age of ten or twelve, to curtsy when they meet their elders. After that they, like small boys, stand and shake hands. It is also proper for children to be quiet and unobtrusive when they are in the company of grown-ups.

Some of the set rules of children's manners, like these, they cannot learn by imitation. But if they are courteous, thoughtful and happy they will take an interest in acquiring these little superficial manners that will make their acquisition easy.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"DIFFERENT FROM, THAN, TO."

IT IS quite common to hear or read sentences containing the word "different" followed by from, and never by than or to. One hears, "Yours is a very different case than his," whereas the proper form is "Yours is a very different case from his." One hears also, "I have heard your story, and John's is different to it;" correctly, "John's is diffeernt from it," or "differs from it." The Standard dictionary says that the use of different to is an undesirable English colloquialism.

The word "different" denotes distinction or contrast (indicated by the use of from), while comparison is shown by than; thus, "My hat is different from yours, but your hat is better than mine." (Copyright.)

FARM POULTRY

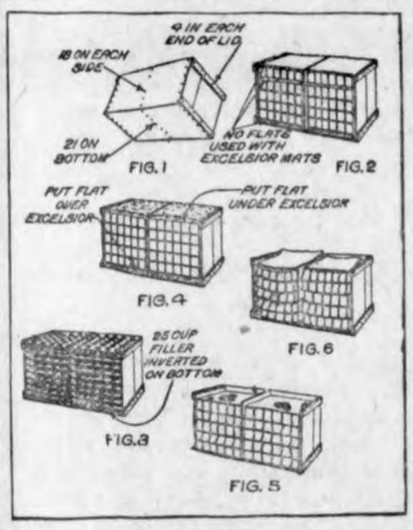
PREVENT BREAKAGE OF EGGS

Plans for Making Better Crates for Shipping Have Been Worked Out by Specialists.

(Prepared by the United States Department of Agriculture.)

"Handling Eggs for Profit" is the title of a little mimeographed circular issued by the food research laboratory of the bureau of chemistry, United States Department of Agriculture, which gives directions and drawings for the construction of egg cases and outlines methods for packing the eggs so as to reduce loss from breakage while in transit from the producers to consuming centers.

The specialists in the food research laboratory have made a study of methods for packing and shipping eggs in order to reduce the great losses from breakage that have occurred in the past. This work has been done in all parts of the country in co-operation with railroads and with egg shippers.



The Right Method of Nailing Crates Is Shown in Fig. 1, Proper Methods of Packing in Fig 2, 3 and 4—Poorly Made and Packed Crates Are Shown in Figs. 5 and 6.

Experimental shipments in different kinds of shipping cases and with the different methods of packing the eggs in the cases have been made and the results compared. An instrument has been devised for measuring and recording the shocks to which cars containing eggs were subjected while in transit.

As a result of these experiments the specialists have recommended methods of packing eggs which reduce breakage to a minimum. These methods have been tried under a great variety of conditions, and have been incorporated as requirements in the railroad and express classifications for the transportation of eggs.

Nails in place save claims, it is tersely said; and, as shown in figure 1, the number and arrangement of these necessary in order to conform with the requirements of the express and consolidated freight classifications are as follows:

Threepenny nails, cement coated, with large heads.

18 nails for each side, 6 for each end, 6 in center.

21 nails for bottom, 7 in each end, 7 in center.

8 nails for top, 4 in each end, for flush cleat.

6 nails for top, 3 in each end, for drop cleat.

Egg packers are advised to be sure that they use the correct number of nails.

When 6 paper-covered excelsior mats are used, flats should not be placed between the mats and the fillers. When cupped trays made of compressed pulp are employed, it is best to begin by placing one 25-cup filler, receiving side downward, on the bottom of the case. Then place one 16-cup filler, receiving side upward on top, nesting it. Fill the cups with eggs and cover with one 16-cup filler. Then place one 25-cup filler, receiving side upward; fill cups with eggs and cover with a 25-cup filler.

Improper packing invites breakage, and figure 5 illustrates a poorly packed case. Sometimes an extremely thin layer of excelsior, many times a small amount of loose paper, or perhaps nothing at all is placed on the top and bottom, leaving the case loosely packed and the chances for breakage and loss are great. Very frequently such poorly packed cases have broken and stained fillers and flats, and such a combination greatly increases the probability of damage.

POULTRY NOTES

Fresh filling for nest boxes every month is none too often.

• • •

Don't expect 200-egg pullets from 100-egg hens. Remember that "like begets like."

• • •

Lice, dampness and overfeeding are responsible for the greater part of the heavy mortality in young stock.

• • •

Improve the quality of your flocks by purchasing some good fowls from a heavy-laying strain of pure-breds. It will be money well spent.

• • •

The best way to kill off lice is to prevent them from getting a start. This is much easier than it is to give them a chance and then fight them afterward.

MIGHT BE WORSE

By BELLE HALL.

© 1921, by McClure Newspaper Syndicate.

The cook was "peeved." The mayonnaise had separated and it took the whole white of the egg, added drop by drop, to bring it back to its correct creamy thickness.

The kitchen registered 99 degrees at the carving table, its coolest corner, and cook surveyed her puffed and aching ankles with eyes that blurred.

"Getting absolutely flat-footed in this confounded place," she raved inwardly, as she gave the luncheon card a vicious thrust back on its nail and took down the dinner menu.

"Father's and mother's twenty-fifth anniversary," the daughter of the house, a bride of a month, had written facetiously over the line: "Dinner for 12 at 8:30."

"Twenty-five years—isn't it thrilling!" she had smiled at cook, tapping her tiny teeth with her pencil as she calculated just how many oddly delicious things she could manage to crowd onto one slip of paper, for daughter was practicing the menu part of housekeeping just now in mother's house before she went into her own home on her return from abroad.

"Twenty-five years! Thrilling! Humph!" As she chilled and glazed and meringued the dinner for 12, back along the years the cook's mind traveled to another seething summer day—another home not so very much more simple after all, but yet her own, where she had waited with mother and laughing bridesmaids by her side, tearful but happy, for the one man to lead her down to the waiting minister, the relatives and friends.

Over them all, her thoughts raced back—the struggling years, the full years, the lean years, the lonely years, the well-worn years—her self pity growing stronger and stronger, and through it all the thermometer mounted and the dinner for 12 progressed, until at 5:30 cook dropped into the chair with a final growl at the little kitchen maid: "Now, let them rave on, kid; we'll be ready."

"Fine!" ventured little Maggie, brightening visibly at the first nearly pleasant word that had emanated from her top boss that day.

"Listen, cook, let's joy ride over with John when he takes Bridget home—will yer?"

"Joy ride—do I look like a joy ride?" snarled the cook. "And what are those pans?"

"Them are the clean pans for the milk. Come on, will yer?"

"Yes, I'll go."

"We'll make him drive us home by the crazy folks' house, the longest way round," whispered Maggie to cook, and then—"Will yer?" she called to John when he came out from the tiny grocery, where he had gone for yeast cakes, after leaving the laundress at her door.

"Will yer?"

"All she can say is 'Will yer,'" shouted cook, above the cranking of the servants' Lizzie-mobile—"Have you time?"

"Yes," said good-natured John, comfortably, "I guess so. The boys will start the milking."

Down the shady country road they chugged along the gardens of the state infirmary.

Just now work for the day was over. In groups under the shade trees the old men waited the call for supper. The boys played a random game of ball. The women, sullen and indifferent, trooped down the walk from the laundry.

John guided the car through the gates and drove slowly round the driveways, past the big stone buildings.

Cook, growing cooler in the soft haze of the June afternoon, forgetting for the moment to look inward and backward, gazed out thoughtfully at the blue denim clad figures.

Cook's kitchen with its diversity of daily troubles, began by contrast to take on a roseate hue.

"Don't they never go out, John? Are the doors all locked on 'em? What's the bars for?" piped Maggie, bouncing from side to side trying to look everywhere at once.

"Behind the bars are the very worst cases," John told her, "the hopeless ones and the violent ones. And that's the hospital."

How much she had to be thankful for, cook's thoughts ran on—her health and earning capacity, her strength and active mentality. Even memory became sweet, as, one by one, the blank faces passed in review.

"Look at all the children? Where do they all come from? Can't they ever get out? Gee, they all look like you do when you're awful mad, cook. Are we going out this gate? Gee, I'm glad we're going out an' we ain't lame nor blind nor sick nor nuthin'; ain't you, cook?"

With every tired nerve relaxed and every scowling frown erased, bearing proudly a new lease of life, a breathless, laughing cook raced with a skipping kitchen girl through the woodhouse into the steaming kitchen, flipped up the linen to test the Parker House rolls raising by the side of the range; basted the chickens and turned them over, and as she tightened the belt of her apron and started to garnish the cooling hash, she said softly to herself:

"Always—it might be worse!"

WOMEN WHO CANNOT WORK

Read Mrs. Corley's Letter and Benefit by Her Experience

Edmund, S.C.—"I was run down with nervousness and female trouble and suffered every month. I was not able to do any work and tried a lot of medicine, but got no relief. I saw your medicine advertised in a little book that was thrown in my door, and I had not taken two bottles of Lydia E. Pinkham's Vegetable Compound before I could see it was helping me. I am keeping house now and am able to do all of my work. I cannot say enough for your medicine. It has done more for me than any doctor. I have not paper enough to tell you how much it has done for me and for my friends. You may print this letter if you wish." — ELIZABETH C. CORLEY, care of A. P. Corley, Edmund, S. C.

Ability to stand the strain of work is the privilege of the strong and healthy, but how our hearts ache for the weak and sickly women struggling with their daily rounds of household duties, with backaches, headaches, nervousness and almost every movement brings a new pain. Why will not the mass of letters from women all over this country, which we have been publishing, convince such women that Lydia E. Pinkham's Vegetable Compound will help them just as surely as it did Mrs. Corley?

DRAINAGE NOTICE

Hearing on Establishment of Drainage District No. 111, petitioned for by William J. Schlawin, et al.

To Charles Medaus, F. H. Ridder, Danial Webner, Peter Merkel, The Travelres Insurance Company, W. R. Bloom, State Savings Bank of Klemme, Iowa, William J. Schlawin, Aetna Life Insurance Company, Trustees of Ell Township, and Peter Josten Twp. Clerk, and to all other persons in any way interested in any of the following described real estate situated in said district Hancock County, Iowa.

NW SE; SW SE; SE SW; NE SW; SW SW All in Section 26-95-23 - NW NE; NE NW; NW NW all in Section 35-95-23 and all roads and highways included within watershed of the district.

You and each of you are hereby notified that on March 23rd 1920 there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district and that a system of drains be constructed for the relief of said district.

You are further notified that on June 7th 1920 A. J. Lilly was appointed engineer to make a survey, plat, and profile and field notes of said proposed district, and that on Jan. 4th 1921 said engineer filed his report, recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said County and may be amended at any time before final action is taken thereof by the Board of Supervisors, and that Oct. 20th 1921 at 10:00 o'clock A. M. has been fixed as the time of hearing thereon. All objections and claim for damages must be filed in the office of the County Auditor not less than five days before said day of hearing.

Witness my hand and official seal at Garner, Iowa, this 8th day of Sept. 1921.

SEAL Chris Jacobs,
Auditor of Hancock County.
S-15-2w.

NOTICE OF EXPIRATION

To J. M. Bauman, the person assessed.

You are Hereby Notified that the following described real estate, situated in Hancock County, Iowa, to-wit:

Lot Seventeen (17) in Block Eight (8) of the Town Plat of Miller was sold for taxes of 1917 on the 9th day of December 1918 to F. A. Chisel, that the certificate of sale thereof has been assigned, and is now owned by Floyd Chisel and that the right of redemption will expire, and a Treasurer's Deed for said land will be made, unless redemption from such sale be made within ninety days from the date of completed service of this notice.

You will govern yourselves accordingly

Dated 10th day of September A. D. 1921

DES MOINES POLICE CHIEF INVETIGATES TEDDY BEAR STORY

DES MOINES, Sept. 21.—Chief of Police, Saunders, aided by Mrs. Emma Berkey, head of the police matrons, have begun an investigation into the "Teddy Bear Scandel.

Through information furnished by Alta Bishop, Alias Brewer, who is being held in the city jail on a larceny charge, thechief has started an inquiry into statements that Police officer Al Wiedland aided Mrs. Anna Fitzpatrick, police matron, in searching woman prisoners.

According to the statements taken by the chief and Mrs. Berkey today the officer removed all the clothing with the exception of her teddy bear from Lydia Washington, colored and then made her walk from the search room to Mrs. Fitzpatricks room.

Mrs. Fitzpatrick, according to the chief, had not denied the Bishop woman's statement, but declared she believed the Washington woman was a dangerous prisoner and that the assistance of an officer was necessary.

"I propose to go into the bottom of this matter in order to make any changes in the personnel of the woman's department or methods employed in the searching of woman prisoners," Chief Saunders said.

ROUND UP CRAZY BOY

Arrest Follows Flourish Of Firearms

Lloyd J. Fitz, who resides with his parents in the city, was arrested last Sunday by Marshall Hooker and was given an examination by the insane commission and found to be in such a condition that it was advisible to send him to the state hospital in Independence. The young man has been idling around town for some time and at various times has threatened different people. Last Sunday when he was seen around town carrying a gun Hooker decided that it was time that he be taken care of.

Fitz has been in several different hospitals for treatment but has never received any benifit from them up to this time. He is about thirty years old. —Hampton Chronicle.

CHARLES CITY BOYS SHOW REMARKABLE TOY MAKING TALENT

CHARLES CITY, Sept. 19. — American toy making has been much in the limelight since the war and it has been discovered that as fine toys, both wooden and metal, can be made in this country as in Europe or Japan, which has occasioned many toy industries to be started in different parts of the United States and in many public schools it is being largely featured.

Now it is discovered that there are in this city two young boys who have exceptional ability along this line. The two boys are Gaylon Woods, son of Mr. and Mrs. R. V. Woods, and Kenneth Bluhm. They have shown really remarkable talent in making a miniature circus equiptment with a full display of tents circus train drawn by a Hart-Parr 20 cages on wheels with wooden animals, a steam caliope, elephants, a clown band, trucks with tent poles, and every part and attachment that goes into the makeup of a real circus

In addition a paving gang was visited by Gaylon with the result that he has made the differen accessories for a regular grading outfit with an asphalt plant trucks, dumps stone crusher, crane, steam roller and all complete with a Hart-Parr 30 for the special power for handling the equiptment. This was all done with a common household paring knife and a circular saw and the assistance of his friend and playmate, Kenneth Bluhm.

Every article of this display of hand made toys was made in proper proportion with the others and all are of uniform diminsions. The boys are now hard at work on a dirigible of the type of the Z-2 which was recently distroyed in England. Each boy is at work on one, and one is at least 6 feet long. One boy states that they are having some trouble to get enough soft wood boxes for the lumber for these ingenious toys.

Tests with roofing over a seven year period at the Iowa State College show that it pays to put a covering of sand, gravel or crushed stone on them.

Pumpkins are not frost tender but they are injured by severe frost. Its a good plan to get them under cover before a freeze hits them.

IOWA' FIRE LOSS LESS THIS YEAR THAN LAST

Iowa's fire loss will be $1.000,000 less than last year, judged by the present indications, according to J. A. Tracy, state fire marshal. Part this decrease is attributed by the fire marshall to the campaign carried on continously by his department for fire prevention measures. As evidence of the part carlessness plays in causing fires, marshall Tracy exhibited his daily batch of twenty-five or thirty reports from the fire chiefs mayors and township clerks on fires over the state, the causes in reports ranging from a leaky tube in an oil stove and a forgotten electric iron, to a 3-year-old playing with matches and a boy smoking in bed.

THEN HE STOPPED

Dick Wermerson had an exciting time one night last week while enroute to Humbolt. While driving along the road at about a forty-five mile clip, after dark he suddenly saw a couple of hold up men. He stepped on her a little harder and slammed into a Ford car that was standing crosswise of the road, with the result that the Ford was demolished but Dick fortunately got out with but little damage. It was found that the Ford party's car had stalled across the road and its occupants were merely trying to prevent an accident when they signalled LuVerne News.

SOME MOONSHINE

The wife of a man named Moon presented him with a fine boy. This was a new moon. The father celebrated the event by drinking himself full of hootch. This was the full moon. When he awoke from his stupor all he had left was twenty five cents. This was the last quarter. His mother-in-law took this and then rapped him over the head with a club. This was the total eclipse.—Exchange.

Avery Township News

AVERY CENTER

Mr. and Mrs. Fred Chase entertained relatives Sunday.

Chester and Florence Eiseman of Britt visited at the Fred Wilkins home Sunday.

Mr. and Mrs. Harry Trumbell visited relatives in Minnesota during the past week.

Most of the farmers of our neighborhood are busy cutting corn and filling silos this week.

S. E. Eldred is building a new double corn crib on his farm. Carpenters from Clear Lake are doing the work.

C. A. Beilefeldt was a Clear Lake visitor Monday.

The Heminway and Kearney families were Mason City visitors last Thursday.

Many from our nieghborhood attended the funeral of Kenneth Robbins in Goodell Sunday.

Miss Jeanette Lauren visited at the home of her aunt Mrs. Andrew Nelson, Sunday.

AVERY TOWNSHIP NEWS

Misses Gail and Elvina Buss and Effie Johnson, called at the H. Hobarts home Sunday afternoon.

Quite a number from here drove to Garner Sunday afternoon to see the airoplane which was there from Dokata.

Wm. Jefferson Bell left last Friday night for the Great Lakes Naval Training Station, at Chicago Ill.

N. G. Moberly and family spent Sunday with Pete Merkel and family.

LIBERTY TOWNSHIP NEWS

A week ago last Sunday night a group of young men from this locality were passing along the road where it makes a bend around the river, west of town Lo! and behold ahead of them lay an auto tire on the grade with a string attached to it reaching south ino he cornfield. In passing a few shos were fired from the cornfield. The boy's then went to a nearby farmhouse for help but found no one at home, then they went back to the spot with their car loaded with old bricks which they used in bombarding the cornfield at the same time they cut the string from the tire which lay in he road took it and beat it

The boy's sold the tire and divided the money. This story was told by the fellows who took part in the act.

Duck hunting has become quite popular in this locality the last few days. The heavy rains which fell of late have covered the low places for ponds which provide places for the ducks.

Prof. Wilson filled the pulpit in the Liberty Township church Sunday morning.

Mr. and Mrs. Will Suckow entertained Mr. and Mrs. Emil Bloomer, Mr. and Mrs. Ben. Riemer, Will. and Carl Riemer and Elmer Bredlow for dinner Sunday.

GOODELL AND VICINITY

Frank McNulty, who is in the Mason City hospital at this writing, is very sick.

The dance which was to be held last Saturday night was postponed until a later date.

Jay Griggs and family enjoyed a visit from Mrs. Ed. Griggs of Iowa Falls.

Ethel Hughes of Garner was a visitor in this city Sunday.

A supper was held in the U. B. Church Thursday evening.

Mr. and Mrs. S. Berling and family of Garner visited over Sunday at the Jay Griggs home.

The G. H. S. has organized a Glee Club which is composed of some very good singers.

Fred Chase and family were Forest City visitors Sunday.

Mrs. C. Engseth enjoyed a week's visit from her sister and two children of Rake.

VARNISH COATS ENABLE MAN TO KEEP WATERMELON A YEAR.

ADEL, Sept. 20— Stewart Williams Harmon of the county poor farm near here. has a watermelon a year old. While he doesn't contend that it is still edible and would have the flavor of the 1921 vintage he says the patriarch is still sound and in good spirits— not the fermented kind either.

The melon was picked in Sept. 1921. Every month since that time it has been given a coat of varnish The only change which has taken place since this one-time good melon went wrong is a decided reduction in its size. In fact it is scarcely half as large as its former self and one begins to wonder when wrinkles will make their appearance.

No one can yet predict how long this melon has yet to go before decay will shorten its life. Perhaps it will go on shrinking and taking on additional coats of varnish until it ceases to be a watermelon and becomes a drymelon.

It may yet be possible as a result of this scientific experiment to produce a condenced melon, so that one may cary a 40 pound melon around in his vest pocket, requiring only a good sized dishpan or bath tub to restore the 99.37 per cent water.

GATES LET DOWN ON PAVING OUT OF RUDD

RUDD, Sept. 21.—The gates over the strip of paving which has been causing a detour here for the past few weeks were let down this morning and the traffic over the paving started. It is possible to travel between Charles City and Ventura by paving, excepting for a stretch or two in towns along the way.

LIME MAY BE APPLIED IN FALL

It Gives Good Results When Put On Plowed Land

Limestone may be applied to land that has been plowed and good results will be obtained according to the soils department at Iowa State College. If it is placed on the plowed land it will work in the soil and be in good condition by spring. It should be well worked into the soil but never plowed under and this puts it so far down that the plants would have to get down deep to get any good.

Recent investigation has shown that the greater portion of Iowa soils are acid and need lime. In many cases applications of lime have increased the crop production 25 per cent, which more than paid the cost of application.

Anyone desiring to test their soil for acidity can either do it themselves by means of the litmus test or choose a representative sample and send it to Ames. To use the litmus test get some blue litmus paper at any drug store. Then take a handfull of wet soil and make it into a ball. Break it in two and place the litmus paper between the parts. Leave it for twenty minutes and then remove. If the blue paper has turned red the soil is acid. Should no change take place the soil is alkaline and does not require lime.

CLEAN POTATO STORE ROOMS Will Prevent Many Rots That Attack Spuds.

Clean out the potato storage bins and spray them good with solutions o kill the fungus spores of you potatoes will last longer say truck crop experts at Iowa State College. Storage rots spread readily among potatoes and they do considerably damage during the winter. A good spray fo the bin is made with copper sulphate, one pound to ten gallons of water or formaldehyde one pint to 10 gallons of water. Be sure that this gets into all the cracks in the bin.

Potatoes that are allowed to dry before being placed in a cellar will keep better since considerable of the dirt on them is removed by drying.

Do not store the potatoes in a warm cellar. Rots develop faster in a warm atmosprere and especially whe e the ventilation is poor. It has been found that where the temperature is kept at about 40 degrees F. the best results have been gotten.

SOMETHING TO THINK ABOUT

By F. A. Walker

EDISON QUESTIONS

THOMAS A. EDISON, who has a very low opinion of the intellectuality of the average college student, has come out with a new set of questions, historical, political, geographical and scientific.

The Wizard is much too honest a man for anybody to suggest that he deliberately got up these posers for the purpose of humiliating his fellow citizens.

So it may be admitted that the wide ground covered by the queries represents his own interest in all sorts of subjects having to do with human activities.

But it is doubtful whether or not ability to answer correctly all or most of these questions could be any test of the intelligence of anybody, in college or out of it. For intelligence and knowledge are very different things.

It was once said of a distinguished man that he had a larger store of useless knowledge than anybody of his time. Mr. Edison would not admit that any knowledge could be useless.

In fact he seems to take the attitude of the late Lord Macaulay who was in the habit of qualifying a statement as to something that nobody knew anything about but himself, by saying "as every schoolboy knows." As a result "Macaulay's Schoolboy" became the proper definition of an infant prodigy.

Lord Kelvin was one of the most distinguished men of science of his time. Addressing his students at Glasgow University on one occasion he said that the great thing about the higher mathematics was that it could be of no possible use to anybody.

Yet the fact that Kelvin and a couple of his friends, one in America and another in Europe, used to amuse themselves with these useless investigations, is, in a way, an argument in favor of Mr. Edison. It goes to show that certain things are worth while even if no direct advantage is to be derived from them.

Old-fashioned schoolmasters were great believers in the importance of facts, and a great part of their time was passed in getting them into the minds of the young.

But the modern schoolmaster goes about his business in a different way. He does not try to teach facts. He does try to teach general principles.

It is like the difference between the old geography and the new.

The old dealt with the names of places, rivers, mountains and so on. The new deals with the effect of the physical shape of the earth's surface on the races scattered over it.

A well-trained lawyer is not one who carries all the cases around with him in his head. But he does know how to put his hand on anything he wants.

In the same way it is more important to be able to get at your facts than to know them.

LYRICS OF LIFE

By DOUGLAS MALLOCH

THE LITTLE VALLEYS.

THE little valleys lie so far
From where the busy cities are
That men may live and men may die
And never find them where they lie,
The little valleys near the sky.

Shut in by plain and sturdy hills
That feed the grasses with their rills,
The little valleys do not seem
A part of all life's roaring stream—
But just a landscape and a dream.

A few green acres, that is all,
The mountains like a garden wall
In quiet peace to shut them in,
To shut away the dirt, the din,
And all the world of noisy sin.

And, oh, I wish that weary feet
Could find the little valleys sweet!—
And, oh, I wish the weary heart
That feels the bruises of the mart
Could find this little world apart!

"God's gardens," so I call the vales
Up yonder by the mountain trails;
And you who cry for heaven's aid
You will not find it, I'm afraid,
Where man his busy world has made.

You must come tramping over hills,
Come follow singing whip-poor-wills,
Must journey long and clamber high
To where God's hidden gardens lie—
The little valleys near the sky.

IN THE EYES OF THE LAW

Policeman's Stand Against Immodest Attire Would Seem to Be Somewhat Far-Fetched.

Two girls were crossing a Coney Island street. One had on a heavy, old-fashioned brilliantine bathing suit, with long skirt, high neck and elbow sleeves. The other was in street clothes. A policeman stopped them.

"You!" he called to the bathing beauty, "you can't pass here dressed like that. Go back and put on some decent clothes!"

The girl looked down at herself, then up at the policeman and smiled.

"Why, look at Mame!" she exclaimed, "what about her getting by?" The officer glanced at the other girl. She wore a filmy net waist, glaringly transparent, generously decollete, and a skirt ending a few inches above her knees.

"But she is dressed," said the guardian of the law. "Now you go and put some clothes on or you can't pass here, see?"—Judge.

ASPIRIN

Name "Bayer" on Genuine

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the direction and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Advertisement.

Willing to Accommodate.

"I see by the papers," said the convict to the warden, "that the prison is greatly overcrowded."

"Yes," replied the warden.

"Well," said the convict, "I was just going to say that if you've got a customer that really wants my cell I'll pack up and go so as to make room for him."

ONLY A COLD

BUT DON'T NEGLECT IT

A cold is an acute catarrh which can easily become chronic. A great many diseases may be traced to a catarrhal condition of the mucous membranes lining the organs or parts.

PE-RU-NA

AN IDEAL EMERGENCY REMEDY

Just a few doses taken in time have saved thousands from serious sickness. For fifty years Pe-ru-na has been the popular family medicine for coughs, colds, catarrh, stomach and bowel disorders and all diseases of catarrhal origin.

KEEP IT IN THE HOUSE

Thought He Was Dying.

"Stirring times in our neighborhood last night."

"What happened?"

"The Blitherbys played jazz records until after midnight, so Mr. Grumpson rose from his bed and began to sing, by way of starting a little competition."

"I suppose the Blitherbys took the hint?"

"No, indeed. They sent for an ambulance."

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Surely.

The optimist says to remember that even if your mother-in-law has the gift of tongues it would be a lot worse if she were a mind reader.—Chicago American.

SCHOOL DAYS

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

NEED FOR NURSES

THERE are not enough trained nurses to meet the demand. On the other hand nurses are saying that they cannot make both ends meet unless their pay is increased. Many women who might take up the work are deterred because of this fact.

To meet this, the alumni societies of the training schools are combining with a view to settle on a proper advance. The new rate of pay would be $6 a day for 12-hour periods, and $50 a week for contagious cases.

Nurses are going to be asked for by communities to do public work. District visiting and prenatal care at the expense of the community, where circumstances demand, will be put into the hands of trained nurses. It will be worth doing, and sure to appeal to certain types of women who like nursing, but who do not care for private or hospital work.

A girl who wants to study for this profession should select her hospital with care. She will have to expect to do hard and disagreeable work. But in a number of institutions the eight-hour schedule is being adhered to, more salary is being paid, and other matters that have given rise to discontent are being improved.

A trained nurse is one of the most important members of the community. There is now a great need for more of her. Most hospitals accept only college-bred women, and no women without the equivalent of a high school training will be accepted. If you who read this feel a call for nursing, get the address of a good hospital, write to the matron of nurses there, and follow her directions. You cannot enter upon a finer walk of life.

(Copyright.)

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

EUNICE

EUNICE, like Evangeline, is one of the "glad" names in the lexicon of feminine cognomens. Like Evangeline also, it comes from the Greek word meaning well, or happy. Eunice is translated to mean "happy victory."

Because of its significance, the Greek word from which Eunice was derived, was taken over in early times by the Christians, who adored names of happy augury. The names coming from this favorite word are almost beyond enumeration, but curiously, only a few of them have survived to modern times.

Eunice is one of these latter. It made its appearance as Eunike one of the fifty Nereids. Her name straightway became popular among Greek women, but it remained for Eunice, the Jewish mother of Timothy to give it vogue in the days of early Christianity. English lovers of Bible names have favored it for centuries, and it is still popular in all the countries of Europe, though particularly adapted to English and American usage.

The topaz is the talismanic gem assigned to Eunice. "The chrysolite of sunrise," Shelly calls it. It is said to preserve its wearer from all dangers and to warn of approaching evil by paling in color, but it will be rendered impotent unless it is set in gold. To dream of its signifies that no harm shall befall. Tuesday is Eunice's lucky day, and 5 her lucky number. The chrysanthemum, signifying cheerfulness, is her flower.

Better Than Using Sand.

They have found that sugar can be made from sea weed. We are suspicious that they have found it can be made from a lot of things besides sugar cane. When the family sugar has to be sweetened before using, its virtue may be suspected.—Los Angeles Times.

MOTHER'S COOK BOOK

by Nellie Maxwell

We are very slightly changed
From the semi-apes who ranged
India's prehistoric clay;
Whoso drew the longest bow,
Ran his brother down, you know,
As we run men down today.

KIPLING.

EVERYDAY SALADS.

ALMOST acceptable salad may be made of a few leftovers if the combination is good. Many a good bit of food is thrown away for lack of knowing how to use it wisely.

Potato and Corn Salad.

Take a pint or less of cold boiled potatoes cut in half-inch cubes, add one cupful of green corn cooked on the cob, a bit of chopped green pepper if at hand, a little scraped onion to give it zest and enough well seasoned dressing to moisten, adding salt and pepper to season.

Hot Corn and Pepper Salad.

Take a pint of sweet corn (fresh) and just cut from the cob. Shred or mince one green pepper and cook in a little butter until well softened, add the green corn and more butter, stirring and mixing well over the fire. Season with salt, pepper and cayenne and serve piping hot. It is wise to double this recipe if the family is at all fond of corn for there is never a kernel left.

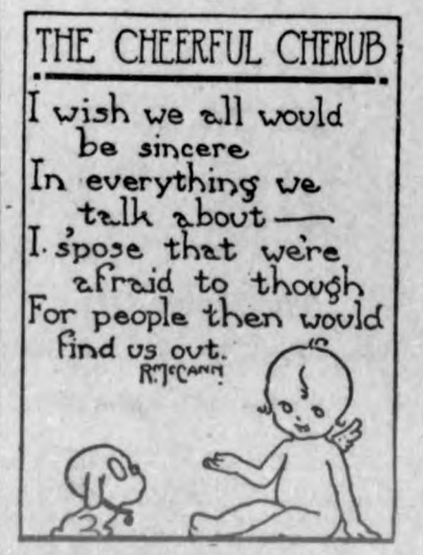
Crisp Lettuce With Peanuts.

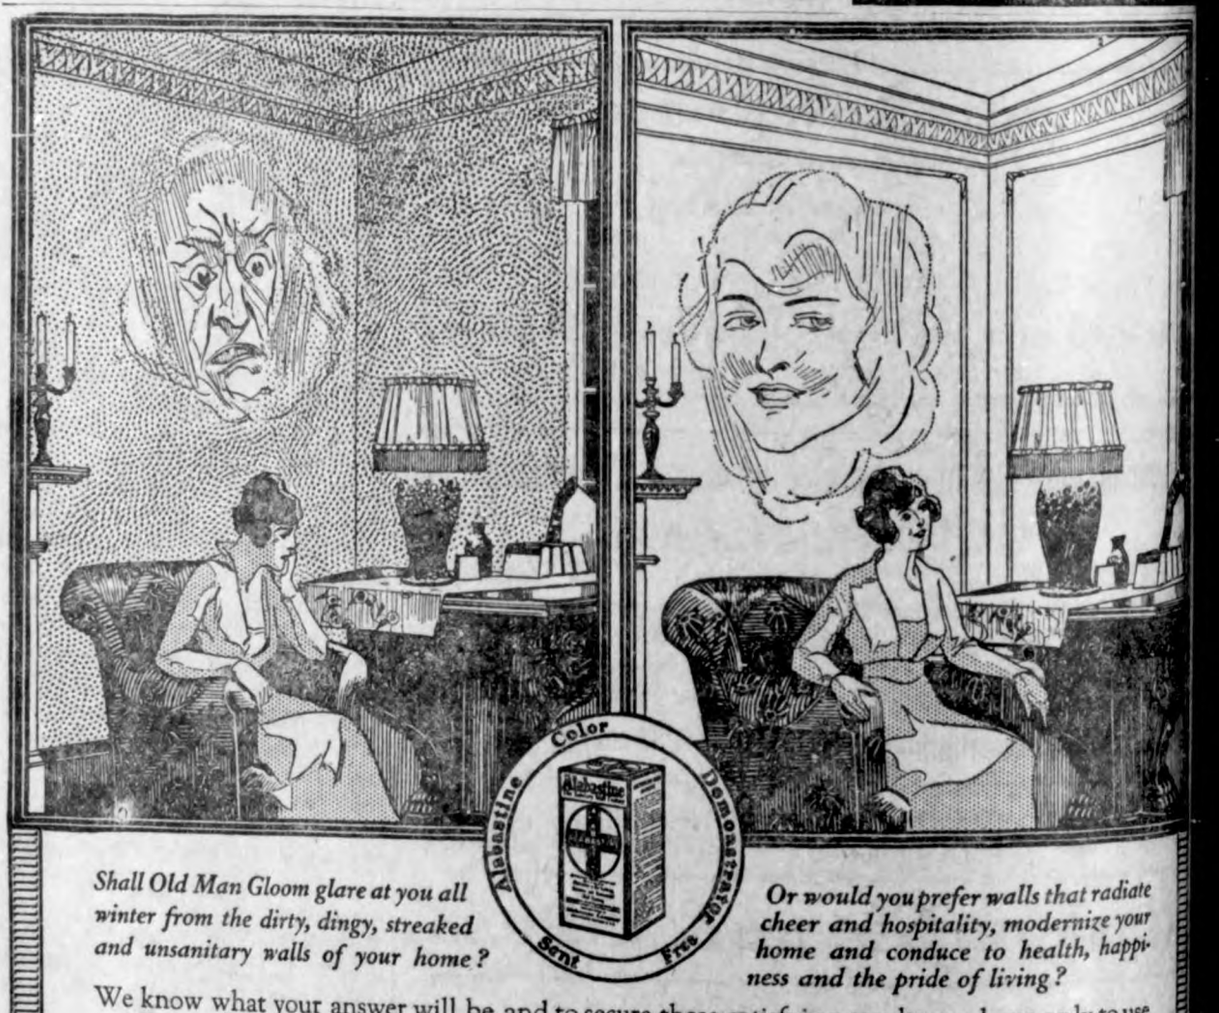
Wash a bunch or two of tender head lettuce, drain and dry thoroughly, arrange on individual plates and sprinkle with fresh crisp peanuts that have been crushed by rolling with the rolling pin until like coarse crumbs. Serve with a French dressing passed at the table or with a good boiled dressing. Adding the dressing to the lettuce, if it stands any length of time, wilts it and destroys its attractiveness.

Mushroom Catsup.

Put mushrooms into a stone crock, covering with a layer of salt as each layer of mushrooms is added. Let stand two days, stirring occasionally, then drain them and put through a sieve. To each quart of mushroom puree add three blades of mace, one tablespoonful of peppercorns, one-half tablespoonful of ginger, the same of allspice and, if needed, salt. Cook for half an hour, then add the spices and cook 20 minutes. Bottle and seal as any catsup. This makes a very nice savory to add to meats, sauces and various dishes.

Copyright, 1921, Western Newspaper Union.





Shall Old Man Gloom glare at you all winter from the dirty, dingy, streaked and unsanitary walls of your home?

Or would you prefer walls that radiate cheer and hospitality, modernize your home and conduce to health, happiness and the pride of living?

We know what your answer will be and to secure these satisfying results you have only to use

Alabastine

Instead of Wallpaper, Paint or Kalsomine

Alabastine is a dry powder packed in five pound packages in white and a variety of beautiful colors ready to use by mixing with pure cold water, with full directions on every package.

Alabastine has been on the market for forty years, is a household word in every civilized country in the world. If unable to secure the services of a painter or decorator you can apply Alabastine yourself.

Important to Know

To secure Alabastine results you must get Alabastine; it is necessary to see that the package has the word "Alabastine" and the cross and circle printed in red.

When employing the services of a painter ask him to bring the Alabastine in unbroken packages and mixed on the job. This he will be glad to do to convince you that he is giving you what you desire and pay for.

Alabastine Over Painted Walls

Have you had the experience after going to considerable expense to paint your walls, on the theory that they would be washable the same as your woodwork, of finding that after washing them they were grimy, streaked and unsatisfactory? Have you hesitated at the expense of again repainting them?

If the paint is solid on the wall and not scaling, go over it with a coat of Alabastine and be pleasantly surprised as to effects produced and saving effected. Alabastine may even be used over old soiled wallpaper that is firm on the wall not printed in aniline dyes or with raised figures.

You Can Always Get Alabastine

There is hardly a town where Alabastine is not carried in stock by dealers who carry paints. If you do not find it and are offered something else claimed to be just as good, write us and we will tell you how to easily secure Alabastine.

Sample card of tints furnished by dealers or write to us direct.

The Alabastine Company, Grand Rapids, Mich.

T MEASURES O KILL DODDER

Say Discovery of This site on Farm Is No use for Serious Alarm.

FOR ITS EXTERMINATION

es Not Cause Damage If Rem- Are Applied Before It Gets Foothold—Prevent Seed From Maturing.

d by the United States Department of Agriculture.

nedies to exterminate dodder—asitic plant infesting clover, alfand some other plants—are apbefore it gets a foothold, the es not cause serious damage. ever, dodder is permitted to deunmolested, radical measures necessary in order to control it. ng recent years, specialists of partment say, an increase in the r of complaints of dodder have eceived from all parts of the States. They add, however, he discovery of this parasite on rm should not be the occasion ious alarm, but rather for the yment of a well-conceived and natic plan for its extermination.

Starts in Small Patches.

ing the first season of infestan clover or alfalfa, dodder usualurs in small scattered areas. As case in combating all weeds, it ential that dodder should not be tted to mature seed, and such infested areas should be mowed he dodder removed or burned in eld to prevent the development d. If seed has formed, burning atches of dodder is the only remince it kills not only the plants lso any seeds which may be lyn the surface of the soil.

nfestation is so great that patch ment cannot be depended upon, it e necessary, in order to free the of the pest, either to plow the under or utilize it for hay before has formed. In the latter case, ftermath left on the field should losely grazed, for which purpose are especially useful. If the tation is general and threatens usly to damage succeeding crops, y be necessary, according to the tin, to cut the crop, allow it to and burn it in the field in order all dodder seed may be destroyed.

Inferior Seed Blamed.

with all weeds, preventing introion on the farm is far easier than ication after it has once gained a hold. It is usually introduced by use of impure seed, and a bularges that farmers learn to disish dodder seed so that they can

tect Alfalfa Fields Against Dodder by Proper Control Measures.

ognize it when they are purchasing er and alfalfa seed. For adequate mination, a magnifying glass is essary. There is a wide range in of dodder seed, but in general y are usually dull-coated with ghened or minutely pitted surs, and usually have two or three surfaces, while the seeds of clover usually smooth, rounded, and pos- a certain luster. Furthermore, scar on dodder seed usually is y inconspicuous, whereas the scar leguminous seeds is clearly evident. When animals are allowed to graze ere dodder grows, they should not e access to fields not infested, ce they are likely to spread the ed by means of pieces of stems adring to their coats and hoofs. On d which contains the seeds of dodr, the bulletin suggests the use of e-year cropping system consisting plants which are not damaged by pest, and recommends the followplants: Corn, soy beans, velvet ans, cow-peas, and small grains such oats, wheat, and rye. Sugar beets, ions, flax, and a few other cultivatplants are subject to dodder instation, but clover and alfalfa are its portant hosts.

ASIC QUALITIES IN LAYERS

rst Is Constitutional Vigor and Other Is Early Maturity—Easy Then to Get Eggs.

There are two absolutely basic qualies in all great layers. The first is nstitutional vigor. The other is rly maturity. With these two qualies it is easy, with good care, to get satisfactory egg yield.

PREPARE EARLY FOR NEXT CROP OF CORN

Selection of Seed Ears Is of Vital Importance.

Avoid Danger of Sprouting in Field With Moist, Damp Weather and Injurious Insects — Plowing Is Big Problem.

Prepared by the United States Department of Agriculture.

Nothing in the line of corn culture is more important than the selection of seed ears and the preparation of land for the next season's crop. Both of these operations should have attention in the late summer and early fall of the previous year, say experts of the United States Department of Agriculture. Seed can best be selected from the field because then it is possible to observe the condition of the parent stalks as to vigor and freedom from disease. Seed from diseased ears may not grow at all or may produce weak, barren stalks. Farmers' bulletin 1176, "Control of the Root, Stalk and Ear Rot Diseases of Corn," which may be had free from the Department of Agriculture, tells how to detect the diseased ears.

Seed ears may be selected as soon as they have gotten their growth and

Select the Best Ears This Fall for Next Year's Seed.

before the sap is entirely out of them. By picking them at this time, the grower avoids danger of sprouting in the field with moist, damp weather, and also the danger of destructive insects. After they are picked, the ears should have their moisture taken out as quickly as possible. All that is necessary is free circulation of air. This can be obtained by drawing back the husks, tying the ears together in pairs and hanging over a wire. If ears are hung in too large clusters, there is danger of mildew. Care should also be taken to avoid freezing, especially before the ears are thoroughly dry.

Fall plowing is a matter governed by local conditions, and the farmer's judgment will be called into play. In some localities it is better to plow early for the conservation of moisture. Plowing under all of the humus is advisable wherever it can be done, to improve the physical condition of the soil and increase its fertility and thus produce strong, vigorous corn.

STORAGE TO PREVENT DECAY

Ohio Expert Says Place Should Be Dry, Cool and Well Ventilated for Best Results.

That much improvement may be made in the home storing of fruits and vegetables by giving attention to the storage cellar or basement is pointed out by J. B. Keil, garden assistant at the Ohio experiment station.

The storage should be dry, cool, and well ventilated, he states. Spraying the walls with whitewash, to which an ounce of copper sulphate to one gallon of spray has been added, helps to destroy decay germs.

Cooling of the storage may be carried out in most cases by ventilation, windows being kept open during cool nights and closed in the daytime.

Fruit keeps in storage much better under uniform conditions of temperature, particularly apples. It is often possible to keep apples from three to four weeks longer than their regular maturing season by careful storing.

STORE VARIOUS VEGETABLES

Different Classes Require Separate Storage Places — Much Depends on the Skin.

Different classes of vegetables require different kinds of storage. The sweet potato, squash, pumpkin and fruits of this class must be stored dry and warm rather than cold. Potatoes, cabbages, beets, turnips and the like are stored in a moist atmosphere and where the temperature is close to freezing point—say, 34 degrees F. The manner of storing depends to some extent on the rind of the vegetable. One with a leathery skin does not transpire moisture very fast, while those with a soft skin such as the potato and beet, allow moisture to pass out rapidly and when placed in dry storage, soon shrivel and shrink.

FARM LIVE STOCK

AID BETTER SIRE CAMPAIGN

More Than 5,000 Pastors to Carry Message Into Rural Districts of the South.

Prepared by the United States Department of Agriculture.

The message that better sires offer an effective way of obtaining better live stock of all kinds is to be carried into rural districts of the South by more than 5,000 country pastors. In

A Registered Hereford Used to Build Up Beef Herds of Louisiana.

accordance with a request from the board of missions of the Methodist Episcopal church, South, the United States Department of Agriculture has supplied the rural survey secretary of the board with the necessary information.

A stereopticon lecture based on a set of 70 lantern slides prepared by the bureau of animal industry is to be used as a part of the work. "We feel that we can be of material assistance to you," the rural survey secretary of the board stated to the department, "in carrying your message to the people who need it most."

CAUSE FOR UNTHRIFTY PIGS

Dr. Evvard of Iowa Station Suggests That Round Worms May Be at Bottom of Trouble.

When young pigs are not doing well, it may be that round worms are the cause of their unthriftiness. A 100-pound shote at the Iowa experiment station was very unthrifty. It was killed and examined. John M. Evvard, in charge of swine feeding work, says that in one-half foot of that hog's intestine there were 63 worms that weighed two-fifths of a pound.

To prevent such conditions, keep the pigs growing. Feed well. Keep the lots clean and free from rubbish. Drain the pastures and lots. For emergency cases use santonin and calomel, about five to ten grains each for a 100-pound pig, or 7½ to 15 grains each for a 200 to 300-pound pig. It may also be well to allow free access to such condiments as air-slaked lime, charcoal, slack coal, powdered sulphur, glauber's salts and common salt, these being allowed free choice style, each being placed in a separate compartment of a self feeder.

HORSE SHORTAGE IS FEARED

Secretary Dinsmore of Horse Association Says Demand for Draft Animal Is Strong.

Reporting the fact that citizens of Denver recently rejected an ordinance which, if passed, would have made it a horseless city, Wayne Dinsmore, secretary of the Horse Association of America, says in a recent communication received by the animal husbandry division at University farm:

"We need more good draft horses. The demand for them is stronger and prices are higher than at any time in history, and unless everything possible is done to bring about horse breeding we will have a shortage in coming years which will materially increase the cost of production and transportation."

FURNISH FOALS WITH GRAIN

When Pastures Begin to Dry Up Young Animals Must Have Feed for Best Development.

As the pastures commence to dry up the proper development of the foal calls for the feeding of a little grain in order to maintain the milk fat and keep the foal developing to the best advantage. Colts that belong to working mares should have a separate feed box and receive a little grain each time the mother is fed. Those on pasture should be provided with a creep where grain can be kept available for the foal at all times. If these methods are followed the colt will continue to gain and will not shrink when weaning time comes.

EWES DISOWN THEIR LAMBS

Trouble Sometimes Overcome by Penning Mother Up With Her Young—Other Plans.

Ewes that will not own their lambs may sometimes be induced to do so by penning ewes up and forcing them to permit the lamb to suck, a few lessons of this sort usually being sufficient. Some shepherds moisten the lamb's head and neck with the ewe's milk, claiming that this will make the ewe own the lamb. Shutting the ewe and her lamb by themselves for a few days should prove effective, though a vicious ewe will sometimes kill her own lamb if shut up alone with it.

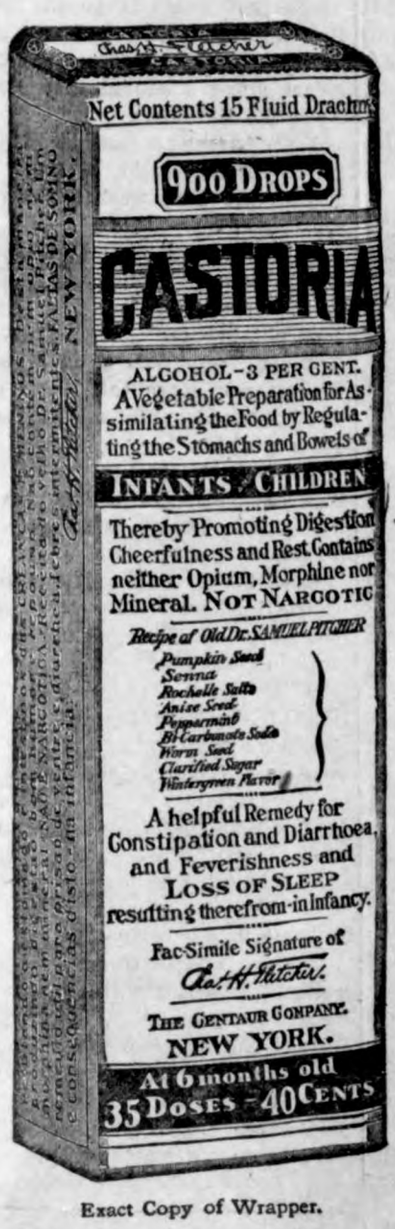
Some More Truths.

WOULD you use a steam shovel to move a pebble? Certainly not. Implements are built according to the work they have to do.

Would you use a grown-up's remedy for your baby's ills? Certainly not. Remedies are prepared according to the work THEY have to do.

All this is preliminary to reminding you that Fletcher's Castoria was sought out, found and is prepared solely as a remedy for Infants and Children. And let this be a warning against Substitutes, Counterfeits and the Just-as-good stuff that may be all right for you in all your strength, but dangerous for the little babe.

All the mother-love that lies within your heart cries out to you: Be true to Baby. And being true to Baby you will keep in the house remedies specially prepared for babies as you would a baby's food, hairbrush, toothbrush or sponge.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Are You Prepared?

A doctor in the house all the time would be a good idea. Yet you can't afford to keep a doctor in the family to keep baby well or prevent sickness. But you can do almost the same thing by having at hand a bottle of Fletcher's Castoria, because it is a wonderful remedy for indigestion, colic, feverishness, fretfulness and all the other disorders that result from common ailments that babies have.

Fletcher's Castoria is perfectly safe to use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Children cry for Fletcher's Castoria, and mothers recommend it because they have found it a comfort to children and a mother's friend.

If you love your baby, you know how sweet it is to be able to help baby when trouble comes. You cannot always call upon a doctor. But doctors have nothing but good to say of Fletcher's Castoria, because they know that it can only do good — that it can't do any harm — and they wouldn't want you to use for baby a remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS
Bears the Signature of

THE CENTAUR COMPANY, NEW YORK CITY.

OBJECTION WOULD NOT LAST

Suitor More Than Willing to Remove Cause for Prospective Father-in-Law's Ill Will.

The two lovers were talking over their troubles, particularly the parental objections offered to their marriage. "But," said the youth, "I can't for the life of me see why your father should place any obstacle in the way of our marrage.

"Well," explained the girl after some reflection, "I think it stands this way: Father, you know, is always boasting of his lineage. He is forever saying that his ancestors were gentlemen of leisure like himself, and that you have to work for a living."

"Well," continued the suitor, "tell him that I don't expect to after we are married."

A word to the otherwise is wasted.

Little Sister's Interest.

Little Jennie gazed long and thoughtfully at the young man who was calling on her grown-up sister Maude.

"May I climb up on your knee, Mr. Greene?" she inquired at last.

"Yes, of course, dear!" smiled the young man, who wanted to make a hit with the family. "Want to pull my hair—eh?"

"No; I want to see if I can find that word," replied the little girl.

"What word?" asked the visitor, in bewilderment.

"I heard Maude say this morning that if a man ever had the word 'Idiot' written all over his face, that man was you!"—Stray Stories.

No Change!

"Blinks still pursues the even tenor of his ways." "Yes, borrowing the same old amount!"—Cartoons Magazine.

Do you discriminate at the dinng table—or are you thoughtless?

In thousands of homes, a "line" is drawn at the breakfast table. Tea or coffee is served for "grown-ups" and Postum for children. But some parents do not discriminate. Caffeine and tannin, the injurious contents of coffee and tea, seriously retard the development of the delicate nerve tissues in children.

Consequently, instead of rich, satisfying Postum, children are over stimulated by the drugs in tea and coffee; and so may grow up irritable and nervous. Any doctor can tell you that this is a great evil and should be corrected.

Although some parents feel a certain justification for the personal indulgence in coffee, yet the harm to them may be equally serious. It may take a little while longer for the drugs in coffee and tea to affect an older person, but in many cases the nervous system and allied bodily functions will become weakened. The surest way to avoid such possibilities is to quit coffee entirely and drink Postum instead. The change permits you to get sound, restful sleep.

Postum is the well-known, meal-time beverage. Like thousands of others you will like it because, in flavor, it is much like a high-grade coffee.

Do away with the distinction at the table. Serve delicious Postum, piping hot, to all the family. One week's trial and it is likely that you'll never return to tea and coffee.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum for Health
"There's a Reason."

Charles Lewis came down from Hayfield, Minn., Saturday to take charge of the farm work on the farm which Frank Glanville left last week to let somebody else "hold the sack" when he decided his financial burden could be enlightened by the simple process of "skipping the country."

Lon Schneider, wife and son Kenneth who are visiting at Garner were visiting friends here Sunday. They flew in their airopiane from North Dakota to Garner. Their son is a pilot. Sunday he made flights at Garner and many from here went up to watch him and a number took a ride with him.

It never rains but it pours!

IT WAS "company night."
BUT WHEN I got home.
I FOUND the Browns.
HAD A sick baby.
AND COULDN'T come.
SO I chortled "Oh, joy.
WON'T SUE and I have.
SWELL EATS for two!"
BUT NO, Sue said.
"YOU DON'T suppose.
I'D WASTE all this food.
JUST ON you!"
AND SO I said.
"LET'S PHONE the Smiths."
BUT THEY had headaches.
THEN WE tried the Joneses.
AND THEY fell for it.
AND WHEN grub for four.
WAS JUST about ready.
THE PHONE bell tinkled.
AND THE Brown baby was better.
AND A minute later.
THE SMITHS changed their mind.
AND THE Missus fainted.
"OH, WELL," I said.
"THE MORE the merrier.
WHAT'S THE difference?
IF THERE isn't enough food.
I'LL FEED the males.
ON THE cigarettes that satisfy.
AND YOU women can talk.
AND BETWEEN the two.
WE'LL ALL be Satisfied."

Air-Tight Tins of 50

Ask your dealer to show you the new vacuum-sealed tins of 50 Chesterfields. A compact, convenient and absolutely AIR-TIGHT packing—the cigarettes keep fresh indefinitely.

WONDERFUL company, Chesterfields—any time, anywhere. Just seem to "hit the spot." Good tobaccos, good blending, (by a private formula that can't be copied), good-looking package with an air-tight wrapper. On every count, an all-around downright good smoke. "Satisfy"? All over the place.

They Satisfy **Chesterfield** CIGARETTES

LIGGETT & MYERS TOBACCO CO.

BUSTER BROWN and Tige

This famous little man and his wonderful trick dog will give a **FREE SHOW** on the streets of Klemme on

Wednesday Eve., September 28

At 8:00 o'clock

Buster Brown and his dog Tige have been in Klemme before. Several years ago they held an afternoon Reception at Wellemeyer's but this time these World Famous Characters will give an evening preformance.

On an elevated platform in front of the Wellemeyer Departmeut Store, Buster Brown and Tige will appear under a flood of Electric lights. Tige will do his newest tricks, and Buster Brown with his ready wit and jolly stories will give us a Right Royal Entertainment.

We invite every boy and girl from near and far to come to Klemme on this big Wednesday night of Sept. 28th.

And don't forget---That Buster Brown will give a nice present to every boy and to every girl who comes to meet him.

MERKEL—GLANVILLE

Alfred Merkel and Miss Winnifred Glanville, both of this place, sprung a pleasant surprise on their many friends when they quietly slipped to Garner last week Wednesday and were married at the Presbyterian parsonage by Rev. S. M. McConnell. They were accompanied by Mr. Merkel's sister and husband, Mr. and Mrs. John Lass, of Miller.

Both of these young people are well and favorbly known here. The groom is a farmer by trade and is a fine young man in every respect. The young lady who he has chosen as his wife is also an excellant young ladyof high standing in the community and will make an able help for her husband.

They will farm in this community the coming year.

The Times joins with the many friends of the young couple in wishing them long, happy and prosperous wedded life.

LETTER FROM KLEMME TOURISTS

Col. Springs
Sept. 24th, 1921

As we have some spare time I will again write you a few lines as to let you know we are still all O. K. As we left Hay Springs we went to Crawford Neb., and we stayed 2 days there, then we went to Aliance, and then to Scots Bluff and to Noruton Wyo., and then to Chyanne Wyo., There we had to stay a couple of days on account of wind storms. I surly never seen it beat. Lots of tourists tents blew over and the intentions were to take the Lincoln Highway to Salt Lake City, but being it was so cold we changed our mind and hit for Denver Col. and got there at noon. We ate dinner in the Overland Park, and it sure is a peach of a place. We all injoyed it. After dinner we hit for Colorado Springs, but did not quite make it and had to stop at Franklin Col. with car trouble. Then the coming morning we hit for Col. Springs and at present we are still here. Yesterday we hired us a big buick six and a driver and we went out sight seeing; first he showed us a two and one half million dollar hotel, and that certainly is a peach; from there to the Seven Falls, and that is sure fine scenery. Chas. went up about one-third way and Mrs. went up about one-half way and I went to the top and seen Helen Hunts grave. Then we went to a place called Care of the Minds and that's certainly is something swell. Then we slowly drove down the mountains and went to the garden of the "Gods", and that's a real park. We took some pictures, but only 2 of them were very good; we then drove back to camp and this morning we hired the same man and he took us up to Pikes Peak and that is sure some fine place where they collect toll and you enter the gate you commence to crawl up to the peak; it is 19 miles from there to the top of the peak and absolutely uphill. Lots of places we could look down 2500 feet, and that almost gives a person the creeps, but we all enjoyed it very much. We ate dinner up there and looked around awhile and then came down; we then went bock to camp and were all feeling fine. Tomorrow we will hit for Pueblo, Colo. Their big fair starts Monday and we sure are going to take it in. Well Jergie tell all the people in Klemme "Hello". The weather is sure fine in Colo. Springs, just like summer. Will write more next time

Yours Truly,
Kuck, Stiehl & family

How many of those who criticize present day styles in the womens clothing would like to see a return to "hoops" and floor sweeping skirts?

A Life Saver

OSCAR SWANSON REPORTS SUCCESSFUL HOG SALE

Oscar Swanson held a purebred hog sale last week. Tuesday which reports was quite successful. Twenty four head of young stock was sold, and seven head more were sold privately, or thirty one head in all.

Oscar says the attendance was not large, but much larger than he had expected on account of the bad weather, but those who came are well satisfied with the sale and the bargains they got. He expects to put on another sale in the winter some time and will give buyers another opportunity to get some good hogs.

Following is the list of purchasers and the amount they bought:-

E. Amey, Garner, 1
A. E. Dutheridge, Goodell, 3
J. B. Liara, Belmond, 1
G. T. Waddingham, Kanawha, 3
Byron Westover. Swaledale, 1
Ed. Westover, Swaledale, 1
Frank Steinhoff, Britt, 2
M. Bachman, Klemme, 1
C. O. Leonard, Belmond, 1
Jay Buchana, Goodell, 1
Charles Gealow, Belmond, 1
Meno Froling. Belmond, 1
Albert Sorenson, Crystal Lake, 1
J. A. Johnson, Klemme, 11
M. J. Kearney, Goodell, 1

If the weather had been good and the roads better Oscar says the sale would have gone better as many buyers from a distance had intended to come. His sale was well advertised in nearby papers and also the local paper and he says it got him fine results.

The Koerner Telephone Company of this city have installed a number of new telephones the past week.

Following is a list of the new numbers and the names. Clip them out now and paste them in your directory so you can call them by the correct number.—

Latest Dispatch From Every Part Of The State

Charles Beeman has bought the Sam Zenter farm, between Corwith and Luverne, for 297 per acre and assumption of ditch tax.

Organization of armed vigilance committees for the protection of banks against robbery has been completed throughout Tama County.

Mrs. Ida Hinde, of Epworth, narrowly escaped death when her auto mobile rolled into a creek. She was pinned against the bank of the creek with her head barely out of the water.

Frank. Valkovich, accused of killing Peter Mores at Seymore, June 4, 1921 was acquitted by a jury after thirty minutes diliberation. Valkovich killed Mores after wresting Mores' gun from him when he started a puarrel.

The largest watermelon in captivity, a yard long and four feet in circumferance is owned by Harry Yerkes, who resides south of Centerville. The melon of the white seed variety is the only one in the patch to approach anything like respectible size.

Shenandoah can smoke cigarets. By a vote of 3 to 2 in the council granted permits to two dealers and the Elk's club. Mayor G. B. Warner who has repeatedly vetoed the council's action was overruled by attorney General Gibson who held the mayor had no authority to veto in such a matter.

The Hampton-Kelly Canning company closed its 1921 season's pack recently following a fifteen days run which is the shortest in the history of the plant. However, during the time the company made a pretty good record for the total pack is over 53,000 cases, or approximately a million and a quarter cans of sweet corn. The company was among the few in Iowa to operate at all this year and contracted for less than 700 acres as against 1,200 last year.

Compensation of 29 year's of care of her invilid sister at the rate of $10 a week. Totaling $15,000, is asked by Mrs. Alice Morgan of the $1000,000 estate of her father, the late William Ccol, prominent politician and one of the Cass county's wealthiest men. The claim filed by Mrs. Morgan has been disallowed by the administrators.

A warning has been isued to Iowa grocers by W. B. Barney, state food and dairy commissioner, in regard to the sale of oleomargerine. The federal government recently removed their order that the product must be marked, but the Iowa law still requires that the name, "olemargarine" must appear upon the product. There are a number of violators at the present time, and unless they comply with the Iowa statute, prosecutions will be started.

They work fast on Joe Menster's farm east of Cascade. A week ago the large field contained a crop of corn. Now the corn is all in a silo the ground has been plowed and a crop of rye two inches in height covers the field.

Mrs. L. M. Walker, of Afton was peeling peaches. and taking off her $600 diamond ring placed it on the sill of an open window near where she was at work. When she looked for the ring it was gone and could not be found. She believes someone took the sparkler, but does not remember seeing onyone about.

HANCOCK FARMER TAKEN TO ASYLUM

GARNER, Sept. 29. —David F. McMahon, a bachelor farmer who resides near Hayfield in this county was taken to Cherokee Friday by Sheriff Hanson to undergo treatment at the state hospital for the insane at that place.

Mr. McMahon, who resides with his mother and several brothers, on a large ranch, has been in his usual health till the last few days when queer actions were noticed and he became worse, and on account of his size it was impractible to care for him at home. Although he has met recent financial reverses, he was always of a cheerful nature and the cause of his trouble is undetermined.

A fool killer doesn't get active until the follies of youth become the frivolities of age.

15,000 Newspapers Co-operate In Home Town Paper Week

REV. MEYER WILL GO TO CLAYTON COUNTY

Rev. A. H. Meyer, who has been pastor of the First Methodist church of this city, and also pastor of he Libery Township church west of the city, for the past five years, has been transferred to a charge near Edgewood, Iowa, in Clayton county.

The Conference was in session at Flood Creek last week and many changes were made in the district.

The charge to which Rev. Meyer has been assigned is a new charge located about six miles from Edgewood. The church is new and was built recently and a new bungalow. all modern with electric lights and other conveniences was also built for the preacher.

Rev. Bergmann has been assigned to the charge here.

Rev. and Mrs. Meyer have made many friends while they resided in this city who will regret that they are about to leave but whose best wishes go with them to their new home.

Rev. Meyer will preach his farewell sermon Sunday and they will leave next week for their new home.

Received a Royal Welcome

We heard a good one on some Mason City people the other day. Dr. and Mrs. Beemer, and Mr. and Mrs. Swanson, proprieters of the Park Inn at Mason City drove through here Monday night shortly after the charivari was given on Dr. and Mrs. Reuber. The Mason City people drove up in front of the cafe and Dr. Beemer stepped out to get some things just as the boys were passing around the cigars on Reuber. He had just gotten in the door when they shoved a box of cigars under his nose and told him to have a smoke. Dr. Beemer looked surprised and said, "I be darned if it isn't the first town in my life where I received a right royal welcome," not knowing of course about the big doings. But even so, Klemme always welcomes her visitors.

ARE KLEMME MILK COWS TUBERCULAR

Tuberculin Test Ordinance Should Be Passed.

For some time we have watched with interest the various towns recently passed the pure milk ordinance. Nearly every town now is passing, or has passed a pure milk law whereby milk cows must be tested for tuberculosis.

Recently a large number of cows were tested at Mason City and a number were found to be tubercular. Some were also found at Belmond, so we understand, and also at other nearby towns. In fact wherever the law has been passed and put into effect they have found some milk cows which were tubercular.

It is a grave situation and should be given thought. Human life is too dear to be endangered by milk from cows which are tubercular. Would you drink milk from a tubercular cow; would you give it to your baby and children? No you would not. But how do you know the milk you are using is pure? You don't know and you won't know until your cow has been tested.

Are the good people of Klemme going to take a chance on this dreaded thing? We believe they will not. We believe it is time for our city council to do something along this line. We do not stand alone on this and have been encouraged to keep up the fight until the council sees fit to take some action to pass a Pure Milk Ordinance in Klemme and see to it that every cow from which milk is sold here be tested for tuberculosis, and by doing protect valuable human life.

The fact alone that ninety percent of tuberculosis in human beings is caused from the milk from infected cows is enough to make any person think seriously.

Millions of Wheat Money

Minneapolis, Minn. Sept. 29.Grain dealers here and at Duluth are paying cash to farmers at the rate of $5000.000 per day. The grain movement is the lrgest for a number of years.

HOME TOWN PAPER WEEK

Nation Wide Movement Set for November 7-12

Every Four Corners has its Home Town weekly nowadays, but all the boys and girls who have wandered from the township Center cannot get back to enjoy the loved surroundings But all can subscribe to the old home town paper and thus keep well in touch with the old spot they once called home.

What joy to run over the school promotions and find that the tos of a few years ago are moving higher and higher in scholastic circles and eventually blossom forth as the "sweet girl graduates," or the clean strong boys discarding knickers.

Just watch that hardened old city codger open up his home paper—it is the first thing he picks up out of his bunch of mail and what can he find there to interest him Angus McGugan's horse died yesterday; Peter McGregor will run for the county clerkship; Horace Jell hopes to win the secretaryship of the Hilltown agricultural society; Lydia Munger has opened a millinary store in one side of the printing office; Mrs. Brown lost her hand satchel in the butchery; Dr. Dorland is attending Clara Brown who is down with a sev ere cold; Mrs. Plater broke her ankle and is in the county hospital.

Yet though he smiles at the old time styles and expressions he enjoys it all over and over again, for it takes his mind back home where his wonderful boyhood days—happy days—were spent.

MR. and MRS.

What wonderful thoughts come up when these two abreviations are printed in a news item—what intense human interest these portray.

In the country weekly paper they take the one big place in all items, from the simple visit to relatives to "Mr. and Mrs." —the great news the larger matters of human life. item of the universe, the bringer of recollections to the man far from home, who takes his old home town paper and reads the items of Mr. and Mrs. and lets his mind wander back to the days when he knew Mr. and Mrs. in knee pants and shall we say, short skirts.

It's the home town paper where the real Mr. and Mrs. news items occur. and to receive the home paper week in and week out is to know the great happiness of the world, the doings of Mr. and Mrs.

LAKE MILLS SETS AGE LIMIT ON CROWD AT PUBLIC DANCE

LAKE MILLS, Sept. 29. — All young men under the age of 21 years will henceforth be prohibited from attending public dances in Lake Mills, as will also young ladies under the age of 18.

The city council at a recent meeting passed an ordinance requiring promoters of public dances to secure a license and defines the regulations of the same. The licence fee is $6.00.

The ordinance regulates the hours when dances may be held. the age of young folks who may attend, the conduct of the dancers while attending, and in every places a ban on the old time dance where "everybody goes."

Comment on the new regulations all simmer down to the opinion that the young folks at public dances have brought the verdict down upon themselves through the liberties they have taken in the past. The ordinary waltz, two step and scottish became too tame. The "Camel walk" "bunny hug" and "shimmy" have taken their places.

Boys and girls become accustomed to going through antics at public dances that a few years back would have been considered absolutely immoral it is contended. The new dances and the liberties they afford have become so common that many young folks entered into them for the reason that "everybody else is doing it."

The city council proposes that there shall be a stop to this sort of thing in Lake Mills.

Hard work never kills—but neither does soft work.

Pirates Lair Scene of Fight

Spanish Battle on Scenes of Centuries of Conflict With Tribesmen.

NOTORIOUS BARBARY COAST

Made Famous in Present Generation by Operations of the Chieftain Mulai Ahmed Raisuli—Recalls Famous Pericardis Case.

Madrid.—That part of Morocco called the Spanish zone, where Spain's troops have just suffered disastrous reverses at the hands of the Moors with the loss of thousands of men and thousands of square miles of territory, is part of the notorious Barbary coast whose pirates preyed on European commerce for many years and carried Europeans into slavery.

In the present generation it has been made famous by the operations of the chieftain, Mulai Ahmed er-Raisuli, who captured and held for ransom Ion Perdicaris, an American citizen, in 1905. This was in the administration of President Roosevelt and evoked from Secretary Hay the historic phrase demanding "Perdicaris alive or Raisuli dead!" It resulted in the almost immediate release of Perdicaris.

Three Races in Land.

Three races inhabit Morocco, the original Berbers, or mountaineers, who conquered Spain on three different occasions; the mixed race of Arabs and Berbers known as Moors both of which races are generally Mohammedans; and the colonies of Jews which inhabit the coast cities and control the majority of the country's commerce.

The Spanish zone, where the fighting is now in progress, is a narrow strip of land along the northwestern coast fronting on the Mediterranean sea. It extends from Algeria, under control of the French, to the Atlantic ocean on the west. It does not, however, include the extreme northwestern tip of land on which is located the city of Tangier.

Spanish troops have fought the Moors for centuries, but it was only in 1912 that the northern littoral of Morocco was assigned to Spain under the terms of the Franco-Spanish treaty signed in that year. Since then Spain has been engaged at intervals in sporadic attempts to maintain her authority, with varying success and failure.

Want More Order.

Both the French and Spanish governments decided in January, 1920, to make military demonstrations in their respective zones for the purpose of preparing the way to more orderly government. The French zone was soon pacified. The Spanish territory, which is administered by Gen. Damaso Berenguer as high commissioner, was not so submissive.

Spanish troops at first made their base on the Atlantic coast of Morocco at El-Arish, also known as Laraiche. From there they penetrated well into the interior and captured a number of Moorish strongholds, including the so-called secret city of Sheshawan. For some time little activity has been reported in that western district of Morocco.

The Spaniards, however, sent another expedition under the command of General Silvestre, who established a base at Melilla, midway on a promontory which extends from the eastern end of the Spanish zone northward into the Mediterranean. From that point, General Silvestre's troops attempted to penetrate southward into the interior. Early successes were reported, but last spring the Spaniards encountered strong native troops and hostile tribesmen, estimated to number 20,000 and said to be well armed and equipped with artillery. The present reverses of the Spanish forces had their beginning early in June.

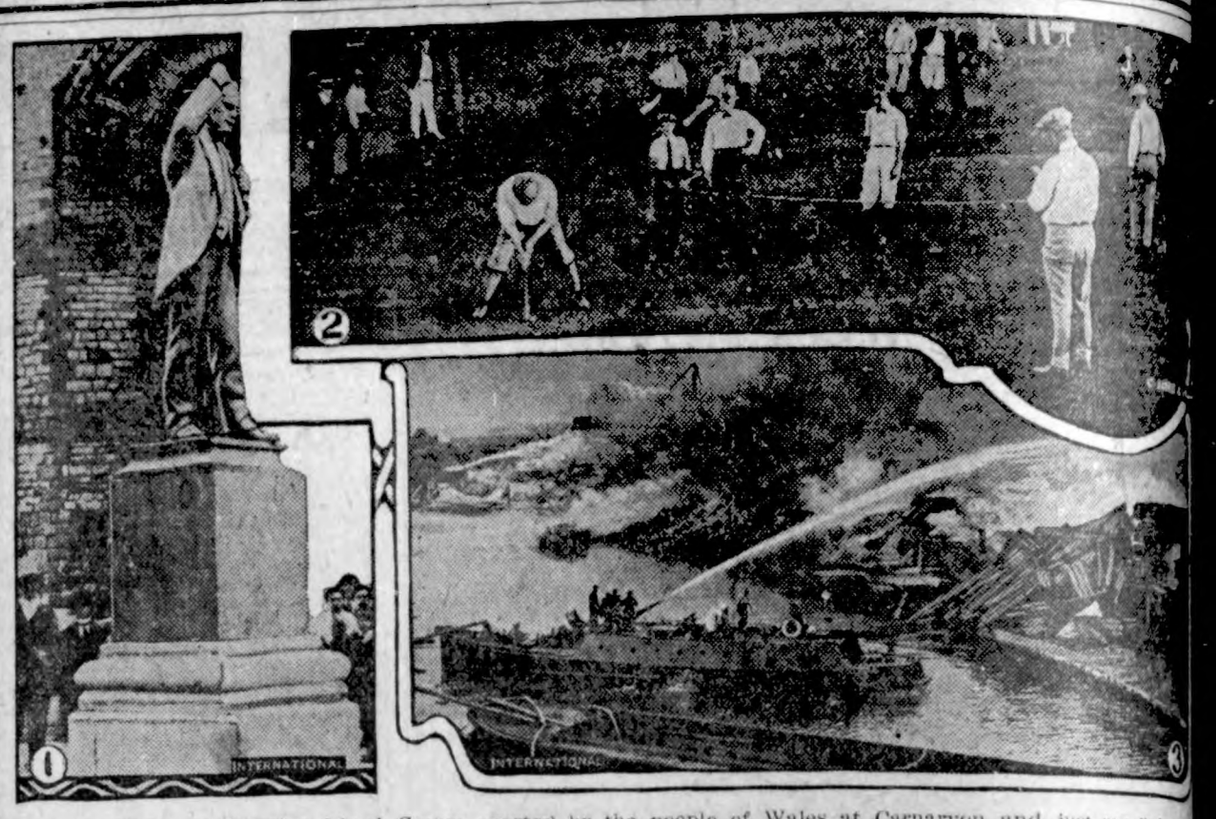
WHO FOUNDED ST. LOUIS?

Historical Society There Debates Question Before Erecting Monument Commemorating Event.

St. Louis.—The offer of the newly formed St. Louis Historical society to erect a group monument here to commemorate the founding of the city February 15, 1764, with the suggestion that the central figure by Rene Auguste Chouteau, surrounded by a group of pioneers, including Laclede, has reopened the old question as to who was the actual founder of this city.

Chouteau has been regarded by many historians as Laclede's lieutenant.

The society has had the inscription on Chouteau's tomb, showing the date of his birth at 1740, recut. Records show that if the date were correct, Chouteau's mother was only seven years old at the time of his birth.



1—Statue of Premier Lloyd George erected by the people of Wales at Carnarvon and just unveiled. 2—President Harding putting on the eighteenth green in the golf tournament of Washington newspaper men, in which he won third prize. 3—Million-and-a-half-dollar blaze in lumber yards in London started by unemployed men.

Priest Maintains Vigil Over Dead

Young Clergyman Dwells Amid Coffins of 300,000 Defenders of Verdun.

HUT GIVEN BY AMERICANS

Wooden Structure Used by Priest Until Permanent Monument Can Be Erected to Heroes of the Great War.

Paris.—A mile from Fort Douaumont, which looks down on the walled city of Verdun, France, and its ring of defenses, lives a priest who never smiles. He is young, clear-eyed, and does not need the ribbon of the Legion of Honor nor the Cross of War with the palm that he wears to tell that he has served. He lives today in a wooden hut with the bones of 300,000 of his countrymen, the defenders of Verdun.

Time has softened the sharper outlines of his surroundings, and from a distance seems to have given the 12-mile battle front a green carpet. In reality, trenches have slumped in. The rims of shell holes have been rounded by rains, and frosts and melting snows. Acres of tangled rusted barbed wire have been hidden under weeds and shrubbery.

Rifle Barrel Marks Grave.

Some inches of rusted rifle barrel protrude from the soil to mark a grave the workmen have not reached. Fragments of leather and cloth equipment lie scattered about, and even along the more frequented paths one stumbles over bones.

The wooden hut where M. L'Abbe Noel lives is perhaps 20 feet wide and 40 feet long, the gift of an American committee. At the end opposite the entrance is the altar, and, forming an aisle, are tiers of coffin-shaped boxes, with the lids resting loosely upon them. Each box is placarded with the names of the sector along the Verdun front where the fragment was found.

Flowers Blanket Coffins.

Many of the coffins are heaped high with flowers and wreaths, and on all are visiting cards put there by those whose memories center about the locality named on the box. Of the 400,000 French who died at Verdun, said the abbe, 300,000 will never be identified. An "ossuaire" is to be erected on this spot, and in it will be placed these "sacred bones," where they will rest. Each sector will have a tomb designated for it, where now there is a wooden box.

Four shrines, Catholic, Protestant, Jewish and Musselman, will be grouped about the ossuaire. Each day adds to the collection that is gathering in the temporary wooden hut which serves until the permanent structure is completed.

On the nearest hill is a wooden cross, built and erected by Marshal Petain for the dead of his armies. A few yards away is the grave of a French commander, General Anselin, killed in action. Not far distant and over the crest of the hill is the massive concrete monument built over the "Trench of Bayonets" where an entire company died as they waited, rifles in their hands, the bugle call to charge. Their bodies have never been disinterred and the protruding rifles with bayonets fixed are still clutched by the soldiers whose graves they mark, as though waiting for the long-delayed command to go forward.

The present population of Brazil is one-fourth that of the United States.

Eggs Taken From Snake Hatched Chicks in Africa

A story of chicken eggs hatched after they had been salvaged from the interior of a python is told by the publicity department of the board of missions of the Methodist Episcopal church, in New York city.

Quoting Rev. Edwin H. Richards, for 31 years a missionary in Africa, the board said that a python had wriggled out of a jungle one night, entered a hen house and eaten eight chickens and nine eggs. Natives and missionaries killed the snake, which then was opened. The eggs, found intact, later hatched into perfectly normal missionary chickens.

Secretary Denby in His Private Navy

Here is Secretary Denby in his private "navy," fishing in Lake Oakland, adjoining his farm at Clintonville, Mich.

Boy Captures Sharks After Two-Hour Battle

Cape May, N. J.—Emory Eyesman, thirteen-year-old son of Julian Eyesman, general traffic manager for the Pennsylvania railroad, ended a day's fishing trip with two eight-foot sharks to his credit. He fought with them for more than two hours, playing them along and insisting that other fishermen with him give him plenty of room. The sharks weighed a total of 940 pounds.

Negro Porter Hero of Pueblo Flood.

St. Louis.—Officials of the Chamber of Commerce in St. Louis, Mo., will request a Carnegie hero medal for Robert J. Taylor of St. Louis, negro Pullman porter, who is said to have saved 26 lives when a passenger train was overturned in the Pueblo flood June 2.

NEWS REVIEW OF CURRENT EVENTS

Federal Government Steps In to Put Down Insurrection In West Virginia.

TROOPS TO END MINE WAR

Freight Rates for Export Grain Reduced—Germany In Political Ferment—Revolt In India Suppressed—Progress of The Irish Negotiations.

By EDWARD W. PICKARD.

Thousands of armed men led by professional trouble makers, massed in the hills of West Virginia determined to invade the coal mining counties to unionize the miners there, and defying the order of President Harding to disperse and go home. Thousands of volunteer troops, deputies and mine guards gathered to resist the invasion. Two regiments of the regular army at Camp Dix and one at Camp Sherman ready to start for the scene of disturbance to enforce the edicts of the president. Army airplanes with bombs and machine guns waiting at Charleston. Proclamation of martial law in several counties of West Virginia signed by President Harding and about to be issued.

Such was the status of our own "war" at the time of writing. The condition was serious enough to demand the undivided attention of the President and his cabinet. Brig. Gen. H. H. Bandholtz, who had been sent to West Virginia to report on the situation, had found that there was no likelihood that the insurgents would disperse until a show of force was made by the government and had asked Secretary Weeks to send federal troops at once. General Bandholtz, it was understood, would be in command. In Washington Secretary Weeks said: "I don't want to say what will be done, but if we are forced to use troops, it will be a 'plenty.'"

The trouble in West Virginia is of 20 years' standing. In 1901-02 the miners' union began their attempts to unionize the coal fields there, and the Glen Jean strike was called. Ever since then the warfare has been going on, at times more serious than at others but never ceasing entirely. In recent years the conditions have been growing worse, for the I. W. W.'s and Communists and other agents of disorder and violence flocked to the region. A year ago last May the operators in Mingo county undertook to evict a number of union miners who occupied company houses, and bloody fighting resulted. The unions retaliated by calling a strike in the border counties, but the operators obtained plenty of nonunion men. The present outbreak really began last May, after federal troops were withdrawn. There was what amounted almost to an insurrection. Until now the miners have fought only with the state troopers and the deputies. Early last week Governor Morgan sent to President Harding and Secretary of War Weeks a plea for federal troops, saying the insurrectionists were beyond the control of the state forces and were seizing passenger trains to transport their re-enforcements and cutting all telegraph and telephone wires. He declared the men assembled to resist the invasion of Logan county would be utterly unable to repel the attack. General Bandholtz, who had been sent to investigate the situation, reported to Washington that the state had made only feeble efforts to check the growth of the insurgent movement, but nevertheless the President on Tuesday issued his proclamation warning the insurrectionists that if they did not at once disperse and return to their homes the army would be used to suppress them.

Although John T. Lewis, president of the national miners' union, asserts that all the trouble is traceable "to the continual assaults and outrages perpetrated upon individual mine workers by the armed Baldwin-Felts guards employed by the coal operators," he has not gone so far as to defend the miners in their defiance of constituted authority. Vice President Murray of the mine workers went to the scene of disturbance to try to induce the insurgents to return home. Other union officials had been attempting this for several weeks without avail.

All the nations invited to take part in the Washington conference on disarmament and Far Eastern questions have agreed to send delegations, the acceptance of Italy having been received last week. It will be comforting to the representatives of those nations at the meeting to learn that they will probably be accorded the same privileges as extended to duly accredited foreign diplomats, and that therefore they will be permitted to bring alcoholic beverages with them. Our government will do nothing in the way of prohibition enforcement that might embarrass the conference.

President Harding, speaking at the fall term of the war college on Thursday, expressed the belief that the time was coming when the burdens of armament could be diminished, but declared that "no matter where the best aspirations of the world lead us, there never may be a time without the necessity for armed forces."

Despite the objections of railroad men, the interstate commerce commission authorized western and southwestern railroads to reduce 5½ cents a hundred pounds the rates on grain and grain products for export from Missouri and Mississippi river points and on grain from the territory between the rivers and from Illinois to Gulf ports, Mobile to Galveston, inclusive.

The commission also authorized the railroads to publish on five days' notice reductions on grain ranging from 1 cent to 5½ cents a hundred pounds from the territory west of the Missouri river in Nebraska, Kansas, Colorado and Oklahoma to Gulf ports.

The rates from Missouri and Mississippi river points and territory between and Illinois may be published by the railroads on less than the usual 30-days' notice.

American food for the starving children of Russia is being unloaded at Riga and Reval in immense quantities and rushed by rail to Moscow. The American relief administration has declined to pool its work with the general plan of the British, French, Italians, Belgians and Japanese on the ground that the latter plan would be too much in the control of the soviets. The Socialist national executive committee of America, running true to form, has cautioned the members of the party and other workers against giving any support to the Hoover relief organization, whose agents, the Socialists assert, "under the guise of assisting the masses of Hungary, used its machinery for counter-revolutionary purposes."

The assassination of Herr Erzberger at the instance of his political foes has thrown Germany into a ferment of demonstrations and counter-demonstrations, accompanied sometimes by rather serious rioting. First the royalists took the field, at Potsdam, for the ostensible purpose of celebrating the victory of Tannenberg. The communists and independent socialists from Berlin, some 30,000 strong, enraged by the Erzberger murder, marched to the suburb and attacked the royalists. The police were compelled to intervene and killed several persons. Next day representatives of 11,000,000 organized workers assured Chancellor Wirth that they were ready to go to the front for the republic, and both the majority and independent socialists demanded that the government proceed fearlessly against the elements responsible for the anti-republican demonstrations and the death of Erzberger. At the same time President Ebert issued a proclamation declaring the intention of the government to suppress with the "iron hand" and with "unrelenting severity" all opposition to the republic. He threatened the nationalist press with suppression and confiscation and prohibited meetings, demonstrations and publications likely to encourage seditious movements. On Wednesday, the day the murdered ex-chancellor was buried, 300,000 workmen and employers in all parts of Germany left their work to take part in meetings "for the republic and against political murder." There is little doubt that the government will be able to control the situation in Germany and in general keep the reactionaries within bounds.

Over in Hungary one Lieutenant Hejas is emulating the exploits of D'Annunzio in Fiume and Korfanty in Upper Silesia. The treaty of St. Germain gave the territory of Burgenland to Austria, and the Hungarians were highly displeased. Hejas translated their feeling into action, organized bodies of irregular troops and seized considerable parts of the disputed region. The entente officials and troops there were powerless to stop them, but the Austrian government was given all moral support and told to establish its rule as best it might. Thousands of Austrian troops well equipped were moved into the territory and at latest reports were preparing to start operations again. Hejas and his forces centered at Odenburg.

It may be assumed that the Upper Silesian row is ended, at least for the present. The council of the League of Nations has accepted the task of solving the problems involved and already has begun their discussion. Meanwhile the British, French and Italian governments have decided to send no enforcements to Upper Silesia and have called on Germany to arrange for their transportation.

The victorious progress of the Greeks in Asia Minor toward Angora came to a pause after they crossed the Sakaria river. Their right wing found itself in the salt desert where water was scarce and many of the men were stricken with malaria. The Turks attacked and in three days' fighting the Greeks were forced back across the Sakaria and lost heavily in men and material. At the same time they found their communications threatened on the extreme left wing by the capture of Bilejik by the Kemalists. However, the Greeks speedily rallied both on the right wing and in the center, and resumed their advance on Angora. At this writing they are reported as in contact with the Turks' second line of defense at the Ilgin river.

And now we move on east to India—for each of the relatively small wars demands some attention. On the Malabar coast, where the Moplahs, who are Mohammedans of Tartar descent, have been in revolt, the British have regained the upper hand and the fanatics are reported to be fleeing into the hills, having lost about 700 of their number. Before they ran away, however, they massacred many Hindus and killed a number of British soldiers and civilians. The Malabar coast is under martial law and the home-rule plans of the Moplahs have gone glimmering.

This brings us to Great Britain's greater trouble—the Irish question. Premier Lloyd George, growing weary as the rest of the world of the endless row, told the Sinn Feiners that they must accept or reject his proposals, for the constant exchange of notes was getting them nowhere. Whereupon the Sinn Feiners dispatched another note to the premier. It was drawn up by the Irish republican cabinet, for Dail Eireann had adjourned after entrusting the cabinet with plenary powers. The note was carried by a courier to Scotland, where Lloyd George was taking a holiday, and at this writing its contents are a secret. If, as is probable, it is only a further elaboration of the arguments put forward by Sinn Fein, the premier is likely to lose the team over which he usually has such complete control.

In Belfast the truce was broken last week, and for several days there was continual and bloody fighting between the nationalists and the Orangemen, with a number of fatalities. At last the military there contented themselves with patrolling the streets in armored cars, pleading for peace. Even when the lord mayor protested against their inaction they adopted more vigorous methods, with good results.

NEW WAY TO DETECT CRIMINALS

French Detective Invents Two Sciences to Do Work.

Poroscopy and Graphometry Promise to Make Way of Transgressor Harder Than It Is.

Paris. — Poroscopy and graphometry are two new "sciences" intended to make the way of the transgressor harder than it is. Poroscopy is the science of measuring the pores of the body. Graphometry is the science of form and relative proportion of letters in handwriting.

Dr. Edmund Locard, head of the Lyons police laboratory of identification, has elaborated these new methods of crime detection to a point where the results have been accepted in the Lyons courts and are said to have been proved effective.

In poroscopy, Doctor Locard holds the number, form and position of body pores remain the same throughout life. The impression of the pores in Doctor Locard's system is colored by chemical vapors or very fine powders so they may be photographed under a microscope.

Doctor Locard tells of several successful prosecutions supported by his new sciences. In one case a burglar wore gloves, but left an impression of a small surface of forearm. That trace convicted him. Another burglar, perspiring freely, left the impression of pore surfaces through his gloves and went to jail.

Graphometry, as termed by Doctor Locard, consists primarily in the theory that handwriting shows always a certain relation in size between letters and unmistakable characteristics in form, particularly in loops. In addition to these principles Doctor Locard, of course, utilizes generally accepted methods of detecting forgeries.

Need Strength
to the coughs, colds and other diseases of winter. Restore circulation, throw out the drugs, tone up the nerves and fight the stagnation of catarrh. Then winter will have no terrors.
PE-RU-NA
USED BY THOUSANDS
Aids digestion, regulates the bowels, clears away all catarrhal inflammation. It builds up the strength by enabling the organs concerned to properly do their work. Thousands testify to its value after protracted sickness, an attack of Grip or Spanish Influenza.

PREPARE GARDEN LATE IN SUMMER

One of Most Important Things Is to Burn or Haul Away All Trash of Any Sort.

FIRST PUT BEAN POLES AWAY

Plow or Spade Ground and Cover With Coarse Manure to Put It in Better Physical Condition for Spring Planting.

Prepared by the United States Department of Agriculture.

The man who makes a genuinely good garden does not begin in the spring. He begins in the fall. But the spring is a long way off, you say? The bean poles are beginning to rot already, and it is time right now to take out insurance by putting them away properly. And that is only one of a considerable number of simple things of equal importance that should be done in the garden—now.

Because you have harvested all the garden crops do not fall into the serious error of thinking that you do not need to give any further attention to the garden till next spring.

Clean-Up Time in Garden.

One of the most important things is to clean up. You wouldn't excuse a slovenly kept house. Well, slovenliness in the garden is hardly more to be tolerated. Good housekeeping in the garden is a matter of importance, not merely because a slovenly garden in winter is the most desolate-looking thing in man's perversion of nature, but because the success of next year's vegetables depends on it, largely.

Most of the diseases and insect pests that affect garden crops live over winter in the remains of the past season's crops. Such materials as cabbage stalks, bean vines, tomato vines—in fact, trash of any sort in the garden—should be collected and hauled to a dump, or burned.

Then, having the ground clean, there is another thing of equal importance. It should not be allowed to lie bare over winter. Ground exposed to beating rains will puddle and wash and great loss of plant food is sure to result. A very good plan is to sow the garden in some green crop, such as rye or winter barley. That protects the ground and adds organic matter to the soil. But there is, according to garden specialists of the United States Department of Agriculture, a still better plan and one that can be put in practice after the season for sowing rye or barley is long past. That better plan is to plow or spade the garden in the fall or as early in the winter as possible and give it a heavy coating of horse manure. Leave the ground in the rough, as this will prevent the loss of the valuable ingredients in the manure.

This Boy Began Gardening Operations at Right Time.

Gives Early Vegetables.

Now, what have you gained by that plan? Well, in addition to fertilizing the ground and putting it in better physical condition, this: The garden can be planted earlier in the spring than if it had been left bare or planted to a green crop. And that amounts to a great deal. It amounts, frequently, to having a number of nice vegetables on your table two or three weeks ahead of your neighbor who did not break his garden till spring. Such crops as smooth peas, beets, lettuce and onion sets can be planted as early in the spring as the ground can be worked. If plowing or spading the ground has been deferred till spring, a delay of as much as three weeks is likely to occur after these crops should have been planted—which means, reducing it to money measure, that you will go on buying vegetables for at least that long after you might have been bringing them in nice and fresh from your own garden if you had done a little work in the fall or early winter.

PUTTING PLOW AWAY IN FALL

Excellent Plan to Apply Good Coat of Axle Grease and Cover With Thin, Dry Dust.

When you put your plow away for the season, put a good coat of axle grease on the point and moldboard and cover the grease with a good covering of dry dust. This will cause the axle grease to stay where the grease alone would dry out, and will save a lot of scouring when plow time comes.

STRONG APPEAL MADE FOR HEALTHY CATTLE

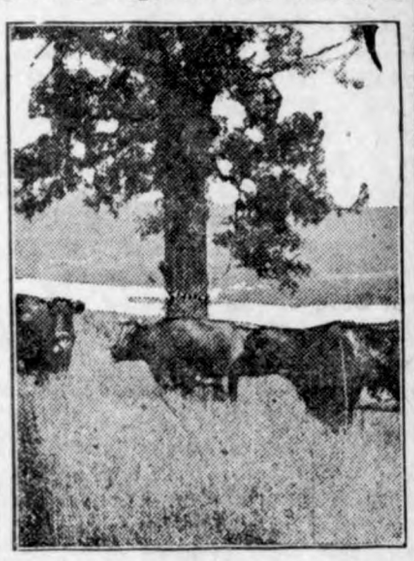
Poster Used in Tuberculosis Eradication Campaign.

Careful Experiments Have Demonstrated That Disease Cannot Be Detected to Any Great Extent by Physical Examinations.

(Prepared by the United States Department of Agriculture.)

Unlike most other infectious diseases, tuberculosis has an insidious way of working under cover, and oftentimes animals of the most healthy appearance are found to react to the tuberculin test, say veterinarians of the United States Department of Agriculture. No cattle owner can afford to live in doubt as to whether his animals are affected, they add. This point is brought out clearly in a two-colored poster published by the department, on which is shown two herds of dairy cattle. From all appearances the animals of both herds are healthy, but as a matter of fact those of one herd are afflicted with tuberculosis.

The poster also shows two children—one healthy, one diseased—and the point is brought out that tuberculous animals may transmit the disease to children who drink the milk produced. The poster is a strong appeal for healthy cattle, and it is to be used extensively in the tuberculosis eradication campaign being carried on by the department.



Tubercular-Free Cattle.

Careful experiments in practical work have shown that tuberculosis cannot be detected to any great extent among animals by physical examinations. The most reliable method is the tuberculin test applied by a trained operator. Tuberculin, while regarded as the most accurate diagnostic agency known to science, is safe only in the hands of a trained and skillful operator who is acquainted with its limitations and with the symptoms it produces in the animals to which it is applied, the department veterinarians say.

MANURE SHOWS GREAT VALUE

Where Applied to Clover Fields It Increased Yield Threefold—Phosphorus Helps.

Due to the cool weather of the spring and the freeze which occurred early in the season, the Iowa agricultural experiment station has had an opportunity to show the value of common barnyard manure on clover. It has been found that where manure was added to the fields only once in the rotation the stand has been increased three times over the plots where no manure was used.

Eight tons per acre were added to the manured plots and here the leaf surface and root development are heavier and better. Where phosphorus was added at the same time as manure, plants are even more vigorous and have a greater height.

CARE FOR LATE VEGETABLES

To Store Late Products Nothing More Is Required Than Use of Existing Facilities.

The storing of late vegetables is often profitable for those who grow them in sufficient quantities for marketing, giving the grower the direct benefit of the winter price. To care for the surplus vegetables in many cases requires nothing more than the use of existing facilities in the form of a storage room in the basement of a dwelling or under an outbuilding or to build an outdoor cellar of wood or masonry. If permanent facilities are not available, late root crops can be kept in outdoor pits or banks, requiring no cash outlay except for labor.

SHEEP GOOD AS SCAVENGERS

Feed and Care Are Essential to Develop Flock for Mutton—Animals Keep Down Weeds.

Sheep possess great ability to renovate the soil, keep down all kinds of feed that would otherwise often be weeds and to consume odds and ends totally wasted, but the man who undertakes to develop a really profitable flock of mutton sheep must get away, as far as possible, from the idea that they are kept because of their ability as scavengers. He must like his sheep and plan to give them the most painstaking care and the best food that his farm affords. Unless he does this he is likely to have trouble.

Home Town Helps

SLABS PROTECT THE GRASS

Ornamental Garden Walk of Peculiar Design Has Been Found to Serve Purpose Admirably.

An old Dutch method of making ornamental garden walks was to form tessellated patterns by the use of concrete slabs in combination with the grass sod. The owner of extensive grounds at Colorado Springs has used this method for the construction of

The Idea of "Watch Your Step" Has Been Used Literally by a Western Gardener in Laying Out His Walk. Stone Slabs Have Been Placed in the Middle of the Turf.

what he calls a "watch your step" walk. The slabs are placed in the turf so that they correspond to the footsteps of a person walking along the garden path, and it is possible to traverse the whole length of it without stepping on the grass.—Popular Mechanics Magazine.

SCENERY MARRED BY SIGNS

Public Justified in Taking Strict Measures to Put a Stop to Growing Nuisance.

Everywhere the motorist travels the natural beautiful scenery is marred by glaring signs, not only small boards but immense structures often a hundred feet or more in length and twenty or more feet in height.

Just at a bend in the road where the tourist expects to have a fine view sweeping over a broad valley the scene is completely cut off by a monstrous and offensive structure covered with a flaring advertisement.

At some points both sides of the road will be lined with these unsightly and ugly advertising walls.

In England the disfiguring of fences, buildings and other places with signs is prevented by law on the ground that the good taste of the people is offended and the landscape disfigured.

Some of the worst offenders are manufacturers who are interested in the development of motoring. They have boarded up the roadways along the whole eastern part of the United States, much to the annoyance of motorists and the disfigurement of the landscape.

If the nuisance cannot be stopped any other way, motorists can at least agree not to patronize any concern aiding in detracting from the natural beauty of our country and the pleasure of the public.—New York Sun.

Writer Waxes Sarcastic.

The trustees of the city of Roseville, Calif., have clearly no eye for art. At first, it may seem as if they were justified in refusing permission to a certain advertising firm to erect billboards within the city limits. But then these were no ordinary billboards—at least, so the advertising firm declared. They were in fact, "beautiful panels, real works of art." Yet the city trustees refused. Worse and worse, the women of Placer county, in which Roseville is situated, have banded themselves together to prevent the erection of any more billboards in Placer county, whether in the form of "beautiful panels" or otherwise. It seems strange, but then some people are notoriously blind to their privileges.—Christian Science Monitor.

Woman in Civic Affairs.

There is promise of betters things for Connecticut in the fact that the League of Women Voters of that state has sent out a questionnaire befitting the slogan, "Know Your Own Town." This should be well worth doing for the information to be obtained, intended for the local communities, and as a basis of future state legislation. But no doubt the most important factor in the activity is, as the workers seem to think, the awakening among women of an interest in civic affairs. The neighborhood is certain to hold interest for anyone, and so is a good starting point.—Christian Science Monitor.

Seattle Saves Money.

Seattle, Wash., is saving its citizens approximately $1,000,000 a year by reason of the lower rates it enjoys for electricity through its municipal plant. The retail rate is 6 cents per kilowatt hour, whereas the rate under private ownership was 8½ cents.

DYED HER DRAPERIES, SKIRT AND A SWEATER

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—advertisement.

Compulsory Elegance.

"Is there any reason why the farmers should not appear in dress coats and patent leather shoes?"

"I s'pose not," replied Farmer Corntossel. "Maybe it's what we'll be brought to. Dress coats and patent leathers is about all some of these rusticators leave behind to apply on their board bills."

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Advertising.

Though a man usually makes his own enemies, he isn't satisfied with his handiwork.

Some men who don't seem to know when they are whipped, doubtless have suspicions.

WIFE TAKES HUSBANDS ADVICE

And Is Made Well Again by Lydia E. Pinkham's Vegetable Compound

Springfield, Mass.—"The doctor told my husband that I had to have an operation, otherwise I would be a sickly woman and could not have any more children on account of my weakened condition. I refused to have the operation. My husband asked me to try Lydia E. Pinkham's Vegetable Compound to see if it would not help me. For the first four months I could do but little work, had to lie down most of the time, was nervous and could eat hardly anything, but my husband was always reminding me to take the Vegetable Compound, which I did. Of my eight children this last one was the easiest birth of all and I am thankful for your Vegetable Compound. I recommend it to my friends when I hear them complaining about their ills."—Mrs. M. NATALE, 72 Fremont St., Springfield, Mass.

Sickly, ailing women make unhappy homes, and after reading Mrs. Natale's letter one can imagine how this home was transformed by her restoration to health. Every woman who suffers from such ailments should give Lydia E. Pinkham's Vegetable Compound a fair trial. It is surely worth while.

MOTHER! MOVE CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Hurry, mother! Even a sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Very few people get rich without trying.

Good Hint.

NOTICE TO CONTRACTORS

Sealed bids will be received at the office of the County Auditor, Garner, Iowa. until 1:00 o'clock P. M. for, for October 4, 1921, for grading and incidental work on the Primary Road, three miles east of Britt, as shown on the plans for Federal Aid Project No. 94.

Bids will be received at the above office promptly after the time for receiving same has closed.

A certified check, unregistered Liberty Bonds, or bidder's bond, amounting to five (5%) of bid, made payable to the County Auditor, shall be filed with each bid, which in case of bidder receiving the award, should he fail to execute a contract and file a bond within ten (10) days after the acceptence of his bid, shall be retained by the County as liquidated damages.

The proposed work of constructing 1000 ft. to finished grade requiring 2649 cu. Yds. of earth excavation.

Plans and specifications for the work may be seen and may be secured at the above office or at the office of the County Engineer. Garner, Iowa. The County reserves the right to waive all technicalities and to reject any or all bids. All contracts awarded for this work are subject to the approval of the State Highway Commission before becoming effective as contracts.

Chris Jacobs
County Auditor.

LITTLE BROWN CHURCH IN NEW ROLE; BABES BROUGHT FOR BAPTISM

NASHUA, Sept. 29.—Famous in in song, "The Little Brown Church in the Vale", near Nashua, Chickasaw county, is the mecca for couples matrimonially inclined and the minister is getting the largest part of his salary from fees thus contributed. A rental of $5 is exacted for the use of the church for such ceremonies. Throughout the summer and autumn months scarcely a day passed but what there is a wedding party at the church. Oft-times the officiating clergyman is taken along and in such cases the resident minister loses out. But a new use was made of the church recently when two children were brought all the way from Dearborn, Mich., to be baptized.

WESLEY, Sept. 29.—One of the recent large estate deals in Kossuth county land was made in a few days ago, when the William Green farm located near Algona, on the north Iowa Pike, was sold to P. J. Griener of Wesley Ia., a former implement dealer.

The farm is a 99 acre tract, with all modern improvements and is operated by Mr. Greene as a hog farm.

Mr. Griener paid $550 per acre for his new home and turned in an 80-acre unimproved tract located in Irving township at $250 per acre.

IOWA NEWS
KOSSUTH COUNTY FARM SELLS FOR $555.55 AN ACRE

Last week the newspapers of Iowa tell of land sales at prices which tend to show that Iowa Farm land values are firm on the basis of two years ago. The Algona advance last week chronicled the sale of a farm for $55,000. The Advance report is as follows.

Murtagh Bros. have sold the Wm. E. Greene farm, which they purchased last winter, to P. J. Griener, of Wesley, the consideration being $55,000 or $555.55 per acre. A thoroughly tiled 80 acre farm in the St. Benedict neighborhood was taken in the deal at a valuation of $250 per acre. The Greene farm is just located east of Algona, adjoining the North Iowa Pike, on the north, and is one of the best improved farms in this locality. The buildings and fences are all new, and the land is well drained. This is the highest price farm ever sold in the county. Mr. Griener, the purchaser is well known in this section, having for several years been engaged in the Implement business at Wesley. The business he recently sold. —Forest City Republican.

LARGE BARN ON NEWMAN FARM BURNED SATURDAY
Tramp Refused Sleeping Place is Thought to Have Caused the Barn Fire

The large barn on the farm known as the Hartlip farm, 2 miles southwest from Forest City and owned by E. F. Newman of this city, was burned to the ground early Saturday evening. Three horses six cows and fifty tons of hay and other property in the barn were burned. The property in which was destroyed was partially covered with insurance. Early in the evening the tenant, Elias Larson, went to the barn to harnes a rig to drive to town with and while at the barn noticed a stranger in the hay lof. Mr. Larson ordered the man out but the tramp refused to go and then Mr. Larson suggested that perhaps when he returned from the house with a gun the stranger might move. The man then left the building goining south. Mr. Larson drove away from the farm and when a half a mile away turned around and discovered the barn on fire. There was nothing that could be done to save the building or the contents. The barn was a building 65x53 feet.

Mr. Newman, the owner was notified of the loss about ten o'clock and drove out there that evening. —Forest City Republican.

YOU WILL HAVE JUST AS MUCH MONEY BUT THERE WILL BE LESS OF IT

Washington, Sept. 29—The Government soon will radically change the form of its paper money which has remained almost unaltered since the foundation of the Republic. This change will be in the direction of bills of smaller measurements, particular the bills of the smaller value. Two reasons justify the change. The first is that of economy. Paper which is now used for government bank notes is made by a secret process and is obtainable only at high cost. At present four bills are made from one sheet of this paper. Under the proposed change five bills will be made from a sheet of the same size. Another reason for the change is to reduce the danger of counterfeiting. If the bills of smaller denominations are made smaller in size while those of larger denominations are left the same size as now, it will be impossible for counterfeiters to raise the $1, $2. $5, and $10 bills to bills of larger denomination.

Silage has been found to be an economical feed due to the fact that the starch of the corn is not hurt by the process of ensiling. The Iowa Agriculture Experiment station has found that 10 per-cent of the plant remains intact thru fermentation and that the processes of fermentation and forming of acids does not concern the starch.

STATE BUYS 134 ACRES OF PILOT KNOB TRACK
Remainder Of 236 Acres May Be Closed For During the Coming Week.

M. M. Tompson and O. E. Gunderson were at Des Moines Wednesday to negotiate the final matters in the transfer of he Pilo Knob property to the Iowa State Park Commission. 236 acres of land will be included in the first designation of this State Park, including Pilot Knob proper of 135 acres owner by R. C. Plummer; 53 acres of the farm belonging to H. L. Taylor. 30 acres from Jerry Chance, 10 acres from the farm owned by J. C. Jessen of Story City, 5 acres from Kristian Nelson and three acres from Andrew Teign. All the owners of this property have made a sacrifice of their holdings to help consumate the negotiations.

The transaction was closed for the Pilot Knob 135 acres and it is expected that the other tracts included in the park region will be closed for during the week. The committee had the deed for the Pilot Knob quarter and the abstracts had been passed upon. The other tracts are on contract and must be submitted to the attorney general's office. As the state attorneys office was taken with the hearing of the railroad assessments now before the courts at Des Moines it was necessary to delay the closing for the other parcels. —Forest City Republican.

THE PLAIN TRUTH ABOUT IOWA

Iowa farms in 1920 produced one-fifteenth of the total value of farm products produced by all the forty-eight states of the United States. It stood at the top of the list, with a total value of farm products amounting to $1,258,201,000, while Texas, with a tremendously larger area, stood second with products worth $1,074,879,000. Missouri, Kansas. New York, Ohio, Pennsylvania, Wisconsin, Indiana, Nebraska, and California rank next in order, but all of them had farm products values of less than a billion dollars.

Iowa's farms in 1920 produced on the average products worth $5,809 per farm for 213.312 farms. That is excelled only by the average farm production in two states with great livestock ranches, Nevada and Wyoming.

MIDDLE WEST WHEAT SALES BRINGS HOPES OF PROSPERITY

Kansas City, Sept. 29 —According to the records of the Board of Trade the movement of wheat at this point this esason eclipses all previous records. A statement isued by the Chamber of Commerce states that business conditions in Kansas City territory reflect the benifit of this tremendous movement

"Practically all of the vast sum of money obtained from this crop will first find its way to the farmer," says the statement, "and place him in a position to pay his obligations to the banks and country merchants. When he has done this he immediately becomes a buyer. The country merchant likewise becomes a buyer. The banker, with the farmers paper taken up and sufficient funds on hand, is ready to extent credit to all who may deserve it. While the movement of wheat is the opening wedge for this avenue of business, it is not all, as prospects are very bright for an exceedingly good corn crop which will add more millions of buying power."

SUNLIGHT IN HOG HOUSES
Desirable to Have Plenty When Farrowing Time Comes

Farmers who want the greatest amount of sunshine in their hog house must decide upon a time for farrowing in the spring and then build the house so the windows will admit the most sunshine. According to John M. Evvard, hog specialist at the Iowa Agricultural Experiment station, the earlier the time of farrowing the lower the windows. If hogs are to be farrowed in central Iowa in January then the windows should be close to the ground while in March pigs, which is the common period of farrowing in the state, should live in a hog house with windows six-feet nine inches above the ground. These figures are gotten by computing the height of the sun at this time of the year in latitude of the state and can be found in full in tables printed in bulletin No. 94 published at Ames.

In order to get the most value of the sunshine inside the hog house Mr. Evvard advises the use of wire gates and partitions between the pens. This will allow the sun to get thru and afford better reflection of the sunshine. This allows the floors to dry out and keeps the building more sanitary.

When a man buys a horse he finds out about its disposition, and if he'd take the same precautions in getting a wife divorce judges would have more time to go fishing.

Mr. and Mrs. C. J. Bode and family visited at the Clilsvig home Sunday.

GET GOOD OUT OF STRAW

Spread Old Stacks on Farm and Help the Land.

Farmers who have old stack bottoms on their farms should put this straw in a manure spreader and put it on the land. Considerable fertility can be returned by this means say soil experts at Iowa State College and at the same time an eyesore can be eliminated from tre farmyard.

Placing racks on the sides of the manure spreader much straw can be hauled at a load. Where this straw is wet, of course the rack will not be needed. New straw that will not be used for feed could be placed on the winter wheat and this will furnish a good covering and make a good fertilizer. One farmer last winter reported that the use of straw prevented winter killing.

STATEMENT OF OWNERSHIP

of The Klemme Times, published weekly at Klemme, Iowa, for October 1, 1921

State of Iowa,
Hancock County, ss.

Before me, a Notary Public in and for the State and County aforsaid personally appeared R. A. Jorgenson, who having been duly sworn according to law, desposes and says he is the publisher of the Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforsaid publication for the date shown in the above caption, required by Act of August 24, 1921.

1.That the names and addresses of the Publisher, Editor, Managing Editor, and Business Manager are:

Publisher, R. A. Jorgenson, Klemme, Iowa.

Editor, R. A. Jorgenson, Klemme, Iowa.

Managing Editor, R. A. Jorgenson, Klemme, Iowa.

Business Manager, R. A. Jorgenson, Klemme Iowa.

2 That the owner is R. A. Jorgenson, Klemme, Iowa.

3. That the known bondholders, mortgagees. and other security holders are: None.

R. A. Jorgenson, Owner

Sworn to and subscribed before me this 28th day of September, 1921.
(SEAL) F. J. Wenck
My commission expires July 4, 1921.

WONDERFUL GAIN IN WEIGHT REPORTED

Young Woman Only Weighed 76 Pounds—Now Weighs Over 100 and Is Gaining Every Day.

"Before I began taking Tanlac I only weighed 76 pounds, I now weigh over one hundred and am gaining every day," said Miss LaRue Davis of Chattanooga, Tenn.

"I bought my first bottle of Tanlac at Gas City, Ind., and it helped me so much that I continued using it. I have always been very delicate and suffered a great deal from stomach trouble and rheumatism. I rarely ever had any appetite and simply could not relish anything. I fell off until I only weighed 76 pounds and was so thin I looked perfectly awful. This is the condition I was in when I began taking Tanlac.

"Oh, I feel so different now. Even my complexion is improved. My appetite is good and I can hardly get enough to eat. Tanlac is simply grand and I can truthfully say it is the only medicine that has ever done me any good."

Tanlac is sold by leading druggists everywhere.—Advertisement

No Argument.

"Do you deny that we are descended from monkeys?"

"If you want to claim that descent, old man, I won't dispute you. Why should I argue with you about your family tree?"—Louisville Courier-Journal.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores. Advertisement

"Yes, but I'm not one of them."—Detroit Free Press.

British Peers Selling Estates

Claim Action Is Forced Upon Them by Taxation and Death Duties.

MUST SEEK SMALLER HOMES

One Big Landed Proprietor After Another Is Dividing and Selling His Holdings—In Same Families for Many Centuries.

London.—England's great estates are crumbling under the weight of taxation and death duties and one big landed proprietor after another among the nobility is dividing and selling his holdings, many of which have been in the hands of single families for centuries.

The latest indication that peers are finding it necessary to seek smaller homes comes in the announcement of the duke of Portland that he may have to abandon his palatial mansion, Welbeck Abbey, in Nottinghamshire. This is only one of the residences of the duke, who owns some 200,000 acres in England.

Duke Expresses Fears.

"For centuries past landed estates have been handed down from generation to generation," said the duke, addressing his tenants on the occasion of the coming of age of his son Lord Francis Cavendish. "Landlords and tenants have lived on terms of mutual trust and affection. I fear, however, that the state of things is passing away, for with the present weight of taxation and the extremely onerous death duties, the future may become very uncertain for all landed proprietors. If this is good for the country, I certainly do not complain.

"With regard to my own case, it may not be possible for me and my family to continue to reside at Welbeck, but I fear that there can be little doubt that those who come after me will not be able to do so."

Many Connections Severed.

On all sides historic houses are finding new tenants and ancient families are severing their connection with the soil. The duke of Devonshire sold Devonshire house in 1919 and Stowe house, the property of Baroness Kinloss, was disposed of recently.

Others who have sold their properties recently include the duke of Bedford, the duke of Westminster, the duke of Rutland, the duke of Grafton, the duke of Marlborough. Lord Leconfield, Lord Beauchamp, Earl Bradford, Lord Aberdeen, Lord Lovat, Lord Harrington, Lord Harlech, the countess of Warwick and Sir Richard Bulkeley.

Runnymede, a meadow on the bank of the Thames river, in Surrey, site of the historic battle where the barons wrested from King John the Magna Charta in 1215, was up for sale but aroused sentiment compelled its withdrawal. Attacking the government in the debate on the corn production acts repeal bill, Lord Lincolnshire in the house of lords declared the present ministry was preparing to sell the crown lands and said nothing remained but "to pawn the crown jewels."

Aged Woman Chokes Weasel.

Mount Carmel, Pa.—Although seventy-seven years old and recovering from a fractured rib sustained three weeks ago, when a door blowing shut knocked her down the cellar steps, Mrs. Mary Ramsey of Fisherdale went to the rescue of a chick she heard crying in distress and found a large weasel carrying it away. She caught the weasel with her bare hands and choked it to death.

Man's Span of Life Increased Four Years

Columbus, O.—The span of man's life has lengthened fully four years within the last quarter century, in spite of the extra hazards which have come with Twentieth century progress.

So declares Dr. George W. Hoglan, secretary of the American Insurance union, who adds that "within another generation the allotted threescore years and ten will be a thing of the past."

RESTORING A SHRINE

Solemn ceremony marked the restoration of the statue of the Madonna Marie at Monta Grappa, Italy. During the war, Monta Grappa became one of the front-line trenches, and the statue of the Madonna was removed.

British Take German Wives.

London.—Seven British officers with the army on the Rhine have married German women since the occupation, it was stated in the house of commons by a government spokesman in reply to a question.

Bandits Robbed Soldiers in Hospital.

Chicago.—Bandits invaded a government hospital here and took all the money and cigarettes possessed by two wounded veterans of the World war.

Army of 50,000 Lost in Month

General Lu's Forces Wiped Out by Mutiny, Surrender and Battle Losses.

CANTONESE WIN THE "WAR"

Righteousness of Their Cause Given as Cause for Victory in Battle Between Two Chinese Provinces —Gambling Licensed.

Canton.—The "war" between Kwangtung and Kwangsi has seemingly terminated with the fall of Nanking on July 22—just a month after the beginning of hostilities—when Lu Yung-ting, the foremost of southern militarists, made his official exit from the province which he had dominated for ten years.

General Lu was at one time inspector general of the two Kwang provinces, and a constitutionalist leader when constitutionalism was popular in the southwest.

50,000 Army Wiped Out.

Prior to the opening of recent hostilities General Lu had an army of nearly 50,000. He lost it all within a month by mutiny, desertion, surrender and loss in battle.

The Cantonese have won. They attribute their victory to the righteousness of their cause, to disaffection among the Kwangsi forces toward their leader and to better organization and discipline in the Canton army, to assurances given the people of Kwangsi of noninterference with their ambition for self-government, and to Dr. Sun Yat-sen's political doctrine of representative government.

The military governors of Kwantung province have looked upon that province as conquered territory since the one-time monarchist governor, Lung Chi-Kuang, was ejected, notwithstanding the Cantonese played no small part in ousting Lung.

Gambling Is Licensed.

Under the administration of the Lu Yung-ting faction licensed gambling was revived under the pretext of raising revenue for military purposes, burdensome taxes were imposed to the detriment of trade and industry, and millions of dollars of worthless paper money issued without security.

The Kwangsi people themselves have played an important part in helping the Cantonese to drive the militarists out of the province. Besides organizing revolutionary forces to supplement the Canton armies, they have carried on valuable propaganda to convince their fellow clansmen of the good intentions of the Cantonese.

Cantonese leaders now declare that they have no ambition to dominate Kwangsi. Gen. Chen Chung-ming has repeatedly refused to allow military authorities occupying Kwangsi towns and cities to establish political organs or offices which will be misinterpreted or misunderstood by those who are antagonistic to the constitutionalist government.

Home of the Roumanian Embassy

This is the Franklin Ellis home in Washington which the Prince and Princess Bibesco will occupy as the Roumanian embassy. This home is noted for its large ballroom. It has been occupied for the last few years by Colonel and Mrs. Robert M. Thompson of New York. It is located just off Sheridan square.

WATER FROM ARTESIAN WELL

Why Method of Bringing It to Surface Is Only Successful in Certain Localities.

Artesian wells are possible only in certain localities. When there are pervious strata lying between impervious beds the water percolating through will be imprisoned; lying upon the lowest, and rising to some point in the highest, when a previous stratum brings it to the surface and it escapes in the form of spring. If, however, a shaft can be sunk to the lowest point, the water of the whole basin will pass upward for escape and will rise to a level corresponding to the greatest height to which the imprisoned strata reaches. The wells were named from one at Artois, France, which was the first sunk with full knowledge of the principle involved. The Chinese from time immemorial have used these wells, and they have also been used for centuries in the neighborhood of Vienna. The artesian well at Grenoble, near Paris, throws water to a height of 32 feet above the surface at the rate of more than 500 gallons a minute.—Boston Globe.

And Attractive.

"What is meant by a 'national figure,' pa?"

"A dollar mark, my son."

It is a wise proverb that can't be effectually lamed by another one.

REALLY NOTHING TO MENTION

Outside of a Few Little Pleasantries Campaign in Chiggersville Was a Quiet Affair.

"Was the last municipal campaign in Chiggersville a lively one?"

"No," said Squire Witherbee. "I can's say it was as lively as some political fights we've had there in th' old town."

"The candidates didn't indulge in personalities?"

"None to speak of. The Hon. Jasper Suggs, who was a candidate for mayor, called the Hon. Cicero Fillikins, who was th' rival candidate, a pillager of widows an' orphans, a white-livered skunk an' a flop-eared hound, an' Fillikins told the voters that Suggs was a wolf in sheep's clothing, an' a gin-soaked, booze-guzzling political turncoat, but outside of a few little pleasantries like that it was one of the quietest campaigns we ever had in Chiggersville."—Birmingham Age-Herald.

Imperturbable Official.

"Is this the detective bureau?" asked the disheveled stranger.

"It is," replied a corpulent man in uniform who was seated at a desk and writing in a large ledger.

"I'm lost."

"You are, eh?" replied the corpulent man, as he continued writing. "Well, if you can prove that anybody's missing you we'll take up the case."—Birmingham Age-Herald.

Three-Year-Old Girl Walks Up Pike's Peak

Colorado Springs, Colo.—Miss Helen M. Riordan, three-year-old daughter of Mr. and Mrs. George J. Riordan of New York city, holds the world's record for the ascent on foot of Pike's Peak.

She and her mother walked up to the burro stand, where they stayed all night. Early next morning they started afoot on the last lap of the ascent, where all the difficult climbing comes in, because of the altitude and cold and winds. The child walked the entire distance unaided.

At the summit, which was reached about noon, she appeared less fatigued than her mother.

Some men judge by appearances, but detectives judge by disappearances.

LISTEN TO THIS, YOUNGSTERS!

No Exams, No Home Work in These Public Schools.

Evanston Superintendent Announces New Regime Which Includes Music, Folk Dances and Movies.

Evanston, Ill.—Music is just as important as the multiplication table and folk dancing is as great a spur to youthful brains as is geography, in the opinion of Frederick W. Nichols, superintendent of school district No. 76, comprising the South Evanston schools, who announced a new regime for the Lincoln, Oakton, Central and Washington grade schools.

The four schools will be open to the pupils from 8:30 o'clock in the morning until ten at night. Classes will last until 3:30 in the afternoon, but pupils will be permitted to go home at any hour their parents desire.

"I am going to eliminate home work," said Superintendent Nichols. "It is the bugbear of school children. And there will be no examinations; they merely worry the youngsters. The students will do all their scholastic work right in the classrooms."

In addition, the schools will remain open until ten o'clock in the evening for special classes in manual training, music, languages, art, dramatics, athletic games, folk dances, domestic science and movies. The parents will be invited to come to these classes with their children.

"Examinations are an unhealthy, antiquated tyranny," added Superintendent Nichols. "Growing children should not be compelled to sit in classrooms all day and then lug books home for night lessons. You can't get an estimate of a child's mental equipment by insisting that he cram a lot of facts in his head and scribble as many as he can remember on the semester exam papers.

Do you know what constitutes a strong constitution?

To have sound, healthy nerves, completely under control, digestive organs that are capable of absorbing a hearty meal, means you have a strong constitution! Your general attitude is one of optimism and energy.

But an irritable disposition, frequent attacks of indigestion, and a languid depression, indicate your system is not in correct working order.

Probably you are not eating the proper food. Probably the nutritious elements are not being supplied to your system in the proper way.

Grape-Nuts is the wholesome, delicious cereal that promotes normal digestion, absorption and elimination, whereby nourishment is accomplished without auto-intoxication. A mixture of energy-giving wheat and malted barley comprise the chief elements of Grape-Nuts. A dish at breakfast or lunch is an excellent, wholesome rule to follow.

You can order Grape-Nuts at any and every hotel, restaurant, and lunch room; on dining cars, on lake boats and steamers; in every good grocery, large and small, in every city, town or village in North America.

BELL-ANS FOR INDIGESTION

MANY EGG GRADE TERMS ARE USED

Almost Hopeless Task for Customer to Make Purchase in Intelligent Fashion.

CONSUMER GUIDED BY PRICE

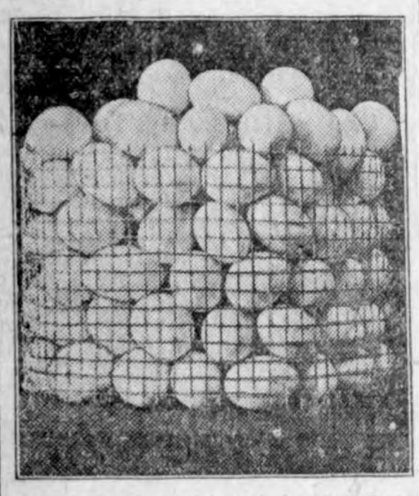
Difficulty Caused by Carelessness or Ignorance on Part of Retailer in Allowing Product to Deteriorate Rapidly.

(Prepared by the United States Department of Agriculture.)

The customer is often bewildered by the number of grades of eggs offered by the retailer; fresh eggs, strictly western fresh, guaranteed fresh, New York state fresh, fresh gathered nearby, storage eggs, guaranteed good storage, storage firsts, guaranteed extra good storage, and candled storage eggs, may all be found side by side or in nearby stores.

Grades Are Meaningless.

This multiplicity of terms makes it an almost hopeless task for the consumer to buy eggs in any intelligent fashion, say market specialists of the



Carefully Selected and Graded Eggs.

United States Department of Agriculture. As a matter of fact, most of these so-called grades are meaningless. The consumer usually is guided simply by the price asked, assuming that if he pays the top price he will get the best eggs, no matter what the particular retailer may call them. In this he is partly correct, since the wholesalers usually maintain prices closely related to the quality of the eggs which they pass on to the retailers, and the price which they charge them is reflected in the retail price to the consumer.

Retailer at Fault.

The difficulty is that because of carelessness or ignorance on the part of many retailers the eggs which they receive from the wholesalers often deteriorate rapidly while in the store. Thus the retailer frequently receives eggs of good quality, attaches a fancy name to them, and a price in proportion to what he paid, and then lets them deteriorate on his hands, so that they are actually poorer in quality than some cheaper eggs which he may have just received at his store.

Under present conditions the best thing the consumer can do is to avoid buying eggs at stores which are obviously careless in handling them, telling the retailer just why he does not buy eggs at his store. He should also call the attention of the retailer to any bad eggs bought of him. The pressure which can thus be exerted by the consumer can be made an important factor in bringing about a much needed improvement in the handling of eggs by retailers.

REPELLENT KEEPS FLIES OFF

Not Good Practice to Depend on Cow's Tail to Keep Pests Off—Three Formulas Given.

Don't say "shoo, fly," nor depend on Bossy to keep the pest away by means of her tail. Neither is effective. Rather take advantage of sprays which have been found a success.

Below are given three formulas, either of which is recommended by Prof. J. R. Watson, entomologist of the Florida experiment station, to keep almost any kind of flies away from domestic animals:

No. 1:

Laundry soap, one pound; water, four gallons; crude petroleum, one gallon; powdered napthaline, four ounces.

No. 2:

Fish oil, 100 parts; oil of tar, 50 parts; crude carbolic acid, one part.

No. 3:

Laurel oil, one part; linseed oil, ten parts.

No. 1 must be thoroughly emulsified by running it through a spray pump after which it can be sprayed on the animals.

GOOD SILAGE FEEDING RULE

For Every 100 Pounds of Live Weight Three Pounds of Corn Silage Is Recommended.

Three pounds of corn silage for every 100 pounds of live weight of cattle per day is a good rule to follow. A cow which weighs over 1,500 pounds should receive 45 pounds of silage daily. Beware of moldy silage. A small quantity may not be injurious, but if the cow eats very much, digestive disorders will follow.

LIST OF BUILDINGS IN FARM APPRAISAL

Mention Water Supply, Light System, Etc., Separately.

Necessary That New Improvement Costs Be Correctly Inventoried and Depreciation Be Adequately Provided For.

(Prepared by the United States Department of Agriculture.)

In making a farm appraisal, each building or improvement, such as water supply, lighting system, etc., should be listed separately, say farm management specialists of the United States Department of Agriculture. It is best not to list separately other land improvements, such as fences, drainage, and the like, but their value should be included in the appraisement of the land so improved.

One of the most perplexing appraisals will be that of the farm buildings and other improvements. The buildings and improvements are bought and sold with the land, and it may often appear difficult to give them a value separate from the land. This is not so difficult as it may seem, and it is of importance that they be separately valued, as only by this means can all the uses of the inventory be realized. Furthermore, this is necessary in order that new building improvement costs be correctly inventoried and depreciation be adequately provided for.

There are two bases which may be employed in appraising buildings and improvements—original cost of construction and estimated cost to replace present prices. In either case allowance should be made for depreciation from the date of erection to the inventory date.

STORED POTATOES NEED AIR

Where Piled to Depth of 10 or 15 Feet Tubers Sure to Go Through Sweating Process.

(Prepared by the United States Department of Agriculture.)

It is a bad practice to store potatoes in large bins or piles, the United States Department of Agriculture advises. Not infrequently potatoes are piled to a depth of 10 to 15 feet, the pile being correspondingly large in the other two dimensions. When stored in this manner they are almost certain to go through a rather violent sweating or curing process,

Good Type of Potato Storage House.

during the course of which the tubers in the central portion of the pile are frequently subjected to a dangerously high temperature. This is especially true if the tubers are slightly immature, or were not dry and free from moist soil when gathered, or if stored when the outside temperature is high, making it difficult to lower the inside temperature of the house. Overheating from all of the causes mentioned may be avoided by making some provision for aerating the pile.

HORSES REQUIRE GOOD CARE

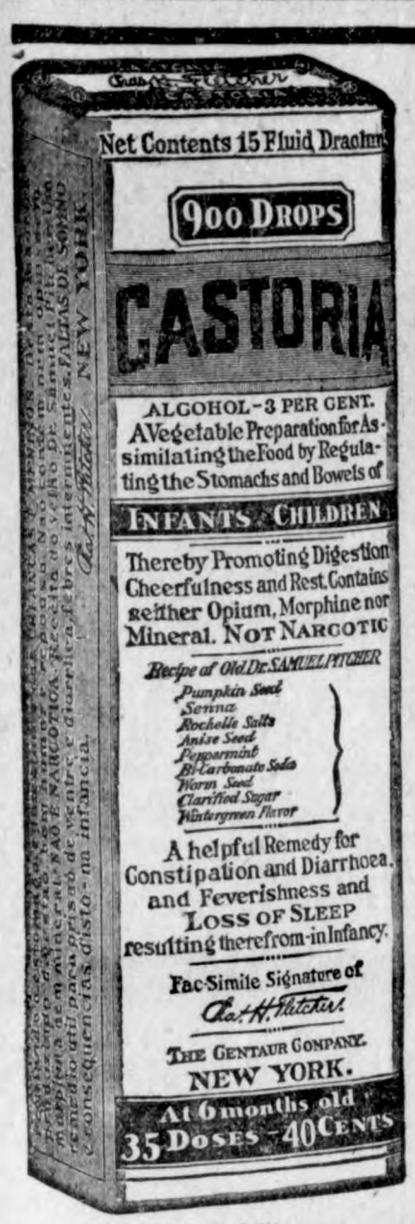
Animal in Pain Consumes Half More Feed to Do Same Work—Fit Collar Properly.

Too many farmers fail to realize the bad effect of sore shoulders on horses. A horse that is in pain requires from 30 to 50 per cent more feed to produce a given amount of work without loss of weight. There is no need for an animal to have sore shoulders if the collar is well fitted, the hames are adjusted to pull at the right angle on the shoulders, and the collars are kept clean. Young horses just starting to work should have their shoulders washed with salt and water after work and the mane should be kept out from under the collar when at work. A little care will be well repaid later.—C. L. Bray, Colorado Agricultural College.

DUST BATHS IN HOT WEATHER

Effective Means of Ridding Fowl's Body of Vermin and Provides Enjoyable Exercise.

Don't forget about the dust baths in hot weather. At this season, all that is necessary is to keep a few little spots spaded up quite fine around in shady corners of the yards. Keep them free from stones and clods and lightly sprinkle them with water every noon. Then the fowls can get their bodies down on the cool, moist earth and counteract the effects of the hot afternoon's sun. Besides this, the dust bath is an effective means of ridding the fowl's body of vermin and also provides the fowls with enjoyable exercise.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

Canada a Good Customer.

Canada is the second best customer of the United States. This is proved by trade statistics recently issued by the Canadian government covering the fiscal year ended March 31. Great Britain is the largest buyer. Canada's imports from the great republic last year averaged $100 per capita of Canada's population. Its total imports amounted to $1,240,125,056. This was an increase of $175,000,000 over imports of the previous year, due, according to authorities, to heavy buying in the United States. The grand total of trade done by Canada during the last year was $2,450,553,175.

The French Sportswoman.

Georges Carpentier was talking to a girl reporter.

"The modern Frenchman," he said, "is well up in sport, but the Frenchwoman is still rather retrograde.

"I know a young Frenchwoman who called a friend up on the telephone the other day and said:

"'I'm sorry to trouble you, dear madame, but can you give me a good recipe for cooking clay pigeons? Jacques has just sent me word that he is going out to shoot some, and he is sure to bring a lot home, and I can't find a single word about them in the cook book.'"

Reasonable.

The matron entered the seasick passenger's cabin softly.

"Is there anything," she said, "anything at all that I can do to make you feel more comfortable?"

"There is," remarked the girl who was doing her first-time-across. "If you don't mind."

"Not at all, my dear, not at all!"

"Well, then, if it's perfectly convenient, you may pick me up and let me down on the ground under a large tree, please!"—Richmond Times-Dispatch.

One never realizes the aimless life of a policeman until the officer attempts to shoot a dog.

Not Quite Finished.

The most embarrassing moment of my life was when a new stenographer came to work for my boss. About noon of her first day with us I wrote to the old stenographer and I left the note in the typewriter when my boss called me in. Just then the new stenographer came back from lunch and she read the note.

When I came out of my boss's office she said, "There is a note of yours in the typewriter. Do you want to finish it?"

The note read: "Dear Peggie—I am writing to let you know of our new stenographer. She is dead from the neck up and as slow as molasses. She has a face like a—."—Chicago Tribune.

Indians' Idea of Man's Origin.

How the Earthmaker making man from bits of clay, first did not bake him long enough and he came out white, and secondly baked him too long and he came out black, and thirdly baked him just right and he came out red, is the Cree Indians' explanation of the creation of the races of man. This and 24 other Indian myths are contained in a collection of Indian lore recently compiled by Charles E. Brown, curator of the Wisconsin State Historical museum, Madison, for summer session students at the University of Wisconsin.

Life's Little Courtesies.

Stillwell seemed in none too good a humor when he got home from the office. "Hang it all!" he exclaimed. "We'll have to call on the Mortons tonight!"

"Why, Henry," said Mrs. Stillwell, "you said you wanted to stay home with me in comfort tonight."

"Yes; but Morton told Collins he and his wife meant to call on us tonight. We can leave their house earlier than we could make them leave ours."

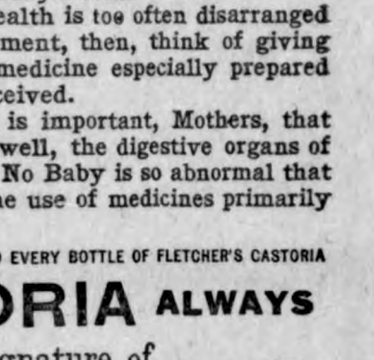
The board of health—three square meals a day.

Poorly Equipped.

"Funny how some people try to get along with no household equipment at all," remarked Juggins. "Why, those new neighbors of mine haven't a lawn mower, a hose, a stepladder, a saw, a fishing rod, an ice cream freezer or any new books."

"How in the world do you know they haven't?" asked Muggins.

"Why, the day after they moved in I stepped over in a neighborly way and tried to borrow those things."—New York Sun.



GENUINE "BULL" DURHAM

tobacco makes 50 good cigarettes for 10c

We want you to have the best paper for "BULL." So now you can receive with each package a book of 24 leaves of BULL-DURHAM—the very finest cigarette paper in the world.

Guaranteed by The American Tobacco Co.

The Folly of Cheating Nature

Many people get the idea that they can keep their nerves on edge and their digestion upset year after year, and "get away with it." They sleep only half as much as they should—and never get properly and thoroughly rested.

If you tire out easily, if you are getting pale and anemic, if your food doesn't digest as it should, would it not be well to stop and consider whether coffee or tea is having its effect on you?

The caffeine and thein found in coffee and tea are drugs, as any doctor can tell you. Is it any wonder that the steady use of these drugs sometimes causes serious damage?

If you really want to be fair with yourself, and give yourself the opportunity you deserve in order to do your best work, make up your mind to quit coffee and tea for awhile—and drink delicious, appetizing Postum instead.

Postum permits sound, refreshing sleep which builds strength, energy and endurance.

Order Postum from your Grocer today. Drink this hot, refreshing beverage in place of tea or coffee for 10 days and see what a wonderful difference it will make in the way you feel.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum *for* Health

"There's a Reason"

Western Canada Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying

are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.

For certificate entitling you to reduced railway rates, illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, etc., write

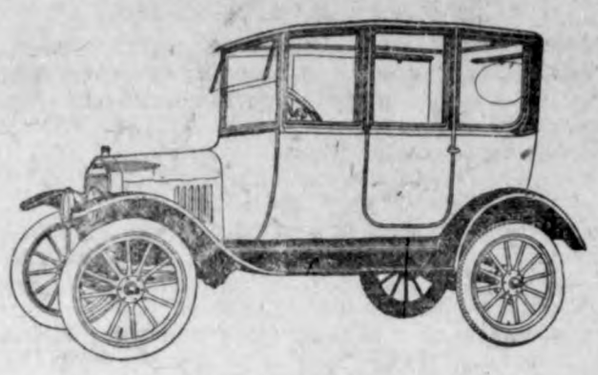
Ford

THE UNIVERSAL CAR



GENUINE

COMMON SENSE

Many Ford owners can afford to own and operate any car they may choose, but they prefer a Ford "because it is a Ford".

For "because it is a Ford" means dependability, ease of operation, efficiency—and it means sure, quick transportation.

And "because it is a Ford" means good taste, pride of ownership and good common sense.

The Ford Sedan, a closed car of distinction, beauty and convience, is the ideal all year 'arond car, for pleasure or business—for the farm, town or city. It gives you all that any car can give at a much lower cost for operation and maintenance.

Ford cars of all types are in great demand so place your order at once if you wish to avoid delay in delivery.

COFFE

Sure enough, the old bus went back on me

IT WAS a whale.
OF A hill, and the old bus.
GROANED AND shuddered.
AND FINALLY stalled.
AND YOU could fry eggs.
ON THE radiator.
WELL, WHAT I know.
ABOUT BUZZ wagons.
COULD BE written big.
ON A postage stamp.
BUT I fiddled around.
AND TORE my new shirt.
AND GOT all smeared up.
THE ENGINE would start.
BUT LIZZIE wouldn't.
NOT ON that hill.
SO I quit and lit up.
ONE OF my cigarettes.
AND THOUGHT it over.
THEN I had a hunch.

PUSHED HER around.
PULLED A thing-a-ma-jig.
AND THE blame boat.
BACKED UP the hill.
WITHOUT EVEN hesitating.
SO I learned a trick.
WHICH EVERY driver.
SHOULD REMEMBER.
WHEN IN doubt, light up.
A "SATISFY" cigarette.
FOR WITH one of those.
GEARED TO your teeth.
YOU CAN start anything.

Air-Tight Tins of 50

Ask your dealer to show you the new vacuum-sealed tins of 50 Chesterfields. A compact, convenient and absolutely AIR-TIGHT packing—the cigarettes keep fresh indefinitely.

IT didn't take much persuasion to get Chesterfields going—they're self-starters. That blend of fine Turkish and Domestic tobaccos makes friends by the millions. Another thing—you don't find a Chesterfield smoker "shifting" brands—he's in "high" all the time.

News Of The Week Reported By The Klemme Schools

KLEMME SCHOOL NEWS

(By A. E. Lauritzen)

Edwin Bock was absent Monday.

Marie Blank was absent Wednesday morning.

John Baumgartner was absent on account of sickness Thursday.

Lenora Lau was absent Thursday and Friday of last week on account of illness.

The Freshmen chose from their class Adella Schroeder and John Baumgartner to represent the class in the declamatory contest to be held in December.

The Ball game between Goodell and Klemme high schools was a sad event for the locals. We lost by a score of 11 to 13. A return game is to be played a week from Friday.

Miss Blanche Medaus visited the Sophomore class Friday afternoon. She was a freshman last year, but this year she was unable to resume her work in high school on account of being sick until recently. The Sophomores welcomed her back to the ranks of their class again.

Those who are to represent the Senior class in the declamatory contest to be held sometime in December. were chosen last Friday. Two members from the class were chosen, one being a boy to represent the boys and the other a girl to represent the girls. Pearl Johnson and Adolph Lauritzen were the ones chosen.

The honorable Sophomores chose their representatives to the annual declamatory contest last Friday a. m. Everyone was enthusiastic and gave a short talk before the class, upon which the ability of a speaker was based. A note was then taken and the victorious candidates proved to be Marie Blank and Milvern Ell.

JENSEN WINS MATCH

Thfe wrestling match held at the theatre last week Wednesday night was the best match ever seen for a long time. The main event was the match between Martin Jensen and Hans Willer, both of near Klemme. Jensen won both falls; the first in about twenty-four minutes and the second in fifty-seven minutes. The time shows that the match was good both men were clever and gave a good exhibition. Jensen stated that this was his last match and will not appear again to wrestle anyone. Wil therefor holds the championship of the county. The preliminaries were also good. Aug Baack put Ulrich Hippen on the mat and Leipzinger defeated Quintus, of Gaarner. The theatre was packed with spectators and all felt they had receivved a fine exhibition of wrestling and were well satisfied with the showing made by the popular Klemme mat artists.

TWO DIE FROM GAS IN CHEROKEE WELL; FATHER LOOKS ON

CHEROKEE, Oct. 5. — George Pasley, 28 years old, and Vincent Goodrich, 22, were killed by gas in a well on the Dougherty farm near here.

Thfe bodies could not be recovered for several weeks.

W. E. Goodrich, father of one of the boys, witnessed their death.

The 80-foot well was dug and the curbing had been completed about 20 feet from the bottom. Goodrich was laying the curbing and Pasley was supplying the materials. The father unable to get any answere from his son or Pasley, summoned the neighbors.

The Goodrich family live at Cleghorn, and young Pasley at Brownton Ill.

NOTICE

The Farmers Live Stock Shipping Association will have their regular annual meeting and election of officers, and other special business at the theatre Saturday afternoon at 2:00 o'clock, October 8th. 1wp

REV. BURIFF ASSIGNED TO KLEMME FOR ANOTHER YEAR

Northwest Iowa Conference Held Their Meeting Last Week

Klemme people are pleased to hear that Rev. A. E. Buriff has been assigned to the Klemme charge for another year.

Rev. Buriff returned from the conference Tuesday, which was in session at Storm Lake from last week Wednesday until Monday of this week. He reports that the conference was well attended and also very interesting.

Rev. and Mrs. Buriff have lived in Klemme for a year and during that time have made a great many close friends, both in and outside of the church membership; the English Methodist church has come to the front during their residence here and their good influence has been felt in the community. Rev. Buriff is a very good speaker and his sermons show his wonderful talents.

The people of Klemme and vicinity are glad to have them stay for the coming year.

The conference made very few changes this year. Some of those near here are: Rev. J. H. Edge of Belmond goes to Spirit Lake, and W. A. Wilkinson of that place comes to Belmond. J. L. DeWitt of Corwith goes to Correctionville and E. T. Gerkin of that place comes to Corwith. There were no other changes close to Klemme in this part of the state.

PUTTING UP NEW BUILDING

August Baack is excavating on his lot on main street between his residence west of the State Savings bank and the McCullough barber shop for the purpose of erecting a cement brick building which will be 24x48 feet and one story in height We had but a short talk with Mr. Baack regarding the building but he infered us that he was going to put the building up for the purpose of conducting a meat market and will equipt an up to date shop in every respect.

Other Building Activities

The Northern Lumber Compaany have their new lumber store about completed now. Final touches are being added here and there and when finished their building will present a beautiful appearance. The front is of brick and will be finished off with perhaps a kragstone or other beautiful finish. Their building material will all be under a large roof. They will have an up-to-date office with a private consulation room from the main office. The Northern Lumber Company will have a yard of which any city could well be proud of.

Henry Ludeke Building

As Henry Ludeke has sold his farm interests on the edge of town and had to move the first of March is was up to him to look for another roof under which to live. Henry is a practical fellow and a good farmer and on a farm he wanted to stay so he is now building a new set of buildings near the Elmer Ludeke place just west of the city. He is having a well drilled and is doing the other preliminary work necessary for the erection of modern farm buildings.

Klemme Greatly Improved

And while we are on the building and improving subject we might add that many Klemme residences have been repainted the past season. Some have repaired and remodled inmodern homes and have connected up to this new sewer system. Frank Carpenter is building a new home in the northwest part of town and in the northeast par of the city Joe Schuldt is remodling a house in from the country. There are perhaps many other improvements. great and small, which we have overlooked. All this goes to make a better and greater Klemme and looks like the forrunner of "better times".

Remember the Emil Lau Sale, November 11. of 35 head of big type Duroc Jersey Boars and 6 head of extra choice Shorthorn Bulls Be sure to come, whether buyer or not, and see the biggest boar of his age in the state of Iowa. O-6tfc

FAREWELL PARTY GIVEN REV. AND MRS. A. H. MEYER MONDAY EVENING

The members of the first Methodist Church gathered at the parsonage Monday evening to give a farewell party in honor of Rev. and Mrs. A. H. Meyer, who had served them faithfully for a period of five years.

The entertainment consisted of a short program; a farewell address was given by Paul Griesemer, Sunday school superintendent. Rev. A H. Meyer gave a response thanking all for their assistance and friendship during his service here. The gathering were also favored by the male quartet and the balance of the evening was taken up with a social good time and visiting, after which refreshments were served.

Rev. and Mrs. Meyer have served in this community for the past five years and during this time both the town church and the Liberty Township church have grown in membership. In his farewell sermon Sunday morning Rev. Meyer stated that his work here had been a great pleasure and that the people of this community had been the kindest and best friends he had ever had and that he regreted to leave.

Rev. and Mrs. Meyer will be greatly missed from both the church and social circles of the community but their many friends wist them hapiness and that their good work will be felt in their new charge at Edgewood. We join their many friends in bidding them farewell and our best wishes go with them.

PURE BRED SIRES WILL PAY

Results of Uses of Good Scrub Bulls Shown in Test Recently Conducted

That pure bred sires will pay for themselves in a short time was demonstrated recently by the dairy extension service of Iowa State College in production data secured on herds with scrub bulls and with pure breds showing the difference in fat production.

Where pure bred bulls were used as sires on scrub cows, large increases in milk and butterfat were obtained from the offspring which in most cases were nearly equal to twice the production of the dam Where a scrub sire was used on a good cow the decrease in production in the offspring was nearly half the amount of butterfat and two-thirds less milk.

A cow with the record of 4438 pounds of milk and 190.3 pounds of butter fat was bred to a pure bred bull. As a result of this mating a cow was produced whose record was 9008 pounds of milk and 306.2 pounds of butterfat. Another scrub cow with the record of 5469 pounds of milk and 247.5 pounds of butterfat was bred to a purebred sire. The offspring of this mating was a cow with a record of 9870 pounds of milk and 415.5 pounds of butterfat These were typical results of the herd.

A good high grade Jersey cow with a production record of 6582 pounds of milk and 313 pounds of fat was bred to a scrub bull and the offspring of this mating as a two year old produced 2833 pounds of fat.

These figures show that no dairyman can afford to experiment with ordinary sires since with the low prices of purebred sires the difference in production will soon pay the bill.

The recent census showed that only one purebred sire exists for every 200 cows which is a very small margin. Anyone who wants help in selecting a good sire can get it from the extension servvice at Ames.

Many a man can demonstrate an automobile who cannot demonstrate how to support it.

When oher women say that there is "nothing to a girl, they mean that she is beter looking than they are.

The lone child in the family doesn't have much of a chance to amount to anything, but there are a lot of children who are not in the lone child class who are not holding the world up by the ears.

IOWA NEWS

A petition in bankruptcy was filed in United States District Court by Emory Lester Dunn, farmer of Prairie City. The petition schedules $ .037 liabilities and $3,444.25 assets.

W. D. Nugent who was badly injured in the M. and St. L wreck near Livermore several months ago, has just received $8500 damages from the railroad company.

The National Match Co., of Joliet Ill., have been logging near McGregor for ceveral months and are shipping several carloads a week to the factories. The timber is of a soft wood species.

Braving death in the flames of her own home, Mrs. Thomas Clegg of Cedar Rapids carried her invilid mother to safety when fire started in the basement of the house threatened to consume both building and inmates. Firemen saved the house.

The body of a male child, believed to be less than three week's old, was found in the Cedar River, a short distance from the business section of Marshalltown. The body was wrapped in a woman's coat. Phpsicians are of the opinion that the child is of white and negro parentage.

Jake Lauer is champion plower of Cherokee county for the third time and has been awarded permanent ownership of a beautiful cup. The contest held at Pilot Rock was witnessed by at leats 10,000 persons. Two thousand automobiles were parked during the meet. Lauer with a two-bottom tractor made a score of 95.

Accused of sending indecent letters through the mail to two Newton wemon, Fred W. Stover was arrested and held to the grand jury under $2000 bonds. He was recently convicted for disturbing women passengers in the Rock Island pullman cars.

Surviving members of the 39th regiment. Iowa Volunteer Infantry will meet for the 29th reunion at Minburn Iowa, on Oct. 4 5 and 6. For the past twenty four years the reunion of the regiment has been an annual event when former comrades get together from all parts of the country.

A checking up on the books of the fair association at Mason City recently showed a profit of $2,379.46. Premiums totaled around $700 for livestock and $5000 for race track events and $11,624 was spent for music and other attractions. Receipts were slightly in excess of $40,000, a considerable part of which went for the constcuction of a fine new hog pavilion.

Converting relics of war days to practical use, six firemen of Greene saved the new $200,000 school house from destruction by fire. Wearing gas masks and working in 15 minute shifts they succeeded in putting out the fire in 150 tons of coau in the basement. It took a hour fight to distinguish the blaze. Water in the coal and the consequent spontaneous combustion was responsible for the fire.

Henry Bruntlet of Carrol county who signed a $10,000 bond for his son, Corles Bruntlett. who confessed to robbing the Farmers State Bank of Lidderdale, must pay the bond which the court held was forfeited by the sons delay in appearing Bruntlett, who is now serving an indeterminate sentence at Anamosa fled to Mexico after the bond had been furnished. Although he returned to stand trial he did so after the day for the case. The court held that his return after date set for the trial did not give cause for surety release.

A contract will soon be let for the erection at Exira of one of the largest and most modern creamery plants in western Iowa. It will cost $20,000 and will replace the plant which has been in operation for many years.

Repair the Buildings Before Frost

Fall is a fine time to get those barn doors repaired so that they will shut and get new glass into the windows that have been smashed during the summer. It will be much easier to work on them now than when it is zero weather.

Wisconsin Girl Defies Handicap

Develops System of Conversing With Others Not Equaled Even by Helen Keller.

IS BOTH BLIND AND DEAF

By Placing Her Fingers on Vocal Cords of a Person She Can Tell What Is Being Said Before Words Are Actually Spoken.

Janesville, Wis.—Overcoming the handicap of both blindness and deafness in a manner which has astonished all medical authorities who have heard of it, Miss Wiletta Huggins, sixteen years old, a student of the Wisconsin School for the Blind at Janesville, has learned to listen to the conversation of others through the medium of placing a finger on the vocal cords of the person with whom she is talking.

Denied the power to see or hear, this girl has acquired through practice senses so keen, so accurate and so marvelous that she is believed to have a system of understanding which has never been equaled even by Helen Keller, famous blind girl.

Wiletta, through some strange and unexplainable sense, can tell who is in a room with her or in adjoining room, if she has known the person for but a short time.

Converses With Two at Once.

Through this strange means of conversation, Wiletta may carry on a conversation with two people at the same time simply by placing any finger or one hand on the vocal cords and telling by the vibrations just what is being said before the words are actually spoken.

She is of normal build for a girl of sixteen years, robust and has a healthy color in her cheeks. Unless one studied her eyes they would not readily note her great affliction as she walks with as steady a gait as a normal person would. Upon entering a room where there are visitors she will walk without faltering up to J. T. Hooper, superintendent of the school.

Wiletta is unable herself to understand or explain the reason for her strange method of hearing. It just came to her; this is her only explanation. She has been at the school for six years.

May Develop New Method.

During her first year at school Wiletta was not a very diligent student and was especially backward in studying the point system of reading. She mastered the reading system, however, knowing that it was only a matter of time when she would be unable to see.

The achievements of Wiletta Huggins are attracting such wide attention that one of the large women's magazines of the country contains an interview with her and a story of her success. It is the opinion of psychologists that a new method of teaching the deaf will be developed as a result of the tests which have been made on Wiletta Huggins.

Wiletta Huggins Conversing With a Friend.

Pair of Pliers Routs Holdup Man

Philadelphia.—One attempted holdup foiled with a pair of pliers, another holdup in which the robber found his victim without money and a third that resulted in a highwayman obtaining $64 summed up one night's banditry.

When J. M. Sloane, a for-hire driver, stopped to repair his car two men attempted to hold him up. Sloane pointed a pair of pliers at the bandits, who fled. Their flight is believed to have been hastened by the fact that Sloane had his coat off and a driver's badge worn on his vest was plainly visible.

Aristocrats of Russia Peddlers

Once Haughty Officers of Old Regime Are Now Penniless in Turkish Capital.

ONE TRAGEDY OF GREAT WAR

Every Street in Constantinople Is Crowded With Refugees From Russia—Wives and Daughters in Menial Occupations.

Constantinople.—When Russia was a mighty nation under her czars it was the Slav dream to march into Constantinople.

Well, the Russians in their thousands have reached this city, but their presence means not a triumph, but one of the great tragedies of the aftermath of the war.

The allies, and especially France, backed and financed a number of attempts on the part of Russians to break down the Bolshevist government and substitute one that would do business with western Europe.

The last of these mercenary armies was the one led by General Wrangel, who at one time was master of the Crimea.

But just as soon as the Bolsheviks secured peace with Poland, they smashed Wrangel to smithereens. The Crimea witnessed one of the greatest scrambles in history.

Soldiers and their leaders, civilians and their wives and families, clamored for ships to take them away before the avenging Bolsheviks came in.

The vessels which were finally supplied for the refugees were jammed beyond human endurance.

Filled With Refugees.

Thousands of the survivors of this page of recent history were brought to Constantinople.

Every street in Constantinople is crowded with them. Near this city you may see broad-faced Mongolians and Kalmuck Tartars, who were once in Wrangel's army, working on the railway tracks.

In the city itself the Russians have largely turned to peddling.

Their wives and sisters and daughters have taken to waiting in little restaurants or washing dishes or scrubbing floors or doing family washing.

Many have been forced by sheer want into immorality.

And there are thousands who have no visible means of support. They sell nothing. They do not work. They simply walk the streets aimlessly.

Many of them have shirts, but no coats. If you see them with coats buttoned up to the neck, you may know that they have neither shirt nor undershirt underneath. In this blazing hot oriental weather many of them go about with great, long, heavy cossack coats whose collars and sleeves are trimmed with thick astrachan.

Shift for Themselves.

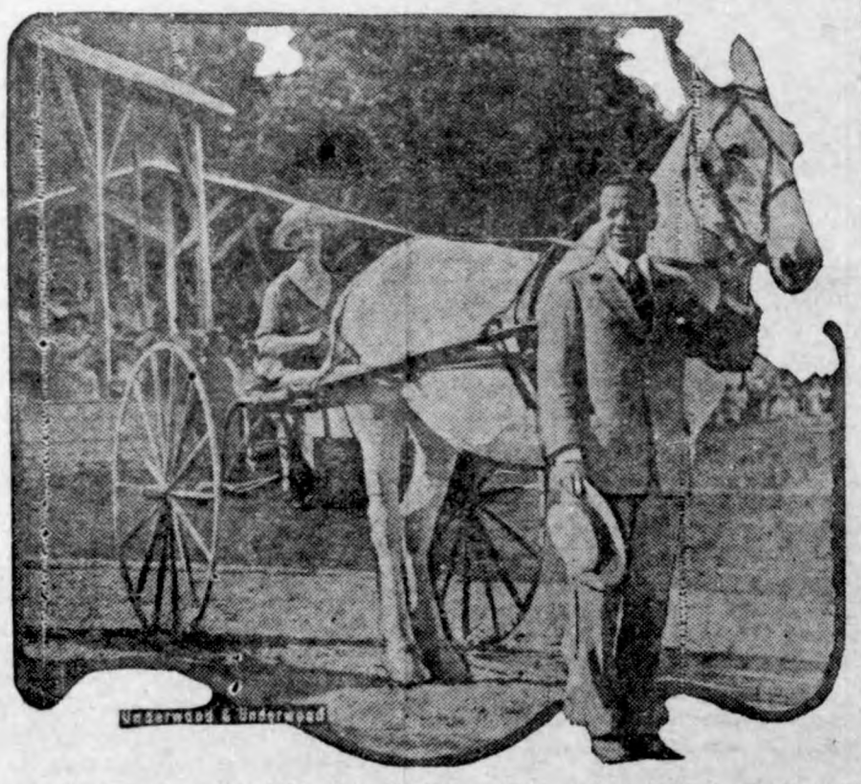
Men who were once officers in the czar's army and later in Wrangel's forces still go about with their epaulets on shoulders. Often one has a wicked-looking Russian officer's dagger at his side.

It would seem that with this great influx of one-time soldiers of adventure, made desperate by want, there would be a great increase of petty crimes. But the 2,500 Turkish police have held crime in check.

For a considerable period the French authorities undertook to feed the 100,000 Russian refugees, the only stipulation being that they should seek work to make themselves self-supporting. But work was the very thing that the great majority of them did not want.

They seemed to think the allies were under some sort of obligation to maintain them in idleness. The result was that the French felt compelled to withdraw all assistance and allow them to shift for themselves.—Milton Bronner, in Chicago Post.

Mrs. Roosevelt and Her Racing Mule



A mule race, in which Mrs. Theodore Roosevelt and Mrs. J. Griswold Webb drove the balky animals, was the feature attraction of the Duchess county fair at Poughkeepsie, N. Y. The event ended in a draw. The photograph shows Mrs. Roosevelt in her sulky, and her husband at the mule's head.

Woman's Heel Gets Tangled in Plane

London.—A woman's heel, becoming jammed, caused the wreck of an airplane and the loss of three lives, at Fort Melbourne, Australia, according to a Central News dispatch from Melbourne to the London Daily News. H. G. Ross, an aviator, took Miss Jessie Dorman and a young man for a flight. Miss Dorman's heel became jammed between the rudder bar and the wooden bar, and the pilot was unable to turn his machine, which crashed heavily, all three occupants being killed.

Wife's Bobbed Hair Causes Row.

New York.—Harry Novick has sued his wife for a divorce because he does not approve of her bobbed hair. He also charges that she goes out in the evenings, leaving the baby with a

YANK GOBS APPLAUD BULLFIGHT

American Sailors Witness Exhibition of Portugal's Sport.

More a Display of Good Horsemanship and Skillful Feints Than Cruel Sport as in Spain.

Lisbon.—Sailors of the American warships who were entertained in this city when the American squadron visited Portugal the other day, saw a Portuguese bullfight and lustily cheered for one of the bulls.

A Portuguese bullfight is more a display of splendid horsemanship and skillful feints than a cruel sport, such as the Spanish bullfight. There is no bloodshed. The bulls are merely teased by the bullfighters and others, who pierce their hides with their tormenting darts. The horns of the bulls are covered with leather balls, so that they can do no great damage and the is never to let his horse get touched by them.

After that a group of peasants wearing green-and-red caps advance into the ring and each tries to throw himself on the bull, either between his horns or on his neck, and to cling there despite the frantic attempts of the animal. If one succeeds in clinging on, the other peasants rush up and hang onto the bull until he is reduced to impotence.

The American boys cheered all this with great enthusiasm, but the real outbreak came when one bull leaped after one of his tormentors over a wooden partition and into a group of bullfighters, scattering them right and left.

Roars of laughter filled the enormous circus and a thundering cheer and cries of "bull, bull, bull" burst from the throats of the Americans.

The bullfighters fled in disorder while the amphitheater resounded with the laughter and cheers of the

HAS GOOD WORD FOR PARSNIP

Writer Declares Vegetable, Which Seemingly Has Few Friends, Ranks High Among Root Foods.

The parsnip seems to have few aristocratic friends and few poets have sung its praises, yet the good old parsnip continues on its way without discouragement. In conversation, one hears a good deal about corn, wheat, potatoes, rye, oats, tomatoes, cauliflower, artichokes and beets, yet somehow, few persons discuss the parsnip.

This old vegetable was popular with pioneer Americans—the forebears of so many Americans who now look on the parsnip as too plebeian for the table. There can be no doubt about the antiquity of the parsnip and there ought to be no doubt about its respectability. It was cultivated by the Romans long before they entered upon their career of world conquest and world government.

The Romans ate this simple and hardy vegetable during that period when they were masters of the world, and in their decline they continued to serve the parsnip. It was once a wild plant, like most, or all, the fruits and vegetables that grow in orchard, field and garden. It is still found in its wild state along the roadsides and in waste places throughout Europe and temperate Asia, and it has many wild relations in the United States.

Of the food value of the parsnip Dr. Wiley has said: "Most nutritious of all root crops except salsify. Carbohydrate content 16-17 per cent, nearly as high as the potato and more than twice as high as beets, carrots or turnips."

Friends of the parsnip contend for its hardiness. Persons who claim to be acquainted with its habits say that it will flourish in any reasonably deep soil, and will, under favorable conditions, yield a heavier crop than any other root.

Some experience is required in preparing the parsnip for the table, but this may be said of all other vegetables. The parsnip which has been first boiled and then baked until there is a brown crispness about the outside, is that parsnip which is in greatest favor with those persons who eat parsnips.

Candy From Sweet Potato.

By a roundabout process the sweet potato is to be turned into an important raw material for the candy-maker. The succulent southern tuber is, of course, first turned into sirup, and the candy follows in due course; for, contrary to the usual belief, not all candy is made from sugar, sirups forming an appreciable part of the supplies. The increased use of the sweet potato will be a boon to the not too prosperous southern farmer, as it will enable him to diversify and rotate his crops, and if the cotton or tobacco crop is bad will tend to equalize the losses, for sweet potatoes are easily grown. The molasses factory will take the "sweets" and turn them into syrup, giving the farmer a much higher profit from his crop. The factories will be located in sections where the sweet potato is most easily grown, and this will give the farmers of those sections a new line of profitable agricultural endeavor.

Japan Conserves Her Forests.

Much is being done in Japan to encourage conservation and reforestation and the government and forestry associations are endeavoring to bring to the people a knowledge and realization of the conditions which must be met, says the American Forestry Magazine. Japan has now three imperial universities, four academies and several lower class schools of forestry. The manufacture of wood pulp is a growing industry in Japan. She now has 30 wood pulp mills and produces annually 280,000 tons of chemical and mechanical pulp. The consumption of pulp wood is about 400,000 cords a year. Spruce and fir are mostly used as pulp woods and are grown in Hokkaido and Sakhalin, the northern islands of Japan.

Effects of Electricty.

The observations of an eminent scientist as to the effects of electricity on the animal body show some remarkable results. Man has much greater power of resistance, or much less susceptibility, than many other animals. A leech placed upon a copper plate that rests upon a larger plate of zinc is unable to crawl off on account of the feeble electric action excited by the contact of the metals. Horses are troubled by slight differences of potential. An ox treated for rheumatism with electricity succumbed to a current absolutely inoffensive to man.

Saving Himself.

Junior is a bright four-year-old.

"Can I go over to Helen's?" he asked as he yawned on the porch at eight o'clock one night.

"No, you stay right here."

"I mean in the morning, not tonight."

No Symptoms.

"Who is the mysterious stranger?"

"Some kind of investigator."

"Working for the government?"

"I doubt it. He keeps pretty busy."

American Coal in Demand.

Coal is now being shipped from the United States to such markets as Aden, Uruguay, Ceylon, Egypt, India, Argentina, Mauritius and Zanzibar.

She Takes It Coolly.

When a woman sees a man with his collar discussing her clothes she just laughs up where her sleeve used to be.

Home Town Helps

SEES NEED OF "CITY BOOK"

Writer Points Out How Information of Great Value to Community Could Be Spread.

What are the "points" of cities? How shall we compare one with another, and, allowing for geographic, climatic and economic limitations, describe the curve of possible ascent for the one we love best? Here is where we must establish standards.

Vaguely we recognize these types in our common reference to a "factory town," a "mining town" or a "county seat" and so on. But, as to a factory town or any other kind that we want to know about and improve, how does it compare with others?

We need a little book on "What Is a City?" It should be a cheap little book that everybody can buy, a simple little book that everybody can understand, a sort of civic primer.

Suppose we live, as so many of us do, in an ordinary, medium-sized town. Our "city book" should inform us that a normal town, with the number of inhabitants our town has, should have such and such functions, adding to the simple requirements of the small village those other and more varied functions which the larger population of our town requires and can support. Such a list, for our ordinary medium-sized town, might run somewhat as follows:

Smithy, store, postoffice, school, church, dressmaker, milliner, barber, drug store, moving pictures, court house, jail, fire company, hotel, hall.

These are not placed in any dogmatic order of importance, or arranged with great care.

A "pattern town" should be described suggesting the income that should be derived from legitimate taxation of its number of citizens, and showing just what advantages a town with such an income deserves and requires.—Charlotte Perkins Gilman in the Century Magazine.

MAY BE PROUD OF RECORD

Massachusetts Town Has Shown What Can Be Done When Management Is Intelligent.

In contrast with the situation at Block Island, where the town came near bankruptcy, is that of Middleton, Mass.

The entire permanent debt of Middleton at the present time is $7,000, of which $1,600 is due in notes which will soon be paid, leaving a balance of $5,400. Here is what the town has to show for the amount and may be timely:

First, and one of the most important, are excellent schools. There is also a fine, free public library, well equipped with the best of books. There is public water with good hydrant service and with which a large portion of the townspeople can be supplied. Electric lights are in all the central streets and a large number of homes are equipped with them. There are good railroad accommodations. Two new bridges have been built over the Ipswich river. The improvements, with the exception of the schools, have all been made during the last 20 years, and are all paid for with the exception of $5,400.

In addition to the above the state and county have expended on the streets in town, under the small town act, for macadam roads, $150,000.—Boston Globe.

City Library and Farmer.

How pleasant relations are maintained between the farmers in the region of Stockton, Cal., and the attendants at the city library of that place, and how the farmers draw heavily upon the facilities of the library to their pleasure and profit, is told in a bulletin of the Department of Agriculture. The library sends out traveling libraries to communities, and it also encourages the country residents to make direct use of the main library. There are 30 communities and 22 school districts that are receiving county free library service from Stockton, and the main library has a direct country circulation of 6,281 volumes.—Rochester Democrat and Chronicle.

Photographing From Airplane.

In view of the facility with which objects many feet under water can be photographed from an airplane it is possible that the navigation of such a river as the Mississippi, with its shifting bars, may hereafter be made safe by monthly or weekly mapping from the air. In earthquake regions, such as southern Italy and Japan, the changing coast lines, shallows and safe harbors can easily be photographed from the air after each fresh shock, thus keeping navigation open and safeguarding the lives of mariners.

Calgary Insures Employees.

Group insurance to the amount of $1,500,000 has been taken out by the city of Calgary to cover employees in case of death, sickness, accident, or any other cause. Calgary is at present the largest city in Canada providing this form of protection for employees. A feature of the group plan is that many otherwise uninsurable persons are thus included.

Sure Relief

6 BELL-ANS Hot water Sure Relief

BELL-ANS FOR INDIGESTION

It's still a question whether love is an asset or a liability.

WILL RADIUM AT LAST OPEN THE DOOR OF THE GREAT UNKNOWN?

If you are sick and want to Get Well and Keep Well, write for literature that tells How and Why this almost unknown and wonderful new element brings relief to so many sufferers from Constipation, Rheumatism, Sciatica, Gout, Neuritis, Neuralgia, Nervous Prostration, High Blood Pressure and diseases of the Stomach, Heart, Lungs, Liver, Kidneys and other ailments. You wear Degnen's Radio-Active Solar Pad day and night, receiving the Radio-Active Rays continuously into your system, causing a healthy circulation, overcoming sluggishness, throwing off impurities and restoring the tissues and nerves to a normal condition—and the next thing you know you are getting well.

Sold on a test proposition. You are thoroughly satisfied it is helping you before the appliance is yours. Nothing to do but wear it. No trouble or expense, and the most wonderful fact about the appliance is that it is sold so reasonable that it is within the reach of all, both rich and poor.

No matter how bad your ailment or how long standing, we will be pleased to have you try it at our risk. For full information write today—not tomorrow. Radium Appliance Co., 841 Broadbury Bldg., Los Angeles, Calif.—Advertisement.

If the world is not be be saved this year try to bear up.

DYED HER SKIRT, DRESS, SWEATER AND DRAPERIES

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dress, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Use "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—advertisement.

You should think all you say, but say not all you think.

ASPIRIN INTRODUCED BY "BAYER" IN 190

Look for Name "Bayer" on the Tablets, Then You Need Never Worry.

If you want the true, world-famous Aspirin, as prescribed by physicians for over twenty-one years, you must ask for "Bayer Tablets of Aspirin."

The name "Bayer" is stamped on each tablet and appears on each package for your protection against imitations.—Advertisement.

The SANDMAN STORY

N LITTLE CRICKET.

night a little Cricket was inging loudly when a Toad hich had been dozing by the of a tree said: "Oh, do be I never heard such a noise as d your family make."

y true," replied the little crea- for our family are, of course, st singers in the world. We ke a great noise, as you have

that does not make you the ngers in the world," replied the "Did you never hea. the birds in the trees, silly creature?"

should I listen to the birds can sing better than they do?" the Cricket. "Just listen now. mily are tuning up and I am irds could not sing louder."

you would take the trouble to some time when the birds are in the daytime I am sure you not be so vain," said the Toad. there you are!" exclaimed the t. "In the daytime you say; o the birds not sing at night, I u, my friend? I will tell you; e they dare not compare voices y family; that is why. We can them and they do not wish to eryone know that the Crickets he best voices."

you would come out in the day- nd sing," said the Toad, "I am ou would have to agree with me he birds can sing louder and sweetly than your family. I you are the ones who are afraid e a contest, not the birds."

t at all," said the Cricket, "but should we come out in the sun- when we much prefer the night- to be abroad? We know that our sings better than any other in

orld. Let the birds, if they doubt come out at night and sing with

u are a silly and conceited little ure," said the Toad, hopping for it was almost daylight by ime.

ou awoke me from my morning with your silly chirping," said a Robin flying down from his home e branches of the tree.

nd so you think your family can outsing mine, do you? Well, there will be one less at any rate tonight to help your family sing, friend Cricket, and I believe my children would enjoy you for breakfast."

"You see, Mr. Toad, it is just as I told you," chirped the vain Cricket, as the Robin flew up in the tree with him in his bill, "the birds are jealous of our voices, for this fellow is taking me to his children that they may have their voice improved by eating one of the finest singers in the world."

The Robin thought this so funny he had to laugh, and when he opened his mouth down fell the Cricket to the ground and quickly hopped away.

But he gave one last chirp as he went. "The very best singers in the world, the very best," he said, as he crawled out of sight.

"Well," said the Toad, who had stopped to see what happened, "I suppose if he thinks so it really does not matter what others think."

Electrical Power in Africa.

Engineers are considering the construction of an electric transmission line 700 miles long for carrying power from the Victoria falls of the Zambesi to the mines at Johannesburg.

Alice Lake

The emotional force displayed by charming Alice Lake in her most recent pictures has placed her in the front rank of screen stars. Miss Lake is barely twenty-two years old. A few short years ago she was attending Erasmus Hall high school in Brooklyn. She is the daughter of a successful merchant. The winsome "movie" star is of medium height and lithe in figure. Her eyes are a dark hazel and her hair a rich brown.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

WHEN YOU EAT FRUIT.

Remember this—that there is a proper dignity and proposition to be observed in the performance of every act of life.—Marcus Aurelius.

IN THE formal, many-course dinner a fruit course usually follows the sweets and cheese, directly preceding the coffee. In many families fresh fruit is always served at dinner following the dessert. The decorative value of fresh fruit served in this way has, no doubt, had something to do with the establishment of this course in the dinner menu. But there are not a few good folk who always decline the course because they really don't know just how to eat it. Oh, to be sure they can eat oranges and apples and bananas and grapes, but they are not at all sure whether they eat them in the right way. For eating fresh fruit at a picnic or as a between-meal is one thing, and eating it at a dinner is another. The idea is, however, always to serve it in its natural form. To serve the oranges all peeled and sliced would indeed be a mistake on the part of the one who planned the dinner. To serve the bananas sliced would be just as grave an error.

But really it is no very difficult task to eat whole fruit as it should be eaten at dinner. This becomes comparatively easy at tables where the English custom of serving a fruit knife and fork is followed. The banana should first be peeled. Morsels should then be cut by means of the knife and eaten with the fork. Do not cut it all at once.

The best way to eat an apple at the dinner table is to cut it in quarters with the knife, handling it as little as possible, and then to pare the skin from each quarter and to core it as required. There is quite a knack in doing this without taking the apple up into the hands any more than necessary.

Pears are eaten in much the same manner and so are peaches and plums, but the considerate hostess does not serve these fruits when they are so juicy and over-ripe as to be difficult to manage.

Many persons would not serve oranges at all for dinner, but instead tangerines that can be managed more gracefully. Tangerines may be peeled and then broken into sections, the seeds being removed by means of the knife before taking them in the fingers to eat. Orange skins should be removed by holding the orange firmly on the plate with the fork and then cutting off the skin by means of the knife. After this morsels of the orange may be cut from the core by means of the knife and fork and the pieces conveyed to the mouth by the fork. Needless to say, this is more easily accomplished when the oranges are firm and not extremely juicy. So the wise hostess selects California oranges for dinner, though she may prefer those delicious Florida oranges when they are to be eaten with a spoon for breakfast.

You may have your own pet way of eating grapes, but there is only one right way—that is, according to the accepted usage. They should be eaten by means of the fingers of the right hand, the stones should then be dropped into the left hand inconspicuously and thence conveyed to the fruit plate. Cherries should be managed in the same way.

"What's in a Name?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel.

JUANITA.

THE lovely Spanish favorite, Juanita, has come to be a "name without a country." The music of its syllables proved irresistible to many countries and in modern times it lost its Spanish heritage and came to be as American as Anne or Edith.

Juanita means "grace of the Lord." It comes originally from the same source as John. It was probably in honor of St. John the Evangelist's guardianship of the Blessed Virgin that her name became joined with his. In the Fifth century a Giovanni (John) Maria Visconti of Milan appears and straightway Juan Maria became a popular name in Spain.

By adding a final "a," the feminine Juana was formed, a name which proved more acceptable than the masculine Juan as a preface to Maria, and soon Maria was dropped entirely and Juana became a separate name. Spain is fond of endearments and diminutives, as Rosita and Carmencita and scores of other names prove, so presently the ever-popular Juanita was evolved. Many famous women of Spain bore the name, among them a queen, who was known as Juana la Loca. Her reign in Castille was an unfortunate and distressing period.

It may be that the Spanish influence in the Southwestern states brought Juanita into vogue in this country, or her fame, according to some, may have been established by the country-wide vogue of the old song with which even the present generation is familiar. Who does not remember:

"Juanita, ask thy soul if we should part?"

Juanita's talismanic gem is the fire-opal. That gem of sunny Spain promises her protection from evil spirits, good health and happiness. Tuesday is her lucky day and seven her lucky number.

Time Speed of Jackrabbits.

How fast can a jackrabbit run? Motorists of Lyons, Kan., recently have made tests of speed on country roads and have found that a cottontail will go 45 miles an hour for half a mile, while a jackrabbit will travel more than a mile at 60 miles an hour before hopping out of the road.

Montreal is the third French speaking city of the world, being surpassed only by Paris and Marseilles.

SELECTING SEED CORN IN FIELDS

Farmer Has Splendid Opportunity to Start Increasing Next Year's Yield.

CURE AND STORE EARS WELL

Hatrack Device Is Easily Made by Cutting an Electrically Welded Wire-Mesh Fence—Avoid Damp Atmosphere.

Prepared by the United States Department of Agriculture.

It costs as much to plant and cultivate an acre producing 20 bushels of corn as one producing 40 bushels. So, with present labor costs, if a farmer could reduce his acreage one-half and still get the same corn yield he would consider it good business.

Such a program is probably too much to expect, but the United States Department of Agriculture points out that the American farmer is getting altogether too little yield from his corn land. Just about this time of year a good many farmers are realizing it.

Prepare for Next Year's Crop.

Now, or a little later, American farmers have an opportunity to start increasing next year's corn crop by the selection of seed. Every spring there is a frantic search for good seed corn, and much inferior seed is planted, with resulting inferior yields. The loss is largely due to delay or negligence. Autumn is the time to prepare for a profitable corn crop the following season.

Any intelligent farmer can go into his corn field when the corn is mature and select better seed than he can buy next spring. Unless a community has an experienced and honest corn breeder, the best place for the farmer to obtain seed corn is from the fields on his farm or in his neighborhood, which are planted with a variety that has generally proved successful in that particular locality. Too many people consider seed good simply because it will grow. To be first class, seed corn must be:

1. Well adapted to the climatic and soil conditions where it is to be planted.

2. Of a high-yielding variety and from high-yielding stalks of that variety.

3. Well matured and preserved from ripening time until planting time in a manner that will retain its full vitality.

4. Free from disease and insect injury. Such freedom may indicate resistance to infection.

As soon as the crop matures, go through the field with a picking bag and select ears from the stalks that have produced the most good corn without having had any special advantages such as excess of space, moisture, or fertility. Avoid the large

Go Through Field With a Bag and Select Ears From Desirable Stalks.

ears on stalks standing singly with an unusual amount of space around them. Preference should be given the plants that have produced most heavily in competition with a full stand of vigorous plants. A well-balanced stalk bearing two good ears will usually be found to have produced as much seed as any other stalk. Both ears are equally valuable for seed, even though one may be much smaller than the other.

In the central and southern states, all other things being equal, short thick stalks are preferable. They are not so easily blown down, and in general are more productive than slender ones.

Keep Seed Corn Dry Over Winter.

Since the corn root rot investigations by the United States Department of Agriculture, increasing attention has been paid to germination tests for corn. The improved rag doll germinator and methods for using it, as well as methods of selecting disease free ears in the field, are described in Farmers' Bulletin 1176, which will be sent on application to the Department of Agriculture. The question of better seed corn is one which means so much in dollars and cents that attention should be given it from now on until the seed is ready to go into the ground next spring.

COWPEAS SUCCEED ON ALL TYPES OF SOILS

Crop Is Adapted to About Same Conditions as Corn.

Withstands Considerable Degree of Drought, but Leaves Are Injured by Least Touch of Frost—Valuable in Orchards.

Prepared by the United States Department of Agriculture.

The cowpea is a warm-weather crop; therefore it has the greatest value in the southern states, gradually lessening northward. It is grown successfully, however, in the southern parts of Ohio, Illinois, Indiana, and New Jersey, and in parts of Michigan. In general, the cowpea is adapted to about the same climatic conditions as corn, but it requires somewhat more heat. It will withstand a considerable degree of drought, but under very dry conditions will produce only a moderate quantity of hay and

Field of Cowpeas.

a very small number of seeds, if any. Both in spring and in fall the leaves are injured by the least touch of frost, and a heavy frost is always fatal. The cowpea withstands moderate shade sufficiently well to be valuable in orchards. In heavy shade the plants are usually much attacked by mildew.

The cowpea succeeds on practically all types of soil. It does apparently quite as well on sandy soils as on heavy clays, but will do better than clover or alfalfa on thin soils or soils that are poor in lime. No other legume can be grown so successfully and on such a variety of soils under adverse conditions as the cowpea. A very rich soil is not conducive to the best results with this crop. On such a soil an abundant vine growth is produced, while the yield of grain is small. Poor soils will produce little growth of vine, but will generally yield a good proportion of seed. Clay soils will not produce a heavy yield the first year, but the crop will succeed much better the second season. It may be said that the cowpea will do best on good corn land, but will thrive on all types of soil that are well drained, properly inoculated, and moderately rich.

SEALING OF SILO IMPORTANT

Satisfactory Plan Is to Husk Ears From Last Few Loads, Tramp and Moisten Well.

Proper sealing of the silo is essential in reducing the amount of waste silage. An easy and satisfactory method is to husk the ears from the last three or four loads of corn that are to go into the silo, and run only the stalks and leaves through the cutter. When these last loads are tramped and soaked with 20 to 30 barrels of water, the top will be well sealed and there will be only a thin layer of waste. Moreover, there will be no ear corn in this waste, because it was husked out and made available for other purposes.

LIME SPREADER IS FAVORED

Machine Is More Efficacious in Securing Even Distribution of Material on Soil.

Lime should always be applied to the surface of the soil and harrowed in. This may be done in the fall, winter or spring, although many recommend that it be applied in the fall. When it is put on the land, however, is not so important as how it is done. It should never be plowed under because it is carried downward in the soil very rapidly, much of it is wasted and it is, therefore, less effective in neutralizing the acidity. Even distribution is, of course, desirable and for this reason a lime spreader should be used instead of attempting to distribute it by hand.

SELECT BEST SEED POTATOES

Worth While to Secure Biggest and Finest Looking Specimens at Time of Digging.

In these days much thought is given to the selection of corn for next year's crop. And great improvement has been made in corn the past twenty years just because of this close selection. But the potato has been overlooked to a large extent. A selection of the biggest and finest looking potatoes at the time of digging, just the same as seed corn is selected at corn harvest, is worth while.

Makes Hard Work Harder

A bad back makes a day's work twice as hard. Backache usually comes from weak kidneys, and if headaches, dizziness or urinary disorders are added, don't wait—get help before the kidney disease takes a grip—before dropsy, gravel or Bright's disease sets in. *Doan's Kidney Pills* have brought new life and new strength to thousands of working men and women. Used and recommended the world over. *Ask your neighbor!*

An Iowa Case

C. H. Nibel, 1103 N. Kellogg Ave., Ames, Iowa, says: "I had such a stiff and lame back I could hardly get up or down. My head ached and things blurred before my eyes. Mornings I felt tired and sluggish and hated to begin the day's work. My kidneys acted too frequently. Doan's Kidney Pills never failed to help me whenever I used them."

For Constipation

Dr. John Hart 76 Years old and in Perfect Health

Makes My Bowels Move Every Day

I haven't taken a physic in 50 years. I am a young active man now at 76. Many men and women have come to me when no one else could help them. And I have put them on the road to health and ripe old age. My GOLDEN WHEAT FOOD did it.

You Don't Need Drugs—

You can do away with constipation and all its terrible bodily consequences.

You can do away with the drugs called physic which poison the delicate digestive organs.

You Need My GOLDEN WHEAT FOOD

I guarantee that if you will eat my GOLDEN WHEAT FOOD once a day every day—you will never need a physic.

My GOLDEN WHEAT FOOD is rich in the life-giving vitamines and the body-building phosphates. It also supplies the iron so necessary to good red blood that gives you that vigorous youthful feeling.

Give my GOLDEN WHEAT FOOD a trial. It's delicious in gems, mush and bread. If you feel that my GOLDEN WHEAT FOOD isn't worth its weight in gold, say so, and I will refund every penny. Three 24 oz. pkgs. $1.15 by parcel post, prepaid or $1.22 C. O. D.

You and each of you are hereby notified that on Sept. 2 1921 there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district and that a system of drains be constructed for the relief of said district.

You are further notified that on Sept. 6, 1920 E L Merten was appointed engineer to make a survey, plat and profile and field notes of said proposed district, and that on April 13, 1921 said engineer filed his report recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said county and may be amended at any time before final action is taken thereon by the Board of Supervisors, and that Nov. 14, 1921 at 1 o'clock P. M. has been fixed as the time for hearing thereon. All objections and claims for damages must be filed in the office of the County Audnitor not less than five days before said day of hearing.

Witness my hand and official seal at Garner, Iowa, this 28th day of Sept. 1921.

AERO GONGRESS TO BE MAJESTIC MIDWEST EVENT

Flyers From All Parts of Continent Will Take Part In Omaha Assembly.

DATES NOVEMBER 3 TO 5; RAILROADS LOWER RATES

Masters of Aircraft Industry and Other Dignitaries to Attend.—Stirring War Scene Part of Gigantic Spectacle.

Omaha, Neb.—There is only one Paris, and during the war the hundreds of American aviators who caused Bill Hohenzollern to lose his job "adopted" the gay city on the Seine as their rendezvous.

Nearby were located training and bombing fields, where hundreds of fliers daily held communion with the undertaker by attempting "vrilles", barrel rolls, corkscrew turns and loops while flying thousands of feet above the earth. It was war.

When the International Aero Congress opens in Omaha on November 3, many of those same fliers will live again their adventures in the air, and their social pastimes when the sun is darkened, as guests of hospitable Omaha.

Mr. Volstead has made it impossible to procure certain required "props" to make the city of the Missouri the city of the Seine, but the romance and adventure of those days preceding August, 1918 will lose nothing in the telling, when cronies from the four corners of the continent will meet again to "take the air" at the big International Aero Congress. Such is peace.

Ak-Sar-Ben knights, the Chamber of Commerce, the Aero Club of Omaha, the American Legion, societies' leaders, —all will play their parts as hosts to visiting dignitaries of the air, and it is predicted that Omaha will reach the pinnacle of her social activity during the air meet.

"Before the air meet is concluded" said Earl W. Porter, president of the congress, "every debutante and matron, as well as staid business men will be conversant with "lift camber", "contact", "dihedral" and other air terms."

"Cold blooded business men, who are skeptical of the future of air industry, will have ample evidence at their very door that heavier-than-air machines will dominate the field of passenger and commercial transportation."

The men who have "nursed" the industry from its infancy—Orville Wright, Glenn Curtiss, Glenn Martin, Major Charles J. Glidden and others—will be executives of the meet, which will prove to the world that the airplane scientists of a decade past were not essentially dreamers.

Perhaps the universal spirit of cooperation has been granted the air congress officials, for such dignitaries as Judge Kenesaw M. Landis, National Commander John G. Emory of the American Legion, Major Ira A. Rader, dean of army air men, and a host of others have all accepted the invitations, and assure the success of the congress.

Movie skeptics, those filmads who breathlessly watch daring aviators perform for the screen, only to criticize "just some trick photography" will have an opportuniy of finding enlightenment during the meet.

"The Bombing of Courcelette" written by Rupert Hughes and Eddie Deeds, with over 100 persons in the costumed cast, will be a part of the spectacle. The village of Courcelette will be built on the flying field, and with an 80-million candle power searchlight furnished by the General Electric company, illuminating the heavens, the battle in the clouds, not unlike the famous air duel above the real village of Courcelette in 1918, will be fought again.

Aces who performed in France will again "kick off the bombs"; chasse pilots will engage in machine gun duels high above the bombers, and when the director yells "out" all Omaha will gasp at the spectacle so lifelike in its conclusion.

The village will be in ruins. The drone of the German Mercedes will be heard, less audible each moment, significant of Hun defeat. Streaks of fire from Hun bombers falling in flames, aid the searchlights in illuminating the "set." The village in ruins and shattered Hun planes will tell the tale.

Thousands of people and hundreds of the distinguished men of this and foreign countries are expected to take part in the congress. Special railroad rates of one-and-a-half fare for the round trip have been obtained from all railroads. It looks like the biggest thing in recent history for the central west.

Ace of Aces is Entered.

Eddie Rickenbacker, American flying ace, beloved of all Nebraskans as a "Nebraska Boy, will be present at the Omaha air congress November 3-5.

He'll be there "with bells," he tells Earl W. Porter, president of the Omaha Aero club, which is putting on the meet, and of course he'll bring his ready smile with him.

There is a wonderful underwear stock here

Uuderwear is a very important factor in your winter comfort.

You'll tind the right kinds here, Union or two-piece cotton or wool. All weighte anp all degrees of fineness

Men's ribbed union suits	$1 $1.50 & 2.50

HELP WANTED!

This week we are asking for a lot of help——perhaps you are one of those who can help us a great deal at this time. The kind of help we want right now is some good old U. S. Coin. We are carrying too much on our books and must reduce the amount, as we need the money to do business with.

If you owe us an account please call at once and settle——if you can't pay all of your account then please favor us with as much "help" as you can. We expect all accounts to be paid at once——all accounts must be paid before the first of the month.

We will appreciate a settlement of your account at once.

YOURS FOR SERVICE

GRAM & SCHULTZ AUTO CO.

Public Please Notice

We respectfully call your attention to the fact that we are carrying many over due accounts on our books.

We ask that you please call and make settlement at once as we need the money to do business with.

Keep your credit good by paying up at least once a month.

Goodell News Items

Father Eardley was a Goodell visitor Friday.

Mr. and Mrs. Ivan Lowenberg are visiting at Claire this week.

Thos. McNulty of Belmond was a Goodell caller Friday.

Chior practice was held at the Julius Cook home Thursday evening.

Mr. and Mrs. J. J. Cook were at Hampton visiting last Tuesday.

All pupils in the G. H. S. wearing silk hose will be sent home.

Mrs. D. Miller is reported as being very ill at this writing.

Mae Griggs was a Klemme caller between trains Monday.

Jay Griggs and family were Crystal Lake visitors last week.

Work on the new church is progressing very rapidly.

Mrs. T. Letch is on the sick list this week.

Mrs. Fred Bachman is enjoying a visit from her sister of Blue Earth, Minn.

Our High School Base Ball team played Kanawha a return game last Friday.

Miss Mamie White, who has been in the Hampton hospital for some weeks, returned home Thursday.

Miss Agnes Clark, of Belmond, spent the week end with Mrs. Bert Hood.

A party was held at the O. Snyder home Friday night. Everyone present enjoyed themselves.

A few of Goodell's young folks went to Thornton Thursday night to attend the American Legion dance.

A number from here attended the wrestling match at Klemme last Wednesday night.

Jay Griggs, "Bill' Lamer and the Christensen brothers spent Tuesday fishing at Clear Lake.

Thomas Quigley enjoyed a visit from Clella McCullough, of Garner. Sunday.

Chas. Gibbs, of Big Lake. Minn., was calling on old friends in this vicinity last week.

County Agent Nutty and Dr. Fincham, state veterinarian, tested cattle for T. B. in this vicinity last week.

Everyone welcomed Mae Griggs back to school again Thursday morning after her short but serious illness.

SOMETHING TO THINK ABOUT

By F. A. Walker

VOYAGERS OF LIFE.

THE captain who can first find his bearings in the snarling storm at sea, is he who will be first to reach a safe harbor.

And so it is with sailors on the turbulent sea of life, when tempestuous winds blow and adversity comes.

In this sense, we are all captains, each at the wheel of a craft of our own, responsible for its keeping and its guidance to still waters.

Some of us face storms with calmness and abiding faith.

Others miss their bearings, lose courage and through fear, fail to gain control of their ship, which drifts on the rocks a hopeless wreck, with themselves and their crews clinging to broken spars.

* * *

These derelicts swarm the city streets, crowd the park benches and crawl at night like hunted things to some wretched attic or dark doorway.

They began their voyage under the soft blue sky and the bright sunlight, with their white sails swelling in friendly breezes, proud and joyous in the glorious vigor of youth, thoughtless of hidden shoals and contrary winds.

They mocked and jeered those who stood at the wheel so soberly, scanning the shifting clouds, watching the "draw" of the sails and the behavior of the craft that in some unaccountable way had become a part of them.

At the end of years, when lifeskies begin to purple, these sober wheelmen, patient and earnest still, find their way to friendly ports, wearing the smile of triumph.

* * *

The other ships, whose captains lacked earnestness, patience and self-reliance, never came back. Their storm-wrecked sailors, picked up here and there, lack incentive to make another voyage—erring, shiftless and untrue, like their captains.

They are untouched with the radiancy of better things.

Opportunity succeeds opportunity, but they shun it.

Hope, they will tell you, is dead, but they decline to tell you that they themselves killed it.

* * *

How are you sailing your ship?

Are you devoting to it your full attention, putting into your lifework all the ability, sincerity and energy that you can command?

If you are, there will be no park benches and wretched attics awaiting you at the end of your voyage, but in their stead there will be the sweet consciousness of a well won reward, the blessing of an uncomplaining soul and these mean true and abiding happiness whatever your surroundings.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

CO-OPERATIVE CLASSES

AN INTERESTING plan has been worked out by a certain high school in its commercial departments. This is a co-operative method by which the girl students get actual practical work together with the class work.

For instance, in the salesmanship course the girls work one week in school and one week in some large department store alternately. The stores are making their inducements to young women who wish to become saleswomen more attractive, and they are seeking a high class of employees. And it is the girls who have taken a course of training with the view of becoming expert in the profession who are sought for. They begin at the bottom, while they are still working in the school, and by the time they have been graduated they are ready for a good position with every prospect of steady advancement.

The complete course includes designing, color matching, house furnishing, etc. A girl will specialize later in certain types of the work, but she is given a grounding in all. If she has a good foundation she is going to know what to sell her customers. She is unlikely to make bad sales, and so suffer returns.

With such school work and such training as are offered by the type of high schools quoted, a fine class of women is going to be attracted to the work in increasing numbers. The stores realize the value of the expert. It is a thing that will pay looking into by the ambitious business girl.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"LOVELY."

"DID you enjoy the play?" "Yes, I had a lovely time." The person who used the word "lovely" in this sense did not know, or forgot, that "lovely" should be used only to describe something which is adapted to or worthy of being loved—that is, of inspiring the highest esteem of which the human being is capable. The word "lovely" means, according to the Standard dictionary, "possessing mental or physical qualities that inspire admiration or love; winsome, charming, lovable, as 'a lovely face.'"

The word "lovely" has, therefore, a distinct and valuable place in English diction, and should not be debased by use in connection with common or ordinary matters, or trifles. Instead of "lovely," in most cases some such words as attractive, agreeable, pleasant, enjoyable should be employed. Here is correct use of "lovely": "She's adorned amply that in her husband's eye she looks lovely."

HER SURRENDER

By MILDRED WHITE.

Copyright, 1921, Western Newspaper Union.

I have something now to tell you, Suzanne, that will make you open your eyes very wide as you read, and sigh over the caprices of your companion niece. For it was first a caprice that sent me into the depths of the Blue hills to visit Uncle Horace in his isolated grandeur; really, Blue Mountain house is a grand place. And it was caprice, again, which caused me to refuse the heart and hand of Uncle Horace's young friend, lately returned from the West. Years ago, it seemed, Uncle Horace and the father of this young man, Nathan Warren by name, were boyhood friends in the Blue hills region, and neither of them in old age had forgotten the freedom and adventure of that happy time. So both erected homes there, but while Uncle Horace remained to enjoy both his home and success, Nathan Warren's father passed on to the great beyond. So Nat, as we call him, comes occasionally to look over the desolate, empty house, which his modest circumstances will not permit him to support, as his father left no money.

"Nat," my uncle impressed upon me, was an exceedingly worthy young man of whom the future would hear, if not the present. Certain it is, that the present has not heard. Of course I liked him, Aunt Suzanne; no one could resist Nat's wholesome charm. But I did not want to care too much.

I did not aspire to cook three meals a day for even a charming Nat Warren in some hot grubby kitchen. The kitchen would be grubby if I had the care of it, etc.—the et cetera meaning all the other drudging things it was possible I might have to do upon becoming the humble Nat's wife. So I refused him decidedly and was all grieved and angry in my heart that he dared make me love him.

We parted with a quarrel. I was glad in my perturbation when Rosie, Uncle Horace's cook, asked me if I would row to Mammie Chloe's little cabin to see if either she or her slim daughter, Pearl, could be persuaded to come over for a day, to help us in the house. Chloe is a fine laundress, while Pearl bakes delicious cakes and pies.

I raced the few steps to Mammie's cabin door, banging it behind me just in time to escape the downpour. And Suzanne—neither Mammie nor her dusky daughter were at home.

There I was, in a terrific electric storm, marooned in a cabin on Strawberry isle. And as usual, even in danger, my predominating sense was uppermost, and I hunted for something to eat.

So I enveloped myself in the scarlet apron and went to work, singing, too, Suzanne; the coffee smelled so delicious, and the storm outside seemed a vent for my own feelings. There, looking from the window I saw him—Nathan Warren. He was in a small motorboat, and the winds were buffeting it about, but I think I should recognize Nat if he were no more than a speck on the surface of the sea.

Always I seem to know when he is near. He would seek shelter at the cabin, of course, and no doubt it was I, and all the hard things I had said which had driven him out unheeding into the storm.

I caught up Pearl's red turban from its peg, rather a cross between a boudoir cap and a turban—and pulled it well down over my eyes. If I could keep my back toward Nat and go on working over the stove, it was not likely that he would discover my identity. So I answered his sharp rap with Pearl's grudging grunt. He went right past me into the other cabin room and sat down before a small table.

"I am likely to be here for some time," he called, "the storm is pretty bad. Can't I have some of that tempting bacon?"

"Yes, suh," I answered in a sort of whisper. I had to keep him from suspecting, you see; so I put all the delicious dinner I had prepared for myself on a tray, and carried it in—to that man. He did not look up from the magazine he had opened, but praised the coffee extravagantly as he used the last bit of cream. And Suzanne, I never was so pleased at anything in my life, as Nat Warren's praise of my cooking. He did enjoy it. And it was so good to see him sitting there in that lonely cabin room, that I brought wood while his back was still turned and kindled it in the fireplace to take off the damp of his ride.

And when I went to fill the lamp in the kitchen, I caught a glimpse of my face in Mammie's mirror, and it was so bright and happy that it startled me. Yes, happy because he and I were not separated forever, as I had thought, but just—together, in a dingy cabin room, with wind and storm tearing at the windows, but together; even if Nathtan Warren did not know that fact himself. I carried the big coffee pot in to him silently joyous. There was smudge on my face and a burn on my arm. Nat took the coffee pot from me, then calmly kissed my burn.

"Patty, dear," he said, "you are some good little cook. I still think I am right about that life job. Take off Pearl's crimson outfit, and come around where I can look in to the heaven of your eyes. I came right out after you in the storm, dear, when Rosie told me where you had gone." And, Suzanne, I took off that apron as meekly as you please, and went round to sit at Nat's side, forever.

Your New Home

should be made artistic, sanitary and livable.

These walls should be Alabastined in the latest up-to-the-minute nature color tints. Each room should reflect your own individuality and the treatment throughout be a complete perfect harmony in color.

The walls of the old home, whether mansion or cottage, can be made just as attractive, just as sanitary, through the intelligent use of

Alabastine

Instead of kalsomine or wallpaper

It is absolutely necessary if you expect Alabastine results that you ask for and secure *Alabastine*.

Avoid kalsomines under various names and insist on the package with the cross and circle printed in red. That is the only way to be sure you are getting the genuine Alabastine.

Alabastine is easy to mix and apply, lasting in its results, and absolutely sanitary.

Alabastine is a dry powder, put up in five-pound packages, white and beautiful tints, ready to mix and use by the addition of cold water, and with full directions on each package. *Every package of genuine Alabastine* has cross and circle printed in red.

Better write us for hand-made color designs and special suggestions. Give us your decorative problems and let us help you work them out.

LYRICS OF LIFE

By DOUGLAS MALLOCH

HEART WEATHER.

SKIES are not always amethyst,
And stars are lost in midnight mist,
The sun is curtained by the rain,
Day has its darkness, night its pain;
And yet the hill the sun has kissed
I know shall feel his kiss again.

We do not ask perfection of
The earth below, the skies above;
They have their moments that are drear,
And winter comes to every year—
We ask it but of those we love,
Perfection only of the dear.

Hearts have their weather, every heart—
We do not live with perfect art.
Hearts have their time the thunders roll,
Their little tempests of the soul.
But soon the tempest shall depart
And leave affection's aureole.

You who are patient with the skies
When suns go down and storms arise,
Be patient in the time of stress,
The tempest meet with tenderness.
Love must be patient, must be wise—
The sun obscured shines none the less.

SCHOOL DAYS

MOTHER'S COOK BOOK by Nellie Maxwell

Make my mortal dreams come true
With the work I fain would do;
Clothe with life the weak intent;
Let me be the thing I meant.
—John G. Whittier.

THE WHOLESOME CUSTARD.

CUSTARDS of different flavors are always good desserts for the children and are usually well liked by them. One egg to a cupful of milk and two tablespoonfuls of sugar or less will make a thin custard which will be sufficient for two small cups. If the custard is desired thicker, two eggs to one cupful of milk will make a custard which will mold. Of course, when food value is considered, the more egg the more nutriment.

Cup custards are more attractive in appearance if decorated in some form. A dot of jelly or jelly cut in cubes, a candied cranberry or cherry, or any bright preserved fruit is always festive, and a spoonful of nuts adds to its food value.

Care should be taken in the preparation of a custard. If baked, place the custards in a dish of water and watch carefully not to overbake as they become coarse and tough. A baked custard has a finer flavor than boiled, and is particularly good with tart berries.

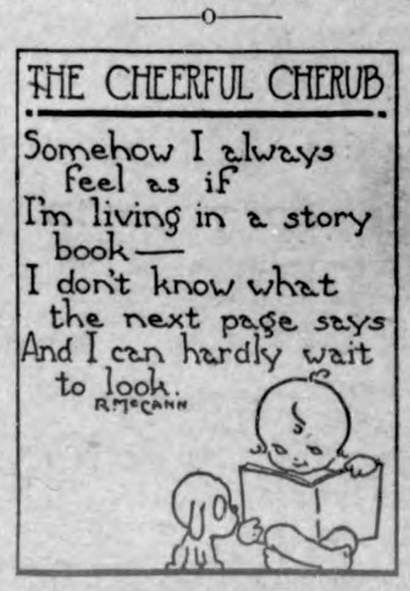
Nutmeg, cinnamon, orange rind, lemon, maple or caramel are all good flavors, as well as chocolate and cocoa. Chocolate grated over the top, or cocoa sprinkled lightly over the custards adds to its food value. A pinch of salt is needed in all custards, otherwise, they are flat in taste. An orange flavored custard is delicious served with a spoonful of orange marmalade on top.

Caramel Custard.

Put one-half cupful of sugar in an omelet pan and stir well while melting; when a golden brown add one quart of boiling hot milk, adding very carefully a little at a time, when the caramel is all dissolved and mixed with the milk add five slightly beaten eggs, a pinch of salt, a teaspoonful of vanilla and strain into a mold. Chill and serve with a caramel sauce. Four eggs will make a rich custard, but not so well to mold.

Copyright, 1921, Western Newspaper Union.

THE CHEERFUL CHERUB



THE ROMANCE OF WORDS

"PICNIC."

DURING the early years of the past century it was customary for those who were invited to an outdoor entertainment to bring their own refreshments with them. A list of what was considered necessary would be made out and passed around among the guests, and each person would agree to furnish a certain portion of the repast, the name of each article being then crossed, or nicked, off the list. For this reason, this form of what the French refer to as fete champetre became known as a "pick-and-nick," referring to the selection or picking of the various articles and the crossing them off upon the card, and, through the usual contraction, the central word was dropped and the term shortened to "picnic."

Though this word does not appear to have been used prior to 1802, outdoor entertainments of this nature were common during the two centuries which preceded. Mainwaring, in a letter dated November 22, 1618, describes a birthday party for the prince of Wales, at which "every man did bring his dish of meat." "Sir George Young's invention," adds the writer, "was four huge brawny pigs, piping hot and harnessed with ropes of sausages, all tied in a monstrous bag pudding."

Cincinnati's Pride.

Cincinnati has spent $3,000,000 on a city hospital, described as one in which it is a pleasure to be sick. Here is a suggestion for a pleasant and inexpensive summer vacation. Go to Cincinnati and fall ill.—Boston Transcript.

MOTHER, QUICK! GIVE CALIFORNIA FIG SYRUP FOR CHILD'S BOWELS

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say, "California" or you may get an imitation fig syrup.—Advertisement.

Fanciful names for dogs are almost universal; and now "Rover" would almost be a novelty.

The average man no sooner does a kind act than he begins to feel big over it.

Genuine

BAYER

ASPIRIN

Never say "Aspirin" without saying "Bayer."

Accept only "Bayer" package which contains proper directions.

Handy tin boxes of 12 tablets—Bottles of 24 and 100—All druggists. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

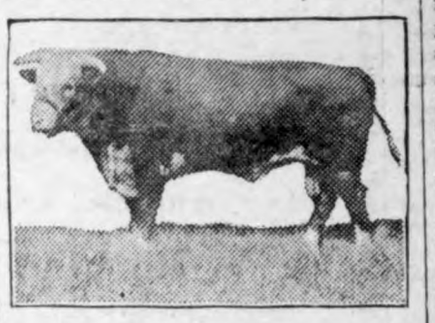
LIVE STOCK NEWS

DISTRIBUTE 130 PURE BULLS

Animals Intended for Breeding Purposes in Different Communities in Kentucky.

Prepared by the United States Department of Agriculture.

The first of the "better-sires" sales held in Kentucky this year resulted in the sale of 130 purebred bulls. These animals are being distributed through the state and will be used for breeding purposes. In describing the sale, Wayland Rhoads of the extension



Type of Bull Used to Build Up Herds in Kentucky.

division, University of Kentucky, states in a letter to the United States Department of Agriculture that "much improvement will come from it."

Notwithstanding the present excellence of much of the live stock in the state, Kentucky farmers are welcoming the opportunity to obtain, at reasonable prices, purebred sires of superior type. Additional sales are to be held.

VERY FEW REAL RUNTS BORN

Undersized and Unthrifty Animals Are Generally Result of Inadequate Feed and Care.

Emphasizing that runty live stock are generally the result of inadequate feed, housing and care, the editor of a farm paper in the Central West adds to the experiences which nearly 1,000 farmers have already reported to the United States Department of Agriculture on the subject of runt prevention.

"There are very few real runts born," he declares. "They may be a little undersized, perhaps a trifle weaker and sometimes of inferior constitution, brought on by improper breeding systems. But poor housing, limited range, getting rooted away and cheated by the larger and huskier of the litter—these are the agencies by which most so-called runts are formed. Given proper care and feed until they get a start, the runts will prove money-makers."

These comments agree closely with the opinions of others who contributed their experiences in the matter to the department. Particular care needs to be given live stock at weaning time, since this is the time when the dams fail to give the nourishment required by the growing animal and when the young stock is learning to eat other feed.

WAY OF RAISING MULE COLTS

Best Plan Is to Put Them on Feed After Weaning and Never Retard Best Growth.

The older way of raising mules was to turn them out at weaning time and practically let them rough it until three years old, then get them up, wild as deer, for a shearing and then either span them out to break or put them in the pen for fattening as unbroken stuff. Nowadays the mule colt is put on feed almost before weaning and is never allowed to stop his growing until he is ready for the harness, which time is reached a year sooner by the new method than by the old. The mule at two is a good work animal, but care must be taken not to overdo him at that age, and it is best not to put a two-year-old in as a "regular" until he is well accustomed to the work, better still, don't crowd the youngster until he is three, when he will have attained quite a bit of that strength and grit that makes him the marvel of the working world.

FEEDING NEW CORN TO HOGS

Give Few Stalks Just as Plant Reaches Advanced Milk Stage, Gradually Increasing Amount.

A good way to accustom hogs to the new corn is to cut a few stalks of corn and throw it over the fence to the hogs just as it reaches the advanced milk stage, gradually increasing the amount until in 10 or 12 days, when the corn is well dented, the hogs are getting a full feed. Even then, it is necessary to watch them closely to see that none get off feed because of digestive trouble.

SILO PAYS LARGE DIVIDENDS

Stands as Sentinel to Successful Cropping and Efficient Feeding—More Are Needed.

The silo has been the difference between success and failure on many farms where cows, beef cattle or sheep are kept. The silo stands as a sentinel to successful cropping and efficient feeding. It should be a monument to thrift and progressive husbandry on more farms. Why not ensile your corn and carry your cattle or sheep through the winter economically?

POULTRY FLOCKS

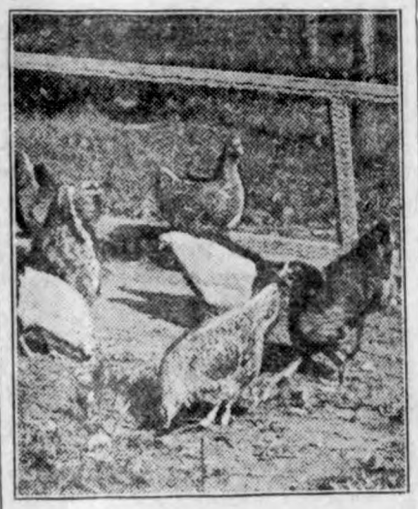
EGGS FROM BACK YARD FLOCK

Owner Should Be Satisfied With No Less Than Ten Dozen Eggs Per Hen, Say Experts.

(Prepared by the United States Department of Agriculture.)

The average novice can reasonably expect to get an average of at least ten dozen eggs per hen a year from his small flock in the back yard, say poultry specialists of the United States Department of Agriculture. On the basis of two hens to each member of the family this will give 20 dozen eggs a year to each person, which amount is about half way between the general average of farm and city consumption. No back-yard poultry keeper should be satisfied with less than this. He should try, however, to get as much more as possible.

To provide an egg a day for each person two hens would have to lay 183 eggs each a year. This is by no means an impossible average for small flocks. It is perhaps not too much to



A Common Mongrel Back Yard Flock.

say that in case, where the person attending the flock is in a position to look after the wants of the birds three or more times a day an average of better than thirteen dozen eggs per hen can be secured if the hens are mature and in good condition at the start, and have the vitality to carry them through a year of heavy laying.

For the farm the average of 100 eggs per hen is advised as the lowest that should be accepted as satisfactory, while for the back yard 120 is insisted upon as the lowest average, although in general the conditions in back yards are less favorable to poultry keeping than on farms.

WHY CULLING IS PROFITABLE

Unculled Flock of 992 Hens Laid 3,576 Eggs in Week and 3,520 With 79 Taken Out.

An unculled flock of 992 hens laid 3,576 eggs in the week before being culled. Seventy-nine weak layers were cast out. The culled flock of 913 came right back the next week with a record of 3,520 eggs, while the 79 culls, living under precisely similar conditions, and doing their very best, were laying only 85 eggs. The market value of the eggs layed by the culls was around $3.50. The cost of feed alone for them at a cent a day for each hen was $5.53 for the week. Figures like these, say the poultry specialists at the university farm, show the importance of keeping only the best layers. Lessons driven home in the farm bureau's and extension division's campaign for frequent culling of flocks should put thousands of dollars in the pockets of poultry raisers.

GEESE ARE QUITE PECULIAR

Different From Other Fowls as They Must Be Mated Previous to Breeding Season.

Geese are peculiar animals. They ought to be mated several months prior to the breeding season to obtain the best results; therefore breeding stock should be bought in the fall, and all changes in matings made then. Matings are not changed from year to year unless results are unsatisfactory. And this is the peculiar feature of it. If the matings are changed, it is necessary, usually, to keep the previously mated geese so far apart they cannot hear each other.

POULTRY NOTES

Keep lime always in reach, plenty of gravel or grit and a good dry dust bath for the fowls.

* * *

Give the growing stock all they want to eat. They won't pay unless they grow, and they can't grow unless well fed.

* * *

Separate the males and females. Both will stand the hot summer weather better if separated, and the eggs will also keep better.

* * *

Hens need fresh water as much as do horses. During these hot summer days they will suffer greatly unless they have constant access to it.

* * *

The farmer who fails to save some of his choicest second-growth clover for the hens during the winter will miss one of the best egg-producing feeds we have.

"THEY SAID I HAD T. B. AND WOULD NOT LIVE THREE MONTHS"

Mr. Harold W. Schmidt, Box 98, Breese, Clinton Co., Ill., believes he has reason to praise Dr. Hartman's Remedy for Catarrhal conditions.

"I used Pe-ru-na eight months for Chronic Bronchial Catarrh. I do not get tired, feel like a giant, am six pounds over normal weight and able to work every day. In March, 1915, I contracted a severe cold with spitting and took to my bed. They said I had T. B. and would not live three months. After taking a couple bottles of Pe-ru-na and a box of Man-a-lin Tablets, could walk around and in seven months went back to work. My trouble was due to Chronic Catarrh of the nose and throat, which I had ten years, extending down into the bronchial tubes. "Pe-ru-na was my life saver."

"FEEL LIKE A GIANT SINCE USING PE-RU-NA"

DISTEMPER AMONG HORSES successfully treated with

Spohn's Distemper Compound

With the approach of fall and winter horses are again more liable to contract contagious diseases—DISTEMPER, INFLUENZA, COUGHS and COLDS. As a preventive against these, an occasional dose of "SPOHN'S" is marvelously effective. As a remedy for cases already suffering, "SPOHN'S" is equally effective. Give it as a preventive. Don't wait. 60 cents and $1.20 per bottle at drug stores.

SPOHN MEDICAL COMPANY — GOSHEN, INDIANA

Horse's Subjection to Man.

There is no exact date recorded in history when man first rode horseback, but it is probable that the time is not more than 3,000 years ago.

Important to Mothers

For the Young Woman Who is Pale

Kansas City, Kans.—"When I was a girl just coming into womanhood I became all run-down, weak and nervous. I was pale as death. My people became very much alarmed; they thought I was going into a decline. My mother took me to our druggist and asked if he could recommend some medicine. He told her to try Dr. Pierce's Favorite Prescription, and she did. I had only taken it a short time when I began to improve and it was not long when I was well—in the best of health."—MRS. BELL GAMMON, 2919 Roosevelt Ave.

No alcohol. Liquid or tablets.

LENIN NOT RUSSIAN CHIEF

Bolshevik Exponent Is Premier, Michael Kalinin Being President of Central Executive Committee.

Most Americans believe that Nikolai Lenin is president of Russia, whereas he holds an office which corresponds to that of the British premier. Michael Kalinin, a peasant, for more than two years has been president of the All-Russian Central Executive committee. His position is only about as politically powerful as that of the French president, and, whereas the French executive's position is mostly social, the Russian president is mediator, champion and political adviser of the peasant masses of Russia.

Kalinin's office in Moscow is not in the Kremlin, but in an ordinary office building in the heart of the city. It is the one place in Russia where no "papers" are demanded when one enters and no guards stand about the doors.

Nursing and Disease.

Dr. Anne Moldenhauer of Berlin has been experimenting with nursing mothers who had various diseases. She finds that except in open tuberculosis and dysentery, which are doubtful, the child receives no injury from nursing and that in few cases is the supply of milk much reduced.

Helping Him Out.

While visiting friends in Cleveland, a young Detroiter was presented with a quart of rye whisky. He decided to take it home in his suitcase.

As the steamer neared the dock he became more and more nervous. Finally, in desperation, he confessed his fears to a fellow voyager. This kindly individual offered to trade suitcases and assume all responsibility. The young man was vastly relieved and the change was made.

The luggage was not searched and a few minutes later the two met on shore. The young man was exceedingly gratified.

"By the way," he observed, as they exchanged again, "you must have a lot of things in your suitcase; it's awfully heavy."

"Yes," said the stranger. "I have twelve quarts in mine."—Harper's Magazine.

The Delay.

"I'm sorry but you'll have to wait an hour for this prescription to be filled," said the clerk in the drug store.

"Why?" asked the man who was in a hurry. "There are eight or nine clerks in the store."

"I know that, sir, but the only one who knows how to put up prescriptions has gone to lunch."

Whose fault is it when your husband is cross at breakfast?

If you hit your thumb with a hammer you wouldn't blame your thumb for hurting.

Then why blame your husband whose nerves may have been pounded by coffee, and whose rest probably has been broken by the irritation of the caffeine it contains?

If you stay awake half the night you don't feel any too cheerful.

The caffeine of coffee and the thein of tea are known drugs. If their use is persisted in, sooner or later the nervous system may give way.

Then you may have insomnia, or disturbed sleep. Your nerves and tissues will be robbed of that stability essential for normal and happy living.

You can avoid this possibility if you'll stop drinking tea and coffee and drink instead, rich, pleasing Postum.

Postum is the delicious cereal beverage with a coffee-like flavor. It affords the advantages of a hot drink, without the ill effects of tea or coffee.

Order Postum from your grocer today. Try it with the family for a few days, and see what a difference there'll be—how it will permit Nature to bring sound sleep and strong, sturdy, quiet nerves. Sold by grocers.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum for Health — There's a Reason

Pay Your Grocer Firs

When your pay your bills, pay your grocer first money.
He supplies you with the wherewithall to live - FOOD

One of the most important things in the world is to get something to eat

If you must put off any one, therefore let it be anyone BUT the grocer

He is not wealthy. He seldom has a surplus in the bank. His money is invested in merchandise and accounts.

He buys of wholesale houses who sell on stated terms and have men who are paid to "get the money" when due. He cannot pay them with excuses.

He can't afford collection expenses. He should not be expected to. If he is courteous enough to give you credit, show him equal courtesy by paying him promptly and without making him extra expense

He has no security. What you buy of him is soon consumed and he cannot get it back. He trusts you on yohr honor alone. Who else does as much for you.

He asks no favors, needs no charity but is entitled to a square deal.

Be fair. Be square. Be jnst.

Pay Your Grocer First!

"A Good Place to Trade" ***Klemme, Iow***

PUBLIC AUCTION OF

Real Estate

Tuesday, Oct. 11

On Premises at 2:30 P. M.

Having decided to sell my farm, I am offering the following:— W. 1-2 N. W. 1-4 of Section 17, and the E. 1-2 N. E. 1-4 of Section 18, containing 160 acres, more or less according to Government Survey, all in Avery Township, Hancock County, State of Iowa.

DESCRIPTION OF BUILDINGS, ETC

Good eight room house; large barn; double corn crib; chicken house; hog house; cattle barn; machine shed. Land is well tiled. Nearly all fenced with woven wire and cross fenced. A fine evergreen grove, good orchard.. Buildings all in first class condition.

GOOD LOCATION

This farm is located 3 miles north and 1 mile east of Goodell, Ia., and 3 miles south of Klemme, Iowa, making it close to market.

TERMS OF SALE——The terms of this sale will be $4,000 cash on date of sale, and $11,000 on March 1st, 1922, the balance will be carried back at 6 per cent interest. Cash payment must be a certified check or draft.

One dollar per acre will be given to any person bringing buyer. He must register before sale and the first to register such buyer will be entitled to the commission only.

The farm is rented for cash for one year from Mar. 1st, 1922. Purchaser to receive the rent.

C. W. WILES

OWNER

J. J. HOFFMAN, AUCTIONEER
Of Clarion, Iowa.

THE KLEMME TIMES

Twenty-sixth Year—Number 5 | Klemme, Iowa, Thursday Afternoon, October 13, 1921 | $2.00 In Advance—$2.50 Outside of Count

News Of The Week Reported By The Klemme Schools

KLEMME SCHOOL NEWS

(By A. E. Lauritzen)

Edwin Bock was absent Tuesday afternoon.

The High School observed Fire Prevention day Monday in writing themes concerning prevention of fire in all English classes. Most of the themes were very interesting and delt with the carelessness of the people in handling inflamable objects. Every one should help make Iowa Fire Proof.

Neota Ridder, of the Freshman Class was appointed Yell Leader by the High School girls. Neota has proved to be an excellent leader. They practiced a number of yells and songs and the girls used their "pep" in the game with Goodell yesterday. They are to be cangratulated for their good work. It makes the players play much harder. Klemme High is the center of "Pep" We'll say!

Some very interesting (?) books have been assigned to the class in Ancient History. John remarked, "They're so dry the leaves rattle"

The Freshman English Class will start studying Scots, "Lady of the Lake" next week.

Loretta Sheldon, from Springfield Ill, enrolled in the High School two weeks ago. She is taking up studies in thee Freshman and Sophomere classes. She is welcomed by everyone as a new pupil.

The Senior Class are proud to have the enrollment of George and Edna Bergman. This increases the Senior class to eight in number. These pupils are highly welcomed by everyone in the class, and with good luck coming our way we also have a new baseball pitcher. George is a good curve pitcher and Wiles has the smoke. With these two pitchers we are sure to win most of our games this the spring

Letters have been received from the Rowan High School asking us for four games of basketball. Two of these games will be between the girls and the girls of Rowan, and two between the boys. We are greatly handicaped on account of not having any place to play except outside. We also need a coach. Who will volunteer to coach us? Don't all speak at once.

A letter was received from Goodell asking us if we woul play a return game with them on Wednesday (yesterday) instead of Friday.

Clarence Elder was absent Thursday and Wednesday.

The Sophomores had a general business meeting last Friday after school.

A spelldown contest was held in the High School Friday afternoon between the High School pupils. It was very interesting and Glenna Metzmacher proved herself the champ of the day. It must also be noted that Glenna is in the Senior Class and the Seniors are all proud of her as a speller.

Wednesday the local High School football team journeyed to Goodell to play a return game with the team from that school. It was a very interesting (?) game. Bergman was taken out in the eight inning and proved to be a good curve pitcher. At the end of the eight inning the score wound up to be 21 to 8 in favor of Klemme High. "We'll say the tables were turned."

Grammer Room Notes

(By Andrew Wellemeyer

Friday, p. m. Mrs. Gibbs was absent and Adela Schroeder taaught the room. The children reported she is an excellent teacher.

Vera Bergman started school Monday. She is in the fifth grade.

Albert Keeper was absent Tues.

MANLY TO HAVE NEW $10,000 ICE HOUSE

MANLY, Oct. 12—Contract has been let for the construction of an ice house to be built opposite the C. R. & P. property. The Rock Island is putting up the new building to supply the need for ice at this terminal for filling of refrigerator cars, etc. The building is to be 32-x64, contract calling for completion within 60 days. Nelson Bros. of Minneapolis received the contract for the work. The structure will cost $10,000.

TINY BABE LEFT ON DOOR STEPS AT FARM HOME NEAR ST. ANSGAR

St. ANSGAR. Oct. 12.—Mr. and Mrs. Otto Stienburg who live near here, are happy in the possession of a wee baby left on their front porch Sunday morning. Who left the tiny piece of femininity there is however a mystery to them as it is to everybody else in this community.

Early in the morning Mr. Steinburg was awakened by a rap at the door. Mr. Steinburg called from a window asking who was there, being somewhat carefull and not knowing but what some robber or other villians might be planning theft or violence.

No answere came and he went back to bed but not to sleep. It was not long afterward they heard the cries of a baby and upon opening the door discovered a box in which lay the little baby girl.

The little one was well dressed and had all the comforts a mother loves to prepare when the great adventure of a little one is expected in a home, even to a can of powder extra blankets, etc.

Pinned to the little tot's coat was a card bearing the words, "Lucile, July 5, 1921." There is not the slightest idea as to where the babe come from, but she has found a home wherin will be provided all the comforts one need desire.

Who knows the story

In all probability a mother has come some distance from where she is known and hopes her babe has found a good home.

Market Cockerals Now

Poultry experts at Iowa State College advise the early marketing of cockerals that are not to be saved. After a cockeral weights two hundred pounds, they say it takes more feed to produce each additional pound than either of the first two pounds. Besides the bigger the rooster, the more likely it is the price per pound will be lower. Cockerals sold at broilers or fries bring the best prices and the largest profits.

Don't leave seed corn where rats will chew it but hang it in a good place where it will keep.

Reva Elder was absent Tuesday p. M.

Henry and Martha BBrandt quit school about a week ago.

The Grammer and intermediate rooms are selling the "Farmers Wife If they sell $15.00 worth they will get a picture for their room. Each child selling $1.00 worth will get a pencil box.

TOO LITTLE SPENT ON RURAL SCHOOL, SAYS MC CLENAHAN

CEDAR FALLS. Oct. 12.—One of the most important educational problems that the United States has to deal with is the training of teachers for rural schools; P. E. Clenahan, state superintendent of public instruction, told representativevs of 192 normal training high schools in conference here Monday.

Declaring that there are many reasons why the rural schools have not kept pace with developments in other educational departments of the state system, Mr. McClenahan said that one of the outstanding reasons was that Iowaa has spent very little money on rural schools. He said that a survey of the state has shown that conditions are not good in the rural schools.

The End of a Perfect Day

ADVERTISING SPACE

From the Bryon (Calif) Times

The Red Bluff Daily News submits this statement: "If you had newspaper space to sell, and a payroll to meet, would you sell your space to business men who want it or would you hold it for local people who won't take it and who sometimes declare advertising doesn't pay?"

The question is one that concerns newspaper editorer, everywhere. In many places notably smaller communities, the newspaper has a hard struggle for existance. It may be a live sheet, splendidly edited, but the local merchant feels that "everybody knows him" and it is not necessary to advertise; that he does about the same amount of business anywaay."

He fails to appreciate what it means to his community to spread the news abroad of its doings, of its achievements and its opportunities for new settlers.

Every new family means at least $1,000 yearly spent in that community. Every merchant gets his share of this.

In supporting the newspaper by advertising, the merchant encourages enterprise on the part of the publisher. and the greater the publicity given the town and the district the more rapid the growth.

The local newspaper is the chamber of cammerce and publicity bureau combined. It should have the support of every one, to the end that the greatest amount of good may be accomplished.

Thousands of dollars worth of free advertising is given every year to the community by the local news paper. Every little thing is boosted and the people abroad begin to find out what a fine place your town is.

Only in advertising can the local newspaper find reward for its effort. The subscriptions do not more than pay the cost of publishing and delivering paper.

In supporting the paper by advertising, the merchant is contributing not only to his direct benifit, but to the future of the community.

Naturally, if there is not sufficient income for local sources to pay the bills, and leave a fair margin of profit, there can be no question of the justification of the newspaaper accepting advertising form abroad.

The people of Bryon, for instance would not have the Bryon Times for another issue if it were not for outside advertising. The fact that this adverfising space is in demand by outsiders is a tribute to the paper—to its influence and its wide circulation.

The Red Bluff News wisely says that "newspaper space is not for handpicked customers, any more than is the commodity of any other business. And all other business sells its wares where it can find a customer.

Latest Dispatch From Every Part Of The State

NEWS FROM ALL OVER THE STATE

Mrs. Mary Draper. 66, of Cherokee died of nervious shock causer by cold water when she attemped to drown herself.

Alfred A. Buck, of St. Anthony, charged with criminal assult upon Icel Johnson, was found not guilty. Five of the jury were women.

All electric light and telephone wires in the business district of Adair have been placed under the pavement. The charge was maade at the request of the commercial club. The total cost was $13,000.

What is probably the longest service in buttermaking in Iowa will terminate when W. P. Muth retires after 21 years of service at the Ludlow creamery. He is recognized as one of the best buttermakers in Ia.

Dr. S. C. Varnum, of Leon, has a double bodied pig. He has preserved the freak in alcohol. The pig has two complete sets of internal organs. There are two brains in the head but only one hair of the eyes, one mouth and snout. The bodies merge back of the eyes.

Clinging to the tail of a horse Ben, Whipple, Griswold farmer was saved from drowning in a swollen creek. He was crossing the stream in his automobile when it stalled near the bridge. He sat in the car for an hour while the water rose a foot and flowed into the body of the machine. Just when Whipple could not swim, he becoming ararmed for his safety. a man came ridink by on his horse. The Marooned man grabbed the nag's tail and was pulled to safety.

Asking for $7500 damages, S. J. Keeran is suing the Surgeon Mercantile Company of Shenandoah for injuries received when he fell down down the store stairway. Keeran left his coat in the store while buying goods. A clerk hung it in the closet and then pointed to the door when Keeran was ready to leave. The latter opened the wrong door falling down a stairway and injuring himself about the head and shoulders badly.

Just an ordinary honey bee caused a Ford Wreck on the Jefferson highway near Nevada recently. Lew Mason, Slater real estate dealer with his wife was on the way to Des Moines when a bee lit on his nose, with the business end down. Mason attempted to swat the bee, when steering wheels were swerving from its course. His wife yelled to him that he was "ditching them." Neither of the occupants were hurt.

Iowa has the largest population in its penal institutions in the history of the state according to Senator A M. McColl, member of the state board of control. The board is making its semi-annual inspection of the state institutions and finds them all full and running over. "We are transferring thirty inmates of the reformatory at Anamosa to Fort Madison this week," said Senator McColl. "They will be placed in the old cell house. It is hardly fit for confining prisoners but we have no other place for them. The increase in our penal inmates is not confined to men. We never had so many women. There are 81 or 82 women in the reformatory at Rockwell City." Senator McColl ascribes the insrease in law violators to after the war conditions, booze and auto temptation. A great many of the new prisoners are young men who have been convicted of stealing automobiles.

Grim Reaper Takes Heavy Toll, Four Deaths Past Week

OBITUARY ASA GIBBS

Asa Gibbs was born in Lowrenceburg, Indiana, April 4, 1844, the son of Aaron C. and Eliza Gibbs. His father had been a soldier in the Mexican war, a captain in the company raised for the First Indiana, and served with his regiment during the war. Asa Gibbs received a common-school education. and worked at farming until he arrived at the age of eighteen years, when, as did so many of the men of that day, he enlisted in the service of his country and joined Company E, Sixty-eigth Indiana, on August 11. 1862. Shortly after his muster-in he was taken prisoner with his regiment at Munfordville Kentucky. In the Chattanooga campaign he was made a corporal and served faithfully until the battle of Chickamauga where he was severely wounded in the left thigh and fell into the hands of the enemy. He remained on the field with but slight attention paid his wounds for nine days when, with others severely wounded he was parolled and sent to Chattanooga and from there was sent north for treatment. Upon recovery, and being then exchanged on May—1864 hejoined his regiment at Chattanooga. About this time he was promoted to be a sergeant, by Captain H. Bryant of his company. In the battle at Nashville, December 15 and 16. 1864 he was again wounded, this time in the cheek. Although the wound was slight it was a close call and was always remembered by the recipient. However, it was severe enough to render him unable to follow Hood in his retreat from the city of Nashville and he did not rejoin his regiment until after its return to Chattanooga. To sum up his army experience, he was twice taken prisoner by the enemy. twice wounded and served with his command until its final muster-out at Nashville, Tennesee.

After the war closed, Sergeant Gibbs entered the quartermasters service and had charge of the stables of horsesof horses belonging to the government at Carthage, Ohio and also had charge of the watch until that station was given up. He went into the oil business in eastern Ohio and afterwards learning the carpenter and bridge building trade and became a member of the firm of Chamberlin, Gibbs & Co. extensive bridge builders and railroad contractors. He was married to Belle L. Collins, at Delhi. Ohio February 26, 1872 of which seven children were born, one child died in infancy; Arthur C. and Asa James died years later. Besides his wife he leaves to mourn his loss two sons, Chas. Edward of Big Lake Minnesota and Harry R. of this place and two daughters, Anna and Mrs. Clarice (Fred) Arnold, besides many other relatives and friends.

In the fall of 1889, with his family he moved to Hancock county, Ia., where he opened up a farm and whre he lived until 1914 when he moved to Klemme and has lived here since.

Mr. Gibbs was a member of the Masonic Order who had charge of the funeral services, conducted by Rev. A. E. Buriff of the Methodist Episcopal church of this city.

Mr. Gibbs died on Friday, October 7th at 1:00 P. M. following an illness of long standing. Funeral services were held Sunday afternoon at 2:00 P. M.

Another soldier of the Civil War has heard the call of taps.

OBITUARY ANNA FULLER

Anna Yahnke, daughter of G. C. and Minnie Yahnke, was born in Magara County, New York, December 5, 1866, and died Monday, October 10, 1921.

During he childhood days she resided with her parents in Franklyn County, Iowa, where she grew to womanhood, and where on January 8. 1884, she was married to William Fuller.

In 1889 they removed to Hancock County, Iowa, and settled on a farm east of Klemme, where they made their home for 17 years, then moving to a farm just south of Klemme. Here Mr. Fuller died, and nine years ago Mrs. Fuller moved into Klemme where she resided until her death, October 10, 1921, aged 54 years, 10 months and 9 days.

Mrs. Fuller was one of the oldest members of the Methodist Episcopal church, having been admitted to the fellowship of the Klemme church during the pastorate of Rev. C. E. Plummer. A quiet and consistant Christian character matched her profession of Christian faith.

She held membership in the Royal Neighbors, which sisterhood will miss her from their councils.

Mrs. Fuller was the mother of four children, all residing in or near Klemme; two sons, Albert W. and Elmer A., and two daughters, Mrs. R. W. Elder and Mrs. Elmer H. Katter, elven grandchildren are bereaved by her passing, and of her own family six brothers and three sisters are left to mourn her death.

For weeks, lengthening into many months, before her departure she bore the burden of constantly increasing weakness and pain. The closing days were marked by an increasing weakening of the ties of earth and a constant swelling of the tide that bore her bark heavenward, and as the end approached she went, not unwillingly, but with a desire to depart and be at peace.. "He giveth His beloved sleep."

Funeral services were conducted Wednesday from the home and the Methodist church by Rev. William P .Webb, pastor of the Garner First Methodist church. Her pastor, Rev. Buriff of this place was unable to conduct the funeral on account of sickness.

PHIL BEHRINGER DIED TUESDAY

Phil Behringer passed away at his home in Klemme Tuesday afternoon following a long illness.

Funeral services are tomorrow afternoon from the home at 1:00 P. M.

We will publish the obituary in the issue of the Times next week.

MRS. FRED RUNGE DEAD

Mrs. Fred Runge passed away at her home in the country Monday afternoon.

Funeral services were held today conducted by Rev. Depping.

As we go to press we were unable to procure further details but the obituary will be published next week in the Times.

Card of Thanks

We wish to thank all those who assisted us in our recent bereavement, for kind words of sympathy and for the beautiful floral offerings given in memory of our dear husband and father.

Mrs. Asa Gibbs and family.

THE LOVE OF COUNTRY

Breathes there a man with soul so dead
Who never to himself hath said,
This is my own, my native land!
Wheose heart hat ne're within him burned.
As home his footsteps he hath turned
From wandering on a foreign strand
If such here breathe, go mark him well;
For him no minstrel raptures swell;
High though his titles, proud his name,
Boundless his wealth as wish can claim;
Despite those titles, power and pelf,
The wretch concentered all in self
Living shall forfiet fair renown,
And, doubtly dying, shall go down
To the vile dust from whence he sprung,
Unwept, unhonored and unsung.

—Walter Scott.

While wrestling in the yard Sunday with a cousin, John Fuller, son of Albert Fuller had the misfortune to break his leg. The bone was broken in three places. He is getting along nicely at this writing. On the following day his little sister, Verna, had the misfortune to dislocate her shoulder while playing.

Omaha's Aero Congress

OMAHA—Center of the Air Industry. This is Omaha's slogan these days. Why? Because this enterprising Nebraska city of 200,000 people will stage November 3-5 the First International Aero Congress. This congress is Omaha's own idea and the city has carried it out, in spite of many apparently insuperable obstacles, to the point where success is assured. In consequence, Omaha is proudly claiming to be America's most progressive aviation center.

The purposes of the congress are praiseworthy. The congress itself is likely to be of great importance.

One purpose is to bring the flyers together for a big reunion, the first since the World War. Another is to show everything in connection with aviation, in order to interest the people of the nation in flying. A third is to form a national air body for the advancement of aviation in America. The big purpose is: "Aviation supreme for America."

The formation of a national air body appears to be well under way, through preliminary organizations in the states. At this writing twenty-five states are forming state organizations of the congress and will be represented by delegates.

That there is necessity for the formation of such a body seems hardly open to argument. Rudyard Kipling, years ago, wrote of aircraft: "We are at the opening verse of the opening page of the chapter of endless possibilities." We have read far beyond that now and the march of events forces us to keep on turning the leaves, if we would keep our place in the forefront of the procession of the nations.

In the opinion of those who seem best qualified to know, the United States has not kept abreast with other countries in the development of aviation, especially in the matter of development of airways. For example, the best we can show in the way of a transcontinental route is that following the general line of Cleveland, Chicago, Omaha, Reno and San Francisco. The experts declare it to be not more than 40 per cent complete in organization.

An essential of the success of big business is imagination. Imagine, if you can, what the part of aviation in the life of the nation will be five years from now. It is no wonder that men of large affairs want the organization of a national air body and want it now.

Omaha's slogan was inspired by the Aero Club of Omaha, an organization of 100 former pilots and observers of the World War. Nevertheless, all the city is talking aviation these days. Three months ago, of course, it was not so. Omaha was no more enthusiastic over aviation than any other city. When its citizens heard an airplane droning overhead they gazed skyward for a moment. Otherwise they were uninterested.

Then Earl W. Porter, president of the Aero Club of Omaha, conceived the idea of the congress and went to work on it. Now aviation is in the blood of the citizens. They talk of the many phases of air travel with the nonchalance of aces. In other cities the people may call anything that traverses the air an airship. But not so in Omaha; they rightly use the word aircraft. Do you hear blimp in Omaha? Well, hardly. Omaha knows that blimp is not only slang, but obsolete slang, whereas people in other cities are still applying the word indiscriminately to all balloons, rigid and nonrigid airships and lighter-than-air craft. You never catch an Omahan these days saying hydroplane when he means seaplane; he knows that the former never leaves the water. And you find him correctly using airplane, seaplane and airship instead of aeroplane, hydro-aeroplane and dirigible. You may even overhear a conversation about the captive helicopter. In short, everyone in Omaha appears to be enthusiastic about aviation in general and the coming congress in particular.

President Porter went to his fellow clubmen. They indorsed his idea and his plans and pledged their support. They also fixed on him as the logical head of the movement and he was duly made president of the congress. He accepted the position, turned over his business affairs to his partner and went to work. The first step was to get twenty-five Omaha business men to back the project for $1,000 each. This was easily done.

It was also easy to get the indorsement of all Omaha business and social organizations. A speakers' bureau was formed to educate the citizens. Arrangements to raise funds for financing the congress were made. Attention was then turned to the preparation of a program worthy of the occasion.

Incidentally it became necessary to provide a landing field large enough to stage the program. A little thing like this, however, did not deter the air men, who located a farm of 136 acres showing possibilities as a field, although it was uneven and contained 150 large trees.

A "field day" was duly announced, and the air men and their friends rolled up their sleeves and with the assistance of two Holt caterpillar tractors donated for the occasion, pulled the trees and leveled the land.

An open drainage ditch traversed the center of the field, which lies on the edge of one of the residence districts, only fifteen minutes' ride from the heart of Omaha. The city council was induced to vote unanimously to build a covered sewer through the field at a cost of $21,000. So the problem of a flying field was satisfactorily solved.

In the meantime, an office force was busy mailing thousands of invitations and pamphlets to the air men and celebrities, such as President Harding, Marshal Foch, Orville Wright, Glenn Curtiss and Judge K. M. Landis.

The graduates of Fort Omaha balloon school, the center of America's wartime ballooning, were invited for their first reunion. Squadrons and escadrilles of flyers were asked to hold their first reunions in Omaha. The fifty-two American aces were invited, as well as everyone else interested in aviation.

The aid of Kansas City was enlisted in sending the American Legion convention delegates on to Omaha. The indorsements of national headquarters of the American Legion, of the Aero Club of America, of the World's Board of Aeronautical Commissioners and of the Aircraft Manufacturers' Association were obtained. The co-operation of the Army and Navy air headquarters was asked for and received.

The railroads helped out by offering a fare and a half rate for the round trip from all parts of the country to Omaha. Gutzon Borglum, world famed sculptor, offered a commemorative medal design symbolical of the work of the American air man during the war, as his "bit." James Hanley, song writer of New York, wrote a special song praising the work of the flyers, to be sung for the first time at the congress.

In preparing its program, Omaha had a piece of rare good luck right at the outset. As everyone knows, the Pulitzer Trophy Race became the world's most famous air event with its first running in November of 1920 at Mitchel Field, New York, under the auspices of the Aero Club of America. There were twenty-five Army, eight Navy, seven Marine Corps and one civilian entrants in the contest. The winner was Lieut. C. C. Mosely of the Army air service, who flew 132 miles in a Verville-Packard machine at an average speed of 178 miles an hour. The Army won seven of the first ten places in the contest and the Navy two. There were 30,000 spectators, including celebrities from all walks of life.

Well, the Pulitzer Trophy Race for 1921 had been scheduled for Detroit, but difficulties had arisen and the Aero Club of America had cancelled the race for the year. Omaha stepped in and offered the necessary funds. In consequence, the first announcement on the program is this:

"The First International Aero Congress announces the second annual aerial contest for the Pulitzer Trophy, in connection with the first contest for the Aero Club of Omaha Trophy and also other aerial events. Sanctioned by the Aero Club of America under the rules of the Federation Aeronautique Internationale and those of the First International Aero Congress. To be conducted at Omaha Field, Omaha, Nebraska, U. S. A., November 3, 4 and 5, 1921."

The Pulitzer Trophy Race is a free-for-all contest for high-speed airplanes. The distance is approximately 150 miles, five times around a closed course of 30 miles, from Omaha Field, thence northwest to a captive balloon on railroad track north of Calhoun, Nebraska, thence east to a captive balloon on the southern outskirts of Loveland, Iowa, thence return to Omaha Field. All pilots must hold an aviator's license, issued by the Federation Aeronautique Internationale and duly entered upon the competitor's register of the Aero Club of America. All airplanes may compete with pilot only. The Pulitzer Trophy, given by Ralph Pulitzer, editor of the New York World, is a four-foot silver trophy, to be raced for annually. Any flyer winning the trophy two years in succession may keep it. In addition, these prizes are offered: First, $3,000; second, $2,000; third, $1,000.

Event No. 2, set for 3 p. m. Thursday, is an acrobatic contest, with cash prizes as follows: First, $250; second, $150; third, $100. It is a free-for-all contest for all types of airplanes. The contest will be decided on points and the points will be given as follows: Immelmman turns, 15; barrel rolls, 15; falling leaves, 20; loops, 20; vertical reversements, 15; tail spin, 15.

Event No. 3, set for Friday at 10 a. m., is a commercial derby for all types of commercial planes. The distance is approximately 250 miles. Starting at Omaha Field, contestants will fly to Des Moines, Iowa, land on Curtiss Field and return to Omaha Field. The prizes are: First, $2,000; second, $1,000; third, $500. The contest will be decided on points.

Event No. 4, set for Friday at 10:45 a. m., is a free-for-all race, with prizes aggregating $475, open to JN4's, OX5-Standards, Orioles with Curtiss OX5 motor, Canucks and other planes with a speed of from 60 to 75 miles an hour. The distance is approximately 90 miles.

Event No. 5, set for Friday at 1:30 p. m., is a free-for-all race, with prizes aggregating $475, open to planes with a speed of from 75 to 90 miles an hour. The distance is approximately 90 miles.

Event No. 6, set for Friday at 3:30 p. m., is a parachute jumping contest, with prizes aggregating $350. The jump is from 1,000 feet or more and the winner is the contestant who lands closest to a given mark on the field.

Event No. 7, set for Saturday at noon, is a race for a trophy, with cash prizes aggregating $2,625. It is a closed handicap, open to all machines. The distance is approximately 150 miles.

Event No. 8, set for Saturday at 2:30 p. m., is a bombing contest, open to Army and Navy planes only. The first prize is a gold cup and the second a silver cup.

Inasmuch as the congress is to arouse interest in flying and stimulate the development of commercial flying, the program thus contains events for diversified types of aircraft. The intention is to attract a varied field of entries to compete for prizes to be awarded for desirable airplane performance as well as for high speed.

A feature of the congress will be a half-mile row of various types of airplanes lined up in front of the grandstand, with exhibits of accessories. Actual airplane construction will be shown.

For the entertainment of the crowds the great aerial spectacle, "The Bombing of Courcelay," will be shown, with 100 costumed people in the cast and a model of the French village set up on the field. Parades, banquets, boxing contests and a variety of other functions round out a most attractive program for three days and three nights.

Genuine Aspirin

BAYER

Never say "Aspirin" without saying "Bayer."

WARNING! Unless you see name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 21 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Accept only "Bayer" package which contains proper directions.

Handy tin boxes of 12 tablets—Bottles of 24 and 100—All druggists.
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

A Day of Rest.

"Funny thing about Jackson; he never motors his wife out to the country any more on Sundays."

"There's a reason. He claims it's bad enough to have to lug home stuff from the city on week days without having the wife pick up produce bargains along the country roads on Sundays."—New York Sun.

Cuticura Comforts Baby's Skin

When red, rough and itching with hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

Times for Gratitude.

There is much greatness of mind in the owning of a good turn as in the doing of it; and we must no more force a requital out of season than be wanting in it.—Seneca.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists or send 30c to The J. W. Cole Co., Rockford, Ill.—Advertisement.

It Worked "Anyhow!"

Bobby will be six next month and is very proud of the fact, but he isn't much larger than a child of four.

The other day mother and daddy went to buy tickets to Detroit and found that youngsters more than five years of age had to have $5 fare. So they went home and instructed Bobby to say: "I'll be five years old next month."

Bobby is wise and obedient. A few moments later mother heard him shouting in his high, sweet treble to his pal:

"Billy, do you know what you must say on the train when you go to Detroit? You must say when the man asks you: 'No, I'm not even going to be five until next month. I won't be six at all.'"—Indianapolis News.

A Traveled Joke.

"Who is the important looking person?"

"He's the author of an original joke."

"Just one?"

"One made him famous. It formed the basis of a vaudeville sketch, a musical comedy and a motion-picture scenario. Last month it figured as a humorous story of 3,000 words in a popular magazine."—Birmingham Age-Herald.

Next!

Rub—Are you engaged to Mary?

Dub—No, but I'm on her waiting list.—Kansas City Star.

A Suggestion.

Mrs. Scrapp—I've talked and talked to you until I am worn to a frazzle.

Scrapp—Well, why not shut up for repairs?—Boston Transcript.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before she can put a new, rich color into skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—advertisement.

GREW WHISKERS TO GET JOB

And Secretary of State Hughes Has Worn the Required Facial Adornments Ever Since.

Charles E. Hughes, secretary of state, gave little indication to his teachers and classmates at Brown university that he was to become a leader in the nation, though it is true that he had his bachelor degree before he was twenty-one. He planned to make teaching his life work, and he did devote some years to that occupation. His first application for a job was as a teacher of Greek in a small Eastern college. The head of the department received him kindly, but evidently regarded his youthful appearance as making him an impossibility in the line.

"Why," said he, "you have no more hair on your face than an egg."

"If a beard is necessary I can raise one," said Hughes, who knew his own ability in that line, and soon was back to qualify for the job and got it. By the way, he has the same whiskers yet. He has never worn a clean shaved face since.—Columbus Dispatch.

Common Malady.

Dr. George E. Vincent, head of the Rockefeller foundation's general education board, was discussing the banking scandal.

"The banker has now gone to South America," he said, "Gone, it is announced, to recuperate from an atack of influenza."

Doctor Vincent laughed grimly.

"I've heard of that kind of influenza before," he said. "It comes from cold feet, due to exposure."

A shady past seldom has a silver lined future.

The Man Who Said:
"The proof of the pudding is in the eating"—
was only half through

He started a good pudding-proof, but he didn't finish it.

There's a lot of trouble in the world from puddings that taste good but don't do good.

They "eat" well, but that ends the recommendation.

Sanitariums are full of pudding-eaters who stopped the test at taste and forgot to inquire whether their food gave the body what it needed—until the body rebelled.

Grape-Nuts is a food that tastes good and does good. The proof of Grape-Nuts begins in the eating and goes on through the splendid service which Grape-Nuts renders as a real food. Grape-Nuts is the perfected goodness of wheat and malted barley—delicious to taste, easy to digest, and exceptionally rich in nourishment for body and brain.

"There's a Reason" *for* Grape-Nuts

A big city judge declares that he will not have any members of the Ku Klux Klan serving on his juries. But that, however, may be only a case of judicial "safety first."

When one hears a fellow boasting that he never changes his moind it is easy to agree with him. It is difficult to change something that that does not exist.

An airoplane passes through more than 200 tests before it is considered perfect.

MUST CONSULT THE FARMER

Furnishes Forty Percent of Buying Power Which is Stopped at Present

While various other fields of relief of unimployment and business depression have so far the chief consideration in President Harding's unemployment conference, President R. A. Pearson, of Iowa Statae College, one of its members, believes that there can be no complete remedy for unsatisfactory conditions without dealing with the farmers side of the problem as well.

"It is true that much good will result in getting the construction industry under way again thruout the country as proposed," says President Pearson who is in Ames for a short business trip during the recess of the conference. "But it is also vital that that agricultural situation be adjusted if there is to be any permanant improvement.

"Not that our farmers will be standing in breadliness unless they get relief, but the farmers furnish 40 per cent of the total buying power of the country in normal times and that great buying power is now paralized, because farm products cannot be sold because of the low prices compared with the things the farmers buy. The farmer feels that he cannot buy and that he isn't buying. He is nt even suyylying the more necessary needs of his farm and home . Some industrial plants are closed for no other reason than that the buying power of the farmers is paralized and their closing is of course responsible for most of the general business and industrial depression and unimployment."

A Shelby county farmer made $64 on a bunch of lambs which he had been feeding for five weeks. A "scalper" in the Omaha yards made $342 off the same bunch in a day. Shelby county sheep feeders are indignant. The farmer shipped 287 lambs to South Omaha recently, after his commission merchant had phoned to him that it was a good time to sell. Reaching the market he was told by his commission merchant that none of his lambs were fat enough for packer use hence they would have to be sold to a scalper at $6.65. The feeder saw the scalper sort out 100 of the bunch for the packer at $10; the remaining 187 were sold at $8.

Many a self made man is tailor made as well.

Some of the worst citizens are very strict in their observance of the Sabbath day. They are in jail.

The man who is true to himself is never traitor to others.

Bangkok, the capital of Siam. is a floating city, containing 70,000 houses, each of which is build on a raft of bamboo.

Because of the high cost of fuel, Denmark is building windmills to produce electric power.

Steam is the most flexible an efficient motive power known in our transportation.

FIND NEW TIPBURN CONTROL

Experiments Show That Potato Trouble Can be Checked By Using Bordeaux Mixture

Tipburn, a disease of the foliage of potatoes, can be controlled by using bordeaux mixture and the yeild of the potatoes increased about four times as a result of checking the disease, say the entomology experts at Iowa Agricultural Experiment station following the experiments conducted during the past summer.

While workink with a twenty acre field at St. Ansgar, Mitchell county in co-operation with F. E. Tracy. county agent, in order to see what could happen in the control of leafhoppers they discovered that tipburn considered the worst foliage disease, could be checked with bordeaux mixture.

On the fields that were sprayed with bordeaux mixture the yields were 120 bushels per acre, while the unsprayed fields were found to yield only 35 bushells to the acre. The later figure is about the average for the state this season due to the dry weather.

These potatoes were sprayed three times for the hoppers and altho there were ten continous weeks of dry weather the potatoes made a good showing. Several varieties of potatoes were used but the above results were gotten with green mountain potatoes.

This work, which part of a series of experiments, to strengten the proof of former work done by the Iowa entomologists to demonstrate the value of spraying the control leaf hoppers and tipburn was considered very sucessful due to the hot season. Tipburn flourishes in hot weather and it was formerly believed that the disease was caused by fungus growths that aggravated by hot weather. Recent results by the entomology section has shown that the disease is caused by the stinging of the leaves which deprives the plant of the extra foliage and reduces the growing power.

In spraying these vines a commercial mixture of dry bordeaux mixture was used.

MINOR MUSINGS

Many an old-fogy parent takes secret consolation in the knowledge that his uppish daughter will also be an old-fogy parent some day.

They used to flatter a man by praising his children; now they do it by praising his car.

A very young widow always seems to be struggling between what she considers her duty, to appear sad and her inclination to appear glad.

St. Paul said he had learned that whatever his lot "therewith to be content." Money-mad Americans have recversed this to read, "there with to be discontent."

Then there is the man who seems destined to go through life hitting his thumb on the back while trying to hit the nail on the head.

The only time some men give the appearance of being clean is in the first ten minutes after leaving a barber's chair.

BIG PUBLIC SALE

The undersigned will sell at PUBLIC AUCTION, without reserve, the following described property, located on the Fredrik Ax farm, located 1 1-2 miles north of Klemme, Iowa, on—

Tuesday, October 18

SALE STARTS PROMPTLY AT 11:00 O'CLOCK, A. M. **BIG FREE LUNCH AT NOON.**

142 HEAD LIVE STOCK 142

8 HEAD OF HORSES 8

Gray Gelding 6 years old, weight 1600 lbs.
Bay Gelding, 8 years old, weight 1700 lbs.
Black Colt, 3 years old.
Black Mare, 5 years old.
Brown Mare, 5 years old.
Black Saddle Mare.
Black Mare.
Black Mare.

95 HEAD OF CATTLE 95

33 Milch Cows (7 head now milking.)
20 Heifers.
31 Steers.
6 Calves.
1 Holstein Bull, 18 months old.
1 Durham Bull, 3 years old.

Here is your chance to secure some very choice milch cows, all are of good quality and grade—some now springing. Some of the heifers are past 2 years old—will make good milch cows. The steers will average from 400 to 650 lbs. —just the kind you want for the fall rough feed—and all of good quality.
IF YOU WANT CATTLE DO NOT FAIL TO ATTEND THIS SALE.

You and each of you are hereby notified that on Sept. 2 1921 there was filed in the office of the County Auditor of Hancock County, Iowa, a petition addressed to the Board of Supervisors of said County, asking that certain lands above described be incorporated in a drainage district and that a system of drains be constructed for the relief of said district.

You are further notified that on Sept. 6, 1920 E L Merten was ap pointed engineer to make a survey, plat and profile and field notes of said proposed district, and that on April 13, 1921 said engineer filed his report recommending the establishment of said district and the construction of a system of drains for the relief of said district and that said report is now on file in the office of the County Auditor of said county and may be amended at any time before final action is taken thereon by the Board of Supervisors, and that Nov. 14, 1921 at 1 o'clock P. M. has been fixed as the time for hearing thereon. All objections and claims for damages must be filed in the office of the County Auditor not less than five days before said day of hearing.

Witness my hand and official seal at Garner, Iowa, this 28th day of Sept. 1921.

All tile must pass the specifications for standard drain tile of the American Society for Testing Materials, tile in sizes 8" and above to be not less than 2' long.

Cement tile will be allowed only in sizes 24" and above.

The specifications state that where runing sand is encountered, sewer pipe with joints caulked in jute shall be used and the bids must state the price in case such construction is used.

Work to be comenced thirty days from date of letting of Contract. Contract will be completed by December 1, 1922.

All the tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

Hhenever the tile improved is is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to backfill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

All ditches and drains to be constructed in all respects in the accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa. up to one o'clock noon of the 1st day of November, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possibe underdepth beyond the average depth specified.

Bids will be received on any one or all sections, for the tile alone, for construction work alone, or for tile and construction.

The Board will at their discretion let the work as a whole or insections to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjurn time of awarding contract is reserved

Eech bidder must be accompanieed by a cash deposit or certified check in a sum equal to ten percent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMANCE TO THE ABOVE REQUIREMENT WILL BE REJECTED.

The party to whom any contract is being awarded will be required to attend at the office of the Auditor Of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all provisions, terms, and conditions thereof and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five percent of the amount of the bid and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required. The deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 7, together with all right under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty-four hours after demand, and the deposit of the successful bidders will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 8th day of October, 1921.

(SEAL) Chris Jacobs,
County Auditor

ON'T OVERFEED BREEDING HOG

Too Much Fat Not Good For Young Animals Says Experts

Iowa farmers who have young hogs at they intend to use for breeding ock want to be careful not to give em too much feed so that they will come overfat and sluggish. According to John M. Evvard, hog spec list at the Iowa Agricultural Experiment station. the best growth ll not result where the pigs are fed heavily while growing.

Exercise is of immense importance developing size and bone. Pigs ould have plenty of room to run and they should not be confined a small pen.

Self feeders while they are fine r market hogs, are damaging to eeding stock. Where pigs have ac ss to a self feeder they will eat eir fill and then snooze until they e hungry and eat again, refusing exercise and holding back their owth. Selff feeders are all right r the first four months of the pigs fe but breeding animals after this e should be hand feed.

They should have a good run and make them hustle for their feed" a good plan. Where there is any sture these pigs should be allowed run in it and plenty of good fresh ter should be furnished for best ults. Good warm shelter is also ential for the pig and as soon as d weather comes they should be en a chance to get out doors.

Breeding hogs that are overweight d to go down on the pasterns, beme sluggish and lack good bone delopment. Unless they are of a od constitution they will not raise od litters and the farmer will be e loser both in feed and in livestock.

Mr. and Mrs. Einer F. Salling, nd Adolph drove up to Ringsted, y. Mrs T. H. Christensen with them for a week's visit.

SAVE THE GREEN TOMATOES

Ones Late in Fall

Ripe tomatoes can be had late in the fall if the green ones are properly cared for according to the truck crops department at the Iowa State College.

Remove the large green tomatoes from the vines and wrap them carefully in paper. Then store them in a cool place and they will ripen very slowly. By this method ripe tomatoes can be had at Thanksgiving time. If the tomatoes are wanted for a short time only pull up the whole vine after it has been frosted and strip off the small fruit and the leaves. Hang this vine up by the roots in a cool place and the green tomatoes will then ripen slowly. They will keep for several weeks.

Tomatoes that are to be dried must first be ripe. They must be soft or they will spoil. Remove the skins and by scalding the whole tomatoe and then slice and spread on trays to dry. Drying can be done either in a stove or a special driar, but heat should not be over 120 degrees F. Tomatoes have considerable moisture in them and should be allowed plenty of circulation of air will strike them. After drying store in a similar manner to dried corn or other dried products.

MINOR MUSINGS

There are more funny looking people to the block in a big city than in a small town.

Joy - riding is so called because it often ends in a gloom ride in a patrol wagon.

Maybe your efforts are not counting for much, but they are if you are counting for much.

Anyway, a good many recent murders has disproved the old belief that a woman can't shoot strait.

FARM BUREAU SPEAKER

Mr. L. S. Fisher of the Iowa Farm Bureau Federation will speak in Hancock County during the week of October 17th. Mr. Fisher is a farmer and a man who is working for the interests of the Farm Bureau since it started. He is a god speaker, and will bring a lot of good information as to the work of the Federation.

Every farmer as well as every one from town should attend these meetings. He will speak in every town in the country, holding meetings at twelve different places. While this is a busy time and probably not very convenient to attend, especially the afternoon meetings, it will be well worth while to take the time off. It is impossible to secure Mr. Fisher at any time.

The following program will be followed.

Monday October 17th,
Woden, 1:30 P. M.; Crystal Lake. 8:00 P. M.
Tuesday, October 18th,
Corwith 1:30 P. M.;- Klemme. 8:00 P. M.
Wednesday, October 19th,
Britt, 1:30 P. M. ; Kanawha, 8:00 P. M.
Thursday, October 20th,
Goodell, 1:30 P. M. ; Madison Center. 8:00 P. M.
Friday, October, 21st,
Afternoon place not set; Ellington Center, 8:00 P. M.
Saturday. October 22nd,
Afternoon place not set; Garner. 8:00 P. M.

GIVE BEES WINTER CARE

Sucessful Storing One of the Most Important Problems.

One of tre most important problems in Iowa Beekeeping is that the wintering occording to F. B Paddock state apiarist. Because of poor storage the annual loss to the state of Iowa amounts to $400,000.

Specially constructed cellars are the ideal place to store bees, but they will survive nicely in outdoor hives that have special packing. When storing bees in a cellar be sure that they have plenty of ventilation so that they do not smother.

One of the greatest sorces of loss is lack of proper stores. It has been found that every pound of bees require seven pounds of honey to carry them through the opening of the spring season. On the average the ordinary colony needs 32 pounds to carry them through to spring feeding and inorder to get the colony thru to spring season it is necessary to supply between 40 to 50 pounds.

Iowa Beekeepers suffer an average loss of 18 per cent annually in wintering bees and a great part of this is due to exposure.

Due to the small honey crop in some places this season some beemen will be tempted to take too much honey from the hives. Unless the owner expects to supply other feed later in the season care must be taken in taking out too much of the crop.

FEED POULTRY GREEN FOOD

Market Poultry Can be Fattened Rapidly When Fed Right

Caprons and other poultry to be marketed can be gotten in better shape for sale if fed plenty of green food along with a mash containing a good portion of tankage, and sold at a profit according to Mr. H. A. Bittenbender of the poultry department at Iowa State College.

A fine ration for feeding is made of equal parts of cracked corn, cracked oats and cracked wheat with the hulls sifted out. To this add a fourth part of 60 per-cent tankage. Feed in a self feeder so that the bird will consume as much food as possible.

Furnish green food in large quanti ties. Sprouted oats make excellent food. Be carefull not to allow the oats to get too old as the more palatable food is gotten from the younger shoots. Do not feed mouldy oats as these will harm the birds. If sprouting the oats is too great a task, chopped up potato peelings or mangel beets are good.

FIRE SALE FOR BULLS

Ingenious Farmer Disposes of Stock Without Shelter

Firesales and somo kinds of business are synonomous, but to associate the term with livestock was the idea of a Minesota farmer and heres what he did.

Because his large barn burned in the fall and took with it all his hay and ensilage W. F. Schilling of Northfield Minn., was left with twelve young purebred dairy bulls on his hands. To keep them would mean the expense of buying food and besides he needed all his room to house cows.

He advertised his fire sale in the Northfield News and is disposing of the bulls.

REPAIR BARNS FOR WIN

One of Best Ways to Keep C... Good Condition.

One of the best ways to keep farm cattle in a good condition ing the winter is to give them houses and sheds for shelter. farmers neglect to get the w... fixed up with a new glass or l... a few boards or forget a new ... for the door. THE CHEERFUL CHERUB

LYRICS OF LIFE

By DOUGLAS MALLOCH

WHY NOT TELL HER SO?

OF COURSE you love her just the same
As when at first you wed.
Perhaps with not so hot a flame,
But still the coals are red.
The new-made blaze is bright with heat
And ruddy with desire;
But time shall give you something sweet—
Peace, and the quiet fire.

Of course you love her as of old,
Your love she ought to know.
New loves burn hot, new loves turn cold,
With all the winds that blow.
But time shall bring the steady blaze,
The flame that never died;
Yea, time shall bring contented days,
The quiet ingleside.

Of course you love her as of yore—
The years that you have shared
Have made you love her even more
Than ever you have cared.
Of course you love her just the same,
Your love she ought to know,
For time has brought the steady flame—
But why not tell her so?

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead
How to Make Good

By JESSIE ROBERTS

DO YOU WANT SUCCESS?

DO YOU want to make a success of your business life, or do you put that second to having a good time? Don't complain if you can't have both. The girl who runs around from party to party is not going to get to her work in the best state for doing it well. Her mind is not clear, her body is not alert. She is tired.

Are you willing to do the uninteresting part of your job well, or do you slur what you don't like in it? Every job has its grind side. But to succeed you must make that grind worth while by doing it well. It is part of the price you pay for success.

You must keep in good physical condition if you want success. You need proper rest, enough sleep and healthful food. You need exercise in the open air. Keeping fit is part of the price you must pay for success.

A number of girls regard an office as a sort of matrimonial bureau. Their first idea is to be fascinating to the male element. But if that is what you are after, don't say you want success in your business, and don't be surprised if you see other girls who do want success get advancement while you stay put.

Success is a big thing. The successful woman is not afraid of losing her job. She knows that her work is so good that an employer will be lucky to get her, or that, if she is in business for herself, she is sure of results. But success is not an accident.

DAIRY FACTS

TESTING INCREASES INCOME

California Association Is One of Oldest to Continue in Successful Operation.

(Prepared by the United States Department of Agriculture.)

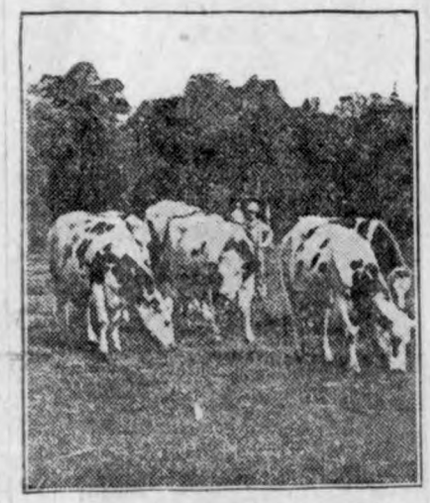
The Ferndale Cow-Testing association in Humboldt county, California, is the largest cow-testing association in the United States. In the organization 106 members, owning from 2 to 150 cows, finished the work last year, and the association tested 4,546 cows, according to a report compiled by the western office of the dairy division, United States Department of Agriculture.

Not only is this the largest cow-testing association, but it is one of the oldest to continue in successful operation. It was started 12 years ago, and now has a successful breeder as its secretary and manager.

The history of this association gives ample evidence of the value of cow-testing associations in developing the dairy industry. The report shows that 4,014 cows finished the year's work with an average lactation period of nine and one-half months and with an average butterfat production of 334.03 pounds per cow. There are but few associations, dairy specialists of the department say, that equal this average production, and none that can approach it in number of cows and height of production.

Seventeen herds in the association averaged from 400 to 495.76 pounds of butterfat per cow; 19 averaged from 350 to 400 pounds; 38 averaged from 300 to 350 pounds; 23 averaged from 250 to 300 pounds, and 6 averaged from 213 to 250 pounds. It is interesting to note that the six low herds had been on test for the first time and the owners had not had a chance to cull out and breed up their stock.

The high cow of the association produced 728.95 pounds of fat; 17 cows in the association produced over 600 pounds of fat: 98 over 500 pounds; 628



Cow-Testing Associations Are of Great Value in Developing Dairy Industry.

over 400 pounds, and 1,541 over 300 pounds. The majority of the cows in the association are grade, and their large production is directly traceable to the high-class purebred sires that have been used by the members of the association and to the raising of heifers from the good cows found by the testing association work.

In 1909, 581 cows in this association finished the year's work with an average production of 251 pounds of fat. Last year, the report shows, the average of 4,014 cows was 334 pounds, a difference of three pounds of fat per cow. Based on the number of cows finishing last year's work, this difference meant a total of 333,162 pounds of fat, which, at the price of 70 cents per pound, the average paid Humboldt county dairymen in 1920, amounts to $233,213.

SALT OF GREAT IMPORTANCE

Required by All Animals and Cow Should Be Given an Ounce or Two Every Day.

Salt is required by all animals. The dairy cow requires an ounce or more a day. She should be given all she needs, but should not be forced to take more than she wants. It is best, therefore, to give only a small quantity on the feed, and to place rock salt in boxes in the yard where she can lick it at will.

ONE ADVANTAGE OF DAIRYING

After Farmer Has Fed All His Crops and Sold His Produce He Still Has Machinery.

One of the great advantages of dairying over steer feeding is that after a farmer has fed all his crops and sold his produce he still has the machinery left for producing more of the same kind, while when the steer is sold a new animal or machine must be purchased.

COWS FRESHENING IN FALL

Largest Milk Production Will Come When Prices Are Highest and Labor Cheapest.

The cows that freshen in the fall will produce more milk during the year than those that freshen in the spring, and the largest milk production will come when the prices for milk and butterfat are the highest and labor the cheapest.

Buy It Either Way — Tablets or Liquid

PE-RU-NA

For Coughs, Colds and Catarrh

Mr. E. W. Marshall, Brampton, Michigan, suffering from Systemic Catarrh involving Head, Nose, Throat and Stomach, claims a complete cure. His letter is convincing:

"For the past two years I have been troubled with systemic catarrh. I used several boxes of Pe-ru-na tablets and they have affected a complete cure. I do not hesitate to recommend Pe-ru-na for all catarrhal conditions."

Mr. Marshall is just one of many thousands who have been benefited by Dr. Hartman's famous medicine in the past fifty years.

It is by stimulating the digestion, enriching the blood and toning up the nerves that Pe-ru-na is able to exert such a soothing, healing influence upon the mucous membranes which line the body. It is a wonderfully effective remedy to restore strength after a protracted sickness, the grip or Spanish Influenza.

Keep In the House — Sold Everywhere

Scenery Has a Cash Value.

"American motorists are becoming more nomadic than gypsies," Secretary of the Interior Albert B. Fall declared. He was discussing the future of the national parks.

The parks are the best friends that the motorists have.

"The nation is rapidly learning that scenery is one of its most valuable resources. Italy, France and Switzerland capitalized their scenery before the war and the tourist income was a big business factor for them."

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Advertisement.

CARRIED SECRET TO GRAVE

Canadian Prospector Refused to Divulge Location Where Gold Cropped Out.

A man who kept his secret to the end was the Canadian hunter Gilbertson. Sixty years ago, when he was making a canoe trip up the Wapshe river, the New York Evening Post states, he struck camp for the night near what later discoveries indicate must have been a large body of gold-bearing ore. Without knowing what this ornamental stone was, he took home a big piece to use for a door weight. A while after this a geologist who was visiting Gilbertson identified the ore, and a rush to stake claims along the Wapshe ensued. But the unwitting prospector would never tell where he made his great find. In later years he became insane and died, still refusing to reveal the location. This season a systematic search of that country is being made in hope of rediscovering "the Gilbertson lode."

A Hard Life.

"I guess you think this is an easy way to get a living," said the indignant pedestrian.

"No, I don't," said the footpad, crossly. "I've been standing around here for three hours in the rain waiting for a boob to come along. And what sort of luck do I have? You've got $1.50 in your pocket and a tin watch."—Birmingham Age-Herald.

The Essentials.

North—What are the three necessities of human life?

West—Coin, cash and money.

Cattle-Raising Countries.

The United States ranks first as a cattle-raising country, with 56,592,000 head; Australia, fourth, with 11,819,000 head. Texas is the leading cattle-raising state in the United States. Its production is about the same as that of Australia, possibly a little greater.

MOTHER! CLEAN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, give a teaspoonful to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste out of the bowels, and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

SUNSHADES FOR LUCKY DOGS

Innovation That Was Brought About by the Protracted Spell of Unusually Hot Weather.

One of the quaintest innovations of the recent heat wave in London was the introduction of sunshades for dogs. These consisted of light crepe-de-chine protections suspended over the animals' necks by light wire strands.

The "lucky" animals whose masters or mistresses bought the sunshades did not seem so pleased with them as perhaps the donors had hoped, remarked London Answers.

One dog found the heat so oppressive that he sought the shelter of a railway tunnel on the Highbury tube. Here he was, however, so frightened by the continual passing of trains that he shrank into a dark corner and remained there for two days, until his master, on the information of a railway man, fetched him.

Although sunshades for dogs made their first appearance, there was a strange absence of the straw hats that horses used to wear before the war. Have horses been so hardened by the great campaign that they do not need the consideration that dogs get?

And It Is.

"Say, buddy, do you remember when we were over there, they used to tell us that when we get back nothing would be too good for us?"

"Sure, what about it?"

"Well, they told the truth."—The American Legion Weekly.

A politician without patronage is like a cat without claws.

Horses reach an average age of twenty years.

SCHOOL DAYS

man with the toe

THE ROMANCE OF WORDS

"GUILLOTINE."

ACCORDING to history as it is popularly accepted, the instrument by which criminals are automatically beheaded was invented by Joseph Ignace Guillotine, who was also the first victim of the machine. Outside of the fact that Doctor Guillotine neither invented the apparatus nor perished by it, the general impression of the matter is fairly correct.

The original model for the guillotine was constructed by a German piano-maker named Schmitt, under the direction of Doctor Louis, a French surgeon, who in turn obtained his idea from the manaja, a somewhat similar instrument which had been used in the Latin countries for centuries. At first, the invention was known as the "Louison," but, owing to the fact that Doctor Guillotine waged ceaseless warfare upon the barbarities of the rack and the wheel and continually urged the adoption of this more humane method of inflicting death penalty, his name was indelibly associated with it. On March 25, 1792, the national assembly passed the resolution recommending the use of the machine in all French prisons and it was publicly used a month later in the beheading of a prisoner named Pelissier.

Far from perishing by the invention, which, despite his protests, was called by his name, Doctor Guillotine died in his bed in 1814—having achieved a vicarious fame which he did not desire and to which he was not entitled.

HALLOWEEN GOOD THINGS.

THE mother with a flock of youngsters will be very popular with them if they are served with the following:

Butterscotch.

Take three cupfuls of brown sugar, three-fourths of a cupful of water, two tablespoonfuls of butter, one-eighth of a teaspoonful of soda, a teaspoonful of flavoring and a few grains of salt. Boil all together except the flavoring until a thread is formed when dropped from a spoon. Pour off into buttered pans; let stand until cool enough to mark off into squares.

Molasses Candy.

Boil together until brittle in water, two cupfuls of molasses, two tablespoonfuls of butter, two cupfuls of brown sugar, one cupful of water and one-third of a cupful of vinegar. Pour into greased pans and pull when cool enough. Cut with a pair of shears into lengths, wrap in a waxed paper.

Chocolate Caramel.

Put two tablespoonfuls of butter into a saucepan, add one-half cupful each of milk and sugar and one cupful of molasses. When boiling hot add four squares of chocolate and cook until brittle, when a bit is dropped in cold water. Remove from the heat, beat three minutes, add one cupful of walnut meats and a teaspoonful of vanilla. Turn into buttered pan and mark in squares when cool enough. Wrap each in paraffin paper.

Nellie Maxwell

Copyright, 1921, Western Newspaper Union.

Do You Look Forward To a Good Night's Rest?

Do you regularly anticipate a refreshing sleep? Or do you dread going to bed, only to stare, sleepless, at the walls? The difference between sleeping and staring is simply a matter of nerves.

When your nervous system is in a sound condition, you are certain to sleep well. But when your nerves are worn out and beyond your control, your rest is broken and your awakening leaves you languid and irritable.

Doctors know that much of the nerve disorders result from tea and coffee drinking. The drugs in these drinks over-stimulate, often causing the serious ills which result from disturbing the regular bodily functions. It is for your health's sake that many doctors now say you should quit tea and coffee. Drink Postum, the delicious meal-time beverage instead! In flavor it is much like coffee.

Postum is fundamentally a nerve strengthener because it lets you get sound, restful sleep. Postum is a skilfully-made cereal beverage, and the secret of its popularity is its protection to health and its delicious flavor.

Ask your grocer for Postum. Drink this hot, refreshing beverage in place of tea or coffee for 10 days and see what a wonderful difference it will make in the way you feel.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum *for* Health

ws Of The Week Reported By The Klemme Schools

EMME SCHOOL NEWS

(By A. E. Lauritzen)

in Bock was absent Tuesday ednesday.

Freshman and Sophomore are studying Scotts, "Lady of ke". This combination makes e english class and the study more interesting.

Senior Class is studying peares, "As You Like It" for English lessons.

endeavored to get a game of ball with the Thornton High ti be played tomorrow, but ot succeed in the attempts. nton cannot play tomorrow and ps they will play a game witth our diamond next Wednesday. play Thornton we want to see d crowd out to the diamond. me High defeated Ventura and nton defeated Ventura so this would prove to be an interes- one.

e boys in the school have been the basketball around quite le lately. There is material in High School for a good basket team if we could find a place ay inside. Lets get tthis thing and have a real team this er.

would be very nice to see some all of the girls out playing and ticing basketball. Remember old saying, "Practice makes per- "

xaminations were held last week. one has been seen with drooping is so we presume that nearly yone passed.

he Civics class is now taking a led study of the Constitution.

rof. Wilson gave two very in- sting readings Monday morning.

Harvey Barz was absent Tuesday.

Intermediate Room Notes

(By Andrew Wellemeyer)

Miss Emma Stewart, of Leland, a and Mrs George Kessler visited intermediate room last week.

Donald Turgasen was absent Mon- P .M. on account of sickness.

SLATS DIARY

Friday—the teacher ast Jane what te feminine of lord in the lan- ge class & she replied and said was Goddess whitch only shows t bewty & branes dussent all- ys travel togather. But she was- any worse than Ted was when ast him to name some of the ks of Scott & he sed Ivanhoe & ulshun.

Saturday—Me & Jake & Ted is cktising for the movys. We fall the shed roof and hang ourselves y the sholders sted of the neck & how hard we can hit each uther thout hollering & getting mad. got 1 black eye & a brused skin e & tore a pieve off my ear. xcept tat I wasent hurt.

Sunday—had the preecher for nner. and shicken to.he sed to pa at ma was a good conversashunist pa sed she ought to be as practice akes perfect. ma did not heer m say it so we had a pritty good nner only it spioldt a good game horse shews between me & pa in e afternoon.

Monday—they is a new kid in e room today whitch stutters when er he tawks. other times he is all ght. but I gess we wont try enny poofing on him for he is tall & oss eyed & ways about a 100 lbs.

Tuesday—ma ast pa whose fu- eral they was a haveing today & e sed it was John Elmores ant. a sed Why is she dead & pa sed hy they thot she was. We was oing to have a pop corn & diddent fter supper tonite. so it was all is fault to.

Wednesday—I hear lots of fokes awking about wimmen suffrage or um thing in polatix but it seems to me that they are not suffering much but are enjoying there self a great eal. ma a speshully.

Thursday—us kids went a wall nutting tonite & it was dark when we was comeing home & I was all out of breth. pa ast me did we pass the grave yard & I said we sure did pass it and we was a passing it mity fast to. the rest of the kids was all afrade & I had to stick with them.

Art Writes Again

Holbrook, Ariz.
Oct. 9, 1921.

Friend Jergie:-

We are, at the present time in Holbrook Ariz. and we are all feeling fine and dandy. We are sure going through the country and seeing sights. We went through New-Mexico from one end to the other. which was about 485 miles. Say Jergie there are lots of town in New Mexico that look exactly like those of France. I never seen such exactnes before in my life. The houses are made out of sod and some towns have all their houses this way. There is quite a lot of scenery at Santa Fee N. M. It has all narrow streets and practically all the houses are made out of sod. I also seen a wooden wagon there that was over 150 years old, and it was kept as a relic. Then we came down a Mt. Pass at Raton N. M. and it was 1000 ft. above the town and Chas. sure had his hands on the wheel. Then we came down what they call the hairpin trail and struck an Indian town where 1000 Indians parading and giving war hoops. It was sure comical to watch them.

The greatest dissapiontment for me was when we could see deer not over 400 ft. away and did not dare to shoot them. But believe me I am sure having my fun with the prairie dogs. I shot 19 in one day besides those I crippled.

At present we are about 600 miles from Los Angeles, California. We expect to get there by the eighteenth of this month. We are alll sure enjoying our trip.

I will close wihsing everyone well and happy in Klemme. My address is — Arthur H. Kuck
Gardina California

LIZZIE'S LAST JOY RIDE

Ed. Jacobs, our "hard boiled" hardware dealer, is the prowd owner of a new "Lizzy". She is a "darb", and has a winter top, demountable rims and all other Christmas trimmings. Ed is as happy as a kid with a new tin wagon. "Old Liz" has passed away, or at leasts is in a critical condition at the auto hospital. Ed. Henry Suckow and Bert Mathews took one wild ride to Mason City here a week or two ago, left poor old Lizzie out in the cold, cold world while they kept the home fires burning singing to some young ladies so it is said. Old Liz developed a severe cold on the road home in the "we sma' hours" which later developed into pneumonia. for her tires were already pnuematic. She also crippled her left hind leg hitting a high culvert which fractured the differential bones. She was also off in the upper story and her top needed a few stitches by the car doctor. She groaned and wheezed, her spark pulse was weak, she was in bad shape. So lo, and behold, Ed. traded her remains for a new relative.

BOSTON HAS "I WON'T WORKS"

Boston, Mass. Oct. 20 —Police investigation of more than 200 men of Urbain Ledoux's "church of the unimployed" discloses that 162 of them were profesional bums who had been attracted to Boston by Ledoux's auctioneering sensation. The police ordered the men to leave the city.

Rev. Buriff has been quite ill the past week suffering with a severe cold. At this writing he is very much improved and we hope to see him about again in a few days.

The Port of Missing Men

WAR DEPARTMENTS LIST OF DRAFT DESERTERS IS NEARLY 100 PER CENT TRUE

Out of 100.000 Published Names Only one third of one Per cent Are Wrong

Washington, Oct. 20—The policy of the war department to make the public the names of all alleged draft deserters is being thoroughly vindicated by results. This decision announced early in the administration of Secretary Weeks, created a perfect furore of criticism at the time. Secretary Weeks and his advisors stood by their guns, confident that their policy was a wise one. They believed that it was only jus tto those who had an honorable war record that those who had not should be published.

While admitting that the list as published might not be over 100 per cent acurate, the war department believed the quickest way to rectify any errors which might have srept into their records would be to publish the list and have the mistakes corrected by reason of the publicity of them.

High Percentage of Accuracy

Up to date few over 100,000 names of alleged draft deserters have been published by the war department. Publication of these of these names has resulted in the discovery of 248 of that number were wrongfully charged with desertion, and their names have been officially removed from the war departments list, and their records in the war department have been cleared of any odium. This shows that only one third one one per cent of the war department's list were in error, which is a record of accuracy of which the department is justly proud.

As soon as the lists began to be printed some local newspepers severly criticised the accuracy of the lists and cited alleged cases of gross error. As fast as these newspaper stories appeared the war department sett about to investigate them. In some cases 348 covering them all,the war department found out there had been a mistake in its records, but in the majority of the charges of inaccuracy it found that newspapers were being imposed upon by relatives and friends of the men charged with desertion. The majority of the stories thus carried were not based upon facts, generally being some fabrication which was foisted on the papers by the interesting parties in the hope that through this publication locally, the men charged with desertion might pose as being victims of some misstake by the war department.

Between 25.000 and 30,000 more names remain to be published by the war department.

ALL DISABLED WAR VETERANS WILL BE PROPERLY CARED FOR

Washington, Oct. 20—"All disabled war veterans now being cared for in private schools and contract hospitals are to be placed in Government hospitals under the supervision of the United States veterans bureau just as soon as the necessary arrangements can be made" is the statement of Colonel Forbes, director of the veteran's bureau. Under this plan men are not to be placed in the old army cantonments. as was intimated at one time, but are to be provided with comfortable living quarters in hospitals and training centers where, if desired, accomodations may olso be had for their families.

KOSSUTH SOON TO START ON PAVING

Land Owners Petition Board of Supervisors to Hard Surface Iowa Pike

The Board of Supervisors of Kossuth county last week passed resolutions to pave the North Iowa Pike from Algona, East to Hancock county line, acting on a petition signed by a majority of the adjacent land owners.

The Board also passed resolutions to gravel all the rest of the primary roads in the county except the North Iowa Pike west to the Polo Alto county line, which was not passed on.

The contract for grading preparatory to paving east from Algona to the county line will be let Oct. 25, and the gravel contract will be let as soon as possible.

CHOLERA SITUATION SERIOUS

Many Outbreaks Indicate That Care Must be Taken to Check Epidemic in State

Reports of serious outbreakes of hog cholera in many counties indicate there is more danger of a serious epidemic than for many years.

"Protect your herd before the cholera gets there and do it at once is the adomination of C. H. Stange, dean of the vetrinarian division at Iowa State College. Many farmers due to the tightness of money and the low market prices of hogs, have become careless with the result that many herds are being wiped out by ccholera. With proper precautions thru vaccination and keeping sick hogs away from well ones may be reasonably sure that the disease can be controlled.

Certain counties appear to suffer from ravages of cholera more heavily than others. Plymouth county last year was the heaviest loser, 9,850 hogs dying from cholera. Sioux Jasper and Hardin counties also suffered heavily. Allamakee and Ringgold counties lost the least number Reports from the above sections indicate that the disease is now progresing in about the same proportion with the heavy losers in some counties.

Since 1918 hog chorera has been on the increase in the state. Last year Iowa lost 261,000 hogs, about 3 per cent of the states hog population. Present indications show that this loss will be exceeded in 1921 unless adequate precautions are taken to control the disease.

Altho mang complex problems are still to be solved in regard to hog cholera transmission and the exact nature of the organism which attacks the hog, science has evolved vaccination aas the only sure preventive to the spread of the disease. Iowa has kept her hog cholera losses below that of other corn belt states but unless precautions are taken another epidemic will sweep the state with a heavy loss.

OCTOBER SONG

(Try this on your Piano)

I love the autumn breezes
That frolic round the street
Exposing naked kneeses
To give the boys a treat.

The chilly air and red noses,
Winds blow an auful fright
Down legs below rolled hoses,
My gosh, ain't it a sight?

—By G. Whizz.

Latest Dispatch From Every Part Of The State

Obituary Phil Behringer

Philip Behringer was born in Wurtemburg Germany, in 1851; he died at his residence in Klemme. Iowa, on October 11, 1921, aged 70 years, 2 months and six days.

He was married to Sarah Hartfelder, October 5, 1881, at Loran Illinois, pasing the fortieth anniversary of this union but a few days before his death. Two children were born to this union, Maggie Mae, who died in infancy, and Florence Eve, whi elivs to mourn the loss of a kind father.

Besides his wife and daughter. Florence, he leaves an adopted daughter, Mrs. Elmer Fuller, of Klemme, and an adopted son, Harry, of Los Angelos, California. One grand shild, five sisters, numerous other relatives and a host of friends are bereaved by his going.

In 1893 Mr. Behringer moved from Illinois to Honcock county, Ia. and resided in this county ever since, bearing his full share in the work of developing a comparatively new country. Even after removing from the farm and settling in Klemme. so long as his strenght permitted he continued active and energetic in any work to which he set his hand.

He was a good neighbor, a good husband, a kind and indulgent father Patient in long continued illness and suffering, he witnessed a good confession and was ready and willing to depart. He was a member of the Methodist Episcopal Church in Loran, Illinois, and afficiated with that church in Klemme.

The funeral was held at the M. E. church at Klemme last Friday, afternoon, conducted by Rev. Webb, pastor of the Garner M. E. Church.

Work on the Northern Lumber Company's new building is near completion. The front is finished with Kragstone in white and gray, presenting a very beautiful appearence. The office rooms are being decorated by Joe Miller and will look fine when completed. The entire building is about completed now and a little cleaning up here and there will complete the finishing touches. It is perhaps the best Lumber Yard building in this part of the state and is a vvaluable addition to our ttown.

Card of Thanks

We wish to thank our many friends and neighbors for their kind words of sympathy during our recent bereavement. We also wish to extend thanks for the beautiful flowers contributed in memory of our husband and father.

Mrs. Behringer and family,
Mr. and Mrs. Elmer Fuller.

THE RAILWAY CROSSING

By Walt Mason

He reached the railway crossing the same time as the train; I saw the engine tossing his auto o're the plain an epitaph engrossing was placed above the slain. With buckets and valices the undertakers came, and gathered up the pieces of this poor mortal frame, and while his weeping declared it was a shame, he speeded up his lizzie and tried to beat the train; his speed was surely dizzy, and etrcainly insane; why be so all fired busy when all such haste is vain He had all week to travel to Junkertown in the hole; but he must scrotch the gravel, the poor misguided soul; and now no druggist's salve'll restore his Peter Pole. "Oh stop and look and listen." the railway signboard said; he saw the wise words glisten in fresh paint just ahead, and he worked every piston and to the crossing sped. They scraped him from the cedars, they raked him from the plain; the public prints the leaders, that showed his course was vain, a warning to all speeders who try to beat the train. Alas! for poor old Peter! Much grief my spirits feels; and as I townward teeter, no more he rips the reels to show his Lizz'ies fleeter than anything on kheels.

Mrs. T. H. Christensen returned to her home at Ringsted. Iowa, after a week's visit with her parents Mr. and Mrs. E. F. Salling.

IOWA NEWS

P. J. Deluhery, a farmer living near Manchester. has filed bankruptcy proceedings. His debts total $11, 564.04, his assets appear to consist of a bland smile, and the directory of Delaware, Buchanan, and Fayette counties. He admitted that it had taken him 16 years to accumulate all the debts.

Tony Kanzlarich recently remove l $1100. the saving of his lifetime. from the bank and decided to buy a home. The next morning his trousers hung over the stove, caught fire and Tony's savings went up in smoke Tony's friends are helping him collect $1100 from the federal authorities on the strength of the charred trousers.

Iowa will produce more than an average crop of corn this year, although it will run about 50,000,000 bushels short of the 1920 crop, officials of the state Board of Agriculture says. Ninety three percent of the corn is safe. they say and if frost holds off until Oct. 15, 98 per cent will be out of danger. Potatoes will be less plentiful this year, only 4,246,000 bushels being grown in the state as compared with 9,350,000 in 1920.

They're going to drill for oil near Decorah. Articles of incorporation for such a concern were filed at the office of the secretary of state. The Decorah Pioneer Oil and Gas Co., capitalized at $125,000, plan to drill for gas and oil there. George Kessel of Cresco, is the president; A. E. Kenyon, Decorah. vice president and Ed. Youmans, Decorah, secretary-treas.

The paving on the Lincoln highway in Clinton County is completed and will be open to traffic for the Armistice Day celebration Nov. 11 according to the announcement made by the engineers. Eighteen miles of pavement is now continous from Unity Corners near Calamus, straingt into Clinton. The Board of Supervisors has awarded contracts for grading and preparing the rest of the highway through the county for paving next year.

Business men of Des Moines and Dallas Center are backing the Seible and Thorp Oil Corporation which is prospecting for oil on the Anthong Farrett farm, five mile east of Ven Meter. The drilling derricks were erected and are 82 feet high. The oil was located in a corn field not far from the house. An abandoned coal mine is one mile from the house on this eightp acre farm. C. L. Seibel, head of the corporation has had several years of experience in oil well drilling and is hopeful of results.

The Bank of Boyden at Boyden, was entered by yeggs who got away with $200 in cash and a large amount in bonds and valuable papers recently.

A. L. Blue, Webster City merchant received a knife wound five inches deep in his right side when bumped against a large butcher knife which was lying on a counter with the blade extending beyond the edge and the handle wedged against the scale.

Eight men forced their way into the home of A. E. Wickman, millionaire contractor of Council Bluffs, held up his son and the maid, and escaped with loot said to be six bottles of liquor. They are reported to have done considerable damage in the house and furnishings duriing robbery.

Emigration of several hundred thousnd young people from the rural districts of Iowa in the past 20 years creates a grave danger of future decadence in many of the farming sections of the state. Iowa has lost a large a proportion of the natives of its rural districts as have the New England states. whose decadence has been so often discussed. The present condition, however is not of degeneracy by any means, for the majority of the farmers of Iowa are still the descendants of splendid pioneer stock. But if the best young people continue to leave the farms and if the birth rate among the better families continues to fall, coming generations are practically certain to be inferior to the earliar settlers

Hermit Lives Ninety Years

Missouri Woman Had Never Ridden on a Railroad or Visited a Large Town.

HAD SIMPLE RULES OF LIFE

"Have Something to Interest You and Keep Going—Learn to Go to Sleep Easily and Don't Borrow Trouble."

Macon, Mo.—Ninety years in the back country of Missouri without ever having ridden in a railroad train or visited a town larger than Moberly, Huntsville or Macon, was the record of "Aunt Betty" Elliott, whose death occurred recently at the home of her sister, Mrs. S. B. Rice, six miles west of Jacksonville.

Miss Elliot was one of a very interesting trio, the other two being her brothers, Perry and Jordan Elliot, who died a few years ago. All their lives they had lived upon the land which was taken up by their father, William Elliot, when he came from Kentucky to northern Missouri in 1816. After the death of their parents and the marriage of the younger children, Miss Elliot and her two brothers lived on the old homestead, carrying on their farming operations and duties about the house in the same primitive manner as conducted by their parents in the pioneer days.

Had One Ride in a Motor Car.

Miss Elliot once enjoyed the experience of riding in a motor car. She said she got as far as College Mound when something about it went dead and they had to hitch on a couple of mules to haul them back home. She never cared much for motor cars since then.

The Elliot brothers developed the estate until it comprised about 2,000 acres, and, although in the heart of the very richest growing section of Missouri, much of it was rough pasture land. For a great many years the farm was inclosed with rail fences, which as time went by sank far into the ground. The fencing around this farm marks almost the last of the old rail fences in northern Missouri.

None of the three had found time in their busy lives to go to school, but they knew the value of stock and grain and were as shrewd in their deals as anybody. Underneath a large part of their land are valuable beds of coal.

"Fight shy of doctors and medicine. Have something to interest you and keep going. Learn to go to sleep easily, and don't borrow trouble. Get out in the air and raise turkeys, ducks and chickens. Eat hearty and go to bed early."

That was the rule of "Aunt Betsy."

Scorned Luxury for Simple Life.

Fourteen years ago a correspondent visited the Elliot trio and spent a day with "the children of nature," who scorned luxuries to live the simple life of their parents, pioneers of Missouri. There the correspondent found a leaky house, built by their parents; a part of which was begun the year after the Civil war and never had been completed, and three "children," all more than seventy, who never had had time to even think about marriage. The only thing modern on the farm was a nice-looking range in the kitched which the boys had purchased for "Aunt Betty."

Late in the evening the two "boys" returned to the house. All talk in gentle, quiet tones. In brief they outlined their lives as follows:

Never too old to work.
Never had a quarrel with anybody.
Never swapped a horse.
Never owned a dog.
Never use tobacco in any form.
Never belonged to a church, but believed in God.
Never were in a lawsuit.
Never knew the extent of their wealth.
Kept their accounts with pins or shingles.

What was good enough for their forefathers was good enough for them.

BEAT ANTI-LOTTERY LAW

California police have seized several tons of Chinese lottery tickets, shipped as blank paper, and which on examination by officials at first appeared to be really blank paper. Instead of being in the center of the paper, the printing was put well into one corner, leaving a wide margin on two sides. The tickets were then packed so that the margins were toward the outside. A great many thousands of them were passed by the officials before the scheme was discovered.

Two-Story Crop Proves Success

Enterprising Farmer Discovers How to Make Fourth Plain Land Pay.

RAISE CHICKS AND PRUNES

Chickens Fertilize Land Good Only for Raising Prunes—Farmer's Discovery Leads to Rapid Growth in the Industry.

Vancouver.—Fourth Plain, now a community with the thriving village of Orchards as the center, is expecting to come into its own in a few years. The reason is a system of agriculture known to Orchards residents as the "two-story crop." If the Orchards residents make their present system work, it will be the first plan for tilling the scanty Fourth Plain soil that has proved a success since the land was first cultivated by the Hudson's Bay company some 90 years ago. The Hudson Bay farmers made the land pay. Until very recently, the only other people that profited from Fourth Plain were the real estate men, who frequently sold the same tract of land two or three times a year.

Soil Looks Fine.

The soil of Fourth Plain is fine looking on top. In fact, what soil there is is good soil, but it exists only in very small quantities. An inch or so beneath the surface gravel is found. Eastern people, lured into buying a small farm, soon found that it could not be made to produce. Even prunes failed, this being about the worst thing that can be said for southern Washington land. The prune crops were usually small, although occasionally big crops are harvested.

R. J. Renny, a well-known chicken man, discovered the "two-story crop." In searching for a farm for a chicken ranch, he found a place at Orchards that was well drained and otherwise suited. On the farm when he bought was a prune orchard. Mr. Renny cultivated the orchard and raised the chickens in addition. He soon found that the chickens fertilized the prune orchard, the light soil being well adapted to the purpose. As a general rule animal fertilizer cannot be used for prune orchards except on light well drained soil.

Mr. Renny specialized on quality stock, and his birds and eggs command far better than the market price. Others of his neighbors tried out the experiment and it was soon found that practically every Orchards farm is as well adapted to the two-story crop as the Renny place. Ten years ago but one commercial chicken raiser was located at Orchards. Now the number in the district is probably close to 500, and every flock is being increased.

Chickens Fertilize Land.

A thousand chickens in the hands of an experienced chicken man will produce a comfortable living at Orchards. The chickens occupy the "ground floor" on the farm and fertilize the prune trees, occupying the second story. While the prune trees are not remarkably productive as prune trees go, nevertheless they represent practically all profit.

As over 50 chicken ranches have been established in the last six months, it is conservatively estimated that at the present rate of increase two more years will make Orchards the greatest chicken country in the United States, not excluding Petaluma, Cal. Practically every chicken raiser, in addition to his flock of birds, has an orchard, and the receipts from both fruit and chickens make farming a success.

Orchards is six miles from Vancouver, Wash., and but ten miles from Portland, Ore., and as a street car line runs through the new chicken country, the growers have little to fear about finding a market.

The druids originated the use of mistletoe as a festival decoration.

Last Privately Built Submarine

The United States submarine S-51 being launched at the yard of the Lake Torpedo company in Bridgeport, Conn., and Mrs. Roy P. Mills, who was sponsor for the vessel. This is the last of the submarines to be built by private contractors.

DEVICE THAT COPIES SUN'S RAYS

Curative Properties Are Duplicated by Artificial Means.

Science Develops Sources of Violet and Ultra-Violet Rays for Treatment of Bodily Ills.

Washington.—The sun, in addition to heating and lighting this planet, sends down its so-called actinic rays, those of the violet and ultra-violet, which have beneficial effects in the treatment of some of our bodily ills. But the sunshine cannot be obtained when and wherever it is needed. For this reason scientists and physicians have been developing artificial sources of violet and ultra-violet rays which are like the sun in therapeutic action and which thus bring to suffering humanity one more simple means to aid in alleviating some of its ills.

"At the present moment, the mercury arc in a quartz inclosure appears to be the most promising device for producing ultra-violet rays," announced Dr. W. W. Coblentz, physicist and chief of the radiometry section of the Bureau of Standards at a meeting of the American Electrotherapeutic association here recently.

For some years Doctor Coblentz has been investigating these lamps to determine how closely they duplicate the beneficial rays from the sun. He has found that sunlight and the radiations from quartz mercury vapor burners have about the same total intensity of ultra-violet radiations, but the spectral quality of the two sources is entirely different. The quartz mercury lamp contains 15 per cent more ultra-violet radiation and shorter wave length than are found in sunlight as transmitted by our atmosphere.

"But we know that sunlight has therapeutic powers, and hence it would appear that these very short wave lengths, found in the mercury lamp, which approach the X-rays in shortness, are not absolutely essential in producing the curative effects," Doctor Coblentz pointed out. Other investigators have found that shorter waves are responsible for skin irritation and burning.

Boy Held Child Above Flood for Five Hours

Perhaps the outstanding heroism of the flood in San Antonio, Tex., was that of a twelve-year-old Mexican boy, who clung to a tree for five hours, holding on his shoulders above the water a child five years old. The boy rescuer was battered black and blue by floating wreckage and was taken to a hospital unconscious. The child was unharmed.

Dairy products of California in 1920 were valued at $95,152,000.

ERADICATION OF BARBERRY PLANT

Campaign Begun as Control Measure Against Loss of Grain by Black-Stem Rust.

BUSHES THRIVE EVERYWHERE

Plants Spread to Woodland, Pastures Stream Banks and Fence Rows by Distribution of Seeds by Different Birds.

(Prepared by the United States Department of Agriculture.)

The job of eradicating the common barberry has proved to be a much more extensive one than was anticipated by the United States Department of Agriculture at the outset of the campaign in April, 1918. This campaign was begun as a control measure against the enormous losses of grain from black-stem rust. In years of moderate rust epidemics, the reduction in the yield of wheat alone has amounted to 50,000,000 bushels, while in 1916, the year of a very severe epidemic, there was a reduction in yield of 180,000,000 bushels in the United States alone.

Bushes Grow Everywhere.

In the grain-growing districts of the upper Mississippi valley, where the campaign has been carried on, it was supposed that barberry bushes existed chiefly as ornamental plants in the towns and cities. This was disproved during the first year of the campaign by the finding of 176,430 bushes on 1,166 rural properties. About 75,000 of these were scattered widely over 127 properties, showing that all country bushes are not confined to the farmsteads, but had been spread to woodland, pastures, stream banks, and fence rows by the distribution of seeds by birds.

With these facts in mind, the campaign was more vigorously pushed in 1919. As soon as the survey of most cities and villages was completed, a farm-to-farm survey of certain definite areas was begun. The results in 1919 were as follows: 338,000 bushes were found on 14,100 city properties, while 1,760,000 bushes were found on 4,600 farms. Of these last, 1,680,000 bushes were ones that had escaped from cultivation on 1,200 properties.

During the calendar year 1920 efforts were concentrated upon the farm-to-farm survey. A resurvey of cities and villages in the counties surveyed was carried on at the same time. In Ohio seven counties along the western

Common Barberry.

border were completed; in Indiana 13 counties; in Michigan five counties; in Illinois three counties; in Wisconsin four; in Iowa 17, in the northwest portion of the state; in Minnesota the equivalent of 15 counties in the southwest portion of the state; in Nebraska the equivalent of 16 in the eastern part of the state; in South Dakota nine along the eastern border; in North Dakota ten in the eastern portion of the state.

Many Bushes Removed.

In the entire campaign of three field seasons a total of 5,444,000 bushes have been found and 4,230,000 removed. Included with these, in so far as estimates were furnished, are hundreds of thousands of bushes removed from commercial nurseries during the early part of the campaign. The larger numbers were about 600,000 for Minnesota, 500,000 for Iowa, 200,000 for Wisconsin, and 75,000 for Ohio. Of the 1,214,000 remaining bushes about 1,000,000 are seedling bushes less than 18 inches in height in a single area in southern Wisconsin. The work for the field season of 1921 is to continue the farm-to-farm survey in as many counties as possible adjacent to those already completed.

BIG VALUE OF COVER CROPS

Especially Valuable to Small Gardeners and Trucksters Who Cannot Obtain Manure.

Cover crops are of especial value to small gardeners and trucksters, who often find it both difficult and expensive to obtain stable manure. They add the humus which is so necessary to maintain a good physical condition of the soil. Wherever there is a vacant place in the garden a few seeds of rye, vetch, clover, etc., may be sown and raked in. If a suitable rotation of crops is followed all parts of the garden may be covered with a green manure crop once every two or three years.

PARTLY FILLED SILO IS DANGEROUS PLACE

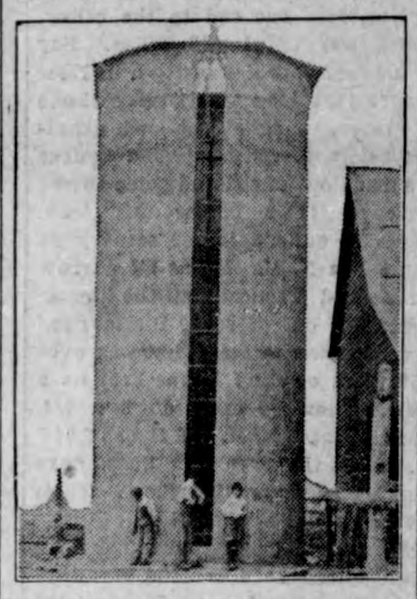
Turn Machine Blower on Before Attempting to Enter.

Number of Accidents Occur Each Year Owing to Carelessness and Ignorance of Methods of Removing Deadly Gases.

(Prepared by the United States Department of Agriculture.)

Turn the machine blower on and leave it on for at least two minutes before anyone is permitted to enter a partly filled silo. Unless this rule is followed, the result is likely to be dead men, says the United States Department of Agriculture.

Annually fatalities occur among farmers and their helpers as a result of the workmen entering half-filled silos after the deadly carbon monoxide gases have had a chance to accumulate directly above the freshly ensiled corn. A few days ago two Illinois farmers were killed and another was rendered seriously sick by silo



Newly Constructed Silo—Doors Should Not Be Wedged Into Place Until Needed to Prevent Waste of Corn.

gases which are almost as dangerous as the poisonous mustard gases used during the recent war. In this instance, one of the farm workmen entered a 50-foot silo which had been half filled the previous day. Some time elapsed and when he did not come out, another of the hands ascended into the silo. Neither reappeared, though the other workers shouted to them repeatedly to come down.

Fearing an accident, the farm owner finally climbed into the silo. He also was immediately overcome by the poisonous fumes and only the fact that others followed him, forced open the extra silo doors and carried him into the open air saved his life. The two other men were suffocated immediately.

Each year, a number of accidents of this kind occur, due largely to carelessness and ignorance of the proper methods of eradicating the dangerous gases. The preventive measures are simple and efficient and, where they are followed, there is no danger.

No workman should ever enter a partly filled silo, after the ensiled corn has had an opportunity to develop poisonous carbon monoxide gases overnight, until the machine blower has been started. The fresh air dilutes and scatters the obnoxious gases to the extent that they are rendered harmless. After the blower has been operated for two minutes, it is perfectly safe for the workmen to enter. Another precaution which should be practiced religiously is not to wedge the silo doors into place until they are needed to prevent the waste of the ensiled corn. Many farmers follow the practice of placing most of the doors before any great amount of corn is cut and deposited in the silo. This prevents free circulation of air through the silo which, in turn, operates to favor the accumulation of carbon monoxide and other deadly silo gases.

DISCOVER NEW BLACKBERRY

Species Nearly Four Times Larger Than Garden Variety Has Been Found in Colombia.

A species of blackberry, nearly four times larger than our garden variety, has been discovered in Colombia by American scientists and is being experimented with by the Department of Agriculture with a view to distribution to farmers of this country.

The giant berry was discovered by Dr. Frank H. Chapman of the American Museum of Natural History, in the remote forests of Colombia. It was brought here by Wilson Popenoe, agricultural explorer of the Agricultural department and named the Colombia berry, after the country of its origin.

SHELTER TURKEYS IN WINTER

Good Plan to Keep Fowls in Same House They Are Expected to Use in Laying Season.

It is a good plan to house the turkeys during the winter months where they are expected to lay during the laying season. A straw barn makes a very desirable shelter for turkeys during the winter season and, being little used in the spring and early summer, makes a very suitable place for the turkeys to lay and brood in. A little forethought may prevent the turkey hen from stealing her nest away in the spring.

Sewing Wood.

There has appeared in this country recently a special plywood material for aircraft construction.

This new material must not be confused with ordinary plywood, which is glued together. It is claimed to be a super-plywood, and is actually sewn together!

First, the layers are cemented together with waterproof material, and then stitched through in parallel rows about one and a quarter inches apart. This gives a rigidity and resilience not to be attained by any other method.

Weight for weight, it is the strongest material yet invented. It is made in sheets of any size or shape up to eight feet wide by 60 feet long and from one-eighth of an inch to five-eighths of an inch thick, thus doing away with waste in the conversion.—London Tit-Bits.

Mrs. Letch from Goodell was a Klemme visitor Friday.

FARMERS—we have round portable corn cribs. Jacobs & Son o20tf

M. E. Peck was down from Garner Saturday on business.

Miss McKahan, high school teacher spent Sunday with her parents.

Mr. and Mrs. Hartley Blewitt, of Thornton, drove over here last Friday for a visit with Klemme friends.

Mrs. Houghton and son were up from Goodell Saturday shopping with Klemme merchants.

Mrs. A. G. Keorner and children and Mrs. Howard Doyle drove over to Mason City Saturday afternoon.

Mrs. J. Jorgenson, of Garner, came yesterday for a several days visit at the R. A. Jorgenson home.

Mr. and Mrs. Herman Abels, of Meservey, were business callers here Friday.

Mr. and Mrs. Whitaker, of Belmond were shopping in Klemme last Friday.

Rev. Ortmeyer and wife of Forest City, were visiting with Klemme relatives and friends last Thursday.

"Bill" Trafford was notified by the Sheriff to serve on the jury this term. "Bill' considers himself one of the "unlucky dozen".

Mrs. G. P. McCullough returned last Thursday from a Mason City hospital where she has been taking treatment for ear trouble.

M. O. Hocum and children and Mr. and Mrs. R. A. Jorgenson drove to Hampton Sunday for a visit with Mrs. Hocum who is in the hospital there. We are glad to report that she is gettting along nicely after her operation and will be able to come home about next week some time.

The local boy scouts held a meeting Tuesday evening when they appeared before the local council and took their oath. The members of the school board constitute the council here. Prof. H. E. Wilson is their Scout Master. The Boy Scouts is a new organization here but are getting many members and we predict that Klemme will have a Boy Scout organization to be prowd of.

To Their Discredit.

Those who are the most accomplished do not always accomplish the most.—Boston Transcript

Goodell News Items

Mrs. Geo. Grigs and son Harold. went to Hampton where the latter will remain for an infinate length of time taking treatments.

The house and barn of A. A. Johnson west of town was destroyed by fire Monday afternoon.

A young people's party was held in the basement of the U. B. church Friday nite.

Mr. and Mrs. Letch accompanied the O. Sandberg family to Iowa Falls Sunday.

Kirkwood's formerly of Klemme have taken possession of the hotel.

Chas Biedefelt is the owner of a new Chevrolet.

Mr. and Mrs. Jay Griggs and family visited at Ventura Sunday.

Mr. and Mrs. V. A. Cook were Sun day callers at the J. J. Cook home.

The Hawkeye Jazz Band of Britt will play for the dance here Friday nite.

"Tramps" or "Hoboes" seem to be quite numerous these days.

Lamer has taken possession of part of the Mrs. Ahrenkiel building.

Ed. Hood and daughter Lena returned from Rochester Minn. Sunday.

GOODELL SCHOOL NOTES

Klemme played Goodell a return game of base ball last Wednesday, and we are sorry to say that our team was sadly defeated. The scores being 8 to 21 in favor of Klemme.

All girls of the High School need a word or perhaps two, of praise when it comes to giving their yells—Which are as "classy" as "peppy" with Miss Engesth of the Sophomore Class as leader they showed a neighboring town that if they could not beat her in Base Ball, they could in yelling, a note book seemed quite prominent among the neighboring town's girls, which showed that their memory wasent as good as it might be else they would not have needed it, or perhaps they forgot to practice their yells. No note book or memorandum's were needed among the G. H. S. girls—and for this and their good work we'll give them three cheers!

"Don" Estelle was absent from school Monday and Tuesday of last week.

The six-weeks test now being over everyone is at ease again.

Mae Griggs of the Junior Class was absent Friday.

A wiene roast was held on the school grounds Wed. evening. Every one present enjoyed themselves.

The ball boys failed to practice last Thursday at their usual time, wonder why

Practice for the Glee Club last Tuesday evening was posponed as the instructor Miss Jenkins was sick.

Nora Wilson returned to school Monday morning after a two weeks absence.

Mrs. H. T. Miler served as a very good substitute during the absence of Prof. Nelson Friday.

Avery Township News

Mr. and Mrs D. A. Marshal and Son were Mason City callers Saturday.

Mr. and Mrs. Wm. Bell and daughter Myrtle, and Gertrude Wilkins were callers at Mason City last Thurs day Afternoon.

Elmer Lowhorn of Wisconsin was seen in this vicinity Saturday.

Another ball game took place at the home of Wm. Bell's last Sunday. An interesting game was played the Muskrat team of Meservey and the Musktank team of Avery Township played and tolled 21 to 1 in favor of the Musktank team.

Mr. and Mrs. Fred Hoffman and children were visiting at the Garland Hoffman home Sunday.

Mr. and Mrs. Henry Helps and children were Sunday callers at the Albert Johnson home.

Howard Wilson of Wisconsin is here picking corn for C. A. Arnold.

George Wilson is assisting Elmer Arnold in picking corn.

Church Bells.

The Angelus bell, always rung thrice a day, takes its name from the first words of the prayer. In Tuscany a bell is rung an hour before the evening Angelus, or Ave bell, and is intended to remind its hearers to say the creed. The De Profundi bell sounds one hour after the Ave. In Italy on Friday afternoon at 3 o'clock thirty-three strokes are sounded in many churches and convents in memory of Christ's death at the age of 33. The custom probably is followed elsewhere.

TO FORE IN AERO INDUSTRY

Nebraska and Iowa May Become Center of Aviation.

Western Iowa and eastern Nebraska will in all probability become the center of the aviation industry in America as a direct result of the first International Aero Congress to be held in Omaha, November 3-5, 1921.

The manufacturers of aircraft, who have been generally located in the east and on the west coast, will be shown the wonderful possibilities of the middle west in aviation. Instead of the small fields of the east, they will see the landing possibilities of the big fields of Iowa and Nebraska.

Heretofore, the cost of shipping or piloting their planes to the other parts of the country from the east, made sales difficult. Here they will see the possibilities of a one-day flight to every part of the country in disposing of their planes.

"In all probability, the congress will mean that the future of the middle west will be insuperably linked with the development of the air" said R C. Tooke, one of the officials of the Aero Club of Omaha, "and the people of the middle west will have an opportunity to see what has been accomplished in aviation."

FREAKS OF AIR AT CONGRESS

All Sorts of Creations to Be Exhibited at November Reunion of Aviators in Omaha.

All sorts of queer creations of the air will be on exhibit at the first International Aero Congress at Omaha, November 3-5, 1921, according to officials of the Aero Club of Omaha, who are in charge.

A. E. Bellor of Ogden, Utah, inventor of a type of dirigible with three cigar shaped bags, with motors at the sides, and a deck for passengers underneath, says his craft may be shown, according to word received by the club.

Another inventor from Montana plans to bring his plane, supposed to be the smallest made. It has a total wing spread of twelve feet, and is about the height of the inventor.

A new type of craft, capable of landing on water like a duck or on land, and which is supposed to make flying on America's waterways possible, may be shown if finished in time.

America has hundreds of inventors of air craft, some of them possible and many merely freaks. Visitors at the show will see some things that were only dreamed of a few years ago.

AIR MEET A REVELATION.

Spectacle Schduled at Omaha, November 3-5 Greatest in U. S. History.

Those who attend the International Aero Congress at Omaha, November 3-5, will see one of the biggest air spectacles ever shown in this country. Next to the famous spectacle staged by the Royal Air Force at Hendon, England, this summer, it is the greatest in the world.

A wooden model of a French village, two blocks in length, with the village church in the center, will be placed on the flying field. In the village square, scores of peasants are dancing with the Americans who have come to help defeat the Huns.

It is evening. All at once the drone of a Mercedes is heard overhead. The peasants hide in their houses, all lights are extinguished. The drone grows louder.

An American ace, who has downed a score of Huns, is in the village. He takes off in his airplane, and rises to meet the Hun. Before he can reach him, the German bombs the village, destroying part of it.

The fight in the air that follows; the reception of the American after he returns; the battle in the clouds, all go to make a wonderful spectacle that is new for this part of the world. It will be recognized by any former soldier who attends.

REUNION OF BIRDMEN.

Air Congress Will Bring Together Flyers From Many States.

The war time flyers came from the small towns and villages of America, according to army statistics. Many of them, since the war, have not had an opportunity to see an airplane. Most of them have not had the opportunity of meeting with their "buddies" of the flying camps.

The first International Aero Congress, planned for Omaha, Neb., November 3-5, will be the first reunion of the birdmen since the war, and airplanes and flyers are expected to attend from every state in the union.

From the minute they land in Omaha, the town will belong to them, according to officials of the Aero Club of Omaha, who are sponsoring the meet. Elaborate preparations for their entertainment have been made.

Many of the Legionaires who attend the national convention at Kansas City are expected to take the six hour trip to Omaha to wind up the week's festivities.

The big men of the air game are expected to attend. The Aero Club of America has promised to send six or seven speakers, who are authorities on aviation, to address public meetings of the bird men.

And there will be plenty of opportunity to play "African golf" and the other pastimes that helped to occupy the idle hours for the flyers, according to S. D. Day, chairman of the entertainment committee.

WEST IN LIMELIGHT

New York World Lauds Nebraska and Its Metropolis for Landing Air Classic.

Omaha, Neb.—Omaha and Nebraska have been placed on the map as "wide awake." The New York World placed them there immediately after the Omaha Aero club had obtained the Pulitzer Trophy race as the feature event of the air congress to be held in Omaha November 3, 4 and 5.

This is what the eastern newspaper had to say:

"The 1921 air race for the Pulitzer trophy—the world's most important prize forspeed in the upper realms—will be flown this year at Omaha.

"Announcement to this effect was made by Earl W. Porter, president of the Omaha Aero club, in the wide awake Nebraska city. Omaha gained for herself quite a victory in obtaining the Pulitzer Trophy race."

OUR MARY CANNOT ATTEND; SENDS REGRETS TO PORTER.

Little Mary Pickford wants to attend the Omaha air congress but she can't. For early in November—the meet will be held on the 3, 4 and 5th—Mary will be on her way to Europe with Doug.

Expressing her regret, Mary says in a letter to Earl W. Porter, president of the Omaha Aero club: "I shall be in Europe at the time as we are planning to go immediately upon completion of Mr. Fairbanks production of the "Virginian."

" I do so appreciate the invitation and my memories of Rockwell Field tell me just what I shall miss for I know how royally the Airmen can entertain and what true hospitality is their's."

During the war Mary was a great friend of the soldiers and spent much of her time a Rockwell flying field.

THE NEW FLYING FIELD.

Which is Being Scientifically Prepared in the Northern Part of Omaha.

The accompaning picture is an interesting view of the new aero field on North 24th Street where the races and

various exhibitions will start and finish during the Aero Congress in Omaha, November 3 to 5. The light colored squares are corn fields which will be eliminated and the ground scientifically prepared before the meeting. The huge trees shown in upper left hand corner were pulled by the roots by giant tractors. This picture was taken from a plane high above the field.

PLAN TO HAVE LEGION HEADS VIEW HUGE AIR SPECTACLE.

There are going to be hundreds of members and celebrities at the American Legion convention in Kansas City October 31 and the Omaha Aero club is arranging to have 'em come on to Omaha for the big air meet November 3, 4 and 5. A Kansas City delegation recently flew to Omaha to co-operate with the air club in boosting the Omaha event at the Kansas City convention.

MEXICANS WILL SEND ENVOY —MAY BE PRES. OBREGON.

If you come to the Omaha air meet November 3,4 and 5, you'll see representatives of the Mexican government—maybe President Obregon or De La Huerta.

Earl Kiplinger, just back from extending the official invitation of the Omaha Aero club to the Mexican government at Mexico City, brought with him assurance of a representation here.

Insured Against Weather.

Here's an idea for "outstaters," which originated with the Omaha Aero club in connection with its air congress here November 3, 4 and 5.

Insure your outdoor events, such as county fairs, air meets, etc. against the weather.

That's what the club is doing. It has insured the meet against rain, cyclone and all other kinds of weather.

Raise $5,000 in Single Day.

Business men of North Omaha raised $5,000 in a single day, August 29, to assist in defraying expense of the First International Air Congress to be held in Omaha in November. The dates of the meet are November 3-5, inclusive.

Sewer for Air Feld.

Just a little matter of $20,000. But the Omaha Aero club put it over. Got the city council to approve construction of a sewer running through the aviation field where the big air congress will be held on November 3, 4 and 5, at a cost of $20,644.75.

Many to Come Via Air.

Nebraska skies should be full of airplanes around about November 1.

According to prediction of the Omaha Aero club, substantiated by letters from America's aviators, nearly 100 of 'em plan to fly to the Omaha air meet to be held November 3-4 and 5.

This is a Year Round Value Store

not a "bargain" store. We could buy cheap goods and call such goods 'bargains'. could quote all kinds of comparative prices would that mean "bargains"? We think not. As long as we are in business we will sell quality--and you will find only quality clothing here. You will find it at the lowest price that such clothing can be sold.

Worth while goods will always appeal to those who practice true economy.

There's a great stock here - Right, new styles in every department-you will enjoy looking through.

All tile must pass the specifications for standard drain tile of the American Society for Testing Materials, tile in sizes 8" and above to be not less than 2' long.

Cement tile will be allowed only in sizes 24" and above.

The specifications state that where runing sand is encountered, sewer pipe with joints caulked in jute shall be used and the bids must state the price in case such construction is used.

Work to be comenced thirty days from date of letting of Contract. Contract will be completed by December 1, 1922.

All the tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to backfill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

All ditches and drains to be constructed in all respects in the accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa. up to one o'clock noon of the 1st day of November, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids will be received on any one or all sections, for the tile alone, for construction work alone, or for both tile and construction.

The Board will at their discretion let the work as a whole or in sections to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten percent of the total amount of bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMANCE TO THE ABOVE REQUIREMENT WILL BE REJECTED.

The party to whom any contract is being awarded will be required to attend at the office of the Auditor Of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all provisions. terms, and conditions thereof and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five percent of the amount of the bid and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required. The deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 7, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty-four hours after demand, and the deposit of the successful bidders will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 8th day of October, 1921.

(SEAL) Chris Jacobs,
County Auditor

SAVED FEATHERED FRIEND

Cat's Remarkable Devotion to Canary Makes a Story Quite Out of the Ordinary.

The cat saved the life of the canary. That, writes a correspondent, is the gist of an extraordinary story that a friend told me. My friend is fond of pets. Several years ago a neighbor of hers complained that her cat, which had just given birth to three kittens, refused to have anything to do with one of them. My friend told her neighbor that she would take the kitten and bring it up by hand. She fed the little thing from a spoon, and while it was small kept it on the bed for fear someone would step on it.

At that time she also had a canary, which she let out of its cage for a while each day. The bird would often fly to the bed and, perching on the kitten's back, sit there to preen its feathers, and would even tuck its head under its wing for a short nap in the kitten's warm fur. The kitten never showed the least inclination to harm it. Even after the kitten grew older the bird continued to sit on its back, and teased it sometimes by reaching over and pecking at its nose and eyes.

One day, when the kitten had become a full-grown cat, the bird escaped through a door that had been accidentally left open. After three days had passed without anyone's seeing it my friend gave it up as dead. The cat was forlorn without its playmate; frequently it looked up at the empty cage and mewed or wandered round outdoors, mewing dolefully.

On the third day the lady heard the cat at the screen door; she called to it once or twice, and it answered; but she noticed that its voice sounded muffled and strange. She went to the door, and there stood puss with the last canary in its mouth. The bird was unharmed, but nearly dead from hunger and exposure. First aid in the shape of warm milk and pepper, however, soon restored it to its normal health. The lady never knew whether the bird had been attracted by the cat's calls, or whether the cat had found it on the ground near the house. At any rate, the cat saved the bird's life.—Youth's Companion.

Kite Balloons for Commercial Use.

Although there are undoubtedly important uses to which kite balloons can be put, some very impractical suggestions have recently been made by enthusiasts for this particular craft regarding its commercial use. The value of the kite balloon in connection with meteorological observations is undisputed, and, under certain conditions, as landmarks on air routes kite balloons may be of the greatest assistance, but the suggestion that they should be towed from trawlers to "spot" shoals of fish is not quite so acceptable, we are reminded by Aeronautics. The small airship probably has greater possibilities in this direction than the towed captive balloon, but the present cost of an airship makes its use impracticable, nor is the speed of a small airship sufficient to insure more than occasional use. Another suggestion which has been put forward is that firms should use kite balloons for displaying advertisements.—Scientific American.

Jusserand Lively Humorist.

Ambassador Jean Jusserand, for the last 20 years the representative of France in the United States, has a rare sense of humor that is a constant delight to Washington.

What is probably his prize quip was made some years ago when the public was engaged in laughing a ridiculous statue out of the capitol grounds. This statue was of George Washington. It represented the Father of His Country sitting entirely nude amid the snows and wintry blasts of Capitol hill, one finger raised solemnly above his head.

"I know just what he is saying," Mr. Jusserand opined. "He is saying, 'My soul is in heaven and my clothes are in the National museum.' "—New York Sun.

Scientific Drug Expedition.

An expedition led by Doctor Rusby of Columbia will visit unexplored areas of Venezuela, Bolivia, Ecuador and eastern Colombia. The enterprise, which is strictly scientific, is being financed by a Philadelphia chemical company and will consume eighteen months. The explorers will attempt to study and bring back for further examination here specimens of birds, insects, flora, reptiles, fish and other creatures that abound in those regions. They also will seek new light on tropical diseases, their origin and their cure. The results of the expedition will be given to the world. — Scientific American.

Arts of Expression.

"That last speech of yours was what I call commonplace," remarked the cold-hearted constituent.

"I was only endeavoring to speak the simple truth in plain terms," replied Senator Sorghum. "You wait till I try to put something across when nobody's looking and I'll show you some phraseological ingenuities that'll sound perfectly brilliant."

Both Ways.

"No doubt appearance has a lot to do with one's success."

"But not so much as success has to do with one's appearances."—Buffalo Enquirer.

An Unbeliever.

First Stenographer—I don't believe half I see in print.

Second Ditto—Judging from your spelling that must include what you see in the dictionary.

HAILED SUN AS THEIR GOD

Incas Welcomed Return of Life-Giving Rays With Great Festival and Much Ceremony.

At this time of the year, in the days of the golden Inca empire, "Raymi," the great festival of the sun, was celebrated. Then the lord of the day, who had gone so far from Peru, retraced his steps and came back to give the land life again, and, to welcome him with splendor, the Incas from all their lands around went up to Cuzco, the city of the sun. There dwelt the emperor, surrounded with vast magnificence, and for this one occasion he became chief priest. The ceremonies began at dawn, when the emperor came forth from his palace followed by the Incas, according to their rank, and then by the Curacas, lords who held their lands far off from the court. These latter were strangely and superbly dressed in trappings of gold and silver. The whole brilliant procession moved toward the plaza of Cuzco, where, with feet bared and eyes fixed upon the east, all awaited the coming of the sun. The moment he appeared the multitude prostrated themselves, and in a frenzy of adoration reached toward him supplicating hands, crying to him that he was their god and father. Then the emperor taking a glass of wine in his right hand invited the god to drink. The offering accepted, he and other lords of the royal Inca blood drank the holy wine prepared by virgins consecrated to the service of the sun.

Proceeding to the sun's own sanctuary, then, a chosen few worshiped with secret rites his golden image, with its rays of gold and silver studded with gems. There followed sacrifices by auguries and a great feast. The fire, kept burning all the year by the virgins of the sun, was replenished.

The Wants of a Pioneer.

Writing to the editor of the Palimpsest, John P. Irish recounts some of the hardships of Iowa pioneer life and tells the story of one of those pioneer women and her granddaughter, who asked:

"Grandma, you were here in the early days?"

"Yes, I was a pioneer."

"Well, were you poor?"

"Yes, we were all poor."

"Couldn't you have what you wanted?"

"No, I could not."

"Did you have no meat?"

"No, nothing but venison, wild turkeys, prairie chickens and quails."

"Did you have no sugar?"

"Nothing but maple sugar."

"What did you want that you couldn't get?"

"It was New Orleans molasses and salt mackerel."

How Times Change!

Something in the movies or on the stage is disturbing to the ideas of those who see it. Forthwith they argue it should be suppressed.

This is in cheerful disregard of the fact that what seems shocking in one period becomes commonplace in the next.

There was John Evelyn, English writer and diarist, founder of the Royal academy, who died in 1706.

What shocked him was women being on the stage at all. His idea was that a play isn't nice unless the woman characters are played by men.

Many agreed with him, in his period. But what would be said now about a proposal that no women be permited on the stage or in the movies in 1921?

New Windmill Idea.

A new French windmill, on the principle of the water turbine, is encased with a vertical cylinder bladed like a Venetian blind. The cylinder is stationary, but the blades or slats guide the wind from any direction to the turbine wheel. After acting on the wheel, the wind escapes from the bottom of the cylinder. The vertical shaft transmits the power through a succession of gears adapted to light or strong wind, and a centrifugal regulator controls the speed. The apparatus is designed especially for driving an electric generator.

The Cheap Kind.

The telephone bell tinkled and the big sister rushed over and grabbed the receiver.

"Goody, goody! Alice is going some place tonight!" shouted Mary, much younger.

But after warming the receiver against her ear for 45 minutes the elder sister sat down and resumed her reading.

"'Nother one of those telephone beaus!" exclaimed the pest—"talk, but never go any place."

Why Not?

"You know, on the other side of the earth it's a day later than it is here."

"I don't believe it."

"Well, I'll prove it to you. If you were in Australia and I was here and you were to be shot today I'd know it yesterday."

"Well, if you were a friend of mine you'd send me a telegram today telling me I'm shot."

A Resolution.

"See here," said Adam to Eve, "do you realize that the high cost of living is crimping me badly? You simply must be less extravagant in the matter of clothes."

"All right, dear," answered Eve, obligingly, "I'll help you to economize by turning over an old leaf."—American Legion Weekly.

WANT A SCARIFYING MACHINE.

College Will Furnish Plans and You Can Build it

The farm crops department of Iowa State College for ten cents in stamps will furnish blue print and information of the Ames Hulling and Scarifying Machine recently perfected by the Iowa Experiment station. Its manufacture was thrown open so that anyone could make these machines without any restrictions whatever. This machine has come into general use by all of the large seed companies and machine constructed in the United States have also been to various European countries. A large number of seed growers have made their own machines, varying the construction to suit their needs.

The only expensive things are the blower and annular spout. The blower is a regular forge blower open on both sides and costing about $10. The annular spout can be made by a good carpenter. The construction of the other parts of the machine may be varied as desired. The machine has been made at a cost of $5 exclusive to the blower.

The college does not recommend that all clover seed be scarified as there is no data that will justify such a recommendation. Much of the alfalfa, sweet clover, red clover. and alsike clover seed has a high per cent of "hard" seed with seed costs impervious to moisture, so that these seeds cannot germinate and grow. The value of such seed can be very much increased by scarifying. From numerous tests which have been made, the farm crops department is of the opinion that all sweet clover seed should be scarified, as the germination of such seed is often as low as 10 per cent. Much of the red clover and alfalfa seen on the market shows a relatively high percent of "hard" seed and should be scarified.

ONE WAY TO SELL FARM

Over at Coon Rapids one energetic farmer wanted to sell his farm for cash. He hired two of the best wrestlers in the state to put on a good wrestling bout. Sold he tickets for the match at $1.00 each. Each ticket had a number and after the match was over numbers were drawn. The person holding the number drawn was given the farm. Over 70,000 tickets were sold.

CATTLE TESTING POPULAR

Tuberculosis is Scarcce in Cerro Gordo County, Work Shows

Cerro Gordo County is after tuberculosis in its herds of cattle, according to the county agent, Roy F. O'Donnel.

Folowing a weeks work in co-operation with the veterinary extension service at Iowa State College he reported that over 800 cattle had been tested with the tuberculin test and very few reacted. Due to the eagerness of the farmers to have their herds tested, 457 were given the necessary treatments in a single day. "In one herd," says Mr. O'Donnell, "nine cows were being milked and one half of this milk was being used in the family where there were six children. All these cows reacted. As a result of this discovery there was a landslide of requests but fortunately. this was an extreme case and few cows effected was found.

SWINE FEEDERS DAY NOV. 15

Evvard Has Many Interesting and Practical Experiments to Show Iowa Feeders

How to produce pork at the least feed cost and with less labor and get a profit, how to feed mineral mixtures, how commercial feds compare with Iowa corn and how many other questions of special intrest to Iowa feeders and swine growers will be the subjects discussed at the Iowa Swine Feeders Day, to be held at Iowa State College. November 15.

According to John M. Evvard in charge of the swine experiments, the pigs he has been working with during the past year will be in the best shape to demonstrate the practical phases of his work.

Each year Mr. Evvard plans experiments that will be of the greatest help to the Iowa farmer. He takes ordinary corn belt hogs and places them under Iowa conditions and keeps tab on their life history. These results are of such practical nature that feeders and breeders come from all parts of the United States to get the results. Last year over 500 attended.

Work over the mineral mixtures will furnish one of the important parts of this years test, says Mr. Evvard. He has fortl lots to feed in this test and has used all kinds of mixtures.

Also he has been feeding all kinds of rations, practical and impractical, to find out what kind of a ration pays the best. Work with commercial feeds has been continued and furthur results on many other experiments under way will be announced. Feeding of clvers of all kinds in connection with rations, including the new Hubam White annual clover have been tried out during the past season and interesting results have been obtained.

Doll up your stove for winter

This is the time of year to "doll up" your stove for winter. We have a full line of stove accessories in stock and now is the time to fix up before cold weather sets in.

So why not rest it's tired little feet on one of our Stove Boards or rugs? You can "feed" it from a little shovel from a beautiful new hod, tickle it's ribs with apretty poker, brighten up it's dim old eyes with some new Isinglass, the sleeve a little worn perhaps so why not a new elbow? Did you know a stove wore a collar, sure, put a new wall collar on it and use stove pipe wire for the necktie. Stoves are also like girls—they like to be painted up, we handle the best stove enamel. Some stoves have the bad habit of smoking, when they do that it is a sure sign they would enjoy a new pipe, so why not get it one and let it smoke in peace.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

HOW TO SET A TABLE.

Slight not what's near through aiming at what's far.—Euripides.

IS THERE anything more unappetizing than a carelessly set table? All of us, presumably, should have a soul so far above buttons that we would not notice our food overmuch. But few of us have reached the happy state where we eat only to be nourished. Most of us are quite susceptible to dainty food and dainty service.

This being so, the economical housewife should appreciate the value of serving every meal daintily. For food that is enjoyed will be better assimilated and therefore will do its full duty of giving nourishment to those who eat it.

A nicely set table is the first requisite for the dainty service of a meal.

Spotlessness and neatness are essential to a nicely set table. No matter how simple the meal or how simple the table appointments, they should and can always be clean and neatly arranged.

At breakfast and luncheon doilies or runners can be used. It some houses runners are used even at dinner. If they are used—or if doilies are used—the table must be perfectly clean.

When a cloth is used first spread a felt or asbestos covering to protect the table and hush the sound of plates and silver. Then spread a cloth with the fold that marks the middle of it laid evenly from end to end of the table. Always fold the cloth in the same creases, and lay it neatly in a drawer until it is wanted again. Or else fold it only once lengthwise and then roll it on a wooden or pasteboard cylinder.

After the cloth is neatly laid, put on the silver. At the right of each place put the knives and spoons and at the left put the forks. At the end of the knives place a glass for water and at the end of the forks place a butter plate.

For an informal home dinner there should be a large knife next to the plate on the right for cutting meat, next to that a spoon for dessert and next to that a soup spoon. On the left there should be as many forks as will be needed—one for the meat, one for the salad and one for the dessert, or, if none is needed for dessert and there is no salad, only one fork should be placed. If oysters are served to begin with the oyster fork is placed at the right of the soup spoon. The butter spreader, unless it is large, is placed on the butter plate; if the spreader is large, it is placed next, on the right, to the knife for meat.

A centerpiece of some sort should be placed in the center of the table. Growing ferns or cut flowers can be used, or a little bowl full of evergreen leaves or foliage. A dish of fresh and beautiful fruit can also be used.

The napkin should either be placed at the right of the silver or else it should be folded and placed on the plate in front of each person. Of course, when clean napkins are not used every meal and the napkins are kept in rings, they should be placed at the right, or else in front of the plate, between the water glass and the butter plate.

Upon her recent arrival in Chicago, Mabel Normand, the winsome "movie" star, joined the decorators' union. She is seen at work here helping decorate a new million-dollar motion picture theater.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

DORIS.

THOUGH etymologists do not directly connect Doris with Dorothy, and some believe that she is merely a modern version of a feminine fancy for a name a trifle out of the ordinary, it is impossible to believe that her source was not identical with Dorothea and that strange but correct reversal Theodora.

Such being the case, Doris comes from one of the early Christian Greek names, notably Thekla. St. Thekla was said to have been a disciple of St. Paul and to have been exposed to lions at Antioch. Instead of tearing her to pieces, they crouched at her feet, but nevertheless she was considered the first virgin martyr, and no higher praise is possible for a woman than to compare her to St. Thekla.

From Thekla came the French Tecla and then through the Eastern church, Theodora, signifying "divine gift," and, much later, the incorrect Dorothea.

There have been two St. Theodoras, one a virgin martyr and the other a Greek empress.

Massinger composed a drama dealing with the story of St. Dorothea, the Cappadocian maiden who sent the roses of paradise by angelic hands as testimony of the joys of heaven. It is needless to go into the growth of Dorothea, followed by Dorothy, Dolly, Dora, and Dorinda. Her contractions, elaborations and diminutives are legion, but unfortunately history does not record what first enterprising mother named her baby Doris, though the name is almost as popular as Dorothy in England and America. Even Germany uses it. France alone finds it too harsh for her tongue and prefers the softer Dorette and Doralice.

The talismanic stone assigned to Doris is the agate, which gives her courage, guards her from danger and is also said to be a cure for insanity if worn as a pendant around the throat. Friday is Doris' lucky day and 5 her lucky number.

"Yes, but it takes a deuce of a lot of 'em to weigh anything."

ROPE.

THE art of twisting cords to make stronger cords is very ancient. In 480 B. C. we read of Xerxes building a bridge with heavy cables made of twisted smaller cables. It was not till the Middle Ages that rope-making became general. The first "rope-walk" in America was located in Boston. John Harrison was the proprietor.

DUCKS FOOL MR. FOX.

MADAM DUCK was tired of swimming, so she scrambled up the bank to look for bugs in the field by the side of the river. She was waddling slowly about, when all at once she espied a pair of bright eyes peeping at her through the tall grass. Madam Duck knew at once it was Mr. Fox, and that he was waiting for a stray hen or anything that passed that way. She knew, too, that if she had happened to be near him she would now be on her way to his cave in the woods. "While there is life there is hope," she thought. "I will try to fool him."

Madam Duck began to limp. She spread her wings and let one drop, as though she had been wounded.

Of course Mr. Fox thought Madam Duck had not seen him, and when she limped he crawled slowly toward her.

"Some hunter has wounded that duck," he thought. "I will have to keep a sharp lookout that he does not see me, but I am thankful to him for helping me to get this fine bird, for I shall not have to hurry. She cannot get away."

Every time Madam Duck flapped her wings she made a wider space between her and Mr. Fox, but she was careful every time to let one wing drag as she limped along.

"I am sure to get her," he thought, "so why run? It is a very warm day and, besides that, the hunter may be lurking about."

But when Madam Duck reached the river bank she seemed to be able to use her wings and legs without any trouble, and before Mr. Fox knew it she was at the water's edge.

"I am not going into that water after her," thought he. "I will grab her right off and end it."

Mr. Fox leaped for Madam Duck, but his front feet caught in a trailing vine, and down the bank he went heels over head and landed in the deep mud of the river.

He struck nose first, and while he was trying to get up Madam Duck sailed gayly away, calling back to him as she went:

Oh, Reynard thought he had me—
He thought I could not fly,
But that's the time I fooled you, sir—
Good-by, Mr. Fox, good-by!

Reddy Fox crawled up the bank a sadder but a much wiser fellow, his mouth and nose filled with mud, and as he cleaned his coat and made himself tidy he thought:

"Sing your good-by song, Madam Duck, while you can, for if I ever meet you again it will be the 'Swan Song' you will sing—I promise you that."

But Madam Duck knew better than to go to the field again, and I expect she lived to a good old age, in spite of Mr. Fox's threat.

Radio Time.

How useful it would be to watchmakers and repairers to have a simple wireless telephone outfit with which to receive the daily time signals, is brought out by H. Gernsback in the Radio News, New York. He says:

"If once the jeweler sees how simple it is to work a time-receiving radio outfit he will soon become enthusiastic, and, as many of his tribe have done, will even go so far as to put the outfit in a show window in order to attract trade. We know a jeweler in the South who uses a loud talker outside his window, where everyone for half a block around can hear when N. A. A. seconds out the time at noon."

COME TO THE

International Aero Congress

Omaha, Nebraska—November 3, 4, 5, 1921

If you want to take part in an event unparalleled in aviation history—something that will grip your attention and hold you spellbound—something so elaborate—so gigantic—that it will be the talk of the world—come to Omaha for the first International Aero Congress, November 3, 4 and 5.

THE BIGGEST, MOST SPECTACULAR AIR EVENT EVER HELD

The program for this Aero Congress is complete in every detail. Scores of aircraft from the world's greatest engineers will be on exhibit, and take part in the attention-gripping

AIR DERBIES · AIR RACES · ALTITUDE TESTS
BALLOON ASCENSIONS · PARACHUTE DROPS
STUNTS, SPRINTS, CLIMBS
THE BOMBING OF A FRENCH VILLAGE
MORE THAN $10,000 IN CASH PRIZES

Special entertainment—parades, dances, banquets, reunions, boxing exhibitions, etc. Every minute of your time will be enjoyed.

IMMENSE EXHIBIT OF THE LATEST AIRCRAFT CREATIONS

Speed planes, battle planes, flying boats, balloons, blimps, passenger ships—every type of aircraft will be shown. Plan to purchase your airplane and air equipment during the congress.

GRAND REUNION OF AIR MEN

Thousands of flyers will be in Omaha for the Congress—from all the world. See your former "Buddies" and help form a national air body for the advancement of aviation.

ROUND CORN CRIBS for sale at Jacobs & Son hardware store. o-20tf

"Bobby" Henshen and Herman Miller drove to Mason City Sunday.

Mr. and Mrs. Wes Lau, Erwin Lau and Baumgartner, were at Mason City Sunday.

Mrs. H. Harbert and daughter, of Goodell, were visiting in this city. Tuesday.

Mr. and Mrs. Howard Doyle left Tuesday evening for a few days visit with his folks.

A fine baby boy is reported at the Lee Price home. The young man arrived Monday morning.

Mr. and Mrs. Harm Rust, of Goodell, were visiting at the George Platt home here Sunday.

Mrs. D. A. Brooks, and son John of Belmond, were callers on Mrs. J. W. Brooks Sunday.

Bert Mathews and W. H. Trafford and family drove to Belmond Sunday for a visit with friends.

Howard and George Wilson came from Wisconsin Saturday to begin picking corn in this vicinity.

Mrs. O. P. Brooks and children from Clear Lake were visiting with Klemme relatives and friends Sunday.

Mr. Arthur Wellemeyer left for Dubuque, Iowa, Sunday evening and returned Monday evening on a business trip .

Rev. Bushnell. of Algona, who is the district superintendent of the Northwest Iowa Conference, was a business visitor in Klemme yesterday.

The basement for the new meat market building has been completed. The Baack Bros. will put up a two story building, so we understand, the second floor of which will be used as a flat.

Somebody rang the fire bell a few taps the other night about two o'clock. They thought it was a very smart joke to get the people up at that time of night for a false alarm.

A PLATE SUPPER and Pie social to be given on Friday evening, Oct. 28, 1921, at District No. 2, Avery township. A program will be given and Mr. Lee Nutty, Co. Agt. will speak. Everybody come. Mrs. Nettie Roths, teacher. 2wc

M. A. Fell of Garner was in town this week on business. His building where Doc. Thomas has his office is two far over the line and he has to cut it back. The new Baack building goes up to the east of it and he had to make room.

The sale held Tuesday by the State Savings bank on the Fred Ax farm one mile north of Klemme went off like a bang. Everything sold well and brought good prices. There will be a number of sales in this vicinity this fall and winter.

"Scotty" Irwin has purchased a resturant business at Floyd. Iowa, near Charles City. He will take possession of the businesc next week "Scotty' says it is a fine place, a new brick building, furnace heated, on the pavement between Charles City and Mason City where many tourists pass each day.

Luvern Smith made a journey to Belmond Sunday. He made part of the ttrip in a car with gasoline, tthe later part of the trip he had a farmers team hitched to the "Lizzy" for motion power. But, Luverne never gives up and the girl was not dis appointetd.

G. A. Kaler, and sons Emmet and Ray, drove down from Dexter, Minn. last week on business and also for a visit with Klemme relotives and friends. Mrs. Earl Kaler, who has been visiting at the home of her parents here, Mr. and Mrs. Chas. Velau, for the past three weeks, returned to Minnesota with the Kahlers, where she will go to her home at Big Lake.

Farmers, why not use printed stationary in your business corresponden ce? We have printed stationary for a large number of farmers lately. The farm is the biggest business in Iowa and it is businesslike to use to use high grade printed stationary the same as other business men use. Just drop in the Times Print Shop next time you are in town and let us show you the advantages of printed stationary.

The following families drove to West Bend, Iowa, last Sunday to view the Grotto: W. F. Pavey and family. Dr. and Mrs. J. L. Hesselhuus, August Baack and family, Clarence Kluckhohn and family and Frank Gruetzmacher and family. The Grotto has attracted quite a number of Klemme people this year. It is constructed of manp kinds of colors of rock from all over the world and is quite a sight.

Saturday afternoon, of this week, at 2:00 o'clock a big sale of Pure Bred Duroc Jersey boars and gilts will take place.

This pig sale The offering consists of 49 head—the pick from five local herds of Critic Sensation and Big Pathfinder blood lines.

This promises to be one of the best sales in this part of the country this fall.

The owners of the hogs are F. H. Schuldt, Clinn and Lillian Mann, J. P. Larsen and sons, Frak Buss ad Robt. Roths.

For further details regarding this sale turn to their big ad elswhere in this issue.

RECEPTION GIVEN REV. BERGMAN AND FAMILY

Many Gather To Welcome Family

The members of the First Methodist church gathered at the Frank Gruetzmacher store last Friday evening at seven thirty o'clock to form a surprise party and reception on Rev. Bergman and family, their new pastor and from there went to the parsonage.

A fine program had been arranged for the evening. The choir gave a few numbers as also did the male quartet. The address of welcome was delivered by Prof. H. E .Wilson and responded to by Rev. Bergman. A social time was then enjoyed in making the acquaintence of the new family, and visiting. At a late hour a nice lunch was served after which the party disbanded.

Rev. Bergman and family are fine people and they are welcomed to the community.

CLARION FARMER BATTLES WITH MAD STEER

The Clarion Monitor of last

week contains the following interesting item: "Nels Nelson was assist- Adam Seifert in driving some cattle to the Great Western stock yards. The steer which had a reputation for being fractious, took a tantrum opposite the W. H. Milnes residence and charged Mr. Seifert's team. Nelson sprang to protect the team and became the steer's target. He seized the animal by the horns but was thrown to the ground. He recovered himself but was swiftly attacked again. This time he threw his arms around the animals neck. The now infuriated steer braced itself for another attempt to gore its victim when its hind hoofs slipped on the cement pavement and it received a serious injury, for it staggered a block up the street and lay down in front of the Henry Thomas home, where it died a half hour later.

Mr. Nelson was examined by a physician who found no injuries but twisted rib and some severe bruises, certainly a lucky escape.

All railroads lead to trouble.

REV. BURIFF TO MOVE TO GOLDFIELD CHARGE

On account of changes since the conference a number of ministers are being moved about to other and larger charges. Rev. A. E. Buriff of this place was among those who receive larger and better salaried churches and he goes to Goldfield.

Tis comes as a surprise to the people of Klemme for the conference had assigned Rev. Buriff to this city for another year and they were all highly pleased to have him here for that time. But as Dist. Supt. Rev. Bushnel made some important and new changes since then Rev. Buriff was thrown in line for a larger and better charge also.

He and Mrs. Buriff will leave the latter part of this week for their new location at Goldfield.

We have not learned who has been assigned to Klemme in place of Rev. Buriff.

REV. W. F. ORTMEYER, FOREST CITY PREACHER MOVVED

FOREST CITY, Ia., Oct. 27—A big surprise has been given the people of the Methodist church by the announcement that the Rev. F. W. Ortmeyer has been transferred to Emmetsburg. The Reverend has been assigned to this charge at the late conference, for his fifth year, and everybody was more than pleased that he should be returned. However, the change came because of previous arrangements which had been made to transfer the minister at Emmetsburg to a charge in California.

"SKINNY" HUNT VICTIM OF BOLD HOLD UP MEN

Take His Cadillac Car, Valuable Ring and $265 In Cash

Howard, better known as "Skinny" Hunt, formerly of Garner and now Mason City taxis driver, was held up at hs garage in Mason City Monday night at two o'clock as he was returning from a drive by three masked men armed with revolvers.

Hunt was forced, at the point of guns to drive the bandits eight miles out in the country in his Cadillac car. where he was ordered to stop, robbed of a $1,400 diamond ring and $265 in money. They then threw him out and bidding him good bye in a gentlemanly way and told him his car would be in Chicago before many hours, speeded on their way in a westerly direction.

Hunt walked to a near by farm and phoned the police who have sent out a statewide notice to sheriffs and police.

His big car had yellow wheels, a tan top and the initials "H. H. H. on the door.

Hunt is well known here.

A pessimist argues that every silver lining has a cloud.

COUNTY RED CROSS NURSE GIVES OUT REPORT

The committee on Nursing Activities met at the Court House on Wednesday, Oct. 19, according to a communication to the Times from Miss May Ferleman, County Red Cross Nurse.

At this meeting the officers of the past year were re-elected; Mrs. W. S. Pritchard, Chairman, and Rev. E. D. Calkin, Secretary.

Mrs. Elmer Schneider was elected County Chairman for the Tuberculosis Christmas Seal Sale.

Mrs. L. W. Wesenberg of Goodell, Chairman for Avery Township, resigned and Mrs. Fred Chase, of Goodell, was appointed Chairman for Avery Township.

Miss Ferleman gave the following report of work in the schools since September 1st, 1920.

105 rural schools visited once and 63 of these visited second time; and several visits made to town schools.

2861 children examined.
2898 weighed and measured.
117 7% or more underweight.
1440 with defects of teeth.
1409 with defects of nose and throat.
108 with defective hearing.
566 with defects of vision.

Corrections Reported—

81 Surgical corrections.
110 dental corrections.
55 corrections of vision.
245 Health Talks to pupils in the class.
468 home visits.
Nursing care to 45 patients.

Since September 6th, 1921, Miss Ferleman has spent her time in the rural schools, having visited 53 schools.

744 pupils examined.
453 of these have defects.
219 defective tonsils.
277 defective teeth.
174 defective nasal breathing.
108 defective vision.
6 Strabismus.
8 skin infections.
808 weighed and measured.
264 7% or more underweight.
51 Health Talks to pupils in the class.
10 home visits.

Many children have been interested through Health Talks and the Health Crusade in forming better Health Habits, also a great many children who are underweight are stimulated to greater interest in gaining and improving their physical condition.

Miss Ferleman is making every effort to interest the rural teachers in the Hot School Lunch as a means of improvement of physical condition and better health for the rural school children.

It is hoped that all parents will show greater interest and co-operate with this work for the next year.

"Four hundred of New York's fattest will reduce." says a news item. As a slogan we suggest "Reduce or bust."

Klemme Tourists Reach Los Angeles In Auto House

LETTERS IN POSTAL ROBBERY RETURNED TO KLEMME OWNERS

Many Checks Were In Looted Mail

We were quite surprised Monday morning when Postmaster J. W. Waterman brought us some letters which had been opened and checks taken out but which he returned to us with the letters. He told us that the letters had been through a mail pouch robbery at Iowa Falls on the night of Sept. 5th. Other business houses here also had checks returned to them. Evidently the robbers got "cold feet" for none of the valuables had been tampered with after having been opened.

FAREWELL PARTY GIVEN TUESDAY EVE. FOR BURIFFS

Trafford Family Also Surprised

The members of the Methodist Episcopal church gathered in a body at the Idle Hour Theatre Tuesday evening to give a farewell surprise party on Rev. and Mrs. A. E. Buriff who are leaving this week and also on the Wm. Trafford family who go to Belmond to live, after ten years of residence here and active workers in the church.

The gathering called first on the Trafford family who then joined the throng who then went to the parsonage of Rev. and Mrs. A. E. Buriff, where a number of songs were sung. Rev. Buriff was unable to go to the party with his church people as he had ben ill for several days, but Mrs. Buriff joined them. Games of all kinds and general visiting was the program at the hall.

Rev. and Mrs. Buriff have made many friends in Klemme and vicinity who regret that they are leaving but extend best wishes to them in their new charge at Goldfield.

All had a good time at the farewell party.

NORTH IOWA PIKE PAVING TO BE OPENED TOMORROW

The connecting link of the all paved road from Charles City west to Garner will be opened to public travel tomorrow, Friday, Oct. 28.

The State Highway Commision allowed this last strech of paving to dry twenty-eight days on account of the cool weather, which formerly would dry in twenty-one days.

With the finishing of the last lap gives the North Iowa Pike practically a solid ribbon of concrete paving from Charles City to Garner.

MELLON APPROVES BEER

Will The Suds Come Back Again?

A dispatch from Washington, D. C,. states that Secretary of the Treasury Mellon on Monday approved and signed regulations provding for the manufacture and sale of beer for medicinal purposes.

Later articles state that permits can be issued to individuals for two gallons and a half, or a case, of beer, but does not state how often one can get the permitt desired. But even a case now and then will satisfy the man who likes his "stein of suds now and then."

There was also a provision made for the sale of light wines.

All together boys on the chorus, "How Ddy I Am!"

HORSE AND SADDLE STOLEN THIEVES LEAVE FINE CAR

MESERVEY, Ia., Oct. 27—Thieves stole a horse, an old saddle and a bridle belonging to Mr. Culp. a farmer near here last Thursday night. They were gentleman bandits for in place of old Dobin and the saddle they left a valuable automobile in the barn.

The horse was later found on the streets of Belmond without the saddle and bridal, which the theif or thieves had evidently sold or hid.

Los Angeles, Calif.
Oct. 19. 1921

Friend Jergy:-

We are now in Los Angeles California and everything is going fine. The weather out here is sure hot. A person can't hardly find a cool place to rest. We are located in Alication park and is sure is a dandy. We are one and one-half miles from Lincoln Park, we went by it but we did not notice it at all.

How long we will stay here I don't know, yet this afternoon I will try to find my brother and if he has lots of room we may go there.

Now a little about our trip since Holbrook Ariz. we have seen some country. Talk about roads I never seen the beat. Chas. claims that if a jack rabbit tried to cross it he would cut his feet, its simply all rock. and bumps. Now and then a person will find a few miles of pretty good roads and after we left Needles Calif. we hit the desert, and it sure was hot to travel. One place we was circling around a mountain and it was quite rough and all at once the engine was afire, some excitement! I crabbed the fire extinguisher and suceeded in getting it out.

That was the linament.

We left Ariz. last Friday at Topac crossed a big bridge, and sure was glad to get out of the desert. We drove up to a place thats called Summit California, and there all at once we hit the pavement and went down hill for thirteen miles before we hit the bottom. When we hit San Berdino Calif. there the fruit yards started and believe me that made Chas smile. We sure filled up on oranges and grapes. At the first place we come to Chas bought a crate of grapes and he sure pilled into them, that isn't all we went down further and saw oranges and he bought a crate of them and a pack of apples.

The orange trees out here are almost breaking down with oranges The grape season is almost over now but a person can get all the grapes he wants out here only its too hot to suit me. I am sweating like everything right at present now, writing.

Well Jergy I don't know where we will go next but we may go to Frisco yet and maybe to Oregon and Washington. I will write again in about a week. Best regards to all Klemme people. Tell Croner, Doyle and Hocum not to get al the Duck's and leave a little for me next fall.

Yours Truly,
Kuck. Stiehl and family.

PLAN FOR GREAT CORN SHOW

Use New Armory for Annual Exhibition of Iowa Corn and Small Grain Show

The Iowa Corn and Small Grain show will be held at Ames in the new armory building January 30 to February 4, according to J. L. Robinson, secretary who has completed the preliminary arrangements.

This show which is the largest in the United States and which last year had 10,000 ears of corn on exhibition draws corn from all parts of the state to compete for the $1500 in cash prizes and 119 silver cups, valued at $5,000.

A special feature of this years show will be a miniature exposition at which all departments of the college will display their work in booths similiar to those used at the Iowa State Fair. Due to the unusual size of the armory, which covers an acre of ground this is possible.

Corn from the corn yield contest which is staged annually in Iowa and which has been called the best and most scientific yield test ever conducted, will be exhibited and awards made.

Many varieties of the smaller grains are featured at each show and tis part of the exhibition was larger last year and a greater number of entries is expected this winter.

Premium lists are being prepared and will soon be ready for distribution and can be had by addresing the Secretary J. L. Robinson, Ames. E. N. Bressman is superintendent of exhibits.

What Raindrops Mean to Farmer

Crop Reports Indicate Difference Few Showers Make in Humanity's Scheme of Things.

BIG PART PLAYED BY NATURE

Takes About 2,260 Tons of Water to the Acre to Grow a Food Crop—Process of Evaporation Yields Chemicals Valuable as Fertilizer.

Washington, D. C.—"Rain might be looked upon as the oil which lubricates the world's economic machinery," says a bulletin issued from the Washington, D. C., headquarters of the National Geographic society in connection with recent reports of world-wide drought damage to crops.

"With the smallest estimated cotton crop since 1893," continues the bulletin, "with spring wheat in poor condition at home as well as in many of the other wheat countries of the world, with other important crops below their average, and with drought cast as the villain, or at least as an accomplice, in each case, the difference that a few showers make in humanity's scheme of things is strongly emphasized.

Depends on Rainfall.

"While everybody realizes in a general way that the world depends on rainfall and fertility for food, there are very few, perhaps, who even approximately appreciate how comparatively little the farmer actually does in the great process of crop-growing. To plow millions of acres furrow by furrow, to spend millions of dollars on fertilizers, and to reap and gather and thresh, is no mean task. And yet compared with the part that nature plays in the process, man's work seems a very slight labor. For instance, it takes about 20 inches of rainfall to grow a food crop under our general farming methods, which means about 2,260 tons of water to the acre. That seems a preposterous figure, but the doubter can easily demonstrate its correctness. Suppose the American farmer had to haul the water his ground must have to give him a good crop, and that the distance and freight rate were the same as the average railroad haul and rate in the United States. On that basis it would cost him more than $4,000 an acre to water his place.

"But not only would his water bill be nearly half a million dollars on a 100-acre farm, but his fertilizer bill, also, would amount to a neat little sum. It is estimated that in the process of normal evaporation, soil water presents the rootlets of its neighborhood with about fourteen pounds of ammonia a year to the acre. Also, it gives them some 57 pounds of potash. With sulphate of ammonia costing only 2 cents a pound (it cost 5½ during the war) and a hundred pounds of the sulphate required to contribute 17 pounds of ammonia, it will be seen that the process of evaporation gives the rootlets $1.65 worth of ammonia to the acre.

Automatic Fertilization.

"When the World war cut off German supplies of potash and it soared to $400 a ton, geologists scoured the United States for the priceless fertilizer with little success. Yet the process of evaporation generously hands out more than half a hundredweight to the acre, in war and peace. This automatic fertilization is worth an additional $2.50 an acre to the farmer at present prices, and would have cost him $10 an acre at war prices.

"From this it will be seen that the $12 to $25 an acre that it costs the average farmer to grow wheat is a small figure indeed, compared to what he saves by having nature as his water wagon and fertilizer source."

Left Husband 150 Times in 14 Years' Wedded Life

Helen Caldwell of Detroit, Mich., left her husband, John, 150 times during their married life from 1907 to 1921, John told Judge Harry J. Dingeman. He asserted his wife was fond of dancing; that, on coming home from work at midnight, he would find her little boy sitting on the front steps waiting for him and that his wife would come in later, saying she had been to a dance. He was given a decree.

Cattle Rustlers Busy.

Houston, Tex.—The old cattle rustling days are coming back to southern Texas.

Wholesale cattle thefts here and in surrounding counties have been reported. Deputy sheriffs armed with search warrants visited a farm nine miles from here. They found the hides and heads of three calves. The brand had been cut off.

Officers say there is a ring of cattle thieves operating in the state.

Russ Princes Ask U. S. Brides

Refugee Noblemen in Turkey Are Perfectly Willing to Marry for Money.

HOPE TO GET BACK ESTATES

Many Refugee Russian Women Have Married Turks in Order to Get Temporary Homes—Still Retain Their Politeness and Courtesy.

Constantinople.—The arranging of marriages between Russian princes and well-to-do American women is the latest scheme advanced here by an ingenious Russian to get a livelihood for workless, penniless refugees living on American and other charity.

It is argued that the American woman would, in addition to the title, make a good business bargain, since the exiled Russian noblemen all have large estates which they hope to recover when private property is restored and Bolsheyik Russia is no more.

Many Russians have open minds on the marriage question. Many of the refugee Russian women have marrried Turks since their arrival here, in order to get temporary homes. The Russian men have followed suit. Many of the older ones have married Greek women.

And Age Has Its Weddings.

"Youth has its follies, age its stupidities," said a Russian general, no longer young, when inviting a friend to his wedding.

The difficulty of locating these American wives across the seas is not one to stump the imaginative Russian mind, which readily adapts itself to the lighter branches of commerce, and has succeeded here with cafes, beauty parlors, manicure and tea shops, concert halls and public grounds.

The first and only bathing pavilion near here has been established at Floria beach, on the Marmora sea, by a group of Georgian princesses, through the loan of American Red Cross tents.

Men Are Out of Luck.

The condition of Russian men refugees here is bad, as there are few industries or factories to provide work. Recently the French government cut off its food rations to several thousand men, though still feeding a certain number of children, women and old men.

It is hard for them to get passports to go to other countries. Serbia has accepted some 20,000, but her leniency to refugees is finding its limit.

Prince Golitzy, who formerly held immense estates near Kiev, and may recover them, among hundreds of others, is attempting to earn a living by utilizing his knowledge of precious stones of which he once had a large collection.

Such men often lose their clothing and baggage to rapacious landlords who serve them in default of the payment of room rent, but the Russian aristocrats never lose their politeness and courtesy in adversity.

They still kiss the hands of the women, after the manner of their country. Often cheerful and courageous in the face of poverty, they share their last money with friends.

Making Bust of President Harding

Mrs. Sally Farnham, noted sculptor, is shown working in her New York studio on her bust of President Harding, nearly ready for the casting.

HANGMAN OBJECTS TO SLURS

Declares He Is a Perfect Gentleman and That His Calling Is Honorable and Useful.

Budapest.—The hangman of Hungary has risen to indignant defense of his calling and denounced those who cast slurs upon it. He was prompted by sneering references made in the Hungarian national assembly. Friends of former Emperor Charles and the anti-Hapsburgs are always quarreling there, and in some cases have shouted at one another, "The hangman is your friend."

Michael Ball, the official hangman, has resented such slurs.

"My vocation," he writes to the president of the national assembly, "is as honorable and useful as that of judges, lawyers, ministers or kings. Why should the old superstition hold in modern times that the hangman's profession is disgraceful, abominable and loathsome? My friends are all perfect gentlemen and any member of parliament can consider it only flattery when he is called my friend."

WIRE FENCE PHONES ARE IN USE

Farmers in South Dakota Use the "Barbed-Wire System."

County Agricultural Agent Assists Farmers to Install System at Cost of Less Than $20 Each.

(Prepared by the United States Department of Agriculture.)

Washington.—There are still many rural homes that do not have telephones and, as at present economy in all lines is imperative, interest is reviving in the "barbed-wire system," which was more or less common in parts of the West 20 years ago.

In Carson county, South Dakota, the county agricultural agent has assisted farmers to install such a system at an average cost of material per farmer of less than $20. Carson County is 87 miles long and very sparsely settled, although the agricultural lands are fenced. Standard telephone lines appeared to be too expensive, yet there was a great need of facilitating communication. The county agent furnished information regarding the cost of installing the line, using porcelain nail knobs for insulation, which cost about $5 per mile. These knobs work satisfactorily when the barbed wire is tied to them with a short piece of wire.

In order further to reduce the cost some farmers tried pieces of rubber cut from automobile inner tubes as insulators. Pieces of the tubing 1½ inches square were wound around the barbed wire and fastened to the post with staples. The county agent reports that this insulation is giving satisfaction, although, of course, the rubber will deteriorate in time.

The farmers were able to obtain second-hand phones at from $5 to $20 each and 50 cents bought a lightning arrester, so that the total cost per farmer was comparatively nominal.

Each farmer has his own special ring, so there is no expense for a central. It is possible with a system like this to connect various parts of the farm or distant barns with the house, or the tenant house with the farm home, at a very low cost. While such a system leaves much to be desired in the way of service, it meets an emergency and can be made to answer, pending the coming of times when conditions will warrant a more expensive and more satisfactory system.

Dogs Rout Tobacco Pests.

Marietta, Pa.—Martin S. Stoll, a tobacco grower, who resides on a farm several miles east of this place, has two dogs, one a spaniel and the other a fox terrier, which he has trained to hunt worms from his tobacco. From the time they enter the patch until they leave they are busy with their noses, sniffing and smelling tobacco bugs from the leaves. They take the worms from the leaves without damaging the plants, and as a result the tobacco on the Stoll farm is among the finest in the country, being almost free from worm holes.

Home Town Helps

BACK YARDS MADE BETTER

Contest Spurs Boys and Girls of Findlay to Beautify Their Home Surroundings.

More than 100 back yards of Findlay, O., now look better than most Findlay front yards as a result of an idea of Council President Frank J. Collingwood, whose hobby is attractive environments for the home.

Mr. Collingwood enlisted the support of the local Rotary club and the Chamber of Commerce in what he termed a "better back yard" contest as a means of heightening juvenile interest in Findlay in improved yards and home surroundings, and at the same time bettering the community's outside appearance.

A list of eleven prizes was announced for the contest—one a grand prize for either a boy or girl, five for boys and five for girls. Mr. Collingwood himself furnished the money for the prizes, to the extent of several hundred dollars.

The Chamber of Commerce took charge of the routine of the contest and when the lists closed for entrants there were a score more than 100 in the race for the coveted awards.

The contest lasted a little over a month, in which miracle transformations were wrought in many back yards in the city, by the youthful contestants. Working entirely alone, boys and girls in many instances, the judges reported, had to start with nothing but dump heaps, rough, weed-covered plots and the like. But hoes, rakes and spades, coupled with a generous amount of energy and above all a desire to win one of the eleven prizes, brought results, which were remarkable, according to the judges.

In making the awards, it wasn't alone the neatness of the yards that counted, but the condition of the yard at the start was taken into consideration as well and the progress that was made had a great deal to do with the award. Gardens were a part of the required work.

"There must be some real value in yard beautification, or large concerns wouldn't spend thousands of dollars in it every year," said Mr. Collingwood in presenting the prizes. "In fact, I am told it does pay real interest on the investment in better satisfied employees who like attractive environments in which to work."

BUILT IT WITH POTATOES

How the Citizens of Patricia, Alberta, Obtained Their Much Needed Town Hall.

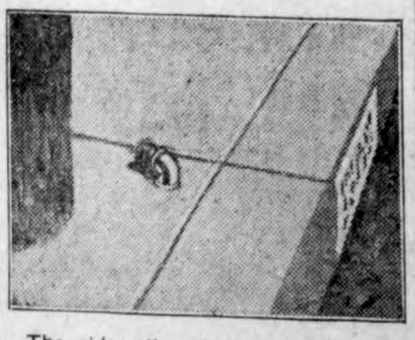
Patricia needed a town hall. Being only two years old, this was a problem to the infant village in the southern Alberta prairies. Ways and means were discussed. It was finally decided to build it with potatoes.

Twenty acres were plowed and planted to spuds. Breaking the land, seeding and cultivating were all done by volunteers. Everybody took a hand. The community potato patch now promises a heavy crop.

The entire town tends it. When the first potato plant peeped above ground it was a municipal event. The town fathers called a mass meeting to take action when a vagrant rooster scratched up a plant. Discovery of a weed that had escaped the community hoes caused as much excitement as a fire alarm. The potato patch is looked after as tenderly as if it were the town's baby.

Two years ago the entire country abont Patricia was open prairie with not a human habitation in the round of the horizon. The first house was built in 1919. Today there are 20,000 acres under cultivation.

FOR SAN DIEGO LAWNS



The sidewalks of San Diego, Cal., are equipped, at intervals, with hose connections placed near the curbs, for the convenience of property owners in sprinkling the sidewalk or lawn.—Popular Mechanics Magazine.

Many Homes Too Crowded.

Many people have an unnecessary amount of hangings and draperies, ornaments, knick-knacks, and other dust harborers about their houses; rooms have too many ornamental moldings, books, crannies, and corners about them; and all these harbor dirt and dust, and time will not allow them to be cleaned except on quite rare occasions, which may be annually at the time called "spring cleaning." Carpets may be very well in their way, and make a room more cozy, but it is certain they are not so cleanly as linoleum or stained and polished floors, with a few rugs or mats placed where required, and easily taken up and freed from dust.

POULTRY CACKLES

PREPARING MARKET POULTRY

Fowls Should Not Be Given Any Hard Feed From Eighteen to Twenty-four Hours Before Killing.

(Prepared by the United States Department of Agriculture.)

Poultry should be kept without any hard feed from eighteen to twenty-four hours before killing, but a light meal of soft feed can be given up to twelve hours before killing. Water should be given them up to time for killing, say poultry specialists of the United States Department of Agriculture. When ready to kill, suspend the fowl by the legs and, using a knife, cut the vein at the back of the throat through the mouth. As soon as this vein is cut run the point of the knife through the roof of the mouth into the brain and give the knife a slight turn, which causes the bird to lose all sense of feeling.

In most markets dry-picked birds are preferred. Immediately after killing,

Capons Properly Dressed for Market.

while the birds are still bleeding, the picker should remove the feathers, being careful not to tear the skin. If the picker waits until the bird is partly cold, the feathers will be difficult to remove. As soon as picked the fowls should be hung in a cool place until thoroughly cold. If the weather is warm and fowls are to be packed in ice where no cold storage is available, they should be placed in a tank of ice water until all the animal heat has left the body.

When birds are scalded before removing the feathers they are immersed in hot water, which should be a little below the boiling point, as soon as they are through bleeding. They should be immersed three or four times and then picked clean. Be careful not to overscald, as this will cause the outer surface of the skin to rub off. If fowls are to be shipped dry, they should be hung up until the skin becomes thoroughly dry. If they are to be packed in ice, they should be left in cold water several hours or until they are to be packed.

TEACHING CHICKS TO ROOST

Difficult to Keep Young Fowls Clean When Permitted to Remain on the Floor.

It is often advisable to teach the chicks to roost when 8 to 12 weeks of age, say poultry specialists of the United States Department of Agriculture. When they are allowed to remain on the floor, it is difficult to keep them clean and to keep them from crowding. If wide roosts—3 to 4 inches—are used, there is but little, if any, more danger of crooked breasts than if the chicks are allowed to remain on the floor.

The chicks can generally be taught to roost by putting the perches near the floor, but if this plan is inconvenient or does not prove effective the chicks may be placed on the perches after dark for a few nights until they have learned to go there of their own accord. Where a large number of chicks are brooded together around a brooder stove it is a good plan to place roosts in the house when the chicks are four to five weeks old, so that the larger and stronger chicks will start using the roosts while the weaker chicks still stay around the brooder hover.

POULTRY NOTES

Don't see how many chicks you can hatch out, but rather how many you can raise at a profit.

* * *

Keep the poultry, as well as all other living things on the farm, on good terms with you by keeping on good terms with them.

* * *

There is mighty little money in fowls that are always kept hungry, but there is also a difference between well-fed and overfed hens.

* * *

Don't try to see how many fowls you can keep, but how well you can keep them. Don't overcrowd your houses or yards; crowding is dangerous.

* * *

By the way, don't forget about lice. Sometimes they are hard to find, but it is ten chances to one that they are present and they should be exterminated immediately.

MRS. HAYDOCK SAVED FROM AN OPERATION

Followed Advice of Druggist's Wife and Took Lydia E. Pinkham's Vegetable Compound

Chicago, Ill.—"I was in bed with female trouble and inflammation ... had four doctors ... none of them did any good. They ... said I would have ... have an operation. A druggist's wife told me to take Lydia E. Pinkham's Vegetable Compound ... I took 22 bottles ... never missing a dose ... and at the end of ... time I was perfectly well. I have not had occasion to take it again as I have been so well. I have a six room flat and do all my work. My two sons are taking the Compound upon my recommendation and you may publish my letter. It is the gospel truth and I will write to any one who wants a personal letter."—Mrs. E. H. HAYDOCK, 4 St. Lawrence Avenue, Chicago, Ill.

Because Lydia E. Pinkham's Vegetable Compound saved Mrs. Haydock from an operation we cannot claim that all operations may be avoided but many women have escaped operations by the timely use of this old fashioned root and herb medicine.

Free Kindling Wood.

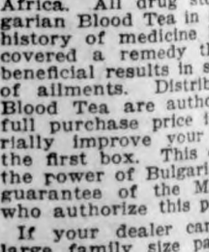
The city of Lynn, Mass., has established a dumping ground for boxes, barrels, etc., from which citizens are permitted to help themselves to kindling wood.

It's an ill wind that blows coats to the predictions of the weather prophet.

Help That Aching Back

Lame in the morning! A dull backache all day long! Worn out when evening comes! The same old round of suffering! To endure such misery is both foolish and unnecessary. Find the cause of your trouble. Likely your kidneys and that nagging backache may be Nature's warning of kidney weakness. You may have sharp stabbing pains, a depressed feeling and later irregularities. Don't risk more serious kidney trouble. Help your weakened kidneys. *Doan's Kidney Pills* have helped thousands. *Ask your neighbor!*

An Iowa Case



Mrs. Al. Gilbreath, 122 W. State St., Denison, Iowa, says: "I was in miserable condition on account of my back being so lame I could hardly walk and my kidneys were disordered. I had sharp pains in the small of my back and my kidneys acted too often. I was advised to try Doan's Kidney Pills and in short time they gave me relief."

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

The Beginning of a New Life

Bulgaria and Oriental Europe Produce Hardy Race of People.

Do you want to feel from 10 to 20 years younger?

Do you want to know the joy of Perfect Health?

Bulgarian Blood Tea, used for centuries by the natives of Oriental Europe, is the most remarkable medicine for the human family known in the world today. Composed of rare herbs, roots, barks, seeds, leaves and flowers, just brewed by yourself and taken once or twice a day, it assists nature to vitalize, purify and enrich the blood.

It will be the beginning of a new life for you. Headache, biliousness, constipation, sour stomach, gas around the heart will begin to disappear. Unsightly pimples, blotches and muddy complexion will clear up when your blood is pure. Bulgarian Blood Tea is guaranteed to contain just pure herbs of marvelous medicinal and curative power gathered from the rich soils of Europe, Asia and Africa. All drug stores now keep Bulgarian Blood Tea in stock. Never in the history of medicine has there been discovered a remedy that has given such beneficial results in such a large number of ailments. Distributors of Bulgarian Blood Tea are authorized to return the full purchase price if it does not materially improve your health after using the first box. This evidence of faith in the power of Bulgarian Blood Tea and the guarantee of the Marvel Products Co., who authorize this public announcement.

If your dealer cannot supply you, the large family size package will be sent postpaid and insured for $1.25.

For Constipation

The SANDMAN STORY

REDBIRD'S COLOR

upon a time the redbird, or mer Tanager, was not red all , as he is now, but, like his , the upper parts of his little e yellowish-olive green and rneath parts of the orange- ade.

y while he was singing in an ove and thinking of beautiful hich, of course, made his sweet, he wondered if he had t if the picture would not be utiful.

y he went to the dell where s reveled at night, and when

n drove over the mossy car- ew to her pearl carriage and on the back of it.

nost tipped it over, for he for- was much heavier than the d her little carriage together, ourse, the Queen forgave him because he felt so badly about it.

Then he told the Queen about his plan and that he wished to have a red coat of feathers, because they would look so beautiful in the orange grove with the golden fruit and green leaves and the blossoms.

"But how about your little mate?" asked the Queen. "It will not be safe for her to wear a red dress when she has the nest and the babies to care for. She should not be too easily seen by those who are not kind of birds."

Mr. Redbird had not thought about that, so off he flew to ask his wife what it was best to do.

The next night he returned to the dell with his little mate, who told the Queen she would continue to wear her modest dress and care for the nest and her babies.

So the Queen called for the tinting fairy and let Mr. Redbird select the color he wished to have for his coat, and while the fairies danced around him and his little wife, the Queen changed his feathers to red, wings and tail and body.

"Oh, isn't he beautiful!" said his little wife. "I am proud of you, my dear; I shall never tire of looking at you."

They then thanked the Queen and flew away, and while Mr. Redbird could not often visit his mate while she was on the nest because of his red coat, he did not forget how unselfish she was and did not make a fuss because she could not have her dress changed to the color of his coat.

So while she cared for the eggs, he carried to her sometimes a choice worm, or blossom or berry, and always, where she could hear him, he sang to her his very sweetest song.

And that is how the Redbird got his red coat, and just as he did long ago, all the Redbirds today sing to their mates and carry choice morsels to them because the dear little mother bird of long ago was willing to wear her old dress, so she could take care of the nest and the birdlings while her husband wears the red coat that everyone admires.

Diana Allen

This is a face of a prominent "movie" star familiar to thousands of regular visitors to the motion picture houses. She is the charming Diana Allen, recently starring in a big production constructed from a story by a very prominent author.

How It Started

THE MODERN NEWSPAPER.

IN ANCIENT Rome military events, results of elections, etc., were written on tablets and posted under the head of Acta Diurna (daily acts). This was the antecedent of the newspaper. In China the Peking Tching-Pao (News of the Capitol) has appeared since 713 A. D. These examples, however, were not true journals. The first regular newspaper was the Frankfurter Journal, published by Egenolph Emmel in 1615.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

FOR THE DANCE ESCORT

If it is not seemly, do it not —Marcus Aurelius.

JUST because a young woman has accepted your company as escort to a dance is no reason to believe that she wishes to give you any more dances than she does to any of the other young men whom she knows who are present. But it is the escort's duty to see that the young woman has a reasonable number of dances taken, and this result he achieves, even when she is not one of the most popular of the young women present, by introducing her to other young men.

Usually the escort requests the young woman he escorts for her supper dance—if there be one—at the beginning of the evening; but he has no ground for taking offense if she gives this to some one else. However, he is not privileged to take his supper dance with another young woman unless he sees that the young woman he has escorted has a partner for that dance.

It is customary for the escort, after taking off his own hat and coat, to await his companion in the hall or corridor before going into the ball room or reception room. It would be most inconsiderate of him to start filling out his own dance order before she had arrived.

Before beginning the evening's dancing, the escort should inquire of his companion how long she wishes to remain. If she expresses her wish to leave after the first half of the dances are over—or anywhere else on the program—he should make a mark through the section in the dance order beyond this point, as a reminder not to engage any dances after that time. If she signifies her desire to leave before the time she suggested it is clearly the duty of the escort to leave with her even though in doing so he has to cancel dances promised to other young women with whom he has engaged these dances who, if they are familiar with society usage, will take no offense.

Unless a young man is engaged to a young woman or is her brother and hence regards himself as her guardian, he has no right to dictate to her regarding the young men with whom she should dance. At a small private dance, the fact that the young men have been invited by his hostess should be guarantee enough as to their good manners. To suggest to his companion that she should not dance with them would be a discourtesy to the hostess. At a public dance he should introduce her only to young men he can vouch for, but even if his own worst enemy were present he would have no right to expect her to decline to dance with him.

DAIRY POINTS

SUNFLOWER IS MADE USEFUL

Experiments Not Sufficiently Developed to Reach Definite Conclusions in Northwest.

(Prepared by the United States Department of Agriculture.)

Sunflowers are likely to become good for silage material for farmers on irrigated land in the Northwest, according to reports received by the United States Department of Agriculture from Montana. The Mammoth Russian is in much favor, although experiments have been tried with some of the smaller varieties. The sunflowers were drilled in rows 20 inches apart and irrigated. They were put in about the middle of May, but from their frost-resistant qualities it is believed they could be put in at the same time as grain is sown. About 15 pounds of seed were used to the acre on irrigated land, but it was stated that if sunflowers are to be raised under dry-land conditions the seed should be put in rows 30 to 36 inches apart.

Gathering Sunflowers for Silage.

On the project under observation it was intended to let the sunflowers get fairly well matured, about the same as corn, before putting them in the silo, but as a storm broke them down it was necessary to put them in the silo earlier. The yield was from 30 to 40 tons per acre. Cows fed on sunflower silage kept up the usual flow of milk as well as those which were fed on the grain silage. Some of the big Holstein cows ate as much as 90 pounds per day. No unfavorable results could be noticed in the flavor of the milk. While this experiment has not gone far enough to reach definite conclusions, it indicates that sunflowers may be considered a good crop for silage in some localities.

FIGURE OUT DAIRY RATIONS

Farmers Given Better Understanding of Value and Cost of Various Feeds Available.

A series of 26 dairy feeding schools were conducted during the spring months in six New Hampshire counties by county agents, working co-operatively with the United States Department of Agriculture and the State Agricultural college. Seven more are planned. In carrying out these schools lecturing and formal talk have been practically eliminated and the dairymen are seated at tables, where they figure out for themselves the composition of various rations and compute costs. Much enthusiasm has been aroused.

That the results are worth while is indicated by the statement of a Hooksett farmer, who reported a saving of $1 a day, while another who attended the school at Warner wrote the county agent that he is now saving $36 a month as a result of feeding a ration that he figured out there. The discussion provoked by the farmers figuring these rations gives a better understanding of the value and cost of the various feeds available than any amount of lecturing could possibly accomplish.

WHITE SCOURS CAUSES LOSS

Disease Contracted by Way of Navel or Mouth Soon After Birth—Tablets Worth Trying.

Many calves die of white scours or pneumo-enteritis, which is a deadly germ disease born in the calf and contracted by way of the navel or mouth soon after birth. Medicinal treatment usually fails, but triple sulpho-carbolate tablets are well worth trying, under direction of a qualified veterinarian. He should also immunize each new-born calf with polyvalent anti-dysenteric serum and likewise use it in double doses should a case occur. Provide a new clean pen for new-born calves. At birth saturate the stump of the navel of each calf with tincture of iodine and then apply powdered starch. Repeat the treatment daily until the navel is entirely healed. Also cleanse the teats with a saturated solution of boric acid before the calf is allowed to suck for the first time and daily for ten days if it continues to nurse.

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"AUDIENCE" AND "SPECTATORS."

THESE two words are often used incorrectly or interchangeably, even by some writers and speakers who are careful otherwise in the use of words. Perhaps the confusion is due to the fact that an elementary knowledge of Latin is needed for the making of the distinction between the two words. "Audience" means an assemblage of persons gathered to hear something, since the word is derived from the Latin verb "audire" which means to hear. "Spectators" are those who have come together to see something; the word comes from the Latin "spectare," which means to see, to observe.

It is correct, therefore, to speak of the audience at a concert, and of the spectators at a horse race. An incorrect use of the word "audience" is found in the following sentence: "The audience held its breath while the aviator spun round in the air."

(Copyright.)

RULES FOR FEEDING SILAGE

Good Plan Is to Allow Three Pounds of Material to Every 100 Pounds of Live Weight.

A rule for feeding silage to the dairy cows is: Feed three pounds of silage for every 100 pounds of live weight. A cow weighing 1,000 pounds should receive about 30 pounds. A cow which weights over 1,500 pounds should receive about 45 pounds of silage per day. Silage is usually fed twice a day, in the morning and evening after milking.

TAKE ASPIRIN ONLY AS TOLD BY "BAYER"

"Bayer" Introduced Aspirin to the Physicians Over 21 Years Ago.

To get quick relief follow carefully the safe and proper directions in each unbroken package of "Bayer Tablets of Aspirin." This package is plainly stamped with the safety "Bayer Cross."

The "Bayer Cross" means the genuine, world-famous Aspirin prescribed by physicians for over twenty-one years.—Advertisement.

It is easy for a woman with false teeth to bite off more molasses candy than she can chew.

ARE YOU A MOTHER?

Health is Your Most Valuable Asset Here is How to Take Proper Care of It

Beatrice, Nebr.—"I know Dr. Pierce's Favorite Prescription to be a wonderful help to women during expectancy. Always during that time I took it and it was the means of keeping me in a strong, healthy condition, made the ordeal much easier, and my children were stronger and healthier than they would have been if I had not taken this medicine. I can highly recommend it to all at this critical period; they will find it an excellent medicine." — Mrs. Edith Roberts, 524 W. Court St.

Go to your neighborhood drug store today and get Favorite Prescription in tablets or liquid or send 10c to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y. for trial pkg. tablets.

BARBERS' NAMES ON MIRROR

New York Proprietor Thinks Patrons Should Know Who Is Operating on Them.

The proprietor of a barber shop in New York believes it is a good thing for his business to have his patrons call each barber by name. To this end he has had one of his 15 employees who is handy at lettering scroll the first name of each barber in soap on the mirror in front of each chair.

When a patron enters he sees a row of names—"Tom," "Adam," "Anthony," "Rob," "James,"—on either side—of the mirrored shop. Below each name is an arrow and a number.

"It's like branding cattle," one barber remarked. "I am Sid and each morning I back into stall No. 2. The boss insists it is a good idea. Makes the shop more homelike, he says."—New York Sun.

A Lone Admission.

"Look me in the face, sir."

He raised his eyes timorously.

"Now, sir, deny, if you dare, that you married me for my money!"

"It must have been for your money!" he faltered.

MARKS CENTER OF THE EARTH

Lofty Monument in Delhi, India, Erected After a Meteorite Fell Near the Spot.

The idea that the earth is not a flat disk, but a globe, does not seem to have "caught on" in India, for they still talk about a certain place being the "center of the world."

In Delhi stands a lofty monument that goes by name of Kutub Minor, temple of which it is a part.

a structure towering high above the

The appearance of this curious piece of architecture is that of a number of tiers of columns, seemingly tied together in bundles. At big intervals there are balconies.

The Kutub Minor is of special interest and note in the world over which the religion of the teacher Buddha holds sway. Here, long ago, tradition has it a meteorite fell, sent by the ruling powers in the mystic world beyond this life to mark in the exact center of the world.

In commemoration of this miraculous event the Kutub Minor was erected on the spot, that mankind might never forget it.—London Answers.

He who has no sense of humor has but few friends.

Health First.

POSTUM

"There's a Reason"

This is the start of a better day

There's satisfying comfort and cheer in a breakfast cup of Postum, and there's no disturbing element to irritate nerves or digestion and leave mental energy lagging before the day is done.

Thousands of former coffee users have found that Postum meets every demand for a delicious table beverage, and brings steadier nerves, clearer mind—better health.

As many cups as you like with any meal—no after-regrets.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

"There's a Reason" for Postum

Sold by all grocers

Comforters

We have a nice assortment of "home-made bed comforters which are selling for cost of materials plus one dollar for making.

We make these comforters ourselves and they are much better quality than the ordinary factory made comforts.

Blankets

We have just received a case lot of good quality gray bep blankets size 64x80 at $3 valne which we are selling while they last at $2.65 per pair.

Mattresses

Cotton was less then half a crop this year and we confidently exyect that mattress prices will be a half higher by March 1st

If you need a mattaess be wise and make your purchase to-day. Mattress prices are at the bottom - they have not been so low in several years

But the longer you wait tee higher they will be. Buy to-day.

MAIL ORDER HOUSE READS COUNTRY PAPER

"We have a bureau whose duty it is to read each week the country newspapers from all over the country There is not a paper of any consequence in our trade territory thata our bureau does not get. This bureau looks over these papers and when we find a town where the merchants are not advertising in the local paper we immediately flood that territory with our literature. It always brings results far in excess of the same effort put forth in territory where the local merchants use their local papers," said Herman Rosenfield, advertising manager for Sears, Roebuck & Co.

Mr. and Mrs. Wm. Keraus had quite a "housefull" of company for dinner Sunday. The guests were Mr. and Mrs. Tom Mitchell, of Swea City. Dr. and Mrs. Floyd Sawyer and daughter of Algona, Mr. and Mrs C. G. Waterman and Mr. and Mrs. J. W. Waterman of this place.

Price Quotations Do Not Amount to Much

That's one reason why we do not talk "prices"

It's the qualiy behind the price that counts.

See the goods - judge the quality - look at the style - the fit - will they give you long and satisfactnry service?

We stand at the front for real value giving and our stocks are extensive enough so that you can gratify your taste

Suits the same quality that cost $5 to $60 last year, **$35** to **$40** now.
A fine stock of mens and boys coats mackinaws and work clothes - all Ano.1 qualities.
You'll like them.

No chilly north windss of winter will enter the Will Bachman residence this winter. Will has enclosed his large porch with an all season glass front. We suppose "Bill" will sit out on the porch this winter in his shirt sleeves and socks and smoke ten centers in peace whije the rest of us look on with a chilly envy. It makes a mighty fine improvement for his residence.

KLEMME MERCHANT HAS NOVEL HALLOWE'EN WINDOW DISPLAY

Live Owls and Rabbits Help Effect

The Hallowe'en window at the Wellemeyer Dept. Store is attracting a lot of attention. The window is very cleverly gotten up and the Hallowe'en spirit is plainly carried out in every detail.

The scene represents a nooky, and spoky corner at the edge of some wood. The strange tangled branches and highly colored leaves form a a background. Dead leaves cover the ground, a shock of corn. a few pumpkins a row or two of old corn stubs help the effect. But most of all to give it a scene of life, there are two wise looking old hoot owls roosting in the branches, while on the ground a pair of large rabbits scamper about..

Housekeeping is getting more complicated. Rents are too high to keep one very long.

If one is broadened by travel how do you account for a skinny drummer?

WESTERN CANADA

Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying

are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches, schools, good markets, railroad facilities, rural telephone, etc.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, reduced railway rates, etc., write

Cutting Trees Fast.

Annual forest cutting in New England and New York is approximately 3,262,000 cords, and at this rate the supply will last approximately 17 years, says "The Permanent Builder" (Chicago) in its co-operation with the American Forestry association for a national forest policy. Estimated annual cutting in the Lake states is 3,030,000 cords, and if continued will exhaust the supply in that region within 18 years the statement says. Pennsylvania, Maryland, Virginia, and North Carolina, with their smaller forest resources are even worse off, the annual cutting being calculated at 1,470,000 cords, at which rate the spruce, hemlock and fir will last but ten years. Only in Alaska, Washington, Oregon, and California are the reserves in no immediate danger of exhaustion if the cutting continues at the present rate of 2,218,000 cords a year.

MOTHER! OPEN

CHILD'S BOWELS WITH

CALIFORNIA FIG SYRUP

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the sour bile, and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Workingmen's Carelessness.

Of all the accidents to workmen which occurred in the plants of the United States Steel corporation, only about 5 per cent were due to machinery causes. The others came under the head of hand labor, and it is claimed that half of these might have been prevented by the exercise of a little care by the workmen. In analyzing the causes of any group of 100 accidents it has been found that 90 per cent of them might have been prevented by the victims themselves.

SHE DYED A SWEATER, SKIRT AND CHILD'S COAT

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—advertisement.

Cow Has Six Teats.

A farmer at Riding Mountain, Manitoba, writes that he has a cow with six teats, and milk is obtained from them all. He says that whereas it is not uncommon for a cow to have more than four teats, he has never heard of getting milk from more than four. Is this a record?

SOMETHING TO THINK ABOUT

By F. A. Walker

JUNKING BATTLESHIPS

EVERY little while we read of the junking of obsolete battleships. When the old veterans, scarred and worn from strenuous service, are thus brought to disgrace, there are among the sailors who knew them traces of sorrow.

These sinewed boys in blue, loyal till death, think back to days that are gone and fancy the ships in the smoke of battle.

With what speed and might they cleft the foaming sea!

The attachments that grew and entwined themselves in the sailors' warm hearts are very dear.

There is a common note of sadness among them, especially among those who stood by the guns in the heat of conflict, which, through bravery of men and staunchness of ship terminated in triumph.

But now all this is changed. New emotions crowd the mind.

The sailors realize that they, too, are getting closer to the time when some of them may be "junked" to make room for the stronger and more efficient.

They wonder whether it was always so; whether the weak gave way to the strong. Upon reflection, they decide it was.

It seems a cold-blooded thing to do, this "scrapping" of the impotent, but it is the human way of doing things, of keeping up strength, productiveness and ascendancy, so essential to growth and progress.

Unlike battleships, men can retain their power and capacity, and become more capable as the years advance. To those who keep rubbing off the rust, there need be no fear of the scrap heap.

But to those who are indolent, malicious, inconsiderate of others, the scrap heap is reaching out its scrawny arms, certain of a final embrace.

Do you think of these things, turn sick at heart and hint that it does not matter?

It is good to ponder, but please do not think that "it does not matter." For it does matter. So there ought to be no compromise with laxity or indifference. Face about and see another skyline and different stars overhead. Hold fast all the while to hope!

Keep pressing with this boon companion toward the hill-tops, keep in tune with modern changes, keep young in thought and in spirit, avoid vanities on which life turns—and the scrap heap will never get you.

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

WOMEN IN COMMERCE.

WOMEN are an important factor in commerce in America. There are many cities where women are members with men on the boards of the local chambers of commerce. Then there is the Woman's Chamber of Commerce at New York, and the Woman's Association of Commerce at Chicago, both national organizations.

At the International Trade Conference women were represented. Each of the national women's organizations sent delegates and urged that foreign men delegates should affiliate women with their trade organizations. Many women are in trade both here and in Europe.

In England the University of London has just inaugurated a course in commerce, to which women will be admitted under the same conditions as men. They will specialize on such subjects as banking, foreign trade, factory management, shipping and transport, etc. England believes that her women are perfectly able to enter the higher branches of trade, and she means to give them full opportunity.

In America women are in practically every branch of trade, and they have the full sympathy and assistance of their men in this work. They have learned in the school of experience. But there is room for such a course as the University of London has inaugurated. Many a young woman whose father is the head of an important business might gladly take such a course and be prepared to continue her father's business. The day of idleness for women has gone forever. Commerce is one of the most enthralling games man may play—or woman, either.

MOTHER'S COOK BOOK by Nellie Maxwell

Oh! this is prime! Chestnutting time
Has come at last, and so,
While fields are white with gleaming rime
Into the fields I go,
A basket on my arm to bear
The treasure that I gain.

Oh, who would harbor thoughts of care,
And who deem life in vain,
While merrily the crickets call
And cherrily the chestnuts fall?

CHESTNUTS.

THE chestnut is most popular in all parts of the United States, though it is not grown in all places. It is palatable in almost any form and is used from soup to confection.

To remove the shells, make a slit one-half inch long in the side of each nut, then put them into a pan with a little butter, a half teaspoonful to a cupful of nuts, and shake them over the fire to cover with butter and become hot. Place in the oven and bake five minutes. Remove and with a sharp knife take off the shells and the inner brown skin will come off at the same time.

—

Cream of Chestnut Soup.

Cook two cupfuls of shelled and blanched chestnuts in boiling water until tender, press through a sieve and add two cupfuls of scalded milk. Cook two tablespoonfuls of chopped onion in four tablespoonfuls of butter, add two tablespoonfuls of flour, and when well cooked add to one pint of cream or rich milk with the chestnut mixture. Season with cayenne and cook five minutes until the flour is well cooked.

—

Chestnuts en Casserole.

Remove the shells and inner skin as above from three cupfuls of chestnuts, put into a casserole and pour over three cupfuls of highly seasoned stock. Cover and cook slowly three hours, then add two tablespoonfuls of butter and one of flour; mix with a little cold milk, add to the stock and cook until thick. Serve from the casserole.

—

Chestnut Balls for Soup.

Take a cupful of chestnut puree, add a few drops of onion juice, two well-beaten eggs, two tablespoonfuls of butter, the same of thick cream and salt and pepper to season. Shape into balls and dip in egg and crumbs and fry in deep fat. Serve two or three in a bowl of chicken soup.

Chestnuts cooked in a thick sugar sirup flavored with orange juice and rind make a most delicious confection to serve as a garnish for various dishes.

THE CHEERFUL CHERUB

Protecting the Pets.

"You permit tenants to have pet animals in your apartment house?"

"Yes," replied the landlord. "Some of them are fine specimens and exceedingly valuable."

"But you won't take children."

"No. We are afraid the children might worry the pets."

THE ROMANCE OF WORDS

"MISS NANCY."

TO STATE that a person is a "Miss Nancy" is now equivalent to declaring that, if a man, he is effeminate or, if a woman, that she is prudish and affected—a custom which had its origin in the person of Mrs. Anna Oldfield, a celebrated actress, who died in 1730 and who was buried in Westminster Abbey.

Mrs. Oldfield, known to all her associates as "Miss Nancy," was extremely vain about her dress and the appearance of her hands and hair. As her body lay in state, attended by two noblemen, she was attired according to her last wishes in "a very fine Brussels-lace head-dress, a Holland shift with a tucker and double ruffles of the same lace and a pair of new kid gloves." The actress' wishes in the matter of the clothing of her corpse provoked considerable comment at the time, particularly as an Act of Parliament had decreed that, in order to encourage the manufacture of woolen cloth, the dead should be buried in woolen shrouds. But her instructions were followed to the letter and Pope, in his "Moral Essays," referred to the matter in the following lines:

"'Odious! In woolen? 'Twould a saint provoke!'
Were the last words that poor Narcissa spoke."

SCHOOL DAYS

LYRICS OF LIFE

By DOUGLAS MALLOCH

YOU AND I AND THEY.

A SIMPLE thing, humanity—
Just You and I and They;
And You and I and They are We,
Companions on the way.
Together we must walk the years,
Together rise or fall,
In all our smiles, in all our tears,
Companions, after all.

A simple thing, humanity—
Yet certain as the star
'Tis not a world of merely Me,
For other men there are.
I cannot walk the way alone,
However I may try,
For other millions climb the stone
Ascent as well as I.

A simple thing, humanity—
'Tis not a world of You.
But You and I together we
Have comrade work to do.
For close beside us travel They
Who need our help and hand—
Oh, life's a rather simple way
To those who understand.

A simple thing, humanity—
We cannot walk apart,
For we a help or hurt will be
To every human heart—
Will lift or jostle, crush or aid,
The other ones who climb;
For God one brotherhood has made
All men for all of time.

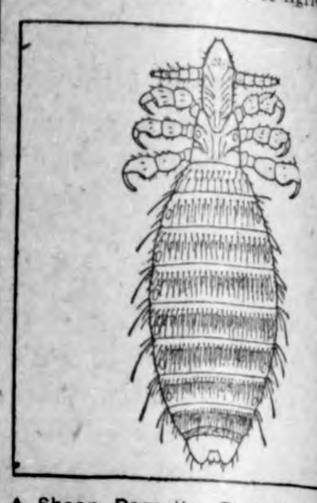
LIVE STOCK FACTS

COMMON AILMENTS OF SHEEP

Information Given in Farmer's Bulletin to Enable Owners to Recognize Symptoms.

(Prepared by the United States Department of Agriculture.)

How to recognize and treat the most important diseases and common ailments of sheep is told in Farmers' Bulletin 1155, just issued by the United States Department of Agriculture.



A Sheep Parasite—Back View of Female Sucking Body Louse (Highly Enlarged.)

While the actual treatment of disease is primarily a matter for veterinarians, the information given in the new bulletin will enable sheep owners to recognize symptoms early in their development and thus avoid losses to their flocks. Altogether 57 kinds of diseases and ailments are discussed.

The sheep industry of the country has suffered severely from the ravages of infectious and noninfectious diseases. In addition to the scientific names, the bulletin gives the common names by which the various diseases are known. A convenient arrangement of cause, symptoms, post-mortem appearance, diagnosis, treatment, and prevention makes it possible for sheep owners to obtain a practical knowledge of the best means for preventing and controlling sickness in the flock. Numerous illustrations add to the clearness of the discussion.

As a companion bulletin to "Diseases of Sheep," the department is distributing also Farmers' Bulletin 1150, entitled "Parasites and Parasitic Diseases of Sheep." This bulletin explains methods for controlling various pests and parasites that attack sheep and points out the advantages of pasture rotation, feeding from racks, and other measures of value in parasite control.

Adult Sheep Foot Louse and Egg (Enlarged.)

LIQUID MANURE IS VALUABLE

Nitrogen and Potassium Should Be Carefully Preserved and Used for Improving Crops.

The liquid excrement from farm animals contains nearly half the nitrogen and potassium voided by them and should be carefully preserved. When steers are fed on cement floors the value of the manure produced is more than $4 per year greater for each animal than when fed on earth floors. Open barnyard manure is about one-half as valuable as stall manure. The least amount of nitrogen will be lost from stored manure if animals are kept on it or it is kept in a moist, well packed condition. Manure used in connection with continuous croppings will not maintain the maximum yield, but when used in connection with crop rotation it increases the yield of all crops grown in that rotation. Manure used in conjunction with a complete fertilizer high in phosphorus will give better returns than when either is used alone.

NEEDS OF GROWING ANIMALS

Pigs Thrive Better on Ear Corn and Green Alfalfa Than on Chopped and Ground Feeds.

Ear corn and green alfalfa meet the needs of growing pigs better, and at less cost, than chopped alfalfa and ground cob and cornmeal. The alfalfa stems and cob meal are better suited to the needs of sheep or cattle. They can handle more fibrous, indigestible matter than pigs.

DISCARD INEFFICIENT HORSE

The light, inefficient horse is undoubtedly destined to be discarded as a factor in American husbandry, and the indiscriminate breeding of small, unsound, scrubby animals will continue to be highly unprofitable if persisted in.

Grammer Room Notes

Last Friday evening, the eigth grade having lost in a spelling contest held in the grammer room, en...renness connected with ... ...tumn frosts that are not justified if one knows how to prepare his garden stuff for the winter. There is no reason why a gardener who anticipates the cold weather cannot have vegetables with much of the garden freshness for weeks and even months after freezing time, if he follows the instructions of the United States Depart-

Preparing Tomatoes for Storage by Wrapping in Newspaper and Placing in Shallow Box.

ment of Agriculture. To care for surplus vegetables in many cases requires nothing more than the use of existing facilities in or near the home.

Tomatoes After Frost.

Tomato vines usually have a large quantity of unripened fruit when the frosts come. It is customary to use much of this for pickles, but the frost need not put an end to ripe tomatoes. If the vines are pulled, or if they are cut and the ends sealed with paraffin or sealing wax, they can be hung up in a cool cellar and the tomatoes will ripen and often last for six weeks. Another plan is to pick the tomatoes, wrap them in papers, and place them in shallow boxes or baskets.

Lima beans should be picked before the frost and spread on a slightly moist cellar floor, where they can be kept fresh two weeks. They should be turned from time to time to keep them from molding.

Cabbage can remain in the garden until hard freezing weather, after which it may be kept sound by several methods. One of the simplest is to dig a shallow trench in a well-drained portion of the garden and place the cabbage, roots up, in it, and cover with straw and loose earth. For other vegetables such as Irish potatoes, beets, and turnips select a well-drained location, make a shallow excavation, about six inches deep, line it with straw or similar material, and place the vegetables in a conical pile on the lining. Cover the vegetables with the lining material and carry it up several inches above the apex of the pile, having it extend through the dirt covering for ventilation. The top needs to be covered with a piece of tin or board to keep out rain and

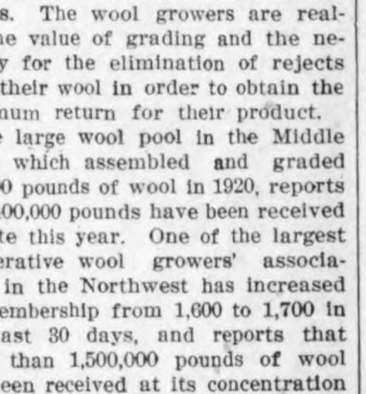
Pulling Up Entire Tomato Vine for Hanging Up in Cellar.

snow. The pile should be covered with two or three inches of dirt, and the thickness increased with colder weather.

Outdoor storage cellars or caves are excellent for the storage of many vegetables, and avoid all danger of unpleasant smells permeating the living-rooms. Full information on the storage of vegetables will be found in Farmers' Bulletin 879, which will be sent on request to the department.

IMPROVEMENT NOTED IN WOOL MARKETING

First Down an...



...ers of wool clips who were penalized in 1920 on account of sisal twine, burrs or seed have taken precautions this season to see that their product is free from objectionable foreign matter and in excellent condition when received at the concentration point. The percentage of untied fleeces is much smaller than in 1920, with a considerable number of fleeces boxtied.

Especial emphasis has been placed on the work of the expert graders in demonstrating to producers and others the value of grading the wool clip. The subdivisions within the grades established enable the producers of long-staple wool to obtain full value for their clip on the basis of grade. In addition to the regular grades, provision also is made for the various kinds of defective wool which constitutes rejects. The wool growers are realing the value of grading and the necessity for the elimination of rejects from their wool in order to obtain the maximum return for their product.

One large wool pool in the Middle West, which assembled and graded 340,000 pounds of wool in 1920, reports that 400,000 pounds have been received to date this year. One of the largest co-operative wool growers' associations in the Northwest has increased its membership from 1,600 to 1,700 in the last 30 days, and reports that more than 1,500,000 pounds of wool has been received at its concentration point.

RUNTS ARE NOT PROFITABLE

If Stunted Animals Could Be Eliminated Farmers' Incomes Would Be Greatly Increased.

(Prepared by the United States Department of Agriculture.)

A questionnaire survey conducted among 1,000 leading farmers and breeders by the United States Department of Agriculture indicates that about 7 per cent of the annual production of farm live stock in the

Farmers Say It Does Not Pay to Raise Runts.

United States consists of runts and undersized specimens of the various breeds and classes. Farmers report that their annual incomes from live stock would be increased an average of 13 per cent if runts could be eliminated. Better methods of feeding and breeding, breeding better stock, the use of purebred registered sires, good care and systematic attention, better housing and sanitation, proper care of the dam before the birth of young, practical control of such objectable parasites as worms and lice, the control of disease, and the culling from the farm of all stunted stock which indicates no possibilities of successful reformation and rehabilitation are the control methods recommended by these experienced farmers. About three-quarters of them say that it does not pay to raise runts, while the balance maintain that the Tom Thumbs of the livestock world can be raised successfully only when well bred and when plenty of cheap feed is available and dependable markets are readily accessible.

BARBERRY CUTS WHEAT YIELD

Scientific Investigation Has Proven That Rust Gets Its Start in Barberry Bushes.

Your barberry bush may be reducing your wheat yield or increasing the cost of a loaf of bread. Wheat rust in some years causes a loss of 200,000,000 bushels of wheat and scientific investigation has proved that the fungus which is responsible for this disease gets its start in the spring from the common barberry plant. More than 4,600,000 barberry bushes have been located by federal workers and 3,500,000 plants destroyed. One bush may infect acres of wheat and it will be worth while to look around your farm and adjoining country and see that they do not harbor any of these wheat thieves.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease.

Dr. Kilmer's Swamp-Root is on sale at all drug stores in bottles of two sizes, medium and large. However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper. Advertisement.

English Center of Industry.

"The Potteries" is a district of North Staffordshire, England. It is the chief seat of the china and earthenware industry. The principal centers are Burslem, Hanley, Longton, Fenton, Tunstall and Stoke-on-Trent, all of these being amalgamated in 1910 as a single municipal borough under the name of Stake-on-Trent. The Wedgwoods and the Mintons are the most famous families connected with the china industry.

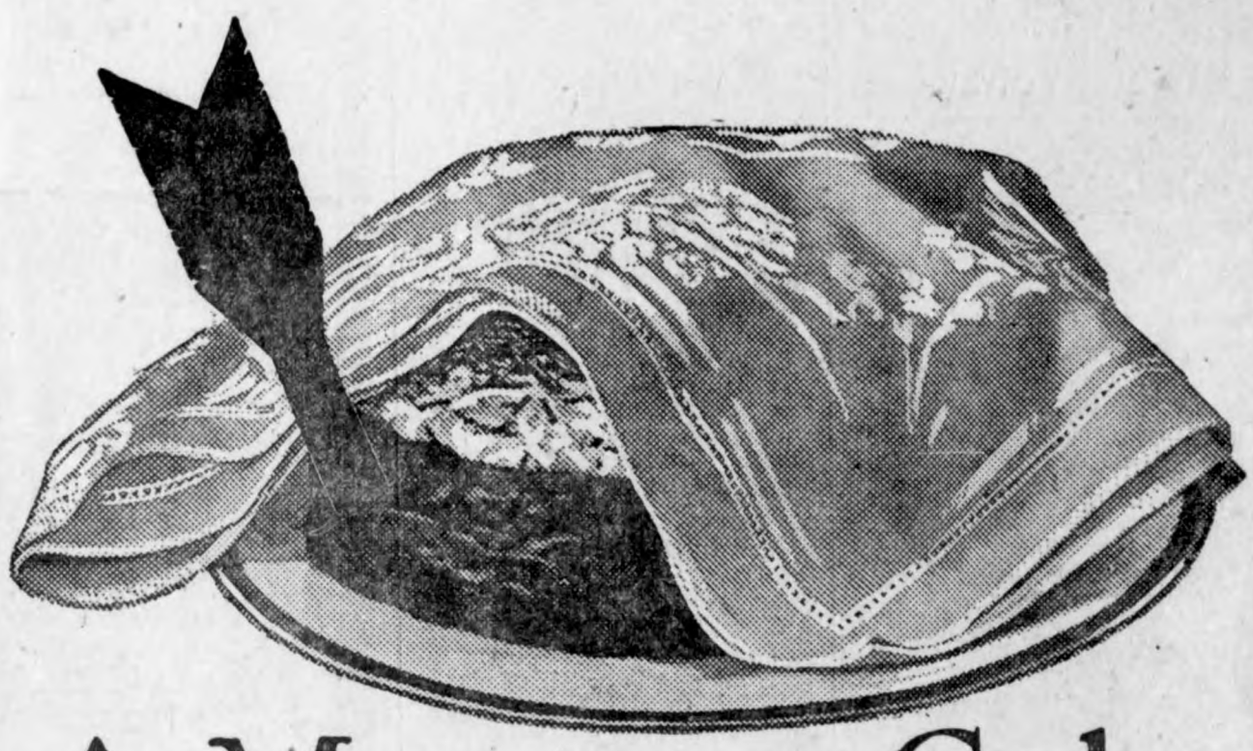
Differences of Taste.

"Some of those summer boarders seemed to think they were superior in elegance and refinement," said Mrs. Cornfossel.

"Maybe they are more up-to-date than we are," answered her husband. "But just the same I'm glad they're gone, now we can put the jazz records up in the attic and listen to some classical music."



A Mystery Cake

Can you name it?

Here is another new Royal Cake, so delicious and appetizing that we have been unable to give it a name that does justice to its unusual qualities. It can be made just right only with Royal Baking Powder. Will you make it and name it?

$500 for the Best Names

For the name selected as best, we will pay $250. For the second, third, fourth, and fifth choice, we will pay $100, $75, $50, and $25 respectively.

Anyone may enter the contest, but only one name from each person will be considered.

All names must be received by December 15th, 1921. In case of ties, the full amount of the prize will be given to each tying contestant. Do not send your cake. Simply send the name you suggest, with your own name and address, to the

ROYAL BAKING POWDER COMPANY
153 William Street, New York

How to make it

Use level measurements for all materials

½ cup shortening
1½ cups sugar
Grated rind of ½ orange
1 egg and 1 yolk
2½ cups flour
4 teaspoons Royal Baking Powder
1 cup milk
1½ squares (1½ ozs.) of unsweetened chocolate (melted)
¼ teaspoon salt

Cream shortening. Add sugar and grated orange rind. Add beaten egg yolks. Sift together flour, salt and Royal Baking Powder and add alternately with the milk; lastly fold in one beaten egg white. Divide batter into two parts. To one part add the chocolate. Put by tablespoonfuls, alternating dark and light batter, into three greased layer cake pans. Bake in moderate oven 20 minutes.

FILLING AND ICING

3 tablespoons melted butter
3 cups confectioner's sugar (Powdered sugar may be used but does not make as smooth icing)
Grated rind of ½ orange and pulp of 1 orange
2 tablespoons orange juice
1 egg white
3 squares (3 ozs.) unsweetened chocolate

Put butter, sugar, orange juice and rind into bowl. Cut pulp from orange, removing skin and seeds, and add. Beat all together until smooth. Fold in beaten egg white. Spread this icing on layer used for top of cake. While icing is soft, sprinkle with unsweetened chocolate shaved in fine pieces with sharp knife (use ½ square). To remaining icing add 2½ squares unsweetened chocolate which has been melted. Spread this thickly between layers and on sides of cake.

Mr. and Mrs. Figi, and dapghter of Renwick were visitors at the F. J. Wenck home Monday.

"No Credit" signs, printed on heavy, bright cardboard for sale at the Times Print Shop.

Miss Gail Bisgrove of Clarion is here visiting her aunt, Mrs. John Spitler.

Work on the new Baack building s progressing rapidly. Brick layers are now working on the walls.

Quite a number from here went to Dows last Thursday to take in the K. of P. celebration and to see the wrestling match.

Quite a number of farmers here have finished their corn piching job They are getting through much sooner this year than generally.

Mr. and Mrs. Tony Ahrenkeil and baby of Goodell, and Casey Blank of Belmond were visiting Klemme relatives Sunday.

Rev. Ortmeyer and family were visiting relatives and friends here Saturday. They were formery of Forest City.

Ralph Erwin and family will move to Floyd, Iowa, the latter part of this week. "Scotty" has invested in restaurant business there.

Dick Swalve and family and Gilbert Shaefer and family autoed to West Bend, Iowa, Sunday to view the Grotto.

W. H. Trafford has accepted a position in a store at Belmond and will move to that place the first of the week. He begins work there the first of the month.

Mrs. Aravella Levea, of Spencer, came Friday evening for a few days visit with her father, A. L. Emerson. Mrs. Levea was formerly Miss Aravella Emerson, of this city.

Paul Grange has rented the house now occupied by the Trafford family, who go to Belmond and Granges will move in about the fifteenth of the coming month or sooner.

Mrs. Henry Rust, or Bird Island, Minnesota, returned Tuesday after several days visit with her sister, Mrs. F. H. Schuldt and brother, C. W. and Roscoe Wiles.

Mike Haskins of Garner and his daughter, Miss Beulah, were Klemme visitors Monday. Mr. Haskins was also here the following day to read meters

Mr. and Mrs. Howard Doyle returned from their week's vacation Tuesday evening, which they spent at Alta VVista, Iowa, visiting with Howard's folks. Howard spent a great deal of his time hunting and fishing and says that ducks were plentiful, also squirrels. While he was there he caught a lot of pickerel which he said would weigh from 5 to 9 pounds each. They enjoyed their vacation immensely.

LOST—About a month ago a red steer, coming two-year old. Marked on left ear. Will pay keep to finder for return. Fred Johnson, Ventura Iowa. Oct.-28-2

ING TO ABOUT

Walker

strong. Upon reflection, they decide it was.

It seems a cold-blooded thing to do, this "scrapping" of the impotent, but it is the human way of doing things, of keeping up strength, productiveness and ascendancy, so essential to growth and progress.

Unlike battleships, men can retain their power and capacity, and become more capable as the years advance. To those who keep rubbing off the rust, there need be no fear of the scrap heap.

But to those who are indolent, malicious, inconsiderate of others, the

"MISS NANCY."

TO STATE that a person is a "Miss Nancy" is now equivalent to declaring that, if a man, he is effeminate or, if a woman, that she is prudish and affected—a custom which had its origin in the person of Mrs. Anna Oldfield, a celebrated actress, who died in 1730 and who was buried in Westminster Abbey.

Mrs. Oldfield, known to all her associates as "Miss Nancy," was extremely vain about her dress and the appearance of her hands and hair. As her body lay in state, attended by two noblemen, she was attired according to her last wishes in "a very fine Brussels-lace head-dress, a Holland shift with a tucker and double ruffles of the same lace and a pair of new kid gloves."

NOTICE TO APPOINTMENT OF EXECUTOR

Notice is hereby given, That the undersigned has been duly appointed and qualified as the Executor of the estate of August Prelipp late of Hancock County, State of Iowa, deceased. All persons indebted to said estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned for allowance.

lews Of The Week Reported By The Klemme Schools

KLEMME SCHOOL NEWS

(By Andrew Wellemeyer and A. E. Lauritzen)

John Baumgartner was absent Mon y and Tuesday.

Donald Stille was absent Wednes- y.

Glenn Busch was absent Tuesday M.

The girls seem to keep up their actice in basketball. Good!

Sylvanies Walker and Albert Prie- were absent from the Freshman ss Wednesday A. M.

Friday, Neota Ridder gave a very teresting talk on "The Lasst Days Pompeii".

Albert Priebe started his school ar last week, Wednesday. His old smates, the freshies welcome him their class.

Andrew Wellemeyer also gave a y interesting report on the"Ant" the Freshman class Monday. An- w had a rather small speciman to ort on.

Evald Josten, joined the Freshman ss Wednesday. He is highly we ned and the Freshies are proud of ir enrollment because it has in- ased considerable.

Miss Everestt, the primary teacher s absent Monday P. M. and Tues- y A. M. on account of sickness. ar Johnson. of the high school ght her room during the absence. e children reported Pearl a very d teacher.

Last Friday Neota Ridder and Ad- Schroeder gave very interesting orts in the Freshman biology ss. Neota reported on spiders and tainly did them justice. Adela e a report on the Whale. The ale is a large animal but she gave justice.

A few words in regard to the pain accident which occured to Harl ner. Harl was very unfortunate breaking a bone in his foot. All schoolmates wishes him a hasty overy. and it is hoped this foot not bother him in his athletics.

Klemme High School has enrolled term twenty nine pupils. Last r the enrollment was twenty five. s makes a difference of four. re is one seat in the high school is not occupied. We hope every may be occupied before the n has ended.

Work has begun among the High ool pupils to sell tickets for the ture Course. The lecture course year will contain some home tal numbers and some of the best akers havke been obtained and course it is positive, will give e excellent entertainments.Dates he course will be published later.

Preparations are being made for High School and Grammer room Club. Prof. Wilson appointed Smith, Glenna Greutzmacher, r Johnson, Florence Behringer, la Schroeder, Alvira Stille for the ical committee. The duty of committee is to obtain good s for the rooms to sing. A ting was held by the committee they have not as yet decided on copies of music. Miss Smith be the musical director of the .

Preliminary was held last Fri- for the purpose of electing a ber of the school to make the th number on the Declamatory est. This preliminary was held he boys, and Fred Schlicting and ence Elder contested to be on fourth number among the boys. Schlicting won the contest by e vote, and he will speak at the st. The girls will hold their iminary Friday and one girl from room will be elected to make the th number among the girls will make eight numbers on the st this year and they all will be very entertaining. The Contest will be held sometime in December. No exact date has as yet been set.

Grammer Room Notes

Last Friday evening, the eigth grade having lost in a spelling contest held in the grammer room, entertained the seventh grade at a party in the bank basement, which was suitably decoratаed for the occasion. The evening was spent in telling fortunes, ghost stories and in playing games. At ten o'clock a delicious lunch was served, after which the guests departed for home voting the eight grade to be good losers and royal entertainers. Miss Smith and Miss Everist chaperoned the party.

SLATS DIARY

Friday—Pug Stevens was bosteing of how his brother Ike had a chance to be a fotographer in a moveing pitcher co. and wood hav new all the actors & actresses & Bill Hart etc. but he dident let him get a hed of me none. I told him how I had a kind of a chance to of been in a big circus & travel all over the world and over into Canady. because ma one time refused to mary a lion train er witch was in the biggest circus in tthe wirld.

Saturday—got an invitation to cum to Janes birthday party next week. she rote them out her own self. she sed on it. You are invited to cum out to a party in memory of my birthday at 7 o'clock in the evening P. m. till 10 of the same. Your presents will help to make it a successfull party. So I Suppose I will half to go & take a present so it won t be a failery even if it takes my only dime.

Sunday—Unkel Hen has goto a new pony whitch he has named him Bedlam. I ast him why he named him that & he sed it Was because he was all ways brakeing loose. to deep for me.

Monday—pa awoke me las nite an sed to me to lissen to the jaz band playing outside. But we found out it was only a fellow fixing his fliivver outside wile his wife jawed at him and there kid balled.

Tuesday—Igess are new preecher must get a big salery beause Today his Hat blowed off his hed & went wirling down the St. & he never even chased it.

Wednesday—Mrs. White past are house & pa was beeting a rug & she ast him Was his wife at home & pa sed back Do you spose I wood be do this if she wernt.

Thursday—pa ast Mr. Gillum where does he get his umbrellas from & he replyed & answered—Frum the restetrant Where he eats his lunch at dinnertime.

ENTERPRISE

A week ago I chanced to say to Ebenezer Jones, "I'll buy myself a nice coupe when I can spare the bones." It was a idle thoughtless speech, a wheeze, to all intents; I had no thought it would reach the ears of passing gents. But when I reached my dwelling place, nine salesmen waited there, each with a glad and beaming face, and eloquence to spare. Along the curb their cars were parked, nine wagons fair to see; and as one man these gents remarked, Come, take a drive with me." And all the long long sunnd day, car dealers worked my phone and each one had a grand coupe I really ought to own. And I grew wobbly in the knees, and my dispair was tense, for salesmen roosted in the trees and sat upon the fence; they lifted up the window sash and said with nerve sublime, "In case you cannot spare the cash, we'll sell the car on time." By mail they flooded me with bunk, instructed me by wire, that I could trade in any junk, my shotgun or my lyre. For days they came upon the jump, each with his fetching yarn; they got me when I went to pump, they ragged me in the barn. Hereafter when I have things to tell, all by myself I'll go, and whisper them into a well- the deepest one I know. —Walt Mason.

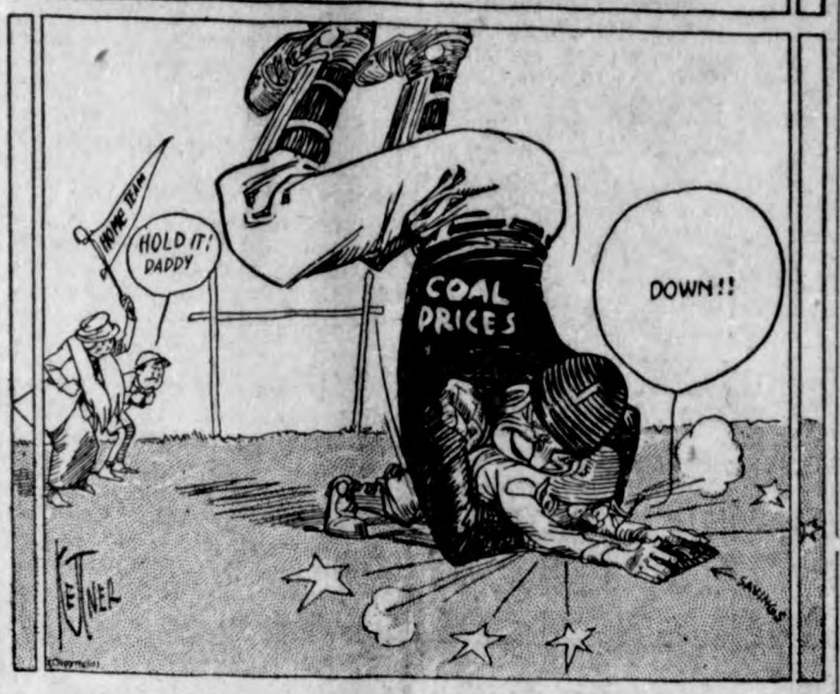
First Down and Six Months to Go



PLANT A MEMORIAL GROVE

Every Iowa Community Urged To Honor Warriors By Planting Trees On Armistice Day

Planting of memorial trees by local communities is urged by the forestry extension service of the Iowa State College. Not only will this make a fine monument but it will cost very little and in afew years there will be a fine standing timber.

Trees thus planted can be marked with suitable permanent plates tto show in whose honor they were plant ed and they will furnish a living mon ument that will be an ornament and a valuable asset to any park, or will make a roadwaay more attractive.

More societies have already plan ned to honor their soldier dead in this way. At Harvey Ia. the schools recently planted trees and had them registered with the American forestry asociation as memorial trees free of charge.

If every one of the 146,000,000 miles of public highways in the Unit ed States were planted with trees on each side there would be when the trees matured the equivalent of 9,- 517,640 acres of forest with 55 trees per acre and the trees would be 10 inches in dameter This would make aa total of 523,470,182 trees along the highways.

The forestry extension service a newly created department at Iowa State Vollege will furnish anyone information as to the best kinds of trees to plant, how to plant and where to get them,.

This movement for memorial trees is underway inmany states and Iowans are developing the plan in many localites. say the foresters. Due to the high tllage area of the state there are comparatively few trees in Iowa and there is room for many fine shaade trees.

THINKS MOON SUPPORTS LIFE

Is there life on the moon? Profesor William Henry Pickering of Harvard thinks that he has proven beyond a doubt that there is He has taken aa series of photographs of the summit of a volcano through a large telescope. The photographs were taken at Mandeville, on the island of Jamaaica. They seem to show that there are great fields of vegetable life on the moon's surface. This vegetable life springs up with unbelievable rapidity and dies again within eleven days. It does not necessarily mean that there are any intelligent beings there or even anim al life of any kind. But the professor thinks that if the moons surface can support vegetable life, it might also support animal life. The moons surface is supposed to be very cold. Professor Pickering saw traces of great snow storms.—Current Events.

SOME FACTS WORTH KNOWING

Natives who use blowpipes for hunting have an accurate aim up to 50 yards.

Shells, bombs etc. collected from the battlefields of Flanders weigh 13,364 tons.

One prick from the poisoned darts as used in the Malayan Archipelago. will cause death in half an hour.

Bath tubs and coffins are included in the list of articles taxable as luxuries by the German Government.

Patagonian Indians, who live on the island of Tierra del Feugo, and are most treacherous, are easily scar ed by firearms.

HALLOWE'EN PARTIES THE PAST WEEK

Odd Fellows Given Party By The Rebeccas

The Rebeccas started the ball to rolling when they planned and gave a big Hallowe'en party for the local Odd Fellows.

The hall was first appropriately and mysteriously decorated in grand and spooky Hallowe'en style.

Last Thursday night was the big night for the two lodges when every thing was all set for the party. Hallowe'en jokes and games were carried out, a good time and plenty to eat are the reports.

Grammar Grade Also Celebrates

The Grammar grade of the school had their party in the basement of the First National Bank which they had worked hard on to make it look real ghostly and wierd. Hallowe'en games were played along with the usual jokes at that time and of course they were a hungry bunch of youngsters and likewise filled up on a real feed along with it.

"Win-One Class" Entertains Also

On Monday evening, the real date of Hallowe'en, the "Win-One" Class of the Methodist church had a party at the Idle Hour. It was also decorated in real style and as at the other parties. games and jokes were the order of entertainment followed with a lunch. All report a great time.

Another Hallowe'en Party Given

Mr. and Mrs. Clarence Kluckhohn entertained a number of young married couples to a Hallowe'en party on Monday night. Decorations and lunch were carried out in Hallowe'en style. "Bunko" was the game of amusement for the evening. All report a royal good time.

we would like to make mention of ... If we have missed any other party next week. There were so many that it was hard for us to get a report on all of them.

DO YOU KEEP A BUDGET?

Every Iowa Home Requires a System Of Finances..

Iowa families all need budgets if the family finaances are going to be handled properly, saays Miss Eda Lord Murphy of the home economics department of Iowa State College. Nt only does the budget help the woman but it is a great assistance to the husband who can plan on some of the larger items which require godly portions of his income.

Due to the increased number of applications for information on how to make budgets and where to get information on them, Miss Murphy has prepared a list of some valuable books on the subject and she will furnish this list witth names of publishers and prices to any one interested.

A recent inquiry on the budget problem came from an Iowa farmer who started keeping books on running of the farm and decided that as long as he was studying the fam accounting he might as well plan a budget for the household.

"If your husband gives you an allowance, you should keep a budget," says Miss Murphy.

"Whether he expects you to ask for money or treats you as a partner in the game of homemaking, the bud get will solve many problems."

News Briefly Told Gathered From All Over The State

STRONG FOR THE HOME PAPER

"No, I don't take the local paper any more," one farmer said to another as they were waiting at the creamery to unload their milk.

They had just been looking at a poster advertisement "Subscribe for Your Home Town Paper Week, November 7-12." "I take a daily paper and that's about all I need. It has a few items every week from our com munity, and I feel that I save ttwo dollars a year by not subscribing to the home paper."

"Well, thats one way to look at it, said the other farmer, "but I've always felt that a local paper was a pretty valuable asset to any commun ity, and if everybody took the attitude you do, there couldn't be any local newspapers. Of course we could not get along without our daily papers, because they keep us informed what is going on thruout the nation and thruout the world, but when you say thatthey take care of our local news, I don't think you are sticking close to facts. They simply can't, and the publishers haven't any personal interest in our community the way our editor has.

"I have always felt that I got value received for every dollar I've paid out in subscriptions to the local paper, and I don't have an idea that running aa country newspaper is any more of a wealth-producing proposition than running a farm. So long as I've got two dollars I intend that the rural mail carrier is going to tuck a copy of the home paaper in my box every week."

The farmer kows that the community newspaper is a necessity in his home; that without it his home would be incomplete and his part in the community would unsatisfactory to himself and his family. He knows the full value of the local newspaper as an institution.

INSISTS HE IS DEAD

Immediately after the war it was uncommon to hear that a man declared dead by the Government was alive. Such mistakes were bound to occur we suppose but three years after a war would suppose htat the government would have been completely checked all such cases up. At Atlantic, Iowa. there is a lady whom tthe government insists is a widow in spite of all her repeated protests that she is not. Her husband returned from the war without aa scra tch and he also insists that he is very much alive. Their Congressman has also tried to convince the war department that they are mistaketn but still this department insists on the fact that the man was killed in France. — Poloo Alto Reporter.

COW ON SPREE, HER MILK MAKES PUNCH

CALDWELL, N. J.—One of Walteer Haywod's cows is a living still. The cows name is Emma.

Walter turned his cows into his orchards at Pine Brook, four miles west of here. All except Emma devoted themselves in consuming sound apples.

Emma smelled the seductive odor of thealcohol that nataure was making in the pile of spoiled apples and she consumed the whole outfit, fully a bushel.

She jumped three fences, chased four horses, dispersed a picnic party tried to upset several autoes and slept in the woods all night.

Walter is saving the milk Emma produced Monday. He has a suspician it may pack a punch, as it were Many of his neighbors are calling on him.

A ferry across the St. Germans River, in Cornwall, Great Britain, has been carried on without interuption since the twelfth century.

Rockall, an islet in the Atlantic, 300 miles west of Scotland, is supposed to be the only remaining portion above water of a lost island.

The estimated population of England, Scotland, and Ireland is 48,000 000; they support an army of 8.000,- 000 Government officials, soldiers and sailors.

WAVERLY FARMER FLEECED IN CLEVER LOST GEM FAKE

WAVERLY,—A short time ago a car stopped in front of one of the farmhouses west of town. The occupants professed to have stopped to ment a punchered tire and after working about the machine for a time sufficient to have fixed an ordinary puncture. one of the party went to the house and told a very plausable story about the "busted tire" and wound up his tale by saying that one of their number had dropped a diamond ring while work ing around the car.

The stranger asked for the loan of a lantern with which to look for the alleged lost gem. Not only did the farmer lend them a lantern, but he and other members of his family went to the road and assisted in the search.

After a thorough search one of the men stated that as the party was in a hurry he would leave the farmer his address and if the precious stone was found to notify him and the finder would be rewarded with $100 The farmer and his family searched the spot deligently for some time the next morning, but no stone was to be found and they had given up hopes of hearing any more about it, when a few weeks later a man dressed like a tramp came along, stopped at the place and showed a "sparkler" or rather "phoney."

He had found it in the road in front of the house and said, and was going to change it nto money at the first opprtunity. Negotiations began immediately, which soon resulted in he innicent farmer giving the tramp $50 for the stone.

The supposed loser of the diamond was notified at the address given ut no response in the county up un- il a year ago when an invevstigation was made it developed that the stone was only one of those 25c diamnods hat you see advertised.

IOWA NEWS BRIEFS

Adolph Elser was arrested at Cedar Rapids when he tried to sell an $800 diamond ring for a asmall amount.

The ladies of the Methodist church of Plano unloaded 5,000 tile while heir husbands were digging for the basement of the new edifice.

Con Marton. former hotel clerk of Sioux City was awarded $1500 in his damage suit against the Globe Hotel Co. for $6470. He alleged he was thrown down a flight of stairs by a drunken man while in discharge of his duties as clear. He suffered a broken knee cap.

Dorothy Goff of Atlantic, is asking a two-thirds share of his foster father's $30,000 estate in the court. Although her adoption was not complete, she is asking that it be regarded as a contract under which she would be entitled to share the same as a neutral daughter.

The ministers of Waterloo, backed by 6000 supporters have begun a fight to bar Sunday movies aand improve the morality of the city. Three prominant ministers have appeared before the city council with a petition asking the closing of Sunday theaters.

Nearly 100 pounds of copper was unearthed by a road grader on a big clay bank hill a mile and a half west of Rockford. While no effort will be made to sell the stock in a copper mining company, experts have been callers to determine the orign of the metal.

W. G. Strock of Storm Lake has handed his wife $66,427 alimony and signed an agreement to give her $75 a month for his three children until they are of age, as part of her decree of divorce.

John Wyhnak and J. Allen Cox, murderers have been pardoned by Governor Kendall. Wyhnak killed his wfe and Cox killed Emil Snath policeman. The former served six years of a seventeen year sentence Cox served five years of a twelve year term.

A burglar attired only in his underwear was discovered by John Kevill proprieter of the Clever Clothes Shop in his store in Sioux City recently The burglar, Nick Costellant, 21 had entered the store in his overalls with the expectation of leaving atired like a "millon dollars". He gave himself up without o fight.

Keeps Tabs on Those Who Move

People of Birmingham Cannot Escape Bills and Rent by Old Expedient.

MUST REPORT ALL TRANSFERS

Ordinance Requires Owners of Vans or Other Vehicles to Report All Moving to Police—Helpful to Authorities.

Birmingham, Ala.—Those who find it cheaper to move than to pay rent or meet other bills, are pretty well reformed in this city, or are in process of being weeded out in either case by means of an ordinance so riveted that offenders cannot escape. The ordinance requires the owner of every transfer or other vehicle to report promptly all moving to the chief of police, and entries of the same are at once made in a book duly alphabeted and dated, and the book is always open for the inspection of any and everyone who may ask to see it.

Of course one who plans to turn delinquent will try to conceal his identity while in the act of moving, but the ordinance makers foresaw that impulse and attached penalties for false names or misleading reports, which fairly shut out that form of trickery. Altogether the ordinance has worked so well that Birmingham has been solicited by other cities for copies of the act and for the experiences under it which have made it a magic cure for bill-evasion. It is a fixture in Birmingham, for it has been in force since March of 1913.

Generally Helpful.

Its enactment came about in that year through the Retail Furniture Dealers' association. At the ensuing election it had an able enforcer in Commissioner of Public Safety Arlie Barber, who thoroughly believed in it and kept everybody concerned up to the scratch. He found that some of the colored laundresses had a fashion of suddenly changing their addresses when well stocked with the linen of their clients; that in some districts overdue gas bills gave sufficient cause for families to vacate quarters, and delinquents for rent and for tradesmen's accounts were common in all districts. The telephone company had occasion to compliment the commissioner on the accuracy and completeness of the records in the book of the chief of police, for in one case the company escaped damages for nondelivery of a message, in a suit in which the person addressed had moved, but claimed to be living in his old home at the time of the message. His claim was thrown out of court by the evidence of the chief's records. Furniture dealers who had been behind the original enactment soon found their troubles eased by it, and finally they were almost without bad bills.

Police Are Benefited.

In time the detective department of the city benefited by the ordinance, for it enabled them to locate undesirables, bootleggers, bond-skippers and the kind of women who scattered themselves over the city after the abolishment of the old red-light district.

Once there was a concerted attempt by the transfer warehousemen to undo the ordinance. They obtained a restraining injunction against its enforcement, and went into court on the issue of constitutionality. The Supreme court ruled that it was both constitutional and reasonable. Minor changes were made in it, not interfering at all with its efficiency, and it is here to stay, with the approval of every reputable interest.

Veteran Served Sentence of Man Who Saved His Life

Because his "buddy" saved his life in France, Harry W. Haley, known as general prisoner No. 22102, assumed his name, and is serving a six months' sentence in the United States disciplinary barracks, Fort Leavenworth, Kan., for desertion, alleged to have been committed by his friend.

Laughed at Undertaker.

Martins Ferry, O.—Mrs. John Bobe entered the room where her husband lay ill. Believing him to be dead, she telephoned an undertaker and someone gave his obituary to a newspaper. When the undertaker arrived he was greeted with a laugh from the supposed corpse, who was sitting up talking to friends.

May Use Magnet to Raise Ships

Submarine Invention Passes Salvage Test of the British Admiralty.

LIFTS 16 TONS OF METAL

Believed That Much of Steel and Metals Lost Through Operations of German Submarines May Be Recovered.

London.—Fishing with submarine magnets for allied ships which strew the bottom of the North sea and the English channel may be attempted on a large scale in the near future if an invention recently placed at the disposal of the British admiralty proves to be practicable in deep-sea salvage operations. It is believed that the device may recover much of the loss in steel and metals caused by the submarines. It is also probable that it may, to some extent, replace the deep-sea diver.

The "submarine electro-magnet" is octagonal in shape, three feet in width between the opposite sides, two and a half inches in depth, weighs seven hundredweight, and is strong enough to lift 16 tons of metal. In salvage work three magnets will be employed simultaneously, in order to get a good hold on the larger sections of armor plate.

Gigantic searchlights will first be turned on the wreck, and after the vessel has been blown to pieces by explosives the magnets will go down to search for anchors, chain cables and pieces of metal. The power will be sufficient to raise all fragments of metal, even though they be encased in wood.

The mechanical diver's possibilities were demonstrated recently at an exhibition at the Albert docks, Silvertown, attended by representatives of the British admiralty, the Port of London authority and the salvage and shipbuilding companies. Into 36 feet of water were thrown several steel girders weighing two tons, some gas cylinders, castings, a section of railway switch and other metallic objects.

Brought Up Girders.

Swung by a crane, the magnet dived and, to the amazement of the witnesses, came up with the steel girders glued to its under side. The operation was repeated until the last piece of metal had been raised.

At one stage of the demonstration there was lively competition between a human diver and the diving magnet. The steel railway switch, owing to its peculiar shape, could not be located until a diver had gone down and placed the magntt in contact with the rails.

"The magnet is not intended to supplant divers," said Mr. Neale, head of the Neale Magnet Construction company, in charge of the development of the invention. "It will be of value chiefly in cases of wrecks in deep water, or silted up, where divers cannot go.

"It will also be used for loading and unloading vessels, discharging metallic ores, lifting machinery and loading steel sections from rolling mills. A current of 16 amperes, at a pressure of 220 volts, supplies the power."

Paper From Eucalyptus.

Perth.—Good paper can be made from the common eucalyptus, experiments ta that effect having been made in West Australia. Various state governments and private interests have contributed upward of $100,000 for the erection of plants and the installation of machinery for further investigation into the matter.

Coal has been found valueless in the best porcelain furnaces, the fumes discoloring the ware.

They Got Mr. Lloyd George's Number

These two women really got Premier Lloyd George's number. It was K-2252, and he gave it, as required by law, while on his way to vote in Caxton hall during the recent abbey election.

FRANCE IS FAST COMING BACK

Country Making Rapid Recovery From Ruins of War.

Houses Arise From the Ground and Fields Covered With Promising Crops—Population of Devasted Area Optimistic.

Paris.—An impressive picture of the extent of France's achievement in restoring her war-ravaged regions is afforded by M. Loucheur, the minister of liberated regions, in a public statement entitled "The Revival of France."

Official statistics of the destruction caused by the war and the reconstruction accomplished up to May 1, 1921, the minister states, show that "the France of today is the same as France of yesterday, and that in peace as in war she continues to work with steadfastness, courage and confidence."

After showing that 5,154,000 of the 68,400,000 Frenchmen from 19 to 50 years of age mobilized during the war were killed or wounded, the statement presents the following statistics of civic reconstruction.

Inhabitants—Deported because of the war, 2,500,278; returned to France, 1,975,798.

Municipalities—Abandoned, 3,256; re-established, 3,216.

Schools—Before the war, 7,271; re-established, 6,830.

Houses—Destroyed, 789,000; rebuilt, 10,213; repaired, 326,700.

Land—Devastated, 8,240,000 acres; cleared from projectiles, wire entanglements and trenches, 6,881,000 acres.

Agriculture—Farm land devastated, 4,571,000 acres; farms now cultivated, 3,420,000 acres.

Live Stock—Horses and mules carried away, 367,000; restored, 96,303; oxen carried away, 530,000; restored, 120,263; sheep and goats carried away, 469,000; restored, 121,164.

Roads—Destroyed, 32,960 miles; temporarily repaired, 18,825 miles; definitely repaired, 8,426.

Factories (each having at least twenty employees, 1914), 5,297; destroyed, 4,700; resumed operation, 3,645.

"France took up arms only in self-defense, endeavoring at the same time to maintain justice and liberty for the world," said M. Loucheur. "For nearly five years her richest provinces have endured continual martyrdom. And yet by her own means the ruins are reviving, houses arise from the ground, fields are covered with promising crops. The populations of the devastated areas believe that they can rely on the spirit of solidarity of all those who have measured the magnitude of their sacrifice and understood their unquestionable right to the fullest reparations."

Find Buried Treasure.

Berlin.—Twenty million marks' worth of gold and silver, which is believed to have been hidden by Germany's legendary "Capt. Kidd"—Claus Stoertebecker—has just been dug up near the North sea coast, said a Hamburg dispatch to the Neue Berliner Zeitung.

YOUTHFUL DREAM

By MILDRED WHITE.

Copyright, 1921, Western Newspaper Union.

Barrie, in college days had been an athlete, and fond of the great out of doors. Resting beneath a spreading tree, with arms clasped idly above his head, he had dreamed dreams of an adventurous future with some congenial "nut-brown maid" by his side. Instead, Barrie had fallen early in love, and sacrificed his dream to necessity.

It was his adverse fortune, to love, and marry a white flower of a girl, who, unlike the hardy brown-tanned maid of fancy, exacted tender care and the support due the clinging vine. Barrie tried not to love Lillian; stubbornly he had fought against her charms, all to surrender the more eagerly at last. And Lillian proved a good wife, faithful to the details of his home keeping, sweet natured always, and lenient to his whims.

When Barrie, irritably insistant, grumbled at the confines of city life, Lillian, unmoved, packed his bag and cheerfully bade him good-by, as he hurried woodward on some lonely vacation. Sometimes it seemed he was really hurrying away from Lillian. Her dainty perfections wearied him. But after dogged days of freedom, tramping unfamiliar country or fishing in wild and isolated places, Barrie was sure to come, shamefacedly and humbly, back to Lillian's welcoming hospitality. Her smile would be as sweet when he returned as it had been on his departure. And this satisfied imperturbation of her's brought to him merely impatience. Mallory came back to the office one day with enthusiastic tales of a month spent out West.

"Give me your route, Mallory," he said brusquely, and the next day found Barrie on his way to the lonely places.

The office could manage well at this time, he said, without him. When he was on his way, Lillian called Mallory to ascertain any possibility of danger in Barrie's outing. To her Mallory enthused on life in the open, as he had to her husband. When Lillian turned from the telephone the wondering light in her eyes gave place to understanding. Barre's first weeks on the ranch found him joyously content.

"This is something like it," he told Dan of the ranch, "this morning's ride was like a tonic."

Big Dan smiled.

"You take it alone tomorrow," he said. "I'm going over early to Hastings. At Hastings—" Dan's smile changed to a conscious laugh—"there's a new girl. Not any like her in this part, so we all go over to see her.

"She makes the kind of flap-jacks for the boys your mother used to make—and she lets us crowd into her cabin and eat 'em. Somebody's named her 'Prairie Flower,' out of a book he'd read; but say! that girl can ride! Goes flying on her white horse like a streak. She's as brown and red tanned as an autumn leaf, and she wears a red cap on her head—hair that's crinkly and brown, too, like a leaf, and when Prairie Flower laughs—say, it's like a lot of birds singing in the morning."

Barrie grinned.

"Dan!" he exclaimed, "you are in love."

"We all are," Dan answered.

"Dan," Barrie exclaimed, decidedly, "I am going with you tomorrow morning to Hastings. Not that I've any foolish notion concerning this ranch girl, but I do want—to taste some old-home-week flap-jacks."

Barrie scarcely knew, himself, what impulse moved him, but he was guiltily aware as the two rode out in the morning light together of a longing memory, persistently buried, of the nut-brown maid of youthful dreams.

It was, perhaps, by contrast that Lillian seemed almost wearisome in her perfect sameness. The boys were evidently stopping for their morning call at the picturesque cabin.

"She's got up early, I guess," a disappointed caller explained, "to ride over to Blue Ridge. She does that sometimes, with her big bulldog. Nothing can't hurt her with that beast around."

Satisfaction was in the gruff tone. Barrie realized now how protectingly the Prairie Flower was regarded by her rough companions. Determinedly Barrie cantered toward Blue Ridge.

"If she don't want anyone along, why do you go and disturb her?" Dan complained.

But something hanging in the cabin had caught Barrie's eye. An amazingly familiar something—a blue and gold embroidered apron that Lillian, across their own living room table, had spent many evenings working upon. Surely there could be no other apron so ingeniously original, for he, himself, had whimsically drawn this design on the blue linen. Instinctively and illuminatingly, the truth came to him. Lillian, in her faithful love, had followed to be near, in his isolation, and yet not to trespass. Lillian, growing and molding herself into an understanding of his old, longing dream. He opened his arms as she slipped from her white horse to run to him. Browned, yes, but starry-eyed and radiant.

"We will come here," she whispered after a time of silence, "whenever the longing seizes you, Barrie."

And Barrie's smile was a lover's smile, as he called her his "nut-brown maid."

Home Town Helps

WARNS AGAINST THE "UGLIES"

Architect Gives Wise Advice to Those Contemplating the Establishment of a Home.

The architects have passed through six lean years. Had it not been for the "uglies" that were erected they virtually would have been idle. Remodeling "uglies" into beautiful homes is about all the architects have done. However, if these houses had been designed and constructed right at first the remodeling would not have been necessary.

"Uglies," like the billboards, are doomed to destruction; popular sentiment demands that they be destroyed.

That the home must be beautiful, both interior and exterior, is readily recognized by every mother, as she realizes that it is the most essential element of the home and it is that which causes children to love and cherish it. That it should be furnished beautifully and should have good pictures goes without mention. Well designed furniture may be handed down through generations, and well planned and designed homes increase in value with age. We have houses in this country, built two hundred years ago, that are used today as samples of good work and architects look to them for precedent.

Young people who are about to build should consider it with great care, as building is a serious thing. They should invest in good magazines recognized for their good taste, study thoroughly every article, read also every criticism of these articles and then invest only in expensive things—in fact, those things they think they cannot afford to purchase; then buy one article instead of six that they think they need. In this way they will have established a nucleus from which they cannot depart. Moreover they will never desire a change, because beautiful things remain beautiful.

To those contemplating the establishment of a home I would say select your lot with a view to the future development of it. Do not invest in cheap additions that have been laid out on lines of the least resistance. Select a place surrounded by romantic conditions. Select a large lot, build a small house, add to it as you progress and be sure that the lot has sufficient restrictions to assure you that your investment will not depreciate and that your neighbors are of good report and intelligent.—Selby H. Kurfiss in Kansas City Times.

KANSAS CITY SHOWS WISDOM

Determined to Protect Its Pleasanter Streets From Billboards and "Uglies" in General.

Among the things which critics of the Anti-Main street school leave out of account, in the supposedly objective statement of their case, are the many healthy little movements in towns of the Gopher prairie section toward making two blades of grass grow, so to speak, where none grew before. Do you know the things for which Milwaukee ought to be famous besides its one-time beer? They are worth looking up. Do you know Kansas City? It is one of the pleasantest places to live in in these benighted "states," and it is so because its citizens have discovered that beauty pays.

Probably beauty, like honesty, is nobler when achieved for its own sake, yet it is something to achieve beauty even by the commercial route. And the parks, good streets, agreeable rather than ugly buildings, actually increase general real estate values.

They have coined a useful word in Kansas City—"uglies." They have an ordinance halfway through the city council—perhaps by this time it is all the way through—protecting the pleasanter streets from billboards, gasoline-filling stations and "uglies" in general. How this particular ordinance fares is not particularly important. The important thing is that the public knows what are "uglies" and is determined to do away with them.—Leslie's.

Urges Building of Fireproof Homes.

Fireproof homes, built to last, and standardization of plumbing supplies and builders' hardware were given as partial solutions of the housing problem by Dr. J. W. Stratton, director of the National Bureau of Standards at Washington, in an address to the New York building congress. Doctor Stratton said the greatest waste of housing was caused by fire, and this had an unquestionable effect on the shortage of homes.

"Recently I returned from a trip abroad, where I inspected the homes being erected there and which have been erected in the past for the laboring classes," he said. "Those houses are of fireproof construction and are built to last. The construction which has been going on in this country has been almost entirely of wood. Such houses will disappear in a few years."

Good Pantry Is Necessary.

It is to be regretted that so many of the smaller houses have no proper pantry or cupboard for the storing of food. A dry and well-ventilated pantry should be a sine qua non if food is to be kept in a wholesome condition.

SAVED FROM THE OPERATING TABLE

What Cheer, Iowa—"I am very thankful for the advice Dr. Pierce so willingly gave me, and wish to say that I did just as advised. I am now in the best of health and can truthfully say I do believe Dr. Pierce's medicines saved me a very serious operation. The doctors said I would have to be operated or I would never regain my health, but I decided to give Dr. Pierce's Favorite Prescription and Golden Medical Discovery a trial, and they surely have done wonders for me. My mother thinks these medicines can't be equalled anywhere and so do I. Dr. Pierce's medicines have to my knowledge, been used for at least 15 or 16 years by different members of our family, both male and female, and we can't speak too highly of them."—Mrs. Elsie L. Orrick.

Obtain Dr. Pierce's Family Remedies in tablets or liquid from your druggist or write Dr. Pierce, Pres. Invalids' Hotel in Buffalo, N. Y., for free medical advice.

Reinforced.

Two contractors of a type unfortunately too familiar were talking of some buildings which had collapsed before they were finished.

"Well, Billerton," said one, "you always have better luck than I do."

"Better luck? How's that?"

"Why, my row of new houses blew down in last week's wind, you know, while yours weren't harmed. All were built the same—same woodwork, same mortar, same everything."

"Yes," said the other, "but you forget that mine had been papered."—Harper's Magazine.

DYED HER DRAPERIES, SKIRT AND A SWEATER

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—advertisement.

Gentle Consideration.

"Charley, dear?" exclaimed young Mrs. Torkins, "you have often told me how fond you are of sitting under a tree and waiting for the fish to nibble."

"Yes."

"Well, I have resolved to make home as happy and comfortable for you as possible. I have bought a rubber tree and some goldfish."

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists or send 30c to The J. W. Cole Co., Rockford, Ill.—Advertisement.

Carried Her Troupe.

"They kept company for a long time before they were married, didn't they?"

"Yes; and they've kept company most of the time since. All her relations seem to live with them."—Edinburgh Scotsman.

THE ROMANCE OF WORDS

"BLACKMAIL."

IF, TODAY, anyone were to accuse the editor of a newspaper of accepting blackmail when he exchanges a year's subscription to his paper for a bushel of potatoes or to state that a merchant is guilty of the same practice when he trades his goods for farm produce they would probably be sued for libel. As a matter of fact, they would be only using the word in its primary sense.

In the early days of English history "blackmail" — derived from the word "black" and the French "maille," meaning rent—was applied to the rents received from tenants in the form of work or grain, in contradistinction to payments made in silver or white money (maille blanche). Later, when the feudal barons and freebooters of many kinds roamed the highways almost at will, they collected "blackmail" in the form of forced levies of goods and provisions from the inhabitants of the countryside or from travelers who fell into their clutches and the word fell into such disrepute that, under the Elizabethan laws, it was made a "felony without benefit of clergy."

It is doubtless from this law and the practice which necessitated it that the modern meaning of the word—now synonymous with hush-money or a bribe paid for the maintenance of silence—originated.

SCHOOL DAYS

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"CHARACTER" AND "REPUTATION."

AVOID the common error of confounding these two words, for there is a clear and sharp distinction in their meanings. Your character is what you are, in your moral nature, your abilities, etc.; your reputation is what your friends, your neighbors, the world, thinks of you. Your reputation may be ruined by a false accusation, but your character cannot be injured by anyone but yourself.

Abbot says, "Character is what a person is; reputation is what he is supposed to be. Character is in himself, reputation is in the minds of others. Character is injured by temptations and wrongdoings; reputation by slanders and libels. Character endures through defamation in every form but perishes where there is a voluntary transgression; reputation may last through numerous transgressions, but be destroyed by a single, and even an unfounded, accusation or aspiration."

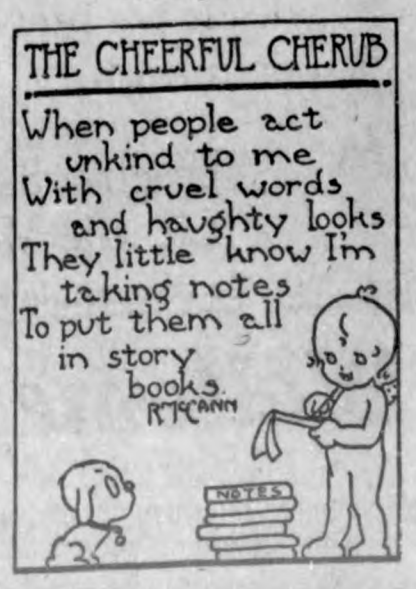
THE CHEERFUL CHERUB



DAIRY THE

SCHOOL GIRL SHOWS ABILITY

Makes Good With Small Herd of Cows and Is Successful With Chickens and Hogs.

(Prepared by the United States Department of Agriculture.)

Elizabeth Fariey is a seventeen-year-old club girl, a senior in the high school at Amherst, Mass. About four years ago, after experimenting with the 4-H garden and poultry clubs of the United States Department of Agriculture for several years, she decided to purchase a cow. Her father attempted to discourage her, saying that she had no knowledge of milking and no place to house an animal. Her father went away for a week-end trip, however, and when he returned he found that Elizabeth was the owner of a registered Jersey cow which she had learned to milk, and for which she had rented a stall in a neighbor's barn. Profits from previous poultry work supplied the funds for this venture.

Elizabeth remained in club work and because of the demand for milk purchased other registered cows and calves. For two years the cattle had to be staked out every day in a pasture 10 minutes' walk from the house, and as the pasture brook dried up she had also to carry water to them. One cow nearly died of sickness. Until a year ago Elizabeth did all her own work, including delivering the milk.

Her next live-stock venture was a bred registered Chester-White sow. This sow had a litter of 13 pigs, 10 of which lived, although the sow became sick and died later. When Elizabeth purchased 200 day-old chicks. As they grew she sold the cockerels and some of the pullets, reserving the others for winter laying. A year ago she found that she needed pas-

High School Girl and Her Jersey Cow and Calf.

ture and hay land so she bought 12 acres of land, for which the cows are paying.

At the present time this high-school girl has nine purebred Jersey cows and four calves valued by specialists in the Agricultural college at $3,000. She hires two boys to help care for the herd and milk the cows. She delivers 80 quarts of milk daily in an old milk wagon which she bought this summer for $5 and repaired herself. She grows her own feed on her own land.

In addition to her dairy herd she has a large flock of chickens, a number of purebred pigs, and a horse. Her entire indebtedness is one note for $300. Elizabeth is planning to go to the Massachusetts Agricultural college as soon as she has finished high school.

TROUBLE WITH POUR SILAGE

Moldy Condition Not the Result of Leaky Silos, but Due to Lack of Moisture.

Many farmers have trouble with moldy silage. Now, moldy silage is usually not the result of leaky silos, although air leaks in the silo will bring about mold. Practically all silos that are put up nowadays are air-tight; but moldy silage is frequently found in air-tight silos. Whenever mold is found in silage one may be almost certain that there was a lack of moisture when it was put in. When the stalks are somewhat dry it is impossible in packing and in settling the silage to get rid of all the air, which must be forced out if mold is to be prevented.

CLEANLINESS IS IMPORTANT

Utensils Must Be Kept Clean by Sterilizing, Not Simply Washed to Remove Impurities.

Cleanliness is godliness, especially in the dairy business. All the sanitary precautions taken for housing the dairy herd will be of no avail, if the utensils used in handling the milk are not kept clean. To be sure such utensils are clean, they must be sterilized, not simply washed to remove impurities that may be seen.

POULTRY

TURKEYS FOR THANKSGIVING

Six Weeks in November and December Constitute Duration of Market for Big Birds.

(Prepared by the United States Department of Agriculture.)

The American public demands turkey for Thanksgiving, and gets it usually if it is humanly possible. On no other festival of the year do the people of this country feel it necessary to have any one kind of meat, but Thanksgiving without turkey is like Hamlet without the ghost to most Americans. Many serve turkey at Christmas and New Year's also, but after the holiday season is past the demand for turkeys is usually small. This makes the marketing season for turkeys very short, running as it does from the middle of November to the latter part of December.

In sections where turkeys are grown in large numbers, as in Texas, dressing plants have been built by poultry

Many Turkeys Are Prepared on the Farm for Market.

dealers, who buy the birds alive and dress them for the various city markets. In such cases practically all the turkey raisers sell to these dealers, who often send buyers out into the country to gather up a drove of several hundred birds by stopping at each farm as they pass, weighing whatever turkeys the farmer may have to sell, and adding them to those already collected.

Turkeys to be killed and dressed on the farm should first be deprived of feed for 24 hours, but given plenty of fresh, clean water in order to clean the crop and intestines of all feed. When ready to kill, the bird should be hung up by the feet; holding the bird in one hand, a sharp, narrow-bladed knife is used to sever the veins in the throat by making a small cut inside the mouth on the right side of the throat, at the base of the skull. After making this cut and bleeding begins, the knife is thrust up through the groove in the roof of the mouth and into the brain at the back part of the skull. The bird gives a peculiar squawk, the feathers are loosened by a quivering of the muscles, and death is instantaneous.

In dry-picking, the feathers should be plucked immediately, and if the bird has been properly stuck they come out very easily. The tail and large wing feathers are removed first, after which the body feathers are pulled out. When the turkeys are to be marketed locally or are to be shipped but a short distance, they are cooled to a temperature of about 35 degrees Fahrenheit by hanging in the open air, provided the weather is cold enough, otherwise they are plunged into ice water and kept there until thoroughly cooled.

After cooling they are packed undrawn in boxes or barrels. It is inadvisable for the producer without proper refrigerating facilities to ship dressed turkeys, as losses from improper cooling and from their being exposed to warm weather during transit are liable to occur. Aside from this it is seldom profitable to ship turkeys any great distance except in carload lots; when this is done the turkeys are cooled to 32 degrees Fahrenheit, packed in boxes or barrels, and shipped in refrigerator cars.

YOUNG FOWLS BEST LAYERS

Seldom Pays to Keep Hens for Laying After They Are Past Two Years of Age.

There are people who have the right variety of fowls, who house and feed them properly, and yet who cannot obtain eggs early in the winter because their fowls are too old. It is seldom that it pays to keep hens for laying after they are two and a half years old; not that they will not give a profit, but because younger fowls will give a greater profit.

MAKE PROFIT OUT OF FOWLS

Farmer Should Keep Hens in Pink of Condition by Giving Good Care and Proper Feed.

Farmers should not endeavor to raise hens under natural conditions. For a hen raised that way is a liability rather than an asset. To make a profit out of hens a farmer should keep them in the pink of condition. This can only be done by giving extra good care and plenty of proper feed.

JOY BROUGHT INTO HOME

By Lydia E. Pinkham's Vegetable Compound, Restoring Mrs. Benz to Health

Altoona, Pa.—"I am writing to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. We have had six children die almost at birth. From one hour to nineteen days is all they have lived. As I was going to have another, I took a dozen bottles of your Vegetable Compound and I can say that it is the greatest medicine on earth, for this baby is now four months old and a healthier baby you would not want. I am sending you a picture of her. Everybody says, 'That is some healthy looking baby.' You have my consent to show this letter."—Mrs. C. W. BENZ, 131 3rd Ave., Altoona, Pa.

No woman can realize the joy and happiness this healthy babe brought into the home of Mrs. Benz, unless they have had a like experience.

Every woman who suffers from any ailments peculiar to her sex, as indicated by backaches, headaches, bearing-down pains, irregularities, nervousness and "the blues" should not rest until they have given Lydia E. Pinkham's Vegetable Compound a trial.

Like the Old Folks.

A bachelor who is forever putting his foot in it, recently visited the proud parents of a new boy.

The mother held up the bundle for the inspection of the bachelor and asked gayly: "Tell us, now, frankly, which of us do you think he is like?"

After a careful examination of the mite the bachelor answered: "Well, Marie, of course, intelligence has not yet dawned in his face, but he's wonderfully like both of you."

MOTHER! MOVE CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Hurry, mother! Even a sick child loves the 'fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Starvation Recommended.

Profiteering Landlord—Doctor, when I was poor I had a splendid appetite, but now that I am rich I don't appreciate good food and can scarcely eat at all.

Doctor—Forget your wealth and eat only what your tenants invite you to sit down to.—Wayside Tales.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

The whites may be used as a meringue or may be stirred into the filling just as it goes into the crust.

Codfish With Cream.

Shred the fish and then prepare as usual, then make a white sauce, using thick sour cream; thicken, using butter and flour, cook until thick and stir in the fish. This is delicious with baked potatoes.

The orign of free masonry, or even of its name, cannot be traced with certainty.

Mr. Wes Lenz returned from a Mason City hospital Tuesday.

Mr. H. Harberts of Goodell was a business visitor here Saturday.

Mr. and Mrs. John Atherton of Belmond were visitng here last week

rMs. A. Kirkwood of Goodell was a visitor here last Thursday.

Miss Minnie Lenz was a passenger to Garner Tuesday morning.

Carl Thomas was up from Goodell Tuesday on busines.

Mrs. Curtis Luick, of Goodell, was visiting here Tuesday.

Mrs. Hans Hanson returned from a Mason City Hospital Tuesday.

Mrs. Henry Helps and Mrs. Behringer went to Garner Thursday afternoon.

Mesdames M. O. Barr and Elmer Fuller went to Garner last Friday to attend the Rebecca Circle.

Mr. and Mrs. Nelson and son Hubert, of Belmond, were shopping in this city Thursday.

Mrs. Mille Smith and daughters Leoda and Mrs. Howard Doyle, visited friends at Mason City Thursdap.

Miss Marian Luick came from Belmond Saturday for an over Sunday visit with Klemme friends.

Mrs. N. L. Palmer returned from her visit at Burt and Algona last Thursday.

Mrs. J. Jorgenson. of Garner was a Klemme visitor Saturday between trains.

Ray Lillibridge left the other day for Wellesburg Iowa, to see his brother who is sick.

Mrs. Rickahaw, of Wellesburg, came Saturday for a visit with her daughter, Mrs. Ray Lillibridge.

Mrs. Chri Gram went to Goodell Tuesday for a visit with her parents and friends.

Mr. and Mrs. John Hatheron, of Belmond, were vistors in this city yesterday morning.

Mr. and Mrs. Lau Wesenberg, of Goodell, were shopping in Klemme Tuesday.

W. H. Trafford and family moved to Belmond Monday. Paul Grange and familymoved into the house vacated by them the next day.

Miss Madeline Richter, nurse of Garner, came last Thursday to care for Wm. Black. He is reported to be on the road to recovery now.

Mr. and Mrs. Fred Musfelt and Mrs. Lanahan and daughter. Laura, were visiting at Mason City Thursday.

Dr. R. M. Thomas now has his office at the Wellemeyer Department Store. If you want to see the 'vet" you can get him there.

A. Riekens and wife of Meservey were in Klemme Saturday. They had been visiting at Buffalo Center and were on their way home.

Hugo Neff came ovevr from Ventura to spend Sunday with Klemme friends. Hugo clerks in the Kloover store at Ventura.

Mr. and Mrs. P. M. Griesemer and Mr. and Mrs. John Gruetzmacher drove to Burt, Iowa, Tuesday for a visit with friends.

John Coobs, of McGregor, Iowa, came Friday for a short visit at the W. F. Pavey home. John is farming there and likes it very much.

Adolph and Ingvard Lauritzen drove to Ringsted, Iowa, Saturday afternoon and returned the following night.

A baby boy arrived at the home of Mr. and Mrs. Henry Lempke last week Wednesday. Henry is too busy looking over the new boy to sell any Standard oil for a time.

Mr. and Mrs. Lew Sampson left Friday evening for Fort Madison. Wis,. to spend part of the Winter visiting at the home of their daughter, and other relatives and friends.

Mrs. G. P. McCullough received a visit Tuesday evening from Miss Clella McCullough of Garner, who was accompanied by Mrs. Miles Crowly, of Pocohontas, Iowa. The ladies remained until the following day.

Chas. Papousek came over from Belmond the latter part of the past week and done some electrical wiring for the Northern Lumber Company. They have their building about finished now.

C. M. Bredbenner and family left Monday morning in their car for Kansas for a visit with relatives and friends. They may also go to Indianna but would make that trip via rail.

Mrs. Mille Smith celebrated her birthday anniversary Sunday when her children, her mother Mrs. Brooks and Miss Laura Brooks and Howard Doyle helped her eat a big birthday dinner. She was also presented with a beautiful library table reading lamp in remembrance of the day.

Dr. George Zinn returned from his Canada trip and blew into the old town Monday afternoon—just in time to help the boys celebrate Hallowe'en. Doc. says he had a fine time and that re enjoyed every minute of his stay. He reports that his father is fine.

The boys did not forget about the observance of Hallowe'en if one took a look at our Main St. the following mornin. Old machinery, cows, kegs, boxes, signs and the usual assortment decorated every available location. The boys work real hard at least once a year, even if they do but little the rest of the year.

We have a letter from Rev. and Mrs. Meyers, who are located at the Edgewood, Iowa, charge. They like it very well there and have a fine congregation, a new church and a modern parsonage. Reverend, however misses "side-kicks" who were in the habit of having a daily "blowing match" with him every day.

Harl Gimer had the misfortune of being quite severely injured on Hallowe'en night. Some of the boys were endeavoring to move an old tractor to a more appropriate location and were pushing it back and in some manner Harl's foot got under one of the lugs on the big drivers and it passed over his foot breaking the bones. He was taken to a hospital the following day to have it set in place again. He is getting along fine at this time.

Cod liver oil is about 250 times as potent in food values as butter.

Rats are found in every part of the world, except the polar regions.

The sting of a bee is only about one-thirty second of an inch in length.

Over 62,000 private wells were damaged or destroyed in France during the war.

Brain troublt is due in almost every instance to bodily illness or disturbance.

John D. Rockefeller haas tranferred his fortune to his family, to obviate paying his death duties.

SHOW VALUE OF CREOSOTE

Posts Treated 15 Years Aga Still In Good Shape

Fence posts that are treated before used pay for the cost of treatment in the lengthening of their life, according to the forestry department at Iowa State College.

In 1905 twenty experimental fence lines were set in various counties of the state in co-operation with the farm owners. Posts cut from the common Iowa woods were used. The species set included willow, cottonwood, soft maple, basswood, box elder, ash, butternut and others, which were treated with creosote by the "open tank" method.

After 15 years of service in fence lines, a large percent of these creosoteed posts are sound and give evidence of being able to understand decay for an additonal number of years The same timber when used without creosote treatment lants only five years. The results indicate the desirability of using the inferior soft woods of the state for fencing purposes.

The experiments also demonstrate the great saving which may be effected in creosoting the white cedar and other posts shipped in from other states. Approximately 25,000,000 fence posts are used aannually in Iowa. If creosoted posts were used entirely. the annual consumption of the posts in the state would be reduced to 10,000,000 or 12,000,00.

GIVE HENS CORN RATION

A Cheap Feed and It Returns Good Value

Corn is a good ration for hens if properly fed, says J. L. Gordon, poul try specialist with the extension service at Iowa State College. Corn is fed in a mash will bring a good return in eggs and as a cheap feed it's hard to beat. One bushel of corn will make feed for 10 hens.

Corn fed alone is too rich in fat producing elements and will tend to stop laying but if it is balanced with protien as a mash it makes an excellent feed.

A good mash to feed dry during the winter is made of 200 pounds of ndground oats, 100 pounds of ground corn and 100 pounds of 60 percent tankage. Feed this in self feeders so that it is before the hens at all times. The tankage furnishes the protein part of the feed and should not be omitted.

Where hens are confined to small quarters they should be given a scratch feed in the straw consisting of shelled corn wheat or oats in equal parts. One pound of scratch feed per week will keep one hen working.

In mixing mashes it is well not to mix over two weeks supply at a time as they often spoil by moulding. Moldy feed is detrimental to poultry and will cause serious disorders among the flock.

RAISE OWN FEEDERS

That's The Way to Profitt in Cattle Business

Iowa farmers should raise their own feders if they expect to get the greatest profit out of their cattle feeding ndustry, says Rex Beresford animal husbandry expert with the extension service at Iowa State College.

"Any farmer with a little capital can buy old cows that are of fair type," says Mr. Beresford. and by using a good sire he can soon raise some young stock that will use up his corn and roughage to a better advantage and return more profit than otherwise could be gotten from it.

"Cornbelt farmers should raise own feeders. Each year there is enough feed wasted on the average quarter section in the cornbelt to feed eight or ten head of cows thru the winter."

Many Iowa farmers acording to Mr. Beresford, have figured on going into this business of raising their own calves and have failed because they did not use good sires. With the proper bulls—and they are purebreds—it's easy to start. A herd of 20 cows will warrant keeping a good sire. If the farmer has only a few cows, he had better hunt them up a neighbor in a similar fix and buy a good sire together.

"The farmer always pays for a good bull whether he has one or not.' says Mr. Beresford. "If you do not have one the price is paid in the low quality of the stock and the low price received. With a good bull the cost is soon returned to the farmer. It takes good sires to get good returns in cattle raising."

The first aerial time table, consisting of nearly 100 pages, has appeared in Germany.

A new form of phonetic writing in Chinese is being adopted, so complicated is the present system of writing that language.

KITTEN'S NEW HAT.

MISS KITTEN could hardly wait for Sunday, so proud was she of her new hat, and she was quite sure she would not only be envied by all the other Pussies, but she would also be the handsomest Puss at church.

Miss Kitten had been working a long time collecting the trimmings for her hat and I am sorry to tell you that it was trimmed with wings and feathers.

Yes, Miss Kitten was not a friend of the pretty little bird that lived near her home and she had feathers

of all colors with which to trim her hat, which proved how naughty she had been.

On Sunday she was up early, and as soon as her house was in order off she tripped dressed in her new hat for church.

It happened that she had to pass through the woods and Willy Bluejay, who was sitting on a limb of a tree near the road, and saw Miss Kitten.

"Chatter, chatter, chatter!" said Will, which meant in bird language, "You thief, you thief!"

And off flew Willy Bluejay to tell all the birds in the woods that Miss Kitten was coming dressed in her new hat trimmed with the wings and feathers of their relatives.

When Miss Kitten reached the middle of the woods there on the trees and bushes, out of her reach, of course, sat hundreds of birds, chattering like mad.

"You are a thief, you wicked cat!" they shrieked at her, "you killed our children, you killed our mother, you killed our father, you killed our sister and you killed our brother."

At first Miss Kitten did not notice them, but as she walked along they flew over her, still screaming.

Just before she reached the end of the path out of the woods down flew Willy Bluejay and picked off a feather from her hat.

Seeing his daring, Tommie Sparrow grew bold and down he swooped and took the hat right off Miss Kitten's head.

"Pick out her eyes! Pick out her eyes!" cried all the other birds, flying around her, until Miss Kitten was so scared she ran.

But the birds followed, screaming and flapping their wings, and at last Miss Kitten had to take refuge under some old boards and stay there until dark.

Then out she crept, all her vanity gone, and never again did she bother the birds or have the least wish to trim her Sunday hat with feathers.

Alice Terry

Handsome Alice Terry, the "movie" star, is eighteen years old. Nature has fairly showered her with beauty. She is rather above medium height; her skin is like silken damask, tinted with rose pink. She has an oval face, crowned with a mass of spun gold hair; eyes of blue and a winsome mouth.

LATEST IN THRIFT

By ADDIE GRAVES.

© 1921, by McClure Newspaper Syndicate.

Old Jim's third wife was dead. All three had been cross-eyed. Two of them—the first two—had been sisters. It seemed as though Jim was obsessed over crossed eyes. A wife without crossed eyes would not seem a lawful wife. Crossed eyes had not crossed his business luck, at any rate, for Old Jim was worth at least $100,000.

And he could not write his name or measure a load of the lumber which had brought him his fortune.

But he had a way of managing things so the profit balance came out with large per cent. He was very thrifty—so thrifty that when he had the third casket to buy he sought some way to economize.

In his estimation, funeral expenses were wasted expenditure.

He immediately sought the undertaker. This learned gentleman was unboxing the casket of the third cross-eyed wife. Old Jim approached him with no squeamishness.

"Say, John, how much are the handles on the casket valued at?"

John dropped the claw hammer on his big toe and said things not supposed to be said in the presence of caskets. Then:

"I dunno; they allers come on—the same sort on the same sort of caskets; never hed any special orders."

Old Jim viewed the handles as though with begrudging envy. "Well, John, it's awful foolish to bury them handles. Casket handles should be detachable—should be kept with the stands for holding the casket during the service. You just take them off and return them—after the folks has left the cemetery—before you fill the grave. Send them back and get them discounted from the bill."

John carefully straightened some nails he had drawn from the casket box before he replied:

"All right, Jim; maybe it will save enough to pay the minister next time."

Jim lit his pipe, drew in a whiff of smoke, exuding it from his nostrils, threw the match out the window and departed in seeming blank-mindedness. John slammed the door with: "The d—d—d—d I don't-know-what!" The next winter the undertaker died with influenza. His wife had an auction and Old Jim Fuller bought a large box of small assorted hardware. Among the articles were the casket handles, which he had now paid for twice—both times unknowingly. The village doctor spied the handles and offered Old Jim a dollar for them.

A short time after this, Old Jim brought home wife No. 4. Strange it was, her eyes were straight—straight from a clear brain. She proceeded to make the money—and other things, including Old Jim—fly. First, she bought a load of nice, expensive wallpaper and paint and sent for the village decorator. He came without his papering board, for he knew Old Jim had brought a fine board home from the mill for the cross-eyed wives to do the papering in by-gone days. He knew it was in the attic. The new Mrs. Fuller accompanied the decorator to the garret in search of the board. The man pointed to a long row of old hats and bonnets hanging on some nails under the eaves.

"You see them bunnets? Yours will be hanging on that next empty nail some day, keeping them company."

The straight-eyed wife's eyes almost burned the "bunnets" with lightning flashes. She grabbed them all—her two arms full, some hanging by withered strings, and flung them from the window, when they slowly floated toward the mill-dam.

"Not by a dam-site!" she said, with a grim grin. "Jim's hat will hang there!"

In a moment they had discovered the papering board. The paperhanger continued his free informing: "This board has held all the bodies of Jim's wives. They were all laid out on it. It will hold you some day. Then it followed the "bunnets."

In a box near the board were some paste brushes and a pair of casket handles. The straight black eyes bulged.

"What—what are those?"

The paperhanger pretended not to hear. A female hurricane swept toward him.

"If you must know, they are the handles of the last wife's casket—saved to put on yours." The handles did not follow the "bunnets" and the board. A laugh, as when the lightning hits a granite rock and skids down its sides, split the air. The three cross-eyed wives had wept little April showers, most days in their dreary, drudging lives. The straight-eyed wife went down to the telephone and ordered a new horse—the best in the stable—a harness and a new buggy. Those were the times before cars were invented or the buggy would have been a limousine.

Old Jim, that winter, fell and broke several ribs. Complications set in and his hat hung on the attic nail. He was buried in a cheap coffin—exactly like that of his third wife's. It was delivered without handles. The handles from the attic lowered his casket in the grave. The straight-eyed wife straightway found a new husband, sold the house where three stoop-shouldered, sad and cross-eyed wives had slaved, and departed to another town. The handles were at last beyond resurrection.

Old Jim's thrift was applied to himself.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

THE YOUNG MAN GUEST

Life is not so short but that there is always room for courtesy—Emerson.

STRICTLY speaking the invitation bidding a young man to be the guest of a household should come from the mother or wife, or whoever acts as hostess of that household. Actually one young man often invites a chum of his to be a guest for a day or two, and the mother does not send the letter of invitation that the strictest good form would demand. There is no great crime in this, only the young man who writes the invitation should word it so as to make it evident that his mother extends the hospitality, and in answering the invitation the one invited should be sure to bear this fact in mind and whether he has met the hostess-to-be or not he should express his gratitude to her for her kindness in wishing him to be a guest.

If you have visited in the house before it is courteous to take to your hostess, or have sent, so that it reaches her shortly before you do, with your card enclosed, a few flowers or some bonbons.

Never smoke without gaining permission of your hostess. If there are no other smokers in the family do not ask for permission.

If you see that others make a habit of smoking in the house then you may ask for permission to smoke even though none of the others are smoking at the time.

Do not plan to accept outside invitations or to leave the house when you are a guest without consulting your hostess. She may have something arranged for the same day and hour. If you are to have very important business engagements that cannot be broken during your visit you should make the fact known at once so that no plans will be made for the time involved.

Remember that while you are the guest of the family you should show many little courteous attentions to the women of that family. If there are young daughters it would be decidedly rude to devote yourself markedly to some other young woman whom you perhaps might feel more interested in than in the young women of the family where you are visiting.

Remember that it is just as important and necessary for the young man to write a bread-and-butter letter to his hostess as it is for a young woman to do. This letter should be written within one or two days of your departure. A married man may leave this to his wife to attend to but the unmarried man must write for himself, even though perhaps he has a sister who has been a guest of the same household and is willing to include his expression of gratitude in her note.

OTHER night I gotta invitash come play da poker game. I never play dat game before and I dunno ver moocha bout. Dat bunch say I can maka plenta money eef I getta righta cards.

One guy aska me how moocha chip I lika to buy. I say no wanta buy any. I no gotta use for da chip so wot I wanta buy for. But he tella me gotta hava da chip for play weeth. So I trada five dolla for leetle stack. I tink he cheata me, too—I could buy dat chip any place for twenty-fiva cent.

He tella me eef I gotta two cards sama kind was one pair and was preety gooda hand. He say tree of a kind was better and eef I gotta four cards sama kind he tella me betta every one dat chip I gotta.

So one guy divida dat cards up weeth da whole bunch. He tella me no letta anyone see wot I gotta. So I geeva look and every one dat cards was sama kind—peecture of man rida bicycle. I count and every one da fiva was sama thing.

I putta hands over dat cards and when he tella me maka da bet I betta alla my chip and alla my money, too. I geeva one more look and every one dat cards was sama ting.

One other guy maka bet weeth me and aska wot I gotta. I say five cards sama kind. He tella me turn 'em over. I turn 'em upside down and I gotta two, seex, ten, five and somating else. On dat side was deefrent every one, but da other side was same kind.

Dat guy taka my money and tella me I am craze een da head. He say I betta wrong side of da card. But how I know wheecha side was da rigto one? Even da ball gama you can taka da choice wheecha side betta on, but can maka money only one side een da poker game. Mebbe dat guy was right wot tella me I am craze een da head, I dunno.

Wot you tink?

How It Started

HOME HEATING PLANTS.

THE first attempt to heat houses by hot air was probably made by Benjamin Franklin. The first hot-air furnace was built at Worcester, Mass., in 1835. Heating by hot water is of great antiquity, the Romans having used this method in their great baths. In 1777 M. Bounemain proposed this method for heating the hothouses in the Jardin des Plantes, Paris. The first idea of heating by steam was introduced in England in the Eighteenth century by William Cook of Manchester.

I'VE known a human of such strength
That he could hold at fullest length
The full weight of a man, yet he
Was weak as foam upon the sea,
For when by some misfortune stung
He had not strength to hold his tongue,
And with lament and wrathful curse
Made bad enough so much the worse.

Careful Buying.

The Jeweler—"Yes, we have cheaper wedding rings, but they're only plated and won't last more than a year or two." Titus Wadle—"I'll take one of them. If my marriage outlasts the ring I can have it replated."

WOULDN'T STAND FOR REBUKE

Beggar Woman Had Her Own Point of View Concerning "Business" She Was Engaged In.

Secretary Lawson Purdy of the Charity Organization society said at a dinner in New Yok:

"Professional beggars are a self-righteous crew. What I mean is that they regard their trade the same as you and I regard honest work. One winter afternoon I came on a beggar woman I knew of old. She was begging in a bitter wind on a corner, and three little children in calico rags shivered at her side.

"'You—Jane,' I said reproachfully. 'You—begging! And those three little ones! They aren't really yours at all!'

"'Well, damitall,' said the beggar woman. 'I wouldn't have to beg so hard if they were really mine, for then I wouldn't be forking over a dollar a day to hire them.'"—Los Angeles Times.

There approaches an open season for football casualty lists.

The Place for Alphonse.

"Alphonse," said the heiress, "I have been thinking.

"Thinking of me, precious?" asked Alphonse.

"Indirectly, yes; I have been thinking that if you married me, everybody would say you only did so to get my money."

"What care I for the unthinkable world?"

"But, Alphonse, I will marry you."

"My own dar—"

"And I will not have people say unkind things about you, so I have arranged to give my fortune to the missionaries. Why, Alphonse, where are you going?"

Alphonse paused long enough on his way to the door to look back and mutter: "I'm going to be a missionary."

Island Reclaimed by Ocean.

Off the northwest coast of Australia there used to be a beautiful island 13 miles long. But it gradually sank until it disappeared entirely, and at the latest reports of sounding, it was found to be 50 feet below the surface of the water.

You remember the story of the Pitcher—

It made a good many trips to the well and it came back in good order.

"I can take care of myself," it said—"they don't need to talk about risks to me."

But it went once too often.

After that it was only part of a pitcher, and they didn't need to talk to it about risks—it knew.

A lot of people won't believe coffee can harm them until it does harm them.

"Nonsense!" they say, "it never disturbs me."

When it does disturb them, then they know.

Often the disturbance which they then recognize is the result of irritations to nerves and digestion which have been going on for a long time.

If you have to lie awake at night and count the clock ticks, after an evening cup of coffee, then you know that it's better to be safe than sorry.

The risk of coffee's harm is gone when the meal-time drink is Postum.

Here's a delightful and satisfying table beverage, with charm for the taste and without harm for nerves or digestion. You know you're on the right road with Postum; there's never the possibility that you'll go once too often.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

"There's a Reason" *for* Postum

Made by Postum Cereal Company, Inc., Battle Creek, Mich.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL.

MARCIA.

MARCIA has an ancient origin. In early Rome there was a famous gens of Sabine origin which gave a king to Rome and was called Martius. Martius in turn is said to come from Marcus, a name about which there is much contention among etymologists. However, the consensus of opinion seems to be that it was derived from Mars, the war god, and one of the chief of the old Latin deities.

The daughters of the Martius family were called Marcia. Another spelling was Marsia. Reaching France, the name became Marcie and of late years when Marcia returned to vogue she was used as the feminine of Mark.

Martina is another form of Marcia, the original Martina being one of the young Roman girls who endured the fiery trial of martyrdom under Emperor Decius. For some reason which history does not explain the maidenhair fern became identified with her and its prevalence in Roman gardens and as an ornament to Roman fountains is said to be in her honor.

Her name penetrated Italy, France and even England, where it was used as the feminine of Martin. But it has almost dropped out of usage, Marcia alone surviving.

The cat's-eye is Marcia's talismanic stone and is a charm against evil spirits. It is said to protect her against the treachery of others. Thursday is her lucky day and 6 her lucky number.

Had Good Brakes.

Master Robert Morton is three years old and lives at Otwell, Ind. One evening he was watching his father milk the cow. Annoyed beyond endurance by the flees, the cow finally kicked over the milk pail and headed for the pasture.

Robert's father ran to head off the cow with the result that she stopped quite as suddenly as she started. That feat pleased Robert and he called excitedly: "Gee, dad, she's got good brakes, ain't she?"—Indianapolis News.

PREVENT LOSSES IN SHIPPING HAY

Invoices Should Precede Car and Contain Full Details Concerning Consignment.

FOLLOW INSTRUCTIONS GIVEN

Exact Weight of Hay and Number of Bales in Car Should Be Stated on Bill of Lading, Together With Its Grade.

(Prepared by the United States Department of Agriculture.)

Careless and inaccurate billing or invoicing are responsible for much of the delay and losses experienced by hay shippers, says the bureau of markets and crop estimates, United States Department of Agriculture. Accordingly the bureau has prepared the following suggestions that apply to the shipment of grain as well as hay:

Follow billing instructions in detail, naming route and delivery road when requested.

Forward bills of lading and invoices promptly.

Prepare invoices carefully, stating car initial and number, date of shipment, number of bales, total weight of car, or of each particular kind or grade, and price data when available.

Follow Instructions Closely.

If the billing instructions furnished by the consignee are not clear, it is generally a better plan to hold the shipment until satisfactory instructions are received than to take the chance of billing it incorrectly. When specific instructions as to routing or delivery are given they should be followed in detail, as it is frequently the case that shipments arriving over roads other than those specified must be switched at considerable cost before delivery can be made at the desired location. In many markets hay shipments arriving in certain railroad yards will not sell as advantageously as when they arrive in other yards because of unfavorable switching facilities or because of the distance of the yards from buyer's warehouses. Commission merchants and dealers in the markets are familiar with these factors and, when possible, request billing that will not subject their hay shipments to these handicaps.

Buyers may also desire to reconsign their hay upon arrival or change the billing while the car is in transit; but if the hay is shipped via another line from which they cannot reconsign the shipment, they may suffer a considerable loss which can be charged back to the shipper, if he has not followed shipping instructions.

Forward Bill of Lading Promptly.

When the bill of lading has been signed by the railroad agent it should be forwarded promptly to the consignee, unless it is desired to attach a draft to it, in which case it should be placed in the bank for transmittal to the consignee at the earliest possible moment. When cars are shipped only a short distance, and especially if billed to shipper's orders, the bank should be directed to forward the draft and bill of lading direct to consignee's bank, if known; otherwise to a bank in his town. If this precaution is not taken the bank may follow its usual custom of sending the documents through the regular channel of corresponding banks, which may delay delivery to the consignee until after the car of hay has arrived and been placed on demurrage.

Selling Hay at Terminal Market.

In addition to careful and accurate routing of the shipment, the exact weight of the hay and the number of bales loaded into the car should be stated on the bill of lading, and it is also a good practice to state the kind and grade of hay comprising the shipment.

Making the Invoice.

When a car of hay is consigned to a dealer in a distant market a letter to him stating that a car of hay is being shipped is not sufficient information upon which he can arrange to the best advantage for its arrival and sale. Whether a car is consigned or has been sold on track or to arrive, a carefully prepared invoice should be sent the consignee at the time the car is shipped. Such an invoice should show the car initial and number and date of shipment. Also the kind and quality of hay, together with the number of bales and the total weight. If two or more distinct kinds or grades have been loaded, the number of bales and the total weight of each kind or grade should also be shown.

KNOWLEDGE ASSISTS IN SELLING TIMBER

Farmer Can Avoid Losses by Careful Study of Market.

Forest Service Offers Suggestions to Owners of Woodlands in Regard to Sale of Material of Highest Prices.

(Prepared by the United States Department of Agriculture.)

Woodland owners often sell their timber without having a sufficient knowledge of its market value to protect their interests, and suffer loss in consequence. Losses can be avoided only by a careful and thorough study of all available markets. The following steps may be of assistance in acquiring a knowledge of the sale value of timber, says the forest service of the United States Department of Agriculture.

Take advantage of the experience of neighbors who have recently sold timber or have otherwise informed themselves in regard to good markets and current prices.

Apply to the state forester, the county agricultural agent, or any other available public official or personal agency for sources of information and advice regarding possible markets and timber prices.

Losses in Selling Timber Can Be Avoided Only by a Thorough Study of All Available Markets.

Employ the services of some reliable man who has made a special study of market prices of logs and lumber. The saving gained thereby, unless the owner has had much experience along that line, may amount to from 10 to 40 times the cost of the examination.

Get into touch, through correspondence, with outside buyers, and thus awaken competition among as many prospective purchasers as possible. A live effort along this line will often bring about an open market for standing timber.

Determine the value of the material by reference to current market prices and the total cost of putting it on the market.

Additional information concerning the selling of farm timber is contained in Farmers' Bulletin 1210, Measuring and Marketing Farm Timber, copies of which may be had free by addressing a request to the Division of Publications, United States Department of Agriculture, Washington, D. C.

ONIONS MUST BE WELL DRIED

Crop Should Be Thoroughly Cured Before They Are Placed in Storage, Says Department.

Onions should be well ripened and thoroughly cured in the field, in drying sheds, or on slat trays before they are placed in storage, says the United States Department of Agriculture. Decay and deterioration result from the storage of immature, soft, or "thick-necked" onions and from imperfect curing, bruising, or other injuries caused by improper methods of handling in harvesting and drying.

When in good condition for storage, onions are well cured, hard, free from loose skins or mechanical injuries caused by rough or careless handling. They should be stored in slatted onion crates or in shallow slatted bins, and should be cooled to a temperature of 32 to 36 degrees as quickly as possible after they are placed in storage.

It is best that they be placed in frost-proof, ventilated cellars, in well-insulated storage houses above ground, or in cold-storage houses. In common storage houses adequate means of ventilation should be provided for the quick cooling of the product and for maintaining a uniform temperature during the storing season.

INCREASED YIELDS OF CORN

Clear Gain of 8,000 Bushels Per Year by Ohio Farmer Who Followed Department Advice.

Records of one 800-acre farm in Ohio show an annual increase of 8,000 bushels of corn through the adoption of new strains of corn and improved methods developed and recommended by the United States Department of Agriculture. The farmer has been following the advice of the department for 20 years, and has kept careful records of his yield. For the last ten years the increase averages more than ten bushels an acre over previous years. Beyond the extra cost of harvesting, the labor and expense is no greater than previously, so the 8,000 bushels is regarded as clear gain.

FARM STOCK

WOOL AND MUTTON COMBINED

Experiment Station Established at Dubois, Idaho, to Solve Sheep Rroblems.

(Prepared by the United States Department of Agriculture.)

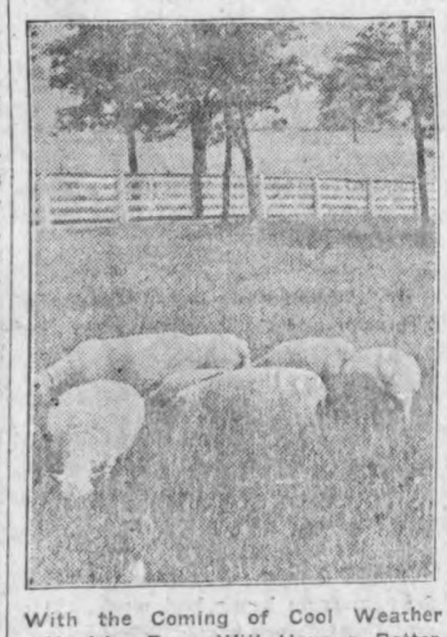
Sheep breeders, ranchmen and animal husbandmen from six or eight states went to the United States sheep experiment station near Dubois, Idaho, this year for the annual shearing. Keen interest attaches to the work done by this station, especially by those who are alive to the importance of producing, if possible, a breed that shall combine weight in mutton and excellence in fleece, with special reference to market demands for fine or coarse grades of wool. In the shearing this year, just reported to the Department of Agriculture, the Rambouillets scored highest. The report shows these results:

Average Weight of Wool per Sheep.

Rambouillets	11.14 lbs.
Columbias	10.85 "
Corriedales	10.08 "
Corriedale grades	10.00 "

The station at Dubois was established by the bureau of animal industry in 1917 to conduct experiments with which it was hoped to solve some of the big problems in range sheep business. With only a little more than three years' experience the specialists do not consider the results sufficiently conclusive to warrant definite assertion in favor of or against particular range practice, but the work has attracted the attention of sheepmen everywhere, and is expected to become increasingly important as the experiments develop.

"It is quite generally agreed," said one of the sheep husbandmen, "that for the main part of the range sheep country of the northwestern states the type of ewes obtained in the first cross between the long wools and the fine wools is a very desirable stock ewe. We appreciate the fact that fine wool rams were most popular in 1919, and that this was due in part to the high price of fine wool. Even should fine wool continue to sell above coarser grades, which is doubtful, we still could not afford to neglect the lamb



With the Coming of Cool Weather Healthy Ewes Will Have a Better Appetite and If Fed Liberally Will Gain in Weight.

side of the business that has been the cause of such large use of crossbred stock."

Sheepmen concerned in the business of producing sheep that shall combine mutton and the right kind of fleece watch with interest the development of the Corriedale grades and the Columbias. The Corriedale was imported from New Zealand in 1915 by the bureau of animal industry for this work. The Columbia is the Lincoln and Rambouillet cross interbred.

WHY PERCHERON IS POPULAR

Breed Adapted to All Kinds of Farm Work, and Exceptionally Docile and Sensible.

The modern Percheron is very popular with the American farmer because he is an easy keeper and an early maturer, is hardy and vigorous, but docile and sensible, strong, active and well adapted to all classes of farm work and city use. America had a preference for a black horse which has led to the production of darker colored horses, but, as is evidenced by some of the leading shows of recent years, there is a tendency to revert back to the original color, that beautiful iron gray. It is a good thing that this is true, for a minor point like color should never detract from the value of an otherwise good horse.

PREPARING FOR SPRING PIGS

Good Idea During the Winter to Arrange for New Pastures and Lots—Practice Rotation.

It is well to plan new pastures and lots for the spring pigs. For next to disease, worms probably cause the greatest losses. The larvae of the various types of infectious worms lie over in the grass and on the ground for months. A mudhole may be full of them. Rotation of pastures and lots is a good practice in raising healthy pigs.

WET FEET BRING COUGHS AND COLDS

Until entirely rid of a cough or cold, look out. They are a source of danger.

Just a few doses of Pe-ru-na taken soon after exposure or first manifestation of trouble will usually break a cold or dissipate in a hurry the most persistent cough.

Do Not Accept Any Substitute for MOTHER GRAY'S SWEET POWDERS.

WHEN WEARY WILLIE SCORED

Uncle Isaac Was Just a Little Bit Too Emphatic in His Verdict Concerning Coat.

Weary Willie slouched into the pawn-shop.

"How much will you give me for this overcoat?" he asked, producing a faded but neatly mended garment.

Isaac looked at it critically.

"Four dollars," he said.

"Why," cried Weary Willie, "that coat's worth $10 if it's worth a penny!"

"I wouldn't give you $10 for two like that," smiled Isaac. "Four dollars or nothing."

"Are you sure that's all it's worth?" asked Willie.

"Four dollars," repeated Isaac.

"Well, here's your $4," said Weary Willie. "This overcoat was hangin' outside yer shop, and I was wonderin' how much it was really worth."

Interpretation.

Wife (to unexpected dinner guest)—You'll have to take pot luck, Mr. Jones.

Jones—Fine! Your husband just remarked on the way over that he doubted whether you'd allow us to have a little game.

PUZZLE FOR LOVERS OF DOG

Just How Did Terrier Know the Correct Time, When the Clocks Had Been Advanced?

Perhaps because of his power of speech, the parrot is usually regarded as amazingly wise. But many dumb creatures often display just as remarkable intelligence.

Can a dog judge time? This is one of the subjects upon which some light is thrown in "Dogs, Birds and Others," by H. J. Massingham.

A terrier had been in the habit of jumping on his master's bed and awakening him each morning at seven o'clock. When the clocks had been advanced an hour for summer time, the man was anxious to see what the dog would do.

Next morning, as usual, the animal jumped upon the bed. The clock was at seven exactly, although really it was only six o'clock. Had the dog counted the strokes of the clock when it struck, or had he understood about the clocks being put on?

World's Armament Goes On.

San Marino, the smallest republic in the world, is about to double the size of its army, which in future will consist of six soldiers.

The foolish man who built his house on the sand—

He gave an example in folly which anybody can understand.

It isn't so easy, however, to sense the mistake of trying to build the body on foods which lack essential nourishment.

Here, again, is a foundation of sand which gives 'way when the test comes.

Many a food that tastes good lacks honesty of nourishment to equal its taste. Thus it tempts the appetite into mistakes that often are costly.

Grape-Nuts is a food which helps build bodily endurance for life's stress and storm. The full nourishment of wheat and malted barley, together with the vital mineral salts so necessary to bone structure and red blood corpuscles, with phosphates for the brain, is retained in Grape-Nuts. The long baking process by which Grape-Nuts is made gives the food a natural sweetness and an unusual ease of digestibility and assimilation.

Served with cream or milk, Grape-Nuts is fully nourishing, and whether eaten as a cereal at breakfast or lunch, or made into a pudding for dinner. Grape-Nuts has a particular delight for the appetite. Sold by grocers.

Grape-Nuts—the Body Builder
"There's a Reason"

Knowing is better than Guessing

At the time you buy clothes, you think there're good; you wouldn't buy them if you didn't.

— BIG SALE FOR TOMORROW —

Emil Lau will hold his big Duroc Jersey Boar, and Shorthorn Bull sale at his farm south of Klemme tomorrow, Friday October, 11.
Emil has some very good offerings in that line and the farmer who is interested will do well to attend this big sale. Elsewhere in this issue you will find his ad which will give you further details concerning the sale.

COAL IS CHEAP IN N. DAKOTA

Beulah, N. Dak.,
Nov. 7, 1921

Mr. Jorgenson, Klemme, Ia..
Dear Sir:

Enclosed find check for $2.50 for Klemme Times 1921-1922 Oct.

Good weather yet, no snow so far. Plenty coal in this country; we buy coal at $2,00 a ton, $7 a big double box full hauled 3 miles Lignite Coal. Right near town is the Beaulah Mine, which is 140 feet deep, its first mine was 40 feet down, now this is the second layer 140 feet.

Yours truly,
Albert F. Bock.

DECORAH READY TO START OIL WELL

DECORAH, Nov. 7.—The big 84 foot derrick with the drilling machinery arrived Monday night and as soon as the locating geologist gets here and selects the place drilling for oil will begin at once. The Pioneer Oil and Gas Company officers are President, George Kessel, of Cresco; vice president, B. E. Jewell; secretary, E. P. Shae; directors, Rev. Paul Loren and George Flagg.

Two contractors are on their way from Texas to take charge of the work and the balance of help will be taken from Decorah. That will give considerable employment for a number of men this winter.

BANDITS LOOT CREAMERY HERE

Have No Love For Buttermilk But Have A Likening For Cream

Last week Wednesday someone entered the Klemme Creamery thru a window from the boiler room. The thief took a couple of cream cans left by the haulers which then was filled from the vat. A new cream can outside was also taken and that filled. Just how much cream was taken is only guessed at, but it is thought that about three cans full were stolen.

The bandit had some heart about him however, for the next night the cream cans were returned.

This is the first instance we have heard of this year where any place of business was broken into and goods stolen.

DO YOU HAVE IRON TROUBLE?

Here's How to Repair Electric Iron Difficulties Easily ....

Many women upon starting to iron find that the electric iron will not heat and a delay results which can easily be avoided, according to Miss Glenna Hesse of the home economics division at Iowa State College.

Most of the troubles are either in the screw plug or base attachments says Miss Hesse, as these parts get the roughest wear and the wires break easily.

If the iron will not heat, examine the screw plug. See that the wires are intact, loosen the screw in the plug, which will allow the connections to be bared. Scrape the end of the loose wire, attach and put together. If the trouble lies in the connection that attaches the cord to the iron, open the composition cover by unscrewing the small screws in the sides. If the wire is broken, scrape a new end and attach.

If the trouble is in the heating coil in the iron, then it will be best to send the iron to the electrician. Many people lay aside an iron or send it to an electrician when all that is needed is the tightening of a screw.

Never try to repair an iron when the current is on.

Indications of Hard, Cold Winter

The American people celebrated the first Armistice day by ringing the bells and by boisterious expressions of joy. They celebrated the second with cold feelings of disillusion creeping over them. They observed the third in deeper gloom, feeling bitterly disapointed that the results expected from the war were slow in materializing.

With the coming of the fourth November 11, our people have passed the exuberance of victory and the disapointment of the anti-climax. Now they have taken hold like those who realize that only through effort and co-operation and practical wisdom can the world order be securely rebuilt. They have signalized a day by calling a meeting that ought to be a landmark in history, the conference to limit armaments.

The world can not pay its burden of debt and repair its losses, if at the same time it must carry the crushing load of armies and navies which the war spirit has placed on the backs of the nations

FIRST METHODIST CHURCH

We have been delighted at the splendid audiences that have greeted us at the Sunday services in the past week, both here in Klemme and also at the Liberty Township church. May this spirit of Christian service and fellowship ever increase.

Please remember the following services to which you are all cordially invited.

Preaching service on Friday evening at 7:30 o'clock in Klemme.

Preaching service on Saturday evening at 7:30 at the Liberty Township church.

Sunday morning communion service at 11:00 o'clock at the Liberty Church. In the evening union services here n Klemme. Rev. L. J. Bremer, Dist. Supt. will conduct the first three named services.

As Friday is Armistice Day, and on that day the World's Peace Conference begins its so vital work of bringing about International Peace and a disarmament of the Nations of the earth, every Christian should invoke Heaven's blessing and direction upon the Conference at Washingtn, D. C. Let us all gather in the church Friday evening n United prayer that the will of God may have the "right of way" in the Conference..

The quarterly Conference of the church will take place immediately after the Saturday evening service. All members are urged to be present.

Last Saturday we began our Catechism and biblestudy school in the Epworth League room of the church. All children from ten years upward who have not yet finished the catechism should avail themselves of this opportunity to study both the bible and the catechism. We meet for two hours. from ten to twelve o'clock on Saturdays. (Bring your note book and pencil)

W. C. Bergman, Pastor.

BEET WORKERS IN TRIANGULAR WAR; TAKEN INTO COURT

Britt News Tribune—James E. Verrel was called upon to bind Mrs. Simko, wives of beet field workers residing near Eagle Lake, to keep the peace after he had listened to evidence that ran about as follows:

Mrs. Mesnarick went to the home of Mrs. Simko Wrapped at the door. "Come in," says Mrs. Simko. No sooner has Mrs. Mesnarick entered than a quarrel started and Mrs. Simko attemped to clear the house of her unwelcome visitor. This she was unable to do and stated Mrs. Mesnarick struck her with a club.

Now enters Mrs. Simko. who came out of the melee with a badly injured arm, the result of a blow from Mrs. Mesnarick. So they all came to town and Mrs. Simko went to a doctor to get her arm dressed. Mrs. Mesnarick went to a justice of peace to swear out a warrant for Mrs. Simko. Now comes Mrs. Simko and catches her in the act and asks to have a warrant sworn out on Mrs. Mesnarick.

While they were in court the case was heard and resulted as above. Costs of tthe case were assessed against both parties and they were sent home after being admonished to keep the peace.

SHOOTS AT BIRD

Misses the Mark, But Kills A Woman Nearby

Waterloo, Ia., Nov. 9.—Miss Florence Kentzleman, aged eighteen years, daughter of Mr. and Mrs. I. M. Kentzelman, was accidently shot by a rifle bullet fired by her nephew George Jenks, son of Mr. and Mrs George Jenks, aged eight years, and died within a few minutes. The young woman was shot in the left side just above the heart.

The boy and his aunt had been in the country and were returning to his home. He raised the rifle to fire at a bird just as her aunt stepped in direct range of the rifle. He fired and the young woman fell screaming. The boy called for assistance and the young woman was removed to a local hospital. but died within a very short time following.

NEW TREASURY CERTIFICATE

The portrait of Theodore Roosevelt will appear for the first time on a Government Security on the $25 denomination of a new issue of the Treasury Saving Certifcates which will be placed on sale toward the end of the present calendar year. The new isue ofTreasury Savings Certificates will be a feature of the unified Government savings plan which is now being developed by the Secretary of the Treasury and the Postmaster General and will be announced later in greater detail. They now plan will combine the best possible advantage and facilities of the Treasury and postal savings system. and is designed to promote popular saving and investment in Government securities. The securities offered will have a wide popular appeal and will be placed on sale thruout the country in convenient form. It is regarded as particularly appropriate that the Roosevelt protrait should appear on a security of this character, and on the denomination which will be most available to the general public.

Hand bombs were used in warfare as early as the fifteenth century.

News Briefly Told Gathered From All Over The State

FIRES MARRIED WOMAN TO GIVE EX-SOLDIER HER JOB

DES MOINES, Nov. 7.—Glenn C. Haynes, auditor of the state, believes married women now employed, whose husbands are also working, should be discharged and their positions filled with ex-service men.

He has dispensed with the only married woman employed in his department, not because she was incompetent or her work unsatisfactory, but to give her position to one who really needed it.

Edwin Brookins, a veteran, formerly with Company A, One Hundred Sixty-Eight infantry, who lost a leg in the battle of Chateau Thierry and was gassed in the same battle has taken the married womans position.

Brookins is married and has been taking vocational training at Drake since his discharge. He inlisted at Mason City, although his parents live in Missouri.

On entering the state house Brookins found one of his old buddies."Kokomo" Frank Jones, whom he had not seen since the day following the bombardmont at Chateau Thierry.

"Kokomo," who has the honor of being the oldest inlisted man in France, is known to the entire rank and file of the One Hundred Sixty eight. "Kokomo" has been working about the state house. He is 61 years old and also served in the Spanish American war. He was a cook in company K, One Hundred Sixty-eight infantry.

MONEY WILL FLOW TI IOWA FARMERS

DES MOINES, Nov. 7.—Advice that the machinery of the war finance corporation at Washington has been put in shape to do fast work in making advances for agricultural purposes, and that in consequence the flow of money into Iowa should be greatly increased within the next few weeks, was received yesterday from Secretary of Agriculture Wallace by Grant McPherrin. President of the Central State Bank, and chairman of the Iowa agency of the war finance corporation. The secretarys message came in answer to a request for more expenditures handling of applications for advances.

OLD GUN FOUND BY IOWAN LEFT BY LEWIS AND CLARK

CHEROKEE, Nov. 9.—Dolf Anderson. Illinois Central freight conductor, has in his possession an ancient gun, that, if it is all that it seems to be, will compel the rewriting of firearms history.

Mr. Anderson found this gun, which in two places bears the number "1802", near the surface at the gravel pit at Correctionville, Woodberry County. The cylinder was exposed and when he picked it up the gun was uncovered.

One chamber of the cylinder was loaded with ball. The other four chambers were empty. The woodwork had fallen away. The steel and iron were heavily encrusted in rust.

The barrel is thirty inches long. The smooth bore is approximately one half inch in diameter. The walls of the bzarrel are similar to those of a shotgun in thickness. The cylinder, not easily removable, was loaded by means of a short attached pivoted iron ram rod. There had been no stock. The breech had been attached by light steel strips above and below. The hammer is side action, simlar to the old flint lock and rifle. But there is no second (or set) trigger on such equipted old rifles.

The important things are that this gun combines the revolver, breech-loading and percussion cap principles. It was made in 1802, as seems to be the fact, it antedates several inventions of later years. Colt was born in 1814 and patented his "revolver pistol" in 1835. The deringer was patented long after 1802. The percussion cap came in use between 1820 and 1830. The breech loading rifle came into use in 1851.

Lewis and Clark were in the vicinity of Correctionville in 1804. The gun was not practicle. The barrel using either shot or ball with so heavy a charge of powder(cylinder bore 2½ inches, about one half in diameter) would have become superheated in firing one round of fine shot.

It is possible that Lewis, a member of the President Jefferson's cabinet, was in possession of the latest Yankee notion in firearms and that no record was made of the inivation. The fabrication of the weapon was by hand.

IOWA NEWS BRIEFS

A. L. Hodges, 25 years old, of Waterloo, was killed when he fell thirty feet from a tree while squirrel hunting.

Theodore Roy of Fayette was sentenced to seven years at Fort Madison following his plea of guilty to fraud in a sale of $30,000 worth of blue sky stock to an Oelwein man.

Sylvester Lyman, of Cherokee, one of the pioneer residents of Iowa, will be 100 this month. He came to this state at the age of 21. He is still active physicaliy but his memory is poor.

Ralph Bennet, 5-year old son of Frank Bennet, was scalped at Randolph when thrown from a horse.

The horse ran over him. his hoof catching the lads head in such a way as to tear off nearly the whole scalp.

"Nobody's to blame but the parents," chorused the city council of Emmetsburg when it passed an ordinance making effective again the curfew regulation. Boys and girls under the terms of the ordinance are forbidden to be on the streets later than nine o'clock in the evening in the summertime and eight o'clock in the winter, unless they have a written permission from their parents.

Thomas German, 77 years old has lived on his farm near Sac City for fifty-five years. He paid $5 an acre and has been offered $450 an acre for it.

Ellen Crist, a young Tipton girl who was kidnapped and used for immoral purposes in a tent on the fair grounds is in a critical condition in the University of Iowa hospital, and may not recover. She was unable to appear against West and Basset, charged with the crime, and the case will go over to the next term of court as a result. She was rescued by Salvation Army Workers.

W. P. Payne, editor and publisher of the Nevada Representative and a pioneer Iowan, died at his home recently. He was ninety years old and came to Iowa in 1842. He has lived in Story County since 1875 and has been in the newspaper business for many years . He was greatly interested in the Educational work and did much to get the Nevada Public Library established. Payne is survived by his widow and his son.

The diphtheria epidemic at Clarion has ended. Marshal Dan Leonard removed the last yellow tag For a time more than a half a hundred homes in the city were quarantined.

George Downham, 78 years old old the county clerk at New Hampton that love, courtship and marriage and the delights of romance did not wane with age. Downham then secured a licence to marry Kate M. Bower, 67.

Jack Hermanson of Mason City saved his monthly payroll but received a bullet wound in his neck. He resisted two holdup men who attempted to rob him near the cement mill where he is employed. He will recover.

The trial of John Watters and Dave Masters, Des Moines men charged with the murder of J. K. Meyer, night watchman at Stewart Iowa, in connection with the robbery of the First National Bank there started in Gutherie Center recently. The case is one of the best known in the crime history of the last year. Five men made an attempt to rob the bank and Meyers attempet to stop them singlehanded. Only three men were apprehended, and the other, Hank Hankins was shot and killed in St. Paul The murder occured March 30. Over 50 witnesses have been subpoened by the state. Judge George Wilson will defent Masters and Watters.

Wealthy Indian to Have Fling

Jackson Barnett Will Sample City's Luxury With His Bundle of Oil Money.

IS RATED AT FIVE MILLION

Lived Simple Life While Millions Were Accumulating — Invested Many Thousands in Liberty Bonds During the War.

Muskogee.—Jackson Barnett, Oklahoma's richest Indian, has gone to Kansas City to have a fling at metropolitan luxury. If he finds that he can stand it, Barnett will make it permanent—with the consent of the United States government, of which he is a ward.

Barnett until recently lived in a two room block house at Henryetta, thirty miles from Muskogee, wore cheap clothes, smoked cheap tobacco and didn't even own a phonograph—which is an odd way to live for one rated as worth $5,000,000. While at Henryetta Barnett was well satisfied in his two rooms, and let his guardian, attorneys and agents of the Indian agency in Muskogee and Washington worry about the millions flowing from oil wells on his property.

His wants were few and the money went into the banks of Oklahoma on deposits made by the Indian agency to his credit.

Bought Liberty Bonds.

When the war was on thousands of dollars of his money went into Liberty bonds and War Savings stamps. Contributions were made to institutions of learning, and Jackson lived the simple life, never going more than a few miles from his cabin.

Then he met Mrs. Anna Laura Lowe and they married. "Kidnaping," is what Barnett's agents called it. Barnett was held under restraint until Victor M. Locke, Jr., became superintendent of the Indian agency in Muskogee. Locke decided:

"A wealthy Indian has as much right to spend his money as a wealthy white man."

Barnett and his wife and her daughter sought to make a dent in the $5,000,000 pile. Mrs. Barnett said her husband needed a change, and the government consented to a vacation in Canada. After that vacation the Indian was unhappy for the first time in his life and refused to go back to the cabin and cheap clothes.

Let Indian Decide.

"We are going to let the Indian himself decide where he wants to live," Superintendent Locke said. "If he wants to live in Muskogee, all right. If he chooses some other city we have nothing to say in the way of objecting, for he has the right to make his own decisions."

If a suitable residence can be found in Kansas City it will be purchased by the government for its wealthy ward. Otherwise, a house will be built.

"There's no truth in the report that we are going to spend $200,000 for a residence for Jackson Barnett." Locke said, "but we are going to see to it that he has a house in keeping with his wealth and one with which he will be satisfied."

GIVE UP FREEDOM FOR MERCY

Prisoners in French Train Wreck Do Rescue Work Instead of Fleeing.

Lyon, France.—Handcuffed in pairs and in charge of four gendarmes, 12 French military prisoners, en route to Algeria to serve sentences ranging from five to fifteen years, were aboard the Strassburg-Marseilles express when it jumped the track at Les Echets, a few miles from here. Forty passengers were killed and seventy injured.

None of the prisoners was seriously hurt, but three gendarmes were killed and the other, pinned under the wreckage, lay seriously wounded.

All semblance of authority and order had disappeared. The prisoners were free, but, instead of running away, they pulled the wounded gendarme out of the tangled mass of wood and iron and laid him on the grass. During the night they rescued 31 injured passengers. Then they gave themselves up.

They have since left for Algeria to serve their sentences, but it is understood that the minister of war is studying the case, and the opinion is expressed that, in due course of red tape, they will be pardoned.

Went to Bury Wife; Found Her Remarried

George Doering, a McKitchen (Kan.) farmer, went to Pueblo, Colo., to arrange for the burial of his former wife, who had written Doering a letter, he said, intimating that she would be dead when he arrived, and asking him to take care of their boy Wilbur, eight years old.

Arriving in Pueblo, Doering read in a paper of her marriage to Fred Montes the day he arrived. Doering went to the home of his former wife and her newly acquired husband, and took charge of the boy, but his former wife failed to explain her letter to him.

New Way to Preserve Apples.

Vineland, N. J.—Joseph Schlosser found two apples that got hidden in a basket of sweet potatoes in the fall of 1920, and were perfectly sound when the potatoes, which had sprouted long vines, were thrown out. The apples had been buried in the sweet potatoes all last winter and summer.

New Species of Fish Revealed

Eruption of Mauna Loa in Hawaii Responsible for Remarkable Discovery.

SIX FROM DEPTHS OF SEA

Dr. David Starr Jordan Classifies Specimens Sent From Honolulu—Lava Stream Brings Strange Specimens to Surface.

Honolulu.—Varieties of fish hitherto unknown were discovered as a result of the eruption of the volcano of Mauna Loa two years ago. This fact has just been announced by Dr. David Starr Jordan, chancellor emeritus of Leland Stanford Junior university, California, a noted ichthyologist.

The columns of lava burrowed deeper into the ocean than man had been able to penetrate, and thousands of fish of strange and fantastic shape and color were killed and washed up on the beach by the tidal wave caused by the lava flow. Among them were found six varieties hitherto unknown to science because their habitat was presumably lower in the water than science had been able to observe. Amateur ichthyologists in Hilo, Hawaii, selected species which were unknown to them and sent them to Doctor Jordan for examination. The result was that the six new species were classified.

Discovery Important.

"I consider the discoveries, from a scientific viewpoint, to be among the most remarkable and important on record," Doctor Jordan said when he made public the classifications here, while he was attending the sessions of the Pan-Pacific Educational conference.

Rhyacanthias Carlsmithi, named for Carl A. Carlsmith of Hilo, who sent many of the species to Doctor Jordan. It is a deep rose red in color.

Rhechias Armiger, a conger eel with hooks on its snout resembling blackberry thorns and is solid dull black in color.

Nyctimaster Reinhardt, named for the Hilo resident who discovered it. It is a small black lantern fish, so designated because of the many luminous glands behind the eye and along its sides which gives the impression of phosphorescence. It is a solid dull black in color.

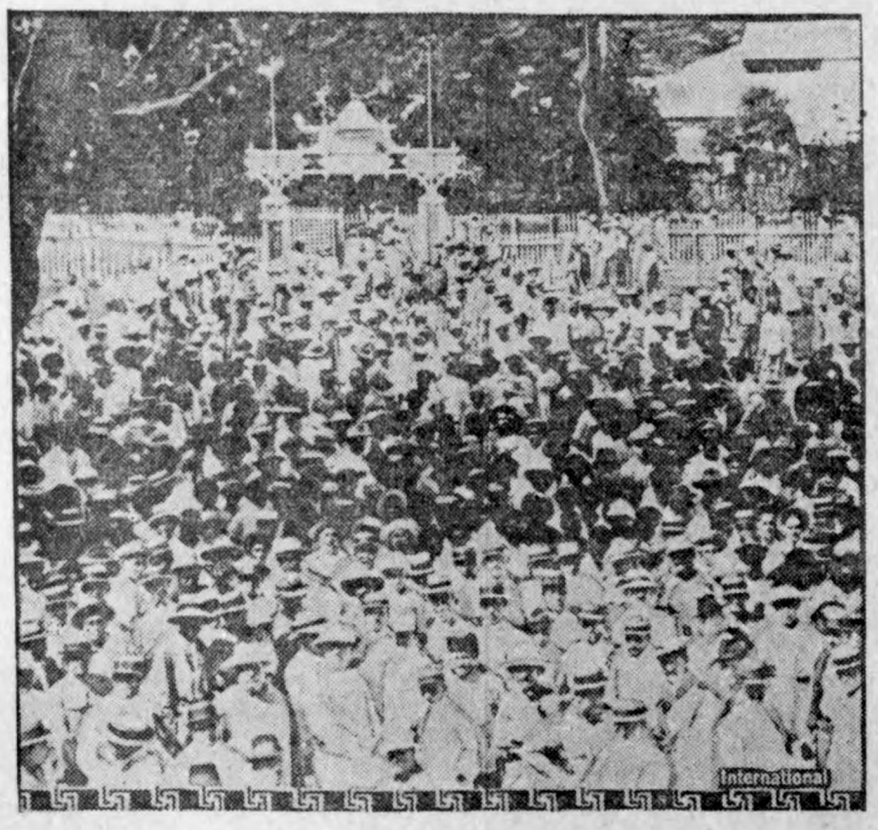
Peristedion Engyceros or alligator fish of a brilliant scarlet hue which is characterized by large bony plates of armor.

Are Deep Water Fish.

Each of the six is a deep water fish. All live in water of more than 150 feet in depth, and some as deep as 600 feet. Nothing except such a cataclysm of nature as the Alika flow could have brought them to the surface, Doctor Jordan said. Rhyacanthias Carlsmithi ranged at least 1,000 feet below the ocean's surface, he added.

Doctor Jordan has sent to the Smithsonian institution in Washington, D. C., a paper detailing the results of the investigation and the new classification.

Tahitians Protest Against Taxes



Even way down in Tahiti, the French islands in the South Pacific, the people have been wailing about high taxes, and recently there was an incipient revolt which was suppressed by soldiers. The citizens of Papeete, the capital, are here shown gathered in front of the governor's mansion to voice their protests.

GAMBLING IS STILL SPREADING

Germany in Throes of Wild Orgy of Speculation.

Government Is Making Efforts to Halt the Fever, Which Has Spread to All Parts of the Country—Stakes Are High.

Berlin.—The government is trying to halt a gambling fever which has swept Germany for many months and which authorities say continues to spread despite hundreds of arrests, the confiscation of millions of marks, sentencing of scores of persons to jail and the imposition of heavy fines.

Close upon the heels of the gambling and speculation mania which appeared among the people of all classes came a horde of stock-market manipulators, racetrack touts, bucket shop proprietors and organizers of get-rich-quick betting associations, who, starting with small sums, subscribed by working men and women, shortly were able to open luxurious gambling houses.

At least a dozen such establishments operating in Berlin, Hamburg, Dresden and smaller provincial towns have been raided and closed by the police.

Sums as high as 12,000,000 marks have been found and confiscated by the police in gambling houses which apparently were catering only to the smaller gamblers. The proprietors have been held on charges of fraud.

The horse racing season, which has been unusually successful, offered the crooked gamblers and promoters a chance which they promptly took advantage of, and it is known billions of marks were wagered on alleged tips. Some of these promoters became widely known as reliable "informants" and made so much money for their clientele that they became popular idols.

The Smith family numbers 14,000,000 members throughout the world.

D'ANNUNZIO IS WINE MAKER

Italian Soldier-Poet to Produce Vintage of Unequaled Quality, He Says.

Gardone, Italy.—Gabrielle d'Annunzio, poet and hero of Fiume independence, has become a producer of wine in his hours of quiet on the lake here.

"I produce very little wine, but enough so that I can call myself one of the Italian family of wine producers," he told a friend recently.

"I expect to produce a wine that will be the envy of the French and Spanish producers. I will give it a new name of my own coining so that it will not be confused with any of the wines at present on the market."

The remarkable volcanic region in Alaska known as the Valley of Ten Thousand Smokes actually contains not 10,000, but millions of smoking volcanic vents, besides various other wonders, such as Falling mountain, where falls of rock occur every few minutes.

LABOR BOARD HALTS STRIKE

Threatened Nation-Wide Railway Tieup Is Averted by Federal Body.

NO WAGE CUT FOR YEAR

Surprise Ruling Brings Peace Following Many Conferences With Union Leaders at Chicago—Hooper Talks to the Rail Men.

Chicago, Oct. 28.—Fast crackling telegraph wires the country over bore to engineers, firemen, conductors, trainmen, switchmen and telegraphers "out along the lines" today the message that their strike called for Sunday morning "is off."

Telegraphing in code the official recall was the first act of the day on the part of the union heads, who at midnight emerged from a final conference of a long, tense series of meetings and announced that the "satisfactory settlement" they had demanded had been reached.

While the "big five" and the telegraphers, the only other union that had decided to go through with the strike, were sending out the strike recall, the United States railway labor board, which played an important part in the final decision of the unions, prepared to announce its findings in the negotiations.

All the 200 men who attended the midnight conference, which was held at the Morrison hotel, came from the meeting in good humor and apparently relieved at the final turn of events. They said they had been influenced by Ben Hooper, a "public" member of the board, who told them at their morning session that the board's resolution of Tuesday night meant that further petitions for pay cuts would have to wait on pending hearings on rules and working conditions.

L. E. Sheppard, president of the conductors, said that the union chiefs felt the situation had changed so that if the strike started it would be a blow against the government.

"We found, as the situation developed, that by striking we would be hitting not the railroads but the government," he said. "It never was our intention to fight the government."

Government plans to combat the strike, it was learned, included a definite, extensive program through the courts. Twenty-four hours before the strike would have started, injunctions would have been asked in federal courts.

The vote ending the strike came late Thursday night after all-day sessions of the union leaders. Early in the day general chairmen of each of the five organizations conferred separately. In the afternoon a joint session was held, which was addressed by Mr. Hooper of the labor board. Mr. Hooper's appearance before the board is said by union leaders to have marked the turning point which led to the final decision.

Mr. Hooper stressed the board's announcement that no further wage cuts for any class of employees will be considered until working conditions for that class of employees have been settled. He is also said to have emphasized the announcement of the rail executives made at Wednesday's hearing that no changes in either wages or working conditions will be sought, except through the labor board, as provided by law.

Union men said they construed Mr. Hooper's remarks as indicating that nearly a year must elapse before further wage cuts could be made effective, even if the roads should apply for them at once and the board should eventually approach them.

Both points are said to have been highly instrumental in determining the final decision of the union men, who adjourned the afternoon session to hold a long night meeting.

The final decision seemed pleasing to union men, rail executives and the labor board alike. Union leaders pointed out that they had determined that they could not strike without opposing both the labor board and the administration, while they asserted their real quarrel was with the roads.

Railroad executives expressed satisfaction over the decision, while members of the labor board characterized the action as one the unions will never regret and which has averted inconceivable hardship and an internal industrial dispute on the eve of the international conference at Washington on limitation of armament.

Labor chieftains asserted that their action marked the end of all danger of a strike as a result of the strike vote taken by the unions, no walkout now being effective until a new vote is taken. No plans are being made for a new strike vote, W. G. Lee, chief of

Bandit Killed in Gun Fight.

Council Bluffs Ia., Oct. 29.—Sheriff's deputies on guard in a store here about five o'clock in the morning, engaged in gun battle with a gang of robbers who broke into the place. One robber was killed.

Montana Bank Suspends.

Livingston, Mont., Oct. 29.—The First State bank of Livingston closed its doors pending reorganization of directors on the advice of the state examiner. The institution is capitalized at $125,000.

HOME TOWN HELPS

EVIL OF THE RENTING HABIT

Dependency on Other Hands for Homes Marks a Retrogression in Spirit.

When householders become renters by habit, that is, when they become willing to depend on other hands than their own to provide and maintain their homes for them, society loses much of that valuable individuality, that personal independence, initiative and self-reliance that distinguishes a great people from a mass of people.

For three hundred years the American people have led the world in individuality, initiative and personal independence. The fathers pulled out of the European huddle in order that they might stand on their own feet; and having reached America, they had to stand alone. Most born Americans were born of parents who owned their own homes.

Contentment with huddle, the willingness to live in some one else's warmed and cared-for loft rather than in one's own fought-for and paid-for home marks a retrogression in spirit from the American way to the European way of life.

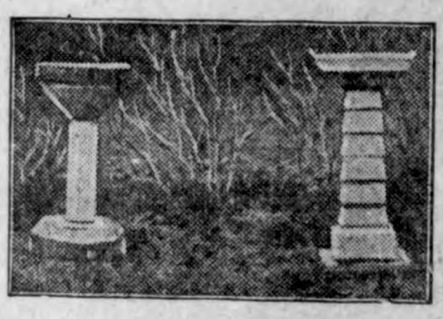
However we may excuse ourselves for inclination toward the easy comfort of the choreless, commercial, rented compartment, and for shrinking from the harder demands of the detached, owned and paid-for home; and however respectable the renting habit may have become, it must be admitted that our inclination is a phase of social degeneracy, a drift toward the huddle, the beginning of the abandonment of that vitalizing independence of which the owned home is pre-eminently the symbol and support.—Portland (Ore.) Telegram.

TWO ORIGINAL BIRD BATHS

One Is Made Entirely of Logs, the Other on Shingle-Covered Pedestal.

The photograph shows two original ideas in bird-bath construction that can be adapted where it would not be possible to build a cement bath.

At the left is shown a bird bath made entirely from logs, a heavy cross section being used for the base, another for the top, and a few feet of a much smaller log forming the pedestal. The upper log section is hollowed out to receive a round pan which holds the water.



Novel Designs for Bird Baths.

The shingle-covered bath at the right has a base made from two-inch lumber, to which is fastened a tapered wooden frame, made of one-inch strips, each side being two inches smaller at the top than at the bottom. A two-inch cap, with a one-inch board support for the pan, is provided.—Popular Mechanics Magazine.

Hedge Solves Fencing Problems.

More and more Americans are appreciating the value of privacy in their gardens. It is a sane idea, this—that we plant lovely lawns and grow shrubs and trees, not to form a park for the admiring gaze of motorists and neighbors, but to furnish us with a little kingdom of outdoors all our own, where we can live and breathe and have our being unbeholden and unmolested.

Very frequently, of course, privet and other hedge shrubs seem to be planted only for the sake of dividing one property from another or one section of the garden from another. Then there is reason in keeping the hedge clipped back. But the hedge that is built for the purpose of giving protection should be clipped only enough to give the roots strength and to give it a trim appearance.

Much is being done nowadays with firs and other evergreens for hedges. Nursery men have gone to the ends of the earth for trees and shrubs that would withstand the extremes of our climate. A recently introduced fir has come from the east coast of Asia, where they are accustomed to a hotter summer and colder winter than we have here, and are therefore sure to withstand our extremes. Great expense has also been taken to get shrubs and trees suitable for windbreaks in the trying seashore climate.

Value of Community Play.

Community play is being promoted by local governments because it has been demonstrated to be a practical business proposition. City officials accept as an axiom the statement that the leisure hours of the city must be either an asset or a liability. The people of this county have about a billion hours a day to pass outside of work and sleep. In this leisure time most of the crime, vice and delinquency occur.

THE RIGHT THING AT THE RIGHT TIME

By MARY MARSHALL DUFFEE

AT THE CHRISTENING.

No rule is so general, which admits not some exception.—Burton.

THERE was a time when babies were dressed elaborately when they were christened, whether this took place in church or at home. The christening robe was very long and wrought with a number of tucks and ruffles and puffs. Nowadays these elaborate christening robes have quite gone out of style among people who keep abreast of manners as they change. In fact the elaborate christening robe looks a little tawdry to us now and we suspect the mother who dresses her babe in this way of being not well posted on prevailing customs.

If you are planning to take your baby to be christened have it dressed in a simple white dress. This may be of the finest material and may be made by hand, but it should be devoid of furbelows. It is very nice to have the baby entirely in white, even to the robe in which he is held. It is usual to uncover the child's head for the ceremony but especially if the church is draughty it should wear a simple white bonnet.

If the child has a nurse it may be brought to the church by the nurse, but one of the sponsors or the godmother should hold the baby in her arms when the ceremony begins and should receive the baby from the minister or priest after the ceremony has taken place.

The question is sometimes asked whether or not the minister should be given a fee at the time of the baptism. In some churches there is a definite fee for this ceremony. Otherwise no fee is really required and many clergymen rather object to receiving any for such services. A tactful thing then to do is to inclose a crisp bank note in an envelope and hand it to the clergyman with the request that he make use of it in some one of his good works. He certainly could not object to that. The father of the child should attend to this after the ceremony.

—O—

Why?

DO WE SNEEZE?

THE nose is lined with membranes, back of which is a network of very fine nerves which are extremely sensitive. The function of these membranes is to catch and hold the impure matter which comes into the nose when air is inhaled. Sneezing arises from the involuntary action of these nose nerves in attempting to clear the nose suddenly and violently. It only occurs when a particularly quick job has to be done. Otherwise the irritating matter is taken care of by the secretions in the nose itself.

Smoke, pepper or other irritants cause sneezing because they rasp against this fine network of nerves and the latter seek to rid themselves of the foreign substances in the quickest possible manner. Colds make us sneeze because the nose is clogged up with mucus and other matter and nature is trying to clear out the nose channels after all other methods have failed.

The Politicians' Handicap.

All politicians agree that one improvement could me made in the human body. It ought to be possible to get both ears to the ground at once.—Chicago News.

THE WIDEAWAKE STAR

ONE night when all the little stars had been tucked in bed with their soft, fleecy cloud blankets over them, gentle South Wind, who had come along that night to help them to sleep, floated down to the earth below.

Old Father Moon Man cannot take care of all the stars alone—you know there are so many of them—and he often gets some one to help; anyone that happens to come along, for every one is anxious to help old Father Moon Man.

It was, of course, one of the nights that Father Moon Man did not work—or, rather, shine. He was giving the clouds a chance, for it had been a long time since they had an evening all to themselves.

Now whether it was gentle South Wind or old Father Moon Man himself who was to blame, I do not know, but one little star over in one corner of the sky did not have a cloud blanket put over it.

It listened to the lullaby gentle South Wind sang, and though it winked and it blinked, it twinkled; and the twinkle got the best of the others, but Little Star did not go to sleep.

Old Father Moon Man, being a father, did not go around and peek under the blankets as a mother would have done. Instead, he sailed off to find a nice, fleecy cloud for himself where he could go to sleep.

Just as soon as gentle South Wind was gone the little, wide-awake star began to peek about to see where the other stars were, but not one did it see, for, of course, they were all asleep like good little stars.

But Wide Awake Star did not like being alone, so it began to look under the fleecy cloud blankets, and as it lifted a corner of one out popped the little star, for, of course, it, too, awoke as soon as the blanket was lifted.

Then off ran Wide Awake Star and the other litle star, and pretty soon they had all the stars awake, too, and off went the cloud blanket sailing away.

There was no more winking and blinking; it was all twinkle now, for each little star was so full of brightness it could not keep still and the clouds, who thought they were being

treated very badly, came scudding about trying to find old Mr. Moon Man to complain of the twinkling stars.

At last they found him and woke him up. "It isn't fair," they said. "You told us your children were fast asleep and that we should have the sky to ourselves."

"Well, goodness me," exclaimed old Father Moon Man, jumping up and looking over the sky. "Who woke those children up, I wonder.

"It is no use trying to get them to sleep again tonight; you will have to run along and come some other time," he said.

But he never knew that it was one little wide awake star that was left uncovered that did all the mischief.

LIVE STOCK NEWS

PLAN TO AVOID HOG CHOLERA

Highly Contagious Disease Can Often Be Prevented by Using Simple Precautions.

(Prepared by the United States Department of Agriculture.)

Recently an instance was brought to the attention of the United States Department of Agriculture where hog cholera appeared almost simultaneously on the farms of six out of the eight members of a "threshing ring." The infection on all six farms was traced to the premises of one of the members of the "ring," whose hogs were sick at the time the threshing was done on his farm about 10 days previous.

The owner of the sick hogs failed to recognize the nature of the disease, and in his eagerness to care for his crop while the weather was favorable, he delayed calling a veterinarian until after the threshing was finished. As a

Hyperimmunizing—Shoulder Injection.

result he lost over half his hogs and the infection was carried to his neighbors' herds.

It is a common practice for farmers to borrow and loan farm implements and exchange labor when they are threshing, shelling old corn, filling silos and hauling stock and grain to market. Farmers are advised to read Farmers' Bulletin 834, Hog Cholera, especially the discussion of modes of infection with hog cholera.

"Threshing rings" are quite popular and no doubt under present conditions crops can be handled speedily and economically in this way, but the danger of carrying hog cholera from infected hog lots should be kept in mind and precautions taken to avoid it. In the instance cited the thresher was set in the hog lot, although it was known at the time that some of the hogs were sick.

It is much safer to thresh grain in the field and avoid driving into inclosures where hogs are kept. If driving through the hog lots is unavoidable, the members of the "threshing ring" are advised to rinse their shoes in a disinfectant and remove their overalls; also wash their horses' feet and legs and the wheels of the wagon with the disinfectant before returning to their own premises, and especially their hog lots. Hog cholera is a highly contagious disease and often losses can be avoided by using the simple and easily applied precautions specified.

PROVIDE SHELTER FOR SHEEP

Animals Need Protection Against Dampness as Well as From Cold During the Winter.

For the benefit of farmers who are wintering a flock of sheep for the first time this year, the Nebraska College of Agriculture offers the following suggesions: A good well-ventilated shelter is necessary, not so much for protection against the cold as against dampness. The fleece will keep the sheep warm if it is dry. A good shed open on the south will serve the purpose until lambing time, when a warm barn is necessary if the weather is at all cold. After the corn is shucked the sheep can run in the stalks in good weather, with corn silage or alfalfa fed in limited quantities. A little fodder may be fed instead of silage, but sheep seem to do better where some kind of succulent feed, such as silage, roots, pumpkins and the like is a part of their ration. Very little or no grain is needed up until a week or two after lambing.

FINISH CATTLE FOR MARKET

Farmer Will Find It Profitable to Practice "Feeding" Before Offering Them for Sale.

It is customary for the farmer who has only a few head of cattle to sell them to the local buyer, and after being shipped to some central market, they are soon in the hands, they are sold through the farm of a neighbor, sometimes for feeding a business, or market. In a series of years the farmer who feeds makes more than the farmer who does not feed. While there are losses on the cattle in some years, there are big profits in other years. On the average of years the operation is profitable.

DAIRY HINTS

FEW OPPOSE TB ERADICATION

Cattle Dealers Who Do Not Favor Measures Are Influenced by Selfish Motives.

(Prepared by the United States Department of Agriculture.)

Only a few people are opposed to regulating traffic in tuberculous live stock, but their opposition is sometimes effective, and several cases of the kind have been traced by the United States Department of Agriculture. However, the department believes that cattle dealers who do not favor tuberculosis eradication are influenced by selfish motives and do not represent the true spirit of live-stock owners and others interested in healthier and better domestic animals on American farms.

Although many states have suitable laws to protect farmers and other live-stock owners against traffic in tuberculous animals, the paractice continues in some localities. Here is an instance: In Massachusetts a purebred Holstein cow, valued at $100, was disposed of as a reactor; but instead of being slaughtered or segregated she was later sold to a state institution for $300. The herd at this institution had previously been free of tuberculosis. It was being improved by the purchase of new animals, and every available precaution was taken to see that they were healthy. Recently this herd was retested and three reactors were found, one of which was the cow in question. All showed well-marked lesions of tuberculosis on post-mortem examination.

Dairy Herd Free of Tuberculosis.

There is no law or regulation in Massachusetts preventing the sale or requiring the segregation of reactors. A few cattle dealers led the opposition to a bill before the last general court providing for the control and sale of animals reacting to the tuberculin test. Owing to the importance of eradicating tuberculosis from live stock, the Department of Agriculture is furnishing to the public full information regarding the nature of the disease and the way to get rid of it.

ACCREDITED-HERD CAMPAIGN

Illustration of Manner in Which Owners Are Given Protection Against Tuberculosis.

The way herd owners value protection against bovine tuberculosis is illustrated, says a specialist in the dairy division, United States Department of Agriculture, by the experience of the Bonner Springs (Kansas) Bull association. Every member of the association, 11 in number, signed up for the accredited-herd compaign. They had 104 animals tested, and in 8 of the 11 herds no reactors whatever were found. Of the other three herds, each had just one animal affected by the disease.

At first sight some of the members thought the effort had been needless and not enough results shown. But when it was considered that the object sought was not merely to eradicate tuberculosis after it had appeared but to protect the herds against exposure to the disease, it was plain that the object sought had been gained.

REMOVE WARTS FROM CALVES

Small Tumor-Like Growths on Various Parts of Body Are Not Difficult to Destroy.

Calves are frequently troubled with small tumor-like growths on the lips, ar and the eyes, on the ears, and at th tail head. Occasionally other parts of the body are affected as well. Warts may best be removed by snipping them off with sharp scissors. A strong thread or a horse hair may be used in their removal by looping it over them and then by the application of force slowly severing them at their base. After they have been removed the roots should be cauterized with tincture of iron, glacial acetic acid, or lunar caustic.

PRODUCING MILK FOR PROFIT

ike Real Business Man Farmer Cannot Afford to Keep Unprofitable Producers.

The way to make money out of the production of milk, is to begin at home. Weed out unprofitable producers. No real business man will keep a workman in his employ a week if he is an unprofitable producer, and the cow is the dairyman's machine, the dairyman's workman.

Watch Your Kidneys!

That "bad back" is probably due to weak kidneys. It shows in a dull, throbbing backache or sharp twinges when stooping. You have headaches, too, dizzy spells, a tired, nervous feeling and irregular kidney action. Don't neglect it—there is danger of dropsy, gravel or Bright's disease! Use *Doan's Kidney Pills*. Thousands have saved themselves more serious ailments by the timely use of *Doan's. Ask your neighbor!*

An Iowa Case

D. W. Deame, 211 Poplar St., Atlantic, Iowa, says: "My back was so lame I could hardly bend over. Sharp pains through the small of my back and kidneys would almost cut my breath short. I had to get up often to pass the kidney secretions, which were highly colored. Two boxes of Doan's Kidney Pills cured me and I haven't had a sign of the trouble since."

Simple Explanation.

Mary and her cousin Susan were placed in a room by themselves to play with their dolls and picture books. For half an hour all went well, then there was a sound of lamentation. Mary's mother opened the door to learn what the trouble was and found Susan seated on the floor loudly proclaiming her grief to the ceiling while Mary, leaning on her elbows, chin resting on her hands, was gazing nonchalantly into the back yard.

"Now, what's the matter?" mother asked.

"Well," answered Mary, turning her face toward her mother, "both of us wanted to look out at the day, and both of us couldn't."

MOTHER, QUICK! GIVE CALIFORNIA FIG SYRUP FOR CHILD'S BOWELS

Even a sick child loves the "fruity" taste of "California Fig Syrup." If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

The Long and Short of It.

"Frank," observed the wife, "you were talking in your sleep last night, and you frequently spoke in terms of endearment of a certain Euphemia. Who is Euphemia?"

"Why, my dear, that was my sister's name"

"Frank! Your sister's name was Mary!"

"Yes, dear, but we called her Euphemia for short."

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

Hopeful.

"Hope springs eternal." "Yes, it's pretty hard to convince people there's no market for poetry."

AVERY TOWNSRIP NEWS

William Jefferson Bell and sister were visitors at Titonka Iowa, Saturday and Sunday.

School started again in Avery No. 2 after a weeks vacation.

William Bell and son Fred were Garner callers Tuesday afternoon.

Nava Bachman, who is attending school at Goodell, visited at the home of her parents over Saturday and Sunday.

Harvey Hobarts is assisting Robert Roths with his corn picking.

The Missis Elsie and Lula Henschen and Otto Hoiwood of Ventura were Sunday afternoon visitors at the Wm. Bell home.

Wilfred and Dorothy Hoffman were absent from school Monday.

Purchase of twenty acres of land which will connect the 240 acres upon which the orphan's home now rests with the city if Mason City, was authorized by the Grand Lodge of the Independent Order of Odd Fellows. The cost is $1,200 an acre, which will be met by a ten cent tax levy on members of the order in the state. The total cost is $22,500. Lynn J. Irwin grand master, who will succeed Senator John R. Price, staged a strong campaign among the delegates for the Mason City project. W H Winegar of Perry, trustee of the home, was re-elected and given the vote of thanks for his services at the institution. Iowa City was awarded the 1922 convention over Council Bluffs; Sioux City, and other contenders, withdrawing before the vote was taken. Council Bluffs lost by nineteen votes.

SCHOOL CONSOLIDATION

There are innumerable rural school sections where there are fine modern homes and elaborate farm equiptment, but in which the children attend little district schools that are too small to do efficient modern work.

The movement to consolidate such small schools in central buildings is making rapid progress. One splendid result is to pursuade the country young people to educate themselves better. Left in the little one room school they are apt to quit and go to work when they finish the grammer grades. But put into a consolidated central school and they are likely to remain. In Preble county, Ohio, for instance, where before consolidated they had 523 high school pupils, now they have 826. The development of a better educated generation of young people means wonder for such a community.

The consolidated school becomes the center of all kinds of community activities, like athletics, dramatics, music, lectures. The whole character of many country towns has been changed by this active powerful agency for community progress.

WHEN AUTO SALESMAN SEES OXEN HE QUITS

Kimbalton Record: Most of our readers have heard of a farmer in the neighborhood of Hamlin who cuts down gasoline bills by drivng a team of oxen to and from town. However the traveling representative of an automobile accessory house of Des-Moines has never heard of oxen being used for this purpose and when he recently saw such a spectacle at Ham lin one can hardly blame him for turning in his grips.

This knight of the grip was calling on the local dealers when a friend inquired, "How's business?" The traveling salesman looked at the offender, and replied, "Business! You ask me how business is? Why I was over to Harlan today and saw two buggy tops in an auto top repair shop for repairs, and then I came down to Hamlin and by the Holy St. Mackerel if they aren't drivng oxen. Business b r r r r r. I'm quitting."

HENRY LAU & SONS

How much was your last suit of clothes worth

That question has nothing to do with the price you paid for the clothes; it refers to what you got for it

YOU may be financially so fortunate that you don't care what you pay for clothes; but you are certainly unfortunate if you don't care what you get for your money.

What you get for your money in clothes depends on who made them. Some makers can't afford to make poor clothes; they have set so high a standard of quality, and have made so great a repntation for maintaining that quality at whatever cost, that any saving by cheap materials and low grade tailoring would be too costly

Thats the kind of clothes that Hart, Schaffner & Marx make

That,s the reason we sell them; that's the reason you ought to buy them

Ladies--We sell the well advertised line of "Dovetex" Gloves and also Everwear Hosery in silks, listles and silk and wool.

SOMETHING TO THINK ABOUT

By F. A. Walker

"ALL IS WELL."

IN A clause in the will of Prof. George Trumbull Ladd, late of Yale university, a provision was made that his body should be cremated and that a portion of the ashes should be buried beside a camphor tree which he had planted in 1907 in the yard of the School of Commerce in Nagasaki, Japan.

Professor Ladd was an authority on Oriental matters and had lectured in universities in Japan and India.

* * *

"I have lived and loved and labored, and all is well," was the impressive epitaph he chose to mark his grave.

Are you living and loving and laboring so that at the end of your journey, you can say, "all is well"?

What a volume of meaning there is in those three monosyllables and the splendid words preceding them!

To live and love and labor, and to do nothing more would in a little while turn arid wastes to blooming gardens, and lift from the world its burden of care, its burning hates and frightful wars. Terrible Mars with his blear eyes would be vanquished.

And so would the thorny road you are traveling, while carrying in the pack on your back old animosities and jealousies that retard your progress at every step.

* * *

We have each of us some whimsey in the brain that keeps us from loving and laboring as we should.

We have within us pent-up torrents of factious words which in sudden vents of anger we pour out and flood the smooth road ahead until it becomes impassable.

We wound the hearts of our dear ones, and sometimes the hurt remains through life.

We seemingly cannot agree on anything except hostility.

In sudden bursts of passion, to live and love and labor, that all may be well is remote from our thoughts.

Some of us, in moments of reflection, subdued perhaps by an odd mixture of shame and self-reproach see the error of our way, and hold ourselves in check, though the bridle chafes and the bits blister.

* * *

And so should we all, for to live and love and labor ought to be our chief purpose in life, for it will take us through safely and enable us at the end to write with a glad heart and a steady hand, "all is well!"

LYRICS OF LIFE

By DOUGLAS MALLOCH

STYLE.

I AM not right in style
And yet I do not care,.
Though people often smile
At things I have and wear,
For I remember folks
Who once were quite correct
Who'd be the village jokes
At present, I expect.

It wasn't long ago
To win the world's regard
You always had to show
An iron dog in the yard.
Each family must possess
A scraper on the stoop,
No house was right unless
It had a Rogers group.

The whatnot now is gone,
Along with Rogers' art;
The dogs upon the lawn
With iron legs depart;
And, in this later day,
New styles in style appear,
To be themselves passe
Perhaps within a year.

Who chases after style
Will go a merry pace,
Will spend a pretty pile
To keep his proper place.
And then some wintry night
The folks will yell at you,
"This furniture's a fright—
We must get something new!"

THE GIRL ON THE JOB

How to Succeed—How to Get Ahead—How to Make Good

By JESSIE ROBERTS

FOCUS YOUR ENERGIES

"I WANTED to be a singer," said a successful illustrator to the writer. "I had a pretty fair voice. With cultivation it could have been made better. But I know if I spent the time necessary for its cultivation, I wouldn't have time to learn to draw. And I had more ability at picture making than at singing.

"I didn't quit singing cold. I still sing a little. But I dropped it as a business. One business is all any man can attend to if he wants to get along."

Today this man is one of the highest paid illustrators in the country. He might have been a fair illustrator and a fair singer, or a good singer and a bad illustrator. But he chose the career for which he had the greater talent, and stuck to it.

The late Charles E. Van Loan in youth developed considerable talent for drawing. When he was fourteen or fifteen his teachers predicted that he would some day be a great artist.

But he discovered that he could write better than he could draw, and thereafter he drew only to amuse his friends and his children.

All his energies were bent toward learning to write, and learn to write he did.

Many men are born with a little talent for several different activities. And many such ruin their lives by scattering their energies instead of concentrating them on the one thing they can do best.

Time alloted to man is insufficient for the mastery of even a single art or profession.

Few men, however great, ever die with the feeling that they have reached anything like the standards they set for themselves.

There is always something still to learn when the summons comes to lay labor aside forever.

The surest way to win the measure of success that your abilities can command is to select the profession or the trade or the business you most enjoy following, and keep at that to the exclusion of every thing else save needful recreation.

It is a poor sct of brains that cannot learn to do one thing particularly well. It is a miraculous brain that can learn to do two things even fairly well.

(Copyright.)

FARM POULTRY

CHRISTMAS BEST FOR GEESE

These Fowls Require Little Care and Attention Compared With Returns They Bring.

(Prepared by the United States Department of Agriculture.)

Roast goose and apple sauce!

Christmas in many homes is incomplete without them, and for that reason the best season in which to market the goose is the latter part of December, although there is a limited demand all the year.

Goose raising is not so extensively engaged in as duck raising, the conditions under which they can be successfully raised being almost entirely different from those necessary for successful duck raising. The duck, being smaller, can be raised in a more limited space than can the goose, the latter needing free range and water, while the former has been proved to do well without water.

While the goose cannot profitably be raised in as large numbers as the duck, still it cannot justly be termed unprofitable. There are many places on a farm that are worthless for cultivation that could be utilized with excellent results for goose raising. Fields that have streams, branches, or unused springs on them could be turned to good advantage by making them into goose pastures. A goose on range will gather the largest portion of its food, consisting of grasses, insects, and other animal and vegetable matter to be found in the fields and brooks.

Young geese are fattened by placing them in a pen, not too large, so that they will not exercise too much, and by feeding them once a day all they will eat up clean of a moist mash made of one-half shorts and two-thirds cornmeal, and two feeds daily of corn with some oats or barley. While fattening young geese they should be kept as quiet as possible; no excitement whatever should disturb them, poultry specialists of the United States Department of Agriculture say. When feeding, approach them quietly, and do not frighten them. At ten weeks of age, or when the tips of the

Many Farmers' Wives Prefer to Dress Geese Before Marketing Them to Obtain the Feathers.

wings reach the tail, they are ready for market, if they have been heavily fed, and should weigh between eight and ten pounds. Most young geese from general farms are sold when they are from five to eight months old.

When young goslings are to be dressed for market, they are first stuck in the roof of the mouth with a long-bladed knife and then stunned by hitting them a sharp, quick blow on the head. For dry picking the picker uses a box in front of him about the height of the knees, holding the bird with the left hand and clasping the feet and wings together; he places the head of the bird against the box and holds it in place with the knee. Pick the feathers from the body of the bird, then dampen the right hand and brush the body to remove the down. Leave about two inches of feathers on the neck, and also leave feathers on the wings at the first joint. Lay the wings against the body of the birds and tie a string around to hold in position. Place the birds, when picked, in cold water for an hour or so to plump them; if they are in the water too long they are liable to bleach and become water-soaked. They are then iced up in barrels ready to ship to market.

POULTRY NOTES

Any margin over market prices received for breeding stock is pure profit, and the demand, especially for hatching eggs, comes at a time when the egg baskets are easily filled.

Be on the lookout for dampness in the poultry houses. Where freezing is common, close-built houses are very apt to show condensation of moisture on ceiling and walls. Too large a number of birds in a house will also cause this.

In either hen-hatched or incubator-hatched flocks, there are likely to be some backward, slow-growing, slow-feathering chicks. If the hatch is in the brooder, separate these backward chicks, and give them to a hen, or put them with a younger hatch. A turkey hen that has no family is an ideal mother for them.

"Made Me Well and Strong"

ANOTHER WOMAN WHO IS THANKFUL FOR

PE-RU-NA

"I have taken several bottles of Pe-ru-na and find it a great benefit. I had pains in my stomach and bowels, but by the use of Pe-ru-na and Man-a-lin, I am well and strong again. I always keep a few bottles in the house." Mrs. Oscar Gray, R. F. D No. 2, Box 19, Nichols, Iowa

Mrs. Gray's experience is just more evidence that Pe-ru-na is quite as good a remedy for catarrh of the stomach, bowels or other organs as it is for coughs, colds and nasal catarrh. Pe-ru-na is a wonderfully fine medicine to have in the house for everyday ills.

DIAMOND HAS MANY VIRTUES

But According to Superstition the Gem Must Be a Gift to Person Who Wears It.

According to superstition (and to fact, also), the owner of a diamond is lucky, indeed. The diamond should be worn upon the left side, for it is of greater virtue there, for the strength of its growing is toward the North, that is the left side of the world, and the left part of a man when he turneth his face toward the East. He who carries a diamond will have strength and manhood; it will keep him from harm, especially from broken limbs. It will give him victory over all his enemies if his cause is righteous. It will keep him from strife and riots, and is a talisman against enchantments. In fact, if an enchanter tries to work a spell upon the possessor of a diamond he will find it will work upon himself instead. No wild beast will attack the diamond owner. It heals all manner of mental troubles. If poison be brought near it, the diamond will become moist and sweat. In order to be of the greatest virtue, the diamond must be given freely instead of being bought.

Mutual.

EAGLE EASILY KING IN AIR

Has No Trouble in Distancing Airplane Traveling at Sped of Sixty Miles an Hour.

The eagle, according to aeronautics, is not merely the king of birds, but in flying qualities the swiftest of all birds. A French "flyer" from the French naval station at Salonica in February, 1916, had a match with an eagle near Mount Olympus. The eagle competed of his own free will, "I was followed by the eagle," writes Commander Larrowy, "at a distance of about 100 feet. Our machine was making her full measure of 60 nautical miles an hour. In comparison with us the bird seemed so perfectly at a standstill that I was able to photograph it with an exposure of a half second, as the sky was cloudy, and the plane gave an absolutely neat production. For two minutes the bird practically did not move its wings and seemed to glide, except every ten or twelve seconds, when it made a very slight and careless sort of rowing motion as if to keep fit. When the bird abandoned all thought of attacking its strange rival it went full speed ahead, and covering much more than 60 miles an hour soon disappeared."

Is, at last, the ire to be taken out of Ireland?

HOW DO YOU SAY IT?

By C. N. LURIE

Common Errors in English and How to Avoid Them

"EITHER, EACH, BOTH."

"ON EITHER side of the street there was a row of tall buildings." The speaker meant to convey that both sides of the street were lined with tall buildings, not that there was a row on either side, for "either" means "one or the other." He might have used the word "each," and have said, "On each side of the street there was a row of tall buildings," and his idea would have been clothed in correct words.

In the English of the days of King James I the usage on which comment is made was correct, and the King James version of the Bible written in the early years of the Seventeenth century (I King 5:15) says: "A line did compass either of them about," but the dictionary calls such use at the present day archaic; that is, ancient and outworn, and not to be approved in modern writing or speaking.

"No, sah, 'tain't that," replied Sam. "I hab done los' $5, sah, an' I jes' nacherly got to sit an' grieve."—Boston Transcript.

SCHOOL DAYS

MOTHER'S COOK BOOK

by Nellie Maxwell

If a man finds himself with bread in both hands, he should exchange one loaf for some flowers of the narcissus, since the loaf feeds the body indeed, but the flowers feed the soul.—Mahomet

SEASONABLE GOOD THINGS.

A RICH rice pudding for an occasion will be found most acceptable. Take a half-cupful of washed rice, drain after soaking overnight in slightly salted water. Add one cupful of milk and cook, closely covered, in a moderate oven. Add to one pint of cream the yolks of four eggs well beaten, with one-half cupful of sugar and stir in the cooked rice. Let bake, still covered, until the custard is set, then make a meringue with the whites of the eggs and pile on top. Brown lightly.

Roast Venison, Virginia Style.

Let the haunch of venison hang for a week in a cold place. The day before it is to be used wash in warm vinegar and water, and then rub with butter to soften the skin. Cover the top and sides with well-greased paper and over this put a half-inch layer of greased paper. The next day put into the roasting pan and cover closely with another pan. Allow three hours for roasting a 12-pound roast. Add one pint of water from time to time. At the end of an hour, baste well. Half an hour before serving, remove the papers and baste thoroughly with a cupful of cider and a spoonful of melted butter. Dredge with flour, return to the oven. Repeat the basting four times. The oven should be hot enough to brown the meat well. To prepare the gravy, remove the meat, add a tablespoonful of flour and stir until well browned; add a glass of cider, salt and pepper to taste. Stir well; add one-half a glass of currant jelly, and when it is melted strain the gravy into a gravy boat.

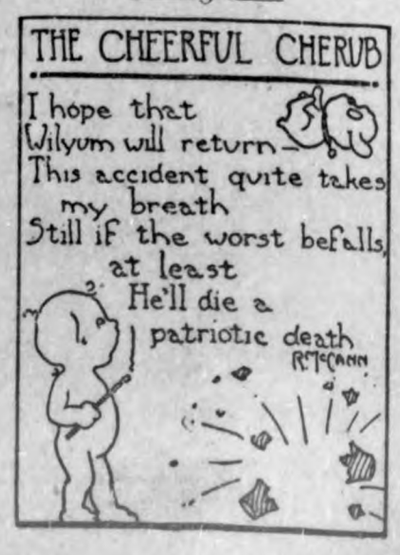
Nutted Cream.

Soak one-quarter of a box of gelatin in one-half cupful of cold water until softened. Whip until stiff three cupfuls of heavy cream in a bowl standing in ice water. Add one-third of a cupful of chopped nuts, three-quarters of a cupful of powdered sugar and one teaspoonful of vanilla. Add to the softened gelatin, one-fourth of a cupful of hot water and dissolve over hot water. Pour the dissolved gelatin over the cream and stir the whole until well mixed. When the mixture begins to thicken, pour into a mold and sprinkle with chopped nuts.

Browned Chestnuts.

Use the large imported chestnuts for this dish, if possible. With a sharp knife make two incisions at right angles to each other, through the shell on one side of each nut. Cover with boiling water and let cook half an hour. Drain and keep hot while removing the shell and thin skin from each nut. Put into hot fat and brown. Turn often. Drain on soft paper and sprinkle lightly with salt.

Copyright, 1921, Western Newspaper Union.



Why should you follow a crooked path?

Often a cowpath has been allowed to become a village street, and as the village expanded, tradition has made the winding way an expression of a cow's will.

Habit is always forging chains to enslave us, so that what has been found bearable by the fathers is accepted by the sons.

Who cannot recall the coffee-pot Mother put on the stove early in the morning, warning us not to let it boil over?

As children, we were not permitted to drink tea or coffee, because it would stunt our growth or make us nervous and irritable. When older, however, we craved a hot drink with meals, and custom gave us our tea or coffee.

Finally upon the instructions of the doctor, Mother gave up her tea and coffee. But that meant nothing in our young lives. Our vitality was then strong enough to throw off any ill effects.

But our time came, and we learned by experience that we could not drink tea or coffee. When we had it for breakfast it put our nerves on edge. When we drank it at the evening meal, we tossed about in wakefulness most of the night.

And then we found Postum, a pure cereal beverage, free from the harmful drug, caffeine, in tea and coffee. We liked the rich, satisfying flavor of Postum—and also the better health which resulted. And, too, we were surprised to find how many of our neighbors had made the same discovery—had learned the value of "health first."

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by all grocers.

Postum *for* Health

"There's a Reason"

ARLING BABY BRIGHTENS HOME

Children's Laughter a Pleasing Sound

Altoona, Pa.—"I am writing to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. We had six children die almost at birth. From one hour to nineteen days is all they have lived. Before my next one was born I took a dozen bottles of your Vegetable Compound, and I can say that it is the greatest medicine on earth, for this baby is now four months old, and a healthier baby you would not want. I am sending you a picture of her. Everybody says 'That is a very healthy looking baby.' You have my consent to show these few lines to anybody."—Mrs. C. W. BENZ, 131 3rd Avenue, Altoona, Pa.

Mrs. Janssen's experience of interest to childless wives.

Millston, Wis.—"I want to give you a word of praise for your wonderful medicine. We are fond of children, and for a considerable time after we were married I feared I would not have any. I began taking Lydia E. Pinkham's Vegetable Compound, and it strengthened me so I now have a nice, strong, healthy baby girl. I suffered very little at childbirth, and I give all the credit to your medicine, and shall always recommend it highly."—Mrs. H. H. JANSSEN, Millston, Wis.

Mrs. Held of Marinette, Wis., adds her testimonial for Lydia E. Pinkham's Vegetable Compound. She says:

Marinette, Wis.—"I was in a nervous condition and very irregular. My doctor advised an operation. My husband brought me one of your booklets and asked me to try Lydia E. Pinkham's Vegetable Compound. It overcame my weakness so that I now have a healthy baby girl after having been married nine years. I am glad to recommend your medicine, and you may use my letter as a testimonial."—Mrs. H. B. HELD, 330 Jefferson St., Marinette, Wis.

There are many, many such homes that were once childless, and are now blessed with healthy, happy children because Lydia E. Pinkham's Vegetable Compound has restored the mother to a strong and healthy condition, as it acts as a natural restorative for ailments as indicated by backache, irregularities, displacements, weakness and nervousness.

Women everywhere should remember that most of the commoner ailments of women are not the surgical ones—they are not caused by serious displacements or growths, although the symptoms may be the same, and that is why so many apparently serious ailments readily yield to Lydia E. Pinkham's Vegetable Compound, as it acts as a natural restorative. It can be taken with perfect safety and often prevents serious troubles.

Therefore if you know of any woman who is suffering and has been unable to secure relief and is regretfully looking forward to a childless old age, ask her to try Lydia E. Pinkham's Vegetable Compound, as it has brought health and happiness into so many homes once darkened by illness and despair.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Who Got the Penny?

It was little Dorothy's first time to attend Sunday school. Before leaving the house her father gave her a penny and said:

"Now, Dorothy, you must give your penny to Jesus."

When the Sunday school teacher passed the collection envelope she followed the example of the other children and deposited her penny. On her return home her father asked:

"Dorothy, did you give your penny to Jesus?"

"No, sir," she replied. "Mr. Jesus was not there, so I gave it to Mrs. Jesus."—Kansas City Star.

A Lady of Distinction

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores, followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Advertisement.

Comprehensive, at Least.

An Anglo-Indian doctor instructed a native who was nursing one of the doctor's patients to keep a written record of the patient's symptoms.

The doctor, on his next visit, found the patient dead, but the written chart was immediately forthcoming. It read as follows:

11:30 p. m.—Patient's life is flitting.
12:15 a. m.—Patient in the sink.
1:40 a. m.—Patient's life is flown.

Progression.

He—Every time I kiss you it tends to make me a better man.

She—Ooh, you angel!

A Good Question.

She had the money and he a small job. He wished to get married very badly, but she was rather undecided. One night as they sat talking about the future, he having coaxed her into a halfway engagement, he said:

"And we'll be very careful and not run into debt and have trouble as the Sissons did. We'll always pay cash—won't we, dear?"

A suspicious look came on to her face. Quickly she put forth the question: "Whose cash?"

DYED HER SKIRT, DRESS, SWEATER AND DRAPERIES

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—advertisement.

Success and Failure.

"I met Barrie," said an editor, "at a dinner party in London. What a big head he's got, to be sure!

"'Sir James,' I said nervously, toying with the stem of my wine glass, 'I suppose, Sir James, that some of your plays do better than others? They are not all successes, I imagine?'

"Barrie leaned his big head on its little thin neck toward me. His saucerlike eyes twinkled.

"'No,' he said, 'some Peter out and some Pan out.'"

HOUSE PULLETS BEFORE LAYING

Putting Them in Winter Quarters Early, Results in Larger Egg Production.

SELECT ONLY THE HEALTHY

Best Methods of Cleaning and Disinfecting the Houses—Hens Must Be Protected From Drafts, but Ventilation Is Necessary.

(Prepared by the United States Department of Agriculture.)

To get good results from a flock of poultry during the winter all houses and coops should be in good condition, only healthy fowls placed in these buildings, and good care given to the poultry. As it takes about two weeks for hens or pullets to settle down to their new quarters they should be moved early. The moving should be done before they begin to lay, for a shift after egg production begins may set them back for a month to six weeks. Moving pullets around from one house to another is the best means of holding back egg production if they are developing too fast. The United States Department of Agriculture points out that it is highly desirable to bring the pullets in from the range before they begin to lay.

Prepare Houses for the Winter.

The houses should be thoroughly cleaned, disinfected, and made tight for the winter. It is much easier to do this work while they are empty than after they are filled with fowls. If the house has a dirt floor, it is well to remove the top 3 or 4 inches and replace this with dry gravel or sand. If it has a cement or wooden floor, remove all litter and dirt and put in 4 or 5 inches of fresh straw or litter.

Remove the roosts and scrape the dropping boards, wetting them down if necessary to loosen refuse which has caked and dried on. Sweep the walls and ceiling with a broom, and clean out all old nesting material. The house is now ready to be disinfected. Mix up a batch of whitewash or other disinfectant. Put a peck or more of freshburned lime in a tub or barrel and pour on it enough water to start slaking. Stir occasionally and add more water to prevent burning. Keep the vessel covered with an old sack to retain the heat. After the lime is thoroughly slaked dilute it to the proper consistency and strain it if it is to be applied with a spray pump. Add a quart of crude carbolic acid to each bucketful of wash. Other effective disinfectants are lime-sulphur mixture used for spraying fruit trees, coal-tar preparations, or the approved cattle dips.

With a whitewash brush or spray pump apply thoroughly to the inside of the house—walls, ceiling, floor, dropping boards, and nests, as well as the

Bring the Pullets in From the Range Before They Begin to Lay, for Moving Them Retards Egg Production Two to Four Weeks.

roosts, which should be placed out of doors in the sun for a few days. Allow the house to dry out before putting in fresh litter. Rye straw makes excellent litter, because it is tough and does not break up easily, but wheat or oats straw, cornstalks, dry leaves, or coarse hay are all usable.

Make Houses Free From Drafts.

Be sure that the house is tight on three sides and that there is no chance for a draft to strike the hens. If hens roost or are placed in a draft during the fall and winter, colds are sure to develop, which may result in roup and other troubles. From one-third to one-half of the south side, or front, of the poultry house may be made of curtains and windows, but should be under control, so that the openings may be closed gradually as the weather becomes cold. Have muslin curtains in the front of the house or leave a window partly open, even on the coldest nights, to allow some ventilation in the house. Fowls will stand considerable exposure to cold air provided it is dry, and ventilation will keep the air in the house dry.

Before the pullets are mixed with the older fowls be sure that the hens are banded or that the web of the foot is punched in some way, so that you can distinguish between the pullets and the hens. This plan permits the older stock to be culled out whenever desirable, and the young hens to be kept for further laying. For egg production do not keep hens over two years, but some of the best hens may be kept for breeders until three or four years old.

ONE FARM IN THREE HAS AN AUTOMOBILE

Iowa Leads in Number and Nebraska in Percentage.

There Are Motortrucks on Two Farms in Every Hundred, and the Telephones and Water-piped Houses Are Numerous.

(Prepared by the United States Department of Agriculture.)

Nearly every third farm in the United States had at least one automobile on the first day of last year. Of the 6,448,366 farms in the United States, 1,979,564, or 30.7 per cent reported having automobiles to the number of 2,146,512. Although Iowa led all other states in the number of automobiles on farms, having 177,558, Nebraska, with 104,453, showed the highest percentage in relation to the number of farms, heading the list with 75.6 per cent.

Motortrucks were reported on 131,551 farms in 1920 or about 2 farms out of every 100 in the United States as a whole. The number of motortrucks on these farms was 139,169. The states leading in the number of

One American Farm in Fifty Has a Motortruck.

motortrucks on farms are: Pennsylvania, with 9,372; New York, with 9,259; Iowa, with 8,910; Ohio, with 7,319; Nebraska, with 6,548; California, with 6,416; and Illinois, with 6,154.

Three and six-tenths per cent of the farms in the country were reported as having tractors on January 1, 1920. This is about one farm out of every 28. The 229,334 farms thus represented had a total of 246,139 tractors.

Telephones were reported on 2,508,002 farms, or 38.9 per cent of all farms in the United States, in 1920. More than one-half of the farms in the following states had telephones: Iowa, Kansas, Nebraska, Illinois, Indiana, Missouri, Ohio, Minnesota, South Dakota, Wisconsin, Vermont, Connecticut, Massachusetts and Oregon. Iowa, with 183,852, showed the largest number.

Farms reporting water piped into the house in 1920 numbered 644,088, or about one farm out of every 10. The percentage was highest in the New England states and in California. The states leading in numbers were as follows: California, 65,928; Pennsylvania, 46,402; New York, 45,487; Ohio, 41,531; and Texas, 38,580. Gas or electric light was reported on 452,809 farms, or 7 per cent of all farms in the United States.

These figures, gathered by the bureau of the census, are being studied by the United States Department of Agriculture in connection with its work along these lines.

RAISE CLOVER IN NEBRASKA

Spring Is Most Popular Time for Sowing Crop for Pasture and Improvement of Soil.

Recent information collected by the Nebraska College of Agriculture from Nebraska farmers who grow sweet clover indicates that spring is the most popular time for sowing it. Forty-nine out of 98 farmers seeded it in April, 16 in March, eight in February and nine in May. Only six seeded in the fall. Sixty-seven were growing sweet clover for pasture, 34 for soil improvement, 24 for hay, 18 for seed and nine for bees.

GEESE FOR HOLIDAY MARKET

Thanksgiving and Christmas Trade Is Always Most Profitable of Whole Year.

Thanksgiving and Christmas are the best markets for geese. The feathers come off more easily if the goose is wrapped in a thick cloth after scalding to steam the feathers loose. The wings and tail feathers are pulled before steaming. Sprinkle powdered resin over the down and dip in hot water, which melts the resin so that the resin and down can be rubbed off together.

CARING FOR SEED POTATOES

First Object to Be Sought Is Prevention of Sprouting in Storage—Temperature Helps.

Prevention of sprouting in storage is the object sought in handling seed potatoes. This can be brought about by keeping the storage temperature at from 35 to 40 degrees Fahrenheit and allowing circulation sufficient to eliminate the surplus moisture given off by the tubers.

WRIGLEY'S

"After Every Meal"

Next time you want to concentrate on a piece of work just slip a stick of WRIGLEY'S between your teeth.

It's a wonderful help in daily tasks—and sports as well.

Hazards disappear and hard places come easy, for WRIGLEY'S gives you comfort and poise—it adds the zest that means success.

"Movies" and Eye Strain.

One potent cause of eye strain in movie theaters, according to investigators in England, is peculiar to the front seats, especially popular with children, where the eye must be uncomfortably uplifted to see the screen. It is recommended that the visual angle to the top of the screen should not be more than 35 degrees, and the angle to the screen's side also should be limited.—Popular Mechanics Magazine.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

Her Defense Perfect.

Jane, after having plucked a bouquet of roses, was reprimanded severely by her dad, who said: "Didn't I tell you not to pick any of these flowers without leave?"

"Yes, daddy," replied the youngster, "but all these had leaves."

BOY KILLED ON PIKE NEAR GARNER

Car Piloted By 13 Year Old Lad Skids On Ice Into Ditch

A tragedy marked the route of travel on the newly paved highway a few miles east of Garner Friday and resulted in the death of a six year old boy.

Mrs. Wilimina Wintetrs buried her husband Mr. Jacob Winters in Platte, South Dakota two months ago and a week since sold her farm equiptment and with the funds realized therefrom started in their ford with her six children to her old home in Marion, Michigan.

About three miles easts of town they met a big touring car which crowded the Ford out to the side of the road and into the ditch, caused probably by the slippery condition of the pavement. The machine rested on its top. All escaped without injury except little Claus John whose neck was broken.

A passing stranger brought the boy to Dr. McMahan's office but life was already extinct. Garners undertaker was called from a football game at Mason City just at the close of the first half.

He prepared the body for shipment to Michigan on the 7:29 on No. 8 train. Mr. Joe Sberal brought the widow and her five children back to town where kindly people ministered to their needs until train time when they accompanied the little boy to their home. The Ford was wrecked.

It was doubtless voluminous robes and wrappings which prevented the rest of the party being injured. The 13-year old son was driving.

CELEBRATES 70th BIRTHDAY

Mrs. Schroeder was seventy years young last Wednesday, but somehow she had forgotten about the event. but not her daughters, Mrs. Croner and Mrs. Lena Schroeder. They had been quietly at work for several days baking cakes and other good things and had invited sixteen of the lady friends of Mrs. Schroeder to come and help celebrate the big day and they managed to smuggle them into the house while Mrs. Schroeder was in the kitchen and she did not dis- the ladies until she came into the livng room to get something. She was so surprised that all she could do was throw up her hands and look bewildered until it dawned on her that she was the victim of a clever surprise party. Needless to say she thoroughly enjoyed the surprise. The ladies brought her many presents in remembrance of the day. A good time was had visiting and later a fine lunch was served by Mrs. Croner and Mrs. Lena Schroeder. When we mentioned above that Mrs. Schroeder was seventy years young, we meant every word as she acts, feels, and looks to be a lady of about fifty. And on account of her girlsh appearance one lady even brought her a doll to play with, as a gift.

BASSET BOY MADE BIG PROFIT ON PIG

NEW HAMPTON—One of the interesting features of the Iowa boy's and Girl's Pure Bred Gilt club of Chickasaw County was the record of Lawrence Roethler, a ten year lad of Bassett. This boy brought to the Annual County show his Poland China Pig and won second prize of $2.00 in the market pig club.

The boy bought his pig the first of July for $3.00. His report shows that it cost him to feed the pig for July $2.50, Aug. $2.00, Sept. $3.75. Oct. $2.55. His story shows he fed corn, oats, middlings, and sour milk. He washed his pig once a month, kept it in a pasture and made a net profit of $6.49 in four months.

KLEMME SCHOOL NEWS

(By Andrew Wellemeyer and A. E. Lauritzen)

The first number of the lecture course will be given here on Friday Evening. Nov. 25. The Maitland Entertainers, a mole trio, will give us a good evening's entertainment at that time. The school is conducting the lecture course this year. Come and bring your family. Idle Hour Theatre, Friday Evening November 25 at 8 P. M. Admission: Adults 55c, Children 33c including Tax.

Tuesday seemed to be an unlucky day for Donald Stille. Here is the story: The ground was too wet to play basket ball and there was snow on the ground. Sides were formed and a snowball battle was begun It is happened that Donald was the unlucky victim of the fight for a representative of the opposing side came right for him as he was going to make a snowball. This cold representative met Donald on the lip and in a few minutes his lip was swelled very much. At this time he is in god health again and ready for another snowball fight, but probably it s lucky for the fellow that threw the snowball, that all the snow has disappeared.

Albert Priebe was noticed the other day hidden behind a yair of goggles. We sympathize with albert for having to wear glasss.

Evald Josten and Albert Priebe were absent Wednesday forenoon.

Some preparations are being made to make the basket ball posts and necessary things for basket ball practice in the garage.

The snow has detained basket ball practice for a couple of days. but at this time all the snow has disappeared and practice at noons has begun.

Most of the Contestants of the Declamatory Contest have selected heir pieces and have most of it memorized. Rehearsals have bememorized. Rehearsals have begun with Miss McKahan as coach.

The Sophomore class is msfortunate in temporarly losing one of their members. Miss Vona Greene was called home Monday being that they have been quarantined for scarlet fever. The Sophomores wish her a speedy return.

Maybelle Johnson was elected by the Sophomore class as representative in the Declamatory Contest. She is filing the vacancy caused by the resignation of Marie Blank.

Clarence Elder was absent Friday on account of sickness.

Klemme High School observevd Armistice Day in a fitting manner. Charles Gibbs and Earl Josten, of the senior class last year were guests They ditnguished themselves by each givng us a good speech. At 11 o'clock we all faced the east and observed a moment in silent prayer and then Rev. Bergman led us in a prayer of thanksgiving. This was followed with snging of patriotic songs. George Bergman, Bernice Tanner and Adela Schroeder read themes on the subject of disarmament Conference, after which Rev. Bergman gave us a fitting address. Songs were then sung. During this snging Glenna Greutzmacher presided at the piano. Adela Schroeder then played an instrumental piece. She sure showed her skill as a musician.

Harl Gimer returned to school after an absence of two weeks. All the pupils in the Grammer room are glad to see him back. We are sure Harl will catch up in his studies very soon. He comes to school on crutches.

188 BUSHELS OF CORN IN 10 HOURS RECORD, CLAIM

WEBSTER CITY, Nov. 10.—What is believed to establish a record for Iowa Corn huskers was set at Story City near here recently when Noah Valde picked and cribbed 188 bushels of corn in a day. The achievement took place on his father's farm in Rose Grove township. He worked approximatetly ten hours, including the time taken to unload the wagon.

The record is vouched for by Daniel Swanson, prominent in the Story City community, who says he was an eye witness of the work. Swanson says he drove the wagon for three of tthe loads picked by Valde.

In describing the husking, Swanson says: "The wagon box measured 47 inches and he filled it four times. good, full measure. The corn was the yellow dent variety, a good yield, but not standing up very well, and a great many ears loose on the ground."

Young Valde is a typical American tall and athletic, of extraodinary strength and endurance. He seemed none the worse aftetr the hard grind He is the same young man who, in 1916, skated across country from his home in Rose Grove to Webster City.

THANKSGIVING BASKET SOCIAL

There will be a Thanksgiving program and a basket social at the Twin Lakes school District No. 2, on Thursday evening, Nov. 24th. Every body invited to come.

Edith Haupt. Teacher.

D D. Ross, of Garner, was a business caller in Klemme Monday.

Governor Kendall Issues Thanksgiving Proclamation

REPEAT HERDSMAN'S COURSE

Opens Jan. 2 for Fifth Season and Will Run Two Months During Winter Quarter

The herdsman's short course at Iowa State College will be repeated this winter, commencing January 2, and will continue for two months as in previous years.

The work will consist of special training in care and management of purebred livestock, and with other instruction relating to the industry. As in the past special lectures by men of note will be provided. The work occupies two quarters before certificates are awarded. The first period runs during one winter and then the students are required to spend summer with some livestock owner and get practical experience. The second period comes in the following winter. After satisfying the animal husbandry department as to his fitness, the student is awarded a certificate.

This course was started in 1917 and since then the enrollment has doubled. It is open to any one over 17 years of age who has completed the eighth grade of school or is equivalent, and who wish to enter the purebred livestock work. Last year students entered the course from 14 states.

"This course," according to H. H. Kildee, head of the department, "is one which any young man contemplating entering the purebred livestock business cannot afford to miss. It gives him practical training in the specific lines of work that will fit him for handling the stock in a successful manner."

Information regarding the oourse can be had by addressing the animal husbandry department, Iowa State College, Ames.

EMIL LAU HAS GOOD SALE

Emil Lau held his Pure Bred Boar and Bull sale at his farm last Friday and although the weather was not the best, he reports a good sale.

He offered forty head of boars and some buls and sold all but two boars. CConsidering the times he said he was well satisfied with the prices brought and considers his sale was good.

Emil will hold a pure bred sow sale about the 15th of February. He is one of the active pure bred stock men in this part of the state and is making a success of it.

CREAMERY AT LAKE MILLS WINS IOWA BRAND FOR BUTTER

LAKE MILLS,—Denmark has its "Luhr Brand Butter," Sweden has its"Rune Brand Butter," and Iowa has the "Iowa State Brand Butter."

In order to have a right to use this Iowa Brand, butter must come up to a certain standard. Seventy five per cent of the butter must score 93 or above and if more than 25 per cent scores down to 92. or any of it scores below 92, one loses the right to use the brand.

The Lake Mills creamery has passed the examination, and is now authorized to use said brand on its butter, its license number is 9, showing there are eight other creameries in Iowa that have passed the examination.

HOW TO USE PINS

In sewing, the proper uses of pins sometimes will save the operator considerable trouble. Here are a few rules which will help.

Place pins in cloth at right angles to the edge.

Press a wrinkled pattern before laying on the goods.

Pin seams instead of basting.

Pin the hem or facing after it has been pressed.

PROCLAMATION

At a period when life offered but a fraction of the blessings which it now overflows, the wisdom and piety of our ancestors selected one day in each year for praise and thanksgiving. The beautiful and solemn custom established in colonial days has decended from generation to generation with renewed significance and increasing impressiveness. It is highly appropriate that we who enjoy in such rich profusion the manifold favors so graciously bestowed upon us, should recognize unreservedly our complete dependence upon the Supreme Ruler, and acknowledge cheerfully our profound gratitude to Him.

The year we are just concluding has been one of financial depression and economic difficulty, but after all it appears in retrospect opulent with good fortune. Our health has been marvellously preserved, and we have suffered from no overwhelming disaster. Our harvests are unparalled, since our fertile soil has responded generously to our intelligent industry. We have not been distressed by foreign war, nor distributed by internal discord. We have been assured that perfect security in life, property and the pursuit of happiness which is the crowning glory of arepublican democracy.

With the contentment which material well-being creates we must in no wise overlook our obligation to the Giver of every good and perfect gift, remembering always that righteousness exalteth a nation, but sin is a reproach to any people.

Now therefore I. N. E. Kendall. Govenor of Iowa, acting in conjunction with the President of the United States, do hereby designate Thursday November 24, 1921, as

THANKSGIVING DAY

and I earnestly enjion with the people of the State that they suspend for that day their ordinary activities that they assemble at their usual alters of worship, and there render forvent thanks to Almighty God for the unfailng bounties He has showered upon us. On this sacred day let the Divne Father be entreated also to direct and control the destines of men that universal peace may be perpetually maintained thoughout the world.

In Witness Whereof, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Iowa.

Done at Des Moines this 9th day of November, A. D. 1921

By the Govenor.

W .C. Ramsay — N. E. Kendall

Secretary of State — Govenor

(SEAL)

DOG PRISONER IN GROUND 48 HOURS

NORA SPRINGS, Nov. 14—A dog and a woodchuch caused considerable commotion here last week. The dog. property ofHenry Hintzman, started out to capture Mr. woodscuck, chasing him into hs hole. He started to dig Mr. woodchuck out but he seems to have drawn the hole in with him.

When the dog did not return as usual a search was instituted and form inquiry it was found that the last time the dog was seen he was digng in the hole. Spades were secured and after diggig about eight feet the dog was found imprisoned in the hole.

The dog had been imprisoned about forty-eighth hours but was still alive and soon as lively as ever.

BASKET SOCIAL

There will be a program and basket social given at the Ell No. 6, 2 miles east of Klemme on Tuesday evening, November 22. Everybody are invited to come and have a good time. Mrs. Carl Suckow, teacher.

RETAINED RELICS OF GALILEO

Fanatical Admirer of the Great Italian Insisted on Keeping Portions of His Body.

The report that Robert Bruce's heart has been discovered at Melrose, in Scotland, reminds an Italian paper of the fate of Galileo's remains, according to the Manchester (Eng.) Guardian.

When the body of Galileo was exhumed from its original resting place on March 12, 1737, and removed to the magnificent mausoleum in the Church of Santa Croce, Florence, Marquis Vincenzo Capponi, who was a fanatical admirer of Galileo, took possession of the right-hand thumb and forefinger.

Some of those present at the exhumation protested strongly, but the marquis had his way, declaring his intention to "cherish these fingers as sacred relics," which prompted the retort: "Instead of Galileo's fingers it would be better for you to have his brains."

This bad example proved contagious, for the left thumb and one of the ribs were annexed by two other members of the company, and these relics are now in the museum of the university. Marquis Capponi had an urn made for his portion of the body, which all newcomers were called upon to admire as the greatest treasure in the house.

At the beginning of the last century the Capponi family fell upon evil days and emigrated to France, leaving the Galileo relics to become the property of an old butler who had long been in their service. Other oddments given him by his master proved salable, but he could find no market for Galileo's finger and thumb, and these eventually passed to one of the butler's descendants, Signora Laura Joni. In 1905, when she was old and poor, some one advised Signora Joni to offer to sell the relics to the Italian government. Inquiries were instituted which proved the authenticity of the relics beyond a doubt, and they are now preserved with other mementoes of Galileo, the vendor having received a handsome price for them.

In Unexpected Places.

One of the curious features about the most modern of modern inventions, the airplane and the wireless telegraph, is that they are most in demand in lands which hitherto have let the world of progress and invention pass by unheeded. The nomad in the deserts of Arabia, who never saw a railway, today takes an airplane as a matter of course, whilst inland China, which in all other respects is much as it was 3,000 years ago, is eager for the erection of wireless stations. The latest country to be brought into the great ambit is Greenland. Greenland, during the winter months, is cut off from the rest of the world, but when the Danish government has carried out its present scheme for the erection in Greenland of a radio station capable of communicating direct with Denmark, the good people of Godhavn will be as much in the world, as far as news is concerned, as the good people of Copenhagen.—Christian Science Monitor.

Bad Control.

Producer Hal E. Roach found his star comedian, Harold Lloyd, sprawled on the dressing-room floor trying to get a million dollars' worth of laugh out of his system. Lloyd had turned a studio corner at the right moment to see what promised to be a "hot scrap" between two darky "extras." Just when it appeared that the heavy blows were on tap, one of the belligerents started on a dead run across the lot and hurdled a fence.

"I'm surprised at you, G. W.," Lloyd said when he met the runaway a half hour later, "I never thought you would show a streak of yellow like that."

"Ah wasn't runnin', Mistah Lloyd, hones' Ah wasn't," came the answer; "Ah'm 'flicted 'at way. Whenevah Ah gets in a fight, Ah jus' kain't control mah legs, 'at's all."

As Funny as Ever.

He had one of those long mustaches—one of the kind that, if you had been buying him a birthday present a few years ago, you would have thought of a mustache cup the first thing.

Everybody had been making fun of it, so one Sunday morning he shaved it off. The first person to get a look at his upper lip in 20 years was a neighbor girl about the age of four. As she came into the house she said: "Oh! Mr. Bowin, you look just as funny as ever."

French Youth Defective.

As a result of the lack of opportunity to take physical exercise half of the youths of France are said to be physically unfit for military service. Out of more than 3,000,000 eligibles, only 165,000 measured up to the ordinary physical standards in a recent examination of the class of 1921, which will join the colors soon.

Varying Love Names.

"Which do you prefer?"

"That depends on the circumstances. Sometimes I don't use either. If I happen to be sneaking up the stairs about two o'clock in the morning, and Mrs. Whoppit calls out 'Who is that?' I always say, 'It's your own Algy.'"—Birmingham Age-Herald.

Pretty Smooth.

"Would you die for me?" asked the sweet young thing.

"My dear, how could I? Thanks to your beauty, mine is a charmed life."—Boston Transcript.

HAVE NEW GLORY

Incident Typical of the Fine Spirit of France.

How Madame le Baraquet Views Her Squalid Quarters in the Once Splendid City of Soissons.

M. and Mme. le Baraquet live in the shadow of Soissons cathedral. They are very partial to Americans. Particularly Mme. le Baraquet, a dear old aristocrat, confesses that she adores them for, as she explains, "If the Americans had not come, we could not have returned home." And she shakes her white curls in testimony of her great earnestness, remarks a writer in the American Legion Weekly.

Living amid their old scenes is very difficult for the Baraquets. If you knew Soissons under shell fire, you will wonder why in heaven's name any one would care to come back to this town of underground dugouts. You will remember that all the houses around the cathedral were leveled by the bombardment. Once upon a time the home of the Baraquets, with its carved rafters in the dining hall and its oak-paneled library, was a thing of rare Seventeenth-century beauty. But there is not one stone of it laid upon another nowadays, and the Baraquets live in what was once their wine cellar. Monsieur is 82 years old. Madame is 76.

Today the couple sleep in a bed which the old man has fashioned out of a packing box. A decrepit French army stove stands at the foot of the bed. Just beyond, Monsieur (in spite of his rheumatism) has built a little table against the wall. Their cooking utensils have been picked up from the debris. Their plates are American issue mess kits. Once their table was graced with rare Limoges china and antique silverware. Gone are the ancestral paintings. In their place there are three crude lithographs, one of Marshal Foch, one of Prince Bonaparte and one of Gen. Pershing.

Yet when they invite you into their dugout it is with all the grace of prewar days. It is dingy down there. Their little room is filled with smoke and the walls are covered with mildew and slime. The hacking cough of Madame tells its own pathetic tale. Sitting in these squalid quarters, your mind wanders back to the days when a great house stood above those ruins. You see the wonderful tapestries, the old lamps, the marble statues, the liveried servants, the library rich in treasure of a forgotten age.

We fell to talking of other times. "When I was a lad," explained M. Le Baraquet, "I watched Empress Eugenie, herself, ride up to this house. * * * I mean of course, our house as it was * * * in elegant coach and four. I watched her as she stepped out on the carriage stone that you will still find in front of our dugout. She was a great friend of my mother's. When I brought Madame, as my bride, to this home, Eugenie attended the ball my father gave to honor us. Little did he know that we were destined to be the last of our line. * * * Our son, Pierre, died in the first battle of the Marne."

Monsieur turned suddenly to stir up the wood fire in the French army stove. The embers were fleecy white, growing gray. I turned discreetly to where Madame sat on the edge of the packing box bed. Madame is deaf, so she had not heard the name of her son, which Monsieur had spoken in a lowered voice. Her eyes peered far into the gloom, dreaming of the fair ladies of old France that once had crowded her salon.

Suddenly her face changed and her eyes sparkled brightly with a new fire.

"The old house knew many a famous guest, Pierre, to be sure!" she cried. "But this new home of ours, this dugout, it has sheltered many a brave soldier. We have reason to live here in greater pride—a new glory for the old!"

Too Many Commandments.

Lord Leverhulme some time ago bought an island off the coast of Scotland, with a view to improving the lot of its 30,000 inhabitants, mostly small farmers, farm workers and fisher-folk. Lord Leverhulme's lawyer drew up a very elaborate contract to be signed by each tenant. It contained no fewer than 26 clauses or stipulations.

"One old fellow," relates Lord Leverhulme with great gusto, "returned the contract unsigned and sent with it this note: 'I havena been able to keep the ten commandments for the sake of a mansion in heaven, and I'll be d—d if I'll agree to keep 26 commandments for a sma' hoose in the island o' Lewis.'"

Bad Lights Slow Production.

A survey of 446 industrial concerns in 15 states and 57 towns, recently made, showed that 25 per cent of the work is done under artificial light, but that only 40 per cent of the factories have been adequately lighted by their owners. Proper lighting facilities, it was shown, increased production, reduced spoilage, decreased number of accidents, improved discipline and brought about better hygienic conditions.

Urges Athletics for Women.

The woman of today needs to learn and play more athletic games than ever before if she is to take her new position in America as the bearer of the burdens of citizenship, according to Dr. William Burdick, supervisor of physical education for the public schools of Maryland.

FIGHT OYSTER-SHELL SCALE

Agricultural College Tells of Effective Measures to Take Against Destructive Pest.

Recently considerable attention has been attracted by the presence of a scale on lilac bushes. This pest is what is known as the oyster-shell scale. It is a cosmopolitan insect and is doubtless the commonest and most widespread scale insect known. It infests all kinds of fruit trees and ornamental shrubs.

This scale is readily distinguished from other scale insects by its shape and color, according to C. R. Jones of the Colorado Agricultural college. It resembles a minute elongated, curved shell, about one-eighth of an inch in length, and is of a dark brownish color. The eggs of this pest are laid beneath the scale in the fall and thus protected, they pass the winter.

In early June, depending upon the temperature, the eggs hatch, and the tiny, pale, yellowish, young insects crawl from beneath the scale and wander about the twigs and branches, finally settling down on the bark, and insert their long, threadlike beaks into the substance which protects them while they develop, the females never move from that spot. They continue to grow and finally secrete the brown scales which attract attention. Sometimes these insects become so numerous that entire branches are covered with scales.

Effective control work can be accomplished against this pest by a thorough application of lime sulphur which tends to loosen the scales and allows natural enemies to work upon them, or they may be sprayed with a solution of Black Leaf 40, one part to 800 parts of water, to which is added about six pounds of soap. This spray should be applied from June 1 to June 15, before the young scales have secreted sufficient scale to protect themselves.

Dehydrated Vegetables.

Dehydrated vegetable products as a substitute for fresh vegetables are gaining in interest and favor through the efforts of the United States Department of Agriculture. The work has included sending quarter-pound packages of dehydrated vegetable soup mixture to 3,000 hotels for trial, and the reports declare that the soup is not only cheaper than that from fresh vegetables but equal to it in many respects. Many leading chefs, though naturally expected to be prejudiced against the innovation, have given their approval to the new material, suggesting some slight changes in the mixture. One pound of the preparation is said to make 125 portions, but one hotel manager found that if made into only 48 portions the cost would be but little greater than that of fresh vegetables. The new products are being brought to the notice of hospitals and other institutions and the individual housewife.

Advantage of Age.

Two lads had been to see a picture show, in which the star was a freckle-faced boy. After seeing this picture, for once in their young lives they were both very proud for the world to see their freckles as they were on their way home.

But after a while an argument was started over who had the most freckles. At the point where there was nothing else to do but fight it out, the younger boy, who did not have much chance of winning, said: "Well, Red, you should have more freckles than me, 'cause you are almost two years older."

More Than Most of Us Do.

The usual small-boy discussion was going on among the boys from the flat as to whose father was the smartest.

"Well," said one, "my father has a lot of people working for him, and he tells them to do things and they do 'em."

"My father goes around on the train and only comes home on Saturday nights," said another, as though traveling was a gauge of smartness.

"My father is smart," said the third. "He says he always makes out his own income tax."

A Poison Test.

"You are safe in accepting the invitation to a 'moonshine' party at Bibler's house."

"Why so?"

"He keeps a supply of guinea pigs on the premises. When a new consignment of 'moonshine' is received a spoonful is given to a guinea pig. If the patient shows signs of merriment and then lies down for a nap the festivities are started. If he drops dead the party's off."—Birmingham Age-Herald.

Roger Bacon's Cipher Manuscripts.

A discovery of cipher manuscripts of Roger Bacon show that he was familiar with the use of high-powered microscopes and telescopes. A key to the code was discovered by Doctor Newbold of the University of Pennsylvania. Many of the results of modern science are said to have been anticipated. Fuller particulars will be given to the world shortly.—Scientific American.

Sounds Like It.

"I wonder if Columbus had a press agent?"

"I doubt if there were any of them in his time."

"Perhaps not. Still, that story of Queen Isabella pawning her jewels to finance his expedition has all the earmarks."

SURPLUS STOCK REDUCING

SALE

OF FARM MACHINERY

On account of sickness and being unable to take care of business, I have decided to reduce my large stock of Farm Machinery at Public Sale at my implement store, on—

Wednesday, November 23

Beginning at 2:00 P. M.

The following seasonable Farm Machinery

Corn Shellers — Bob Sleighs
Steel Tanks — Hog Waterers
Cream Separators — Wash Machines
2-seat Spring Buggies — Hog Troughs
1½ to 2 H. P. Gas Engines

And many other articles in our farm machinery line.

All of the above is brand new and in first class condition!

TERMS—5 per cent discount for cash; or 10 month's time will be given on bankable notes bearing 8 per cent interest. No property to be removed until settled for.

W. M. BAACK

B. A. Reemstma, Auctioneer. State Savings Bank, Klemme, Clerk

Here's the Turkey

We furnish everything but the turkey for your

Thanksgiving Dinner

Here are a few of the "trimmings" you may need:-

SOMETHING TO THINK ABOUT

By F. A. Walker

ALONG THE SHORE.

THE word "impossible" has no place in the brave man's vocabulary. This statement applies with equal force and certainty to brave women; to brave boys and girls who, in their faith and persistency adhere firmly to right purposes and keep ever pressing forward, refusing always to admit defeat.

If it were not for these courageous people, the world would soon drift into a state of deplorable ignorance, helplessness and poverty.

How strong and capable is the boldly sailed ship on the sea of life, with her white canvas bulging free, she booms on to the distant haven where hordes of expectant humans await her arrival!

If in adverse winds and pounding storms the navigator should throw up his hands and cry "impossible," the ship and her precious cargo would be lost.

* * *

There is entrusted to you by the Creator full command of the wonderful ship that carries your soul, which at the end of life's voyage you are expected to bring safely into the harbor.

You must not shirk this great responsibility.

You must not cry "impossible," lose heart or enthusiasm.

You must perform your whole duty with unfailing precision, whether sailing under clear skies or beneath domes blurred with leaden clouds driven by howling gales.

The storms are meant to test your skill and patience; to bring out your fine qualities; to enable you to say with the strong and the true that nothing is "impossible" for him or her who holds fast to faith.

* * *

In a world where most of us sail in circles, unmindful of our duties, we need every day to be reminded of what lies beyond—the treacherous rocks that we must shun; the tempests of our own making that must be avoided and the whirlpools of the evil one.

Many souls have gone down on the jagged reefs of bad habits; many others have been ruthlessly swept overboard by sudden whirlwinds of temper or lashed to pieces by storming tongues.

All along the shore of adventure from adolescence to old age, the lone beaches are strewn with wrecks of humans who never learned to sail the Soul's Ship, who never sought the peaceful harbor because they stubbornly refused to recognize "the possibility of writing on the eternal skies the record of a heroic life."

—O—

Uncommon Sense

By JOHN BLAKE

WANT WHAT YOU NEED

PHILOSOPHERS tell us we can have anything we want, provided we want it enough.

With certain qualifications this is true. It explains why many men get things out of life that their friends never expected to get. They wanted them, and they got them.

Getting things in that way for most people involves considerable sacrifice.

For example, if a dry goods clerk wants an automobile he may get it, but he will have to skimp pretty heavily on his clothes and diet if he gets it while he still remains a dry goods clerk.

It is for this reason that, when you begin wanting something, it will pay you to want what you need.

That will involve thought, for none of us know what we need until we devote considerable time to reflection and study.

There are men who want new wives, when they have perfectly good wives at home. They don't need them, and therefore ought not to want them.

There are other men who want wealth, when they don't need wealth at all.

Still other men want steam yachts when rowboats would do them more good, and private swimming pools when they would get more fun and health out of public baths in the ocean.

They may get these things, but they will be no better off when they do get them.

The wanting habit can grow into a very bad habit indeed unless you are careful to want what you need.

It is well to remember in this connection that there are some very important needs that you ought to want first of all.

One of them is a good reputation. Another is good health. A third is a home.

Want these badly enough to get them, and confine your wants after that to things that are reasonably certain to bring happiness.

Then want as hard as you like, and your wanting will not hurt you.

But wanting to be a "movie" star when you were born to be a furniture salesman, or to be a Caruso when you were born to be an accountant, will only make you unhapy.

You won't get either of these things, even by wanting them, and you will spend a very unhappy life in the effort.

Want what you need and you will be reasonably sure to get it, if you begin young enough. But don't want what you don't need. It will only make you miserable for life, even though you attain the object of your desires.

THE CHEERFUL CHERUB

LYRICS OF LIFE

By DOUGLAS MALLOCH

UNCLE PETE.

HIS maltese used to come and rub
Her coat against his leg;
He had a dog, a mongrel scrub,
He taught to sit and beg;
The horses used to whinney when
They saw him on the street;
The children ran from other men
To play with Uncle Pete.

He was a sort of village joke
Who tinkered here and there,
And always poor, and always broke,
And yet he didn't care.
The banker used to sit and frown
And growl like anything;
But half the way across the town
You'd hear old Peter sing.

Folks said he was a failure, yes,
He hadn't any sense—
To go through life in idleness
And make no competence.
Now, what do you think?—what they said
About a "failure?" Do
You think the folks who shook their head
Had estimated true?

Me? Well, I think that they were right.
Pete had a brother Pat
Who was, like him, the kids' delight
And loved by dog and cat.
Besides all that Pat worked his land,
Raised hogs and corn and wheat,
Provided for his family, and
Supported Uncle Pete.

SCHOOL DAYS

MOTHER'S COOK BOOK by Nellie Maxwell

Some perfect day I shall not need
To bend my brow o'er baffling tasks;
Some perfect day my soul shall read
The meaning hid 'neath clouding masks;
Some perfect day I shall attain
The dim ideal my spirit asks.

WHAT TO EAT.

THE following are some of the many good old-fashioned dishes that most of us enjoy:

Oyster Stew.

Put a pint of oysters in a colander and pour over them cold water to rinse, then pick out the oysters with the fingers to see that there are no bits of shell. Heat three cupfuls of milk over hot water; strain into it the oyster liquor and add three tablespoonfuls of butter. Cook the oysters until they are plump and the edges curl; add the hot milk, boil up and serve at once.

English Pastry.

Cut into small pieces a pound of round steak; cut in slices a pint of potatoes; slice three onions. Make a rich biscuit dough; roll out and line a deep pie plate; put in a layer of the diced uncooked meat, a sprinkling of salt and pepper, a layer of potatoes and onions. Cover with a crust as for pie, leaving a small opening for the steam to escape. Bake slowly until the crust is well done. Wrap in a cloth and steam for ten minutes before serving. This meat pie is good hot or cold.

Meat Balls

Season two cupfuls of chopped meat with salt, pepper, a pinch of clove and a little minced onion, a cupful of oatmeal or other cooked cereal; add one egg and shape into cakes. Brown in butter or lard and butter mixed. Serve garnished with sprigs of parsley.

Custard Pie.

Prepare a rich crust and line a deep pie plate. For the filling take one-quarter cupful of sugar, two eggs well beaten, a pint of milk and nutmeg to season. Just before going into the oven sprinkle with a half-cupful or more of chopped black walnut meats. Bake as usual. The nuts will form a nice brown crust on top of the pie.

Common Errors in English and How to Avoid Them

"BETWEEN YOU AND I."

"BETWEEN you and I," says the careless speaker, "I do not like that fellow." Probably the speaker has been taught, in school, the rule of grammar which says that in English all prepositions govern the objective case; that is the word which follows a preposition must be in the objective case, but he has forgotten the rule.

Now, "between" is a preposition—a word used before a noun or pronoun to show the relation between the person or thing named and the idea expressed by some other word or phrase in a sentence. And "I" (used incorrectly in the phrase "between you and I") is a pronoun and should not be "I" at all, but "me," since "me" is the objective form of the personal pronoun, first person singular.

All of the above, expressed in simple English, means simply this: Never say "between you and I," but say "between you and me."

The Mark of Affluence

In Sweden, we are told, you can judge a man's wealth by the hat he wears. Here we judge it by the hat his wife wears.

ASK INSPECTION ON ALL PRODUCE

Anyone Concerned in Interstate Shipment May Request Federal Certificate.

INSPECTOR IS TRAINED MAN

Many Causes of Disputes, Costly Lawsuits and Lasting Dissatisfaction Are Removed—Buyer and Seller Satisfied.

(Prepared by the United States Department of Agriculture.)

There are few shippers of produce who have not suffered at some time the discomfiture of receiving word from the other end of the line that their carload arrived in bad condition, due to poor grading, careless packing, frost damage, overripeness, rot, breakage, mold, disease or any one of half a dozen other kinds of injury.

Every instance of this sort means a money loss and the shipper wonders sometimes whether the produce really arrived in bad order or whether some unscrupulous dealer possibly seized upon a trifling excuse to reject the shipment because it was received on a falling market, or sought a pretext to depress its value or to gloss over a sale made at what seemed unduly low prices.

Condition Determined on Arrival.

If really damaged, the shipper wants to know to what amount. Was the whole load affected? What was the actual condition on arrival? Was the loss due to bad handling and packing or to delay or neglect by the transportation company or by the receiver? Was the cause a disease which may develop also in the rest of the crop? Some of these questions interest the receiver and the railways, as well as the shipper or producer. No one cares to assume blame and incur loss for what happened to the produce while it was in the hands of others. How can all these questions be settled without undue expense or delay?

Since the establishment of the federal inspection service three years ago by the bureau of markets and crop estimates of the United States Department of Agriculture, the answer is comparatively simple. "Telegraph to the federal inspector in the nearest large city, asking him to report on the shipment." He is a trained man, with considerable experience in handling produce, a competent and certified judge of grades and condition.

The inspector's verdict is commonly accepted by dealers and shippers and by courts, railways and express companies. With the shipment officially inspected, all parties concerned have learned all that it is practicable to know about its exact condition and

Inspector Determining the Condition of a Shipment of Potatoes.

grade, and many causes of troublesome disputes, costly lawsuits and lasting dissatisfaction are removed. The inspector's certificate removes fully half of the sources of worry and uncertainty and narrows the market question down chiefly to a matter of salesmanship.

Anyone financially concerned in the shipment may ask for inspection. If there is trouble over the produce, or if there is merely the wish to avoid possible difficulty later on, the applicant writes or telegraphs to the United States food products inspection service, bureau of markets and crop estimates, in the city where the car is to be received.

Certificate as Evidence.

The idea of official inspection is to provide a reliable, disinterested report as a basis for settling disputes regarding quantity, quality, grade or condition. No matter who asks for it or who pays the bill, whether producer, dealer or railway, the other party may have a copy of the report. If the shipper and dealer can not agree, or if there is a damage claim against a transportation company which results in a suit, the certificate is prima facie evidence in the federal courts on the points which it covers.

The request for inspection should tell where the car may be found and the number, and should give also the main facts about the contents, calling attention to any special point as to grade quality or condition.

INOCULATE ALFALFA AND KINDRED CROPS

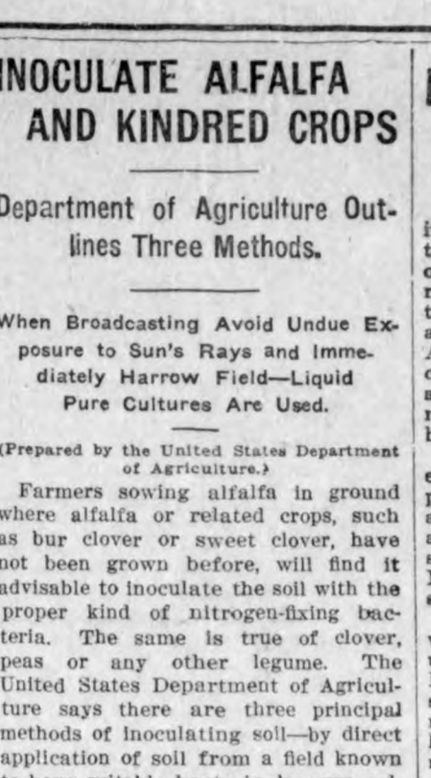
Department of Agriculture Outlines Three Methods.

When Broadcasting Avoid Undue Exposure to Sun's Rays and Immediately Harrow Field—Liquid Pure Cultures Are Used.

(Prepared by the United States Department of Agriculture.)

Farmers sowing alfalfa in ground where alfalfa or related crops, such as bur clover or sweet clover, have not been grown before, will find it advisable to inoculate the soil with the proper kind of nitrogen-fixing bacteria. The same is true of clover, peas or any other legume. The United States Department of Agriculture says there are three principal methods of inoculating soil—by direct application of soil from a field known to have suitable bacteria, by pure culture inoculation, and by the glue method.

For the first, it is well to apply at least 200 pounds of finely sifted inoculated soil per acre. This can be done with the fertilizer attachment of the drill, or broadcasting by hand. Broadcasting will require a larger quantity and should be done in the early morning, late evening or on a



Making Examination of Alfalfa for Nodules.

cloudy day to avoid undue exposure to the sun's rays. The field should be immediately harrowed after broadcasting. Transferring soil from any considerable distance is expensive and subject to the danger of introducing troublesome weeds, insects and plant diseases.

An easier method of field soil inoculation which has met with success where only a small amount of inoculated soil is available is to coat the seed with inoculated soil by means of ordinary furniture glue.

Dissolve two handfuls of glue for every gallon of boiling water and allow the solution to cool. Put the seed in a washtub and then sprinkle enough of the solution on it to moisten, but not to wet it (one quart per bushel is sufficient), and stir the mixture thoroughly until all the seed is moistened.

Obtain inoculated soil from a place where the same kind of plants as the seed are growing, making sure that the roots have a vigorous development of nodules. Dry the soil in the shade and pulverize it. Scatter this dust over the moistened seed, using from two to four quarts of dirt for each bushel of seed, mixing thoroughly until the seeds no longer stick together.

Liquid pure cultures are prepared by the Department of Agriculture and are mailed in limited quantities on application, not more than enough for one bushel of one kind of seed to any person. They are also sold by private concerns. Complete directions are mailed with each bottle.

FEEDING TESTS WITH FOWLS

Mixture of Bran, Middlings, Meat Scrap and Corn Meal Is Ideal for Producing Eggs.

As a result of eight years' feeding tests at the United States Department of Agriculture poultry yards at Beltsville, Md., a mash feed has been compounded which gives uniform high egg production. This mash, which has been tested for three years, is made of 4 per cent bran, 4 per cent middlings, 26 per cent meat scrap, and 66 per cent cornmeal. In the experiments the hens were allowed to select their own mash ingredients. This is the proportion of those different feeds which they ate during the year. Several pens of 30 hens each, both of Leghorns and of Rhode Island Reds, have averaged from 140 to 155 eggs apiece while this mash was fed. While the mash seems to be especially adapted for Leghorns, it has given very good results with Reds. Wyandottes and Plymouth Rocks were found to get too fat on the ration and a mash somewhat lower in meat scrap has given better results with these breeds. Both the Wyandottes and Plymouth Rocks at Beltsville are large standard sized fowls. The tendency to become overfat on this mash probably would not be found in a smaller type of Plymouth Rocks, such as is often found on commercial poultry farms.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores. Advertisement

MIGHT HAVE PUT IT BETTER

Evidently Mr. Pea Was Not Deeply Versed in the Gentle Art of Diplomacy.

Secretary Conrad Jenny of the Swiss embassy at a dinner was talking about diplomacy.

"A good many diplomats," he said, "are about as diplomatic as old Mr. Pea.

"Mr. Pea was a village character who stuttered. There was a political meeting in the village one evening, and among the speakers was a certain Cue.

"Well, at the end of the meeting there was a kind of a reception, and Cue, the most important orator of the occasion, was introduced to the stuttering old villager.

"Mr. Pea shook the orator's hand and stuttered:

"'Glad to m-meet you. L-let's see, you were one of the s-speakers, weren't you?'

"'Yes, I was,' said Cue.

"'W-well, say,' said old Pea, 'w-wasn't them other f-fellers good?'"

American Ice Cream for Canada.

Thousands of gallons of ice cream are being shipped every month from Vancouver, British Columbia, to China, the frozen dainty being forwarded in specially constructed containers, holding about 500 gallons each.

PE-RU-NA

A Great Medicine

Mrs. M. J. Riley, R. R. No. 1, Box 101, Calvert, Texas, writes:

"I have used Pe-ru-na and know it is good for colds, coughs and catarrh. It cured my catarrh and I do not take cold when I use Pe-ru-na. It is a great medicine."

During the last fifty years, Pe-ru-na has been looked upon as the reliable medicine for catarrh of every description, whether it be of the nose and throat, stomach, bowels or other organs.

By keeping Pe-ru-na in the house for emergencies, serious sickness may frequently be prevented. Use it after the grip or Spanish Flu.

MAKE GOOD RECORDS

Hens in Contest Lay Many Eggs During September

A total of 9,600 hens in farm flocks laid, 93,145 eggs during the month of September, according to the report issued by the poultry extension department at Iowa State College. This is nearly ten eggs per hen.

The receipts for these eggs amounted to a profit of $3,799.50 to the owners.

The Swiss parliament has already granted 50,000,000,000 francs for the payment of unemployment doles and for the execution of various public works to aid the jobless. Now the government is asking for 86,000,000,000 more francs for the same purposes. Reports from Berne are to the effect that there are seven times as many men out of employment in Switzerland now as there were a year ago. Quite likely the numbers of jobless will increase just as long as the government continues its policy of ditributing charity among them. The nation that takes money from one class of its people and hands it to another can never bring contentment to its citizens.

DO IT FOR YOUR OWN SAKE, FOLKS!

We have with us in this community many valued citizens whose home towns are in other parts of the country.

Circumstances that are our good fortune as much as theirs, have made it to their interest to settle here. They have established homes and built for themselves many warm friendships,

But the "old home," the home of childhood, is somewhere else. Oft must come to them fond recollections that go back to the home of their boyhood days; back to the people there whom they knew and loved; back to the scenes that were so familiar and will always remain intimate until the last call arrives to still another home. . .

It is no reflection of a man or woman that his or her heart retains a place for the old home town and that he sometimes dreams of it. Sentimental? Certainly, but such a sentiment is good and wholesome and is the mark of a human heart that can be trusted—and loved.

To these of our fellow citizens we address this suggestion: That they take advantage of the idea behind the coming "Subscribe to the Home Paper" week. in order that, during the coming year, they shall receive regularly each week their old home town newspaper and see the names and hear of the people they usesd to know in the happy old days when they lived in the good old home.

You know the paper's name, fellow citizen! Send on your subscription.

FALL PIGS NEED CARE

Better Feeding Will Overcome Cold Weather Handicap

Pigs that are farrowed in August and September, according to the animal department at Iowa State College need extra attention when cold weather sets in if they are to be gotten into good market conditions by spring.

In order to get these pigs to weigh around 225 pounds during the colder months they will have to have a ration that offsets the loss of the green forage. This can be gotten by using a mixture of corn, oats and tankage, self-fed. Skimmilk or buttermilk can be used in place of apart of the tankage as it will supply the necessary protein to balance the ration. Unless the rations is properly balanced there will be a steady gain and the hogs will suffer in weight.

Mineral mixtures fed to hogs in dry lot have made excellent showings during the past season and are worth trying. Mixtures can be obtained from the animal husbandry department which has made combinations that have been sucessfully used. Salt should be provided at all times.

Alfalfa hay, if available, will make the amount of tankage to be fed less as it contains considerable portion of protein.

A KENTUCKY FEUD STORY

"Everybody expects a Kentuckian to tell a feud story," stated Govenor Morrow recently. "The thing has really been much overdone, but the story of Lige Parsons may be worth telling. Lige droped into the courthouse to see his friend the probate judge. . .

"Howdy, Lige!" greeted the judge.

"Howdy judge!"

"What's doin' down your way, Lige

"Nuthihn' much, judge, except the other evening I was a settin a-readin of my bible when some shootin' begun. One of my gals said 'twas the Harris boys down by the middle pasture. Now, judge, I didn't mind them Harris boys a-shootin' but I was afraid a stray bullet might hit a calf of one of the kids, so I picked up my rifle and dropped a few shots down that way and went backa-readin' of my Bible. Next mornin' I went down that way an' they was all gone 'cept four."—Pathfinder

After next Saturday the Catechism and Bible school will meet at 2:00 o'clock on Saturdays.

W. C. Bergmann, Pastor.

IF X EQUALS Y, WHAT IS Z?

You've read a lot of tales of the farmer who brought in a cow hide and didn't get enough to pay for having his shoes half soled, but we present for your consideration this week the case of Andrew Scot, residing on a farm west of town, who recently in the course of his labors butchered a calf. Being a farmer he naturally was looking out to save every cent this year, so he skinned the animal while he was about it—a task which required some time, and when he had completed the job he drove to town and sold the hide.

And received 22 cents.

The same day that we were told this story by a friend of Mr. Scott's a man was in the office who had just purchased a pair of shoes. He paid five dollars and a half. Now if a calf hide is worth 22 cents. and a pair of shoes sells for $5.50, then the farmer either had to skin twenty-five calves or go bareooted.

"Ain't we got fun" raising calves at the rate of 25 per pair of shoes and donating the labor It's a great life if you don't weaken, but at this rate something has got to crack before long.

WOOD LOT NEEDED ON FARMS

Scarcity of Timber Makes it Urgent That Farmers Plant Trees in Waste Corners

Iowa farmers use between $6,000,000 and $10,000,000 worth of lumber annually, according to the forestry department at Iowa State College and this bill will soon be doubled, unless they economize in the use of the better grades and give attention to the treatment of forest products. The farmer is the largest user of wood in the United States, say the forestry experts, who estimate that 46 per cent of all the wood used annually goes to the farms. Not only does the farm require much timber and wood for posts, fuel and minor supplies but the average farm each years uses 3,000 board feet of lumber for buildings.

Better grades of building lumber such as pine, cypress and oak, according to I. T. Bode, extension service forester are getting scarcer every day but in spite of this there is a greater demand than ever for lumber and posts on the farm. Building and repair work on the average farm are at present below normal but there will soon be a greater call for lumber.

To meet this demand Mr. Bode advocates the farm woodlot. Every farm should have a planting of trees of different varieties and this should placed on waste land that will not produce a good agricultural crop. By the planting of rapid growing soft wood trees serviceable lumber will result in ten years time and these woods can be treated with creosote or other preservative and last as long as the better grades of hardwood.

Doctor E. H. Phillips, Osteopathic Physician, Masonic Bldg. Garner, Iowa. O-27-tf.

The practice of pensioning or insuring sick and wounded soldiers is said to have been started in England by Oliver Cromwell.

HERE'S A PROBLEM IN RELATIVITY IN CURFEW ENFORCING

EMMETSBURG,—Marshal Brenan has been reminding some of the young folks who might violate the curfew ordinance that they are considered 18 years of age until they become 19. The young people are asking Mr. Brennan, in return. if9 o'clock, which is the night curfew hour, continues until the clock strikes 10? Mr. Brennan simply advises them not to take any chances on the matter. The new ordinance seems to be workig fairly well.

Pie Sale at John Day's Store Saturday by the Ladies Aid.

Arthur Wellemeyer was a business caller at Mason City Monday.

Tanlac, the celebrated mediccine, is now sold by E. S. D. Kahrs.

Dwight Smith, of Des Moines. was visting with Klemme friends Monday.

Big shipment of Tanlac just received. E. S. D. Kahrs, local agents.

Tanlac, that wonderful medicine, sold in Klemme, by E. S. D. Kahrs.

Mr. and Mrs. Wm. Diegar and the children of Goodell. were visitng in Klemme last Wednesday.

Mrs. Will Beer and Mrs. Graeber of Goodell, were Klemme callers last Wednesday.

The Misses Lolo and Leoda Smith were visting n Mason City last week Thursday.

Mrs. G. P. McCullough was a Garner visitor between trains last Thursday morning.

Mr. and Mrs. H. Harberts, of Goodell, were Klemme visitors last week Friday.

Mr. and Mrs. C. F. Keraus went to Swea City Monday for a visit with their daughter, Mrs. T. F. Mitchell.

Many of the teachers of Klemme and vicinity went to Garner Saturday to take in the teacher's meeting.

R. A. Jorgenson was a business caller at the County Seat Town Saturday afternoon.

Mrs. J. F. Miller and Mrs. John Woods left last Thursday for Norway Iowa, where they were called by the death of Mrs. Miller's mother.

Mrs. N. L. Palmer left Monday evening for California where she expects to spend the wintetr visiting at the home of her brother.

Tanlac, that celebrated medicine, makes you eat better, feel better, sleep better and work better. Sold by E. S. D. Kahrs.

Eveline, daughter of Mr. and Mrs. Rudy Baack, was quite sick the past week but is considerably better at his writng.

Mrs. A. Kirkwood, of Goodell, was a Klemme caller Saturday afternoon. Mrs. Kirkwood runs te hotel at Goodell now.

Elmer Fuller, Marvin Barr and Orville Burgess went hunting Sunday and got forty-seven rabbits. A pretty good record we'd say.

A number of the Masons here belonging to the R. A. M. went to Garner Monday night for a regular meeting and banquet at the temple.

Mr. and Mrs. Henry Lewis entertained a number of their friends to a Bunco Party at their home last Thurs day evening. All report a very good time.

Mr. Ingvard Lauritzen and Harold Christenson drove to Ringsted Saturday afternoon on a business mission. These two men are working on the new Baack building.

Tanlac has the largest sale of any medicine in the world. Over twenty million bottles have been sold in six years. No other medicine has ever approached it as a seller. E. S. D. Kahrs.

W. L. Habercamp went to Fort Dodge last Thursday evening. being summoned there to sit on the Grand jury. We guess he put up a good story to the Judge as we saw him back here Saturday again.

The snows of the past few days were just right for rabbit hunting and the boys took advantage of the season. The bunny population was considerably reduced, but there are a few left for those who like to hunt.

Dr. George Zinn went to Goldfield, Iowa, last Thursday. His nephew, Dr. Edgar Zinn wanted to take a short vacation so he called on his uncle to "let George do it" while he was away.

Bert Trumbell came from Des Moines Friday for an over Sunday visit with Klemme relatives and friends. Bert is taking a business course at the capital city at theC.C. C.C. institution.

Mrs. A. E. Buriff left for Goldfield Saturday noon to join her husband, Rev. Buriff, who accompanied their car of goods a few days previous. We have not yet learned who will take charge of the church here.

Mr. and Mrs. Fred Ridder gave a party to a large number of their frends in the Ridder Garage last Friday evening. A good time was enjoyed by all. They were treated to a fine lunch later in the evening.

Ralph Elder took a few days vackation from his duties at the creamery last week. In other words, the vacation was not by choice but was forced on R. W. as he was on the sick list.

W. M. Baack, who has been laid up for some time with pneumonia was operated upon Monday in the hopes of hastening his recovery. We are sorry to report that Will s not improving as rapidly as was expected.

Mr. and Mrs. Elmer Fuller and Mr. and Mrs. Marvin Barr entertained about forty of their friends at the Fuller home Tuesday evening to a Bunco Party. All had a fine time and at a late hour the guests were treated to a delicous lunch..

Our "devil" Clarence Elder deserted us a couple of days days week when he put his name down on the sick lst. He came back again Saturday, and like all good "devils", started right in again raisng——dust of course.

Just received a large shipment of the wonderful remedy. Tanlac. This is the great medicine you have been hearing so much about. The remedy thats made such a wonderfull reputation and which has accomplished such remarkable results all over the United States and Canada. Get pour bottle now at E. S. D. Kahrs.

As Christmas falls on Sunday this year it has been generally agreed that Monday should be observed. In fact some calenders have put Monday December 26 in red to indicate Christmas. Alright, let's observe Christmas on Monday here, some of the business men have signifed their willingness to observe Christmas and New Year on Monday.

We beleive all medals should go to Henry Lemke for the number of rabbits shot in an afternoon's shoot this season. Henry was out about two hours the other afternoon and lagged twenty nice bunnies. Two of these bunnies adorned the frying pan at the editorial manse the following day and we will say they are sure fine.

PRINTER WAS PEEVED

Charley Harris, of Fort Worth, Texas, got slightly peeved at a letter from a doctor who wanted bids on several thousand letterheads, different sizes, different grades and different colors and wanted the printing form held standing. So Charley took his typewriter in hand and wrote.

I am in market for bids on one operation of appendicitis. One, two or five inch incision—with or without ether-also with or without nurse. If appendix are found ti be sound. want quotations to include putting them back and canceling order If removed successful bidder is expected to hold incision open for about sixty days, as I expect to be in the market for gallstones at that time and want to save extra cost of cutting."—Kansas City Post.

THE MARKED BIRD.

MR. WOODPECKER is a marked bird, as you all know who have seen him, for the red spot on the back of his head is plainly seen when he is pecking away at a tree, or even if half hidden by leaves the red spot is pretty sure to be seen and to reveal his working place, even when the sound cannot be located. Mrs. Woodpecker does not wear this red spot, for she is the one who caused her mate to be so marked, and why, do you suppose?

Listen and I will tell you what is said about it in Birdland, for there is always a little bird, you know, that gives away secrets and that is how this one was learned.

Long, long ago a certain Mrs. Woodpecker, so the story goes, had a great deal of trouble with her husband, because he went away from home early and stayed late and never brought anything home to help support the birdlings. Mrs. Woodpecker pleaded and peeped at this all in vain. Mr. Woodpecker declared he could not find enough insects for himself, let alone bringing some home.

Little Mrs. Woodpecker tried to watch her mate and flew after him

One Day Mrs. Woodpecker Asked the Goblins to Help.

when he went away, but he was too clever in dodging for her to follow him, for he could easily hide against the bark of a tree and she could not find him.

Of course, she could hear him hammering, but his bright eyes always saw her afar off and he was on the wing and away before she could get near.

So one day Mrs. Woodpecker became very desperate and asked the goblins to help her. "I can't get him to bring home a thing for the children to eat," she said, "and they eat so much I am just worn out. Do tell me what to do. If I could follow him and catch him at work then I should be certain he finds plenty of food, but I cannot prove that he does not, for I can never surprise him."

The little goblin was sitting on a rock, out of which he had just jumped, and, laying a finger on one side of his nose, he thought a minute. "I have it, Mrs. Woodpecker," he said, jumping up. "I will get the fairies to let you have some of the red like my cap. You can paint his head red some night when he is asleep, and with a red cap like mine you can see him anywhere in the forest."

Mrs. Woodpecker went home with a light heart and that night she met the goblin, who had an acorn cupful of red paint for her. But the rest was not so easy, for when she flew home with the paint and tried to paint her husband's head while he slept he kept waking up and asking, "Who is tickling the top of my head?" and poor little Mrs. Woodpecker could not mark her mate.

But the next morning, just as he was flying away, Mrs. Woodpecker was so upset she lost her temper and after him she threw the paint brush, which struck the back of her husband's head and left a spot of red paint.

Of course he did not know about the paint and thought his wife was cross, but there it was; and then Mrs. Woodpecker followed and caught her lazy husband, for now that she could see him some distance away, she took good care that he should not see her until she was beside him.

It was no use to deny it now, for she saw with her own eyes that there were plenty of insects and he had to do his part after that toward supporting the family.

And that is the reason that Mr. Woodpecker wears a red spot on the back of his head and his wife does not, so the little bird from Birdland told the story.

Pauline Frederick

"A cowboy among cowboys," is the way the boys at the Cheyenne roundup designated the handsome "movie" star, Pauline Frederick, who was their invited guest. Pauline became endeared to the boys when she demonstrated her ability to ride and rope a steer with the best of 'em last summer. "I'd rather ride than eat," is the way the star expressed her delight in the pastime.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

RECOMMENDATIONS.

Small service is true service while it lasts—Wordsworth.

IT IS at all times risky to recommend anything. Yet in the very order of things we all do recommend the things we like to our friends. It is too much to ask us always to recommend with a reservation. We should be quite stilted and unnatural if we did that. Perhaps it is a better suggestion to say that we should always take a recommendation with reservations.

If a friend of yours tells you that she has found a good dressmaker she really puts herself under no obligations to prove her statement, but if you should ask for the dressmaker's address you put your friend under the necessity of proving that the dressmaker is good. So if you do ask people to recommend anything, you must show your good breeding by abiding by the results without complaint. It would be the height of rudeness on your part to criticize a dressmaker whose address you had asked for from a friend who had told you about her. If you do not agree with the friend's recommendation you are, of course, at liberty never to have her again! Of course the dressmaker is only an example and the same rules hold good of anything that is recommended to you—from a book to a new kind of breakfast food. You don't have to take the recommendation. But if you do it is the well-bred thing not to criticize the result.

Some people give up recommending books because those they recommend them to do not like them. But one of the things that makes books interesting is the discussion they evoke. You are not casting aspersions on a friend's taste when you fail to like a book that she finds interesting. So discussion of a book at somebody else's suggestion is permissible.

The only thing that you ought not to recommend unless you are willing to take the consequences is something in which you have a personal or financial interest. But perhaps this admonition comes rather in the field of ethics than in the field of etiquette.

"What's in a Name?"

Facts about your name: its history meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

CECILY.

CECILY, though used interchangeably with Cecilia, is an independent name with an interesting history. She comes, of course, from the great Caecilian gens which, curiously enough, was named for a slowworm, a reptile supposed to be blind. Caia Caecilia is said to have been the real name of the model Roman matron, patroness of all other matrons, whose tomb is famous throughout Italy.

Another famous Caecilia was the Christian martyr, whose body was disinterred in perfect state after 200 years and enshrined in a church. It is she who is the patron saint of sacred music. In her honor Philip I of France and William I of England each named a daughter Cecile. The English Cecile straightway became Cicely, and became enormously popular about the time of the Reformation. It was Cicely Neville, called the Rose of Raby, afterward the duchess of York, who gave the name greatest vogue in England, where she was known as Proud Cis. Her grandchild, Princess Cicely Plantagenet, was a nun.

After the Reformation, strangely enough, Cicely became a generic term for milkmaids and sank into oblivion. When it was revived it came forth as Cecilia and was straightway contracted to Cecily and Cecil.

Cecily's talismanic stone is jet, denoting sorrow, yet, if it is worn by Cecily, it is said to preserve her from misfortune, suffering and danger of every sort. Wednesday is her lucky day and 3 her lucky number.

How It Started

THE BALLOT.

IN ORDER to keep votes and opinions secret the ancients resorted to some form of vote. The Greeks used oyster shells (ostrakon) to vote on the banishment or ostracism of men; the Romans used tablets or tabellae. The printed ballot was used in the New England colonies in the earliest days of their history, but its use in Europe was not until later. In 1710 it was proposed by the English parliament but was rejected. The French chamber of deputies used it in 1840-1845.

DAIRY FACTS

RECORDS OF GREAT BENEFIT

Much Valuable Information on Relations Between Milk and Butterfat Production.

(Prepared by the United States Department of Agriculture.)

Tabulation of the yearly records of 38,532 cow-testing association cows has brought to light much valuable information on the relations between milk and butterfat production, butterfat test, income over cost of feed, and other factors, say specialists of the United States Department of Agriculture. The average milk production per cow was 5,980 pounds; butterfat, 246 pounds; butterfat test, 4.11 per cent; income over cost of feed, $55.69; returns for $1 expended for feed, $2.11.

The records show that in those associations where the work has been continued for a long period the production has generally increased from

Fall Freshened Cows Produce More Milk and Butterfat Than Those Freshened in Spring or Summer.

year to year. As production increased, the income over cost of feed increased rapidly, and for each increase of 50 pounds in butterfat there was an increase of $15 in income over cost of feed.

Cows that freshened in the fall produced more milk and butterfat and greater average income over cost of feed than those which freshened in the spring or summer. Large cows excelled small cows of the same breed in production of milk and butterfat and in income over cost of feed. As the butterfat test increased, the average production of butterfat advanced and the average production of milk declined.

These records also indicate that cows remain in the herd an average of about 4.7 years.

BETTER-STOCK CAMPAIGN AID

Poster Issued by Department of Agriculture Illustrates Value of Good Dairy Cows.

"For the Children's Sake" is the title of an attractive poster just issued by the United States Department of Agriculture, to be used in its better-stock campaign. The poster shows two cows, each surrounded by pictures of healthy children. Good milk, it is well known, is a health-giving food for children, but scrub cows do not give enough milk to feed many children. One of the animals shown on the poster is a scrub cow which produced about five quarts of milk a day—enough to supply the five children who are grouped about her. The other cow is a purebred, which gave a daily yield of 20 quarts—enough to feed the 20 children surrounding her.

"A good dairy cow," says the poster, "produces enough to feed about twenty children a quart of milk a day. An ordinary cow produces enough to feed about five children a quart a day. Every quart of milk contains health and a smile for some baby."

CORN ALONE FOR MILK COWS

It Can Be Used to Better Advantage With Such Feeds as Bran, Meal and Legumes.

With well-filled corn cribs on many farms, and relatively low prices now in effect, the United States Department of Agriculture believes it is time to correct the impression that corn is not good feed for milk cows. Of course, corn cannot be fed alone, as its function is to supply heat, energy, and fat, rather than such elements as make up bone, muscle and the casein in milk. But it can be used to advantage along with such feeds as bran, linseed, meal, or cottonseed meal. Bran lightens and helps to balance the ration. Alfalfa or clover is usually fed with corn to supply protein.

COW IS EFFICIENT MACHINE

Animal of Big Value in Converting Farm-Grown Feeds Into High-Priced Products.

The dairy cow, of all farm animals, is our most efficient machine for converting farm-grown feeds into concentrated, high-priced food products, and therefore is entitled to the best of care. She is thin in flesh and naturally more susceptible to cold than most other classes of farm stock. If she is compelled to fortify herself against cold, snow, sleet and rain, she must, of course, convert a greater proportion of her feed into heat with which to keep up body temperature, and as a result she becomes less efficient for milk production.

WOOD FAMINE SURELY AHEAD

Measures That Alone Could Have Prevented Have Been Too Long Delayed, Says Expert.

The cost of wood may fluctuate, but the general direction of the prices for wood products is bound to rise, and the movement will gain tremendous impetus a few years hence. There is going to be a wood famine in this country and little can be done to prevent it. We have procrastinated too long. Much can be done, however, to alleviate and shorten its duration. Forest protection is one of the prophylactics. Out of 822,000,000 acres of virgin forests we have 137,000,000 left. We are cutting this remainder at the rate of 5,500,000 acres yearly. In 25 to 30 years our supply of virgin timber will be exhausted. This hiatus will continue until trees can be grown.

In five years ending 1920 there were 160,000 forest fires in the United States which did damage amounting to more than $85,000,000. Forest fires have caused an annual loss of about 70 human lives, to say nothing of stocks, crops, buildings and improvements.—G. A. Whipple in the Thrift Magazine.

MOTHER! OPEN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the sour bile, and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

Against All Rules.

As every golfer is aware, it is against the rules to remove anything growing on the course.

The other day a player asked: "What should I do on the putting green if a worm lay between my ball and the hole? Am I entitled to lift it or brush it aside?"

"Well," replied his companion, "I think you should brush it aside."

"Yes," he replied, "you may be right, but this was a young and growing worm, you know!"—Houston Post.

SHE DYED A SWEATER, SKIRT AND CHILD'S COAT

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.—advertisement.

Attention.

The family was out of town, and the house was left in charge of a young housemaid. On opening the door the first morning she found the charwoman standing there, obviously angry.

"I've been ringing and ringing here for half an hour," she said. "Why ever didn't you come sooner?"

"Oh! Was that you?" replied the housemaid. "You kept on so regular that I thought it was only the telephone."—London Tit-Bits.

Real Compliment.

Bishop W. S. Anderson during his visit at the Edison-Ford-Firestone camp in Maryland, said apropos a recent society wedding:

"There are women, it is true, who make fools out of men, but I am happy to know that the majority of women make men out of fools."

Weak and Worn?

Has summer left you dull, tired; all worn out? Do you have constant backache, with headaches, dizzy spells, sharp, shooting pains, or annoying kidney irregularities? Influenza and grip epidemics have left thousands with weak kidneys and failing strength. Don't wait until serious kidney trouble develops. Help the weakened kidneys with *Doan's Kidney Pills*. Doan's have helped thousands and should help you. *Ask your neighbor!*

An Iowa Case

Mrs. F. H. Selfe, Rock Rapids, Iowa, says: "My back was stiff and sore and I had a dull ache through my kidneys. Mornings I was tired out. I had dizzy spells when things would whirl before my eyes. Doan's Kidney Pills were recommended to me so I got some and after using three boxes my troubles disappeared."

DISTEMPER AMONG HORSES successfully treated with

Spohn's Distemper Compound

With the approach of winter horses are again more liable to contract contagious disease—DISTEMPER, INFLUENZA, COUGHS and COLDS. As a preventive against these, an occasional dose of "SPOHN'S" is marvelously effective. As a remedy for cases already suffering, "SPOHN'S" is equally effective. Give it as a preventive. Don't wait. 60 cents and $1.20 per bottle at drug stores.

SPOHN MEDICAL COMPANY GOSHEN, INDIANA

WESTERN CANADA Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying

are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches, schools, good markets, railroad facilities, rural telephone, etc.

MILK WITH MUCH CEREMONY

Dairying as a Ritual in Royal Court in District of Uganda, Central Africa.

The remarkable and elaborate ceremonies observed in Bunoro, Uganda, in Central Africa, in milking the sacred cows are described by Rev. John Roscoe in the London Illustrated News. After the sacred cows had been led to the royal abode by a herald, two milkmaids appeared, one bearing a horn of water and a brush with a short handle, the second carrying a milkpot. Each of these women was purified and decorated, having the face, chest and arms whitened with pipeclay. The milkmaid handed the brush to a milkman, who rubbed the cow's udder, and handed the brush back to the maid. He then took his place behind the cow, and held its tail so that it could not whisk dust into the milk during the milking.

The maid now turned to the other man, and poured a little water over his hands, as he squatted by the side of the cow. After washing, the man held his hands together raised, until the other milkmaid placed the milkpot between his knees, when he milked the amount the cow was expected to give. Neither of these men must look at the women, or speak to them, on pain of death. In this manner two cows were milked, and the milk was carried away into the dairy.

Another milkmaid, ceremonially cleansed and whitened, came and knelt before the king, and announced that the milk had arrived. The king then rose, and, as he did so, the guard at the door announced to the court that the king had gone to drink milk. Hereupon men and women knelt down, covered their faces, and refrained from coughing or making any sound, especially from clearing the throat. Such an action was punishable by death. Owing to the stringent rules for milkmen and milkmaids, their office was held for two days only at a time.

Anything in Reason.

Some of the easterners are impressed with the tangelo, which has been in process of development for many years but is only now trickling into the markets in numbers. This is a combination of the tangerine with the grapefruit or pomelo. It has some of the good qualities of both fruits, but naturally shrinks some from the massiveness of the finer specimens of the pomelo. It is a mild-mannered grapefruit that can be eaten out of hand without spraying the scenery or mussing up the face of the devotee. It has been raised in Arizona and southern California and is also a Florida possibility. We strive to please. If deemed desirable we will turn out a lemonrange—one side of which can be used to make a lemon pie and the other an orangeade.—Los Angeles Times.

Reasonable Supposition.

"A hant, or something, is raising thunder at Gabe Hornboggle's house," related a neighbor. was there tuther night, and after we'd set for a spell it commenced. The table was flopped over by unseen hands, three drawers of the bureau slid out by their selves and dumped all the stuff on the floor, a flock of spoons came floating in from the kitchen, a gun in the corner fell down and shot one of the dogs, and all such as that. I never seed such goin's-on in my life!"

"Then you hain't never drunk none of Gabe's bone-dry licker before?" inquired a resident of Mount Pizgy, Ark.—Kansas City Star.

"Uncle Joe's" First Wage.

Joseph G. Cannon, former speaker of the national house of representatives, went to work in 1850 at the age of fourteen years. His first job was clerk in a grocery store, and one of his duties was to deliver parcels as well as wrap them. He worked "from sun to sun," as was the custom in those days, and in the winter he started work before sunup and worked until sundown. His wage was $1.50 a week, out of which he was expected to board and clothe himself.

Wished on Him.

It had been the custom of her family to name the first child after her family. So when Washburn was about six years old one of the neighbors remarked to him, "Washburn is a very funny name for a first name. How did they ever come to call you that?"

Washburn was very quick to reply. "That was my mother's name and when she married pa, she had no more use for it. So they just wished it on me."

Embarrassing Questions.

Now when the mortality rate of grandmothers, etc., is about to reach its peak, one firm, a large employer of boys, and evidently with some feeling for grandmothers, has inaugurated an employment application blank which calls for full and detailed information regarding the health of their relatives.—New York Evening Post.

Not So Dark Now.

"Where has he been?"

"To darkest Africa."

"My! How interesting! He must have seen lions and elephants in the jungles."

"He saw a herd of elephants from the window of a Pullman."—Birmingham Age-Herald.

Not to Be Deceived.

Mr. Newrich (examining curio)—"Two thousand years old? You can't kid me! Why, it's only 1921 now!"—The Passing Show (London).

SPRAYS SAVES IOWA MONEY

Results of One Year's Demonstrations Show Great Saving in Farmers

Twelve orchard spraying demonstrations, carried on by the horticultural extension experts of Iowa State College during the past season increased the value of the fruit to the owners $6,000.66. This gain was the direct result of the work on 666 trees or in the orchards sprayed, a saving of $9.01 for every sprayed tree. Had all the fruit trees of the state been sprayed and a similar saving made, the amount would have run to millions.

The demonstrations orchards were situated in twelve different counties in the state and data were kept in all phases of the work. The cost of spraying varied from 94.4 cents per tree to 34 cents, and with an average cost of 72.2 cents. This included all materials and labor used in the operation.

Sprayed trees yielded better than unsprayed ones and in all cases and the sprayed crop sold for better prices. The average yield for the total number of sprayed trees was 5.54 bushels per tree while the unsprayed trees yielded only 1.37 bushels. Sprayed apples sold easily at $2.00 per bushel while the unsprayed apples brought only $1.00 per bushel.

These experiments were carried on with ordinary farm orchards on trees that were not unusual in any case. The average age of the trees was 21 years and the youngest tree in the orchard was 16 years old. Eleven different varieties of apples were represented.

In spraying, the control of scab and was in many of the cases nearly 100 per cent. In the unsprayed trees 42.3 per cent of the apples were scabby and 64.4 per cent were wormy.

In 11 other orchards sprayed by the extension experts, where 530 trees were treated but upon which figures were not kept, the results were fully as good, showing that spraying increases the value of the farm orchard enough to repay for the operation.

SILAGE BEEF CATTLE FEED

Investigation Shows Iowa Uses it In Fattening Cattle.

Silage, which used to be considered a dairy feed, is being used in fattening beef cattle, according to data gathered by the United States Department of Agriculture. Of 8.290 head of cattle investigated in Ia. it was found that 30 per cent received a large amount of silage in their ration. Indiana and Illinois fed silage to 80 percent of their cattle. This silage was used to supplant roughages.

It was found that 99 percent of the silage made from corn while the other one percent was made up of sorghum, sunflowers and legumes.

Silage does not fatten cattle unless fed in conection with consentrates. It was found that where silage was fed considerable more straw and stover are consumed.

Silage fed cattle receiving grain in tented—these were the returns for but were found to shrink more than strictly dry fed cattle.

LIFTED ABOVE ALL NATIONS

Surely Americans Have Abundant Reasons For Giving Thanks to the Bestower of Our Blessings

The history of Thanksgiving day has been told innumerable times in song and story from the pulpit and platform and in press. From the time of its first celebration 300 years ago men and women and children of this nation have heard the message of the serious purpose of this commemorative day. No less mindfull than were our fathers are we today of the sacredness of its purpose.

True, in days gone by it was a much more simple event. In the early days of its origin, a little settlement here and there rendered thanks to the Deity for the blessings they felt He had bestowed upon them. And they were simple blessings for the most part. Gratitude for the gifts which Nature had named them; rejoicing that in an alien world they were none the less happy and con- one that is altogether without splen- which they gathered in family groups to give thanks.

Nature has not withheld from us this year her customary bounty. Our harvests have been gratifying; we do not in this regard lack cause for rejoicing. Nor indeed is our present state in matters that do not pertain merely to harvests and fields of grain one hat is altogether without splendid prospects for great achievement. By a combination of circumstances we are here today the one nation in the world to whom her sister nations may look for aid and comfort in their hour of need.

As potential world power for America has reasons to be for the privileged position among her sister nations. at least one cause for Thanksgiving.

JUST MATTER OF DEDUCTION

As the Boy Explained It, the Finding of Horse Was Really Quite Simple Matter.

Speaking of the development of the story-telling talent in youth, Richard Bennett, the actor, is fond of relating this incident:

Some years ago a prominent citizen of a town lost a horse. It was not much of a horse. In fact, it was blind in one eye and spavined. But, perhaps as a relic, Bennett says, the prominent citizen wanted the horse. So he advertised, offering $5 reward for its return. The town half-wit, a boy of nineteen, with a harelip, came one afternoon leading the horse, with a strap about the size of a shoestring, to the prominent citizen's door. The horse's owner was pleased.

"Now," said he kindly, scenting a good narrative and perhaps an adventure, "now, my boy, here's your $5; and I'll give you another $5 if you'll tell me just how you found my horse."

"Well, all right," said the boy. "I jus' thought if I was that old horse where I would go, and I did and he was."

He got the extra five.—Kansas City Star.

TIGERS USEFUL IN SUMATRA

Lords of the Jungle Protected for Their Services as Destroyers of Wild Boars.

Tiger hunting is now prohibited in Sumatra. Lest our national pride should be touched, let it be said that this measure has nothing to do with M. Clemenceau—there is no fear of seeing the fauna of the big island destroyed by European ex-premiers on their travels.

No, the truth is more prosaic. Truth is always prosaic.

In Sumatra the tigers are protected because they devour the wild boars, which are great despoilers of the plantations. The tigers are in a way monstrous cats preying on enormous rats.

Here is a domestic and uitilitarian role of which Kipling, poet of the jungle, never dreamed.—From the Paris Figaro.

Newlyweds.

My husband and I having been married just a short time, arrived in New York and went to one of the best-known hotels. My husband registered and we went up to our room. I said, "Oh, John, I hope you didn't register 'and wife.' I hate that. It sounds as if a woman were just an appendage. I meant to tell you to be sure and write 'Mr. and Mrs.'"

The expression on John's face was almost tragic, so I hastened to assure him that it wasn't that serious.

"But it is serious. What do you suppose I've done? I registered 'John Brooks and Mary Allen.'"

Just then there was a loud knock at the door. It was the house detective. Of course everything was explained all right, but it certainly was embarrassing.—Chicago Tribune.

Women Proving More Polite.

It is not an uncommon sight now to see a young girl get up and offer her seat in the subway to an elderly woman, whose entrance has been ignored by the male passengers. Such usually brings some blushing humble man to his feet with a stammering offer of "have my seat," but the climax was reached the other evening in an uptown restaurant when a middle-aged woman took a seat at the same table with one of her own sex, a stranger to her, and on finishing dinner politely inquired:

"Do you mind if I smoke?"—New York Sun.

Get Your House In Shape to Withstand Winter's Cold

Take an inventory of the needed repairs about your home and get the work done now before winter sets in.

Perhaps it is a new roof or a storm porch. Maybe it is only a few boards here and there to patch a broken place.

No matter how trival your needs may be, you will find us ready and glad to advise with you and to deliver your smallest order.

Come and talk with us today.

here will be a nomination of ers on Monday evening, Novem- 28th. Election of officers on ember 5th.

PLEASANT AFFAIR IS GIVEN FOR MINISTER

Rev. and Mrs. Wm. Koerner Are Guests at Social Held in Church

We "swiped" the following bit of interesting news from the Pasadena, California, Star-News, date of Nov. 14th, which is of interest to our many readers of the Times:—

"A very pleasant affair took place in the Immanuel Methodist Church Thursday evening when a pound social was given for Rev. and Mrs. William Koerner, who supplied the pulpit while the pastor. Rev. William Rogatzky, had his vacation.

"Mr. Koerner is a retired minister of the Northwest Conference. Iowa, having been active for fifty years.

"An appropriate program was arranged for the evening and very ably carried out. Rev. Rogatzky paid a fine tribute to Mr. Koerner, whom he had taken into his home for over a month until Mr. and Mrs. Koerner could move into their new home, 855 Chapman avenue.

"A fine luncheon was served in the church parlors and a very pleasant social time was enjoyed.

"Mr. Koerner expressed his favorable impressions of Pasadena, both the glorious climate and the real Christian spirit he has found manifest. He also read an original poem about the present condition of the world.

"As a result of the affair, Mrs. Koerner's pantry and Mr. Koerner's purse are well supplied."

NORTHWOOD TO GET LARGER POSTOFFICE

NORTHWOOD, Nov. 23.—F. J. Goshey, of Mason City, postoffice inspector. for this district, was in Northwood this week and set on foot the preliminary movement leading to securing a building large enough for the growing demands of Northwood. Mr. Goshey posted an invitation for bids by property owners who may file their propositions any time on or before Jan. 31.

The main specifications in the requirements are: 1300 or more square feet of floor space, time of lease five or ten years; rent, light, heat, water, closets, urinals, safe or vault and all furniture and equiptment necessary to carry on the work. Other requiraments are a maximum of day light, building to be near business center and within eighty rods of the railroad station.

The present quarters are too small for the amount of business transacted in the loccal office.

SERVE A HOT LUNCH

Children In Schools Require Warm Food Say Experts.

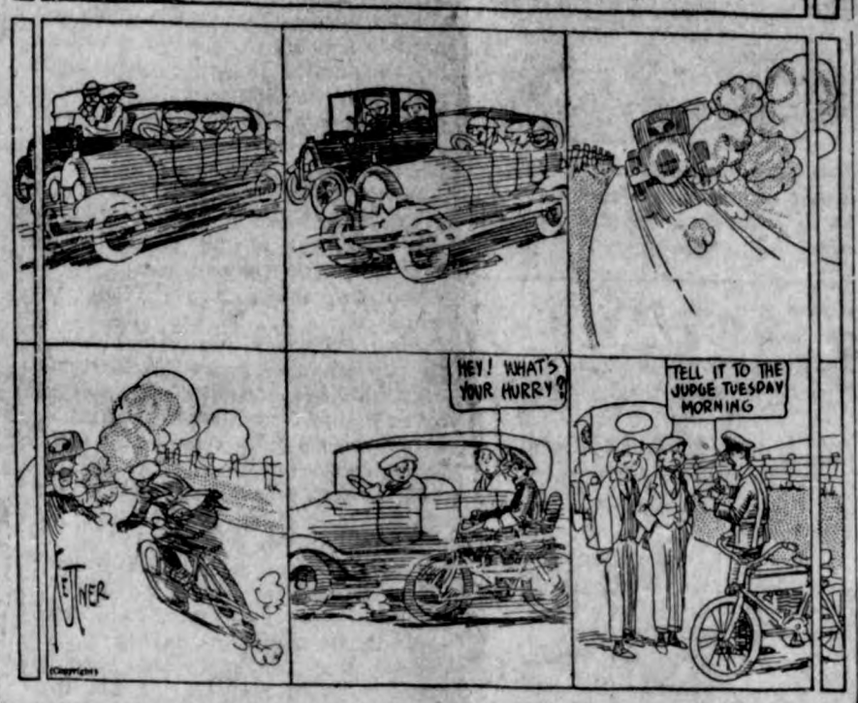
Hot lunches for Iowa schools are helping to bring children up to the standards desired by the health authorities, according to the home economics department extension service of Iowa State College.

Last year 1,096 schools served at least one hot meal per day and this affected 10,212 children. A survey of Iowa school children in which 110.-000 were examined, showed that 20 per cent of the city children and 30 per cent of the country children were under weight. Hot lunches do consider to correct this trouble, say experts.

Many children do not get a warm breakfast, due to rising late and the rest of the family have eaten, so they go to school after a light cold lunch. If they are not provided with a warm lunch the majority will not receive a warm meal until evening and this is detrimental to their health.

Not only is a warm lunch a boon to the childrens health but it provides a means to help the teacher employ idle hands during noon hours. Many successful ventures in the school lunch have been the result of having the students do the work. Supplies are inexpensive if properly divided up and the home economics department will furnish information and pamphlets that will assist in preparing a suitable weekly menu.

The End of a Perfect Day



News Of The Week Reported By The Klemme Schools

KLEMME SCHOOL NEWS

(By F. Schlicting and A. E. Lauritzen.)

Bertha Johnson was absent several days last week.

The Sophomores had their meeting on Tuesday. They have a meeting every six weeks.

No school will be held Thursday and Friday. on account of Thanksgiving. This vacation is greatly preciated by the student body.

The girls have not yet schedulel any basket ball games. We hope they will get up nerve enough to tackle a few of the neighboring towns.

The Medieval Modern History Class wrote some excellent compositions on Martin Luther, the famous German religious reformer.

Don't forget that the first number of the lecture course will be held on Friday evening. November, 25, at the Idle Hour theater. Remember the date.

The advanced civice class has nearly completed the study of the Constitution of United States. The remainder of the semester will be spent in studying the Constitution of Iowa.

A few of the boys in high school have been hard at work the past week making necesary fixtures and installing them in the garage for basket ball playing. Things are about compieted and practicing will soon begin. The garage makes a very good place to play and it is fireatly appreciated that we may use the building for playing.

A meeting was held by the boys of the high school, with Prof. Wilson as chairman, on Friday November 18 This meetin gwas called for the purpose of discussing different questions in regard to a boys basket ball team. It was decided that if a high school boy had played eight quarters of basket ball he was considered a voting member of the team A preliminary tryout will be held sometime in the near future and thereby a team can be picked and also necessary substitutes. At this meeting Sam Harvey was elected coach and he will take charge of his duties at once. Sam is an old hand at the game and he promises to make an excellent coach. Hopes are that things will get squared around and games may be scheduled with neighboring towns. "Let's put K. H. S. to the front in basket ball."

The public officials who claim their salaries should be increased are making a tremendous effort to hang on these same offices.

RABBIT HUNTERS FIND MAIL SACK IN CORNFIELD

BRITT, Nov, 23.—While hunting rabbits on the E. H. Arnett farm southwest of Britt (known as Heimendinger farm) Frank Lau and Charley O'Rourk stumbled ono a mail pouch, they brought it to the postoffice, Postmaster Lee went back with the boys and instituted a search for the other one that disappeared on Saturday, Nov. 5. It was found in a depdession covered with corn stalks and snow and was about six feet from where the hunters had picket up the other sack.

The leather straps had been cut, but much of the mail was undisturbed. Several bunches of letters had not been united and but few letters had been opened. Some small acknages showed signs of having been rifled. The postmaster marked the letters "Found Rifled and Robbed" and dispatched it to Washington Many people got letters that were in the stolen pouch.

It looks like the work of amateurs, for the reason that so few letters had been opened. The Britt pouch was tied up with string, but the transfer pouch was left open.

It might be the thief or thieves were frightened away before they had completed the task of rifling the sacks.

TOOTH OF ANCIENT MAMMAL UNEARTHED

WAUKON, Nov. 23.—While hunting up in the northwest ocrner of Allamakee county, T. B. Schwartzhoff of Dorchester found a mammoth tooth measuring eight and one half inches wide and over eight inches from the broken points of the roots to the crown. Theh tooth, which is in a fine state of preservation, is believed to have belonged to some ancient animal of prehistoric times.

A few years ago the thigh bones of a mastoden was unearthed, and as this find was in the same county, it is thought that it is another portion of the same animal.

AASGAARD EDITS PAPER AT NEVADA

FOREST CITY,—Luther I Aasguaard former owner and editor of the Forest City Republican has become editor of the Representative at Nevada, Iowa.

The Representative is one of the oldest newspapers in that section of the state. The paper was owned for many, many years by W. O. Payne, who relinquished his ownership 3 years ago to a stock company at which time he went to Des Moines and started the Forum, but later returned to Nevada.

Gridley, Cal.
Nov. 13-11, 1921

Friend Jergey:-

I will again take pleasure and send you a few lines as to let yo know that we are all still alive and feeling fine. We are at present about 500 miles north west of Los Angeles. The farthest town we hit is Bute City and from there we are going back to Los Angeles. We came out to this country to hunt. They told us the Duck's and Geese were out here by the millions. And Jergey. in fact I have never seen in my life so many Geese as I have seen here the last 2 days. I was out yesterday and downed 2 dandy big geese and 2 big mallards, and I went again this morning and got 2 more dady geese and no ducks this time. And say, talk about feasts. we sure had them. We had two geese for dinner, and tey made a real feed. We camped close to a big river after I came home from hunting. I would go fishing and as usual in about three hours I had all I could carry home. So you see if it wasn't geese or ducks, it was fish.

Now we are on our way back to Santa Monica, Cal. This city is along the beach and about 15 miles west of Los Angeles. This sure is a fine place. Chas. and Mrs. don't like Los Angeles, but I sure like it there. The weather out here is certainly great dope. It is almost too hoto during day time. but at night it gets pretty cool. The cool nights makes nice sleeping in our car. That way we never need to pitch tents like the other tourists do, but when we stop its home. The car is in good shape yet and so is the house. It has been scratched a few times but the top does not yet leak, but there is always sunshine out here. It has only rained one day since we have been in California. They claim it will soo begin to rain out here. We seen some more orange groves and certainly lots of grapes. The grapes are all harvested, but the oranges are just getting ripe now and some won't be ripe until Feb. We bought 50c worth one place and got 58 oranges. What do you think of that! Grapes are $1.00 per crate. Chas sure likes grapes.

Well Jergie, how are al the Klemme people coming at present. We hope everyone is happy and contented. Well Jergy I will send you a few lines in about 2 weeks, or when I get back to Los Angeles.

Best wishes from us to all Klemme and vicinity. "Hello" to everybody.

Kuck-Stiehl and family

Mr. Hughes fired the first gun, and the charge was so heavy it shook the priming out of all the others.

GENERAL FOCH WILL BE AT MASON CITY FRIDAY

Gen. Ferdinand Foch, the greatest general in world history, will be in Mason City Friday afternoon.

Theh date is Friday, November 25, and the time is 2:30 p. m.

His itinerary according to the printed schedule, is over the Chicago Great Western road from Chicago.

He leaves Chicago at 4 a. m. and Mason Citp is the only city en route at which he is scheduled to stop.

He pays this unusual compliment out of his respect, admiration and affection for Col. Hanford MacNider, overseas soldier and National Commander of the American Legion, whose home is in Mason City.

He will, it is thought, stop for 35 minutes and will make a short address in French to be interpreted by some strong lunged speaker.

It is the opportunity of a lifetime and the only opportunity of people living in Klemme and vicinity to see this great general in history.

The American Legion will have charge of the arrangements for the reception and will be assisted by city officials and civic societies.

But—

It is definite that—barring unavoidable delay—General Foch will arrive on schedule time and be in Mason City, Friday, Nov. 25, at 2:30 p. m.

TATE OF WAR WITH GERMANY ENDED IN JULY, NOTE STATES

WASHINGTON,—The state of war between the United States and Germany terminated in fact July 2. 1921 when the joint peace resolution of Congress was approved by President Harding, according to the proclamation of peace issued by the Chief Executive. Similar proclamations will be isued in connection with Austria and Hungary when their purposes, it is held, will be achieved, through putting an end to certain war laws unaffected by the congressional resolution of appeal approved st March 3.

ND INDIAN RELICS IN DUBUGUE FIELD

DUBUQUE, Nov. 22—While digging in a cornfield south of Dubuque in Mosalem township, William Leute and Arthur Vandermillen found the skeletons of five bodies and numerous Indian implements which have led the discoverers to believe that this is the site of an ancient burying ground.

The two young men were digging out a wild animal which had entered its burrow after dogs had holed the animal.

A large black obsidan ceremonial pipe found in the graves is the rarest piece of Indian work believed to have been discovered in the state of Iowa. It is hewn from porolored rock and exquisitely figured.

NDERSON SELLS GARAGE HERE

Tweedt & Mitchell New Owners

O. B. Anderson has sold his interests in the Klemme Auto Company to Olof Tweedt and Lee Mitchell, both of Dolliver, Iowa.

The new owners are now in possession of the business. Mr. Mitchell has charge of the mechanical part of the business and comes recomended as being a first class auto mechanic. Mr. Tweedt has been engaged in farming and real estate business and also has business connections at Dolliver. He is a married man with a family and expects to move to Klemme. Mr. Mitchell is a single man, but we will not hold that against him as he appears to be a fine fellow.

We welcome the new firm to our city and wish them success.

Million Wed in America in 1921

New High Mark Is Indicated in Reports Received by Government Bureaus.

SAME IN OTHER COUNTRIES

Single Men Are Scarce in England and France — Matrimonial Rush Throughout World Puzzles Experts.

Washington.—More than 1,000,000 marriages will be the record of 1921 in the United States, establishing a new high mark, according to indications in reports received by government bureaus. The number may go as high as 1,500,000 by December 31.

Matrimonial records have been broken in all civilized countries in the last few months, even taking into consideration the war period, when young men and women rushed to the altar in numbers never known before.

The rush throughout the world is puzzling officials, statesmen and social workers. Because of world-wide business depression and high prices the marriage rates should descend, it is assumed.

400,000 Weddings in England.

In England 400,000 couples entered the wedded state last year, according to latest and reliable reports, an increase of almost 100,000 over the previous year. In France and Italy also new records are being set up. Only in Germany is marriage increasing at a rate that is not regarded as astonishing.

At the same time the number of applications for divorce also is showing a big increase in most countries compared with the prewar period. This is attributed to the inability of war marriages to survive. Although no new reports on divorce in the United States are yet available, it is known the number of separations is much larger than before the war.

In Germany divorce is frowned on and the government is considering measures to encourage marriage. A world-wide shortage of marriageable men is assigned as the cause of the increase in the marriage rate in England and some other countries, although this cause would be without foundation in the United States.

Single Men Are Scarce.

Single men under thirty are comparatively scarce in England and also in France as a result of the heavy mortality during the war, official records show. At the same time the number of females under thirty is vastly larger in proportion to the population than at any other time.

Young British women are proceeding on the theory that "one had best get her boy now" while boys may be had.

The larger number of marriageable women than men is the explanation given for the daring modes in dress of the present, according to writers in some French and British newspapers.

In the United States the increase in the marriage rate is being applauded by tradesmen, modistes and others, who are experiencing better business as a result.

Real estate salesmen and building contractors reckon that 1,000,000 additional homes or other accommodations will be required this year as a result of the record number of marriages.

SHORTEST OF ITS KIND

The shortest double-track railroad in the world is in Dubuque, Iowa. It is a cable road two city blocks in length.

200,000 Will Get Work on Roads

Federal and State Governments Have $150,000,000 for Highway Building.

RECORD IMPETUS IS EXPECTED

Campaigns on to Stir Public Officials to Necessity of Undertaking Road Work Now and in Spring.

Washington, D. C.—More than $150,000,000 will be expended during the next few months for road construction and repairs on more than 7,000 miles of highways as a result of joint contributions by state and federal governments, according to officials of the federal public roads bureau.

With a nationwide surplus of labor and falling prices for materials, road building will take on a new and record impetus, officials say. Contractors are at work in virtually every state preparing bids for work projected.

More than 200,000 workers can be given jobs during the next 12 months in highway construction. Labor constitutes about 50 per cent of the cost of road building, exclusive of materials.

Campaigns to stir public officials to the necessity of undertaking road work now and next spring are being staged in many localities by chambers of commerce, automobile associations, farmers organizations and civic groups. Highway construction undertaken now is in line, it is pointed out, with the recommendations of the national conference on unemployment, which urged the building of as many miles now as possible to afford work for the jobless.

The permanent commission on economic readjustment left in Washington to carry out the recommendations of the national conference is keeping in touch with the road campaigns in many sections.

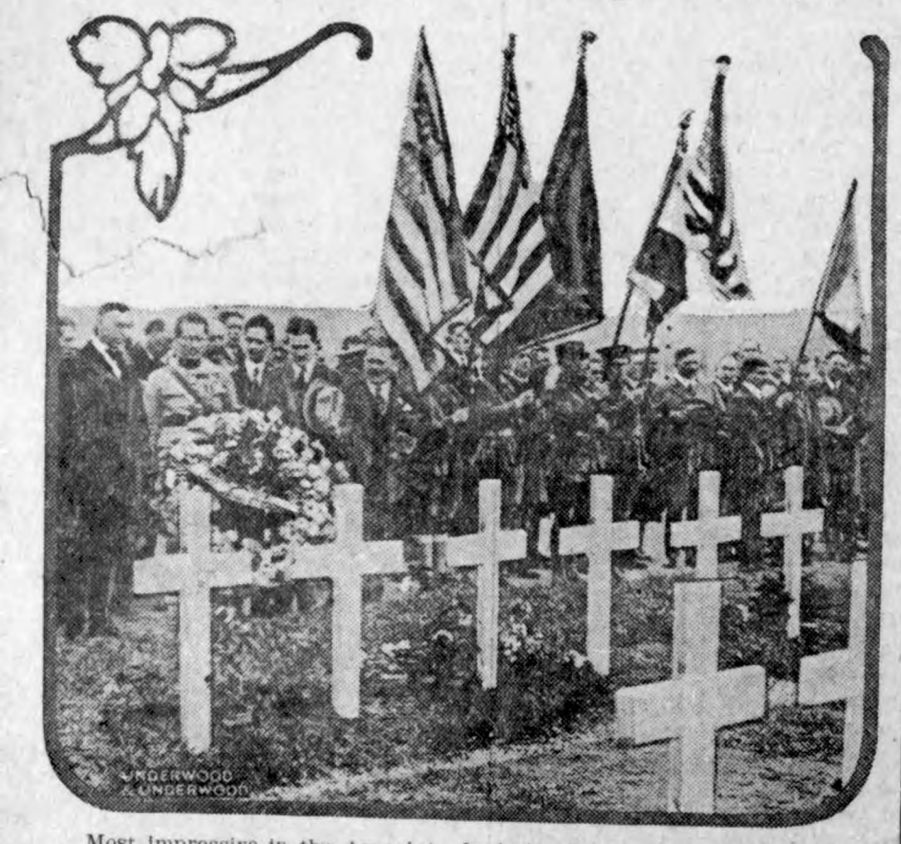
Congress has measures before it calling for contributions of $75,000,000 to states for road work, to be available where state and local governments appropriate like sums. As a matter of practice the money now supplied by the federal government constitutes only 42 per cent of the total spent, although it is popularly believed that the states match the federal government dollar for dollar.

Road building costs now are cheaper than at any time since 1914, and about 20 per cent below the maximum figures of 1920. The average cost of highway construction in the United States last year was $21,000 a mile. For some kinds of road the cost was $40,000.

More than 27,000 miles of new highway have been constructed in the last three years under the federal appropriation of $266,000,000, made in 1916.

Approximately $100,000,000 worth of road contracts were let this year, providing for construction of nearly 5,000 miles. Approximately $68,000,000 of the federal fund is still available for the new work.

Legion Pilgrims at Feigl's Grave



Most impressive in the American Legion's pilgrimage to France and Belgium was the visit to the American cemetery at Thiercourt, France, where Major Emery, commander of the Legion, assisted by Marshal Foch of France, placed a wreath on the grave of Lieut. Jeff Feigl, the first American artillery officer to be killed in France, while the standards of the two republics were dropped in his memory.

BELGIANS DIG UP GERMAN DUD

Two-Ton Shell Is Removed After It Sinks Fifty Feet Into Ground.

Brussels.—In the last year of the war a formidable shell dropped from a height of 6,000 feet on the village of Havay, between Mons and Maubeuge. It did not explode, but it made a huge hole in the earth about fifty feet deep, where it had remained.

This shell weighs two tons, and the charge of explosive is estimated to weigh from 16 cwt. to a ton.

The Belgian authorities succeeded in pulling out the shell, after making a large excavation about it, a dangerous undertaking.

Twenty in One Shot.

Minot, N. D.—Attorney E. R. Sinkler tells what he insists is a true story of hunter's luck. Accompanied by Mrs. Sinkler, he saw a large flight of ducks alight in a field. They got to within six rods of the flocks when the ducks rose. Both opened fire, and when the smoke cleared away the hunters found 20 large mallards upon the field.

WILL TRY TO RAISE DEER AND ELK

Syndicate Proposes to Establish Game Farm on Island.

Deer Said to Be Easily Domesticated and in Woodlands Would Thrive and Multiply—Elk More Hardy Than Deer.

Seattle, Wash.—Plans are being made by a syndicate of capitalists here to attempt the domestication of deer and elk on a logged-off island in Puget Sound. There are several thousand acres of wild land thereon, covered with brush and young growth of timber, affording ideal cover for these animals. If made into a deer range this land could produce enough venison to supply a large city with meat several months each year.

The shore land is to be fenced seven feet high, by heavy netting attached to trees. This will prevent escape of the deer and elk by swimming. The fencing will cost $200 per mile, and elk at $65 per head and deer at $35 each will be established there. The range is half mountain and half vale, with abundance of grass winter and summer. Fresh water streams and a tiny lake are on the island.

It is said deer are easily tamed, and in woodlands will thrive and multiply. In five years one doe will produce 25 deer. They eat all kinds of vegetation, nuts, lily-pads, fallen leaves, lichens and moss. If pasture is scarce they will eat coarse hay and straw.

Elk are more hardy than deer and breed as regular as cattle. They live and fatten on otherwise useless land, but in winter must have some roughage. The average weight of a dressed bull elk is between 700 and 1,000 pounds, or more than the average steer.

The deer and elk farmers will be subjected to the game laws of the state, and can only kill the domesticated animals during the open season and cannot market their product. If, however, the deer and elk farming should become statewide, a revision of the laws would likely be made.

Owl Killed as He Holds Up "Rattler"

Riverside, Cal.—Owls may be wise birds, but one member of the family failed to use his brains. Santa Fe train No. 54 was jogging along peacefully when the engineer was startled by a crash and extinguishing of the engine's headlight. Investigation revealed that a handsome owl of the monkey-faced variety had swooped down on the light, with one casualty in the owl family.

The train limped into Riverside by the light of an oil lantern.

PAY TRIBUTE TO UNKNOWN HERO

Gold Star Mothers, High Government Officials and Others Honor U. S. Dead.

WHOLE WORLD PAYS HOMAGE

President Harding Places Wreath on Oaken Casket—Thousands View Bier in Rotunda of the National Capitol.

Washington, Nov. 12.—Moving reverently through the shadowed rotunda of the national capitol, gray-haired gold star mothers and high officials of the government, battle-scarred war veterans and envoys of world power paid homage and tribute at the bier of America's nameless hero.

Only the wreath placed there by the President of the United States rested on the simple oaken casket when the sun rose over the great white dome of the capitol. At six o'clock the solemn processional began. In the afternoon scores of floral tributes had been deposited at the bier by religious, fraternal and military organizations and by representatives of foreign governments.

A wreath from King George was among them, Lord Cavan acting for the king. It bore the legend:

"As unknown, and yet well known;
"As dying, and behold, we live."

There was a wreath, too, from Canada, its inscription saying:

"But that which put the glory of grace into all tha he did was that he did of pure love to his country."

That from Premier Lloyd George said:

"Nameless, yet his name liveth evermore."

And that from India said:

"They never die who die to make life worth living."

Thousands who were not allowed to pause at the catafalque filed through the rotunda offering silent prayer. The tears of the nation's profound sorrow glistened unashamed in many eyes as citizens of high and low estate mingled in the endless human stream.

The unknown is guarded by a detachment of army engineers, who have kept their vigil under the great dome since the body arrived from France.

The first delegation to arrive at the capitol represented the Federal Council of Churches. It comprised a number of leading ministers, who, after a few minutes at the casket, gave way to members of the American Ambulance association. Wreaths were then deposited by officials of the Rotary clubs, and behind the Rotarians came members of the National Women's Overseas Service league.

Prayer was offered by Bishop William F. McDowell of the Methodist Episcopal church and there was a brief address by Dr. William Adams Brown of the Union Theological seminary of New York.

"In the spirit of unity and faith," Doctor Brown said, "grateful to God for past guidance and protection, we bring to this historic spot our tribute of affection and pride. Center and shrine of our national life, this place is consecrated anew by the valor and devotion of our beloved dead, whom this unknown soldier represents."

The United Spanish war veterans, men who served with Roosevelt and Dewey, marched by, their heads bowed. They were followed by officers and men who served with Pershing—members of the Forty-second, Twenty-eighth and Eighty-second divisions of the American Expeditionary force.

The veterans were called to attention by their national commander, Col. Robert G. Woodside of Pittsburgh, who pinned upon the cushion of the casket a gold medal and the insignia of the order, and conferred upon the unknown the rank of honorary aide de camp.

SEARCH FOR WAR DEAD ENDS

Some Battlefields in Europe Gone Over Twenty Times, Commons Told.

London, Nov. 12.—All the battlefields in France and Flanders have been systematically searched at least six times for bodies of soldiers killed in the war, Sir L. Worthington-Evans, secretary of state for war, told the house of commons. In the areas where the fighting was hottest the search had been made fully twenty times. The army council had decided to cease work and withdraw the exhumation troops, the secretary said. It was certain, he added, that bodies would be found in the course of reconstruction and drainage, and this process might continue for years.

500 Massacred by Kurds.

London, Nov. 12.—Five hundred native gendarmes and officers were massacred by Kurds, following occupation of the town of Eujbulak, according to a dispatch from Allahabad, British India.

Find 365 N. Y. Teachers Wed.

New York, Nov. 12.—The board of education learned that 365 school teachers had taken husbands during the summer vacation, the secret being revealed when notices of changes were filed.

MISGIVINGS

Young Turkey Gobbler, with highly arched head,
Looked at his mates gathered 'round;
"Tomorrow's Thanksgiving," he earnestly said,
"And not one of us must be found;
For I heard the farmer tell his wife
That he would only kill three—
And all the while he sharpened his knife
He kept his eye on me."

—LESBIA BRYANT

"THEY DARED ALL"

Pilgrims Never Daunted by the Perils of the Sea.

Buoyed Up by Faith, Their Difficulties and Dangers Were Met But to Be Overcome.

"These troubles being blowne over, and now all being compacte togeather in one shipe, they put to sea againe with a prosperous winde, which continued diverce days togeather, which was some incouragmente unto them." So does William Bradford, in his history "of Plimouth Plantation," record the final setting out of the Mayflower from Plymouth on September 16, 300 years ago. It is with this passage that he opens his ninth chapter, that wherein he deals "of their vioage, & how they passed the sea, and of their safe arrivall at Cape Codd." In many ways it is one of the most interesting chapters in one of the most interesting books in the language. For although details are few, and the narrative, as ever, is calm and matter-of-fact, it presents just those essentials which enable each one to fashion for himself a satisfying picture of his own.

The first impression to be gained from the record is, perhaps, one of the great labor and great slowness of this passage of the sea. At first there was the fair wind and a clear sky, and if there was some sadness as the coast of Devon was finally lost to sight in the September mist, there was much thankfulness, too, and joyful looking forward, and, as Bradford puts it, "some incouragmente." The high seas in 1620 were, however, not hospitable to the little Mayflower. Three hundred years ago she was still plowing her way westward, with the long-looked-for land still hundreds of miles ahead. Nevertheless, the worst of her troubles were over, for it was about mid-Atlantic that, with the fair winds and weather of her setting out almost forgotten in the storms that had followed, the Mayflower came so near to turning back once more toward England. For days she had been tossed about and buffeted with cross winds and "many fierce stormes." Her upper works were leaking, and one of the main beams amidships was "bowed & craked." The whole ship, indeed, "was shroudly shaken," and there was some fear that she would never be able to perform her voyage.

A serious consultation was, therefore, held between the pilgrims and the master and his crew, and some were for returning rather than cast themselves into "inevitable perill." But, in the end, when the master declared he was sure of his ship below her bearings, and the ship's carpenter declared that he could make her sound above, the seamen, faced with the fact that it was as far back to England as it was to America, consented to go forward. And so, with the help of "a great iron scrue" which one of the pilgrims had brought with him from Leyden, the beam amidships was crowded back into its place, the decks were recalked, and then, taking care to carry no great press of sail, the Mayflower, once more, addressed herself to the storm. For the storms still continued, and often the little boat had to lie to for days together, unable to "beare a knote of saile." But, at last, it was over, and on the morning of November 20th, more than two months after leaving Plymouth, there came, at daybreak, the welcome call of "Land ho!" Or, as Bradford puts it, "after longe beating at sea they fell with that land which is called Cape Cod; the which being made & certainly knowne to be it, they were not a little joyfull."

LIFTED ABOVE ALL NATIONS

Surely Americans Have Abundant Reasons for Giving Thanks to the Bestower of Our Blessings.

The history of Thanksgiving day has been told innumerable times in song and story, from pulpit and platform and in the press. From the time of its first celebration 300 years ago men and women and children of this nation have heard the message of the serious purpose of this commemorative day. No less mindful than were our fathers are we today of the sacredness of its purpose.

True, in days gone by it was a much more simple event. In the early days of its origin, a little settlement here and another there rendered thanks to the Deity for the blessings they felt He had bestowed upon them. And they were simple blessings for the most part. Gratitude for the gifts which Nature had handed them; rejoicing that in an alien world they were none the less happy and contented—these were the returns for which they gathered in family groups to give thanks.

Nature has not withheld from us this year her customary bounty. Our harvests have been gratifying; we do not in this regard lack cause for rejoicing. Nor indeed is our present state in matters that do not pertain merely to harvests and fields of grain, one that is altogether without splendid prospects for great achievement. By a combination of circumstances we are today the one nation in the world to whom her sister nations may look for aid and comfort in their hour of need.

As potential world power for good America has reason to be grateful for the privileged position it holds among her sister nations. That is at least one cause for national thanksgiving.

GIVE THANKS FOR ALL

Thanksgiving, Lord, Thanksgiving!
For the blessings of our days;
For the joy that sings through homely things
In the common trodden ways.
For life and love and plenty,
For laughter and for tears;
For Thy wise plan of good to man,
Thanksgiving through the years!

Thanksgiving, Lord, Thanksgiving!
For thy bounty unto us;
For the gracious yields of ripened fields
That are so marvelous.
For the summer's golden promise
That the fruitful autumn bore,
Thy people raise the voice of praise—
Thanksgiving evermore!

Thanksgiving, Lord, Thanksgiving!
For all Thy ships at sea
That bear afar the brave that are
In service unto Thee.
Thanksgiving, Lord, Thanksgiving!
For Thy hosts in ev'ry clime
And ev'ry land, where'er they stand,
Thanksgiving through all time!

—ESTHER CLARK HILL.

Thanksgiving Lore.

To entirely prepare a Thanksgiving dinner is a sign that you will have a house of your own before another Thanksgiving.

No Getting Away.

PLAN TO PLANT MORE CLOVER

Now is Time To Get Ready for a Good Seeding Next Spring Say The Crop Experts . . . . .

Plan to sow a good acreage of clover next spring, is the advice of the farm crop experts at Iowa State College who point to the cheapness of the grain crops and the value to the farm of getting fertility thru legumes when other crops do not bring a large return.

Altho most of the Iowa farmers realize the value of clover in rotation to maintaining soil fertility there has been a smaller acreage in the state during recent years than ten years ago the high price of clover seed tumbled with a crash last spring and so the cheif reason for not seeding down is eliminated. However it is true nearly half of the clover seedings in the state are lost each year. Most of these losses occur because of poor soil conditions, especially a lack of moisture.

Medium red clover, alsike and biennial sweet clover are the common legumes sown on Iowa farms. Red clover and timothy are often seeded together at the rate of six pounds of clover and seven of timothy. Alsike will do better than medium clover on more acid and poor drained soils. However, it does not have the value of red clover on better adapted soils and it should be sown in gras mixtures. not alone.

Sweet clover is becoming more popular in Iowa every year because of its splendid growth and the ease in obtainng a stand as compared to red clover. Huban clover will receive a thorough trial on many farms this year. Seed is more reasonable in price and many farmers have planned a small acreage. Hubam when broadcasted should be sown at the rate of 15 to 20 pounds an acre.

—HOUSEHOLD SUPPLIES—

FOR SALE—Second Hand Hard Coal Heaters, in good shape, several sizes, at Jacobs & Son. N3tf

PUBLIC AUCTION

As I am going to quit farming and move to Klemme, I will hold a public sale at my farm 2 miles east of Klemme and will sell the following property, on—

Thursday, December 1

SALE STARTS PROMPTLY AT 10:00 O'CLOCK A. M. BIG FREE HOT LUNCH AT NOON.

97 HEAD OF LIVE STOCK 97

7 HEAD OF HORSES 7

1 Black Gelding, fours year old, weight 1450.

1 Black Mare, six years old, weight 1450.

1 Black Gelding, seven years old, weight 1400.

1 Span of Sorrel Geldings, three years old, wt. 2000.

1 Black Mare, five years old, weight 1400.

1 Black Mare seven years old, weight 1400.

51 HEAD OF CATTLE

14 head of Milch Cows, some giving good flow of milk, and others fresh soon.
6 head of 2 year old heifers, all safe in calf.
8 head of three year old steers.
6 yearling heifers.
6 head of yearling steers.
11 head of spring calves.

THESE CATTLE ALL HIGH GRADE SHORTHORN AND ARE EXCEPTIONALLY GOOD.

39 HEAD OF HOGS 39

3 head of brood sows.
36 head of summer pigs, weighing from 75 to 150 lbs.

FARM MACHINERY

2 wagons with triple box good as new.
1 top buggy.
1 Deering binder, 8-foot cut.
1 McCormick mower, 6-foot cut.
1 manure spreader.
2 8-foot discs.
1 Hayes corn planter, with 140 rods of wire.
1 side delivery rake.
1 Deere hay loader.
1 11-foot seeder.
1 walking plow.
1 Moline gang plow.
1 Deere gang plow.
1 Emerson sulky plow.
2 20 foot drags.
3 corn cultivators.
1 corn chopper.
1 fanning mill.
1 2-horse hay rake.
1 gas engine, 2 1-4 horse power.
1 hand sheller.
1 hay derick with cable complete
1 set hay slings.
1 Deering Corn Husker, good as new.
1 DeLaval cream separator.
1 power washing machine.
1 50-gallon oil tank.
3 9-foot chicken coops.
And many other articles.

50 TONS OF GOOD TAME HAY IN THE BARN

THIS MACHINERY HAS ALL BEEN SHEDDED AND IS IN FIRST CLASS CONDITION.

TERMS—All sums of $10.00, or under, cash. Over that amount 10 month's time will be given on bankable notes bearing 8 per cent interest. No property to be removed until settled for.

WHAT RAINDROPS MEAN TO FARMER

Crop Reports Indicate Difference Few Showers Make in Humanity's Scheme of Things.

BIG PART PLAYED BY NATURE

Takes About 2,260 Tons of Water to the Acre to Grow a Food Crop—Process of Evaporation Yields Chemicals Valuable as Fertilizer.

Washington, D. C.—"Rain might be looked upon as the oil which lubricates the world's economic machinery," says a bulletin issued from the Washington, D. C., headquarters of the National Geographic society in connection with recent reports of world-wide drought damage to crops.

"With the smallest estimated cotton crop since 1893," continues the bulletin, "with spring wheat in poor condition at home as well as in many of the other wheat countries of the world, with other important crops below their average, and with drought cast as the villain, or at least as an accomplice, in each case, the difference that a few showers make in humanity's scheme of things is strongly emphasized.

Depends on Rainfall.

"While everybody realizes in a general way that the world depends on rainfall and fertility for food, there are very few, perhaps, who even approximately appreciate how comparatively little the farmer actually does in the great process of crop-growing. To plow millions of acres furrow by furrow, to spend millions of dollars on fertilizers, and to reap and gather and thresh, is no mean task. And yet compared with the part that nature plays in the process, man's work seems a very slight labor. For instance, it takes about 20 inches of rainfall to grow a food crop under our general farming methods, which means about 2,260 tons of water to the acre. That seems a preposterous figure, but the doubter can easily demonstrate its correctness. Suppose the American farmer had to haul the water his ground must have to give him a good crop, and that the distance and freight rate were the same as the average railroad haul and rate in the United States. On that basis it would cost him more than $4,000 an acre to water his place.

"But not only would his water bill be nearly half a million dollars on a 100-acre farm, but his fertilizer bill also, would amount to a neat little sum. It is estimated that in the process of normal evaporation, soil water presents the rootlets of its neighborhood with about fourteen pounds of ammonia a year to the acre. Also, it gives them some 57 pounds of potash. With sulphate of ammonia costing only 2 cents a pound (it cost 5½ during the war) and a hundred pounds of the sulphate required to contribute 17 pounds of ammonia, it will be seen that the process of evaporation gives the rootlets $1.65 worth of ammonia to the acre.

Automatic Fertilization.

"When the World war cut off German supplies of potash and it soared to $400 a ton, geologists scoured the United States for the priceless fertilizer with little success. Yet the process of evaporation generously hands out more than half a hundredweight to the acre, in war and peace. This automatic fertilization is worth an additional $2.50 an acre to the farmer at present prices, and would have cost him $10 an acre at war prices.

"From this it will be seen that the $12 to $25 an acre that it costs the average farmer to grow wheat is a small figure indeed, compared to what he saves by having nature as his water wagon and fertilizer source."

EASTERN DIPLOMACY A JOKE

Envoy Is Well Paid for Job That Doesn't Exist, According to Prince Furstenberg.

Constantinople.—One of the stories which men tell one another here to illustrate the confused diplomatic situation in central Europe is attributed to Prince Furstenberg. He was appointed as a diplomatic representative of the old Austrian government to the Ukraine, which then was ruled by Hetman Skorpadsky.

Describing his diplomatic status to friends in Kiev, the prince said: "I am the representative of a government that has ceased to exist and am accredited to one that never existed. The most extraordinary part of it is that I am paid for performing the duties of this position that I do not hold."

Left Husband 150 Times in 14 Years' Wedded Life

Helen Caldwell of Detroit, Mich., left her husband, John, 150 times during their married life from 1907 to 1921, John told Judge Harry J. Dingeman. He asserted his wife was fond of dancing; that, on coming home from work at midnight, he would find her little boy sitting on the front steps waiting for him and that his wife would come in later, saying she had been to a dance. He was given a decree.

RUSS PRINCES ASK U. S. BRIDES

Refugee Noblemen in Turkey Are Perfectly Willing to Marry for Money.

HOPE TO GET BACK ESTATES

Many Refugee Russian Women Have Married Turks in Order to Get Temporary Homes—Still Retain Their Politeness and Courtesy.

Constantinople.—The arranging of marriages between Russian princes and well-to-do American women is the latest scheme advanced here by an ingenious Russian to get a livelihood for workless, penniless refugees living on American and other charity.

It is argued that the American woman would, in addition to the title, make a good business bargain, since the exiled Russian noblemen all have large estates which they hope to recover when private property is restored and Bolshevik Russia is no more.

Many Russians have open minds on the marriage question. Many of the refugee Russian women have marrried Turks since their arrival here, in order to get temporary homes. The Russian men have followed suit. Many of the older ones have married Greek women.

And Age Has Its Weddings.

"Youth has its follies, age its stupidities," said a Russian general, no longer young, when inviting a friend to his wedding.

The difficulty of locating these American wives across the seas is not one to stump the imaginative Russian mind, which readily adapts itself to the lighter branches of commerce, and has succeeded here with cafes, beauty parlors, manicure and tea shops, concert halls and public grounds.

The first and only bathing pavilion near here has been established at Floria beach, on the Marmora sea, by a group of Georgian princesses, through the loan of American Red Cross tents.

Men Are Out of Luck.

The condition of Russian men refugees here is bad, as there are few industries or factories to provide work. Recently the French government cut off its food rations to several thousand men, though still feeding a certain number of children, women and old men.

It is hard for them to get passports to go to other countries. Serbia has accepted some 20,000, but her leniency to refugees is finding its limit.

Prince Golitzy, who formerly held immense estates near Kiev, and may recover them, among hundreds of others, is attempting to earn a living by utilizing his knowledge of precious stones of which he once had a large collection.

Such men often lose their clothing and baggage to rapacious landlords who serve them in default of the payment of room rent, but the Russian aristocrats never lose their politeness and courtesy in adversity.

They still kiss the hands of the women, after the manner of their country. Often cheerful and courageous in the face of poverty, they share their last money with friends.

HANGMAN OBJECTS TO SLURS

Declares He Is a Perfect Gentleman and That His Calling Is Honorable and Useful.

Budapest.—The hangman of Hungary has risen to indignant defense of his calling and denounced those who cast slurs upon it. He was prompted by sneering references made in the Hungarian national assembly. Friends of former Emperor Charles and the anti-Hapsburgs are always quarreling there, and in some cases have shouted at one another, "The hangman is your friend."

Michael Ball, the official hangman, has resented such slurs.

"My vocation," he writes to the president of the national assembly, "is as honorable and useful as that of judges, lawyers, ministers or kings. Why should the old superstition hold in modern times that the hangman's profession is disgraceful, abominable and loathsome? My friends are all perfect gentlemen and any member of parliament can consider it only flattery when he is called my friend."

New Gold Strike Made.

Anchorage, Yukon Territory.—Strikes of gold quartz apparently bearing more than $100 to the ton in a district thirty-nine miles south of here are reported. Prospectors are stampeding to the area of the discovery. Men returning from there said a dozen big fissures of quartz, heavy in gold, have been uncovered within a region twelve by seven miles. The first strike was reported at Girdwood.

Old Man's Shocking Record.

Langdon, N. D.—When his son who was running the binder finished cutting a 200-acre field of heavy grain, J. F. Whitehouse, seventy-six years old had in shocking kept so close to the eight-foot binder that he had just seven shocks left to set up. The feat is considered the "schocking record" for North Dakota for men who have passed the Scriptural age limit of three score years and ten.

Three Big BARGAIN DAYS

Wednesday, Friday, Saturday of This Week

Three Extra Specials We Are Offering For The Occasion

Special No. 1

Men,s all leather work shoes, acid proof, in blucher and outing styles. Extra special **$2.45**

Special No. 2

Men's Black Lisle Hose, all sizes, one hundred dozen, regular price 25c the extra special price, 7 prs. for **$1.00**

Supply your hosiery wants for next summer ot these prices.

Special No. 1

One lot of Men's Flannel shirts, all sizes, gray in color, Extra Special **$2.15**

Also one lot of Men's Outing Flannel Shirts, brown in color, Extra Special **1.29**

The above Bargains advertised are for the three days mentioned only. Take advantage of the evceptional Bargains

This is a cut of a mackinaw in the very latest model, double brested, large pockets with heavy welted seams, shawl collar and belted back. Shown in many patterns at ..... **$6.50 to $18.00**

You will note in this cut a sport vest, leather lined and leather sleeves, neat heather cloth shell, and leather piped pockets. This vest is used for all outdoor sports and is also very dressy. Priced at ..... **$10.00 to $13.50**

Young Men's sport or work coat, sheep lined with beaverized collar and belt all around.These coats can be bought with Opposum or Wombat collars also Priced at ..... **$9.85 to 27.50**

Men's or Young Men's lamb-lined or sheep lined ulsterette, one of the most popular garments on the market today. They are shown in very nifty cloth shells and can be bought with moleskin shell. We show them in Kangaroo, Wombat, Opposum land beaverized collars. This coat in one of the big hits of the season ..... **20.00 to 35.00**

Here is shown the very popular leather work vest with wool worsted neck and wristlets. This garment is a real necessity for the working man and is popularly priced at **$8.75**

We have other leather vests at ..... **$10.85 to $15.00**

In the above descriptions we have outlined bua a few of the cold weather garments, and but a few of the prices. We can suit your purse---give us the opportunity.

Ladies We have another supply of silk and wool fashioned Hosery mostly in heather colors at **$2.25** per pair

Exclusive store also for "Dovetex" ladies Gloves. Shown in lengths.

SAVE MONEY IN GRAVEL USE

Discovery By Engineering Experiment Station Helps in Concrete Construction

A new method of using screened and unscrened gravels in concrete mixing has been developed by R. W. Crum of the Engineering Experiment station of Iowa State College whi- is destined to save concrete users many thousands of dollars annually.

The customary methods of pro tioning concrete materials has, for yearrs required about twice as much course aggregate as of sand. In Iowa, however, the material as it comes from the gravel deposits nearly always contains more sand than pebbles. so there has been a good deal of waste.

To use this material as it comes from the pits and still secure a high quality in the resulting concrete was the object of the investigation. This result has been accomplished and -- into operation on a large amount of construction work in Iowa.

Elimination of the complex sieve tests and the substitution of one screening through a ¼ inch sieve and then refering to a series of tables he worked out in the manner of handling the gravel at present. Th-according to Mr. Crum. improves the quality of the concrete whether it is to be used for sidewalks, foundation or paving work.

This method has already been incorporated in the regulations of the Highway Commission. The cost of the concrete work quolity considered, is reduced and more uniform results are obtained by the constant inspection and change in proportions found necessary as the gravel changes in its percentage of sand. The details of inspection which have been worked out are simple and can be performed with little training and effort.

Details for this method of proportioning can be had in full asking for Engineering bulletin No. 60.

C. M. Bredbenner and family returned the latter part of last week from their trip to states south. While there Clark became inthused in racing hounds and bought two fine hounds which he will race next fall. The sire of Clark's hounds won the race this year so Clark should stand a good show. Hound racing is becoming one of the popular sports and draws bigger crowds than horse races used to do.

The world can't improve its schools because it takes most of its money to pay for wars, and it has to spend its money for wars, because its schools didn't teach the people any better.

The delegates to the armament conference all wear plug hats, according to the pictures. Stovepipe as well as shirtsleeve diplomacy.

The brains of the world are now centered in Washington. Here's hoping they function.

Mr. Harding needs no longer worry over his place in history. He has been working some wonderful golf scores.

Better haul the machinery in from the fields before the snow covers it up.

HE LIKES LEN

Parisian Concierge Had Good Word for Russian Tyrant.

Must Be Something In Him to Admire if It Is Only Deference to the Lowly.

After all, Mr. Lenin must be some thing of a man, for a Parisian concierge after 11 years speaks well of him. For three years this concierge had not the slightest cause of complaint, remarks Philip Hale in the Boston Herald. Mr. Lenin and his wife were never exacting, never haughty; they never forgot themselves so far as to complain of any lack of attention; they were considerate, sometimes deferential.

What do the janitors of apartment houses in Boston really think of the subjects on the floors above? Thackeray confessed that he was afraid of the men that stood behind the guests' chairs at dinner. Mr. Herkimer Johnson, making a week-end visit, never allows a valet to open his suitcase. We once heard him say: "Yes, sir," to the butler. It is true that this particular butler was an imposing person, even more imposing than the host. This reminds us of a pleasant incident in the social life of Boston. It was after midnight and the guests had supped well. As they were leaving the butler stood by the front door. An eminent physician shook him heartily by the hand and in a tremulous voice thanked him for the entertainment.

The Parisian concierge is a happier man than the Boston janitor. The former often sees and smells that delectable dish, onion soup, on his table. onion soup of a quality that cannot be found in any hotel or restaurant in Boston. His daughter often goes on the stage, and after a year has left sumptuously furnished apartments. The concierge then glows with paternal pride; he even speaks well of his friend, the count. All in all, the concierge is a more human being than the janitor.

We have spoken of Mr. Herkimer Johnson calling a butler "sir." It brought to mind Artemus Ward in London, when a policeman collared his fat friend. "'It's only a fit, Sir Richard,' I said. 'I always call the perlice Sir Richard. It pleases them to think I'm the victim of a deloosion, and they always treat me perlitely.'" We are afraid that the butler wondered why Mr. Johnson had been invited to spend the week-end, why the host treated him with marked consideration at table. Little did the butler know that Mr. Johnson was highly esteemed as a sociologist throughout the civilized world; that he had been decorated by foreign governments; that he was a fellow of many scientific societies that only in Clamport, on the Cape, he familiarly characterized as "our man Johnson."

Bacteria Millions of Years Ago.

That there were bacteria very early in the earth's history is proven by a study of a skeleton by Roy L. Moodie of the department of anatomy, University of Illinois, who sends to Science an account of the same.

The creature on whose bones Moodie found the evidence was a reptile of the dimetrodon type, the bones of which were picked up in the red beds of Texas by Paul C. Miller of the University of Chicago. The reptile's spine had been broken near the base with a simple transverse break and had healed again. The line of union being still evident. A hollow swelling, characteristic of the disease known today as chronic osteomyelitis was found on the shaft of the bone. Now, this disease is caused by infectious bacteria.

Mother Goose Linguist.

Mary's mother was improving the shining hours with a little French conversation, which Mary, aged four, was finding somewhat irksome. To some remarks, her mother replied: "Oui, oui," at which Mary said, in an exasperated tone:

"Don't talk pig talk to me."

"That isn't pig talk, dear; it's—"

"Yes, it is, too, mother. That's just what the little pig said all the way home."—Harper's Magazine.

Appropriate Name.

"Mrs. Jones," said the Boston landlord, "I hear you have a new baby in your family."

"That's true, sir."

"I'll have to add $10 a month to your rent."

"All right. I'm at your mercy, but if I had my way about it I would name that helpless innocent Calamity Jones."—Birmingham Age Herald.

Explosive.

Rastus (after a visit to the doctor)—Dat doctah sure am a funny man.

His Wife—How come?

Rastus—Made me swallah two cartridges filled with powdah, and then tell me I shouldn't smoke. As if Ah would.—Cartoons Magazine.

The Star Performers.

BASKET SOCIAL AND PROGRAM

There will be a program and basket social held at the Dist. No. 5, Ell township school on Monday evening, November 28. Ladies should bring baskets and if the gentlemen do not have money--bring oats! Emma Walker, teacher.

Messrs. P. M. Griesmer, M. O. Hocum, Dr. R. M. Thomas, Dr. W. F. Missman, J. N. Day, W. F. Pavey and R. A. Jorgenson all drove to Garner Monday evening to attend a chapter and Council meeting at the Masonic Temple. The main attraction to induce the above to make the cold trip over, was an oyster stew and all the trimmings at the close of lodge.

GIVE DRY COW GOOD CARE

Feed Liberally and Keep Her in Good Condition

The "dry" cow in the winter requires extra good care if she is to produce a calf that will be valuable and at the same time keep up her physical condition. According to the diary husbandry department at Iowa State College, "dry" cows should be fed liberally during this period. They should get plenty of good alfalfa or clover hay and as much silage as they will clean up.

A good ration during the winter, especially inf the cow has had a hard season and is thin, is composed of three parts of ground oats, two parts of bran, one part of oilmeal and as much ground corn as the cows thinness warrants. The corn will tend to put flesh on the cow so that it can be eliminated if the cows show too much fat.

Shortly before calving time, eliminate the silage from the ration, especially if the udder shows signs of inflammation. Stop corn feeding for at least ten days before calving.

In order to get the cow into the best physical shape for the calving time it is advisable to feed her some linseed oil. a quart of raw product per dose, since this will clean out her digestive tract.

Cows in winter should have access to warm quarters during stormy weather altho they require exercise and should not be stabled all the time. Warm water is a good help in keeping the animals in good winter condition.

The Prosperous Farmer

How To Keep From Going Broke---

There are a number of Thrifty Folks in our Comunity who do not feel the hard times.

There are fifty eight customers who have a credit on our books, all the rest are owing more or less. I have been asking these people how they do it, and their answers read something as follows:-

First Grain farming in Iowa will put a man in the Poor house if he keeps at it long enough whether he owns his farm or not.

Second If every farm family kept two hundred and fifty hens and took good care of them they would never need to worry about store debts.

Third Get more milch cows and take good care of them; the steady income from your cream checks would pay all your farm expenses

If we could double the amount of cream received at our Klemme Creamery, hard times would vanish and prosperity return, It can be done---Lets get more cows. If you want to borrow money to buy good cows your banker will listen to you

Fourth Hogs, when well cared for, are the mortgage lifters, many an Iowa farm has been paid for by raising hogs. You can do it too -- Start now. Do not neglect to take good care of them.

Summary These fifty eight families are prosperous during hard times because they are good to the hens milk the cows and specialize in raising hogs.

Won't you Resolve to specialize in hens, cows and hogs in 1922. Our community will prosper if you do.

ACTUAL COLD FIGURES REGARDING CURRENT COST OF ARMAMENT

People Should Not Be Misled by Fanciful, False Statements of Propagandists

WASHINGTON. Nov. 23—It has been long and persistantly asserted that of every dollar spent by the United States government 93 cents goes to pay the cost of war. Granting that this is true. it does not follow that the 93 cents can be saved, or can be diverted to other public activities, in event the outcome of the conference for the Limitations of armaments is satisfying even to the most optimistic advocate of disarmament.

If as a result of the armament conference, it should be decided to scrap all war equiptment, muster out of service the personnel of the army and navy and abolish the war and navy departments, it would mean a saving of less than 30 per cent of the total expenditures of the United States government. It is just as well that this fact be emphasized at the beginning of the cconference as to have it protrude itself in an unpleasant manner later on.

Fanciful and False Figures

Before the participation of the United States in the World war it was a favorite ascertation upon the part of the same publicists that this countrycould raise an army over night. The stern realities fo America'e experience in raising an army dissipated that fantastic theory. Many of the same class of publicists are now exaggerating the savings that would be made in event the United States, in conjunction with the other great powers, should decide upon even so extreme a measure as a total disarmament.

Much publicity in favor of total disarmament has stressed the allegation that by the consummation of such a program taxes could be reduced from 50 to 80 per cent, or in event they were not, the money so raised could be used in promoting public works and improvements, pub lic education, etc.

Getting down to brass tacks it may be stated that out of every dollar now being spent by the Federal government, the army and navy are getting less than 19 cents. The government expenditures for the current fiscal year are fixed at $4.204,000,000 in round figures. The War department is alloted $400,000,000 of this budget and the navy$387,000,000, a total of $787,000,000. This is 18.7 per cent of the total expenditure of the government for the current year. To phase it another way the army and navy for the current year are spending 18.7 cents on every dollar spent by the Federal government. If both of these departments were utterly wiped out, the nation would save 18 cents out of every dollar it is now spending,—not 93 cents, nor 80 cents, nor any of the financial propagandist figures.

Current Costs Lowest Ever

The bulk of expense chargeable to war are found in the items of public debt, pensions. etc. None of this expenditure would be saved even if the world should decide tomarrow upon total disarmament, for all such expenditure represents debts already contracted, which must be paid. For instance, the public debt of the United States prior to her entrance into the war was only a little over $1,000,000,000. The public debt of the United States, as of June 20, 1920, was $24,300,000.000. The interest upon this tremendous increase as well as the principal itself, is all chargeable to the cost of war. But no disarmament program, however complete could avoid the necessity of raising by taxation sufficient funds to pay the interest upon this debt and eventually to pay the debt itself.

Looking to the Future

In addition to the interest on this public debt there are the tremendous claims to be met in the way of compensation to ex-service men, payment of claims to various individuals and concerns growing out of war contracts and other war activities. There are still an annual pension expense of over $500,000 from previous wars. None of these obligations incurred by reason of past wars would cease in the event of total disarmament. All that could be assured the people would be that such indebtedness could never again be saddled uoon them. This is a consummation devoutly to be wished, and ti is to approach in some measure such a desired end that the present conference to limit armaments was called by President Harding. This is the thng always to be kept uppermost in the public mind.

CREDIT FOR IOWA FARMER IN SIGHT

Iowa Farm Bureau Secretary on Way to Washington to Help Plan It

DES MOINES, Nov, 17.—E. H. Cunningham, secretary of the Iowa Farm Bureau Federation. is on his way to Washington where, with other farm loan leaders, he will confer with officers of the War Finance Corporation regarding the working out of a plan for the extension of additional credit to Iowa farmers.

According to the statement issued here today by L. A. Andrerw, the great need of the Iowa farmer for additional credit has been rcognized by the finance corporation and that a new committee has been named from among the farm bureau leaders with J. R. Howard, president of the American Farm Bureau as chairman.

According to the statement issued here, Secretary Cunningham will assist Mr. Howard in working out a plan for handling these new funds in Iowa.

"The Iowa Congressional delegation," the statement reads, "has been active in asking for additional relief for the farmers of this state."

"The officers of the Iowa Farm Bureau Federation" continues the statement," have worked out a plan if apporoved by war finance board whereby the Iowa Farm Credit corporation can qualify as the agency through which these corn and cattle loans can be made in this state direct to the farmers. This work will undoubtly be carried on under Mr. Howards committee. It is planned that the Iowa farmer can secure enough advances on his corn and other grain, stored on his farm, so that he will not be obliged to sell at the present ruinous prices in order to pay his taxes and interest and will also be able in many cases to secure funds to buy livestock. The situation is considered very serious and it is hoped that the plans proposed will work out something of real bene fit to the farmers."

GREEN FEED MAKES LAYERS

Helps Poultry Along In Winter When Put in Rations

Green feeds given to poultry will encourage laying and will supply a cheap food, according to H. H. Bitten bender of Iowa State College.

With the coming of winter the green foods that the poultry ordinary get such as grass are eliminated. To offset this sprouted oats make a fine substitute. Young sprouted oats have been found to be a very efficient feed. Do not let the oats sprouts too long and be careful not to let them mold as molds are piosonous to poultry.

A fine feed for hens is made by taking a mangel beet and placing it on a stick so that the hens can pick at them. An ordinary mangel beet makes food for 25 birds. Mangels are a satisfactory feed as they can be stored and they last all winter.

If it is too much trouble to sprout oats soaked ones are good. Alfalfa leaves hahve been soaked in warm water to regreen them are also a good green feed.

What the world needs just now is for a lot of people to close their mouths and open their ears.

DIMMER LAW A FARCE

Drivers Prefer Former Bright Light on Car

Des Moines, Ia., The new Iowa dimmer law is under fire complaints reaching the state house indicate. From all sections come the reports that incidents have great ly increased since the new law went into effect. The claim is made that automobile lights are so poor that it is impossible to get a clear vission of the highway and dangerous culverts live animals in the roadway and other obstructions are a canstant menace to the drivers, to say nothing of collisions.

It is already apparent that the next legislature will be asked to repeal or modify the law.

"Keep your smile." is the advice handed out by a local philosopher. But handing it onto others is better.

It isn't to be wondered at that some men are unable to withstand prosperity. They never have a chance.

Cynic!

The principal trouble with matrimony is that you can't marry a girl and still want to sit alone with her in the dark.

DON'T FEAR ASPIRIN IF IT IS GENUINE

Look for Name "Bayer" on Tablets, Then You Need Never Worry.

To get genuine "Bayer Tablets of Aspirin" you must look for the safety "Bayer Cross" on each package and on each tablet.

The "Bayer Cross" means true, world-famous Aspirin, prescribed by physicians for over twenty-one years, and proved safe by millions for Colds, Headache, Earache, Toothache, Neuralgia, Lumbago, Neuritis, and for Pain in general. Proper and safe directions are in each unbroken "Bayer" package. —Advertisement.

Spud Murphy's Girl.

Spud Murphy says: "I don't mind that girl of mine bein' stuck on her folks, but I'm darned if I know why she thinks that every time I call it's up to her to bust out the family album." —The Leatherneck.

BOSCHEE'S SYRUP

Allays Irritation, Soothes and Heals Throat and Lung Inflammation.

The almost constant irritation of a cough keeps the delicate mucous membrane of the throat and lungs in a congested condition, which Boschee's Syrup gently and quickly soothes and heals. For this reason it has been a favorite household remedy for colds, coughs, bronchitis and especially for lung troubles in millions of homes all over the world for the last fifty-five years, enabling the patient to obtain a good night's rest, free from coughing, with easy expectoration in the morning. You can buy Boschee's Syrup wherever medicines are sold.—Advertisement.

Time Kept by Standard Clocks.

The time of the whole of the United States east of the Rockies is regulated by three standard clocks kept in an underground vault at the naval observatory in Washington. These clocks are wound by electricity, and their beats are transmitted electrically throughout the observatory; the vault is never entered except in cases of emergency.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes. Advertisement.

Daily Short Story.

Potiphar Wampoodle had words with his wife at breakfast about the way the eggs were cooked.

"I'm tired of this sort of thing," he declared. "From here I go to the river."

So he did.

He loafed around the river front, kidded the boatmen, and even accepted a little guaranteed hootch.

It was very late when he wended his way homeward.

Then he had words with his wife about some alleged pork chops he found on the supper table.—Louisville Courier-Journal.

First "Weather Man."

An Englishman, Francis Galton, was the first real weather man. Galton was a cousin of Charles Darwin. He was born in England in 1824. Whether he was really able to forecast rain and sunshine with more accuracy than his successors is an open question; but it is certain that he was the first to attempt the charting, on a large scale, of the progress of the elements of weather. The methods devised by him, in modified form, are used to this day.

Why guess about it— When you can know about it?

Suppose a guide said—

"This way there's a safe and pleasant road to your destination, with no risks or troubles on the way," and—

"That way there's a road that a good many have stalled on and turned back from, but you may get through."

Which would you take?

Postum is a thoroughly agreeable and satisfying meal-time drink, and you're sure that it's perfectly safe for health. Coffee contains drug qualities which disturb and harm the health of many.

Postum or coffee? Which road?

Why guess when you can know?

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by all grocers.

Postum *for* Health

"There's a Reason"

Gifts That Will Please

Of Canvas and Ribbon

It goes without saying that bags of all sorts are among those gifts that are always welcome. There are many new ones this year made of coarse canvas, or unbleached linen and trimmed with narrow satin ribbon and ribbon flowers. Baby ribbon may be drawn through the interstices of the canvas. Drawing threads out of either the canvas or linen makes it possible to weave wider ribbons over and under the remaining threads, in borders or ornaments. Flowers cut from cotton or linen, in various colors, are applied to the linen bags and buttonholed along their edges with cotton floss or yarn. A case for holding playing cards and a bag which may be put to various uses are shown above in gifts suited to either men or women.

Sweets for Christmas

You cannot think of anyone who will not be delighted to receive a gift like that illustrated here. It is a half-dozen glasses filled with jelly, preserves and marmalade, very attractively arranged in a wicker basket. The tin covers of the glasses are lacquered with black lacquer and a white gummed letter is placed in the center of each one. A spray of fruit or blossoms painted on the lid with sealing wax, together with the letter, tells the kind of jelly or preserves the glass contains, as apple, with a spray of apple blossoms and the letter "A," or currant with a cluster of currants and foliage and the letter "C." Sealing wax in several colors simulates shirred ribbon on the center glass which contains marmalade.

Christmas Candles

This year's candle shades made of gay silks or of crepe paper are shown in such variety that every one may be pleased. Sparkling silver tinsel strays over some of them, adding a holiday glitter to the pretty colors through which the light gleams. A shade decorated in this way is shown at the right of the two pictured. At the left a foundation of plain paper is covered with ruffles of crepe paper in two alternating colors, in this case white and green, and has daisies made of paper set about it.

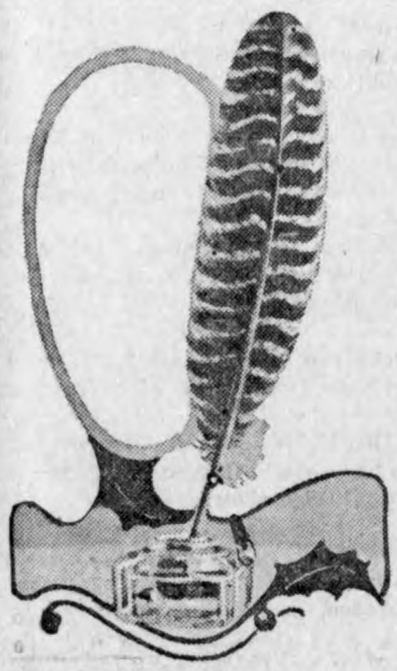
Oil Cloth Table Sets

No housewife will fail to enjoy the new table sets of oilcloth with their cheerful borders of gay flowers and fruits. They are much handsomer than the stenciled pieces and many women use them for the dinner as well as the breakfast table. These sets consist of a centerpiece, plate doilies and smaller doilies. The fruits and flowers in the set pictured are in their natural colors and the oilcloth in a deep cream color.

Fadeless Flowers

Flowers made of petals cut from paper tape and coated with colored sealing wax, are among the novelties that add to the cheerfulness of home and Christmas this year. A cluster of them in several different colors, in a vase that is also coated with the wax, makes a very pleasing bouquet for the living room or dining table. The colored wax is a substitute for paint and a small alcohol flame becomes the brush for making the fadeless blossoms.

A Decorative Pen



For the writing desk or as a companion piece to the guest book, a pen with a feather quill for a handle makes a beautiful gift. Natural feathers are as marvelous and beautiful in their markings as flowers and those in neutral colors can be tinted if one wishes to brighten them. Many kinds of feathers, including those of the ostrich, are used for these decorative pens and they make a gift suited to every grown-up.

Santa Remembers Baby

Santa Claus never forgets the babies and each year presents their little belongings made in new and pretty ways. This year "nightingales" and bonnets seem even better than their predecessors. A set to match is shown above, made of fine flannel and trimmed with narrow satin ribbon gathered along one edge and feather-stitched down. A frill of narrow lace finishes the cap.

For Little Garments

Hangers for wee garments make a lovely gift for young children, especially when they look like dolls. Here two are dressed up to represent a girl and a boy doll and a third is simply covered with ribbon and decorated with ribbon flowers. Little celluloid doll heads, wide and narrow satin ribbon and wire hangers with a little ingenious sewing are all that is needed for the doll hangers.

INSULATE YOUR RANGE BOI

Investigation Shows Heat Losses From Water Storage Tanks

All hot water storage tanks should be carefully insulated with some form of efficient insulating material, unless they are to be used for room heating say engineers at Iowa State College.

It costs from $27.00 to $70.00 to supply the annual radiation losses from uncovered 30 gallon tank kept at 130 degrees F., the cost of the losses depending on the method of heating the water and the kind of fuel used.

Money Spent In Repairs Now

Is good money saved;

Don't wait until winter actually sets in before you make the repairs about the house that you know now should be made.

It is cheaper to have the work done now than to wait. Run over in your mind the little jobs around the house you should have a carpenter do and then talk to us.

We'll be glad to figure with you on the amount of material you need and can put you in touch with a carpenter who will do the work for you.

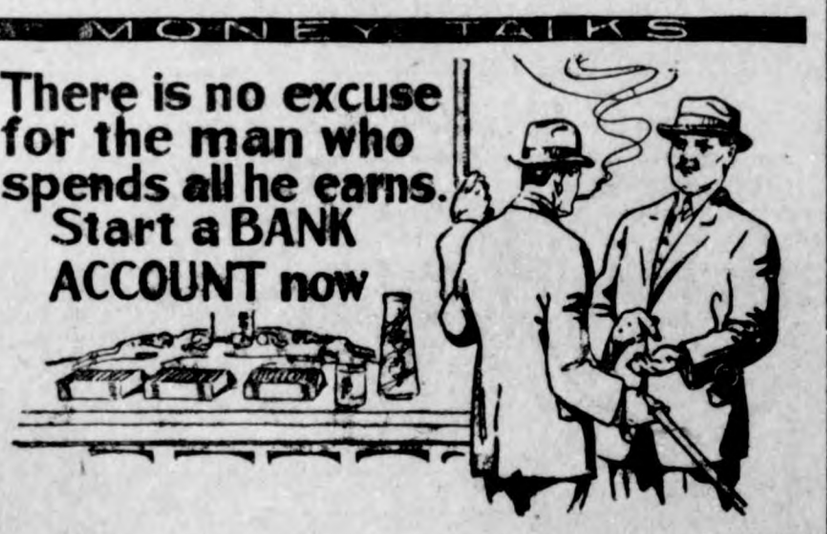
MONEY TALKS

There is no excuse for the man who spends all he earns. Start a BANK ACCOUNT now



He who earns a thousand a year and at the end has a hundred dollars in the bank is better off than he who earns two thousand a year and saves nothing.

Everything is against the man who does not save, and he injures no one but himself and those dependant on him.

By the exercise of reasonable thrift week by week and month by month you will avoid the necessity of trying to find excuses for yourself in later years.

Five per cent interest paid on savings.

State Savings Bank

GOODELL NEWS ITEMS

Sumner Eldred came over from Clear Lake Tuesday.

Mamie Fulton of Belmond is staying at the Bert Hood home this week.

Bob Hughes was a Goodell caller Monday.

A large crowd enjoped the Basket Ball Game between Kanawha and our boys Friday night.

Margaret Kearney was a Belmond caller Saturday.

Lots of poultry is coming into the markets now as the price seems to be pleasing.

Avis Wilson is assisting Mrs. Lester with her work this week.

Mr. and Mrs. W. T. Sherwood were Belmond callers Monday.

Myrtle Schoenwetter visited with her parents in Garner Saturday.

Miss Dows spent the week end at Ames.

Fred Chase and daughter, Marvel, were Belmond callers Monday.

Frank Quigley, Sr., visited his son Francis, who is in Des Moines, last Thursday and Friday.

Henry Christians were let out of quarantine for Scarlet Fever last week.

A large crowd attended the dance here Thursday nite. There will be another here Thanksgiving evening.

Contractor Lake with a ful force of men are working on the new church this week.

The two families that had scarlet fever are well and out of quarintine.

The U. B. Church will hold a Thanksgiving dinner. Everyone bring filled baskets.

Meservey will play the Goodell basket bal team here Thanksgiving afternoon.

Mr. Harvey Christensen and children are spending this week at the Carrol church home at the Carrol chuhch home at Clar Lake.

Our boys basket ball team played Belmond Tuesday nite. They were badly beaten, but this was their first game.

Ruth Ness returned to Goodell Tuesday ofter spending a few days with relatives at Albert Lea.

Rev. Father Eardey and Tom McNulty were up from Belmond Tuesday.

We are glad to hear that Marie Hood, who has been in the hospital for two months is on the gain and will soon be able to come home.

A large crowd attended the dance here Thursday nigth and all report a good time. Another dance will be held next Thursday night.

Goodell High School Notes

Marvel Chase was absent Monday.

Everyone takes a look and smell of the can and its contents marked "poison" setting on the radiator in the hall. We don't beleive any germs can harber near it.

Mae Griggs had the misfortune to break one of the lenes in her glasses. Seems strange to see her from behind her "window-panes."

The six weeks tests are being taken by everyone—not seeing any perplexed faces. We take forgranted that they are very easy.

Friday nite Goodell and Kanawha played basket ball resulting in a victory for the later.

The girls will play the Meservey basket ball girls a game Thanksgiving day. We feel prowd of our teams and hope they do as good as work as they do practising.

While practising last Monday, Adelaide Engeseth, who was acting as guard, had the misfortune to have her forward stick her finger in her eye. It was very red and sore looking eye for a few minutes but a substitute was on hand, and in due time Adelaide was back again.

A very interesting discussion on the popular book, "Main Street." by Sinclair Lewis, between a Junior and a Senior, was overheard by one of the teachers. Each one gave a good opinion of the book and tried to convince the other that it was a good or a "trashy" book.

The boys played Belmond basket ball team Tuesday night and Kanawha Friday. We regret that our boys were beaten but it was their first games of the season and perhaps after they have practised a little while longer they can make a basket every time they toss the ball.

LIBERTY TOWNSHIP NEWS

The Henry Beier family is on the sick list.

The Epworth League of Liberty township church gave a Thanksgiving program Wednesday evening.

Some of the young men of Liberty township are becoming wrestlers of creditable ability.

Mr. and Mrs. Clifford Nesbit of Garner visited at the Chas. Schmidt home Sunday.

Louie Suckow has been suffering from a severe cold the past few days. We wonder if he doesn't use Rawleigh's Remedies?

School No. 8 held school last Saturday so as to get the day off after Thanksgiving day. We presume the teacher planned it that way so that she could take a little trip in a southernly direction to visit—well we don't know the guy's name.

A few of the farmers in this locality still have some corn to husk. Yet they are ahead of the farmers in the west part of the county, as some of them still have sixty acres of corn or more in the field. They have had trouble keeping huskers as the corn is down so bad.

The cold weather seemed to affect Quinten Stille's fliver last Sunday night at the church as it failed to respond to the crank—that is, we mean the one attached to the car. Through the generosity of E. G. Beier, Quinten's car was towed part of the way home when he got it started. Lucky for Quint that he had his sister along instead of somebody eles'e sister to push the car.

No, you can't escape 'em. The summer siren simply transforms herself into the winter vamp and keeps on a-goin'

SEASON FENCE POSTS RIGHT

State Loses Many Thousand Annually By Poor Storage of Posts

Thousands of dollars are lost annually to Iowa farmers who do not use good methods in seasoning their fence posts, says I. T. Bode, extension forester at Iowa State College.

Mr. Bode says that usually posts are not piled up so they will dry, but merely thrown into a heap or left on the ground. The bark in many cases is left on the posts and this helps the fungus growths to get into the wood and starts decay permaturely.

Proper piling of posts should follow what is known as the 3-5 method This consists of piling posts in layers of three and then with five laid cross wise on these and alternating can circulate in such a pile and posts will dry out.

Contrary to the belief of people, posts cut in winter contain as much moisture as those cut in summer and should be taken care as carefully in order that they dry properly. Winter cut posts season more slowly than do summer posts and this prevents checking cracking.

With present prices of fence any Iowa farmer can afford to care in seasoning his supply of It costs money to remove bark it will more than pay for itself lengthening the keeping qualities the posts.

Do Your Xmas Shoping Early, Trade In Klemme

News Of The Week Reported By The Klemme Schools

KLEMME SCHOOL NEWS

By Andrew Wellemeyer and A. E. Lauritzen

Donald Stille had the misfortune few days ago by twisting his ankle hich caused him to limp some and etained him from playing basket all for a few times. How he come o twist this ankle is unknown, but is not so serious a case and Donald ill soon be handy on his feet again.

The contestants for the Declamatory contest are under a regular chedule for praticing now. All the contestants have their selections emorized and are practicing with ull force. The contest will be held n two or three weeks. The exact late will be published later.

The Girls basket ball team played he so called "Old Timers" on Thanksgiving day and were defeated t was a good game and the girls howed excellent playing considering he first time and of course also who they were bucking up against. Don't loose heart girls! Somebody's ot to win!

The Civics Class are now taking p the study of the Constitution of owa.

Milvern Ell, by his own request, hanged his seat the other day and moved himself up next to the teachers desk. We wonder what's the reason of this bold act.

The basket ball court is nearly inished and nothing now can prevent the teams to schedule games with neighboring towns. Lets Act! and have some real High School games in Klemme this winter.

An agreement has been reached between the girls and the boys in regard to using the garage for practicing basket ball. It is understood that the girls will use the garage on Monday nights and Friday nights. The boys will use the court on Tuesday and Thursday nights.

Leona Lau and John Baumgartner were absent Monday A. M.. The cause is unknown, but maybe they didn't get over Thanksgiving.

Glenn Busch, (or rather Stephen Girard) came to school the other day with his eye bandaged up. No one handed him a shiner, but he received his black eye while helping fix up the basket ball court in the Gram and Schultz garage. At this time Glenn has removed the bandage and his eye looks somewhat better.

Blanche Medause began school Monday. She was absent the first three months on account of sickness. Blanche was in the Freshman Class last year and won honors for her class in the Declamatory Contest held last year. She is highly welcomed to the ranks of the Sophomor Class.

FIRST NUMBER OF LYCEUM COURSE FINE

The "Maitland Entertainers" gave the first number of the winter entertainment course Friday evening. They were very good and all thoroughly enjoyed their performance in song and music. A large crowd was out to attend the first number. If the following numbers are as good as the first one, then the course will be the best ever put out in Klemme. Watch for dates of the second number and plan to attend.

Quite a number from here and vicinity drove over to Mason City last Friday afternoon to see and hear Marshall Foch. Thehre was such a large crowd there that it was impossible for many to get close enough to get a good look at the former soldier.

Fred Kluckhohn, better known perhaps as "Ruck Jones" was somewhat under the weather the latter part of last week but was able to get up to the store again yesterday.

HANCOCK ELEVATORS JOIN U. S. GRAIN GROWER

With but nine solicitors in the field during the past week, a total of 118 grower contracts and 12 elevators were added in the membership campaign of the U. S. Grain Growers Inc., according to A. L. Middleton, state director, in an official statemen issued here. This gives Iowa an aggregate of 311 members and 20 elevators and the campaign as yet has not been passed beyond the preliminary stage. The elevators accepting the contract last week are distributed as follows: Clay county 3, Dickinson2, Buena Vista 2, Hancock 2, Story 1. Wright 1 and Jasper 1.

Elevator connections have been made in Dickenson, Clay, Buena Vista, Hancock, Kossuth, Franklin, Harlan, Winnebago, Jasper, Greene, Wright, Hamilton and Humbolt counties. say J. E. Wooters, assistant director and active olicitation of memberships will proceed in these counties shortly.

In three townships of Story county where te initial campaign wag conducted, the membership stands close to 250. State leaders indicate that 600 members wil be obtained in the county before the last farmer is solicited. This number would exceed by far the fondest hopes held at the start of the work. With a proportionate amount of success in other counties wher the movement will soon be introduced, state leaders say that their goal of 10,000 members by June will be reached with ease.

A feature of the work in Iowa rests with individual solicitors. David Wood, of Carroll, working in Dickinson and Clay counties signed five elevators in one week. Leonard Lucas, solicitor, held a meeting at a country school house near Truesdale Monday evening and signed eight grower contracts as its close.—Britt News-Tribune.

YOU CAN BUY A HORSE FOR $2

That's what they sold for in North Dakota, according to Henry Johnson who recently returned from that state. Henry states that he attended four sherriff's sales while there, wen farmers were closed out by their creditors, and that he saw a team sell for six dollars, $4 for one horse and $2 for the other. Good yearling heifers sold for eight and ten dollars apiece. It would seem that when a sum of that amount is to be realized from a forced sale. that the creditors would be better off to carry the man along than to sell him out.—Belmond Independent.

JUST WANTED A SHAVE

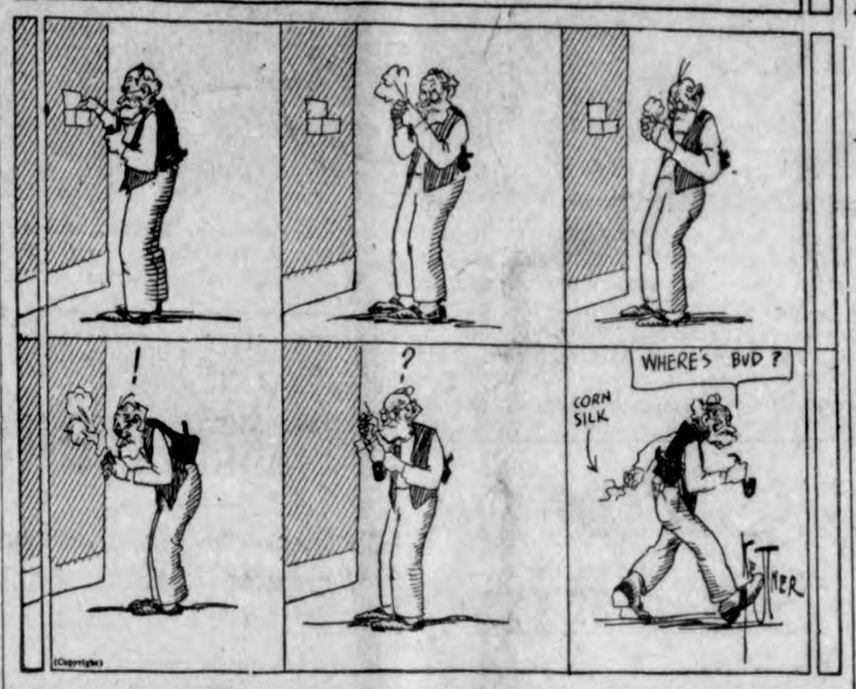
Lu Verne News.—A good joke was told on Fritz Granzow, the leader of the LuVerne and Livermore band. While at Esterville recently Fritz had just twenty minutes to get a shave and rushed into a barber shop, happened to enter a shop conducted by a lady who, when Fritz entered was feeding her baby. Hastily placing the baby in it's cab the lady politely informed Fritz that he was next. but he made for the door and as he left he said, "No thanks, I just wanted a shave."

Old "Fritz" is well known here, as he was leader of the old Klemme Band for several years and tauggh, "Bobby Carr" how to play the jazzbo.

"Zip" McCullough should be given words of encouragement to keep up the struggle. With proper care, many hours of worry and fretting over the outcome of what now appears to be a small thing, may in time develope into a full size mustach to grace Zip's face. When a young man is doing his best to grow lip decorations, encourage him.

A couple weeks ago Vern Smith and Ed Jacobs started "tea strainers' on their upper lip. but they did not receive encouragement and so the mustaches are no more.

Ol' John B. Thunder, Esq.



Washington Releases Vast Sum For Road Improvements

$75,000,000 AVAILABLE FOR IMPROVEMENT OF PUBLIC HIGHWAYS

Guarantees Employment to Thousands of Men During Winter Months

WASHINGTON. —Seventy five million dollars becomes available as Federal aid for road construction in various states. the money to be spent under the supervision of the Bureau of Public Roads, Department of Agriculture, under the Federal Highway Act signed today by the President. In addition, $15,000,000 is appropriated for national roads. The $75 000,000 represents the federal government's appropiation to the work of building highways in various states and must be matched , dollar for dollar, by funds from the state treasuries, except in states where more than 5 per cent of the area is unappropriated public land. The $75,000,000 appropriated is for the fiscal year ending June 30, 1922, and $25,000,000 of the sum is available immediately, the balance becoming available on January 1, 1922.

The federal highway act in a general way resembles the federal aid act of 1916, but contains several new features. Administration of the act by the Secretary of Agriculture, and under him the Bureau of Public Roads, remains unchanged.

Apportionment of the fund to the states is almost the same as in the previous act, the fund being divided into three parts, one part apportioned according to population, one according to area, and one part according to milage of rural and star mail routes. A new feature is the stipulation that no state shall receive less than one-half of one percent of the total fund which, in this case, amounts to $365,625. This stipulation will increase the amount received by four of the smaller states, i. e., Delaware, New Hampshire, Rhode Island, and Vermont.

Change In Use Of State Allotments

There is considerable change, however, in the manner in which the state may use its allotment. Each state must select a connected road system not exceeding 7 per cent of its road milage for improvement with federal aid. This system will be divided into two classes, one of which will be known as interstate highways and the other as intercountry highways. Theh interstate highways must not exceed three-sevenths of the system selected; on them not more than 60 per cent of the state allotment can be spent without the joint approval of the secretary of Agriculture and the state highway department. The inter-country high ways, which consists of the remainder of the State's allotment.

Except in states where more than 5 per cent of the area is unappropriated public land, the amount of feder al aid received on any project must not exceed 50 per cent of the estimated cost. In states where more than 5 per cent of the area is unoppropriated public land the 50 per cent allotment is increased by an amount equal to one-half the percentage of unappropriated public land in the state. Before any funds can be paid to a state, the state must appropriate money, under the direct control of the state highway d ment, to match the federal allotment and for the same maintenance of federal aid highways.

All highways in the interstate system must have a surfaced width of at least 18 feet, unless a narrower width is deemed permissible by the Secretary of Agriculture. In case a federal-aid highway is not properly maintained by the state, the state will be given 90 days notice by the department. At the end of that time if the highway is not in god condition of maintenance, the Secretary of Agriculture will maintain it out of the state's allotment and refuse to approve any new projects until reimbursement is made by the state.

Work For Quarter Million Men

It is estimated by the engineers of the United States Department of Agriculture that the federal aid roads under construction on October 31 were giving employment to about 250,000 men, either directly on the actual road construction, or indirectly in the production and transportation of the materials which enter into the construction.

The new act. just signed, will, it is stated, keep these men at work, so far as weather conditions will permit, and thereby prevent the unemplopment situation from becoming more serious. Without the ew appropriation many of the states would soon have forced to curtail their work for lack of funds.

FIRST METHODIST CHURCH

Services are as follows:

Midweek prayer service at 7:30 at the home of Rev. Haefner.

Sunday morning service at 10:00 o'clock followed by Sabbath school.

Evening service—Epworth League at 7:30 followed by sermon.

All lovers of our Christ, who are not duty bound elsewhere are most cordially invited to come and worship with us. Rev. G. H. Wessel will preach the morning sermon.

A series of meetings have been begun at the Liberty Township church. Rev. Wessel will speak there every evening throughout the week.

While weather and roads are favorable, please make use of these meetings as much as possible.

Catechism and bible school at the Church every Saturday afternoon at 2 o'clock.

W. C. Bergman, Pastor

Ladies are not invited to read Wellemeyer's ad this week. We can not tell you the reason until after Christmas. adv

News Borrowed And Stolen From All Over The State

HANLONTOWN MAN BAGS TWO WOLVES; 3 IN FORTNIGHT

HANLONTOWN,— Ed Escherich proved his excellent aim again Monday when he bagged another large wolf and wounded a second. As it was getting late he returned to his home here and went out on Tuesday again and brought home with him the one he wounded on the previous day.

This makes the third wolf to Mr. Escherich's credid in less than two weeks time. Each wolf carries a $10 bounty from the county and the pelts will also bring a nice sum.

Mr. Escherich is a garage man and known to be an excellent hunter, in the past years and proves his good marksmanship by bringing home these wolves that may prove disastorous to the farmerrs flock.

Although no such reports have thus far came in, it is not known what may happen for their howling has been heard by residents here in town and the country for some time past. Another wolf was bagged 10 days ago in this vicinity by the Peterson brothers near Fertile.

DR. HESSELHUUS MOVES DENTAL OFFICE

Now Located in Schaeffer Bldg.

Dr. J. L. Hesselhuus is moving his dental equiptment from the Dr. Zinn building into the Schaeffer building today. His office will be located on the first floor, the front rooms of the building formerly occupied by Mrs. A. Kirkwood. opposite from the Wellemeyer's store on Main Street. With this information in mind the sufferer of a jumping tooth ache will be able to find the dentist.

"Doc" is having the rooms remodeled and fixed up in fine shape and will have a fine location for his office. We have heard many compliments on his excellent work.

USE ELECTRIC LIGHTS

Egg Production Can Be Increased Many Times, Say Poultrymen

Installing electric lights in the hen house will increase the egg production of the farm flock 40 to 60 per cent and will pay for the cost of installing in a short time. accoding to the poultry department of Iowa State College. Recent trials of this method of supplying a longer working day for the hen have in all cases made a good showing in egg production.

Lights should be burned about 4 o'clock in the morning and left until daylight. Then they should be lighted when it begins to grow dark in the afternoon and run until 6:30 o'clock in the evening. An automatic device can be easily arranged so that the lights can be turned on early without the owner of the flock having to attend to it. Take an ordinary alarm clock, attach it to a string that will set off a mouse trap when the alarm rings and the mousetrap close the connection and light the lights.

Proper feding of the hens to force egg production will keep them in trim for midsummer production.

Good Roads vs. Battleships

A battleship lasts but a few years before it is junk, even in times of peace. But a good road runs straight to the sunrise, endures for a life time and brings happiness and convenience to millions.—Portland Oregonian.

And It Was Some Tangle

We could not have had a liminittion of armament conference at all if the Republican administration had not already had excelient success as a disentanglement conference. Boston Transcript.

IOWA NEWS BRIEFS

The Dubuque County Supervisors have reduced taxes two and one half mills.

Clinton celebrated completion of eighteen miles of Lincoln Highway paving with elaborate veremonies recently.

The Spencer Grocry Company's building at Spencer, valued at $10, 000, was entirely destroyed by fire recently. Much of the stock, valued at $65,000, was removed. The origin of the fire is unknown.

While digging in a cornfield south of Dubuque, William Leute and Arthur Vandermillen found the skeletons of five bodies and numerous Indian implements which have led the discoverers to believe that this is the site of an ancient burrying ground.

A case of death from sleeping sickness was reported to the State board of health recently from Ida Grove. The victim, Hulda Strecht, was sick only a few days. Doctor G. H. Sumner. secretary of the board says that thhere has been more leaths than usual from this cause this year.

FrankTrumbauer, alleged liquor manufacturer living near Winterset, was assessed $2,516 manufacturer's ax by the internal revenue department. Officers of the anti-saloon league and federal officials raided Trumbauer's farm near Winterset several weeks ago and had him arrested for violating the prohibition laws.

On the application of W. J. Murray state superintendent of banking. Judge Hamilton appointed Paul J. Fisher of Sioux City as receiver for the American Savings bank at Sioux City. Bad notes are blamed for the failure of the institution. The banking superintendent asgerted an assessment of 100 per cent on the stockholders would not make good the loss which it is believed will amount to between $200,000 and $400,000.

In conference with Director Meyer of the war finance corporation, Senator Kenyon was assured that within a very short time a total of $10,000,000 would have been advanced to Iowa banks to aid the agricultural credit. About $4,000,000 in tural credit. About $4,000,000 in advances has already been approved. Reports that it is actually sending out little money are denied. Officials insist that cash follows quickly on approval of an advance.

CAN YOU BEAT THIS?

Man Whips Wife Because She Served Chicken

Le Mars, Ia.—Otto Rupp, a farmer living near Remsen, was given 30 days in jail for beating his wife.

"What did you want to go and do that for," asked the court.

Rupp explained that they had been "eating up" a surplus stock of chickens on the farm, and that he was heartily tired of chickens, he said he had eaten so many chickens he cackled in his sleep. Whereupon he said he ordered her to get something he could sink his teeth into, beef steak, for instance, and when she served chicken again he soothed his feelings by "beating her up." Mrs. Rupp said she had ordered steak, but the maid man who was to deliver it had been delayed.

"Any man who beats his wife for frying him a chicken simply doesn't get by with it in my jurisdiction" said Justice Freeman. "Thirty days and tell the sheriff, no chicken."

Ladies will please not bother to read the last ad on the last page of this paper. It is a Man's ad. adv

Blind 57 Years, Yet Built City

Gen. A. R. Johnson of Burnet, Tex., One of the Figures of the Civil War.

IS STILL HARD AT WORK

At Eighty-Eight He Looks Back Over Practically All of the History of Texas—Lost Eyes in Battle in Kentucky.

Austin, Tex.—Blindness is a serious impediment to most men, but it did not prevent Gen. A. R. Johnson of Burnet, Tex., from accomplishing whatever purpose he had in mind—and he has had many purposes. After he had lost the sight of both eyes the general built the city of Marble Falls, made several trips East to interest capital and succeeded; built a water power plant, a school house, a shoe factory, a cotton mill, secured a railroad for his town, fought Indians and raised and educated six children he never had seen. He also has taken a prominent part in Texas politics and civic work since losing his sight. The general is now eighty-three years old and is as enterprising as ever.

Brilliant War Record.

Johnson's record in the war between the states was as brilliant as his work after the conflict had closed. It was along in 1864 that he lost his sight from explosion of a shot. Johnson is one of the few remaining generals of the Confederacy and has been a resident of Texas for more than sixty years.

When Johnson came to Texas before the Civil war, Kentucky being his native state, he had charge of a section of the Overland Mail Route, one of the links in the Butterfield Mail Route between New York and San Francisco. The Comanche Indians often attcked and killed the station agents, and in the fights with them Johnson always took a hand.

When the war came he hurried to Kentucky and joined General Forrest. Johnson had two brothers in the federal army and having been absent in Texas so long it was supposed his sentiments were similar and so he obtained valuable information for Forrest. It was at this time that Johnson earned the sobriquet "Stovepipe Johnson." Learning that there were 500 stands of guns at Newberg, Ind., he took but 30 men across the Ohio river, found some broken down wagons and joints of stovepipe. Mounting the pipe on the wagon wheels, he was able to deceive the people at Newberg into thinking that he had several powerful cannon trained upon their town and when he demanded of the Federal officers that they surrender their supplies they did so promptly.

Lost Eyesight in Battle.

The general lost his sight during a fight at Grubbs Cross Roads, Ken., and was left for dead upon the battlefield. His obituary was published all over the South, but the Federals picked him up with other wounded and sent him to Boston harbor prison. Later he was exchanged, and spent the remainder of the war period filling cartridges. After Lee surrendered Johnson and his wife returned to Texas, where he still found his old enemy, the Comanches, on the war path, and he accompanied several expeditions against them. Then he began his plans to build Marble Falls, liking the location because of the falls in the Colorado river at that point and the natural dam. Thus the "Blind Man's Town," with its fine water power plant and factories, became a reality.

The general, though living at Burnet, a short distance from Marble Falls, takes great interest in the welfare of the projects begun by him, and is still planning new enterprises.

COOKE STATUE IN DULUTH

There was unveiled at Superior street and London road, Duluth, Minn., recently this statue of the late Jay Cooke, who has frequently been referred to as the "Father of Duluth." The statue was presented to the city by J. Horace Harding of New York and is the work of Henry M. Shrady.

Japanese Girls Stop Smoking

Women's Influence Slowly Approximating That of British and American Women.

DISCARD SANDALS FOR SHOES

City Population of Japan Increasing Thirteen Times as Fast as That of Country—Million Men Engaged in Factory Work.

Honolulu, T. H.—A unique feature of the gradual rise of women's influence in Japan, until their position is now slowly approximating that of American and British women, is that they are giving up smoking, just at the time when great comment has arisen over the increase of smoking among their sisters in America and England.

The subject was discussed by Dr. T. H. Haden, dean of the theological departments of Kwansei Gakuin, a mission college in Japan, who attended sessions here of the Pan-American educational conference as one of the empire's representatives.

"Formerly all classes of women in Japan smoked in public as well as in their homes," Doctor Haden said, "The influence of the West has almost stopped this custom, although it is to the interest of the government to foster it, as tobacco is a government monopoly."

New Word for "Home" Coined.

Doctor Haden said that a new word for home—"katei"—has been coined in Japan to express the meaning and idea of home life in Western civilization as is being learned by the Japanese.

"The changing conditions of Japanese women is only begun, but it is proceeding with a rapidity and intensity which are very significant and hopeful," he said. "The Japanese language has a word expressing house and household, but they had no conception of home life in the Occident, where women are on an equal footing with men. This is now expressed by 'katei,' with the new appreciation of home as a thing to be shared by husband and wife and the gradual rise of the Japanese women to the position of their American and British sisters."

Doctor Haden said that the city population of Japan is increasing 13 times as fast as that of the country, due to the change of industry from agriculture to manufacturing. More than 1,000,000 are engaged in factory work and more than one-half of these are under twenty years of age, he said.

Women Discard Sandals for Shoes.

"A significant and interesting indication of the change in progress in Japan now," said Doctor Haden, "is the fact that, while the Japanese women retain the kimono as their chief attire, they have discarded the obi—the folded square of cloth worn on the back—and over their kimonos many of the women now wear a full, divided skirt, which ties around the waist with a wide sash hanging at the side. Many of them also wear shoes instead of their sandals.

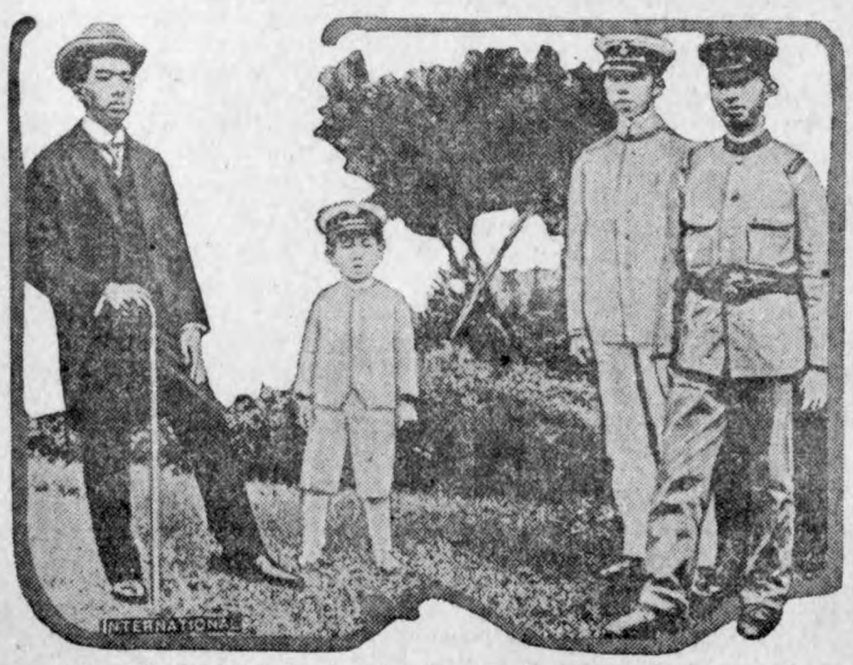
"Divorce laws also have been revised in accord with other transitions. Formerly a man could send his wife back to her parents without excuse or explanation. This act constituted legal freedom for him. Now he can only divorce her for infidelity or by agreement with her. The woman as yet has no recourse against the infidelity of her husband, not even though he bring a concubine into the home, as frequently has been done.

"The example of Americans, their homes and schools in Japan, gradually has altered the hearts and feelings of the Japanese until now they have been induced to effect these changes."

Farming in Iceland.

Iceland counts farming as one of her leading industries. She excels in sheep-raising and in dairying. Iceland exports about $270,000 worth of butter in a year.

Four Sons of Emperor of Japan



One of the most interesting photographs received from Japan is this exclusive one showing for the first time the four sons of the mikado of Japan. Aside from the interesting fact that it is the first photograph showing the four princes together, it is the first time the Crown Prince Hirohito (left) has been seen in Japan wearing European clothes. The picture has the official release of the department of the imperial household of the imperial court of Tokyo. From left to right: Crown Prince Hirohito, Prince Sumi-no-miya, Prince Takamateau-no-miya, and Prince Atso-no-miya.

NEWS REVIEW OF CURRENT EVENTS

Conference May Agree on Naval Armament Reduction Plan Within a Few Weeks.

HUGHES' PROGRAM APPROVED

Suggested Minor Modifications Are Being Discussed—China Pleads for Recognition as Independent Nation—League Council Gets After the Serbs—Progress on Tax Revision Bill.

By EDWARD W. PICKARD.

IT APPEARS that the prophets in Washington were all wrong. The great conference seemingly is going to reach and sign an agreement on limitation of naval armament without waiting to settle the problems of the Pacific and the Far East. This tendency is a result of Secretary Hughes' downright action in laying before the conference in its first session the American proposal as to navies. Briefly, that proposal is that the United States, Great Britain and Japan agree to suspend naval construction for ten years, and during the succeeding ten years build only for replacement; that all uncompleted capital ships and many other specified capital ships be scrapped at once; that the aggregate capital ship tonnage be limited to 500,000 each for England and America, and 300,000 for Japan; that the sea power of the three nations be maintained on this basis. There are other features of the program, but everyone is familiar with it by this time.

The conference, and the world, were at first astounded by this unexpected laying of the American cards on the table, and then the plan was greeted with loud and universal acclaim. The delegates of the other nations could not, if they would, refuse to indorse it, and at the second open session Great Britain, Japan, Italy and France, formally accepted it "in principle," with minor modifications. These, as set forth then and later, were as follows:

By Great Britain—Limit size and tonnage of submarines; permit construction of one capital ship a year during ten-year period to retain shipyard facilities; permit retention of more light cruisers and gunboats to police the high seas; reduction in number of naval ship building yards.

By Japan—Increase of Japan's naval strength to 70 per cent of British and American; cessation of construction of naval bases and new fortifications in the Pacific.

By France—Allowance of eight capital ships to safeguard French colonies.

By Italy—Allowance of six capital ships to protect Italian interests.

A committee, of which Col. Theodore Roosevelt is chairman, set to work at once to study the plan and proposed modifications, and by the end of the week it was predicted an agreement would be reached within two or three weeks. Among the American experts there was considerable opposition to the British suggestions, and the Englishmen dropped the idea of one battleship a year.

Japan's proposition that there be no more naval bases or fortifications constructed in the Pacific was expected, and perhaps proves a bit awkward for the United States. It means the abandonment of work and plans in the Philippines, Dutch Harbor and elsewhere which have been considered most necessary for the safety of our possessions in the Pacific if not for that of our Pacific coast. But if Mr. Hughes' general program is accepted by the other powers it would seem the United States cannot well decline to accept this plan of Japan. In the ship-scrapping proposal America has been most unselfish and perhaps she can afford to be as generous in other matters.

WHEN the time came to put forward plans for settlement of the problems of the Far East none of the great powers seemed ready with a program. But China, whose status is the crux of the situation, set before the committee on far eastern affairs the demands of the Asiatic republic. Dr. Alfred Sze, head of the Chinese delegation, was the spokesman and he held a preliminary conference with American officials and in his demands followed their advice in all except one point—the creation of a permanent court of arbitration in the Far East. China asks respect for her territorial integrity, restitution of seized provinces and regions, abandonment of special rights, monopolies, privileges and extraterritorial rights, and withdrawal of foreign troops from her soil and permission to direct her own domestic affairs and govern her own internal and foreign policies. She does not demand that all foreign monopolies and privileges in China be abandoned at once, but that she be given a chance to put herself on a level with other powers and that as time goes on and conditions warrant the economic and political fetters on her be loosened.

The British delegation approved the Chinese demands in general, especially the open door policy and the abandonment of "spheres of influence." The Japanese, it was understood, accepted the Chinese program in principle but would insist that withdrawal of interest in China should include all foreign powers. The Chinese delegates say they make their demands in behalf of all China, including the southern part where Sun Yat Sen holds somewhat precarious sway, and that Manchuria, inner and outer Mongolia, Tibet and Turkestan are included in "the Chinese republic."

It is believed one result of the discussion of China's program may be the friendly abandonment of the Anglo-Japanese alliance, and the British would be glad to see this source of trouble replaced by some form of agreement by the great powers.

FRANCE, as has often been pointed out, is especially interested in the matter of reduction and limitation of land armament, and Premier Briand took the lead in this, though he had no concrete plan nor any working agreement with the United States delegation. In his speech he discussed the military situation in Europe, particularly as it effects France, set forth the number of men under arms in the various European countries and made plain the menace of the Red forces, especially in Russia. Nor did he neglect to call attention to France's peril from Germany which, he noted, is a nation of 65,000,000 while France numbers but 35,000,000. It is plain that the French will not consent to plans for radical military armament reduction until the Russian and Teutonic threats are removed.

OVER in Europe the League of Nations feels that its authority is being flouted by Jugo-Slavia, and it has determined to show that it can stop a war. Therefore it advanced the date of its Paris meeting and took up the matter of the invasion of Albania by the Serbians. The latter had been ordered to get out of Albania and to observe the boundaries of that state as established by the allied ambassadors, but in effect, at least, they disregarded both demands. They did, however, disown the troops in Albania, claiming they are irregulars over which their government has no control. Meanwhile those "irregulars" are said to be threatening Tirana, the Albanian capital, and the situation is about the same as at Vilna where the league scored a failure.

KARL and Zita, ex-rulers of Austria-Hungary, have been landed on their island of exile, Madeira. Portugal consented to care for them there but the expenses, reckoned at about $80,000 a year, will be paid by the states which formerly made up their empire if the plan of the council of allied ambassadors is carried out.

PRESIDENT Harding last Monday signed without any ceremony the proclamation of peace between the United States and Germany and there is much debate as to whom he will select for ambassador to Berlin. First choice among the guessers is Congressman Alanson B. Houghton of Corning, N. Y. He was born in Massachusetts fifty-eight years ago, graduated from Harvard and the universities of Gottingen, Berlin and Paris, and speaks German and French.

Next January Germany is due to pay a reparations installment of $100,000,000, and in February a quarterly payment of about $60,000,000 on exports. Her financial experts are wondering where it is to come from and the allied reparations commission in session in Berlin is working over the problem. The commission believes the Germans can raise the money for those two payments and urge them to do so as a show of good will. There was reason to believe that if they did, the French delegates would consent to grant concessions for the rest of the year. The commission rejected a plan of the industrial leaders of Germany to pawn the country's industries as a guaranty for the reparations payments; instead it suggested that the industrial interests make sacrifices for their country instead of trying to profit from its misery.

That Germany is miserable in some respects is made evident by the rise in Berlin caused by the increasing cost of foodstuffs. Many shops were looted. High prices, of course, are caused by the decline of the mark.

ULSTER still stands firmly, or stubbornly, as you choose to look at it, in the way of settlement of the Irish trouble. Craig and his cabinet after studying the English plan, rejected it as unfair to their part of the island and offered some kind of substitute. This the British cabinet in turn rejected, and an exchange of notes between Lloyd George and Craig left the status unchanged. The Ulsterites reiterated their determination not to submit to anything considered a violation of Ulster's rights. The British premier's stand was strengthened by the action of the Unionist party in convention in Liverpool. The Irish negotiations are dragging on so that Lloyd George may have to abandon his contemplated trip to Washington to take part in the armament conference.

THE congressional conference committee on the tax revision bill has been ironing out the differences between the house and senate measures with considerable rapidity, both sides making concessions. One of the important actions was the elimination of the house bill provisions for the exemption of foreign traders and foreign trade corporations. On Thursday the conferees suspended their meetings to allow the house to vote on the question of surtax rates. The senate had fixed the maximum rate at 50 per cent and the house at 40 per cent. The "insurgent" Republicans of the house were determined to carry through the senate plan so the leaders turned to a compromise. Just before the house met President Harding took a hand in the affair by informing the house conferees that a maximum surtax rate of 40 per cent would be agreeable to the administration.

The house, however, by a vote of 201 to 173, instructed its conferees to accept the 50 per cent rate.

THE week in America was not without its serious labor troubles—a few weeks are. The garment workers of New York went on strike in protest against the restoration of the piece work system. Their leaders said most of the 60,000 workers quit but the employers asserted that 40 per cent of the workers had refused to go out.

In Chicago there was a short but lively strike of the teamsters accompanied by some violence. The men refused to accept a wage cut of $4 a week ordered by an arbiter and accepted by the union officials. After being out two days they returned to work with the understanding that they should have a rehearing before the arbiter.

Alexander M. Howat, for twenty years a leader of the Kansas miners and now their president, was expelled from the United Mine Workers of America for his refusal to obey the order of the international officers to end the strike in that state. About 4,000 Kansas miners also were suspended from membership. Howat and his crowd have fought uncompromisingly against the Kansas industrial court. The Colorado Fuel and Iron company's miners in Colorado struck and state troops were called out.

HAS BOUT WITH AN ELEPHANT

Big Game Hunter Has Exciting Experience in Africa.

J. Morewood Dowsett Is Surprised When Big Beast Turns and Runs Away After Downing and Trying to Trample Him.

London.—A good elephant yarn is told by J. Morewood Dowsett, a well-known big game hunter, who has just returned from a hunting trip in South Africa.

He was hunting elephants in Uganda when information was brought him of the whereabouts of a large herd. With a native chief and a house boy, he started to find them. The party came upon the herd in the forest. Mr. Dowsett got several photographs within 20 yards of the beasts when the chief warned him that they had been "scented" and that the animals were coming for them. Snatching up his rifle Mr. Dowsett shot and killed the leader, a big bull.

While some surrounded their leader many of the beasts stampeded, and, running the wrong way, Mr. Dowsett was cut off from the party. Reloading his gun, the hunter dashed off for safety and ran into a big bull elephant which crashed through the bush six yards in front of him.

Trunk aloft, ears extended and trumpeting wildly, the beast rushed at Mr. Dowsett and swept him to the ground with his trunk and turned rapidly in its own length ready to trample him.

The hunter took a flying dive under the monster's belly, realizing he would then be on the right side of the wind, but the beast turned rapidly round and again tried to trample him. Instead the animal rolled him over and over with its legs and the hunter saw above him the two great tusks as the beast tried to manœuver his body into position and pick him up. Mr. Dowsett managed to roll behind the animal and get to his feet and make a rush for cover. To the hunter's relief and surprise the furious beast set off in the opposite direction and disappeared.

300 Years Total Ages of 4 Women Diners

Middletown, N. Y.—Four women whose combined ages aggregate 300 years have just enjoyed a guinea hen dinner at Bloomingburg, Sullivan county, talking over old times, people and places.

They are: Mrs. Salter, seventy-one; Mrs. Evans, eighty; Mrs. France, seventy, and Mrs. Mills of Hawthorne, N. J., seventy-nine.

The dinner was cooked by Mrs. France, the menu consisting of guinea hen, spinach, boiled onions, cabbage, salad, apple pie, cheese and tea.

The SANDMAN STORY

IMPATIENT ROBIN

IN had started too early from e South that year. His little ife told him so, but he would ren. "I suppose you want all e locations to be taken when ive," he said to her.

hey arrived one morning, and the sun was shining, the air illy, and poor little Mrs. Red-

She Returned That Afternoon e Smelled Something Burned.

sat shivering on a limb of a huddled against the trunk, while rd and master sat on the end of nch singing lustily.

hat did I tell you?" said Robin. re not a bit too early; and now find a home."

was some time, however, before arm spring days came, but they nd with them the blossoms and the leaves, and then the fruit began to grow—cherries and apples and berries and all the things that the robins like to eat.

Robin was impatient. He wanted a nice cherry pie, and when his little wife told him the cherries were green and hard he began to scold.

"My mother used to make the best cherry pie I ever ate," said he, "and I know she used to use them when they were hard, because I used to stone them for her."

"Stone them!" exclaimed Mrs. Robin with wide-open eyes. "Whoever heard of stoning cherries for a pie? My mother never did. What did she do with the stones—make a soup?" inquired Mrs. Robin in rather a sarcastic tone of voice.

"Yes, she made a soup, now I come to think about it, and that cherry-stone soup was the best I ever ate?" replied pert Mr. Robin, thinking that was a clever idea.

"Well, will you make a cherry pie today?" he asked.

"But, Robin, the cherries are not fit to use yet," pleaded Mrs. Robin, fluttering about at the very thought of such a thing.

"All right, I'll make one myself," said Robin, bristling his feathers. "I can make a pie as well as anyone."

"All right, make one," said Mrs. Redbreast; and off she flew.

When she returned late that afternoon everything was covered with flour—even Robin's bill and wings—and a strong smell of something burned was in the air.

"I made that pie all right," he said, nodding his head toward the pantry, "but I did not say I could bake one. I guess it is a little overdone, but the inside is all right, I am certain."

On the pantry shelf stood a pie almost as black as Johnny Blackbird's coat, but Mrs. Redbreast did not make any remark. She looked around the kitchen and asked: "Where is the cherry-stone soup, Robin? I declare I am quite hungry for some."

Robin rubbed his bill and stood on one foot and then on another. "Well, I do not seem to remember about that soup, after all. I guess I was mistaken. It was applecore soup she used to make instead of cherry-stone," he said.

"I am glad there is one thing I can make that your mother did not know about, for if you once had tasted cherry-stone soup you would never forget it," replied Mrs. Redbreast.

"Now, you fly out and sit on a limb and sing a while, and I will call you when I have the soup ready. Where are the stones?"

Robin brought a basinful of stones, eyeing his wife all the time, but she looked so wise and knowing that he did not ask any questions or venture to give advice. In fact, he had done all the cooking he wished to do, and gladly flew out to sit on a limb and sing.

Robin spread the fame of his wife's cherry-stone soup far and wide, and the little wives came to call on Mrs. Redbreast, all in a flutter to get her recipe for the wonderful soup.

Then they all flew home to make a cherry-stone soup just as Mrs. Redbreast had cooked it, which goes to prove that all wives stick together when it comes to managing a husband.

Mary Pickford

The most popular "movie" star, Mary Pickford, looked like this a few years ago. It was in the days before she even dreamed of a future in film pictures. The picture shows her as she appeared when playing a small part back in 1903 in "The Fatal Wedding."

IN THAT CASE

She: It must be embarrassing to be baldheaded.

He: Well, I don't know, it would be if a girl wanted a lock of your hair.

MISGIVINGS

Young Turkey Gobbler, with highly arched head,
Looked at his mates gathered 'round;
"Tomorrow's Thanksgiving," he earnestly said,
"And not one of us must be found;
For I heard the farmer tell his wife
That he would only kill three—
And all the while he sharpened his knife
He kept his eye on me."

—LESBIA BRYANT

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

CLEAN FACES.

DID you ever stop to think how much a man is judged by the state of his beard? One of the quickest ways for the man who appears to be self-respecting, efficient and well-bred to make himself look inefficient, irresponsible and uncouth is to let his beard go for a few days. The appearance of being always close-shaved and well shaved does much for the way others judge a man.

Men who have been at the front in camp know how important to their own feeling of self-respect the facilities for a good shave really are, and wherever possible the boys in training or in action were expected to keep well shaved. It is said that Caesar insisted that his soldiers be closely shaved but his reason for thus insisting was for fear the Teutonic barbarians with whom they fought would seize them by their beards in combat if they neglected shaving too long. It is said that one of the many reasons why the Roman soldiers had such a decided advantage was that they had no beards with which to be seized by their adversaries.

It has usually happened before this that after a war beards came into fashion, because the men in camp had so little opportunity for a daily shave that they soon found it more convenient to raise beards which needed little or no attention from the barber. After the Civil war lads scarcely in their twenties came back with long beards, and naturally enough beards became the fashion. At various times in England long mustaches became the fashion because they were affected by military men. There was a time in England when only officers were allowed to wear mustaches, so that wearing a mustache was associated with the possession of rank and distinction and hence mustaches became highly favored. As soon as a private left service he raised a mustache just because he had never been allowed to do so before.

Among the ancient Hebrews and in other countries in days gone by the beard has stood for virility and manliness and a man would have felt dishonored if he had had to shave his beard. In Syria and Egypt, it is said that beards really served a purpose in protecting a man from the burning sand of the desert, so it was indeed a calamity to be deprived of this adornment.

SHOCKING

Bug Health Inspector—I shall have to report this to the health board. The water in this well is fearfully dirty.

"What's in a Name?"

Facts about your name: its history, meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

GLADYS.

THOUGH popular in the chorus and frequently in use as the heroine of popular fiction, where dys de Montmorency was considd the height of feminine elegance, dys comes from a dignified old Ro- family, the Claudian gens. The ndii gained much fame in early ne and figure in most of the tragee of the city, and the Emperor udius, through his conquests in Britain, spread his name throughout Europe.

The first feminine Claudia, was the daughter of a British prince who sent her greetings to St. Timotay in St. Paul's epistle. The masculine form, Cladus, or Gladus, as it was sometimes spelled, became popular in England and was taken over by the Welsh, who are responsible for the feminine Gladys.

Gladys came to be considered the equivalent for Claudia and as such was reverenced, but her name never achieved the popularity of its equivalent because of its harsh sound. Though recognized as Gladys it was more often given in baptism as Claudia, or Claudie, as the French call it.

France rejected Gladys completely, preferring the softer Claudine, and Claudie, while Italy and Spain chose Claudia, leaving Gladys completely to English use, whence it was brought to America and allowed to flourish unmolested and non-confused by Claudia.

Agate is the talismanic gem assigned to Gladys. It is said to avert peril from its wearer, to give her courage and a large degree of charm. One old legend contends that her every wish will come true when she wears this gem. Tuesday is her lucky day and 7 her lucky number.

"THEY DARED ALL"

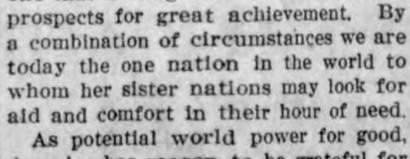
Pilgrims Never Daunted by the Perils of the Sea.

Buoyed Up by Faith, Their Difficulties and Dangers Were Met But to Be Overcome.

"These troubles being blowne over, and now all being compacte togeather in one shipe, they put to sea againe with a prosperous winde, which continued diverce days togeather, which was some incouragmente unto them." So does William Bradford, in his history "of Plimouth Plantation," record the final setting out of the Mayflower from Plymouth on September 16, 300 years ago. It is with this passage that he opens his ninth chapter, that wherein he deals "of their vioage, & how they passed the sea, and of their safe arrivall at Cape Codd." In many ways it is one of the most interesting chapters in one of the most interesting books in the language. For although details are few, and the narrative, as ever, is calm and matter-of-fact, it presents just those essentials which enable each one to fashion for himself a satisfying picture of his own.

The first impression to be gained from the record is, perhaps, one of the great labor and great slowness of this passage of the sea. At first there was the fair wind and a clear sky, and if there was some sadness as the coast of Devon was finally lost to sight in the September mist, there was much thankfulness, too, and joyful looking forward, and, as Bradford puts it, "some incouragmente." The high seas in 1620 were, however, not hospitable to the little Mayflower. Three hundred years ago she was still plowing her way westward, with the long-looked-for land still hundreds of miles ahead. Nevertheless, the worst of her troubles were over, for it was about mid-Atlantic that, with the fair winds and weather of her setting out almost forgotten in the storms that had followed, the Mayflower came so near to turning back once more toward England. For days she had been tossed about and buffeted with cross winds and "many fierce stormes." Her upper works were leaking, and one of the main beams amidships was "bowed & craked." The whole ship, indeed, "was shroudly shaken," and there was some fear that she would never be able to perform her voyage.

A serious consultation was, therefore, held between the pilgrims and the master and his crew, and some were for returning rather than cast themselves into "inevitable perill." But, in the end, when the master declared he was sure of his ship below her bearings, and the ship's carpenter declared that he could make her sound above, the seamen, faced with the fact that it was as far back to England as it was to America, consented to go forward. And so, with the help of "a great iron scrue" which one of the pilgrims had brought with him from Leyden, the beam amidships was crowded back into its place, the decks were recalked, and then, taking care to carry no great press of sail, the Mayflower, once more, addressed herself to the storm. For the storms still continued, and often the little boat had to lie to for days together, unable to "beare a knote of saile." But, at last, it was over, and on the morning of November 20th, more than two months after leaving Plymouth, there came, at daybreak, the welcome call of "Land ho!" Or, as Bradford puts it, "after longe beating at sea, they fell with that land which is called Cape Cod; the which being made & certainly knowne to be it, they were not a little joyfull."



LIFTED ABOVE ALL NATIONS

Surely Americans Have Abundant Reasons for Giving Thanks to the Bestower of Our Blessings.

The history of Thanksgiving day has been told innumerable times in song and story, from pulpit and platform and in the press. From the time of its first celebration 300 years ago men and women and children of this nation have heard the message of the serious purpose of this commemorative day. No less mindful than were our fathers are we today of the sacredness of its purpose.

True, in days gone by it was a much more simple event. In the early days of its origin, a little settlement here and another there rendered thanks to the Deity for the blessings they felt He had bestowed upon them And they were simple blessings for the most part. Gratitude for the gifts which Nature had handed them; rejoicing that in an alien world they were none the less happy and contented—these were the returns for which they gathered in family groups to give thanks.

Nature has not withheld from us this year her customary bounty. Our harvests have been gratifying; we do not in this regard lack cause for rejoicing. Nor indeed is our present state in matters that do not pertain merely to harvests and fields of grain, one that is altogether without splendid prospects for great achievement. By a combination of circumstances we are today the one nation in the world to whom her sister nations may look for aid and comfort in their hour of need.

As potential world power for good, America has reason to be grateful for the privileged position it holds among her sister nations. That is at least one cause for national thanksgiving.

No Getting Away.

GIVE THANKS FOR ALL

Thanksgiving, Lord, Thanksgiving!
For the blessings of our days;
For the joy that sings through homely things
In the common trodden ways.
For life and love and plenty,
For laughter and for tears;
For Thy wise plan of good to man.
Thanksgiving through the years!

Thanksgiving, Lord, Thanksgiving!
For thy bounty unto us
For the gracious yields of ripened fields
That are so marvelous.
For the summer's golden promise
That the fruitful autumn bore,
Thy people raise the voice of praise—
Thanksgiving evermore!

Thanksgiving, Lord, Thanksgiving!
For all Thy ships at sea
That bear afar the brave tnat are
In service unto Thee.
Thanksgiving, Lord, Thanksgiving!
For Thy hosts in ev'ry clime
And ev'ry land, where'er they stand,
Thanksgiving through all time!

—ESTHER CLARK HILL

Thanksgiving Lore.

To entirely prepare a Thanksgiving dinner is a sign that you will have a house of your own before another Tharksgiving.

SO WEAK SO NERVOUS

How Miserable This Woman Was Until She Took Lydia E. Pinkham's Vegetable Compound

Toomsboro, Ga.—"I suffered terribly with backache and headache all the time, was so weak and nervous I didn't know what to do, and could not do my work. My trouble was deficient and irregular periods. I read in the papers what Lydia E. Pinkham's Vegetable Compound had done for others and decided to give it a trial. I got good results from its use so that I am now able to do my work. I recommend your Vegetable Compound to my friends who have troubles similar to mine and you may use these facts as a testimonial."—Mrs. C. F. PHILLIPS, Toomsboro, Ga.

Weak, nervous women make unhappy homes, their condition irritates both husband and children. It has been said that nine-tenths of the nervous prostration, nervous despondency, "the blues," irritability and backache arise from some displacement or derangement of a woman's system. Mrs. Phillips' letter clearly shows that no other remedy is so successful in overcoming this condition as Lydia E. Pinkham's Vegetable Compound.

LIBERTY TOWNSHIP NEWS

Rev, G. H. Wessel, of Burt, is assis ting Rev. Bergman with a series of Revival meetings at the Liberty Twp

The local "Baby Overland" of Liberty Twp. had an important mission to preform Sunday evening, namely; A trip to the County Seat.

Milton Schaper, ctudent of Morningside College accompanied by four of his school mates who live in neigh boring towns, autoed from Sioux City to visit relatives and friends in this locality on Thanksgiving day.

The Basket Social that was held at the Tanner School on the evening of Thanksgiving was well attended. In fact the house was crowded. A good program was given after which a large number of baskets were auct ioned.
Church.

WATCH THE STORAGE BATTERIES

In storing a tractor or auto for the winter be sure that the storage battery is either in condition to withstand freezing or remove it from the machine. A fully charged will not freeze readily and if batteries are left in place through the winter, the engine should be started occasionally so that full charge is maintained.

Money Spent In Repairs Now

Is good money saved;

Don't wait until winter actually sets in before you make the repairs about the house that you know now should be made.

It is cheaper to have the work done now than to wait. Run over in your mind the little jobs around the house you should have a carpenter do and then talk to us.

We'll be glad to figure with you on the amount of material you need and can put you in touch with a carpenter who will do the work for you.

NORTHERN Lumber Company

Give us the Old Time Calico Test On These Values

You've heard your grandmother tell of chewing calico to tell if it was fast color.

You are at liberty to make the same test on these **$32.50** suits and overcoats.

See them--see others--then go home--put your wisdom teeth to work--talk it over--sleep it over-- and in the morning you'll wake up to the fact that the bouquets we are throwing at ourselves are REAL-- aud that the values we are offering you are if anything Better Than We Are Listing Them.

The same applies to underwear--sweaters and all men wear.

SOMETHING TO THINK ABOUT

By F. A. Walker

AS YOU THINK.

THE lovely or homely lines on your face, the expression in your eyes, the curvature of your lips and in fact every visible lineament on your features, is but an outward sign of glimpses the soul and senses the soul's deceit and wickedness.

A thoroughbred dog has the same innate instinct.

At the sight of a hard face, the bristles on the dog's back will rise as he sniffs, steps warily and utters a resentful growl.

* * *

The thoughts that are yours, those that predominate, shape and compel your acts, govern your words and the intonation of your voice, light your eyes and color your cheeks, slowly and surely trace their indelible lines on your face, that wise creatures may read them with unerring certainty.

If thoughts be ugly, the face will be ugly, and you, yourself, will be as you think, in spite of artifice and diligently polished manners.

Upon the other hand, if thoughts be sweet, pure, charitable, kindly and noble, there will be perpetually shining on your countenance a glorious halo, beautiful and inspiring to behold.

The child will not turn from you; the dog will not growl at your approach; the old and maimed will smile upon you, and so will the world.

Wherever you may go you will be gladly received.

In whatever position in life you may be, whether lowly or exalted, you will find warm hearts and kindly people, because you are warmhearted and kindly, and have within you the "vital spark of heavenly flame."

Uncommon Sense

By JOHN BLAKE

ENERGY IS CAPITAL.

A LAKE cannot turn a turbine, though it contains more water than a cataract.

All the knowledge you can accumulate in a lifetime will do you no good unless it can be translated into energy.

The difference between doers and wishers in this life is a difference of energy.

The reason you see so many men succeed whom you know to be no better fitted mentally than failures of your acquaintance is because the successful men are energetic.

Energy is the driving force behind everything that is done.

All of us have some of it, or we could not live.

Those who have a great deal usually get along, unless they constantly misdirect it.

There are, of course, energetic people who never get very far. But even they get farther than they would if they were content to sit still.

If the maxim, "Everything comes to him who waits," were amended to read, "Nothing comes to him who waits," it would be true.

As it stands it is one of the most misleading and dangerous falsehoods in existence.

Your energy is your capital. Use it wisely and economically and it will pay you an almost usurious rate of interest.

Half use it, or waste it on things that are of no value and you will just about make a living, which is a thing which no man of ambition wants to do.

Education teaches us to use our energy profitably. An educated man can, or should, get more out of the same amount of energy than an uneducated man, exactly as a turbine gets more out of a column of falling water than the old-fashioned overshot wheel.

Yet the energy must be there, or the education must be useless. There must be driving force which will apply what you have learned to your problems. Nothing important was ever accomplished by education alone.

If you haven't got energy, cultivate it. Put your health in good condition and your physical energy will improve, and with physical energy you will gain mental energy.

Be careful how you use both. You can't settle a business tangle if you have been playing tennis all the morning. The exercise will use up the energy that ought to be expended on the job. Your brains can't use what your muscles have used already.

Energy is always capital, but it must be well and prudently invested.

Take care of yours. Add to it by care of your health and by abundant mental exercise. Then expend it on important matters, and don't be afraid to expend it liberally. It is one thing of which the more you spend the more you will have, provided, of course, it is not foolishly wasted.

DAIRY FACTS

SUCCULENT FEED FOR COWS

Dried Apple Pomace Does Not Cause Decrease in Milk Flow Nor Yield of Butterfat.

(Prepared by the United States Department of Agriculture.)

Dried or "evaporated" apple pomace as a succulent feed for the dairy cow is the subject of a preliminary report from the bureau of chemistry and animal industry of the United States Department of Agriculture based on an experiment to determine the feeding value of dried-apple pomace, especially its suitability as food for cows in lactation. Preliminary results are reported because of a large number of inquiries on the subject.

The text of the report follows:

It appears there is a belief among dairymen that the dried product has a tendency to cut down the milk flow, or even cause cows to go dry, although apple pomace fresh from the cider press is generally recognized as being a good succulent feed for milk cows. To test the soundness of this belief a feeding trial has been carried out by the department. Only one cow was used in this test, and the total quantity of dried pomace fed was less than 400 pounds; therefore it must be borne in mind that the results obtained, while indicative, cannot be accepted as conclusive.

In this feeding trial the dried-apple pomace was fed wet and its feeding value compared with that of corn silage, since it is intended to be a succulent feed. The pomace was prepared by adding to the dry material three times its weight of water several hours before feeding, thus producing a feed similar in water content to that of corn silage.

For a period of 30 days the cow received a balance ration consisting of grain, hay, and corn silage. The silage was then replaced by the apple pomace for a similar length of time, following a ten-day transition period for the change in diet, and after a like transition period at the end of 30 days the original ration containing silage was resumed and continued for a third 30-day period.

The quantity fed—36 pounds of wet pomace per day—was such that the total dry matter in the pomace equalled the weight of dry matter in the silage replaced. The quantities of grain and hay fed remained practically constant throughout the whole experiment.

While the data obtained are not sufficient to warrant the drawing of final and definite conclusions, the indications are that no bad effects follow the feeding of dried-apple pomace. There was no decrease in the milk flow nor in the yield of butterfat.

When fed as described the dried pomace appeared to be equal, pound for pound of dry matter, to good corn silage as a succulent food for this dairy cow. Owing to the property which it possesses of absorbing large quantities of water and swelling, it should never be fed dry, but should be allowed to soak in water for an hour or so before feeding. The pomace appears to be a palatable feeding stuff.

Caution is advised in feeding dried apple pomace, as there is a possibility that the feeding of large quantities, or of quantities containing excessive amounts of apple seeds, might prove injurious. It appears to be safe, however, to feed as much soaked pomace by weight (one part dried pomace to three parts water) as it would be to feed the same amount of pomace fresh from the cider press.

Dried Apple Pomace Appears to Be Palatable Feeding Material for Cows.

Genuine BAYER ASPIRIN

Never say "Aspirin" without saying "Bayer."

WARNING! Unless you see name "Bayer" on tablets you are not getting genuine Aspirin prescribed by physicians over 21 years and proved safe by millions for

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

DEADLY WEAPON OF SAVAGES

African Tribes Use Poisoned Arrows Which Inflict Death That Is Instantaneous.

The most effective weapon of the Masai and Andorobo is the arrow which they poison with the Acanthera schimperi, a small tree, according to a National Geographic society bulletin. They boil the leaves and branches until the mixture becomes thick and pitch-like in appearance, and place it on sheets of bark which they hide high on the branches of trees away from children until it is needed. When an animal is shot with an arrow dipped in the poison it dies almost immediately. The natives cut out the flesh around the wound as soon as possible and throw it away. The remainder is eaten and the blood is drunk. This love of blood as an article of food is common among many African tribes, several of them going so far as to bleed their cattle and drink the blood hot or mix it with their porridge.

Speaking His Mind.

"Is it true that America is the land of opportunity?"

"There is no doubt of it," replied the disgruntled citizen. "I don't know of another country on the face of the earth where a man has greater opportunity to make a fool of himself in politics."—Birmingham Age-Herald.

Literally Speaking.

"Does a bootlegger actually carry liquor in his boot?"

"I dunno," answered Uncle Bill Bottletop. "Though I must admit that some of the stuff does taste that way."

MOTHER! MOVE CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Hurry, mother! Even a sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to move the bowels. A teaspoonful today may prevent a sick child tomorrow. If stipated, bilious, feverish, fretful, cold, colic, or if stomach is sour, tongue coated, breath bad, remember good cleansing of the little bowels often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get imitation fig syrup.—Advertisement.

SMITHERS AND THE LIVERS

Synonymous Symposium That Resulted in a Change in the Customs of Many Years.

Smithers sat slyly sipping slivers of liver into his mouth. Smithers always had livers for dinner. And he devoured his livers in small slivers.

Suddenly a frown came over his face. "Garcon!" he demanded.

Smithers was proud of his French accent.

The waiter slipped softly to his side.

These livers are not cut into small enough slivers."

The waiter became confused. He made all apologies; in fact, he was one big apology.

"Monsieur Smithers wants his slivers in smaller livers."

"No! No! I want my livers in smaller smithers."

"You mean your slippers in slivered livers?"

"No! Smithers livered in slithered slippers."

"Oh! Slivers of slithers smithered slippered livers?"

"No! I say slippered slivers in smaller smithers."

"Oh, yes, smithered slippers of slippered slithered livers."

Smithers changed a custom of years. "Bring me a kidney," he croaked.—Harvard Lampoon.

There is nothing slow about some fellows until you want them to pay back a loan.

LYRICS OF LIFE

By DOUGLAS MALLOCH

THE TWO CAPTAINS.

ONE captain went clear through the war
And never struck a blow;
He came home with a perfect score—
A perfect letter O.
Citations never mentioned him,
For, neither good nor bad,
He came home safe in life and limb—
But that was all he had.

'Twas Captain Go-and-Do, the man
Who served his flag in France;
And well and wisely he could plan
Just how men should advance.
As brave as any soldier true,
No fight he ever won—
He didn't know that Go-and-Do
Gets very little done.

Another captain came back home
With honors that they gave,
Came proudly sailing o'er the foam,
The idol of the brave.
(No braver man than Go-and-Do)
They hailed him Marne to Metz—
The other captain of the two
Was Captain Come-on-Lets.

The war is over, industry
The soldier now demands;
And yet the fate of nations we
Still carry in our hands.
O captains of the battle new,
When business duty frets
Are you a Captain Go-and-Do
Or Captain Come-on-Lets?

SCHOOL DAYS

A Thought for Today.

The good man prolongs his life; to be able to enjoy one's past life is to live twice.—Martial.

MOTHER'S COOK BOOK by Nellie Maxwell

He who would bring home the wealth of the Indies must carry the wealth of the Indies with him, says the Spanish proverb. So it is in traveling; a man must carry knowledge with him if he would bring home knowledge.

TWO POUNDS OF ROUND STEAK.

WITH two pounds of round steak and meat stock the following dishes may be prepared:

Rice Supreme.

Cook one-half cupful of rice until tender and drain. Melt two tablespoonfuls of butter, add two tablespoonfuls of flour, and when well blended add one cupful of beef stock and stir until thick. Add the cooked rice, one chopped green pepper, one teaspoonful of salt and one-half cupful of cheese. Serve as soon as the cheese is melted.

Meat Souffle.

Melt three tablespoonfuls of butter, add three tablespoonfuls of flour, and when well blended add one-half cupful of milk. Cook until smooth, add two tablespoonfuls of onion, finely scraped, one teaspoonful of salt, a little pepper and when thick add three beaten egg yolks and one cupful of chopped meat. Fold in the stiffly beaten whites and bake one-half hour in a moderate oven. Serve with

Yellow Sauce.

Make a white sauce, using two tablespoonfuls each of butter and flour; when well blendid add one cupful of milk, one-half teaspoonful of salt, one-eighth of a teaspoonful of pepper and one egg, slightly beaten. Heat and serve.

THE CHEERFUL CHERUB

THE ROMANCE OF WORDS

"TREACLE."

THOSE who have stumbled across the reference in Waller's ode to Charles II to "treacle yielded by your vipers" have naturally been puzzled to see the connection between a poisonous snake and the English name for sirup or molasses, a connection which dates back to the days of legendary lore.

"Treacle" was originally a Greek word and, wrapped up in it, was the once popular belief that the best antidote for the sting of a snake was a concoction made from the tissues of the snake itself—a sort of "hair of the dog is good for the bite" idea. Milton speaks of the sovereign "treacle of sound doctrine," while "Venice-treacle" or "viper wine" was a common name for a supposed antidote against all poisons. Treacle, meaning first this antidote, was first broadened in meaning to include any cure through medicine; then contracted to mean only those medicines which were of a sweet sirup nature and, finally, restricted to the particular sirup which is called by that name today—a sirup which, however, has no medicinal properties whatever.

TO PREVENT DREAD DISEASE

Foot-and-Mouth Ailment Need Not Be Feared If French Serum Proves Reliable.

The dread foot-and-mouth disease will no longer be feared by catflemen if the announcement of the discovery of a serum for the prevention of this disease by a group of French scientists, proves reliable and if this serum can be manufactured in sufficient quantities. Several outbreaks of the disease have occurred in the United States, the last of them several years ago, causing a great loss. The only effective method of stamping out the disease heretofore has been to slaughter all cattle affected and thoroughly disinfect the premises.

The Key to Success Is Work—There Is no Substitute for It!

In order to do your best work, you must be healthy. You must sleep soundly at night, your nerves must be strong, steady and under perfect control.

If you are accustomed to drinking tea or coffee with your meals or between meals, you may be loading yourself with a very great handicap. Your nervous system may be stimulated beyond what is natural for you.

For tea and coffee contain thein and caffeine. These are drugs as any doctor can tell you. They are known to irritate the nervous system by their action and to cause restlessness and insomnia, which prevent the proper recuperation of the vital forces.

If you want to be at your best, capable of doing the very best work that lies in you, why not stop drinking tea and coffee? Drink Postum, the rich, satisfying beverage made from scientifically roasted cereals.

Postum contains absolutely no drugs of any kind, but in flavor tastes much like rich coffee. It helps nerve and brain structure by letting you get sound restful sleep.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Ask your grocer for Postum. Sold everywhere.

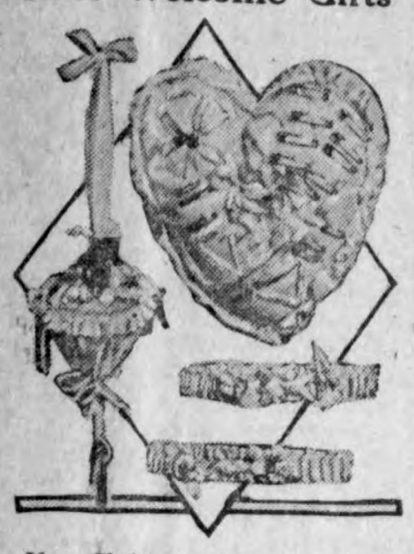
Suitable For Presents

Ever Welcome Gifts



If a Christmas were to come and go without leaving with us pincushions, pin-holders, garters and other pretty furbelows made of ribbon, it would be remembered with something of disappointment. A heart-shaped pincushion, a small bag for holding pins and a pair of ribbon-covered garters represent a few of many ribbon novelties for the holidays.

For the Hostess

Gifts that every woman who entertains will delight in are pictured here and they will be all the more appreciated because they are made by their donor. A set of numbers for card tables is attractive and easy to make. They are cut from white cardboard and have gummed figures in black placed on one side. On this black and white background graceful sprays of gay flowers are painted and the cards are supported by small wire holders.

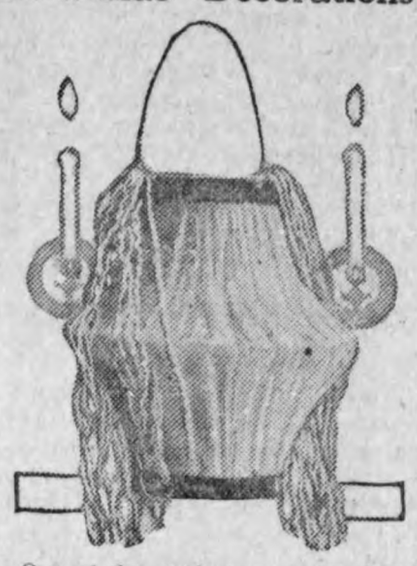
Bits of Splendor

Plain wide satin ribbon and narrow fancy ribbons, with handsome metallic mounts, are used to make these elegant shopping bags. Ribbons in the richest qualities and most brilliant patterns are chosen for them and they are lined with gay and equally good silks. Besides being bits of the splendor dear to women these bags have the additional value that belongs to a gift made by its donor.

Gay Bungalow Caps

Here is something new in breakfast caps. It is made of gay cretonne and is buttoned up the back so that it may be easily washed and ironed. It is bound with a plain color in chambray and has a narrow band of this material about it. The brim portion may be turned up or down and is shown here turned up at one side and down on the other.

Christmas Decorations

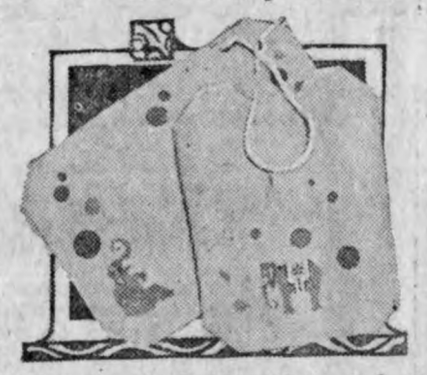


One of the easiest ways for dressing up the house at holiday time is to make lamp, candle and electric light shades or lanterns of crepe or tissue paper and tinsel. To make the small lantern pictured two rings of cardboard are covered with plain black or gold paper pasted over them. A length of light green tissue paper is folded along the center, slashed into narrow strips and pasted inside the rings. Under this a length of rose-colored crape paper narrower than the green is pasted; this causes the strips of green paper to spread and stand out. Silver tinsel hangs from the wire handle at each side.

Gifts for Gay Hours

Christmas never brought lovelier remembrances to fair women than the picturesque hair ornaments for their gayer hours which this season presents. There are many of them made of ribbon, beads, flowers or mock jewels in headbands, and finished with a feather or blossom or other ornament. The sparkling piece pictured is merely a filet of rhinestones that encircles the head and supports a small poinsettia flower at the left with a few sparkling rhinestones scattered on its leaves.

Bib and Tray Cloth



Balloons, in bright colors, and an angular elephant decorate the ample bib and tray cloth to match, made of oilcloth, as pictured above. They will afford the youngest member of the family much joy and his mother much peace of mind at the dinner table. Therefore the donor of this gift will be twice blessed and long remembered. The mottled oilcloth is cream colored and the bib is bound at the neck with white tape which is extended into ties.

Fairy Powder Puff

Little celluloid kewpies which may be bought everywhere have been used in many ingenious ways for Christmas gifts. Here is one dressed up like a fairy bride with ruffles of chiffon bound with narrow satin ribbon for a skirt and her head adorned with a braid wreath and veil. She stands in a small bag stuffed with cotton and gathered about her feet and it has a cloth powder puff sewed to it that rests in a glass bowl.

POULTRY

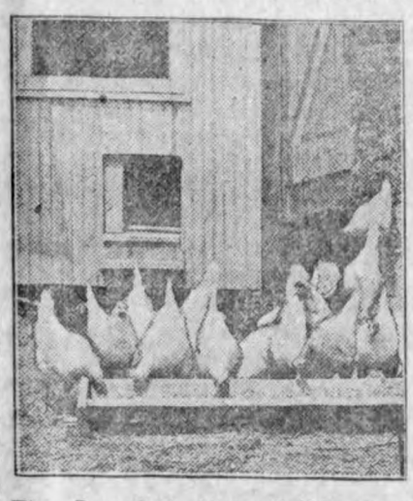
FRESH GARBAGE SAVES COST

If Carefully Selected and Kept Free of Broken Glass and Tin 30 Per Cent Saving Made.

(Prepared by the United States Department of Agriculture.)

A practical manner of reducing the production costs of market eggs consists in feeding fresh garbage placed before the flock as soon as possible after it has been rejected from the table. Used judiciously it will reduce the cost of egg and meat production from 25 to 30 per cent. The garbage must be fresh and free from all fermentation and sourness. The intrinsic value of garbage as a poultry feed is due to the fact that it provides a varied ration which fits all the needs and requirements of the flock.

One explanation of why the small flock owner, with his backyard bevy of hens, secures heavy production of



The Provident Hens Relish Fresh Garbage and Daily Await the Appearance of the Garbage Wagon.

eggs, hinges around the fact that he emphasizes the use of table scraps in the ration. Similar results obtain where large commercial flocks are given access to daily allowances of sanitary, well-selected and palatable garbage. Although the character of garbage varies throughout the year, due to the fact that more succulent vegetables and fruits are used during the summer, this refuse is also a valuable substitute for costly grains and concentrates in the hen menu.

Unfortunate results which in some instances have followed the use of garbage are due to feeding a mixture of table scraps that was not carefully selected. Hens like fresh garbage, but are not able to digest scraps of tin, phonograph needles and similar foreign material. Unless such substances are separated from the garbage, disastrous results invariably follow and the poultryman soon abandons garbage feeding and condemns it as unsatisfactory. The Department of Agriculture recommends that fresh garbage be run through a meat or vegetable chopper, and mixed with a little ground feed before it is fed to the fowls.

As much of the table refuse should be fed as the flock will clean up with a relish in the course of an hour. All feed which the birds reject should be removed from the feeding pens or yards as soon as possible thereafter. Otherwise, it sours and contaminates the premises and, subsequently, if the fowls eat it it invariably causes digestive troubles.

Where garbage is fed, it is also prerequisite to provide a light ration of grain twice daily, as well as to supply dry mash in a hopper before the flock. As a rule table scraps are rich in protein and only occasionally is it necessary to supplement the mash with approximately 5 per cent of meat meal. During the summer garbage decomposes and ferments quickly and it must be fed before it reaches this stage. The feeding of garbage is favored during cold weather because in the winter the refuse keeps better. Suburban flock-owners may often secure the garbage from neighboring families who do not keep hens. This source of feed may be so plentiful that the flock-owner can expand his henkeeping operations and even afford to pay a small amount for the garbage.

Experiments in feeding garbage at the government experiment farm at Beltsville, Md., indicate that ten hens will consume about one quart of garbage daily. A suitable dry mash as a supplement to this garbage consists of three parts by weight of cornmeal, one part of bran, one part of middlings and 5 per cent of meat scraps. This mash is kept before the fowls all the time. If the table scraps contain much fruit and vegetable peelings, more mash should be added, while if the garbage consists chiefly of potato peelings, bread and meat less mash should be used. Care should be exercised to drain off soapy water or excess liquid from the garbage.

PULLETS MUST HAVE GREENS

Fowls Seldom Pick Up Enough on Free Range in Fall on Account of Plants Drying Up.

Green feed must be provided if the pullets are to grow rapidly. They seldom get enough even when on free range in early fall, for most of the plants and herbage have long since passed the succulent stage. A newly mowed field of grass or a patch of rye, wheat, oats, barley, or rape sowed especially for the poultry gives the best supply. Cabbage, chard, or beet tops may be used.

"IT SAVED MY LIFE"
The Feeling Tribute of a Woman to
PE-RU-NA
READ HER LETTER—IT WILL DO YOU GOOD

"Pe-ru-na has been a Godsend to me. I feel safe in saying that it saved my life. I was all run down and miserable when I commenced taking Pe-ru-na, but am on the road to recovery now. I cannot thank you too much."
MRS. CHARLES ANSPAUGH,
R. F. D. No. 7, Lagrange, Indiana.

A letter like this brings hope and the promise of health to every sick and suffering woman. Perhaps you know what it means to have your daily duties a misery, every movement an effort, stomach deranged, pains in the head, back and loins most of the time, nerves raw and quivering—not a moment day or night free from suffering.
Do as Mrs. Anspaugh did. Take Pe-ru-na. Don't wait but start right away.

WERE NOT REALLY "VAMPISH"

College Girls Hastily Become Prim When Their Favorite Professor Hove in Sight.

The girl might have been born in Greenwich village. She wore her hair bobbed, tortoise shell-rimmed glasses, a loose jersey dress, green earrings which dangled from her ears, and she smoked a cigarette in an imitation jade cigarette holder. Not to overlook long green beads made of wood.

Her companion was a little less true to type. They were conspicuously at luncheon in a chop suey restaurant.

Suddenly a tall, rather distinguished looking man entered the tea room. The girls, who faced the door, gasped: "Good Lord, Dolly, there's Professor ——! Lay off quick."

Instantly the earrings were jerked out of the girl's ears, her cigarette was thrown to the floor and hastily stepped on, the cigarette holder was tucked into her bag and she rubbed her napkin briskly over her lips.

The professor sat down at the opposite table and never once glanced at the two girls.—Milwaukee Journal.

Stumped.

"Would it be right for me to hold you in my arms?"

"You've got me there."—Brown Jug.

Avoid extremes—a man can go crazy even on religion.

DYED HER DRAPERIES, SKIRT AND A SWEATER

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run. So easy to use.—advertisement.

PUT TRUTH IN SECOND PLACE

Salesman, Like Some Oldtime Advertisers, Must Have Had a Strangle Hold on Conscience.

Frank Irwin Fletcher, the New York advertising expert, said in an address to advertisers:

"Another fault that is fast disappearing is exaggeration—lying, you know. Some of the advertisements of the past remind me of a dialogue between a salesman and a patron. It runs like this:

"'What's the price of the article?'

"'One dollar, sir.'

"'Bought direct from the manufacturer, I presume?'

"'No, sir, we got it at a sheriff's sale of the manufacturer's stock.'

"'Why did the manufacturer bust up?'

"'Through selling this article at a dead loss.'

"'I suppose he'd paid too much for his raw material, eh?'

"'Oh, no; he stole the raw material.'

"'Gee whiz! Wrap me up half a dozen.'"

All that glitters can't be measured by the golden rule.

The Block Signals Are Working—

In some respects, human experience is like railroading.

Every moment of the business and social day the block signals are giving right of way to keenness and alertness—while the slow and the heavy must wait on the sidetrack for their chance to move forward.

The ability to "go through" and to "get there" depends much on the poise of body, brain and nerves that comes with correct diet and proper nourishment.

That's why so many choose Grape-Nuts for breakfast and lunch. Served with cream or milk it is completely nourishing, partly pre-digested, and it supplies the vital mineral salts so necessary to full nutrition.

Grape-Nuts has a rich, delightful flavor, is ready to serve on the instant—and is distinctly the food for mental and physical alertness and speed. At all grocers.

"There's a Reason"
for Grape-Nuts

Our "printer's devil" Clarence Elder, needed a little vacation after wrestling around with his Thanksgiving dinner, so he hiked out to his uncle Ben Katter's farm to spend the day Saturday.

You've read the book, now see the photo-play "Ten Nights In A Bar Room." Idle Hour, Dec. 7th. adv

J. P. Larsen & Son, Props.

Men Only--

This is a personal add, by a man to men and men only [Ladies keep your eyes off please] There are two kinds of men in the world, Single men and Married men --- and to each of these classes of men we have a Christmas suggestion to make.

Single Men--

Now when Christmas eve comes, don't rush up to the first Pretty Girl you see and hug her, such cave man methods may get you in bad. There is a better way: hand her a box of Gift Stationary, or wish her a Merry Christmas with a piece of Jewelery of Real Merit, such as a Bar Pin, Lavalier or Ring. How could she ever forget you if your gift of Jewelery were of such splendid quality as to last a life time? Talk these matters over with us. We handle the Merite line of gauranteed jewelery, and can please you with the best.

Married Men--

Be careful what you give friend wife for Christmas, a rolling pin would not be appropriate, and a box of chocolate candy is hardly enough. She has been "Saving" and doing without all year and has done her best to make ends meet, surely she deserves a most exlcellent gift. It must be something usefull and it must be something "for the house". New linoleum or a new rug would please her.

A few new pieces of furniture would be enough to show how much the "Head of-the-house" appreciates her companionship and helpfullness.

Remember "You Cannot Over-do" when it comes to buying a gift for friend wife.

Wellemeyer's

Headquarters for useful Christmas Gifts *Klemme, Iowa*

TO REFOREST ERODED LANDS

Plan To Plant Trees On Indian Reservation To Keep Land From Washing Badly

That reforestation of badly eroded and wase farm lands may be accomplished in a short time has been conclusively proved by the forestry department of Iowa State College which n cooperation with the Iowa Agricultural Experiment Station and the Indian Service of the United States Department of Agriculture, has conducted a practical planting experiment on the Sac and Fox reservations at Tama. The results of the planting made lanst spring are exceptionally satisfactory.

The reservation at Tama includes about 3.500 acres, approximately half this amount being timber. It was found a year ago that much of the farming land was being badly eroded. Large gullies, many of them 30 feet across and 25 feet deep, appeared in quick succession.

The forestry department last spring constructed a number of temporary dams and planted a large num ber of cottonwoods. An examination recently completed showing a nearly perfect servival of the sedlings with strong indications of permanent stand.

At the same time last spring 10 acres of waste land was planted to red pine, Scotch pine, black walnut and black locust. The planting has shown up exceptionally well, according to G. B. MacDonald, head of the forestry department. One acre of overflow land was planted to cottonwoods and aloto the land was at one time under five feet of water, the planting servived intact.

According to the present plans approximately 100 acres of the reservation will be refirested. The senior class of the forestry students of the college are now engaged on a planting plan for 50 acres. the planting to extend over a period of ten years.

According to the Indian agent approximately $7,00 worth of lumber is used each year on the reservation. It is now planned to raise the lumber for local use. Cottonwood posts may be grown in 6 or 7 years a ndwhen given the preservative treatment will yast for 25 or 30 years.

FEED COWS CAREFULLY

Condition of Milk Production should Influence Rations

In handling dairy cows for milk production they should be fed as individuals, say the dairy experts at Iowa State College. The largest yieid of milk will result when the individual case is studied. Many farmers feed their cows as much as they feed beef animals, but cows with high production records require more feed than do those with a lower record.

In handling a dairy cow for best results. the ration should consist of good succulence, and it should have plenty of bulk, an ample variety and should be balanced. A cos feed must serve three purposes, that of producing milk, developing a foetus and maintaining the body.

A cow that is freshening should receive warm drinking water for a few days, altho it is not necessary during the entire lactation period in winter.

When the cow is under the greatest production strain an ideal ration is composed of 400 pounds of cracked corn, 200 pounds of ground oats, 100 pounds of cottonseed meal and 100 pounds of old process linseed oil meal. Feed silage with this ration.

In feeding dairy cows, allow one pound of hay to every 100 pounds of live weight, 3 pounds of silage to every 100 pounds of liveweight, one pound of grain mixture to every 3 pounds of milk produced. If fat is desired in the milk feed seven pounds of grain to every pound of fat produced. Where it is possible make up the ration out of home grown rations and this will eliminate expensive feeds and return a greater profit for the home grown grain.

CHOOSE LIGHTS WITH CARE

Best Lights in Room Are Not From Chandeliers in Small Rooms

In illuminating the home be careful in selecting the proer kind of lights. Chandeliers, according to Miss Alice Dodge, of the Art Department in home economice at Iowa State College. are alright for the large formal hall but unsuited for the smaller rooms of the modern homes.

Instead, Miss Dodge urges the use of side lamps judiciously distributed as this allows sufficient light for all purposes and gives a soft, kindly light.

Indirect lighting in the home emphasizes the ceiling too much, says Miss Dodge, and passes up some of the more attractive featureds of the home.

Where electricity is available, lamps properly placed about the room will give more home like atmos phere than a bright light coming from a chandelier in the center of the room.

NEW BULLETINS ON BUTCHERING

Experiment Station Issues Circulars On Farm Slaughtering

With the increased popularity of farm butchering popular demand for information on this work has resulted in the issuing of two new circulars, on on "Dressing and Cutting Beef on the Farm" and Dressing and Handling Mutton and Lamb on the Farm by the Animal Husbandry department at Iowa State College.

These bulletins can be had by addressing the Bulletin editor at Ames.

MAKE HANDY EQUIPTMENT

Many Hog Conveniences Easily Built For Farm Uses

Small troughth for farrowing pens can be made easily during the winter say the animal husbandrp department at Iowa State College. If best results are to be gotten with pigs they should be given a chance to eat. Indiscriminate dumping of foods in a pen does not give the sow a god chance to eat. Also sows during pig ging time require quiet and if they are provided with individual feed troughs they will do better. Also it is easier to keep a small trough clean.

Also, in feding minerals and other condiments a small box can be built that will prevent their being scattered around and being tramped into the mud. Where minerals are mixed in rations they can be handled in better shape if they are mixed on the floor. Plans are inexpensive outfits for hhandling swine food are furnish ed completely by a bulletin recently issued by Iowa State College on "Handy Equiptment for Swine Raising," which can be had by addressing the bulletin editor at Ames.

ROAMED THE TEXAS P

Elephants of Gigantic Size Their Habitat In That State lions of Years Ago.

Positive proof that elephants gantic size, with bodies probably ered with long hair, once roamed coastal plains of Texas, has been obtained by the unearthing of the eton of one of these prehistoric mals at San Leon. The pecul its life dates back anywhere from half million to seven million years cording to H. C. Chandler, assistant professor of biology in Rice Institute of Houston, who assisted in exhuming the remains of the elephant from hard bed of sand and gravel where reposed through the centuries.

It will take some time to construct the bones and form the skeleton as it originally existed and until is done measurements cannot be accurately taken. The fact, however, that the two tusks which were removed from the sand and gravel bed are more than 12 feet long indicate the great size of the pachyderm. The skeleton was discovered by E. [illegible] of Houston who called Mr. Chandler to his assistance in unearthing it. In speaking of the discovery Mr. Chandler said:

"This particular species of elephant was common in North America during early and middle portions of the pleistocene in the geological history of the earth which is known as the pleistocene period, the latter part of the pleistocene period it had already become extinct.

"There are 20 known records of the occurrence of the imperial elephant in Texas, one being in Galveston county. This species of elephant was typically a plains animal, apparently shunning forest regions and occurring only west of the Mississippi river.

"The imperial elephant was the largest known species of elephant that ever lived on earth. Full-grown bull mens reach a height of 13½ feet, while modern elephants seldom exceed 11 feet in height. It is probable that the imperial elephant, like the mammoth and the Columbian elephant, was clothed with long hair, for during the pleistocene period the winters were severe over most of the regions which it inhabited."

Why Shouldn't He!

Fred B. Johnson, one of the Indiana state public service commissioners, is a Jeffersonian Democrat, is, in fact, quite democratic in his personal habits. When he drives down the street, away out in the northern part of the city, where he lives, and sees some one waiting for a street car he cannot resist offering to share his flivver—not in any spirit of unfriendliness to the street railway company but for reasons aforesaid.

Not long ago he invited a strange woman to ride, and she accepted. As they started toward the business district. Nearing Ohio street, where Mr. Johnson usually turns off to his office in the state capitol, he advised the woman that he was going west there.

"But I want to go to the First American National bank," said the woman.

Very graciously Mr. Johnson drove down Pennsylvania street and was about to stop on the west side of the street, when the woman told him to cross the street and draw up on the east side the bank corner.

Somewhat amazed, the chauffeur complied and put his passenger in the proper place.

Then the woman drew out a purse and gave Mr. Johnson five cents.

He took the money and drove away.—Indianapolis News.

Ad Filled Romance With Love

A war romance by way of the "personal" classified advertisement columns of a London daily paper has been consummated.

It is the story of an Australian sergeant, who, after having served in the D. C. M. and the M. M. at the front, passed through Birmingham in transit en route to a demobilization camp. At the railroad station platform he became [illegible] with a pretty girl for 15 minutes—the Australians being quick wooers—received a gift of a lock of her hair before he left. He did not learn the girl's name, however.

Returning to Australia, he was sent to Tasmania and from there was made chief constable at Birmingham. Then it was that he had fallen in love with the girl, and asking aid in finding her, an advertisement was inserted in a London newspaper, the girl saw the "agony column" notice, photographs were exchanged, and in a few months she sailed for Tasmania.

Their Taking Ways.

A stranger reported to Sheriff Mike McLean that he had lost his overcoat and umbrella stolen while he was in town two hours. The sheriff said: "There will be an awful lot doing in this burg when Gabriel blows his horn over it."

Mike replied: "Gabriel will never blow his horn over this town. Some one will steal it before he gets a chance to blow it."—Lackawanna Journal.

Nobility to Sell Old Armor

One of England's best known families, of which the earl of Pembroke is the head, has decided to dispose of a magnificent collection of armor which has been in its possession for many years.

PROVISIONS IN DETAIL OF MUCH DISCUSSED "ANTI-BEER" STATUTE

Democrats Bitterly Opposed Law to Enforce Prohibition Amendment

WASHINGTON.— The following are the provisons of the so-called "anti-beer law, so vigorously fought by the Democrats. It was enacted to strengthen the enforcement of the prohibtion amendment. The president has signed the act annd it is now a law. in full force and effect:

The bill prohibts the prescription of beer or malt liquors for medical purposes.

2. Not more than one-fourth gallon of vinous liquor, or vinuous or spirtuous liquor separately in the aggregate containing more than one-half pint of aicohol, may be perscribed in ten days.

3. Physicians are limited to 100 prescriptions for liquor in ninty days unless extraordinary reason is presented.

4. The commissioner may cancel or require change of permits to manufacture patent medicines and preparations used as a beverage even if they are unfit for beverage use, or require the formula for making extracts to be changed, or ma ycancel the permit, if it appears to the commissioner that the sale or use of such articles is substantially increased by reason of their use for beverage purposes.

5. Importation of spirituous or vinuous liquor is prohibited until the amount on hand shall not be sufficient to supply the current need for non beverage uses.

6. Spirituous liquors exported in the original packages may be reimported in such packages for redeposit in the distillery warehouse from khich originally removed.

7. The courts of Hawaii and the Virgin Islands are given jurisdiction to enforce the national prohibition act.

8. Regulations to carry this provision into effect are authorized.

9. Revenue laws relating to the manufacture, taxation of the traffic in liquor shall remain in effect when not in conflict with the national prohibition act; the prohibitive taxes and penalties provided in the national prohibition act shall be collected in the same manner as other taxes on liquor.

10. Taxes on liquor stolen or destroyed shall not be collected from the owner if the loss or theft did not occur as the result of negligence, connivance, collusion or fraud on the part of the owner or person legally accountable for the same.

11. Private residences may not be searched without a search warrant. Officers, who without probable cause and maliciously search any place without a search warrant are penalized. Person who impersonate officers enforcing the prohibition act are heavy penalized.

A change was made Tuesday afternoon in the schedule for practicing basket ball between the boys and girls. From now on the girls will have the court on Monday and Thursday nights, and the boys on Monday and Friday nights. The time for practicing to comence will be from 7:45 to 8:45, both for the boys and girls. Practicng may be done each night before this time but the floor must be vacated at the time either the boys or girls have right to the floor.oin oin in which it may be. have right to the floor.

Grammer Room Notes

The Grammer room children drew names for getting each others Christmas presents.

The Seventh grade organized their class this week. Ethel Welle meyer was elected President and Donald Gibbs Sec. Treasurer.

The Eight grade also organized their class this week, electing Florence Behringer as President and Frank Gibbs as Sec. Treasurer.

"I Loves Her Most of All"

UNITED STATES POST OFFICE

Des Moines, Iowa

Executive Division. H. Nov. 30, 1921

"TO THE BOYS AND GIRLS OF THE UNITED STATES"

Christmas is almost here.

Your great Post Office Department has a big job ahead and needs your help.

Think what it means to be Santa Claus to our 100,000,000 people and to deliver Christmas parcels to every family in this great country within the short space of a few days and without disappointment.

It can be done and we are going to do it if we can have your help. I want to enlist the active assistance of every boy and girl in the schools of our country in getting parcels mail ed THIS WEEK to relieve the rush that comes directly beofre Christmas.

Will you go home today and take this message to your parents and friends.

"Our postmaster has asked us to mail our Christmas parcels this Week, for unless we do, Uncle Sams load may be so heavy the last few day before Christmas that he won't be able to deliver all the presents by Christmas eve."

The parcels must be wrapped and tied and adressed plainly in order that they may arrive in good condit ion with their Christmasy appearance unspoiled. You can put on your packages, "Do not open until Christmas."

And there must be a number on your house and a mail receptacle, too, for, if there isn't, Santa Clau's messenger, your letter carrier, may not be able to find the house where the present belongs.

There are some other things too. in which you can all assist in improving the mail service and in sav ing our great government millions of dollars a year that is now wasted because of our carelessness —yours and mine.

Every day you drop a letter in the mail box 40,000,000 other letters are already pushing and jamming through the machinery. One letter a day for each family of five persons in the United States is given to Uncle Sam to deliver.

When you send a parcel to the post office for mailing any day there are about 8,000,000 other par cels ahead of yours passing through the postal hopper. This is in ordinary days; at Christmas time it is multiplied many times.

One family in about every ten puts a badly addressed letter in the mail box every day. This mixes up over 2,000,000 half addressed letters with the 20,000,000 fully addressed letters. That means that the fully addressed letters must wait on the slow moving poor addressed letters, just like the larger bunch of boys and girls are delaying by a bunch of "bad kids" tagginng along

You boys and girls can help the postal service and save your father some money, because he has to help pay the cost of searching addresses on letters and parcels sent out by this one careless and thoughtless family n every ten.

First find out if your family is the careless one, then bear in mind that your letters must be handled by skilled mail distributors standing in post offices and on swaying postal cars of a mile-a-minute mail trains, often under poor lighth.

The address on every letter. card or package must be correct, complete, and legible including the house number and name of street, and the "From" address should be in the upper left hand corner so that the mail will be returned to you in case it is not delivered. Do not abbreviate names of States, because so many look alike when abbreviated.

Put the proper amount of postage on your letter and wrap the parcels carefully. Avoid fancy writing, which causes post-office clerks and letter cacrriers to stop and study, and thus lose time. Make the address plain and easily read, and always use pen and ink or typewriter and light colored envelopes, so as to save the eyes of the post-office clerks. Do not use envelopes of unusual size. The little ones that are so frequently used for cards and notes at Christmas and othehr holiday times cause an untold amount of trouble and labor, as they will not fit our canceling machines and must therefore be canceled by hand. Because of their size and tendancy to slip out of a package, these small envelopes are more likely to be over looked or lost. Mail your letters and packages early in the day, because this avoids overloading and delaying mail at the end of the day.

Your local postmaster and teachers will tell you more about the Postal Service.

Do these things, and you will win the grateful appreciaton of the people in your postoffice and especially of

Your Postmaster General.

(Signed) WILL H. HAYES.

P. S.—Don't forget to mail the Christmas packages this week.

Respectfully yours,

J. W. Waterman, Postmaster.

News Borrowed And Stolen From All Over The State

FRED SCHULDT. JR. DIES FROM INJURIES RECEIVED WHILE COASTING

Funeral Was Held At Goodell On Tuesday Afternoon

Fred, eleven year old son of Mr. and Mrs. Fred H. Schuldt, who reside south-east of Klemme, died at a Mason City hospital Saturday of blood poisoning, the result of an accident while coasting when he was pierced in the neck by a poison ous weed which he ran into. Medical aid was given at once but blood poison set in, causing his untimely and sudden death.

The entire community was shock ed when they heard of Freddie's death. Funeral services were held at the home at one o'clock Tuesdap and also from the U. B. Church at Goodell. Interment was made in the Goodell Cemetery.

Mr. and Mrs. Schuldt have the sympathy of the entire community in their bereavement.

STIEHLS LOCATED AT SANTA MONICA. CALIF.

Chas. Writes the Times a Letter

Santa Monica, California.
December 1, 1921

Friends at Home:

We are all fine and hope the same in Klemme, Iowa. We have rented an apartment this morning and have moved in. This s sure the beauty spot of the world.

Santa Monica s on the ocean shore and is a city of about 20,000 people; lots of rich people and beautiful homes.

I was out on sight seeing and the driver said abouta certain party was living in a small apartment and was paying $200.00 per month, that is whie he was getting his house built; that is Billy Sunday.

We sure like t out here fine. We got acquainted with eight families and we sure have a time playing Rummey. Art Kuck goes fishing every day and we can sure eat.

I am going to work; wages are from $4.25 to $10.00 for eight hour here, and try to make livng and better for the winter. I was in a lumber yard and asked for a job and he said he had thirteen men now, but to come back and maybe can give a job unloading lumber. There are eight lumber yards in this town and all busy.

Please send me the Times; we like to hear from home.

Yours truly,
Chas. W. Stiehl.

FALLS FROM FORTY FOOT WIND MILL; LIVES TO TELL THE STORY

While attempting to oil a wndmill Sundap evening Walter Blumer slipped and fell from the top of the forty foot steel tower to the ground below.

He came down feet first on to the frozen ground and received severe bruises and injuries to his feet and ankles which will no doubt lay him up for a time, but he is very thankful that he lives to tell about it for a drop like he took generally means instant death. It is hoped that he received no internal injury.

At this writng Walter is getting along as well as could be expected, although suffering pain from his bruises.

KLEMME BOY INJURED WHILE SKATING

Paul, thirten year old son of Mr. and Mrs. Henry Stromer residing west of Klemme fell and broke his collar bone and received bruises about the shoulder while skating on a pond Sunday. In the sudden spill Paul came out of the accident with a dislocated shoulder, a broken collar bone and a bruised shoulder.

Paul is still trying to fikure out how the ice jumped up and hit him such an awful wallop.

COURT AT GARNER OPENED MONDAY

The December term of the District Court opened at Garner Monday with Judge J. J. Clark on the bench. The bar docket is cleared of criminal actions for hearing before the grand jury but there are numerous equity and law cases on the dockt, among them being thirty seven listed as new causes. A few probate matters will need attention. The petit jury was called for Tuesday. The case of the State of Iowa vs. Wisely, a seduction case was carried over from the October term of court and booked to receive attention as the first case to be called for trial at the December term. Several people from this part of the county were drawn for the petit jury.

SHE HAD A DOZEN SPOUSES IN THE WAR

CHICAGO, Dec. 7.—At least welve husbands who served in the rmy or navy were credited to Mrs. Helen Drexler of Waukegan, Ills., he champion collector of government allotment checks. according o federal authorities who had her n custody Friday. She is said to have married husbands in many different parts of the country, divorced none and with having receiv ed approximately $400 a month rom the government for the last 3 years.

AUTO REGISTRATION FEES HELP PUBLIC ROAD FUNDS

WASHINGTON.—According to a eport issued by the bureau of public roads, United States Department of Agriculture, a total of 9,245,195 automobiles, trucks and commercial motor vehicles were registered in he 48 states and the District of Columbia during the first six months of he present year. The fees collected rom these registrations and the liensseing of drivers yeilded a gross revenue of $108,213,165. These fig ures are an increase of nearly $6,000,000 over the entire twelve monhs of 1920. According to the burau, 95 per cent of this revenue is vailable for expenditure for work on public highways.

Give Organ to School

Mr. and Mrs. J. Tanner donated heir organ to the Twin Lakes Twp. District No. 2 school. Teacher and pupils appreciate it very much. It certainly shows the interest of par nts in school work. It helps the eacher wonderfully if she has the co-operation of the parents. The noney received from the social ow can be used for other school urposes.

WAR DEPARTMENT GIVES $3,000,000 OF ROAD MACHINERY

WASHINGTON.—The Bureau of Public Roads of the United States Department of agriculture has made an inventory of the articles of surplus war material which have been turned over to the department by the war department for the road building purposes under the Wadsworth-Kahn bill. The bill provides that this transfer of material shall be made with the express stipulation that the material so transfered must be used exclusively in the construction and maintenance of public highways. Although the distribution has been in process for some time, the transfer is not yet completed. Up to date the total value of machinery equiptment and supplies, independent of motor vehicles, which have been transfered, aggregates more than $3,000,000.

The SANDMAN STORY

INQUISITIVE POSSUM.

IT WAS Mr. Owl who gave the wood folk the warning by calling out one night, "To whom it may concern!" At least the wood people knew that was what he meant, but anybody else might have thought he just cried, "To whoo, to whoo!"

So when all the animals both great and small had gathered around his tree he told them that in his opinion it was to be a very, very hard winter.

That, of course, meant that they must begin right away to lay up stores for the cold, snowed-in days, and everyone bestirred himself at once to do this.

Even Mrs. Rabbit, who seldom made much preparation for the winter days, began to do up preserves, all the small bunnies were sent out with their baskets to gather corn and beans and beet tops and all sorts of good things. "If we cannot get them green," said Mrs. Rabbit to her neighbor, Mrs.

All the Small Bunnies Were Sent Out With Their Baskets.

Squirrel, "we can get them stewed, but, of course, we much prefer them in their natural state."

Mrs. Squirrel, to encourage her neighbor in laying up winter stores, gave her a big basketful of walnuts, which Mrs. Rabbit pickled, and some say those were the first walnuts ever pickled.

But this story is not about pickled walnuts; it is about the nice preserves that Mrs. Rabbit put up and the accident that befell Mr. Possum.

Everybody that passed Mrs. Rabbit's home for many days found it hard to get by her door, for such spicy, nice-smelling odors as came out through the open windows made everyone feel hungry.

Mr. Possum was specially interested when he found that Mrs. Rabbit was, among other things, putting up a great deal of canned corn, and he decided that when it was dark he would just take a peek into her pantry window and see how many cans she had.

Right in front of the window was a tree and one limb hung low enough so that Mr. Possum with a little care could easily swing himself from it and reach the pantry window.

Now this might have been safe enough if the limb had been a good one, but it wasn't, and when Mr. Possum ran along it, before he could even get ready to swing, "crackle, snap," went the limb and down went Mr. Possum into a barrel of whitewash Mrs. Rabbit had ready to use on her little house.

And that was not the worst of it. He ran home so scared that he didn't remember running at all after it was over. Mrs. Possum didn't know him, but thought he was some terrible white creature come to carry off her children and slammed the door right in his face.

All night Mr. Possum had to sit outside, the whitewash dripping from his coat, and in the morning, bright and early, all the little bunnies and Mr. and Mrs. Rabbit as well were standing in front of the house looking at him.

Mrs. Rabbit wanted to know what he meant by carrying off some of her whitewash. "Mr. Rabbit and I and all the little bunnies tracked you, and you need not deny it," she said.

Mr. Possum did not try to deny it, for what was the use? He was all covered with the white stuff. But he did try to tell Mr. and Mrs. Rabbit that it was all an accident, that he was just running along the limb and off it broke and he happened to fall into the whitewash.

Mrs. Possum had found out it was her husband by this time, of course, and she came out to say that what Mrs. Rabbit could think they wanted of her whitewash was more than she could tell.

Mrs. Rabbit wiggled her nose and looked very wise. "Well," she said, "if that is true, Mr. Possum, that it was all an accident, why, of course, that is all there is to it, but you must admit that it did look suspicious."

Mr. Possum admitted that it did and off ran the Rabbit family for home, but it was a long time before Mr. Possum could go abroad again, for the white coat he wore was to be plainly seen in the daytime or at night.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

CANDY MANNERS.

Feast of nectar 'd sweets.—Milton.

IT IS a usual question for a young girl to write asking who should take the first piece of candy from a box brought to her by a young man caller. And when you come to think of it, there are a good many puzzling things involved in the problems connected with a box of candy.

To begin with, if a man brings a girl a box of candy, she usually opens it while he is present. She then passes it to any other women in the room, then to the man, and then she helps herself. If he, when she passes it, holds it for her to take a piece, she does so. If the candy comes by mail or messenger, she opens it, of course, and does not wait until he calls, even if she knows who the candy comes from before opening it, and knows likewise that the donor is to call.

Perhaps the most important thing to remember in connection with the good manners connected with candy is that the person who always greedily eats candy and never buys it is very ill bred. It is the week-end custom for some men to bring home a box of candy. In some families there is one candy-loving member who lies in wait for the weekly sweets and eats as many pieces as she can get. She takes one every time the box is passed, and perhaps helps herself between times.

Now it is quite all right to accept candy, if you like it, when it is passed. But you should not eat more than your share, and you should not eat even this much if you are not in the habit occasionally of standing treat yourself. You should, if you have a sweet tooth and eat other people's sweets, provide a box full of your own occasionally.

Candy is one of the gifts that a man may give a woman—candy, flowers and books constitute the conventional trio. Nobody wonders if the donor of a box of candy to a girl is thinking of falling in love with her. Candy nowadays is quite the correct and accepted gift from anybody that can afford it. And no girl need feel hesitant about accepting candy in this way. Of course, if she thinks a man cannot afford it, but buys it for her simply because he thinks he ought to, she might suggest to him that he really should not indulge her sweet tooth so often. And never, never should a girl hint for sweets. There are some girls who cannot pass a candy store window without casting longing glances at them, and sometimes even commenting on their fondness for candy. No man should feel rude in ignoring these symptoms.

It is not necessary to write a note thanking a man for a gift of candy if he follows the gift shortly with a call. The thanks should not be forgotten, but they may be delivered verbally.

"What's in a Name?"

Facts about your name: its history meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

HETTY.

THE simple little name of Hetty, suggestive of pleasant homely domesticity, has a lofty significance. It is translated to mean "a star." Perhaps, after all, the steady bright insistence of the stars may have some psychic reference to the generally accepted conception of the Hettys of the world.

Hetty is in reality the endearing diminutive given to the more dignified Hester, but so coldly austere is the latter name that Hetty has come to be bestowed in baptism with completed disregard for its proper predecessor.

Hetty came into existence by a rather complicated evolution through several languages. The fair daughter of the tribe of Benjamin whose royalty insured her peoples' safety, was called Atossa. Her name in the Persian language — quite unpronouncable — was combined with the Latin word for star "stella" and from the union, came the modern estrella. In the Septuagint, the Romans make this word Hestera or Esthera.

In England, the "a" was dropped and Hester and Esther were bestowed as feminine names. The latter became Essie when the inevitable diminutive was forthcoming, and Hester soon gave place to Hetty, though the original form was usually preserved on the church registers. It was for America to gayly discard the proper appellative and substitute Hetty for all occasions.

Hetty's talismanic stone is the turquoise, which promises her steadfast friends, true love, and freedom from danger. If she sees the new moon reflected in the stone, she will have rare good luck. Saturday is her lucky day and five her lucky number.

An Incorruptible Thief

By MARTHA McWILLIAMS

©, 1921, by McClure Newspaper Syndicate.

"Go to Jane Lauder and tell her I love her," a robust bass voice sang as Jane came down the steps. She made a face at the singer, then gave him her profile, a creamy cameo against her red sunshade, as she said: "Why don't you tell her yourself? Remember, procrastination is thief of time—and no time like the present."

"Please, I'm singin' to my dog Rough-Neck, trying to train him. You interrupted," the singer returned sadly, "which is very bad—for both of us. 'Tention, Roughy—you go tell, but don't say it with flowers—and you haven't words enough. That's lucky—she looks at you somp'n awful when you venture on candied speech—"

"Don't you mean candid?" Jane broke in. The dog trainer frowned and shook his head. "I know what I mean—Roughy's the one that has to find out," he said. "Now, old top, listen hard. Do—not—say—it—with flowers. She has all the flowers—and then some. But she has also a fine, almost athletic appetite—so recall the time when you fetched home to me a three-pound porterhouse steak—and repeat the performance for her benefit."

"So that's how you do it! No wonder you're such pals with Roughy," Jane cried joyously. "But aren't you silly—to share such a provider with anybody."

"Dear girl, there is method in my madness," Roughy's master explained airily. "It has suddenly dawned on me that your offishness, your positive indifference to me is based on a craven fear of scant rations. Cupid solus is notoriously an indifferent commissary—but Cupid plus Roughy once you know what he can do—"

"I see," from Jane. "I also see that a prosperous future will depend very much on a happy choice of neighbors. Suppose Fate ordained us to live where such dissipations as porterhouse steaks were religiously frowned on?"

"Why! We might make out on legs of lamb—in a pinch—or even a fine fat fowl. A real chicken I fear Roughy would keep for himself," Ex-Captain Bledsoe explained. "At least he did—one time. I suppose his conscience excused him—real chickens being such rare birds."

"How did you find out?" Jane asked, pretending anxiety.

Bledsoe sighed. "He was tracked home." "That seemed to me felonious—considering we were service men. But the lady, party of the other part, said we owed her five dollars—two for the bird and the balance for the wear and tear on her feelings at doing without it."

Jane swept him a curtsy. "It's glad I am you two got your come-uppance one time," she said in the best manner of Nora the cook. "And hope also it teached ye a lesson—three dollars of chicken neither of ye ate is sinful extravagance."

"It is. You ought to save us from such things in future," Bledsoe acquiesced.

Over her shoulder Jane Lander, spoiled beauty and heiress, flung back at him: "I'll think about it—provided you don't put it on the ground of patriotic philanthropy."

"No danger of that—just pure plain philanthropy—which means, you know, love of your fellow man." Bledsoe called after her, whistling Roughy to heel and march away in the other direction. He was riotous—drunken with happiness. Free from gyves that had threatened to hold him for life. He had laughed in the face of them even as he had laughed in the face of hideaus death, always leading, though he might crawl through a hail of bullets, sparing his men where and how he might, but never sparing himself. There seemed a magic in such hardihood—he had come back without a scratch—without also the precious trinkets, orders, crosses, what not—which he called "hardware de luxe"—that rewarded other men of no greater courage nor daring. There was no injustice in it—he had resolutely refused to tell of his own exploits. More, had begged silence of the others who might have spoken. They had obeyed, not too cheerfully, until he said to them: "I want to go back myself, and all of you who lived through with me, knowing and feeling that nothing can distinguish us more than the title of plain American citizen. If any of you don't agree with me I'll help you get the hardware. Scorn it? Not a bit—just feel that it doesn't fit my peculiar style of beauty."

So he escaped. Other things he did not escape. One of them, sweet and twenty, piquantly pretty, with an adorable way of murmuring broken English, had made him believe himself fathoms deep in love. They had parted on a promise—hers to come to him when a doting grandmother could be prevailed on to let her leave. He had meant to keep faith—he had kept it indeed, until Jane had dawned—a sun putting out all lesser lights.

Now Felice had written a tear-blotted brief note. She could not leave grandmere—besides there was the young count. Ever so grand a family—with a chateau—handsome, and deep in love with her, though she had not yet spoken with him—had seen him but once. Bledsoe kissed the paper there, albeit he was normally vain, murmuring half aloud: "Thank the Lord for titles and chateaus and things. Three rousing cheers, and then some, to all the aristocracy."

Then only he had set about courting Jane in earnest. Earlier he had felt it would be insult. Now in the very back of his consciousness he wondered if his scruples might not cost him his happiness. He was in no fear of the ruck swarming after her, but John Lapsley was the devil to beat, once his mind was made up not to be beaten. He had shown that overseas no less than Bledsoe himself.

When one speaks or even thinks of the sun, sometimes one beholds his rays. A motor-horn, viciously insistent, made Bledsoe turn to face Jane and Lapsley, beckoning to him and laughing hard. "You—you have to show us," Jane panted: "The major says you're an immortal liar—about Roughy, you know. Is he good and hungry now?" Bledsoe nodded. "Then come along home with us; we'll stage a show worth money, if only you can repeat it Thursday night."

"Can—but I won't. Objects of my affection are not be exploited commercially," Bledsoe protested, clambering in beside the pair: "Shame you haven't got the limousine Jack," he said to Lapsley. "But the running board will serve in a pinch you can't pry Roughy from anything that holds me."

Three hours later the executive committee for a benefit for Disabled Veterans gathered after a specially fine luncheon upon the Lander lawn, watching with all its eyes. Bledsoe, standing negligently apart, pinched Roughy's ear lightly, sighing; "Hungry, old top?" Instantly the dog darted away, not toward the house, but in the direction of a remote neighbor. Ten minutes after he came back wagging his tail and dragging daintily not a porterhouse but a T-bone steak of lordly proportions, which he laid at his master's feet. Bledsoe patted him, but shook his head. Roughy snatched up the steak, ran away with it to a flower bed, buried it deftly, if lightly, and was off again. In a wink he was back, tugging gallantly at an unwieldy fat goose. Bledsoe took it from him, but again shook his head, silently. Off went Roughy, his legs fairly twinkling—to return with a fine broiler, not dead but alive.

Then indeed there was clapping and cheering. Lapsley caught Bledsoe, shook him hard, and cried: "If only we had had him over yonder!" "Would have come in handy—but I need him here. You see I'm going to undertake the support of a family," walking boldly to Jane's side; "so need the help of this incorruptible thief to provide for it," Bledsoe said, but laughter drowned his words.

BEGGAR BECAME MIRACLE MAN

Algerian Legend Tells of Remarkable Power Bestowed by Allah on Negro of Humble Estate.

About two miles from the city of Constantine, Algeria, stands a barren mountain called Fort de Sidi M'Cid, which is visited once a year by thousands of pilgrims. The origin of this pilgrimage dates back to the Moslem conquest of Algeria.

In those far-off times there lived a negro beggar known as Sidi M'Cid. Dancing and singing in the villages and hamlets to the accompaniment of his tom-tom and castanets, he had become a popular and well-known figure in the province of Constantine.

One day, according to the local legend, Allah stopped him on the road, informed him that he had been specially chosen for a divine mission, and commanded him to go forth to the city to hunt away Beelzebub, who had taken possession of the bodies and souls of many believers.

He began at once to work miracles among people possessed of evil spirits and soon cured so many that they formed themselves into a brotherhood which became, later on, a powerful sect.

On his deathbed the sidi asked to be buried on the summit of the mountain which afterward received his name, and instructed his followers to assemble around his grave once a year on the anniversary of his death.

The Omnivorous Trout.

The Journal of the Torquay Natural History society for 1921 contains an interesting report by Dr. R. L. C. Perkins on the diet of trout. Half a dozen fish averaging three-fourths of a pound, caught toward the end of August, were examined, and it was found that the bulk of the food they had been taking consisted of water beetles and ants in nearly equal proportions. The rest of the food showed considerable variety, and it seems to have consisted of anything edible that came in the way of the fish, caddis, leeches, gnat larvae, etc. One striking thing noted by Dr. Perkins was that many of the weevils and water beetles were found to be alive in the fishes' stomachs hours after capture. —Field.

Mount Everest's Name.

It is a striking fact that Mount Everest is almost the only one of the great Himalayan peaks that has not a native Indian name. The reason is still more striking. It has been the invariable custom of the survey of India to adhere to the native names. But for Everest, the highest peak of all, the most careful search failed to find any native name, and so it was called after Sir George Everest, the great English geologist. There is something pleasingly poetic in the thought that by leaving the mightiest of their great peaks unnamed the people of India have been content to think of it as the great unknown.

FOUND

By BARBARA WOOD

©, 1921, by McClure Newspaper Syndicate.

Suddenly and quite unexpected the stillness was broken by a gentle sigh. But was it a sigh? It seemed almost like a sob to the sitting upright in his chair in the library, straining his eyes to pierce darkness, and his ears to catch next sound that might break the silence. But no sound came, and sitting tense and motionless for a seconds he loosened his grip on arms of the chair, rose, and quietly and unhurriedly to the window opposite. The scene from window was as peaceful as could imagined.

Somewhere out there in the ness was a human being—a girl, woman—who had crept up to his dow with what intention it was possible for him to guess.

With a sudden determination to her, Roger Tilton put his foot over window sill and in a moment he had dropped noiselessly to ground and was ready to begin search.

"Oh, for a clue!" he whispered himself. And then, gradually, it to him that the air seemed to a very faint, sweet perfume.

He drew a flashlight from his pocket and threw its rays about the where his feet had landed in the earth. Not two inches from the of his polished oxfords lay a crumpled little white handkerchief, and with queer thrill of excitement he picked it up, smoothing it out between fingers to see if there might be initial in the corner. It was a small white square of linen, and it was damp.

"So it was a sob, after all," thought, and then his eyes caught monogram—three letters embroidered very neatly and obscurely in one corner: RLB. The man looked as though he had been struck and after a moment he, too, caught his breath something very like a sob.

"Ruth!" he whispered.

He felt as though someone gripped his throat in a vice. At almost desperately, he breathed prayer:

"Oh, God, if it is Ruth, please me find her. Please; for I can't her go again."

He moved slowly toward the wing of the house.

It was then that one might noticed the slight limp that was ways with him, and perhaps, if thoughts could have been read, would have found a world of suffering and sorrow behind those clear blue eyes that were eagerly scanning every shadow and hiding place. For his memory had gone back to the day two years ago when he had come back from France—a victim of shell shock and bearing in his thigh an exceedingly disagreeable wound which would thereafter place an impediment on every step he took. That day was the hardest he had ever faced, for the thing he wanted most in all the world to do he could not do—to see Ruth Bradford; to go to her and to feel the comfort of her hot tears on his face.

He remembered with a twinge of pain the contagious ripple of her laughter, and he wondered whether she had learned to laugh again after he stopped writing. They had been engaged when he went to France and for months their letters were long, frequent and comforting. Then came the shock and the wound, followed by many weeks in a hospital. After that he had sent her no more letters. His pride and his sense of honesty forbade it, for he realized that it would not be fair to expect her to bind her perfect womanhood to one who was maimed for life.

All these thoughts and many more raced through his mind tonight and it was with a start of surprise that he found himself at the edge of the swamp.

It was only a matter of minutes before he found her, but it seemed like years. She lay face down in a patch of moonlight. Her hair was loosened so that it lay like a pool of gold about her shoulders. One foot was unmercifully twisted in the gnarled root of a tree; that had been the cause of her cry of pain. Roger knelt beside her and with fingers that trembled he loosened the strap of her slipper and very, very gently removed the injured foot from its imprisonment. He lifted a strand of her hair in his fingers and pressed it to his lips.

"Oh, little girl, I didn't know; I—didn't know!" he sobbed.

At last, while he was watching her closely, her eyes opened, slowly, quizzingly, and looked up at him with a questioning, far away look.

"Ruth!" he whispered, and again, "Ruth!"

His lips sought hers again and again, and it was many minutes before either of them remembered that they had voices.

"Roy," she said when she finally did remember, and the old familiar nickname sent a thrill of joy right straight to the man's heart. "Roy, you'll never hide from me again, will you? Oh, promise that you won't, for it's been almost too much to bear."

"No, dear, for I couldn't. I couldn't if I would; and I wouldn't if I could. Does that make you feel better?"

Ruth closed her eyes to hide the great wave of happiness that went surging through her heart, and it seemed to her that she could hear the music of children's laughter ringing in her ears.

Wild-Life Refuge.

The Rockefeller foundation has presented to the state of Louisiana a tract of country comprising some 35,000 acres known as the Grand Chenier Wild-Life Refuge. The land was purchased by the foundation from individual holders in 1914 in order to preserve the wild life of the country, and it is a condition of the gift, which includes laboratories, publications and equipment connected with the preservation enterprise, that the tract shall remain as a perpetual wild-life preserve.—Scientific American.

A Sane GGolfer.

"Well, I've at least reached the point where I think I shall be able to get a little comfort out of golf."

"That so? Mastered the swing, have you?"

"Not at all. I've just brought myself, after years of disappointment, to the conclusion that I am never going to be amateur champion. From now on I shall try to enjoy breaking one hundred now and then."

In Demand.

"Don't you know it's against the law to sell books like this?" asked the man who was browsing in a second-hand book store.

"What is it?" asked the proprietor.

"A bartender's guide."

"Gosh! I wonder where that book came from? I didn't know I had it in stock. Why, I can get more for that little work than I can for a rare first edition."—Birmingham Age-Herald.

Gentle Hint.

"I say, Neil, I was reading that there are 60 different ways of cooking potatoes."

"I've heard so, but boiled—"

"Well, don't you think it would be exciting to try one of the other 59 ways once, just as an experiment?"

KIDD NOT PIRATE

And His Treasure a Fable, Says Archivist.

Massachusetts Authority Asserts That Lord Bellomont Was Arch Scoundrel—High-Placed Adventurers.

Song and story are wrong. Captain Kidd was not a pirate and his fabled treasure does not exist. Privateersman he was, but of good repute. His hanging as a pirate and murderer on execution dock at London in 1701 was to satisfy the political exigencies of the time.

These are the findings of John H. Edmonds, state archivist for Massachusetts, as announced in a lecture at the old South Meeting house. Archivist Edmonds was discussing "Lord Bellomont and the pirates." Bellomont, he said, was appointed governor of New England in 1695 with a special mission to suppress piracy.

"Before leaving England," Mr. Edmonds contended, "he agreed with Capt. William Kidd, a privateersman of good repute from New York, to proceed against pirates in a ship called the Adventure, galley, on a 'no-capture-no-pay' basis. The adventurers included Captain Kidd, Robert Livingston, Lord Chancellor Somers, the earl of Oxford, first lord of the admiralty; the earl of Romney, and the duke of Shrewsbury, secretaries of state; Bellomont and the straw men, to whom the king's grant of treasure was later made, did not contribute a cent.

"On September 6, 1696, with a 'crazy' vessel and a crazier crew, Captain Kidd proceeded on his mission," the archivist said. "He picked up several pirates, including "a Moorish ship of 200 tons and a Bengal merchantman of 500 tons, both having French passes and being lawful prizes."

He came to New York and then to Boston "through the trickery of Bellomont, who promised him safe conduct. With the remnant of his crew he was arrested, sent to England, tried for murder and piracy, convicted and hung on Execution dock Friday, May 23, 1701, to satisfy the political exigencies of the times.

"It was either Lord Bellomont, the lord chancellor, the first lord of the admiralty, the secretaries of state or Captain Kidd, and under this circumstance he had no chance. Collusion and perjury are plainly evident in his trial; the French passes which would have cleared him of the piracy charge, though produced in parliament, were suppressed in the Admiralty court. The least said about Bellomont's action in the matter the better. He fooled Kidd, he fooled his council, and the worst of it is, he allowed it in his letters to the lords of trade.

"The Captain Kidd of today is a composite pirate made up of all who frequented our shores from 1637 to 1837. Propaganda of the worst kind blackened the reputation of a man of whom a recognized French authority says: 'It may be well doubted whether any man in equally trying circumstances has ever been truer to his trust.'

"And yet the great American public persists in calling Captain Kidd a pirate and in searching for his treasure, which does not exist."

"Boy" Behind the Voice.

A business man who was in a great hurry called up an establishment that had failed to deliver goods as ordered. A tiny boyish voice was heard at the other end of the line: "What is it that you wish?"

"Mr. Jones, boy, and hurry."

"All right," and the receiver was hung up. In a few minutes it was taken down and the small voice replied:

"Mr. Jones is not in. Can I help you?"

"See here, boy," snapped the man who was in a hurry. "I want to talk with some one who can do business. When I need the office boy I will call for him. The way for you to get along is to let the other things alone and attend to your own duties."

"That's what I am trying to do," meekly said the small voice. "I am the president of the company."—Philadelphia Ledger.

CHOLERA KILLS MANY

Spreading Over Place Where Turks and Armenians Fought.

An Average of 25 Persons Are Dying Daily in Streets of Alexandropol From Cholera and Hunger.

Constantinople.—Cholera is spreading throughout that part of Armenia which was the scene of the war between the Turks and Armenians last winter, according to a dispatch from Tiflis, forwarded by Paxton Hibben of Indianapolis, Ind. Mr. Hibben is a member of the group of representatives of the Near East relief and recently visited Armenia before starting northward through Russia to Moscow. He writes that the cholera is due to lack of foodstuffs and the consequent reduced resistence of the population.

"An average of twenty-five aged persons and young children are dying daily in the streets of Alexandropol from both cholera and hunger," he adds. "The bodies are being loaded in wagons which are continually making the rounds of the streets.

"The American Near East relief is taking additional hundreds of virtually naked children into its already overcrowded orphanages until buildings can be obtained.

"There are 68 registered cases of cholera in Erivan and 141 at Alexandropol and the deaths are averaging 20 per cent of the cases.

"The homeless inhabitants of 140 towns razed by the Turks are camping in the fields and swarming in the city streets, and are without the slightest hope of assistance from the impoverished government in whose paper money 6,000 rubles is equivalent to 1 cent.

"The Armenian foreign minister, Ascanas Mooravian, and the minister of supplies, Sarkis Srabeonian, recently waited on a delegation of twenty-five Americans headed by Charles V. Vickery, general secretary of the near east relief, to appeal for American aid to see Armenia through the winter. They stated that the government was trying desperately to obtain grain from Persia, but that the Persian government was becoming alarmed at the exportation of foodstuffs and had ordered an embargo, thus cutting off the only near-by source of supply."

FINDS RARE MOSAIC WORK

American Student Discovers Masterpiece In Forgotten Cathedral Some Miles From Rome.

Rome.—An American young man, Harry Sternfeld of Pittsburgh, winner of the "Prix de Paris," student of the American academy here, has discovered a masterpiece of Cosmodi mosaics embellishing a great facade of a medieval cathedral. It is several miles from Rome, a Civita Castellana, a place for centuries forgotten, where the genius of Cosmodi and his sons s but commonplace because of familiarity.

The design was executed in 1210 and shows the influence of the Byzantine school. The whole of the facade is rich in color and glittering with golden fragments of stone which has stood the test of 700 years. The immense detail in the design staggers one. The top of the loggia is one mass of mosaic done with variegated colors. Sternfeld says the work is "a dream; the best example of outside decorative mosaics I know of."

SEEKS TO PATENT U. S. FLAG

British Firm Denied Application for Trademark in South America.

Buenos Aires, Argentina.—Complaint has often been made by manufacturers and others that on entering South America for the purpose of selling their products they found that some enterprising person had appropriated their trademark and patent rights, thus being able to prevent the use of the manufacturer's own brands without "adjustment."

Probably the most curious case of such an attempt to appropriate a design was made here recently when an English firm applied for patent rights on the American flag. It was denied.

MYSTERY OF LOST ATLANTIS

Believed by Many to Be Merely Legend, but Idea Can Not Be Entirely Uprooted.

Will the mystery of "lost Atlantis" ever be solved to general satisfaction?

The story has been told for centuries, and is still accepted as true by numbers of people on both sides of the Atlantic.

The original idea was that an island of immense size and great beauty existed beyond Africa, with many large cities, and nations having strange laws and customs. Some writers have even gone so far as to describe the kind of clothing the people wore and the money they used.

Then the story goes that the inhabitants of this great island of Atlantis grew bold and warlike, and that they invaded Europe and Africa. But fate was unkind to them—because of their wickedness, it is said; terrible earthquakes and floods occurred, and in a single day and night Atlantis was swallowed up and sank into the depths of the Atlantic ocean.

In the attempt to find some ground for the persistent belief, one famous scientist fell back upon the time, thousands of years ago, when great tracts of the earth were covered with a sheet of ice of vast thickness.

In this ice were imprisoned such enormous quantities of water that the level of the oceans sank quite low, with the result that large areas of land were left uncovered. One of these uncovered portions, he suggested, was the island or continent of Atlantis, which, on the melting of the ice, was covered again by water to a great depth.

The western mountains of Europe and the eastern mountains of North America are supposed to be fragments of the high mountain ranges of this mysterious "lost Atlantis."

Pig Clubs Flourish.

Wall Street has many club and fraternity men, but probably no members of the Pig club. Indeed, such a club could not flourish in lower New York. Yet, it is one of the greatest clubs in the country. The promoters are usually country banks. Membership is obtained by borrowing money from the bank to buy a pig of distinguished ancestry. Little freckle-faced farm boys make up the membership. The notes are always paid in full and the embryo farmer becomes a producer of thoroughbred live stock. One little member in Oklahoma who started with a pig and a debt at the bank recently walked out of the fairground with a big cash prize in his pocket, and now he owns a herd of purebred Poland China's and a bank account. The Middle West is swarming with such members and still new clubs are forming. Wall Street is interested because in one year the packers alone paid the farmers $1,758,000,000 for hogs, and these little club members are adding immensely to the value of the future production.—Wall Street Journal.

MICKIE SAYS

Men Only--

This is a personal add, by a man to men and men only [Ladies keep your eyes off please] There are two kinds of men in the world, Single men and Married men --- and to each of these classes of men we have a Christmas suggestion to make.

Single Men--

Now when Christmas eve comes, don't rush up to the first Pretty Girl you see and hug her, such cave man methods may get you in bad. There is a better way: hand her a box of Gift Stationary, or wish her a Merry Christmas with a piece of Jewelery of Real Merit, such as a Bar Pin, Lavalier or Ring. How could she ever forget you if your gift of Jewelery were of such splendid quality as to last a life time? Talk these matters over with us. We handle the Merite line of gauranteed jewelery, and can please you with the best.

Married Men--

Be careful what you give friend wife for Christmas, a rolling pin would not be appropriate, and a box of chocolate candy is hardly enough. She has been "Saving" and doing without all year and has done her best to make ends meet, surely she deserves a most exlcellent gift. It must be something usefull and it must be something "for the house". New linoleum or a new rug would please her.

A few new pieces of furniture would be enough to show how much the "Head of-the-house" appreciates her companionship and helpfullness.

Remember "You Cannot Over-do" when it comes to buying a gift for friend wife.

Wellemeyer's

Headquarters for useful Christmas Gifts *Klemme, Iowa*

Special sale Plush Coats

On account of the Labor Troubles in all sections of the manufacturing centers it has been almost impossible to secure Plush Coats. Mrs. Whitney suceeded however, on her trip to Chicago this week in picking up a wonderful assortment of Plushes which we are placing on sale this coming week at prices that are more than reasonable. Among the assortment will be found plain, as well as fur trimmed models, in all lengths and sizes, in fact we have them up to 52 in. bust measure. Now is your opportunity of securing the Plush Coat you have been planning for.

Prices range from $18.75 $59.50

Miss Doran returned to her home at Grand Junction Thursday after spending a week with her friend Alva Matson.

GOODELL HIGH SCHOOL NEWS

Both basket ball teams went to Rowan Friday night. The players on the girls team were as follows: Forwards, Louisa Ahrenkiel and Mae Griggs; Guards, Adeliade Engesth and Agnes Fuller; Jumping Center, Lucille Miller, Running Center, Louisa Mason; Morvel Chase and Edith Halfpop as subs. A very good game was played and each and every one fought for the ball, a slight change was made in the last half of the game. Halfpop was put in as forward instead of Griggs and Griggs in as running center instead of Mason which resulted in Halfpop making our only basket. The old gym trembled as the spectators cheered. The scores were 2 to 44 in favor of Rowan, of course. The Rowan girls showed that they were experienced players and that our girls could not compete with them now, but perhaps later on they can. The game was not a rough one and our girls played exceptionally well considering the amount of time they spent practicing and it being their second game.

The players on the boys team were Eddie Bollar and John Miller as forwards; Arthur Lowenburg as Center; Dale Chase and Don Estelle as guards—Carl Sandberg and Harold Savague as subs. We were all very sorry that one of our best players, Francis McNnuty or rather "Mac" could not be with us on account of illness. The scores were 7 to 44. The Rowan boys proved to be experienced and very good players. while this was only the 4 game for our boys, every one is given credit for good work he done. Sandberg was put in the last half of the game instead of Chase. After the game all the participants being chaperoned by Misses Dows and Jenkins and Prof. Nelson attended the movies. Then the boys were taken to the homes of the Rowan boys and entertained until a quarter of 8 o'clock the next morinng and the girls to the homes of the Rowan girls—everyone voted tahe Rowan boys and girls royal entertainers. The "Bunch" was chaperoned by Miss Dows and Jenkins and also Prof Nelson. We had planned to go down in cars but the bad roads did not permit us to do so—so we all went down on the Rock Island returning Saturday morning. The next game the girls have on the schedule is with Belmond next Tuesday nite and the boys with Kanawha the same nite. Friday nite they will play a double header with the Dows teams on the Dows floor.

Miss Feuerlaman was up at school Wednesday and Thursday.

Leona Sandberg has been absent all week.

Dunsany a Fast Writer.

Lord Dunsany, who, despite the slump in theaterland, has had a new play produced in London recently, appears to be well nigh as facile a playwright as Lope de Vega, remarks the Manchester Guardian. From the preface to "Plays of Birls and Men" we learn that the longest of these, a three-act tragedy, took him only three days to write; a two-act play took two days; a one-act play one day. The time allowance of an act a day was exceeded only in the case of "The Queen's Enemies," the single act of which took six days, and most readers of the volume will agree that it is the least effective play of the four. Mr. Pond, the lecture agent under whose auspices Lord Dunsany toured the States two years ago, says: "To see Lord Dunsany at work—a thing which he seldom permits—is to see a ceremonial. He uses large, square-cut enameled paper, and he writes with a quill pen. On one side he has a great stack of fresh blotters, and when he finishes a page he blots it and throws the blotter away."

Farm on Bed of Lake.

It seemed impossible to read the heading, "A Cultivated Lake," without wondering whether any of the inhabitants of the lake were cultured, like some oysters. The lake in question is Lake Cirtnitz in mideastern Europe. The most cultured occupants turned out to be the human beings who sow and harvest on the lake bottom in summer, the waters having departed suddenly through great fissures in the bed of the lake. In the autumn the waters return as rapidly as they went, throwing up cascades of foam as if from blowholes. Presumably the lake is fed in winter by water coming to it underground from a body of water higher in the mountains and, in turn, empties into some lower lying basin.—Christian Science Monitor.

Oysters' Liver Complaint.

Two professors in physics at London university, England, are conducting exhaustive tests on behalf of the Daily Mail, with a view to finding a possible difference between ordinary and Japanese pearls. A Japanese pearl is produced by inserting a seed pearl or mother of pearl into the liver of the oyster.

Mr. Alfred E. Calvert, a fellow of the chemical society, stated recently that the several specimens of Japanese pearls he possesses are identical in weight, color and luster with ordinary pearls, and they are produced by the oyster from the same material and by the same process as the other variety.

Lord for titles and chateaus and things. Three rousing cheers, and then some, to all the aristocracy."

Then only he had set about courting Jane in earnest. Earlier he had felt it would be insult. Now in the very back of his consciousness he wondered if his scruples might not cost him his happiness. He was in no fear of the ruck swarming after her, but John Lapsley was the devil to beat, once his mind was made up not to be beaten. He had shown that overseas no less than Bledsoe himself.

When one speaks or even thinks of the sun, sometimes one beholds his rays. A motor-horn, viciously insistent, made Bledsoe turn to face Jane and Lapsley, beckoning to him and laughing hard. "You—you have to show us," Jane panted: "The major says you're an immortal liar—about Rough[illegible]

SLEEP IN CHURCH

"Forty Winks" Under Happiest of Conditions.

Idea Seems to Appeal With Considerable Force to Writer in Louisville Courier-Journal.

Cool, cavernous, well-ventilated, cushioned churches are fine places in which to snatch 40 winks of sleep. But for the disposition of mean-natured persons to speak unkindly of one who sleeps in church the invitation of a Louisville minister to sleep in his church during his sermons might join the building Sunday mornings, making sleeping in a pew as comfortless as sleeping three in a bed.

Those who are not sensitive to unkind, un-Christian, criticism can enjoy sleeping in church and going home, as the pastor says, "refreshed and declaring the sermon and the theology fine."

Sleep in itself is the supreme realized experience of the average work-ridden, worry-bitten, dog-tired human being, declares a writer in the Louisville Courier-Journal. It provides all of the refreshment of the bath without the labor of tubbing and rubbing. Sleep is more reconstructive than a drink, and it is an antitoxin, whereas the drink may be, nowadays, cold poison procured by battery.

The poets, many-voiced, silver-tongued, have smitten the lyre and sung the delights, the uses, the magic of sleep. The philosophers have pointed out to the weary, to the disillusioned, the "popular ways of sleep."

Sleep paroles the prisoner whose days are spent in penal servitude and whose nights are spent in a cell, making him as free and as light-footed as Ariel.

Sleep suspends the life sentence of the man who is in the clutches of incurable illness and beckons him to the ruddy experience of youth and health.

The jilted lover sleeps and knows the happiness of love requited.

The bankrupt sleeps and experiences the dignity and the power that wealth showers with barbaric hand upon the merchant princes of the gorgeous west, along with pearl and gold.

The widow, gray, bent, old, childless, a victim of poverty and loneliness, sleeps and is again the bride whose slippered feet are at the gates of Elysium.

"Sleep" is found, in any book of familiar quotations, between "slander" and "slavery," from both of which it provides respite, and next to "smiles," near "solitude" and "song," and "sunshine." But it is found nowhere in happier circumstances than in church, somewhere between the announcement of the text and the pronouncement of the benediction, for sleep's caress upon the eyelids of the weary falls more softly and sweetly when it comes "like Diana's kiss, unasked, unsought," than when it responds to such advances as getting into night-clothes and into bed.

Sleep in church is at its best when the church is made of logs and stands in a wood. The preacher is long-winded. The squirrel barks, the blue jay chides, the leaves rustle outside the windows. As the parson thunders out damnation in mid-discourse the meat of the argument goes to your wakeful neighbor while you "eat in dreams the custard." Even in town, with the jangling noises of the streets invading the edifice, there are rare sweetness and solace in the nature of a minister who invites the weary to come to the church and enjoy a nap, for which he promises, generously, to provide the lullaby.

Chilean Fruit in America.

An experimental shipment of grapes was sent to New York with a view of ascertaining whether a market could be found in the United States for the product of the Chilean vineyards. The grapes were shipped in cold storage and are reported to have arrived in excellent condition and to have been sold at highly satisfactory prices. It is reported that another shipment is planned as soon as arrangements can be made. The experiment is of particular interest, since it is possible that the exportation of fresh fruit from Chile to the United States might become very profitable, providing that shipping facilities were available. Chile produces fine fruit of almost every variety known to the temperate zone and it ripens during the winter months in the United States when the market would be at its best.

Flies Spread Plagues in Russia.

Spread of dread diseases in Russia, due to swarms of flies and gnats, the Pan-Russian health congress at Perm Health Commissioner Samasjko presented a sensational report. Typhus, he said, was rapidly spreading in southeast Russia from Persia and Siberia; cholera was raging in the southern and middle governments, and there was hardly one part of Russia unaffected by malaria. This alarming condition of things he attributed to the numerous swarms of flies and gnats, which were the disease carriers.

By Way of Proof.

It is being insisted upon that college students of today are not nearly as great fools as their great-grandfathers who graduated. It must be so. Nobody today tries to get a cow into the chapel or upon the roof of the dormitory.—Minneapolis Journal.

PRETTY LEGEND OF SILKWORM

Father's Treacherous Act Believed by Chinese to Have Brought Blessing to the Earth.

The head of the silkworm is strikingly like that of a horse. There is a legend supposed to account for it.

In the olden days, when gods lived among the people, there was a man whose prosperity had been changed to poverty by the ravages of a dreadful war. He possessed but one treasure, a handsome horse which had been brave and loyal throughout all trials. In his time of distress the spirited horse offered himself for the work of a common pack horse, and one day, when he came to a halt, weary from unaccustomed labor, the man urged him forward.

"Walk, my good friend," he said; "when better days come I will reward your faithfulness. My beautiful daughter shall be your bride."

The horse sprang forward with joy, and from that time was more faithful than ever, and the man's fortune grew better day by day.

The daughter was very lovely, and one day the governor saw her and asked her in marriage. When the father proudly consented, he was so indignantly upbraided by the horse for his forgotten promise that the man, in rage, killed the horse and hung the hide with the head attached on the garden wall. The maiden saw it and the sad eyes touched her heart with pity, but the father laughed and exclaimed:

"I promise again. Win and take?"

No sooner had the words left the mans lips than a fierce typhoon came whirling through the air and caught up the horse's hide into its darkness. The thunder god rolled and crashed his whirling drums, the wind god loosened his hold on the great bag of winds, and all the world was filled with roar and tumult and terror. The father called and called for his daughter, but the beautiful maiden was gone.

As the typhoon whirled away, one dark cloud drifted back from its inky trail and fell to the ground, not a cloud, but the horse's hide, and twisted closely in its folds was the maiden, calm and beautiful, but dead.

Then the father knew it was a god he had wronged, and, deeply sorrowful, buried the two together with honors.

The next morning the sunshine glistened softly on the grave. The dewy grass was covered over with a cloud-like silken web, and within the filmy meshes sat numberless fairy spinners with long, twisted bodies and gentle, swaying horselike heads.

So came the blessing of the silkworm to the world.—Indianapolis News.

Bank Keeps Gold Under Water.

No other bank in the world is protected as the Bank of England, writes William S. Walsh, who collects odd bits of information. This unique protection is due to an artesian well in the bank. This well supplies the bank with its water independently of the rest of the city; it is 400 feet deep and supplies 7,000 cubic feet of water an hour.

The bullion department, which holds the ingots of precious metal, is nightly submerged in several feet of water by the action of special machinery. Anyone attempting to rob the bank, then, must be an expert swimmer and diver. In the morning the water is pumped away and the ingots are readily accessible again.

However, the water still protects the other departments of the bank. Its supply is almost unlimited, the bank knows, and its protection is practically absolute when it is used. The bank has very delicate machinery arranged so that even the lifting of one coin from a pile will release a catch which in turn releases a supply of water.

Mummy of Famous Queen.

The mummy of the historically famous morganatic wife of the Egyptian king, Amenophis III, who died about 1420 B. C., has just been received at the museum of the Emory university, Atlanta, Ga., one of the larger institutions of the Methodist Episcopal church, South.

The mummy, together with almost a carload of priceless records, was brought to this country by Dr. W. A. Shelton, professor of Semitic languages at Emory, who spent a year in excavations of lost cities.

Queen Ti, the name of the bride of Amenophis III, was famous in her time through the fact that the king in marrying her defied the world by choosing a bride for love. She was considered a woman of rare beauty. Her son, Amenophis IV, abandoned the gods of his fathers and built altars to a new god—a one God.

To Raft Logs Across Ocean.

From Vancouver, B. C., to Yokohama, Japan, the distance is 4,283 miles. Between the two rolls the vast ocean that bears the reassuring name of Pacific. As a rule, it is not so stormy as the Atlantic, but it has its days of rage, notwithstanding its name.

Undaunted by this great distance and the dangers of storms, a firm of Japanese lumber importers proposes to raft timber from British Columbia to Japan. The Davis raft plan is to be used. The essential of this plan consists of an outside row of logs laced with strong cables. The raft will have a superstructure of piled logs, all strongly laced.

If the venture succeeds, a great quantity of timber will be transported to Japan at a much less cost than would be entailed by carrying it across the Pacific on board ship.

GRAIN AND LIVESTOCK INTERESTS ARE LOANED MILLIONS

As enlarged and reorganized under additional powers given it by the special session of Congress, the War Finance Corporattion, from August 24th to November 21st,—a period of 90 days,—has made actual loans for agricultural and live stock purposes in the aggregate sum of $58,538,505. This is an average of a little over $19,500,000 a month. or $4,181,000 a week. In considering this average, however it should be borne in mind that the first month or six weeks of the operations of the War Finance Corporation under the new powers given it by Congress was largely expended in setting up machinery to reach the agricultural sections. Now that the various regional committees have been appionted and the machinery of the corporation is perfected, loans are being made to farming communities far in excess of the average for the 90 days.

The week ending November, 19th, the corporation made 218 separate loans for agricultural and likvestock purposes in the aggregate amount of $13,447,000. On Monday, November 21st. it made 76 loans for agricultural and livestock purposes aggregating to $3,187,000. On Wednesday November, 23, it approved 56 loans for the same purpose, aggregating $2,073,000. At present the corporation is making loans to farm communities at a rate in excess of $10,000,000 a week.

A compilation of the number of loans made bp the corporation from August 24th to November 21st, inclusive, shows that Iowa led the states in the number of loans secured from the corporation and also in the total amount of money loaned. In that period there were 116 separate loans made for agricultural and also for livestock purposes in the state of Iowa, agregating $4.7$5,000. South Dakota comes next with 48 separate loans aggregating $1,461,000.

The largest single loan was made to a co-operative society which handles farm products, principally grain in the states of Minnesota, North and South Dakota. This loan was in the sum of $15,000,000. Three co-operative societies in California received loans aggregating $2,800,000. A co operative sasociation in Arizona was loaned $1,200,000.

ALL WESTERN STATES HELPED

The second largest single loan was made to the sugar beet interests of Utah and Idaho, they being given an advance of $4.150,000. The largest single livestock loan was given to a financial institution handling livestock paper in the states of Montana and Wyoming. This loan was the sum of $1,000,000. Another institution handling live stock paper for Montana was loaned $600,000.

Montana livestock and agricultural interests have been given 13 loans in the aggregate sum of $917,000. Minnesota has received 28 loans in the aggregate sum of $482,775. North Dakota received $598,000 in 20 loans. Wisconsin received $510,000 in 17 loans. Wyoming received $981,000 in four loans. Kansas received $700,000 in 13 loans; Missouri 735,000 in 17 loans.

WHY BANKS ARE USE

There is some criticism of fact that the finance corp makes its loans to banks ins direct to farmers and cattle g This critticism is due to lack of ledge of all the facts in the Were the war finance corpora make its loans direct to indiv it would have required the cr of an enormous federal depar employing thousands of peop would have necessitated the cr of an intricate system that have required many months into operation. All this would taken so long that the benefi loans would have been lost, great majority of cases the em cy was so urgent that the f and stockmen could not have months for financial aid. Moreover the overhead expe such an organization would lessened the amount of money disposal of the Finance corp and would have necessitate and would have necessitate charging a higher rate of inte

1 Bay Mare, 9 yrs old, wt 1100. 1 Black Spring Colt, by Index.

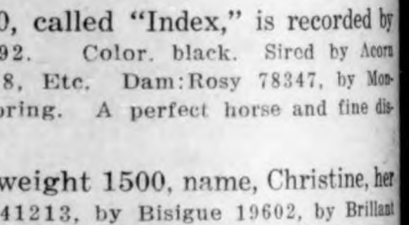
THESE HORSES ARE ALL SOUND AND GOOD WORKERS

39 HEAD OF CATTLE

9 Milch Cows, coming fresh soon.
11 Head of 2 year old, Black Pole Angus Heifers, crossed with Holstein; will make excellent milch cows. All coming fresh.
7 Head of 2 year old Shorthorn Heifers, coming fresh in spring.
3 Head of Hereford Heifers..
6 Yearling Steers.
1 Shorthorn Bull, yearling.
1 Guernsey Bull, yearling.
1 Shorthorn Bull, 2 years old.

82 HEAD OF BIG TYPE DUROC HOGS 82

7 Head of Sows, good ones.
21 Head of Yearling Gilts. Fine ones, weight about 350 pounds each. All bred.
16 Head of Spring Gilts, weight about 175 pounds each.
28 Head of Fall Shoats, weight about 50 pounds each.
10 Head of Spring Boars. Pure Bred, ready for service.
THESE HOGS ARE ALL PURE BRED AND AS GOOD AS CAN BE HAD.



Farm Machinery Etc.

1 Mogul Tractor 8-16, and plow with 3 14-in. bottoms complete. This tractor is in good condition and has only plowed 325 acres and little outside work
1 Studebaker wagon with triple box.
1 Hubbard wagon, triple box.
1 Iron wheeled truck.
1 Good hay rack.
1 Good spring wagon.
2 Top buggies.
1 Deering binder, 8-ft. cut.
1 8-foot disc.
1 10-foot disc.
1 John Deere corn planter, with 120 rods of wire.
1 Endgate seeder.
1 20-foot drag.
1 3-section drag.
1 Double row corn cultivator, nearly new, a good one.
1 Single row cultivator.
1 Tower surface cultivator.
1 2-horse hay rake.
4 sets double work harness.
1 set single harness.
1 Galvanized hohg waterer.

50 TONS OF HAY—20 tons of timothy and prairie mixed, and 30 tons of prairie hay.
100 Acres of Corn Stalks. 30 tons of straw. Many other articles too numerous to mention.

TERMS—All sums of $10.00 or under, cash. Over that amount 10 month's time will be given on bankable notes bearing 8 per cent interest. No property to be removed until settled for.

SOMETHING TO THINK ABOUT

By **F. A. Walker**

ENNOBLING QUEST

the banishment of Adam and from the garden of Eden, e has been a quest among d which has continued with- rmission.

question there is at every our hands and every shift of signs of fear, doubt and ime lightens not the labor of he chase continues. All hu- e in the struggle, seeking g—a cherished ideal or some substance which they would asp to their bosoms and call . But the reward is for the

ithful and those who heed the of the Golden Rule plod omplainingly, steadily and si- ke the tides. They accept s and do their best.

now not the petrifying fear es moral cowards of the lag- who shirk duty and are to soil their hands with the honest toil.

mmandment which says, "six t thou labor" has no terrors , so they shoulder their bur- march on to the end with ls and smiling faces.

are the real workers, the salt earth, the faithful and the the builders of nations.

Life to them is endurable. It is sweet in the morning when the sun gilds the east, seductive at night when they are tired and sleep comes unbidden and carries them to the land of dreams.

They make agreeable friendships among their co-workers, and always have friends at home who are glad to welcome them.

Their quest resolves itself into one of love, and in holding fast to divine precepts, it soon becomes their absorbing ambition. Their hearts are attuned to heaven's music.

They have no wish to pile up gold, no greed that sours life, no fear of the outcome of their endeavors, no preference, except to do the will of the master and patiently await his reward at the end of their earthly journey.

The idle know nothing of the supreme joys of those who labor and love. If you would have for your own the happiness which pays the richest dividends in life, let the ennobling quest of labor and love be yours until the end.

LYRICS OF LIFE

By DOUGLAS MALLOCH

LIVE LIKE A ROSE.

THE year is coming to a close;
The days are falling one by one
Like petals of a dying rose,
A bloom that still in beauty goes
When all her garden days are done.

And what is life? It is a year,
However many years it span—
In childhood's springtime to appear,
To live the summer of a man,
And then to feel the autumn here.

And what is death? The final day
Of life's short year, a day like these
When summer puts her garb away
And winter winds begin to play
Their wild, tempestuous harmonies.

Live like the rose: The roses bloom
Not for themselves but for the earth,
Pink lamps that garden walls illume—
A decoration for our mirth,
A holy solace for the tomb.

Die like a rose: Its petals fall,
But it is sweetness to the end—
Oh, it is something, after all,
To be a rose beside the wall,
Beside the way to be a friend.

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE HAND OF A LAWYER.

TO JUDGE whether a person is fitted for success in the profession of law, note whether the hand possesses the following characteristics:

The second phalanx of the thumb (between the first or nail joint, and the rest of the hand) should be long, strong and well proportioned. This indicates good reasoning power, a logical mind, and strong intellect generally. Now, as the will power in a lawyer must be strong, if he or she is to attain any rank in the chosen profession, the first phalanx of the thumb must also be markedly strong and well developed.

Next, proceed to an inspection of the Line of the Head. Necessarily, this must be good. Eloquence must accompany the successful career in the law, and this is indicated by various signs, one of them being a decided line running between the second phalanx of the little finger and the third.

Home Town Helps

ADDS TO VALUE OF PROPERTY

Effective Argument as to the Necessity for Carefully Thought Out City Planning.

City zoning and city planning tend to stabilize real estate values and make it easier for the real estate dealers to offer permanent investments to prospective purchasers. This forms part of the advice that J. C. Nichols of Kansas City has offered his fellow realtors. He says:

"In talking last summer with the comptroller of a life insurance company which loans a larger amount of money on real estate than any other company in the world, I asked him if he thought $100,000,000 was too large an amount to place on the destruction of property values in our cities from year to year by the shifting of downtown business centers and by the abandonment of high-class residence property.

"'Why,' he said, 'Nichols, $100,000,000 would not begin to cover it.' I said: 'What do you think—$500,000,000?'

"'Well,' he said, 'I doubt very much if that would cover the annual loss in money from the unnecessary shifting of our property values.'

"Now, with what confidence can we present to an investor the proposition of buying property if we have to admit right on the face of it that we are in a business that deals with uncertainties, that we are in a business that deals with shifting values of property?

"There is the very keynote of city planning from the standpoint of the realtor. It stabilizes the very product which you are presenting to your investors, and I cannot understand why the National Real Estate association has not yet realized that the city-planning movement that is starting in this country will have more effect upon the business of every real-estate man than all the other movements put together."

BLACK WALNUT TREE BEST

Department of Agriculture Points Out Its Excellent Qualities as a Roadside Ornament.

In line with movements launched by automobile clubs and associations, state highway departments, the American Legion, the American Forestry association, and various good roads organizations, the Department of Agriculture is urging the planting of black walnut trees along the highways. The late war drew heavily upon the black walnut timber supply for airplane construction but it ended before the larger trees entirely disappeared. The supply has been greatly reduced, however, and the department urges that it be increased without delay. It is believed that by planting walnuts in the soil and rearing trees along the roads ample seed can be secured from these trees to re-establish the walnut forests whenever they again become depleted. Few species of trees have a wider geograhic range, few are more rapid growers when given a favorable environment and few are more effective as to shade and landscape. In addition, the black walnut produces a nutritious food.

Unpaid Commission Does Best Work.

A Department of Agriculture bulletin insists that providing shade on city streets is as much a municipal function as providing lights or sidewalks, and should, therefore, be cared for by public officials. Probably the most efficient way of arranging for proper supervision, it says, is through an unpaid commission of three or five members, which, in turn, employs an executive officer. Methods of organization are described, and numerous illustrations show how trees should be planted. There are chapters also describing pruning, spraying, transplanting and other subjects of importance to every town or city, whether it has trees or wishes to have them. The bulletin may be had free upon application to the division of publications, United States Department of Agriculture, Washington, D. C.

"Roads of Remembrance."

The "Roads of Remembrance" idea, originated by the American Forestry association in the avenue of memorial trees leading to the tomb of the late President McKinley, are now being planned in many sections of the country, according to reports received by the association.

National patriotic organizations have adopted the idea of marking points of unusual interest, and civic improvement groups are using it to beautify local roads and highways.

A County "Home Bureau."

The Livingston county (Illinois) "home bureau" has resumed its regular activities. The principal study is foods, but citizenship and child welfare have been added, and two thoroughly trained leaders have been secured to direct these subjects.—Chicago Daily News.

White Blocks for Traffic Lines.

White concrete blocks instead of painted lines are used in Portland, Ore., to mark cross-walks and other traffic lines placed on the streets.

IS ANCIENT CITY

Haifa Has Figured Prominently in Biblical History.

Recently Made a "Free Port" the Place Is Inseparably Associated With Holy Memories.

"A man who could hover about Broadway and Forty-second street in New York for a year and escape attention would be comparable to Haifa, comparatively obscure along a littoral flecked by Tyre and Sidon and Gaza and Jaffa, with Damascus and Jerusalem in the hinterland," says a bulletin of the National Geographic society concerning the city which, dispatches state, is to be a free port by agreement of British and French mandatories of Palestine and Syria, respectively.

"Haifa now bids fair to emerge upon history's page as one of the free ports of the world—a 'Who's Who' of cities ranging from Hamburg to Macao and from Marseilles to Trieste.

"The paradox of Haifa is that it is geographically associated with Mount Carmel and the great plain of Esdraelon, the Armageddon of Bible times; but historically it is linked closer to Berlin, Buffalo, N. Y., and the Crusades.

"One may stand upon the slopes of Mount Carmel where it almost achieves being a promontory at the Bay of Acre and look south toward Caesarea, built by Herod and named for Caesar, where Peter preached and Paul was jailed. Or he may turn north toward Tyre, proud port of Phoenicia. In the nearer foreground will be the ruins of Athlit, with the remains of a castle built by the Knights Templar, and the Yorktown of a two-century holy war.

"Carmel itself, he will recall, was Solomon's simile when he said of a bride, 'Thine head upon thee is like Carmel.' And upon Carmel Elijah mocked the prophets of Baal, built an altar upon which 'the fire of the Lord fell, and consumed the burnt sacrifice.'

"At his feet lies Haifa, which leaps forward to the Middle ages, because it was taken by Tancred during the Crusades. Even medieval events are but memories there. The present town of about 10,000 souls is modern. It received an impetus when William, then emperor of Germany, visited the city in 1898, went the rounds of German schools and soap factories, ordered tablets to be erected to remember him by, and granted a subsidy on account of the flourishing German colony there.

"The German colony had its inception in the German Templars, a religious community formed at Wurtemberg, which founded its first colony at Haifa in 1868, and so flourished that later it acquired a section of the town which was selected and aided by a citizen of Buffalo, N. Y.

Originally the Templars had a vision of a kingdom of God on this earth, which must fructify in the Old Testament 'Land of Promise,' and regenerate Europe. Later other Germans than members of this sect were admitted, and after the kaiser's visit the purpose became avowedly to promote German interests."

Grewsome Historic Relic.

In the different parts of the world, there are heads without owners.

The mummified head of Oliver Cromwell, for instance, which on the Restoration was torn from the exhumed body and stuck on a spike upon the roof of Westminster hall, is now in private ownership. It belongs to Mr. Horace Wilkinson, of Seal Chart, near Sevenoaks. He inherited it from his grandfather, who purchased it from the daughter of a showman. The showman in his turn had purchased the grewsome relic from some descendants of Cromwell, whose ancestors had bought it from a sentry who saw it blown down from the roof of Westminster hall one tempestuous night, and had secreted it. The iron spike which transfixed the skull and a portion of the wooden post are still attached to it.—London Mail.

Carl Busch Born in Denmark.

Carl Busch, Kansas City composer, was born in Bjerre, Denmark, March 19, 1862. He studied law at the University of Copenhagen, the violin under Tofte at the Copenhagen conservatory and composition with Hartmann and Niels Gade. He played in an orchestra in Paris and studied under Godard and Gounod. He came to the United States in 1889, settling at Kansas City. Here he established the Philharmonic orchestra. He has composed works for orchestra, symphonic rhapsody, symphony, violin music, the dramatic cantatas "League of the Alps" and "King Olaf," and many songs. In September, 1912, while Mr. Busch was traveling in Denmark, the title of Knight of Danneborg was conferred upon him by the king.

Airplanes 500 B. C.

A stirring piece of literature, written about 500 B. C., tells how Rawun, king of Ceylon, flew over an enemy army and dropped bombs, causing many casualties. Eventually, he was slain, and his "flying carriage" fell into the hands of the Hindu chieftain Ramchander, who flew in it all the way from Ceylon to his capital at Ajudhia, in northern India.

In the Mahabharatta, one of the oldest of Brahman classics, mention is made of the gift of a flying machine by a king to a brother monarch, as a token of friendship.

POULTRY CACKLES

BEST RETURNS FROM PULLETS

Maturity Can Be Hastened by Right Kind of Care and Feeding—Range Desirable.

(Prepared by the United States Department of Agriculture.)

A flock of pullets that can be brought to laying in the fall will give the largest yearly profit. The average poultry keeper fails either to hatch early enough in spring, so that the pullets may reach laying maturity in October, or he does not keep them growing rapidly enough to bring this about. Pullets that do not get to laying well before the arrival of cold weather and the short days of December, will seldom start egg production before February. Thus two or three months of additional feeding are required, and the advantage of this period of highest egg prices is lost.

Very few eggs are secured on the average farm during autumn and early winter, but experienced poultrymen by better management secure a fair egg production during these seasons. It is advisable, though not essential, that the cockerels and pullets be separated as early as possible and given separate free range.

Avoid overcrowding at night. A coop that will hold 100 young chickens will not house properly more than half as many growing pullets. Their maturity will be retarded if too many are kept together, or if they are annoyed by lice or mites. Frequent inspection of the houses, especially after the pullets have gone to roost, is advisable. If mites are seen crawling on the perches or are found by a careful inspection of the house, prompt measures must be taken to kill them by spraying the interior of the house, as advised by the United States Department of Agriculture, with crude petroleum, kerosene, cresol solution, cattle dip, or some other effective solution. Body lice frequently cause much annoyance and retard growth and maturity. Individual treatment of each pullet with sodium fluorid or mercurial ointment will clean up these pests on the birds themselves.

Feed freely of a good egg-laying ration; give plenty of range, and be sure

Chickens Grow Rapidly When They Are Allowed Free Range.

they get plenty of mash. It is a help to keep it in hoppers, where they can have free access to it. A light feeding of moist mash, especially if mixed with milk, may induce them to eat a little more. If 25 per cent of buckwheat middlings is added to the allotment of mash to be moistened with milk or water it will be eaten eagerly by the pullets. A liberal amount of meat scrap in the mash is advisable at this time, particularly if plenty of milk is not available.

Corn, wheat, oats and barley are the principal grains fed. Kaffir and buckwheat also are used, but are not so generally available, and usually cost more. Corn and wheat are the two best grains and are about equal in value, although wheat can be fed alone better than corn, which is inclined to be fattening. Oats and barley, on account of their hulls and higher fiber content, are not so good as corn or wheat. Rye is not well relished, and is seldom fed.

Corn meal, wheat bran, wheat middlings, and meat scrap form the basis of a good mash, while corn chop, corn-and-cob meal, ground oats, and low-grade flour may be added or substituted to advantage.

POULTRY NOTES

When on free range the fowls obtain a little of several different kinds of feed. Grain should not be made the sole feed, for then fat and not eggs is the usual result.

Place setting hens in colony houses or other rat-proof buildings. Brood coops with tight floors are useful for setting hens. Many a promising hatch has been ruined by the rat that stole the eggs.

Old hens may pay their way just by producing meat for the table, but why have a flock working half-time to produce meat when it might as well work full time, producing both meat and eggs?

DEMAND JUST ONE CAN GIVE

Practically Nothing That Is Worth Having Can Be Attained Without the Greatest Effort.

It is easy to sit and watch others work. But we know of no employer who will pay you wages for doing it, unless you know how to do the work yourself, and are working hard at the job of supervising it.

It is easy to travel about the world on steamships and parlor cars, very pleasant and profitable to the man with an inquiring mind. But that is a vacation occupation, and unless you have earned the money to do it by hard work you will get little out of it.

It is easiest of all to feel sorry for yourself, and to think that you haven't had a fair chance in life, and that you'd have been a big success if you hadn't met with so much injustice and bad treatment. But that will get you only unhappiness, which is the least desirable thing in all the world.

There are many things in life that are well worth doing, but none of them are easy.

The first-class fiction writer takes delight in his job, but he also works at it harder than any man who is not a first-class fiction writer or ever dreams of doing.

The great tenor, like Caruso, finds pleasure in his job, and incidentally in the money he gets from it. But he works about six or seven hours a day at it now, and in earlier life he worked ten or twelve hours, receiving far less pay for exactly as good music.

If good jobs were to be had by little effort practically everybody would have a good job. The reason that they are so few, and that so many of those few are not filled, is that all of them demanded the hardest kind of hard work, not only to get but to keep them.

Genius, which is said to know how to do things before it is born, has to work just as hard as mediocrity to gain and keep success. Nothing you can think of that brings real rewards can be accomplished without more work than most of us can contemplate without getting tired at the mere thought of it. Yet people are doing it right along, and you seldom hear of any of them killing themselves in the effort.

If you have made up your mind to do something unusual or to be somebody of importance learn how to work twice as hard as you ever did before.

That is only a first step. The second is to think hard. If you can do both, and keep them up long enough, you may land, but remember you will have a lot of competition. Even hard work finds plenty of men to believe in and practice it.

And most of them get what they are after.—New York Tribune.

HIS TROUBLES VERY REAL

Nervous Man May Rise to the Occasion at Times, but He Suffers, Nevertheless.

How often have you been surprised by the person who is "always worrying"! How astonished you were when this person, who spends all his days in almost morbid fear of "what may happen" suddenly rallies to the crisis and shames the aforetime scoffers! You then experience a burst of admiration for the "nervous" one; you say that he merely appeared to be unhealthily apprehensive and cowardly, but that the defect was superficial, and that deep down is his real self and very stout stuff. Do you think so? asks the Villager. How you are fooled! It is true that many of those who build innumerable troubles from a material which, unlike oil, shows no signs of giving out, afford excellent accounts of themselves when there is genuine cause for genuine fears. But it is not that these people are always made of enduring stuff beneath the veneer of timidity; rather it is the contrary. They have come through such agonies in imagination that the actual experience proves infinitely easier to bear than were the dreams of it; the power of suffering is worn thin and the fact seem less than the figment. No loss of fortune, for example, can bring in its train so much misery and melodrama, such experience of starvation and social degradation, as the investor of a "reconstruction period" lives through in contemplating the bankruptcy of those companies in which he holds stock. No illness when it comes can be so painful as that which the neurasthenic has suffered in his craven fancies; he thinks each week he is about to have appendicitis; he does not have appendicitis; he has a few feet of his colon removed, and it seems a small matter. The hint of smoke torments poor sick souls a thousandfold more than ever can the actual tongue of flame—no, not only do the fearful die many deaths before their end, but they die many deaths more dreadful than the real one. Would the sophist justify daily fear by saying it makes you capable of meeting the great emergencies? A fine thing, replies the stoic, if having used up all that energy fearing in order to be brave, the emergency never came! But, the sophist replies, in every man's life there is always the final emergency. A fine thing, repeats the stoic, to order your whole life for a good deathbed!

Dante and Beatrice.

Although the love of Dante for Beatrice often is quoted as a type of earthly attachment, both fine and rare, both Dante and Beatrice married others, Dante having four children by his wife. Beatrice died when she was twenty-four. In all the poet saw her but three or four times in his life, the first time when she was eight.

He never wooed her or dreamed of marrying her. She was to him merely a symbol for everything that was good and beautiful, and this symbolizing began when the two were children and the grave youth was taken to her father's house by his own parents on a visit. That she cared anything for him beyond a careless friendship or the careless regard one has for a seldom-met acquaintance is doubtful.

Her full name was Beatrice Portinari, and she died in 1290, Dante taking a wife two years later. In speaking of her, Dante said: "I saw her at about the end of my ninth year. Her dress on that day was of a most noble color, a subdued and goodly crimson, girdled and adorned in such sort as best suited with her tender age. At that moment I saw most truly that the spirit of life which hath its dwelling in the secretest chamber of the heart began to tremble so violently that the heart pulses of my body began to shake therewith."

New Instructions in Writing.

A new method writing teacher in the form of aluminum strips indented with alphabetical and numeral characters, is described in Popular Mechanics Magazine. These strips clip to the edge of a tablet so that the indented characters aline with the tablet ruling. The child moves a pencil in the groove of a character until its shape becomes fixed in his mind, after which he transcribes it on the lines of the tablet, independent of the guide. Three of the strips are included in the set, representing capitials, small letters and numerals, respectively.

Isle of Safety.

It was in the days of Volstead, but the old inhabitant had got one somewhere. He was steering a rough course when an obliging stranger came along and offered his assistance.

"Much obliged," answered the old inhabitant gratefully. "Jus' steer me up where you see that light burnin'. I'll be aw-right then."

"Oh, you live right near there then?"

"No, no, no. But thassa lamp post."—American Legion Weekly.

Dried Bananas Nutritious.

Dried bananas are a recent introduction in America, and they are said to be of higher food value than the fresh fruit.

AFRICA LAND OF ADVENTURE

"Dark Continent," Through All Earth's Ages, Has Flung Out Its Challenge to the Bold.

To imaginative youth Africa stands for mystery, endless deserts, jungles and dark forests, towering snow-clad peaks, the lost Mountains of the Moon, cataracts beside which Niagara is a small affair, multitudes of black slaves, elephants, lions, camels and other strange denizens of the zoo. It means ruins of ancient cities, great gold camps, diamond mines, strange tribes, and stranger customs, cannibals and pyramids. It is the land of adventure, writes John Hays Hammond.

To the student Africa means destroyed nations, vast tombs and the thoughts of men long dead, given to us to read on miles of stone carvings. It is still the land of adventure.

To the hard-headed, unromantic business man, who cares nothing for the past and little for the future, it is the land of greatest risks and quickest returns. It means miles of mills grinding out gold day and night, without ceasing, grinding it out literally by the ton—the greatest gold camp on earth, a vast black army of Kaffirs digging forever in endless underground galleries. It means diamond fields, supplying the whole world with those sparkling stones; copper, too, and zinc, lead, tin, iron, coal, rubber, ivory, palm oil and spices. It is still the land of adventure.

To the statesman and philosopher Africa beckons with a seductive finger. During thousands and thousands of years every great race of mankind has marched into that mysterious continent. They have built cities and founded countless colonies, but a fatal blight has ended all; the very blackness of her people is but a symbol of the death that lurks within her. The tracks of a hundred nations all point inland, but none return.

Thick walls were built by Vasco da Gama along Africa's shores, and the continent was laid at the feet of his sovereign—in vain. Napoleon touched it for a moment, fought a romantic battle, and wisely withdrew. The fierce Turk held a corner of it for a time, and his power has crumbled to dust. Latest to appear on the scene are the nations of modern Europe, whose struggles for possession of its vast areas and incalculable wealth have been like those of a pack of wolves. It is still the land of adventure.

But today a nation has been newly founded in Africa—the only one properly to be so called, since Egypt, the land of the dead, perished as a power. Its boundaries reach from the Congo to the Cape. In itself it constitutes a mighty empire, and it owes its creation mainly to the genius of Cecil John Rhodes.

Hustlers.

Vincent Astor on his return from England, where he had been visiting his mother, Lady Ribblesdale, said at a dinner:

"The English, now that our exchange is so high, regard us as bigger hustlers than ever. An Englishman told me with awe a story about a hustling American tourist in London.

"He said the tourist dashed up to the British museum in a taxicab, kicked aside the pigeons that were feeding in the court, ran up the brown-stone steps and said to the man in uniform at the door:

"'Still got the Elgin marbles?'

"'Yes, sir; of course, sir,' said the man.

"'Correct. How about them Assyrian-winged bulls near the lunch room?'

"'They're all right, sir.'

"'German raiders didn't damage your fine dummy display upstairs, I trust?'

"'No, sir, not at all, sir. But won't you step inside and look things over for yourself, sir?'

"'No, thanks. I'll just take 'em as per catalogue,' said the tourist. "You see, I've got to do St. Paul's and Westminster, the Tower, the South Kensington and the Wallace collection this morning in time to catch the Oxford train, give the colleges the once over, and make connections with the Stratford express so as to see Shakespeare's house before dinner.'"

Grand Finale.

Two dusky soldiers, who had learned the manly art in the A. E. F., were putting on a farewell bout at the demobilization camp. As they advanced to the center for the preliminary handshake one said:

"Yo' bettah git ready fo' da mawn'in', man, cause when dey blows reveille yo' ain't gwine be round fo' breakfast."

"Huh!" retorted the other scornfully. "Dey is gwine play reveille all right, but yo' ain't gwine hear it. De las' moosic yo' hears is de taps Ah's gwine serenade yo' with."—American Legion Weekly.

Horse Not Yet Obsolete.

The horse is not by any means obsolete in Europe. During 1920 there were in the United Kingdom 2,600 fatal accidents caused in public places by vehicles of all kinds, and 440 were charged to horse-drawn vehicles. The horse is still surviving to a degree in the United States, too. In 1914 there were 4,400 horse-drawn public carts on the streets of New York, and in 1919 there were 9,700.—The Nation's Business.

Taking No Chances.

Edith—Did you count with a daisy to see if Jack loved you?

Betty—No, indeed! If it came out wrong I should die. I used a three leaved clover.—Boston Transcript.

OLD YULETIDE CAROLS

"Holy Night" Regarded as One of Most Beautiful Songs.

"Draw Nigh, Immanuel," One of Oldest Pieces and Far Antedates Any Others.

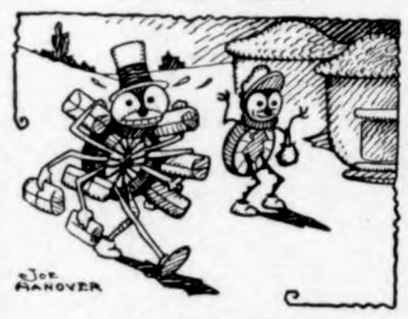
THE ancient Christmas carol, "Holy Night" is German in its origin and is considered by many persons to be the most beautiful of all Christmas carols. It has sometimes been ascribed to Martin Luther, but the consensus of expert opinion is that it is much older than his time and is one of the oldest of German folk songs.

The carol "God Rest Ye Merry, Gentlemen," is English in its origin and dates back to about the beginning of the Seventeenth century, although the author of the words and the composer of the music are unknown. The fine old melody sung to this poem possesses all the best qualifications of a sterling hymn tune and will probably last as long as the verses with which it is always associated.

The carol "Draw Nigh, Immanuel," is one of the oldest pieces of coherent music in existence, and both the words and music far antedate any of the others. The music is an old French melody, dated from the Thirteenth century, although, of course, it has been harmonized to conform with more modern standards.

There is a most curious but beautiful musical effect at the close of this carol. The words of "Draw Nigh, Immanuel," are about 100 years older than the music, being taken from the Mozarabic breviary of the Twelfth century, and it is generally believed that they were taken from the liturgy of the early Christians at Toledo, Spain, where the Mozarabic breviary was formulated.

Another carol, "The First Noel," has a traditional French melody and probably originated in Breton, although the exact origin of this fine old song is somewhat in doubt.



VERY USEFUL

Mrs. Bug—My I am glad I married Mr. Spider. He can carry so many bundles, when I do my Christmas shopping early.

Christmas Again

Christmas again, and hearts aglow
And songs and merry times;
New friends to make, old friends to greet,
And over all the silver-sweet
Unchanging Christmas chimes.

A CHRISTMAS LEGEND

Crowing of the Cock to Keep Away Evil Spirits.

Tale of Saint Stephen, the First Martyr, Whose Day is December Twenty-Six.

EVER since that first Christmas eve the cock has crowed all night long on the anniversary to keep away evil spirits; for the cock is a holy bird and a knowing one. There is a pleasant tale of him and Saint Stephen, the first martyr, whose day is December 26, close by his dear Lord's.

Saint Stephen was King Herod's steward, it seems, who served him in the kitchen and at table. One night as he was bringing in the boar's head for his master's dinner he saw the Star shining over Bethlehem. Immediately he set down the huge platter and exclaimed:

"No longer, Herod, will I be thy servant, for a greater King than thou is born."

"What aileth thee?" cried the King wrathfully. "Do you lack meat or drink that you would desert my service for another's?"

"Nay," answered Stephen. "I lack neither meat nor drink. But the Child that is born this night is greater than all of us; and Him only will I serve."

"That is as true," quoth Herod, smiting the table with his fist, "as that this roast cock on the platter shall crow before us."

Hardly were the words out of his mouth when the cock stretched his neck and crowed lustily, "Christus natus est!" At this proof that Stephen's words were true, Herod was so angry that he made his soldiers take Stephen outside the walls of Jerusalem and stone him to death. And this is the reason why, unto this day, Saint Stephen is the patron of stone-cutters. —Abbie Farwell Brown, in Lippincott's Magazine.

Cleansing the Saucepan.

Here is a simple but most successful method of cleansing a saucepan in which milk has been boiled. After pouring out the boiling milk, quickly replace the lid before the steam has time to escape, and allow the saucepan to cool before taking it off again. Then put the pan in cold water to soak. It can be cleaned quickly and easily.

Christmas Is Come!

Now Christmas is come
Let us beat up the drum
And call all our neighbors together;
And when they appear
Let us make them such cheer
As will keep out the wind and the weather.

CHRISTMAS IN 1621

Rebuke Administered to New England Observers of Day.

Young Men Who Had Arrived on Little Ship Fortune Reprimanded for Festivities.

IT WAS in 1621 that Governor Bradford was called upon to administer a rebuke to some of the young men of the New England colony who had just come over on the little ship Fortune, and who wanted to celebrate the holiday, the Detroit News recalls. Puritanism brought over with it in the Mayflower the anti-Christmas feeling, and when the group of lusty youngsters attempted to observe the day they were sharply criticized by the colony.

The men were called out to work that day as on other days, but the newcomers declared it against their consciences to work on Christmas day. The governor left them and led away the rest of the workers. But when he returned at noon the young men were in the street at play—some pitching the bar and some playing stool ball. He took away their implements and told them it was against his conscience that they should play while others worked and that they could observe the day within doors, but there should be no reveling in the streets.

On the day in question a tree was chopped down and dragged into one of the rough cabins where it was trimmed with cranberries and popcorn, while the young people feasted their eyes on its beauties. These "revelries" were frowned upon by the majority of the colonists and in 1659 the general court of Massachusetts enacted a law that made any person observing Christmas day liable to a fine of "five shillings." The law was repealed in 1861.

Placecards.

Next after decorating the table comes the question of placecards. These may be as simple or as elaborate as you like, but you really should have them! You might cut white cardboard into small round pieces. Give each an irregularly outlined border of green and at the top of this little make-believe Christmas wreath punch a small hole, through it draw red baby ribbon, and tie in a bow. The name is written in the center.

THE ROSE OF JERICHO

Pilgrims Told of Its Power to Bloom on Christmas Day.

Blossom Given the Name of Resurrection Flower; Also Called St. Mary's Rose.

SEVERAL varieties of the so-called resurrection plant have appeared among the novelties offered by florists, but the original is the rose of Jericho. Along the shores of the Dead sea, far enough away to be out of reach of the death-dealing vapors and the salt spray, grows this rose, a little plant famed in many a legendary story, which, when ripened, rolls up its sprays and branches into a curious little brown ball.

The desert winds snap off its dry stem and whirl the seemingly dead little ball away over sandy plains, like a feather-weight. After it chances to reach some damp place, in about two days, the moisture has wrought a miracle for the once dead is alive again, green and growing.

The old-time pilgrims who brought back this plant with them from the Holy Land, told wonderful tales of its power to bloom out on Christmas day and gave it the name of resurrection flower. Another old legend names it from every spot where they halted to rest.

The dry ball when unfolding drops its seeds, and from these it may be cultivated as an annual. To resurrect these dry balls it is simply necessary to keep them standing in glasses of water, immersed about halfway to the top of their branches. The expansion is merely a mechanical spongelike process.

The botanical name of the rose of Jericho is anastatica, from anastasis, resurrection. There are other species of resurrection plants, but they are not so attractive as their Dead Sea relative, which, although it has very little beauty, has an honored place among flowers because of the many fancies and associations it calls up and its peculiar development.—Argus.

THAT PESTIFEROUS BOY.

"A Merry Christmas, old man. But why are you limping?"

"That pestiferous boy of mine set a steel trap for Santa Claus.

Santa Claus' Headquarters

THIS CHRISTMAS WE SHOULD GIVE GIFTS THAT HAVE REAL VALUE, AND THAT WILL LAST A LIFE TIME. WE HAVE A FULL LINE OF MANY USEFUL ARTICLES THAT WILL MAKE IDEAL CHRISTMAS GIFTS FOR EVERY MEMBER OF THE FAMILY. FOLLOWING WE LIST A FEW ITEMS:—

Gifts For Him

Hats and Caps.
Silk Hose
Gloves and Mittens
Silk Ties
Handkerchiefs
Belts and Suspenders
Fancy Shirts
Shoes and Slippers
Safety Razors

Gifts For Her

Silk Hose
Gloves
Hand Bags
Handkerchiefs
Scarfs
Sweaters

POULTRY PAID THESE BILLS

Two People Make Good Returns On Farm Flocks Even Tho Other Products Are Cheap

A. C. Reika. Sperry, believes that it pays to raise a few chickens. Not only has it paid for his efforts but the profit has enabled him to ward off hard times, for, during the last four years h estimates that hos flock has paid him 100 per cent on his investment on an 80 acre farm.

Four years ago he moved onto his farm, having but very little cash capital. In 1919 his profits on his flock amounted to $1,834.27 of which $1000 was net. In 1920 he cleared $1,800 net from 275 birds and in the first ten months of 1921 he netted $1,500 and believes he will meet the 1920 mark by Jan. 1 1922.

Mr. Reike raises his own feed he built a modern poultry house and used god methods for feeding. He emphasizes the importance of feding tankage to hens during the winter in order that the egg production will be stimulated.

Culling is also important and Mr. Reike culls three times so that he keeps only the best hens.

By using the grain he uses on his farm for feed. Mr. Reike saps that it solves his marketing problem as everyone wants to buy eggs, and at a good price.

Mrs. Geo. Bunker of Henry county, by carefull culling and proper winter feding her flock has gathered 34,622 eggs from 284 hens this season. This is an average of 122 eggs per hen or, according to poultry experts at Iowa State College about fifty more than the average Iowa flock. Mrs. Bunker believes in dry mash for feed and says that it should be present at all times.

An excellent mash can be made of 200 pounds of cornmeal, 200 lbs. of ground oats. 100 pounds of bran, 100 pounds of wheat middlings and 125 pounds of tankage. Feed this in a self feeder and it will pay for itself in a short time.

THE PEDDLER

The peddler greets me at the door and he has things to sell, some dope to stain a kitchen floor, a patent dinner bell; but I can buy them at the store from J. Augustus Snell. The peddler has no interest here, he doen't pay the freight; he doesn't chip in every year to keep the tax list straight; and so I say. "Please dissapear," and shoo him from my gate. It may be he sells better junk than Snell does at the store; but if I spend with him a plunk, I'll never see him more, and if I find his koods are punk, 'twill be no use to roar. But if at J. Augustus Snell's I buy a quilting frame, and find it isn't wearing bells, its workmanship to blame, I seek that merchant where he dwells, and climb upon his frame. And he'll produce another frame, or else refund the cash; he can't afford to win a frame for selling worthless trash; but it's up to him to play the game or see his business smash. And J. Augustus nobly stacks when boasting schemes abound, and J. Augustus pays his tax without a doleful sound, and joins the boys who sprain their backs to make the wheels go round. The peddlers in our village trek and then they disappear, and little do they reck what problems we may fear; but J. Augustus is on deck all thru the fatefull year.--Walt Mason

J. E. Baumgartner has recovered from his recent illness and was out again Monday.

Our Christmas Tree

NORTHERN POTATOES BEST

Tests in Guthrie County Show Certified Seed Better

Home grown potatoes as seed did not produce as large yields when fied potato seed, according to results planted in test with Northern certicate gotten in a trial in Guthrie county.

In cooperation with the extention truck crops experts at Iowa State College, county agent W. A. Geiger planted several plots of potatoes under the same conditions, using Northern and home grown seed. Results show that in all cases the northern potatoes produced more and better potatoes and the number of scabby "culls" were less with the northern varieties. Local seed had an average of between 20 to 30 percent scabby potatoes while the certified sed produced only between 5 and 8 per cent.

In Cass county the same conditions were found and Mitchell county had a similar result. This work is part of a test run during the last season in order to determine the value of shipping in certified seed.

Due to the warmth of the ground during the growing season in Iowa home grown seed often becomes infected with scab and other diseases which damage the potato crop.

STATE PAYS HIM FOR T. B. CATTLE

V. A. Cook was in our office yesterday and stated that he had received a check from the state for his cattle which he had tested some time ago and were found tubercular. For the eleven head which were shipped in to be destroyed, he received an average of $122.10 per head, or a total of $1343.10. Mr. Cook had a very fine herd of cattle except for the fact that they were found to be tubercular. However, he says he is well pleased with the settlement made by the government He is now building up another fine herd but he is buying only T. B. tested stock.

MODERN CHICKEN THIEF

Even Get Farmer to Place His Birds in Crate

Sheldon, Ia., Dec. 13.—A new way for chicken thieves to work was uncovered here this week. A stranger came to a farmhome near here and offered the farmer two cents above the market price for his chickens, and the farmer naturally looking for the extra two cents, told the stranger he had bought something.

The stranger brought out some crates and asked the farmer to crate the chickens, 144 in all. The chickens were crated and the stranger came when the farmer was not at home. The idea of chicken stealing is not a new one, but the thief was thoughtful enough to get the farmer to crate the chickens for him.—Hampton Chronicle.

CONGRESS PROGRAM OF ECONOMY SHOULD HAVE AGGRESIVE SUPPORT

Legislative Branch has Made Splendid Record in Reducing Public Expenses

WASHINGTON.—As to whether the economics which have ben effected in federal affairs since the inaugeration of the Republican administration in March are to be made permanent and increased, or whether they are but a flash in the pan will be largely determined within the next 90 days.

Although many bills carrying important legislation will come before the Congress in the regular session which has been opened, it is only fair to state that nothing will exceed in the importance and appropriation measures which will be presented to Congress. If one is to believe the common reports, there is going to be a real struggle between the advocates of genuine and permanent economy in public administration and the opponets of such program.

Congress Friend of Economy

Contrary to much that has been written upon the subject, the real friend of public economy is the Congress. During the past six months the Congress has been most unfairly represented as being the influence which is arrayed against cutting down expenses. In point of fact and as a matter of official record, the contrary is true. There has svcarcely been a request for appropriations made of the Congress by any executive department or commission, or other administrative agency but has been considerably reduced. Even requests for appropriations which have received the approval of the budget bureau and sent to Congress have been very martially reduced by that body.

While a great deal of publicity has been given,— and justly so.— to the fact that since the creation of the budget bureau there have been savings of approximately $300-000,000 made by the inauguration of economies in the various administrative bureaus there has not been very much said regarding the equally important fact that since Congress assembled in special session the 11th of April it has made savings of over $300,000,000 by reducing requests for appropriations made of it by various executive departments, commissions, bureaus & etc.

Congress Created Budget Buretu

Furthermore, without any detractions from the budget bureau and its operations, it should never be forgotten or ceased to be emphasized that the very existance of the budget bureau, with all the power it possesses for introducing business methods in public affairs and forcing economics in the various administrative agencies, is due solely and wholly to the act of Congress which created the bdget bureau and clothed it with whatever authority it pessesses.

Congress well knew what it was doing when it did create the budget bureau. It enacted a law calling that bureau into existance and giving it tremendous powers to enforce economies for the reason that it was in the heart and mind of Congress to reduce public expenditures. Nor was it an act performed upon the spur of the moment or in a waive of enthusiasm. The Republican Congress elected in 1918 enacted a budget law differing in no great detail from the budget law now on the books, only to have it vetoed by President Wilson upon the ground that it interfered with his executive prerogatives.

So it may be truthfully stated that ti has been a firm and fixed policy of the Congress to compel reduction of public expenditures. It was in order that this policy might be made effective and more easily carried into execution that it enacted a law creating a budget bureau at whose head should be an officer responsible to Congress for the presentation of all requests for appropriations.

Influences Against Economy

Two influences are going to operate during the next 90 days to defeat the economy program. One is the outside public influence which is always backing up fads and pet ideas which call for federal aid in the way of appropriations and creation of bureaus, commissioners. etc The other is the influence of bureaucracy, already entrenched in Washington. A great many federal bureaus and commissions called into existance by reason of the war are insisting that, even though the war is over and the primary reason for their existance has passed away, it is still very essential that they be kept alive and with their army of employes, be supported by public funds. Against both of these influences the present session of Congress is setting its face.

News Borrowed And Stolen From All Over The State

IOWA NEWS

College experts say that there is no such thing as commercial oil to be found in Iowa.

Mrs. Lizzie Lobberecht and Weaver Kelly have been indicted for first degreee murder in killing Frank Denning of Keokuk.

Harry Fielding, 32, a half breed Indian residing in Sioux City died recently after having been hit over the head with a gas pipe by Fred Rouds in a fighth over a gambling debt. Feilding is the father of 3 small children.

Four youth of near Ames are classed as born husker experts. They are, Bryon Thomas, 14; George Kitchhen, 11; Loyal Kitchen, 13 and Orville Bassett, 14. They averaged from 94 to 100 bushels a day.

In point of extent of liabilities two of the largest bankruptcies of farmers in recent years were filed in United States District court recently Forrest J. Heishman, of Malcom desires to be relieved of debts amounting to $403,294. His assets total but $15,000. Raymond A. Heishman of Grinnell, whose farm interests are interblocked with those of Forrest Heishman filed schedules listing liabilities at $353,578 and assets at $108,700.

The first instance in Iowa where official action was taken toward burning corn instead of coal this winter occurred at Pocahontas when the supervisors of Pocahontas county voted to buy corn for the furnaces at the court house, county home and insane infirmary. Resolutions by the supervisors stated that the reason for their action was the low price of corn, the high price of coal and the destitute financial condition of the farmers.

A creamery is to be established in Grundy Center. Mr. Kamoss, who for some years has been in the creamery business in Brooklyn, has leased the front part of the Gilmour-Kuhlman garage and has already moved some of the machinery into place and has ordered a full equiptment.

Nearly $50,000 will be paid by the different banks of Charles City in December to their patrons as Christmas saving club checks. One banker stated that he had the full number of members who originally subscribed to these club carried on to maturity more than $75,000 would have been available as Christmas money this season.

A report recently issued by the state in connection with licence fees and taxes on automobiles says that if a car is not used, and the license fee is not paid on it, the car is considered as personal property and taxes must be paid on it. The payment of the license fee does away with the payment of other taxes on the car, but if no license fee is paid and the car is not used, then you must pay personal tax on it.

The investigation of state agents into the auto theft ring at Cedar Rapids, which has resulted in hundreds of stolen cars being disposed of through dealers in used cars has shifted to other parts of the country It is now believed that Bob Smulekoff who was arrested is innocent. When the 32 stolen cars were delivered to him, the numbers had already been changed and it was represented that they had been purchased from booze runners who were anxious to get rid of the cars after they had gotton rid of the booze.

The deadly corn shredder has claimed another victim. Ross Emerson, 17 year old, son of Mr. and Mrs. E. P. Emerson, living near Blanchard who met with a horrible accident. His hand was cought in a shredder and hand and arm was literally chopped off in pieces by the rapidly revolving knives, up to the elbow.

Early Christmas Morning

FOUR little feet pattering on the floor,
Two tangle-curl'd heads peeping in at the door,
Hear the merry laughter o'er the chimney's roar,
Early Christmas morning.

Two little stockings full of sweets and toys,
Everything so charming for little girls and boys,
How could they help, then, making such a dreadful noise
Early Christmas morning?

Down beside the stockings many gifts were spread,
Dollies, drums, a cradle, and a brand new sled;
"Haven't we too many?" little Nellie said,
Early Christmas morning.

Four little bare feet on the sidewalk cold,
Two little faces with want and hunger old,
Peeping through the window where those gifts unrolled:
Early Christmas morning.

"Yes," says John to Nellie, as he spied the two,
"We've so many presents—tell you what we'll do:
I'll give half of mine away. How, dear Nell, will you?"
Early Christmas morning

Two little hungry ones into the house were called,
Favors heaped upon them till they stood enthralled.
Was not this the angels' song, "Peace, goodwill to all!"
Early Christmas morning?

—Mary B. Peck

Decorate the Christmas Package

EVERY one when sending a Christmas gift desires it to appear as attractive as possible. When we receive a gift nicely wrapped with tissue paper and decorated with pretty Christmas seals, there is an added pleasure. This is especially so when we realize that the sender has spent time and cleverness to give this little touch of personal thoughtfulness.

Many varieties of Christmas seals may be purchased, but a little originality will not come amiss even in these small details.

There are seals for the outside package and the heading to be used on the note paper, conveying the good wishes of the giver, or on the little card of greeting. These two in each set match. This gives another touch of the unusual, which is always sought after.

Have a piece of carbon paper, place it over the note paper, card or seal, and on top of this one of the designs. Carefully trace with a sharp pencil the entire outline. An exact duplicate of the design will be found on the note paper or seal ready for tinting. This may be easily done with water colors or wax crayons. Poinsettia should be colored a warm, bright red, with yellow centers and dark green stems.

Holly, the special emblem of this season, has berries of vivid, fiery red and glossy leaves of dark green.

A dainty basket of forget-me-nots would be pretty colored yellow, the flowers a faint light blue and the bow-knot of pale pink. Now we have the mystic sign of the holidays, borrowed from the Druids, the mistletoe. The berries of this plant are a pearly white and the leaves a yellowish green.

Spend a little extra time giving the Christmas gift this novel decoration, and the pleasure it affords will never cause you to regret having done so.

Economy is to be considered at Christmas time. Our purse-strings have been stretched to the breaking point purchasing gifts for relatives and friends. To put this fascinating bit of handiwork upon the Christmas package costs comparatively nothing, aside from the time you spend doing it. This fact counts very little when we add to the enjoyment of others.

These few suggestions will probably cause endless ideas for the Christmas package to present themselves to you. Make your gifts radiate the holiday spirit; give this little bit of personality and attractiveness to as small a thing as the Christmas seal.

HOW UNKIND

"Fred is getting nearsighted."

"It doesn't follow that there is anything the matter with his eyes because he can't see one under the mistletoe."

Christmas Packages.

A woman whose Christmas packages never fail to reach their destination in safety says she always writes the name and address of the recipient upon the inside wrapper of the box containing them. Packages sometimes lose their outside wrappings, but if the postal clerks can find the address on the inside wrapping all will be well. This woman also ties up the inside wrapping securely before putting on the outside cover.

Anachronism in "Ben-Hur."

One of the star names given to Arabian horses in "Ben Hur" is Mira. This name was introduced into astronomy about sixteen centuries after the period of the story.

Lines to Be Remembered.

The origin of all mankind was the same; it is only a clear and good conscience that makes a man noble, for that is derived from heaven itself. —Seneca.

An Unnecessary Addition.

One old-fashioned citizen rises to remark that it is not necessary for dead men to tell tales—the live ones are batting a good average.—Hot Springs New Era.

AFRAID OF SANTA

Black Tots at African Mission Make for Place of Safety.

Presents of Apparel and Sweets Bring Confidence to the Men, Women and Kiddies.

AN AMUSING story of how Santa Claus frightened the black children at a mission station when he first appeared to them a few years ago, is told by the wife of a missionary stationed at Ballunda, Africa. They had celebrated Christmas at Ballunda before, but they never had had Santa Claus; so Mr. Stover, the missionary, dressed up as good Saint Nick.

"He had been padded and powdered and packed until his own mother would not have known him," Mrs. Stover afterward related. "Presently we gave the signal, the door flew open and in walked Santa Claus. But, dear me! What consternation! He was greeted with shrieks and groans and cries of 'Let me out! It is the evil one. It is the day of judgment!'

"The urchins, catching the infection of terror from the older black people, fled to their bedrooms, fell down upon their faces, crept under chairs and tables—anywhere to hide themselves. Poor old Santa Claus never had such a greeting before. As soon as he realized the panic he had caused, he tore off his tall hat and white cotton beard. Then from the bags on his back he began to throw gifts right and left and to tell who he was.

"Reassured once more, everyone was soon laughing and chatting, munching the great 'red breads' (doughnuts), tasting their fruits or nibbling at the sweets from the familiar little bags. One man wondered which end up he was to hold the fork Santa Claus had given him. Another immediately tried on his new shirt. The girls arranged their bright-hued handkerchiefs into turbans, while others sought to find some place about their scanty clothing where they could stow away their bunch of bread, as well as the paper of needles and cake of soap given to each.

"It seemed as though everyone tried to talk louder than his neighbor as they examined the costume of Santa Claus, whom they now no longer feared. One man said that he thought it was John the Baptist; another that it was Elijah returned. Yet another thought it was Satan himself.

Hanging Pictures.

In hanging pictures don't "sky them." A picture should be hung so that its center comes just on a level with a person of average height.

CHRISTMAS TOKENS. OF LOVE.

WHEN any uncertainty exists let us give a token of love, or friendship, or human kindness, something that, while expressing these things will, at least, be harmless. Let it be something that does not last—that brings the meaning and vanishes—something that never will know the indignity of the top shelf of the spare room closet!

A knock at a friend's door on Christmas morning and the clasp of a hand do this. A growing plant does it—but, most of all, thou beside me, singing in the wilderness—the personal revelation does it. Suppose a letter came on Christmas morning, to say—not "you are perfectly dear to have sent me a spool box," but "I want you to know that your patience, or courage, or tenderness, during this last year, will help me to live more bravely and courageously and lovingly this next year!". What a Christmas present the receipt of such a letter would be to any one of us! What a Christmas present for any one of us to send to the human heart that has given us courage for the burden and heat of the day!—Indianapolis News.

Her Christmas Dolly

The Rag Doll's Christmas

THERE was once a very, very old rag doll who lived in a nursery. She was so old that she had seen all the children grow up—the boy who wore trousers now, the girl who had her hair done in braids, the middle-sized child who had so often left the rag doll out in the garden at night. There was only the baby left—bless his pink toes!

But the rag doll was very, very old, and one beautiful Christmas time she began to show her age.

Her hair had been combed so much that it had come out dreadfully, and her nose, from a great deal of kissing, was entirely gone. Her pretty pink cheeks had been washed away when the boy tried to teach her to swim in the bath tub, and all her clothes were very untidy indeed.

The baby never noticed all these things, but the toys did; they all made the most unkind remarks to the rag doll the day before Christmas.

"Look at your dirty face," said the large French doll. "You'll be put in the attic tonight. That's where the old dolls go." "Look at your dress," said the jumping jack. "It is all torn. I wouldn't walk across the nursery floor with you."

"Did you ever see such thin hair?" asked the hobby horse. "I thought my tail was thin, but it isn't to be compared with that!"

But just then the nursery door opened, and the Christmas Angel came in. You could be perfectly sure that it was the Christmas Angel even if she did have on a gingham apron, because her face shone so through the dark.

"The French doll must go up to the attic," said the Christmas Angel. "There is a more beautiful new best doll coming."

"Why, the jack-in-the-box has forgotten how to jump."

You see the jack-in-the-box had been so excited about the rag doll's dress that he had broken his spring.

"The jack-in-the-box must go up to the attic, too," said the Christmas Angel.

Then she went over to the hobby-horse.

"Poor, old hobby-horse!" she said. "Your leg is very badly broken. I will take you up to the attic until you can be mended."

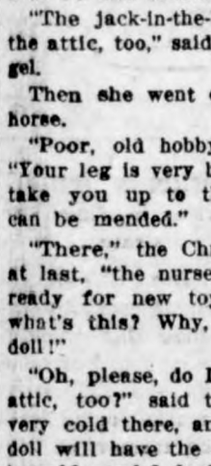
"There," the Christmas Angel said at last, "the nursery is all tidy, and ready for new toys—but, dear me, what's this? Why, it is the little rag doll!"

"Oh, please, do I have to go to the attic, too?" said the rag doll. "It's very cold there, and I know the best doll will have the chimney corner for herself—and I don't want the mice to gnaw my toes!"

"Why, you dear old thing!" said the Christmas Angel. "You're the same rag doll that I used to play with when I was little. You go to the attic? Why, I just guess not! We couldn't get along without you in the nursery. You do need a little mending, but I am going to sew you, and then you shall sit on the very tiptop of the Christmas tree."

The Christmas Angel lighted one of the Christmas candles so that she could see to sew. Then she took the rag doll in her lap and opened her workbag and set to work.

First she stuffed the rag doll's insides with plenty of cotton so she could sit up. Then she sewed her toes and put new little white stockings and black shoes on her feet. She took a piece of clean, white cloth and covered the rag doll's dirty face, and painted in blue eyes and a smiling red mouth and vermilion cheeks. She sewed on a new yellow wig; and then she made a pink-and-white checked gingham dress with puffed sleeves, and a white apron with strings to keep the dress clean, and a pink-and-white checked sunbonnet to tie under the rag doll's chin and keep her hair tidy.



"I think you will do now, you dear old thing," said the Christmas Angel.

So it came Christmas morning, and there on the tiptop of the tree sat the rag doll quite made over. The children thought her really the most beautiful of all the Christmas things. As for the rag doll herself—why, all the pleasure of her old days was as nothing to the happiness that was hers now. —Carolyn S. Bailey, in Kindergarten Review.

CHRISTMAS NOVELTIES

For Your Xmas Dinner

Below we suggest a few items that should appear on the table with your Christmas dinner to add to it's deliciousness.

Plum Pudding
Fancy Oysters
Fancy Ketchup
Salad Dressing
Pickles, Olives
Veribest Chinook Salmon
Cheese, all kinds

You will find all of the above articles and many others at our shop which will make your dinner the very best.

Leave or Phone Your Orders Now for Ducks, Geese or Chickens

Notice to those who Are indebted to us---

We ask all and each one of you to call at once, and not later than December 31st, or January 1 1922, to pay your account--small or big. We must have the money.

ALL BILLS ARE DUE

the first of each month If your account is not paid by January 1, 1922, then don't blame us for giving your account to our collector or attorney. We mean business.

Call at Once and Save us Trouble

Henry Lau and Son

Mahogany.

cork dipped in a mixture of equal ts of oxalic acid and water and n rubbed over the stains on a hogany piano will remove them. en the stains have disappeared, h the wood well with clear water polish as usual.

Real Victory in Life.

he true overcoming is not in shap- outward things to suit our will, in living out our life patiently, tfully, and kindly, through what- r the outward things may be.—change.

Author and Reader.

n author who sets his reader on nding the depths of his own ughts serves him best, and at the e time teaches the modesty of horship.—A. Bronson Alcott.

Heat Wakens Them.

hibernating animal can be awak- d from its sleep by being brought a warm room. When again put a cold place it immediately re- es its dormant state.

Name Differently Applied.

he name "daddy longlegs" is ap- d in the United States to creatures ely related to spiders, while in land it is given to the crane flies.

20,000,000 Saw "Ben Hur"

uring the twenty-one years that n Hur" was being produced on the e, it is estimated that 20,000,000 sons saw the play.

By Our Own Walt Mason.

She stood up in a trolley car and tried to cling to a strap; but the track was rough and at every jolt she sat in a young man's lap. Down up, down up—at last she tired, and said with a weary smile: "Will somebody kindly tell me, please; how many laps to the mile?"—Boston Transcript.

A Distinction.

The aim of book reviewing is to engage in discussion of our contemporaries, and this is why book reviewing, which is a department of journalism, must be carefully distinguished from criticism, which is a department of literature.—Brander Matthews.

White Evening Dress.

The vogue of the all-white evening dress seems to have come into its own with the late spring. Many beautiful all white gowns are to be seen at every evening function of any importance along the north and south shores. Combinations of kitten's-ear crepe and soft laces, canton crepe and chiffon, white chantilly and net, make the most attractive of the all-white effects. Black wraps of elaborate design generally are worn with the white dresses.

Inexpensive Trimming.

Linen frocks are often trimmed with scallops bound in a contrasting shade. These scallops are seen around the hem of the skirt, the sleeves and the neck line. This makes a very inexpensive yet very effective garniture.

OF INTEREST TO WOMEN

Serge and foulard are much combined.

Taffeta frocks have snugly fitting bodices.

Entire lace dresses in brown, gray and henna are very good.

The surplice bodice worn with a fichu is quaint and very smart.

Hand-painted flowers bloom on some of the newest sport suits. Their delicate tints suggest nothing so much as dresden.

Things that stand out in fashions for children are the straight line, the very short skirt and the sleeves which almost aren't.

For millinery, jet and steel ornamental novelties are being shown. Large medallions of solid sheets of jet are fringed with strings of jet or steel beads.

Among the Parisian conceits are round small pocketbooks which are not unlike a flower. The handles are clever imitations of stems and the purse itself is the flower. Blue corn flowers are used for the exteriors of some of them, with mauve silk as the lining. They are effective with summer frocks.

Braided.

Burnt orange velvet baby ribbon woven or braided is forming the crowns of a number of velvet hats

"Bud's" Declaration.

"Bud" who had just started to school, thought it very smart to use big words. His sister was told to slap his hands when he was naughty, so one day he came in, furious, and said: "There is absolutely no philosophy in sister hitting me the way she does She must be made to stop it."—Chicago Herald and Examiner.

By Thin Heels.

The eight-year-old son of a North side family was showing an animal book to his little four-year-old brother. Coming to the picture of a reindeer, with its odd shaped hoofs, he said, "Now Billy, you can always tell a woman reindeer by the kind of heels it wears."—Indianapolis News.

Better Than Using Sand.

They have found that sugar can be made from sea weed. We are suspicious that they have found it can be made from a lot of things besides sugar cane. When the family sugar has to be sweetened before using, its virtue may be suspected.—Los Angeles Times.

Co-operation Necessity of Today.

Some one once said: "Half the people know not how the other half lives." This is truer today than ever. There is need of knowledge that will give co-operation. People cannot longer live unto themselves alone if the country prosper as it should.

MADE POSTMASTER IN 1639

Richard Fairbanks of Boston Appointed by Massachusetts General Court in That Year.

The first account of the formal establishment of a postmaster is found in the records of the general court of Massachusetts, by which, in 1639, it was "ordered that notice be given that Richard Fairbanks, his house in Boston is the place appointed for all letters which are brought from beyond the seas or are to be sent thither to be left with him and he is to take care that they are to be delivered or sent according to his direction. And he is allowed for every letter a penny and must answer all miscarriages through his own neglect in this kind."

In May, 1693, by an act of the general assembly it was provided that a "general post office may be erected by Andrew Hamilton at Philadelphia" and that Andrew Hamilton "or some other as shall be appointed by the king" should be postmaster general "in these parts and his deputy or deputies in that office should demand, receive and take postage, etc."

In 1710, by act of parliament, a postmaster general of the colonies was appointed by the crown and authorized "to keep his chief letter office" in New York and other chief letter offices at some convenient place or places in other of his majesty's provinces or colonies of America and also to appoint all deputy postmasters.

In 1737 Benjamin Franklin was appointed postmaster at Philadelphia and published the appointment in his own newspaper in these words: "Notice is hereby given that the post office of Philadelphia is now kept at B. Franklin's house in Market street and that Henry Pratt is appointed riding postmaster for all stages between Philadelphia and Newport in Virginia."—Kansas City Star.

Save the Carpet.

If you do not wish your stair carpet to wear unevenly, put padding underneath it. There are pads prepared expressly for this use, but wanting these or anything of sufficient body to protect it, use newspapers, on the stair and folded so that they will project three or four inches beyond the stair. If thick enough they will save a great deal of wear and tear of the carpet, also deaden the sound of footsteps.

True Wealth and Happiness.

Omar had the right idea of what constitutes wealth and happiness. A loaf of bread, a jug of wine and thou—under the bough, meaning food and drink and shelter and congenial companionship. Another poet expressed the same belief in slightly different language: "Give me neither poverty nor riches; feed me with food convenient for me."—Exchange.

An Unasked-for Gift

By MARY GRAHAM BONNER

Copyright, 1921, Western Newspaper Union

MR. LOUIS ROTH had become a money-maker. Mrs. Louis missed doing her own work. She liked to do the darning. She was nervous in a motorcar, and a chauffeur depressed her. She had tried having one once, but she not only felt like a fool when she "dolled up," as she expressed it, but she was frightened when she saw the chauffeur's look of disgust when she told him she had no calls to make and no shopping to do except to the corner store.

She didn't care about going to a smart hotel for tea in the afternoon. Now and again she liked to have a "bite" in a pastry shop.

Louis was a musician. He was one of the most popular of dance conductors. He made money from royalties on his popular songs—a great deal of money. She had been often told that musicians were temperamental flirts. But the ones she had seen were not. They liked cigars and pinochle and fat checks. That wasn't so temperamental. Neither was there anything temperamental about the music publishers and the friends of Louis who came in of an evening for cheese and crackers.

She was nervous when the maid broke dishes, though she knew there was lots of money to buy more. She was naturally a careful housekeeper, and the money had come a little too late or else she was one of the rare kind who couldn't spend it! Very rare, but not at all pleasant.

When she went to shows she fell asleep. She longed to dust behind corners and under the rungs of chairs. She loved to bake a good cake.

But prosperity was hers, and she didn't want to let Louis know how hard it was for her to be prosperous.

He came in this time when Mrs. Louis was sitting stringing corn for the little tree she had bought. It was Christmas eve.

Louis was very evidently excited.

He asked his wife to come into the little bedroom so no one would hear. Louis hadn't become used to talking before a maid. His wife noticed that

"It's Going to Be Hard on You," He Said.

he looked rather worried and troubled.

"What's the matter?" A sharp thrill of pleasure went through her. Perhaps he had speculated, lost his money in Wall street, or on the curb. So many people did, she had been told.

Louis would be poor and she would darn his socks and get his meals, and they'd live in the old flat and keep the cozy red plush furniture. Louis had been talking lately of moving to better quarters.

He took her hands in his. "It's going to be hard on you," he said.

"Oh, no," she answered, trying to repress the exultant note in her voice, "I'll be glad—"

She was about to tell him how oppressive the riches had been, how they had almost suffocated her. How much happier she would be to have to save money, rather than try to spend it for Louis' sake, to make him feel she enjoyed it.

"Wifey," he said finally, "they want me to tour Europe. It's a great chance. There's big money in it, and the boys all want to go with me. Do you suppose, wifey, I know you're awful seasick, and a poor traveler." His face looked worried. "But do you suppose you could stand the seasickness and all, for I'd be so lonesome leaving you home? They want me so much—and they know I wouldn't want to go without you—that they're going to pay your expenses and make that a little Christmas present for you!"

She gave a look at the beloved red plush furniture. Would there never be any rest from prosperity? Her fate was sealed.

"I guess I could stand it, Louis," she said bravely. But in her heart there was hopelessness. Money, Europe, riches and more riches, a limousine future and a street car soul! And a Christmas present of such a trip! And she, alas, would have so much preferred a street car ride and a sewing basket from the boys such as they had given her that first Christmas after she had married Louis, when they hadn't been rich!

New Kind of Clock.

A clock recently invented in England has some novel features. One of these is that the weight of the clock itself is the moving force which actuates the mechanism, the clock sliding down two vertical pillars; to wind it, therfore, all that is necessary is to push the clock up to the top again. One advantage attaching to this system, in addition to its simplicity and the absence of keys, is that the need for winding is visible at a glance; hence this necessary operation is not likely to be overlooked.

Many "Treasure Islands."

A large number of islands in various parts of the world have had the reputation of holding buried treasure. Stevenson's "Treasure Island" had no foundation in fact, but is stated to be the real result of his reading of stories by Defoe, Washington Irving and Poe, also Johnson's "Lives of Pirates and Highwaymen," supplemented by his own experience on sailing ships. Stevenson himself said that the germ of the story was the map drawn for the wall of his stepson's playroom.

Source of Mosquito's Humming.

There is an apparatus for a long time overlooked or neglected by the investigators, at the base of the mosquito's wings, whereby the characteristic humming of that insect may be produced. The species examined is the anopheles maculipennis and the apparatus consists of a slightly movable bar provided with a series of well-marked teeth, which, as the wings are raised and lowered, rasp across a series of ridges.—Brooklyn Eagle.

ENCOURAGE FENCE JUMPERS

Dilapidated Fencing Is Source of Constant Trouble for Owner of Dairy Herd.

Half broken down fences help to teach the cows to be fence jumpers. Heifers that are constantly jumping the fences in easy places are difficult to break in later life and nothing is more wasteful of time and patience than constantly chasing your cattle out of your neighbor's crops or your own. Good fencing is necessary equipment for the dairyman and poor fencing is a constant risk.

GIVING YOUNG CALVES MILK

Care Should Be Taken That Temperature Is Uniform—When Poor in Quality, Give Less.

Care should be taken to see that any milk fed to the young calves is of uniform temperature of about 90 degrees Fahrenheit. Many feeders attempt to overcome poor quality in the feed by increasing the quantity. This is radically wrong. When on account of age, souring, dirt, etc., the quality of the milk is poor, the quantity should be reduced rather than increased.

Reduced Holiday Fares

VIA.

ROCK ISLAND

Holiday excursion tickets will be on sale December 22-23-24, 1921, with FINAL RETURN LIMIT of January 4, 1922, at FARE AND ONE-HALF for the round trip to destinations within restricted territory.

Secretary, Board of Directors.

SHORT COURSE DATES SET

Farm Home Week to be Held Jan. 30 to Feb. 4 1922, According To Committee

Farmer's Week at Iowa State College, Ames. will be held this winter from Jan. 30 to February 4. It is announced to be "A short course to fit the times," and accordingly, the program will deal mainly with the great question of getting a fair profit out of farming in spite of changed conditions.

Just now farmers everywhere in Iowa are interested in the question and that is more profitable production, and not more production. Letters sent out by the general short course committee to get suggestions from farm leaders as to the kind of program that should be offered this winter brought almost a unanimous demand for lectures and conferences on more economical production, on marketing, on taxation on transportation. They ask to be told and why and wherefore of higher taxes and railroad rates, they want to know about the proposed financial projects for agricultural relief: they suggest that information about foreign market conditions would be helpfull to them.

These new demands are to be met in the program. It will in many respects be different from any offered hertofore. Outstanding men from other states will be brought in to assist the staff of the college.

This big Farmers' Week program is regularly offered free of cost to Iowa farmers. This year there is already saurance that there will be a fare and a third rate for the round trip on all railroads.

A Merry Christmas

While eating your Chistmas Dinner you will have on your table butter made by us, and while tastiug it's delicious flavor remember we are wishing you a Merry Chrstmas and a most Happy New Year.

Klemme Creamery Co.

BYWAY OF STEEL

Marvelous Bridge That Is to Span the Hudson River.

Structure Many Times Larger Than Famous Roadway That Connects Manhattan and Brooklyn.

Inscribed over the portals of an early and famous suspension bridge in Europe one may read the inscription. "Via Suspensa Difficile Fit," of which a very free translation would be, "It is no small task to swing a highway through the heavens." Doubtless, remarks the Scientific American, the aborigines thought so when they first spanned a stream with their elementary suspension bridges built of the tough tendrils of trees, and followed these with more ambitious structures built of cables woven of twisted fibers.

The comparatively small strength of such materials set a stern limit upon the length to which these early bridges could be built, and there was a long wait through the centuries until the dawn of the iron age presented the bridge builder with a material which enabled him to construct more daringly. And so it came about that in 1820 the famous engineer, Telford, by forging his iron into long, flat eye bars, was able to build the famous chain-cable suspension bridge 1,000 feet in length which carried the post road to Holyhead across the Menai straits by means of two shore spans and a main span across the channel which is 590 feet in length.

But the iron chain cable grew so greatly in weight as its length was increased that we had to wait until drawn wire presented the engineer with material that was so strong in proportion to its weight as to open up greater possibilities in the building of long-span suspension bridges; and that distinguished engineer, Colonel Roebling, availing himself of the new material, did not hesitate to connect Manhattan and Brooklyn by a bridge whose main span measures 1,595 feet between its supporting towers.

Further developments in metallurgy and the art of steel manufacture, particularly in the direction of alloyed steels, has so greatly extended the possibilities of long-span construction that today in the bridge designed by Lindenthal to span the Hudson river we have a structure whose main span is double that of the Brooklyn bridge, its floor space five times larger and its load capacity fifteen times as great.

If that engineer of an earlier day could come back seven years hence and look upon the completed Hudson river bridge, he would feel surely that his Latin inscription could be placed above the portals with a stronger emphasis and a more profound significance than he himself had ever dreamed of. And yet, to do him justice, it should be written here that progress in the science and technique of engineering has made such strides that the task of swinging this broad highway through the heavens, great though it be, is no more difficult to the engineer of the Twentieth century than was the feat performed by the bridge builder of a hundred years ago.

Crowd Gets Free Sneeze.

The next time Johnny Jimpson takes his grandfather to the baseball game he is going to make the old man promise to leave his snuff box home. The two were seated in the stand when along about the second inning Grandfather Jimpson felt that he needed a pinch of snuff. He produced a beautifully engraved snuff box and opened it. Unfortunately he did not figure on the wind velocity, for no sooner had he opened the cover than the contents were blown from the box. Then it seemed that everyone in the stand began to sneeze.

"Look what you've done," moaned young Jimpson to his grandfather. "All this sneezing is liable to rattle the players and the Cubs might lose."

"Confound the players!" replied the old man. "I want my snuff. Look at everyone sneezing around here on my snuff. Why didn't some of it blow on me?"

Rotten Net, Bass Doesn't Linger.

A North side fisherman went fishing before the season on bass had closed. He had to hunt all over the place for his live net, but finally found it, hanging on a nail outside the house, where it had been for six months.

Catching a fine bass he opened the live net and put the fish into it. The bass objected to the close confinement, gave a twist of his tail and went right on through the bottom of the net, which had become rotten from its long exposure to the elements.—Indianapolis News.

Civic Improvement.

"Say, mister," the particularly objectionable vagabond demanded of the prosperous appearing citizen, "would you give $2 to greatly improve and beautify your town?"

"What's the idea?" was the suspicious response.

"Why, for two bucks I'll move on to the next village," the objectionable one explained.

"Here's the money."—Winnipeg Tribune.

Well Enough.

"Does this piece of goods wear well?" inquired the shopper. The clerk leaned toward her confidentially.

"No, madam," he replied. "I'll warrant that you'll have a perfectly legitimate excuse for getting a new gown the second time you wear this."—The American Legion Weekly.

The Prince of Good Fellows

Santa Claus' Books

WHEN the evening shadows gather
and the time is eight o'clock
You can hear, if you will listen, Mr
Sand Man's gentle knock.
Then you'd better hustle lively—time your
evening prayers were said
And each boy and girl well tucked in
their cozy downy little bed.
For when Mr. Sand Man's knocking
sounds the signal, you may know
Santa Claus is closely watching from his
palace built of snow.
And the children that are naughty and
don't mind their ma's and pa's
Get their names down in the "Bad Book"
that is kept by Santa Claus.

Boys who never split the kindling, and
the girls who always cry
When they're asked to wash the dishes—
Santa Claus has got his eye
On such boys and girls, and watches with
a sad and sorry look
As he writes each name in sorrow on the
pages of his book.
And the girl who never hurries, but lets
mamma do the work,
And the boy who's always scheming all
his little chores to shirk—
They may think no one pays notice when
they don't help ma's and pa's
But their names are on the "Bad Book"
that is kept by Santa Claus.

But old Santa keeps a "Good Book"—it's
the bestest book of all,
Where he writes the names of children
who are prompt at duty's call,
And the boys who split the kindling and
the girls who never shirk
But rise early in the morning and help
mamma with the work;
And the boys who never grumble when
there's work for them to do,
And the girls who help their mammas
till the housework is all through—
Oh, they needn't ever worry when it's
Christmas time, because
All their names are in the "Good Book"
that is kept by Santa Claus.

Is your name down in the "Bad Book?"
Well, there is still a chance for you.
And if you will listen to me, I will tell
you what to do.
Don't act naughty, don't talk rudely, don't
be noisy, be polite;
Get up early in the morning, and into bed
early at night
Cheerfully perform each duty, do your
work before you play.
Never put off till tomorrow work that
should be done today.
If you do these things, dear children,
it will please your ma's and pa's.
And your names go in the "Good Book"
that is kept by Santa Claus.

THE YULETIDE FLAME

Spark in Hearts of People Cannot Be Quenched.

All Have Desire to Make Fellowmen Happy by Gift or Words of Greeting.

NEITHER hatred, nor envy, nor deceit, nor all the legions of ugly human passions that assail the heart, nor rancor between individuals, nor national lust for power, can extinguish it. They may dim but they can not quench the spark in the heart of man which impels him, as every waning year brings the Christmas, to try to make a few of his fellowmen a little happier. Often it is by the method of the gift, perhaps something that costs hundreds of dollars, maybe only a penny card bearing an inscription of good cheer. Frequently it is something intangible, the whole-souled word of greeting to the old lady in a shawl who sells you your paper, or the smil of comradeship which you give the conductor who punches your ticket, or the elevator man who takes you up to your office (fellow workers all). It is not giving that counts, not the bestowal of something valued in dollars and cents, the transference of something from your hand to another's. That is a purely mechanical process, which may or may not create happiness. No; it is the longing to give, the desire to be the cause of another's happiness.

To wish to help others is the oldest passion in the world—even a little older than the impulse to overcome others. And it is the deathless passion as well. It needs no Christmas day to keep it alight, but as long as Christmas continues to provide fuel to make the flame of good fellowship burn brighter, that day will continue to be the richest 24 hours in all the year.

We wish all our patrons and friends a

Merry Christmas

and a

Happy New Year

Also thanking you for your patronage and soliciting your future business.

Yours for Service

Koener Telephone Co.

THE SANTA PARTY

How Lots of Christmas Fun May Be Had by Boys' Club.

Each Lad Provides One Present, Made by Himself, for Old Kris Kringle's Bag.

THE biggest boy in the club should be the Santa Claus. To dress him up, borrow a bath robe, and trim it round the collar and cuffs with some old fur. A big fur cap is the thing for Santa Claus' head, and a great big bag should be provided for him to hang over his shoulder to carry the presents in. A paper mask for Santa can be bought at some small store for about twenty cents, and a big beard can be made of excelsior, tied up so as to stay in place. If the excelsior can be dyed gray all the better.

Each boy in the club should provide one present for Santa's bag. It would be better if each boy should make the present himself. Good things for such presents are bean bags, baseballs, bats, shinny sticks, tops, marbles, short wooden swords, slings, putty blowers, jew's-harps, soap-bubble pipes, jack-stones, match-safes, candy, chewing gum, and so on.

All the presents for the Santa Claus party should be handed to a committee of three knights, whose duty it is to pack them all neatly in Santa Claus' bag. At the time of the party the members of the club should gather together in the meeting room, and the committee may meet in a room near by with the big boy who is to be Santa Claus. They must dress him up and escort him to the club. When Santa comes in all will rise, and the president will say:

"Greeting, Santa Claus; the boys await you."

Santa may reply, "Greeting, my children."

Then Santa passes out the presents. It is best for the boys to form a line, and for Santa to reach in the bag without looking and pull out the first thing that comes to his hand.

The last present in the bag is Santa Claus'. A good deal of amusement can be had at the party if a committee of five boys is chosen to look after the entertainment. A good plan is to get up shadow pictures. A sheet is hung up near one end of the room, about five feet from the wall. Behind the sheet, close to the wall and low down, is placed a strong light. The knights and others who are to be the audience all sit in front, and when everything is ready all lights except the one behind the sheet are put out. The boys who are to make the shadow pictures then go between the light and the sheet and cut up all sorts of antics, throwing large shadows on the sheet. If there is a boy who can make odd shadow pictures with his hands he can amuse the club for some time.

Another thing that makes fun at a Santa Claus party may be called the "boy orator." A large pair of boots is provided, and the boy orator puts his arms in these and stands back of a table, so that his booted arms may look like a pair of short legs and he appears to be a funny little man standing on the table. Another boy stands behind him, and puts his arms through under the orator's arms and makes the gestures while the orator delivers his speech. This can be made very funny if the orator learns a good speech and if the boy who makes the gestures waves his arms and makes very bad and inappropriate gestures. It is especially trying for the orator if the gesturer holds a handkerchief in his hands and wipes his face occasionally or waves it in triumph at inappropriate times.—The Delineator.

Present and Future.

The wise youth prepares for the future,
But during the holiday whirl
He should also remember the present
That's expected by his best girl.

Santa Claus Did Come

You're the Goodest Old Santa

THE FIRST CHRISTMAS

Birth of the Christ Child Announced by Angel.

Good Tidings of Great Joy to All the People in Coming of the Savior.

NOW it came to pass in those days, there went out a decree from Caesar Augustus, that all the world should be enrolled. This was the first enrollment made when Quirinius was governor of Syria. And all went to enroll themselves, every one to his own city. And Joseph also went up from Galilee, out of the city of Nazareth, into Judaea, to the city of David, which is called Bethlehem, because he was of the house and family of David, to enroll himself with Mary, who was betrothed to him, being great with child. And it came to pass, while they were there, the days were fulfilled that she should be delivered. And she brought forth her first-born son; and she wrapped him in swaddling clothes, and laid him in a manger, because there was not room for them in the inn.

And there were shepherds in the same country abiding in the field, and keeping watch by night over their flock. And an angel of the Lord stood by them, and the glory of the Lord shone round about them; and they were sore afraid. And the angel said unto them, Be not afraid; for, behold I bring you good tidings of great joy which shall be to all the people: for there is born to you this day in the city of David a Savior, who is Christ the Lord. And this is the sign unto you: Ye shall find a babe wrapped in swaddling clothes, and lying in a manger.

And suddenly there was with the angel a multitude of the heavenly host praising God, and saying,

Glory to God in the highest,
And on earth peace among men in whom he is well pleased.

Get at the Repair Work
While the weather's good

You pay more if you wait longer to have needed repair work done.

Cold weather slows up the carpenter. The job he can do in a half a day now, may take him a whole day tomorrow.

Put your home in readiness now for winter. We will be glad to take care of your lumber needs regardless of how small your order may be.

"Where a Dollar Does Its Duty"

Mason City, Iowa **Manly, Iowa**

Little Johnny's Fears

WHERE we use' to live, we had
A fireplace big an' wide,
An' all that Santy had to do
Was hold his breath an' slide,
An' squeeze hisself until he fit
The hole, an' then est drop—
An' he knowed where the stockin's was,
'Cause that was where he'd stop.

Where we use' to live, it was
No trick for him to climb
Up to the chimbley on the roof
An' find us, Christmas time;
But now I'm worryin' for fear
He won't know where he's at,
Or mebbe can't get in at all!
We're livin' in a flat!

We're livin' in a flat, an' say,
You mus' be most polite,
Or else the janitor he'll go
An' lock you out at night!
There ain't no chimbley to our house,
Where Santy Claus can slide—
There ain't no fireplace—just a pipe
About two inches wide.

They heat our flat with steam—that's why
I'm afraid he can't get in
With all his toys an' drums an' things
Unless he's awful thin;
An' how's he go' to wriggle out
When he gets in? Gee whiz!
There's such an awful little hole
There where the sizzle is!

—Chicago Tribune.

HOLLY MAY SOON BE EXTINCT

Popular Christmas Decoration Is Growing Less Bountiful Each Year, According to Reports.

Christmas holly, that merriest and most beloved of all growing bushes, is threatened with extinction, according to a warning sounded by lovers of a red Christmas. Once growing profusely in southern New Jersey and Maryland, it has been swept from those states by the ruthless cutters for the city markets, and must now be sought in the swamps of Virginia and North Carolina, where already the supply is growing less bountiful each year. The Gulf states have been similarly shorn to make holiday for the large cities.

Within another generation, botanists say, holly will be as rare as mistletoe, which used to grow in abundance on the Atlantic seaboard, as far north as Raritan bay, but has now practically ceased to exist as a Christmas decoration. When will the American people learn that the bounty of their fields and woodlands is not limitless?

With sinking hearts nature lovers have long since recorded the disappearance of the delicate trailing arbutus, flower of the Pilgrim maidens, from all woods near large cities. The mountain laurel, which once swept the hills of June with pale pink drifts like naughty clouds running away from the sunset, has now retreated to the remote mountain sides.—New York Tribune.

THE HOLY MANGER

"Presipio," Instead of Christmas Tree, in Italy and Spain.

It Is Representation of the Place Where Baby Christ Lay in Bethlehem.

GIRLS and boys of Italy and Spain, which are called the Latin countries, never hang up their stockings at Christmas time, nor do they have Christmas trees. Kris Kringle and Santa Claus are German saints and the Christmas tree came out of the German forests long, long ago, when the nations of northern Europe were forest tribes. It is the northern peoples—the Germans, Scandinavians and English, all of whom are descended from old Teutonic tribes—who keep Christmas as Americans do.

Instead of the Christmas tree, Italian and Spanish boys and girls have the presipio. "Presipio" means manger, and it is a representation of the manger where the baby Christ lay in Bethlehem. It is presented in different ways. Sometimes it shows only the inside of the barn where the Baby and His mother lay, with Joseph, the Three Wise Men and the animals about. Sometimes it shows a hillside, with the Wise Men coming on foot or horseback, or on donkeys, bringing their gifts to the stable. Sometimes the manger is small—not more than a foot square. Sometimes it is large enough to occupy the whole end of a room. It is built on a board foundation and is made of wood, with earth, pebbles, dried grass and leaves for the outdoor scenes. The figures are carved of wood, or perhaps little dolls are used, all very carefully and elaborately dressed by the girls. Sometimes brooks and lakes are ingeniously represented with paper, glass or isinglass. Sometimes the whole is rough and rude, but again it is very neatly and beautifully done, and is quaint and interesting when all complete.

The French, who are half Latin and half Teutonic in their makeup, mix the customs of both races in their Christmas keeping. They build the manger and they also give the children presents; only, instead of hanging her stocking, little French Babette puts out her shoes. The French call the manger "creche," and in country villages in France companies of children still go from house to house on Christmas eve, carrying the creche and singing Christmas carols. Sometimes they help to build a beautiful large creche in the village church, over which they are very proud and delighted.

The Echo Came.

The mother of a five-year-old child was admonishing him to be a better boy, when the father who was present jokingly remarked, "It can't be did, it can't be did." Later when the little boy was saying his evening prayer just before retiring he invoked the Supreme Being to make him a better boy. Continuing, he said: "Make daddy a good man," then hesitating in his supplication he remarked, "It can't be did, daddy, it can't be did." —Columbus Dispatch.

Reprisal!

There's a little boy in our town who was given a puppy for Christmas, and the gift being at the puppish age, when everything looks good to chew, he bites harder sometimes than he should. One morning, several days after Christmas, the little dog ran howling from the room. When the little boy's mother inquired what was the matter he replied: "He bit my finger and he can't learn to stop bitin', so I bit his ear."—Topeka Journal.

About Bosses.

One of the fool notions young men get is that the boss doesn't know what is going on in the plant. We never yet have known a boss who didn't somehow manage to know more about what was going on in the concern than any of the employees gave him credit for Or to put it another way: We've never known a boss who raises the pay of a shirker under the false belief that he was a worker.—Exchange.

Glass and Tin Churns.

A patent was granted in England in 1851 for a cylindrical glass churn, and these were tested at the exhibition of 1851 in competition with French tin churns, and the old English wooden churns. The small wooden family churn worked so well that it was awarded a prize medal over its more aristocratic glass relations. —Scientific American.

Weather Affected by Sun Spots.

A Dutch meteorologist has studied the winter temperatures in western Europe from 760 to 1916 A. D. He has found that greater activity of sun spots is accompanied by winter setting in harder and earlier than usual, while less activity of the spots corresponds to late, mild winters.

Blood to Spare.

Persons with high blood pressure, if otherwise perfectly healthy, are excellent donors of blood when this is needed for transfusion. And the resultant loss of blood may save the life of a man or woman of 60 by preventing apoplexy.

Vitamines in Vegetables.

Green vegetables and certain fats are the chief containers of vitamines in our ordinary diet. They are also very prevalent in lime juice. That is why lime juice is always issued to sailors on board ship.

Objection to Smoke Is Old.

In the Seventeenth century, during England's first smoke agitation, it was recommended that all factories be moved from the city to a distance of eight miles to remove the nuisance.

PLAN TO MAKE MENDING EASY

Convenient Arrangement to Make the Task Agreeable and to Do Work Systematically.

For some reason or other mending is one of the hardest tasks in the weekly regime of many housewives, and whenever a woman says that she dreads mending and does not get time to do it as she should, she never has taken the time to put her mending materials into convenient position.

One of the most convenient little mending equipments consists of a little built-in cupboard placed in the side of the wall of the downstairs sitting room. On the inside of the door of this cupboard are placed little shallow strips of wood and big nails driven into these strips so that the nails are exposed perhaps a couple of inches. These nails are perhaps an inch and a half apart. On each of the nails is a spool of thread, the white threads arranged together according to the degree of fineness. Colored threads are placed together on another row, and various sorts of mending threads all grouped together elsewhere.

There are shelves in the cupboard to hold various mending materials and there is one shelf for stockings and other shelves for other sorts of mending.

On Monday night or Tuesday when the clean clothes come in from the line they are looked over and those that need mending are put in their place in this cupboard. The mending is always done before ironing. This mending cupboard is downstairs, so it is a simple operation to transfer the clothes to the mending cupboard from the clothes basket. Usually the mending is done Tuesday evening, the mothers and daughters of the family taking it for granted that some of their time should be devoted to this work until the shelves in the mending cupboard are cleared.

DELIVER DAIRY GOODS CLEAN

Wholesome Products Are Best Advertisements and Any Infraction of Rules Is Harmful.

Of all the mediums of good sound advertising in the dairy industry there is not one which can excel that of "quality."

When we observe the methods of those who have really achieved in the dairy business we will find in every instance that success was made possible through the application of common sense rules of cleanliness and sanitation.

Clean wholesome dairy products are the best advertisements, and any infraction of these axiomatic first principles will work to the dairyman's disadvantage and render it difficult to repair the damage wrought.

Dairymen are, as a rule, in the business to make a success of it, and there is no single factor that will promote business faster than the production of a clean wholesome product.

All Privacy Goes.

If that X-ray contraption for taking pictures through walls works, the gold fish won't have much on us for privacy.—Minneapolis Tribune.

WIRE FENCE PHONES

Farmers in South Dakota Use the "Barbed-Wire System."

County Agricultural Agent Assists Farmers to Install System at Cost of Less Than $20 Each.

(Prepared by the United States Department of Agriculture.)

Washington.—There are still many rural homes that do not have telephones and, as at present economy in all lines is imperative, interest is reviving in the "barbed-wire system," which was more or less common in parts of the West 20 years ago.

In Carson county, South Dakota, the county agricultural agent has assisted farmers to install such a system at an average cost of material per farmer of less than $20. Carson County is 87 miles long and very sparsely settled, although the agricultural lands are fenced. Standard telephone lines appeared to be too expensive, yet there was a great need of facilitating communication. The county agent furnished information regarding the cost of installing the line, using porcelain nail knobs for insulation, which cost about $5 per mile. These knobs work satisfactorily when the barbed wire is tied to them with a short piece of wire.

In order further to reduce the cost some farmers tried pieces of rubber cut from automobile inner tubes as insulators. Pieces of the tubing 1½ inches square were wound around the barbed wire and fastened to the post with staples. The county agent reports that this insulation is giving satisfaction, although, of course, the rubber will deteriorate in time.

The farmers were able to obtain second-hand phones at from $5 to $20 each and 50 cents bought a lightning arrester, so that the total cost per farmer was comparatively nominal.

Each farmer has his own special ring, so there is no expense for a central. It is possible with a system like this to connect various parts of the farm or distant barns with the house, or the tenant house with the farm home, at a very low cost. While such a system leaves much to be desired in the way of service, it meets an emergency and can be made to answer, pending the coming of times when conditions will warrant a more expensive and more satisfactory system.

SLOVAK ENVOY TO JAPAN

One of the newest nations represented in Tokyo recently sent Dr. Chvalkovsky to take charge of their interests in Japan.

This is the Czechoslovak representative of Tokyo, photo taken aboard the steamer upon his arrival in Yokohama.

The gentleman was minister of the interior at Prague in 1919.

PUT OUT FIRE WITH WINE

Forty Barrels of Vintage Used to Save Burning Building on Pennsylvania Farm.

Carlisle, Pa.—Forty barrels of fine elderberry wine proved to be the only effective fire extinguisher when a fire on the farm of Gilbert Beetem here destroyed a barn and outbuildings valued at $10,000. When tenants reached the fire, water was promptly poured on the burning buildings; but, although a bucket brigade worked for six hours the buildings were destroyed.

The flames started to ignite a handsome lodge on the farm. The water had run out. The tenant remembered a large quantity of wine stored in the cellar, and within a few minutes the bucket brigade was transferring elderberry wine to the roof of the threatened building.

A steady stream of wine was kept on the building until forty barrels were exhausted. The building although badly scorched, was the only one on the farm saved.

Cattle Rustlers Busy.

Houston, Tex.—The old cattle rustling days are coming back to southern Texas.

Wholesale cattle thefts here and in surrounding counties have been reported. Deputy sheriffs armed with search warrants visited a farm nine miles from here. They found the hides and heads of three calves. The brand had been cut off.

Officers say there is a ring of cattle thieves operating in the state.

The DAY DREAMS of the OLD FOLKS AT CHRISTMAS

by Frank L. Stanton

Old folks, too, like Christmas; Grandfather, sitting there,
Feels sad if he's forgotten 'cause he's in his chimney-chair;
He says he's thinkin' of the days that he no more will see,
When he was just a little boy—a Christmas boy—like me.

He listens to the fire—for it's always talkin' so,
And then it is he calls to mind his good times long ago
When the Christmas wind was whistlin' through the cold and frosty nights
And children dreamed of Christmas bells and watched for Christmas lights.

He doesn't seem to hear at all the noise the children make,
For when he sits the stillest there he's dreamin' wide awake!
But mother—then she tells us to all run right out and play,
For old folks hear sweet music when they're dreamin' day by day.

And then Grandmother—SHE comes in and sits beside him there,
And puts her hand in his, and says sweet words he loves to hear;
But what they are she'd never tell to mother or to you;
She knows that he is dreamin', for she dreams the same dreams, too.

So Christmas comes to old folks, and it's then they love to know
The children don't forget 'em, though they lived so long ago!
An' they say the sweetest present of all sweet things and fair
Is a kiss on Christmas mornin', when we climb their chimney-chair.

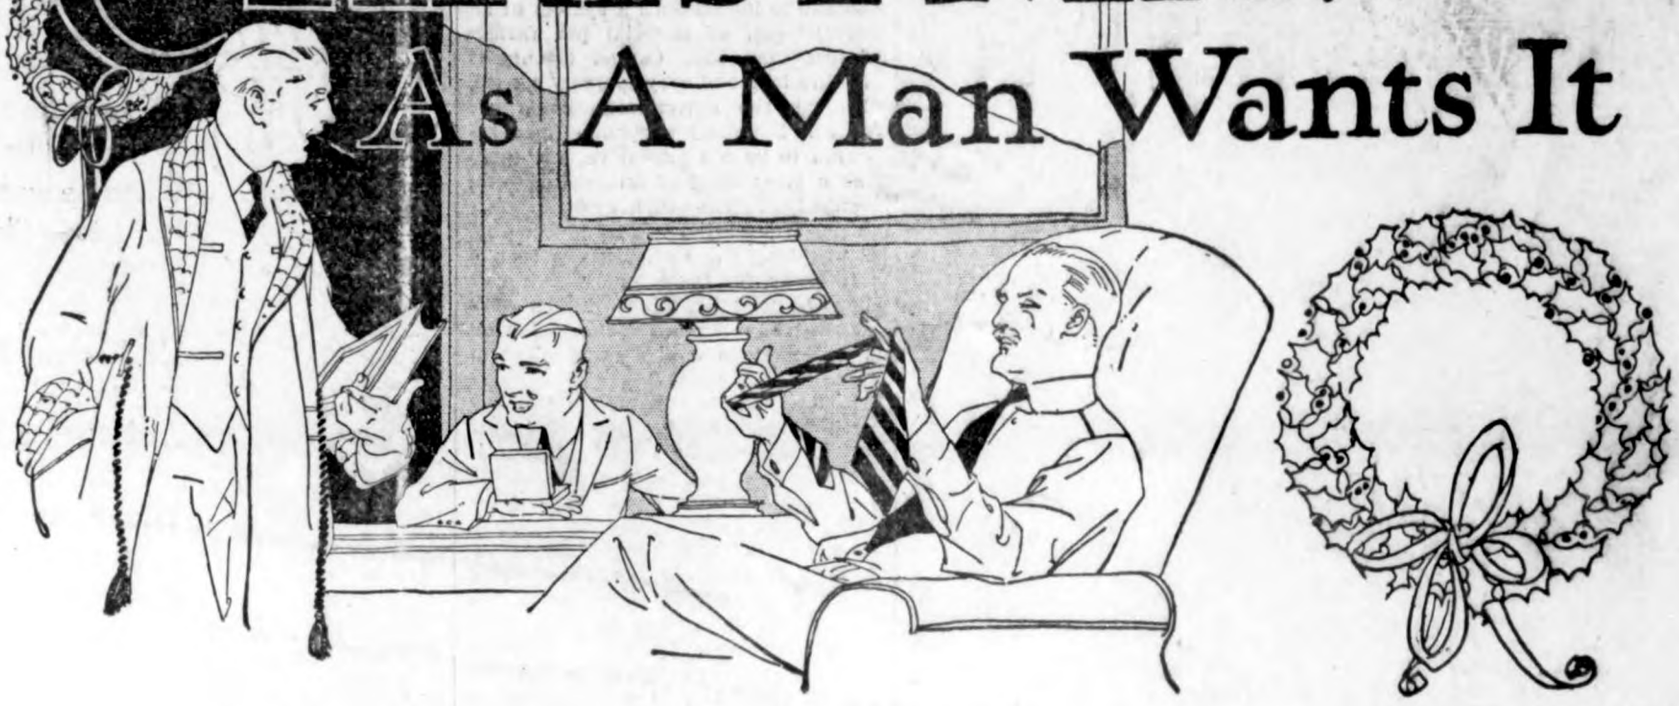
CHRISTMAS
As A Man Wants It



Inexpensive Christmas Gifts For Men

IN one sense, you'd find that a Hart Schaffner & Marx suit or overcoat would be the most inexpensive gift you could find. The long service and satisfaction he would get would make it so

But there are so many smaller things, that cost less, and are just as good value for the price, that you're sure to find something to satisfy your purse and the man's taste in our fine stock We're here to help you, not simply to sell you something

You see, it's a store where men buy their own things; and when you buy in our store you're sure to get the sort of things they want

Here are a few suggestions

Shirts some with collar attached, madras, silk.

Hats the latest soft shapes; caps, derbies.

Gloves for driving or for dress; cape buck; mocha.

Neckwear in fine heavy silks; silk knits, too.

House robes, underwear, hosiery, sweater coats, pajamas, everything a man needs and wears.

KLEMME HIGH SCHOOL'S SECOND ANNUAL DECLAMATORY CONTEST WAS HELD LAST FRIDAY NIGHT

Adolph Lauritzen and Adella Schroeder Were The Winners

The Second Annual Declamatory Contest of the Klemme High School was held at the Idle Hour Theatre last Friday evening and was given a large audience.

There were so many good speakers on the program that the judges had difficulty in deciding the winners as all entrants did their very best and all were exceptionally good.

The Declamatory Contest was divided into two sections, the boys and the girls teams. and each class of the school was represented.

Adolph Lauritzen took first prize with his selection "Bucks" and so won honors for himself and for his class.

Miss Adella Schroeder won first prize in the girls' division with her selection, "Uncle Alic's Bad Folks."

Both Adolph and Adella were in the Dramatic Class, and they were awarded the Gold Medals.

Johnnie Baumgartner took second prize for the boys with his selection, "Teddy's Matchmaking" which he gave very well. Miss Edna Bergman won second with "The Aspiring Dishwasher", which was also a humorous piecce and well given.

In addition to the regular program of speaking by the stulents a piano duet was given by the Misses Ethel Wellemeyer and Elvira Stille; a vocal solo by Mrs. Clarence Johnson and music by the Girl's Glee Club.

County Superintendent J. R. Baggs, and two Garner high school teachers acted as judges.

KLEMME STUDENT WINS SECOND PLACE IN GARNER DECLAMATORY CONTEST

Earl Josten Takes Second Place in Oratorical Class

At the High School Declamatory contest which was held at Garner last Thursday evening, Earl Josten, of this place and who is attending the Garner High School this year, took second place in the Oratorical Class, with his selection "The Message of Graecia." Melvin Prouty took first with his selection, "The Perfect Tribute."

Other winners in the Garner Declamatory contest were as follows: In the Dramatic Class Miss Verona Baggs took first with "The Soul of the Violin." Miss Naomi Frisbee, second, with "The Cleansing of the Lepers.". In the Humorous class Miss Ester Conway took first with her selection, "A Pleasant Half Hour on the Beach." Miss Ilah Stieby took second with "Practicing Domestic Science."

Miss Ester Conway carried away all honors as the judges awarded her first over all contestants and Miss Illah Strieby took second over all.

We are prowd of the showing that Earl Josten made at the Garner Contest. Each year when Klemme students go to Garner they make a good showing and always are listed among the best students. This year Klemme has several students at Garner school and all are making a splendid record in study and athletics and we expect to see them at the head of the list at graduation time.

CHRISTMAS TO BE CELEBRATED THE 26TH

As Christmas day falls on Sunday this year, the date for observance of the holiday has generally been set thruout the United States to be celebrated on Monday. December 26th. Most of the towns nearby have announced that Monday will be celebrated and here in Klemme most of the business men have signified their willingness to observe Monday on which date they will close their stores. Bear in mind that the stores will be closed Monday and arrange to do your shopping Saturday

HERE'S LIST OF COUNTY AUTO NUMBERS

Quite a number of Klemmeites have received their new auto license number plates for 1922. Those who have not yet received their numbers should do so at once as the penalty attaches on Jan. 1st, so tehir are only a few days left in which to get numbers at the County Treasurers seat at Garner.

Elko Buss of this place has number 13, but he does not think it will bring him any bad luck. Treasurer John Suurballe took No. 1 for himself this year. So there will be two men in the county at least who will be recognized easily by their number.

The 1922 license plates for the ninty-nine counties in the state have a serial number for each county. Honcock's number is 46. Polk county has number one for its serial number.

Below we are publishing a list of all the counties in the state and the serial number for each. Clip this list out of the Times and place it in some convenient place near the drivers seat of your car so that when you meet another car you can look at the list and tell at a glance from which county it is from. This will be a great convenience for travelors

CHRISTMAS SERVICES AT THE EMANUEL REFORM CHURCH

Christmas Services at the Emanuel Reform Church of Klemme will begin at 7:30 o'clock Saturday evening when the Christmas Tree program will be held.

Christmas services will be held at 10:00 o'clock Christmas morning, and also Monday morning at the same hour. You are invited to attend these services.

A. A. Depping.

Klemme Couple Wedded Fifty Years Ago Celebrate Event

NO PAPER NEXT WEEK

There will be no issue of the Klemme Times next week as during that period we will take our annual vvacation. The week after Christmas is always the quiet week of the whole year and business during that time is slack so we have chosen that as the best time to break away for a few days.

A great many apers in the state are doing the same as a newspaper should have a rest once in awhile

Last week we issued our regular Christmas special in colored covers and sent out a great number of sample copies to all parts of the county that our advertisers might have the benifit of an extra large circulation outside the territory for their Christmas goods. The peper last week was all home print and was perhaps the best holiday edition ever issued in Klemme.

This week we are issuing with a number of greetings from the various business houses in Klemme who we could not handle last week for lack of time.

We wish to extend to all our readers and patrons of the Times a very merry Christmas and a happy and prosperous year for 1922 and thank all who have supported the paper and helped to make it a success.

Friend Jergy:

As I haven't written for a quite a while I will again with great pleas ure send you a few lines, as up to this present time we are all feeling fine and dandy. Well Jergy the weather out here is still wonderful, sunshine every day and the grass lawns are as green as can be. Every resident house out here have lots of flowers on their lawns and all the flowers are in bloom. A perrson can't hardly believe it it winter weather. I myself go fishing every day out on the beach pier and I most generally have good luck We most generally have from one to two meals of fish each day, and they certainly are tasting fine. Out on this pier I will say there are 250 to 500 people fishing every day and it sure is a sight to see all the fish lines in the water. I myself fish mostly for mackeral. They are sure great dope.

Well Jergy, yester day was Chas. birthday and we celebrated it and we certainly had a fine time. We are acquainted with three families out here and they came over. That sure made Chas happy, and talk about eats. we sure had them. We had all kinds of cookies, cake, apples pears, candy and grapes and we wound up on a gallo nof ice cream. Chas. was sure dolled up and we sure had a fine time. We spent the evening playing rummy and telling of each others experience. Chas says that he will never forget his birthday partry. He feels mighty prowd over it, and he received presents, such as candy andetc. Well Jergy, its about noon and we have all our doors open to receive fresh air. Chas says he can't understand it, only two weeks till Xmas and him walking around here in short lseeves. I suppose you folks almost freezing to death. In fact it does seem funny. Mrs. Stiel is also very satisfied with the climate. She is enjoying herself very much. Wlel Jergy I will close for this time and all of us wish all Klemme people a Merry Xmas and a much happy New Year.

Your Friend

KLEMME CREAMERY OPENS STATION AT MESERVEY

TheKlemme Creamery have expanded their business and have established a cream station at Meservey and are doing a good business from that point. Clint Brogen is in charge of the station there and farmers near Meservey can take their cream to him and he delivers it to the creamery here at Klemme.

The Klemme Creamery is growing fast and are taking in a lot of territory. In fact they have increased their business 100 per cent over the same period a year ago.

KLEMME COUPLE CELEBRATE GOLDEN WEDDING ANNIVERSARY

The fifteenth of December was one of the high points in the life of Mr. and Mrs. Aug. Schlawien. That date marked the fiftieth anniversary of their marriage.

The anniversary was properly observed when at about 11 o'clock a host of friends and relatives gathered at the little home to spend a few hours in memory of the joyfull event In all about sixty five guests were present. Among this number were 30 grand children and one great grand child. It was believed that such a host of guests could hardly be accumulated by the humble home of the Schlawien folks. However under the proper arrangements that had been made, there was still room for more.

At about 11:15 when all the guests were present Rev. Depping gave a short address which properly fitted the occasion. Congratulations and good wishes were then extended the esteemed couple.

A wedding dinner was served which sure dissipated all thoughts of hard times. Seating ourselves at the table, so heavily loaded with good things to eat, we thought it was a good precaution that Dr. Zinn had been invited to the occasion. However, all was well, except that a few of the women got just a little more coffee then the doctor would advise.

The afternoon was spent in ordinary and extraordinary conversation in which some of the older guests likened the householder in scripture that bringeth forth out of his treasure things new and old. Everyone seemed to be of joyfull spirit. Mr. and Mrs. Schlawein seemed to enjoy themselves just as much as they did in 1871. and in 1896 when they celebrated their 25th Anniversary. They are very grateful to God for His guidance and protection during their long married life. Before the guests departed Mr. Ben Grieman took a few snap-shots with the guests of honor in the front row. They had often been dodging the camera of the grand children but this time they had to be good.

The token of love and devotion with which the aged couple was presented consisted of $35.00 in Gold, and a gold crowned cane for Mr. Schlawein.

May God's blessings be with them in the future as they have been in the past.

—A. A. Depping.

KLEMME MERCHANTS BUSY

The Klemme merchants and business concerns have had a regular old time holiday rush the past week and each day they are busy.

We know of several instances where people drove to Mason City or other near by towns thinking they could find a larger and better selection of Christmas gifts for invariably they returned to Klemme and spent their money here, finding that other towns had no better selection than here and the goods were priced much higher. One family drove to Mason City lat week and after shopping all over the city they returned to Klemme after having spent forty cents in Mason City, besides the oil and gas and their time. They bought what they wanted here and the price was far below Mason City. In fact many people from surrounding towns are making Klemme their trading center for the prices are very reasonable here and lower than in most places and as a rule the merchants here carry a very good assortment in almost any line. This is not bunk, but the absolute facts and if you doubt our word then drive over to Mason City, look around, price the goods and then compare them with the goods and the prices here and we will wager that you will drive right back to Klemme to make your purchase.

War Changed French Youth

Treat Girls as Comrades and Disdain Officialdom and Professions, Says Writer.

SEES BERNARD SHAW UPHELD

Women Now Do the Courting—Princes Become Plumbers or Raise Horses and Pigs—Not Keen on Literature.

Paris.—A radical change has taken place in the youth of France in the last decade, according to a writer in the Paris Temps, who sees them, made materialists by the late war, inclined to treat the opposite sex as comrades and caring little for matrimony or courting, and much more interested in making money than in entering the professions.

"A very brief observation of our young men," he writes, "reveals how they have departed from the ways of their elders. The war and the moral and material overturn that it brought—abrupt changes in our mode of living that have come in the last 20 years, speed of communication by automobile and airplane, the depreciation of currency, calling for increased earnings—all this is acting upon the young folk and is creating in them needs and desires we never knew.

Disdain Officialdom.

One of the most striking traits, and the most significant among them, is their disdain for officialdom and the liberal professions. The recruiting of functionaries, officers, professors, and in general all the careers with a fixed salary, is becoming more and more difficult. At St. Cyr (the French West Point) the number of candidates is continually diminishing. It is industry, commerce, finance, agriculture, colonization which attract young people. The love of risk and action is much stronger in them than in their forbears.

"Almost no one at present can live within his income, and in the best families of the aristocracy and the bourgeoisie the boys are going bravely to work. The young Prince M—— is in a large plumbing concern. Two of his relatives live in Morocco, where they are raising horses and pigs. In another large family the three sons are in banks and commercial firms.

Not Keen on Literature.

"Literature, it is evident, attracts youth little. Many never even open a book; serious works, history, memoirs, etc., have more chance than novels, but not much. Love stories hold a lower place in their affections than in those of their elders. What they talk about is the automobile, aviation, boxing, mechanics. They marry young and treat young women as comrades, as in England and the United States. It is not rare at a ball to see one of them invite a lady to dance with him by a gesture from a distance, and to leave her when the dance is over without conducting her to her place, and no one seems to be particularly shocked!

"The number of marriageable men being less than that of women, it is the latter who take the initiative and conduct the lovemaking. Bernard Shaw, in 'Man and Superman,' develops the thesis that men never marry women, but are married by them. We reproach the Anglo-Saxon countries, and yet see ourselves daily proving the thesis of Bernard Shaw."

The Kiel canal is 61 miles long.

W. J. B. IN SILK TOPPER

Did you ever see William Jennings Bryan in a high silk hat? The photographer caught him in one as he was entering Continental hall in Washington for a session of the armament conference.

One woman in England earns a livelihood as a tuner of church bells.

Hard to Tame Missouri River

Army Engineers Engaged in Keeping It From Swallowing Farm Land.

ONCE GREAT TRADE ARTERY

Before the Coming of the Railroads Steamers Plowed Its Waters as Far as Fort Benton, Mont.—Need Special Boats.

Kansas City, Mo.—Taming the Missouri river, outlaw among American rivers, is the task of the United States army river engineers, whose headquarters are here. Their sector is the Missouri river, from Fort Benton, Mont., to a point opposite Alton, Ill., where the Missouri, with a roar and a rush, joins the Mississippi and thereafter sweeps with some degrees of calmness to the Gulf of Mexico.

The task of the river engineers is to coerce the Missouri river into "staying out," and to coax it out of its long-time custom of changing its channel whenever the whim moves it. This may sound like an exaggeration, but to anyone who has spent a day on the river with the army engineers, and has seen the Missouri eating away at a cornfield with wicked energy, swallowing up earth, corn, weeds, fences and trees, it seems sometimes as if the river actually had a personality, and an outlaw one, at that.

Other Ruinous Operations.

And while carrying away farm land from one bank, somewhere else it is equally busy, piling up sand, mud and driftwood, making land out of what was river a few days before. Then, too, the river has a habit of occasionally clogging its own channel, building sandbars so long and so high that it must needs become broad and shallow in order to continue its restless course.

It is a constant struggle, but it is not a hopeless one, and the engineers point with a measure of justified pride to those places along the stream where they have built dikes, which resulted in the making of land; to the concave bends where revetments have stopped the river from cutting its bank. Given a dike on one side and a revetment on the other, and constant diligence, so that small breaks may be repaired before they become serious, the river engineers say they can keep the stream fairly well anchored.

Once Great Trade Artery.

Fifty years ago, before the coming of the railroads, the Missouri was the great western artery of commerce, and steamboats plowed its waters as far as Fort Benton, Mont. Knowing how difficult it always is for the railroads to handle great wheat harvests, one wonders why it is not possible for the river to handle some of this traffic.

The engineer quietly tells you that it is possible; then he goes on and explains the two general reasons why it is not being done. One is that there is now very little money for improving and keeping up the river. The other reason is that many mistakes have been made in the type of towboats used.

Special Boats Needed.

Boats designed for any other river in the world but the Missouri have been used and, because of the shifting depths of the river, have failed. With all its disadvantages, there is a good deal to be said, according to the engineers, for the old paddle-wheel steamer, side-wheeler or stern-wheeler, that draws little or no water, which condition is ideal for service on the Missouri.

The river is navigable, say the engineers, and with sufficient time and patience it can be made manageable.

"A great game if you don't weaken," one says to Major Wilkes, in charge of the river work, and his aids.

"You can't weaken," they assure you. "You just keep after it, for the river itself never weakens."

Allied Supply Chief and His Wife

Brig. Gen. Charles Payot of France and his beautiful wife photographed on their arrival in the United States. The general was chairman of the allied military board of supplies and has come for a final meeting of that board in Washington.

MUST HELP WORLD

United States Cannot Stand Aloof, Says President.

Message to Congress Tells of Hope In Conference—Outlines Changes Needed in Tariff and Other Laws—Urges Federal Aid for Farmers.

Washington.—Stressing the great and far-reaching contribution which the American people must be prepared to make toward the economic and financial rehabilitation of a world still staggering under the disordered conditions bequeathed by war, President Harding voiced a solemn warning, in the message he delivered in person to congress, Tuesday, that "no permanent readjustments can be effected without consideration of our inescapable relationship to world affairs in finance and trade."

"We should be unworthy of our best traditions if we were unmindful of social, moral and political conditions which are not of direct concern to us, but which do appeal to the human sympathies and the very becoming interest of a people blest with our national sympathies," the President said.

The President emphasized that "in the main the contribution of this republic to restored normalcy in the world must come through the initiative of the executive branch of the government, but the best intentions and most carefully considered purposes would fail utterly if the sanction and co-operation of congress were not cheerfully accorded."

For the first time in years, since the grim shadows of the World war first began to gather over the American people, congress listened to a presidential message that was almost entirely devoted to the grave domestic issues confronting the American nation, and which skipped over, except in the most general way, the serious international questions facing the American people.

Foreign Delegates There.

Standing on the simple platform before the speaker's desk in the house chamber, the President addressed himself to a joint session of congress and to what was unquestionably the greatest and most representative gathering of the chosen spokesmen of the civilized peoples of the world ever held in the evntful history of the American people.

The delegates of the foreign nations participating in the disarmament conference, the brilliantly uniformed members of the diplomatic corps, were assembled with the members of the senate and the house, the President's cabinet and the United States Supreme court, as the head of the American nation laid down the program the administration desired congress to carry out during the coming months of the present session.

Chief Points of Message.

The high spots of the President's message were:

1. The imperative need of "elastic and flexible" tariff legislation which would enable the President, through the federal tariff commission, to meet effectively the changing trade and industrial conditions, not only in this country, but abroad.

2. The urgent necessity of a "general policy of transportation of distributed industry and of highway construction to encourage the spread of our population and to restore the proper balance between city and country."

3. The strong desire of the administration for further revenue revision and "renewed consideration of our tax program," despite the "inevitable divergence of opinion in seeking the reduction, amelioration and readjustment of the burdens of taxaton."

Merchant Marine Expansion.

4. The expressed opposition of the administration to the abrogation of certain commercial treaties proposed by the Jones' merchant marine act, on the grounds that to denounce them would "involve us in a chaos of trade relationships and add indescribably to the confusion of the already disordered commercial world."

5. The expansion of the American merchant marine under an administration plan to be later submitted to congress which, while contemplating "no greater draft on the public treasury" than is provided by the Jones act, "will appeal to the pride and encourage the hope of all the American people" in American shipping flying the American flag.

6. Early enactment of the foreign debt funding bill that the administration may be clothed with ample authority to deal with the $11,000,000,000 foreign indebtedness to the United States, which is now denied it and which is hindering readjustments among our debtors and accomplishing nothing for ourselves.

To Encourage Farmers.

Systematic encouragement of agriculture by the development of adequate distribution and marketing facilities for agricultural products and the adoption of "co-operative marketing programs" for that purpose.

8. The early termination of a "great volume of uneconomic and wasteful transportation" and a revision of "the existing scheme of adjusting freight rates" with adequate legislation to meet the serious railroad problems, so vitally affecting the welfare of the American people.

9. Recommended a cogressional appropriation to purchase food for the starving Russians.

10. Suggested the advisability of a constitutional amendment to prohibit the issuance of tax-free securities.

11. Declared both corporations and labor unions should be regulated and supervised in the interests of public welfare and suggested quasi-judicial tribunals to settle labor disputes.

The President also announced that later on he would make some recommendations about renewed consideration of the tax program, involving further reductions and the abolition of "hindering burdens."

American Valuation.

When discussing the proposed tariff legislation the President said concerning a much debated feature:

"There is a manifest difference of opinion about the American valuation. Many nations have adopted delivery valuation as the basis for collecting duties; that is, they take the cost of the imports delivered at the port of entry as the basis for levying duty. It is no radical departure, in view of the varying conditions and the disordered state of money values, to provide for American valuation, but there cannot be ignored the danger of such a valuation brought to the level of our own production costs, making our tariffs prohibitive.

It might do so in many instances where imports ought to be encouraged. I believe congress ought well to consider the desirability of the only promsing alternative, namely, a provision authorizing proclaimed American valuation, under prescribed conditions, on any given list of articles imported.

In this proposed flexibility, authorizing increases to meet conditions so likely to change, there also should be provision for decreases. A race may be just today, and entirely out of proportion six months from today.

"If our tariffs are to be made equitable, and not unnecessarily burden our imports and hinder our trade abroad, frequent adjustments will be necessary for years to come. Knowing the impossibility of modification by act of congress for any one or a score of lines without involvng a long array of schedules, I think we shall go a long ways toward stabilization if there is recognition of the tariff commission's fitness to recommend urgent changes by proclamation."

Needs of Agriculture.

Concerning the needs of American farmers the President had this to say:

"Something more than tariff protection is required by American agriculture. To the farm has come the earlier and the heavier burdens of readjustment. There is actual depression in our agricultural industry, while agricultural prosperity is absolutely essential to the general prosperity of the country.

"Congress has sought very earnestly to provide relief. It has promptly given such temporary relief as has been possible, but the call is insistent for the permanent solution. It is inevitable that large crops lower the prices and short crops advance them. No legislation can cure that fundamental law. But there must be some economic solution for the excessive variation in returns for agricultural production.

"It is rather shocking to be told, and to have the statement strongly supported, that 9,000,000 bales of cotton, raised on American plantations in a given year, actually will be worth more to the producers than 13,000,000 bales would have been. Equally shocking is the statement that 700,000,000 bushels of wheat raised by American farmers would bring them more money than a billion bushels.

"Yet these are not exaggerated statements. In a world where there are tens of millions who need food and clothing, which they cannot get, such a condition is sure to indict the social system which makes it possible.

"In the main the remedy lies in distribution and marketing. Every proper encouragement should be given to the co-operative marketing programs. These have proven very helpful to the co-operating communities in Europe. In Russia the co-operative community has become the recognized bulwark of law and order, and saved individualism from engulfment in social paralysis. Ultimately they will be accredited with the salvation of the Russian state.

Co-operation Advocated.

"In the main, the remedy lies in distribution and marketing. Every proper encouragement should be given to the co-operative marketing programs. These have proven very helpful to the co-operating communities in Europe. In Russia the co-operative community has become the recognized bulwark of law and order, and saved individualism from engulfment in social paralysis. Ultimately they will be accredited with the salvation of the Russian state.

"There is an appeal for this experiment. Why not try it? No one challenges the right of the farmer to a larger share of the consumers' pay for his product, no one disputes that we can not live without the farmer. He is justified in rebelling against the transportation cost. Given a fair return for his labor, he will have less occasion to appeal for financial aid, and given assurance that his labors shall not be in vain, we reassure all the people of a production sufficient to meet our national requirement and guard against disaster."

Plea for Aid to Russia.

Mr. Harding's plea for help for starving Russians was as follows:

"While we are thinking of promoting the fortunes of our own people, I am sure there is room in the sympathetic thought of America for fellow human beings who are suffering and dying of starvation in Russia. A severe drought in the valley of the Volga has plunged 15,000,000 people into grievous famine. Our voluntary agencies are exerting themselves to the utmost to save the lives of children in this area, but it is now evident that unless relief is afforded, the loss of life will extend into the millions. Americans cannot be deaf to such a call as that.

"We do not recognize the government of Russia, nor tolerate the propaganda which emanates therefrom, but we do not forget the traditions of Russian friendship. We may put aside our consideration of all international politics and fundamental differences in government. The big thing is the call of the suffering and the dying. Unreservedly I recommend the appropriation necessary to supply the American relief administration with 10,000,000 bushels of corn and 1,000,000 bushels of seed grains, not alone to halt the wave of death through starvation, but to enable spring planting in areas where the seed grains have been exhausted temporarily to stem starvation.

"The American relief administration is directed in Russia by former officers of our own armies, and has fully demonstrated its ability to transport and distribute relief through American hands without hindrance or loss. The time has come to add the government's support to the wonderful relief already wrought out of the generosity of the American private purse.

I am not unaware that we have suffering and privation at home. When it exceeds the capacity for the relief within the states concerned it will have federal consideration. It seems to me we should be indifferent to our own heart promptings and out of accord with the spirit which acclaims the Christmas-tide if we do not give out of our national abundance to lighten this burden of woe upon a people blameless and helpless in famine peril."

United States Will Help World.

At the outset, the President discused world conditions, saying "A world restoration program" would have to be worked out "by the nations more directly concerned."

The United States will help, he added, unselfishly because there is compensation in the consciousness of assisting; selfishly because the commerce and international exchanges in trade, which marked our high tide of fortunate advancement, are possible only when the nations of all continents are restored to stable order and normal relationship."

In conclusion he had this to say about the armament conference:

"Agreeable to your expressed desire and in complete accord with the purposes of legislative branch of the government, there is in Washington, as you happily know, an international conference now most earnestly at work on plans for the limitation of armament, a naval holiday, and the just settlement of problems which might develop into causes of international disagreement.

"It is easy to believe a world hope is centered on this capital city. A most gratifying world accomplishment is not improbable."

Setting a Broken Nose.

When the nose is broken it must be set promptly or it will heal rapidly in a disfiguring position, writes Doctor Jacques of Paris in Paris Medical. If it be left until the day following the injury it will have swollen so much and secreted so much that the bones can be set only under cocaine. If it be left for two days or more it is not only painful but difficult to set.

CANADA DID WE

Honors Worthily Won at International Live Stock Show.

Friendly Rivalry at Chicago Splendidly Revealed the Possibilities of Our Northern Neighbor.

Further evidence, if any were needed, of the friendly relations between Canada and the United States may have been found by a visit to the International Live Stock Show recently held at the Chicago Stock Yards. There the Canadian and American were to be found side by side in the friendliest competition, the loser readily admitting defeat when the blue fellow carried off the blue ribbon. Some of the Choicest and best Canadian stock was there, and many of it returned loaded down with ribbons denoting firsts, championships that indicate pedigree, breeding and worth, and cups and trophies that were won in hard and severe competition.

The hay and grain classes were points of great interest, and in these Canada did well, securing many prizes.

Twenty-five first prizes were offered in the oats class; Canada carried away 22 of them. A sample of oats from the Province of Alberta, weighing 48 pounds to the bushel, was the heaviest sample in the show. In fact Alberta oats that took the most stakes, the exhibitor in this case W. Lucas, of Cayley, repeating what he did last year.

In wheat there were 25 first prizes to be awarded; Canada got 20 of them.

The greatest interest was shown when the horse classes were called. Here also Canada stood well to the front. The Percheron entries showed that Canada breeders were popular and successful exhibitors. Championships were awarded to a number, but first prizes were common. The same may be said of Clydesdales. This breed stood out prominently, there were many entries, and this old-time popular breed had an unusual number of admirers. This was especially so in "Wee Donald's" case. Here was a Saskatchewan horse, his owner bringing back to Canada the grand championship. Not only has he done it one year, but last year as well—two years in succession—something never before done at the Live Stock show. In Clydesdales Canada won places in every class in which entries were made.

The same story could be repeated in sheep and hogs, honors being heaped upon honors on Canadian exhibits. Particularly important is the fact that first prize for alfalfa seed was awarded for seed grown at Alberta in competition with all countries. Alfalfa growing in Western Canada has been increasing by leaps and bounds, and this victory will help it—and the dairy industry, which is always linked with it—a further impetus.

A visit to the Canadian government exhibit of grains, grasses, vegetables, fruits, minerals and other products of the Dominion to the north, revealed in tabloid form what the great country to the north could do. A special interest was aroused in this exhibit and it was greatly admired by visitors to the Live Stock show. Representatives of the government were on hand for the purpose of giving information to those desiring it.—Advertisement.

A Bad Case.

She—How much do you love me, dear?

He—As much as you love yourself.

Tit for Tat.

Jack—So you broke the engagement.

Tom—Yes, but not until after the engagement broke me.

He Didn't Like It.

A little three-year-old, who had been summering on a farm, fell into the old well where the water was only a few inches deep and remained there for some time before he was discovered. When he was rescued his pent-up indignation knew no bounds: "You let I kin tay in a well wizout nuffin to eat, like a fwog?" he scolded. There was no better fadder'n mudder'n me, I dess I'd go without children."

Osage Orange and Locust.

Osage orange and black locust are much alike in structure, strength and ability and color, although the latter usually has more of a golden brown tinge. These two woods can readily be distinguished by the fact that the osage orange gives off a yellowish color when wrapped in a wet rag or placed in a soaked blotter, while black locust gives off practically no color under the same conditions.

"Light of the World."

The "Light of the World" was first conferred upon Sigismund (1411), emperor of Germany, because of his enlightenment and intelligence.

A Puzzle.

"Why don't you ladies chum with Mrs. Wombat? She seems a nice dame?"

"To tell you the truth, none of us know what to make of her. I told her a secret once."

"Well?"

"She kept it."—Louisville Courier-Journal.

Jud Tunkins says an editor who suffers so much that while you admire him you've got to sympathize with him.

Train Demolished Home Being Moved to New Site

William R. Smith, Jr., of Cornish, Utah, is without a home as a result of an Oregon Short Line train demolishing it. Smith was moving his three-room frame house across the railroad tracks to a new location when the train came around a curve and crashed into the structure.

Kill "Most Desperate" Bandit.

Wichita, Kas.—Eddie Adams, regarded by authorities as the southwest's most desperate gunman and bandit since Henry Starr, Oklahoma outlaw, was killed in Arkansas a year ago, was shot and killed in a pistol fight with three detectives here.

Japanese widows designate themselves by the arrangement of their hair, and also signify whether they desire to marry again.

MANY COSTLY BOOKS ARE SAVED

Blotting Paper Used to Prevent Loss of Priceless Library.

Collection of Books on China Had Been Soaked With Sea Water During Visit of Tidal Wave to Jap Port.

London.—The late Dr. G. E. Morrison, correspondent of the London Times at Peking, had collected a splendid library of books relating to China which he sold to the house of Mitsui in Japan. The Mitsuis, the Rothschilds of the Far East, were about to establish a seat of Oriental study and desired the Morrison books for this purpose. This much is known, but what happened to the library between the books leaving Doctor Morrison's house in Peking and their arrival at Tokyo is not generally known and reads somewhat like a romance.

These priceless volumes were packed by the Japanese agents of the purchaser in ordinary packing cases and made the journey safely through the Yellow sea and were landed at the Japanese port of arrival. The cases were then put into the ordinary warehouses of the port. Then a strange thing happened.

The Japanese port was suddenly visited without warning by a tidal wave of unprecedented force and dimension. All the warehouses were flooded and the whole library was drenched in sea water.

The house of Mitsui, however, is resourceful; every scrap of blotting paper in Japan was secured and literally thousands of hands were set to work interleaving every damaged page with blotting paper. The entire approach to this particular port was blocked with wonderful books being dried—like Bombay ducks—in the sun.

The damage, of course, was heavy, but from the literary standpoint the library was saved.

Finishing Stairs.

Wooden stairs, even if they are not of very good wood, can be very effectively treated with a reliable floor stain after they have been well rubbed down with sandpaper to make the surface perfectly smooth. The stain can then be applied evenly with a brush, care being taken to follow the grain of the wood. After two or three applications, allowing a few days' interval between each, they will resemble the best of polished oak and be most effective. They can be kept in perfect order by being dusted, and they can be polished up beautifully.

Famous American Oaks.

Besides the South Carolina oak three other famous oaks have been named for the Hall of Fame. One is in New Jersey, one in New Orleans and the third in Massachusetts. The last named is known as the Indian War oak. It is in Grafton, Mass., a place which figured prominently during the early wars against the Indians.

You's th' Bestest Man

Hard Christmases for G. Washington

NO ONE has told us much about George Washington's Christmases. But from the record of his life we learn how he spent some of his Christmas days.

It was a very cold Christmastide in 1777 at Valley Forge. Snow was on the hills. Everything was frozen. And Washington's army was in great need of food, clothing and shelter.

Instructions of parties of men to go foraging for food are entered in the orderly book for that Christmas day at Valley Forge, which was anything but merry for Washington.

Still more desperate were the food conditions at Morristown, in 1779, when Washington reported that his army was on half allowance and near starvation. "We have never experienced a like extremity at any period of the war," declared Washington, pleading that food be sent.

There was a welcome Christmas present for Washington and his men at New Windsor in 1780 when a big Christmas wagon came with over 2,000 shirts and other comforts made by Philadelphia women patriots—things needed by the men under Washington, who were cheerfully suffering all sorts of hardship in order that this country might be free. The Philadelphia women also raised, that year, over $300,000 in aid of the soldiers.

The fine old Colonial mansion (the Craigie house) in Cambridge, Mass., (now widely known as the home of Henry W. Longfellow), was the place where Washington spent his first Christmas as commander of the Revolutionary army in 1775. Mrs. Washington was there with him (as she was later at Valley Forge), and there was some pleasure in the midst of the heavy cares and responsibilities carried by the great Washington.

A year later Christmas day found Washington at the head of his 2,400 brave men making his celebrated crossing of the Delaware river, nine miles above Trenton. The snow and sleet were blinding, it is recorded, and the cold was intense. But hearts were brave.

Wherever he was at Christmastide, Washington was cheered with the thought that the cause of the struggling colonies would surely win. A few days before Christmas, 1776, he wrote to his older brother, John Augustine Washington: "Between you and me, our affairs are in a very bad situation. . . . However, under a full persuasion of the justice of our cause, I cannot entertain an idea that it will finally sink, though it may remain for some time under a cloud."

Washington must have had some very merry Christmases at Mount Vernon. There were no children of his own with whom Washington could romp. But we can easily imagine the big-hearted general putting on a false beard of fuzzy white whiskers and slinging a pack over his back for the delight of the little ones in the neighborhood.

General Washington was truly the "Father of His Country," and we have a very good idea of the sort of holiday spirit in which he observed the "glad Christmastide" when our republic was in its infancy.

No one in all our bright history as a nation has handed down a more radiant Christmas message of hope and faith.

To Clean Leather Furniture.

Add a little vinegar to tepid water and wash the leather with a clean cloth; wipe dry. To polish apply the following: Whites of two eggs beaten slightly (not stiff) and mix with two teaspoonfuls of turpentine; rub with clean, dry cloth.

BIRDS ARE HELP TO AGRICULTURE

Pesky English Sparrow Is Usually Nuisance and Often Injurious to Crops.

CROWS AND BLACKBIRDS BAD

Owls Have Long Been Persecuted, but Never Has Persecution Been More Unjust—Feed on Rats, Mice and Other Mammals.

(Prepared by the United States Department of Agriculture.)

The sparrow is a beneficial bird, says the biological survey, United States Department of Agriculture, and should not be regarded as a pest. The single exception to the department's indorsement is the pesky English sparrow of that species, "usually a nuisance and often injurious," and, says the department in a booklet, Farm Help From the Birds, "it must be remembered that the introduced English sparrow is but one member of the large family of sparrows and its habits are by no means characteristic of the native species."

Few Birds Classed as Injurious.

They are essentially seed eaters, the sparrows, but they consume also a fair proportion of insects, the department finds, and in general must be regarded as beneficial. Separating the sheep from the goats in the feathered kingdom of common knowledge to the farmer, the department places among the bad birds the jays, crows, ravens and blackbirds, a corporal's guard with the army of good birds, of aid to the farmer, placed in the other classification. Even the bad denizens of the air have some good in them, says the department, and the damage they do the farmer is largely because of overpopulation in the feathered ranks. Of that class, the department says:

"It would seem a good policy to accord them the same treatment long given the common crow. The crow is not specially persecuted; neither is it protected. About the best that can be said of birds of this family is that on the average they do about as much good as harm."

The Screech Owl Is Beneficial Bird to the Farmer.

Owls Perform Useful Service.

"Owls as a group have long been persecuted by man, but never has persecution been more unjust," says the biological survey. More than 50 varieties of owls feed on a great variety of rodents and have useful habits, the booklet continues. In Washington, D. C., the survey recently determined what 675 barn owls had for dinner. Here is the menu, by variety and number of dishes consumed: Meadow mice, 1,119; house mice, 452; house rats, 134; other small mammals, 3 per owl. And the service done man by the barn owl, the booklet says, is typical of that performed by hawks and owls in general. An occasional chicken is consumed, but this loss is far outweighed by the destruction of harmful rodents.

CHECK OFF NEEDED REPAIRS

Good Plan to Make Note of Defects When Machinery Is Being Put Away for Winter.

When the farm machinery is being put away for the winter the owner can profitably check off the repairs that will be necessary before each machine can go out again next season. A five-cent pad of paper nailed to the door of the implement shed is suggested by the agricultural engineers at the Missouri College of Agriculture as a mighty handy means of jotting down what is needed on each machine. Then on a rainy day or in the slack season the work can be done. System on farms may not yield as big profits as it does in factories, but it pays nevertheless.

BUILDING IN SASKATCHEWAN

About 200 Miles of Road in Course of Construction to Cost at Least $200,000.

Road work totaling about 200 miles and costing at least $200,000, is now in course of construction, or about to be commenced, in Saskatchewan as part of the federal aid scheme. Some of the work is being done under contracts awarded by the Saskatchewan department of highways, while other sections are being constructed by departmental day labor gangs.

DURABILITY OF WOOD CUT IN COLD MONTHS

Method of Handling Logs Has Greatest Influence.

Fungi and Insects Are Conspicuous by Their Absence in Winter Season—There Is No Difference in Moisture Content.

(Prepared by the United States Department of Agriculture.)

Many of the theories advanced regarding the durability of wood attribute too much importance to the time of cutting, say specialists of the forest products laboratory, forest service, United States Department of Agriculture. As a matter fact, the time of cutting has very little effect upon the durability or other properties if the timber is properly cut. The method of handling logs at different times of the year, however, does influence their durability.

Durability of Wood Is Not Affected by the Time of Cutting.

Timber cut in late fall and winter seasons more slowly and with less checking than during the warmer months, and when proper storage or handling is impracticable, winter cutting is best. Fungi and insects do not attack wood out of doors in cold weather, and by the time warm weather arrives the wood is partly seasoned and somewhat less susceptible to attack. It is for these reasons that winter cutting is advantageous, and not on account of a smaller amount of moisture or sap in the wood in winter, as the popular belief has it. There is practically no difference in moisture content of green wood in winter and summer.

HELPS GROWING WHEAT CROP

Ohio Experiment Station Favors Winter Application of Manure—Fertility Is Added.

Winter application of manure will aid the growing wheat crop, according to the Ohio experiment station, Wooster. Spreading manure over the wheat ground at the rate of four to six tons per acre affords winter protection and at the same time adds fertility that will later aid the wheat.

While no experiments have been conducted in the topdressing of wheat, the residual effect of manure on wheat shows that the yield may be increased from six to eight bushels per acre.

If manure is not available, nitrate of soda is sometimes applied in the spring, but this should be used in connection with or following the fall use of acid phosphate to get the best results.

When acid phosphate or steamed bonemeal has been used at seeding, nitrate of soda, which is a coarse salt, may be easily sown by hand. The most favorable time is in April, just as the spring growth of wheat is beginning.

SWINE PRODUCTION IN SOUTH

Gaining Considerable Popularity as Source of Feeders for Corn-Belt Section.

The Southern states, particularly Mississippi, have gained considerable popularity as a source of feeder hogs for the corn-belt states, reports the United States Department of Agriculture. Well-bred boars are now being used extensively in the hog-producing centers of the South, and satisfactory feeding shoats are now being produced in large numbers. In some areas cheap pork is made by the use of sweet-potato cannery wastes, these materials having valuable fattening properties. In large peanut-growing districts good gains are put on at a comparatively low cost.

TOO MUCH HAY IS INJURIOUS

"Haybelly" in Work Horse Is Induced by Prolonged Overfeeding on Bulky Roughage.

"Haybelly" in a work horse indicates inefficiency for labor. It is induced by prolonged over-feeding on bulky roughage. The average farm horse is fed too much hay. Experiments have shown that a work horse when fully fed oats requires daily only a trifle over one pound of good hay for each 100 pounds of his body weight. Feeding more is harmful and wasteful. Feed most of it at night, but also allow a pound or two at noon while the horse is cooling off. Heave is caused by over-feeding hay and immediately working a horse after his meals.

LIVE STOCK FACTS

KEEPING OUT ALL DISEASES

Quarantine Instituted Against Importation of Live Stock From Different Countries.

(Prepared by the United States Department of Agriculture.)

The prevalence of foot-and-mouth disease in some European countries, in certain sections of Asia and Africa, as well as in South America, has caused the United States Department of Agriculture to institute special quarantines against the importation of live stock from these places. This systematic survey of foreign sources of breeding stock and protection against the introduction of diseased animals is annually worth millions of dollars to the live stock breeders of the United States.

Any one who wishes to import cattle, sheep, goats, swine or other animals

Cow Just Unloaded From Lighter at Quarantine Station, Turner, Md.

from any country, except Canada or Mexico, must first obtain from the secretary of agriculture a permit, to be presented to the American consul at the port from which the animals will be shipped. No permits are issued for shipment from countries where rinderpest, surra, foot-and-mouth disease, or contagious pleuro-pneumonia exist.

Foot-and-mouth disease prevailed to serious extent in England during the past two years, but recently has been abated to the extent that horses from both England and Ireland are now allowed to enter the United States, if certain restrictions regarding feeding and care are observed. These regulations require that the animals be subjected to disinfection, both before shipment and after arrival in this country, and that the feed and bedding used during the voyage come from this country. These precautions, although they may seem very radical to those who do not appreciate the critical character of the diseases under discussion, are effective in preventing the introduction of live-stock plagues into the United States.

BEEF CATTLE BENEFIT FARM

Make Possible Greater Use of Roughage More Efficiently Than Any Other Animals.

The use of beef cattle in connection with general farming throughout the corn belt, says the United States Department of Agriculture, offers the following advantages:

It is possible to make greater use of dry roughages produced on the farm as beef cattle consume larger quantities of these feeds than any other classes of stock.

Beef cattle can be used profitably on rough land unsuitable for crop production, also on low, wet land unsuitable for either crops or for other classes of live stock.

Beef cattle use the total production of grain and roughages on the average farm, without the purchase of other feeds, more efficiently than any other class of live stock.

Beef cattle on the farm favor a well-balanced distribution of labor throughout the year. They require very little attention during the summer and fall, when crops need attention, and during winter and early spring, when there is little field work to be done, farmers can utilize their time to advantage by caring for the breeding herd, wintering the stockers and feeders, or fattening some steers.

WIN FIGHT ON TUBERCULOSIS

Government Authorities Report That Thousands of Cattle Are Freed From the Dread Disease.

Latest report of the tuberculosis-eradication work by the United States Department of Agriculture shows that a total of 204,892 head of cattle in 8,839 herds have been accredited by the government as free of tuberculosis infection, while 702,590 additional cattle in 56,113 herds have already been once tested and found free of the disease. On August 1, 1921, a total of 1,294,159 cattle in 79,341 herds were under supervision in the tuberculosis eradication campaign. Furthermore, there were 218,531 cattle in 14,494 herds on the waiting list for testing. There is a constant increase in the number of animals and herds tested and accredited and in the demands on the part of herd owners who desire to place their cattle under government supervision.

Check that Cold and Get Rid of that Cough

It is dangerous to let them run. A tonic laxative of direct and positive action upon the mucous membranes is what you need.

PE-RU-NA

For Two Generations

Pe-ru-na has proved the reliable treatment for ridding the system of all catarrhal poisons. It aids digestion, stimulates the liver and bowel action, enriches the blood, tones up the nervous system and soothes the inflamed and congested mucous linings.

Honest and dependable is the verdict of thousands.

Sold Everywhere Tablets or Liquid

New Method

Nujol is a lubricant, not a laxative.

Without forcing or irritating, Nujol softens the food waste. The many tiny muscles in the intestines can then remove it regularly. Absolutely harmless—try it.

While Mr. Lester was sawing wood he sawed his hand and had to go to the Hampton hospital as infection had set in.

The basket ball game here Tuesday night between the Belmond and Goodell girls resulted in a victory social dance was held in the hall. for the Belmond team. Afterwards a

Joustin Lowenberg's little boy stuck the tine of a pitchfork into his cheek Sunday and had to be taken to the Belmond hospital Monday for treatment. His face is very sore.

The second number of the lecture course Friday night and the basket social after was not so well attended on account of the stormy weather.

A large crowd attended the basket social given by Miss Lula Wilkins at her school east of town. $32.00 was realized by the sale of the baskets. Some rough-necks from a neighboring town made themselves very dissagreeable and destroyed some of the school property.

THE HAPPY MAN

My neighbor's such a cheerful skate I said to him one day. "How" do you keep your smile on straight —what makes you blithe and gay Although I am an optimist, and make of glee a fad, I have my grouchy hours, I wist, while you are always glad." My neighbor heaved a gaudy smile that split his map in twain, and then sat down upon a stile, his gladness to explain. "I do not owe a rusty cent to any man on earth, and so I'm full of merriment my soul is soaked in mirth. I don't believe that any man can know elastic thrills, if he must walk the floor and plan to pay up ancient bills. No creditors invade my den, to threaten, bluff or whine. and when I sell a cow or hen, the price I get is mine. And I can drive my new green boat, and none can say: 'By jing, he ought to pay me for the boat he bought of me last spring I cry each morning when I rise, "I owe no man a dime' and then I sing and swat the flies, and have a gorgeous time. Each evening when to bed I go, I say, "I'm out of debt," and guardian angels whisper low, "You are the one best bet." My neighbor is a happy wight; no matter where he wends there are no creditors in sight, and all men are his friends.—Walt Mason.

CHRISTMAS EXERCISES AT THE KLEMME CHURCHES

Christmas Tree Exercises will be held at all the Klemme churches on Saturday evening. The two Methodist churches will begin their programs at 7:30 o'clock, while the Reform church will begin their program a little earlier, at 7:00 P. M.

Each one of the churches have planned an elaborate program for the annual event and they extend invitations to everyone to attend.

PLAN TO PURSUE RATS

Extension Expert to Cooperate in Rat Killing Crusade

Because of the unusual results of the statewide drive on rats last year when over a million and a half of the rodents were killed, Fred B. Butcher. extension ,entmologist of Iowa State College, is planning another campaign to be conducted some time this year in an effort to enlist every farmer in the rat killing cause.

In cooperation with the Des Moines Register, and the county agents of the state, Mr. Butcher will seek to arouse public interest in the campaign and it is possible that a severe blow be struck against the rat population of the state.

Last year the Des Moines newspeper inaugurated a campaign and offered prisss of $50, $25, and $10 and three prizes of $5 to winners in various sections of the state. Nine counties acted through their farm bureaus and offered substantial prizes to the rat killers. In some instances 2 to 5 cents per tail were paid for the dead rodents.

CAN YOU HANG PICTURES?

Here's Proper Method To Get Them on the Walls

Picture hanging according to Miss Marian Gardner. of the household art department of Iowa State College demanrds more consideration than is usually given it. The trick can be learned easily and it will improve the looks of the home.

Here are some of the simple rules to make a good hanging.

1. Have the picture at a height so that the picture will be directly opposite the eye of the observer.
2. Make hanging as inconspicuous as possible by using fine wire.
3. In placing pictures in a group see that they are carefully choses and do not clash. Hang them close together and try to form them in a decorative unit.
4. Use care in selecting pictures so that the frames will be in harmony with the remaining decorations of the room.
5. Remember that pictures in a room should be hung so that the top line will be the same.
6. In hanging pictures get the right pictures for the room and do not load up the walls with a superfluous collection just to get rid of them.

LOCAL NEWS OF THE WEEK

Mrs. Tom Hake, of Belmond, was visiting in Klemme Saturday.

Mrs. George Jamison of Belmond was a Klemme caller Monday.

Stub Lewis and Orville Burgess went to Minneapolis last Friday.

Mr. Bert Hood, of Goodell, was a Klemme business caller last Friday.

Mr. Tom Burgess, of Goodell was a Klemme busines caller Friday morning.

Mr. Ingvard Lauritzen drove to Ringsted Saturday afternoon. He returned Monday night.

Miss Selma Sandberg and Mrs. Nelson, from Goodell, were visiting in Klemme Saturdap.

Miss Grace Christians came home from Garner Saturday to spend the holidays with Klemme folks.

Miss Adna Church, of Garner, was a Klemme visitor last Thursday evening.

The annual mad rush is on to see whowho can accumulate the most calenders.

Alfonso Hood, of Belmond, was a business caller in Klemme Friday, last.

Mrs. Edwin Schmalle and Mrs. Orich Busick of Goodell were vvisiting in Klemme Monday.

Milton Schaper, who is attending Morningside college, is spending his vacation here.

Mr. and Mrs. Hiko Kuhler, of Meservey, were shopping in Klemme Tuesday.

John Larsens returned from Minnesota Sunday. They had been there visiting a sister.

Dr. and Mrs. J. L. Hesselhuus entertained a number of their friends to a "Bunco" party last Friday evening. All report an excellent time.

Rev. Bergman and daughter returned from Morningside last Saturday morning where they had been visiting a few days.

Will Jurgemeyer returned from the southern part of the state last Thursday. He had been ther visiting his father who was quite sick.

Aaron Grieman left Monday night for Kansas City, Mo., where he will take an electrical engineering course at the Sweeney School.

Mr. and Mrs. C. F. Keraus returned from Swea City Saturday evening, where they had been visiting their daughter, Mrs. T. F. Mitchell.

Donald Nissen came Tuesday from Siuox City to spend his Christmas vacation visiting at the J. N. Day home. He is attending college at Morningside.

Harry Brooks and family went to Belmond last week Tuesday to attend a Golden Wedding Anniversary of Mrs. Brook's parents, Mr. and Mrs. Hero Frohling.

The dance at the Idle Hour last Thursday evening was well attended there being over forty numbers sold. All report the music was great and a good time was had.

NOTICE—All those indebted to me on account call and settle on or before the first of January. All accounts positively must be settled by the above date. This is final. Ed. G. Ell. 1w

Miss Leoda Smith was visiting with Belmond friends between trains Saturday. Miss Marian Luick returned with her for an over Sunday visit here.

Miss Dona Baumgartner came home from Chariton, Iowa, to spend the holidays with her folks here. Miss Baumgartner has a position playing for a moving picture show conducted by a relative.

Ben Katter reports that he had a verp good sale Tuesday. He had his sale well advertised and it got him just what he wanted—a big crowd of business like bidders. His stock sold exceptionally well and his machinery brought top prices. It was a successful sale from start to finish and was a good example of what advertising will do for the farmer or any other business man.

Uncle Eben.

"Givin' advice," said Uncle Eben, "is often a roundabout way of hintin' to a man dat you don't think he's got as much sense as you have."

With sincere greetings
for Christmas
and best wishes for much

POLLY'S ADVENTURE

MISS POLLY PARROT listened as she swung in her cage, for Mr. Dog and Mistress Puss were telling of their adventures. Mr. Dog told about being chased by a big bear when he was out hunting once with his master, "but in the end," said he, "we captured that bear and the big rug in the hall was made from its skin."

"I guess you were pretty scared that time," giggled Mistress Puss. "Why did you go hunting bears, anyway? You are too small for that, I would say."

"We didn't go after a bear," said Mr. Dog; "we were hunting other game and the bear must have been lost, or he would not have wandered so far from his home.

"He was pretty hungry, Master said, and I think he was, too, by the way he chased me, but I guess he was pretty sorry when he found my Master had a gun."

"Well, that is some adventure, to be sure," said Puss, "but if you ever caught your foot in a trap you would think that was far worse than being chased by a bear.

"Once when I was chasing a mouse I stepped on a trap and I nearly lost

"That is Some Adventure," Said Puss.

my foot and I was so lame for a long time I could not run at all."

"You lost the mouse, too, I suppose," said Mr. Dog, with a laugh.

"Oh, I did not care anything about that," said Puss with a twitch of her tail. "There are plenty more mice, but if I had lost that foot where could I have found another, I should like to know?"

"You and I have had some very exciting adventures," said Mr. Dog, "and how anyone can live shut up in a cage as Polly does, I am sure I cannot understand. She never had an adventure in her whole life, poor thing."

"Bow-wow," said Polly so plainly that Mr. Dog dropped his tail and walked out of the room, for more than once Polly had fooled him and made him think there was another dog around the house.

Mistress Puss began to laugh, but Polly called, "Come puss, puss," and off ran Puss, for she, too, had been fooled many times by thinking her mistress was calling her to eat her dinner when it was Polly just fooling her.

But the love for adventure was planted in Polly's mind and the next day when the cage door was opened and she was allowed to flit about the room, her keen eyes looked about for an open window. She did not see one in that room, but when some one opened the door, Polly, who was perched just over it, quick as a flash slipped out before she was noticed and then out she flew through the open window in the next room.

Up to the top of a tree flew Polly, while everybody called and coaxed her to fly into her cage, which was hung on the tree.

Mr. Dog barked and Mistress Puss sat on the ground looking with envious eyes at Polly as she mimicked them both and then laughed loudly.

When some one at last climbed the tree Polly flew away to the very top of a tall telegraph pole and laughed as though she enjoyed the joke she had played.

By and by, with the help of a fireman and his ladder, Polly let herself be captured and put in her cage, but after that when Mr. Dog and Mistress Puss were talking of adventures Polly did not sit quietly and listen.

"Ha, ha, ha," she would laugh, "it took the fire department to rescue me. Talk of adventures, you two do not know a thing about that word. When I had one I made every one talk about it. Bow-wow! Me-ow. Come Puss, Puss."

But Mr. Dog and Puss did not stop longer to hear what Polly had to say. "I never did care for that bird," said Mr. Dog.

"Nor I," said Puss. "I am sure she would be tough eating."

"Oh, I don't mean in that way," said Mr. Dog.

"I am sure I do not know what you mean, then," said Puss. "There is only one way to care for a bird," and before Mr. Dog could explain, Puss ran for her saucer of milk she saw under the table.

Jean Paige

Jean Paige, one of the most handsome "movie" stars, spent practically her entire life on her father's model farm at Paris, Ill. She never dreamed of a motion picture career, but unconsciously was preparing herself for it, spending her after-school hours at horseback riding and other healthful and daring sports. It was not until after she went East to school that she received an offer from a producer, which she accepted. Her splendid work is known to millions. This is one of her latest pictures.

Half of patience is don't care.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

LUNCHEON FOR TWO

A dinner lubricates business.—Lord Stowell.

A YOUNG woman in business asks to know whether it is ever in good form for a young woman to take luncheon alone in a restaurant with a man with whom she is associated in business. To be sure there are times when it would be distinctly unwise for her to do so, and other times when it would not only be in perfectly good form but almost necessary to the smooth running of her business relations. For more and more men and women in business meet on a basis of good fellowship and with none of the consciousness of sex that characterized the treatment of young women in business some fifty years ago.

Though the over prudish one might say that an unmarried woman ought never to take a meal alone in a public place with a man to whom she was not closely acquainted without a chaperone, no sane person can feel that this applies to the woman who is earning her living. Imagine asking the business associate to permit you to send for your married aunt or mother when obviously the object in lunching with you was to save time by talking business at the same time that you have luncheon and to better understand each other's business methods under the favorable influence of some hotel's good cookery.

In general, having luncheon with a business associate is something that almost every business girl of any experience would at times consent to do, while having dinner is quite another matter. The young business woman can always excuse herself on the ground that she does not wish to remain away from home at dinner time or that she never lets business concerns intrude on the evening hours, but she has no excuse for luncheon and, in truth, no one misjudges a woman nowadays who goes to lunch alone with the men she knows in business.

If you ask a young woman to have luncheon with you, always defer to her in the matter of choosing the place. If you know of some interesting place you may make the invitation to go to that place. If it is not mentioned in the invitation, then the young man should always ask the woman whether there is some place that she would prefer. If she mentions none and has no preferences, then he might suggest a couple of places where he knows the cooking is good. The gracious young woman will always decide on one of these unless she has some reasonable objection to them. If no suggestion is made, then she should not suggest the most expensive hotel in town.

When a young man has taken a young woman to luncheon with him he should always remember that it is up to him to thank her for having given him her society for the time. A young woman should hardly thank her escort, but should assure the man that she has had an enjoyable time and convey by her manner the feeling that she is enjoying the "treat."

DAIRY HINTS

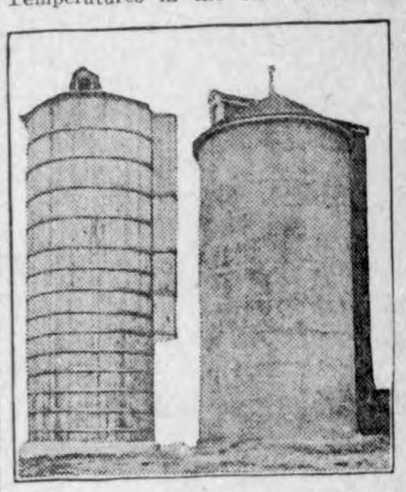
CONCRETE OR WOODEN SILOS

Test Made by Department of Agriculture Shows Material Used Cuts No Figure.

(Prepared by the United States Department of Agriculture.)

Is silage any better when put up in stave silos than when it is saved in concrete silos? Stave silos are probably the more common kind; they are usually less costly. Many people, however, prefer the more permanent concrete on account of the greater durability and the fact that the building material may be found near home in many cases; but there is an impression on the part of some people that the concrete silo does not give such good results in the preservation of the silage from spoiling and from freezing. Experiments made by the dairy division, United States Department of Agriculture, do not bear out this notion.

In experiments conducted on the dairy division farm, at Beltsville, Md., two silos were used, one concrete and one stave, standing side by side. The stave silo was directly south of the concrete one, and hence got more sunshine and less north wind. Otherwise they had exactly the same conditions. Temperatures in the two silos were



Concrete and Wooden Silos, Well Constructed.

taken by means of electrical thermometers buried in the silage, which made a record which could be read on the outside. The thermometers were placed 3 inches and 18 inches from the wall and also in the middle of each silo. Three sacks of silage were carefully weighed and buried in each silo at various depths, close to the thermometers; and when the silage was fed down to where the sacks were, their contents were taken out and analyzed.

The quality of the silage was judged by its appearance and odor and its palatability to the cows. If much difference had been apparent a feeding trial would have been made to see which lot of silage was better, but the results in the two silos were so nearly alike that it was not thought worth while to make the feeding test.

In short, neither the temperatures nor the chemical analysis of the two kinds of silage revealed any marked difference that could be ascribed to the material used in the construction of either silo. Cows ate the silage from both silos with the same avidity. It is concluded, therefore, that farmers may build stave silos or concrete silos, which ever they prefer, without any fear of not getting good silage from either one, if the silage is put up right.

It is assumed, of course, that the silo in either case will be properly constructed, with smooth walls, straight up and down, so as to be free from pockets and bulges, and properly coated inside with coal tar or some similar preparation; and that the silage will be properly packed, so that all air will be excluded. Silage will not keep in any kind of silo unless packed down and kept airtight.

GOOD PUREBRED BULLS HELP

Breeder Achieves More in Two Generations Than He Can in Five With Grade Sires.

With purebred bulls a breeder achieves more in the improvement of his herd in two generations than he can in five with grade bulls, says the United States Department of Agriculture. Department workers have thoroughly studied the subject of building up herds to better milk, butter and beef production. Better sires may be obtained either by individual purchase or by becoming a member of a bull association. Literature on the latter method can be obtained by writing to the department, and will furnish useful reading during the winter. Full information can also be obtained by consulting your county agent or state agricultural college.

DEHORNING CALVES IS EASY

Rubbing Caustic Potash Around Button of Young Animal Will Prove Efficacious.

Buy stick caustic potash at any drug store. Before the calf is a week old dampen the skin over the horn buttons, apply vaseline or lard freely to the skin around the buttons, wrap one end of the caustic with strong paper to protect the hand and then rub it upon the button until it is ready to bleed. Be careful to keep the caustic out of the eyes and do not burn skin other than that over the horn button.

Genuine
BAYER
Aspirin

Never say "Aspirin" without saying "Bayer."

WARNING! Unless you see name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 21 years and proved safe by milions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Accept only "Bayer" package which contains proper directions.

Handy tin boxes of 12 tablets—Bottles of 24 and 100—All druggists.
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

WESTERN CANADA
Land of Prosperity

offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying

are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches, schools, good markets, railroad facitities, rural telephone, etc.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, reduced railway rates, etc., write

"MISSING" MAN WAS CONVICT

Long Mourned as Dead, English Woman Learns Her Husband Had Served Prison Sentence.

Many people, doubtless, "disappear" for reasons of their own. Debt, crime or some other hidden page in their apparently blameless lives may be the real reason for their going.

Little did the wife of a Manchester man know into what terrible entanglement her husband had got ten years before. He was thought to be a respectable merchant; his home life was happy and blameless.

One day he went out to buy a newspaper and returned no more.

For years his wife mourned him as dead, until one day during the war he came back. He was now a soldier, but his disappearanee was explained by the fact that, under another name and in another town, he had been carrying on a fraudulent stock and share office—a "bucket-shop"—and had been arrested and sentenced to a long term. He was released during the war, and while serving in France had thought of the once happy wife he had so misled. Hence his sudden reappearance to a world which had almost forgotten him.—London Answers.

Decorated Sufficiently.

"Say, pa, this magazine says Mme. Curie got another medal for discovering radium. Why didn't my ma ever get a medal?"

"Why should she? She meddles enough as it is."—Science and Invention.

P. S.—The business end of a woman's letter.

The Cuticura Toilet Trio.

Having cleared your skin keep it clear by making Cuticura your every-day toilet preparations. The soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them. 25c everywhere.—Advertisement.

Battle-Battered Monster.

The curators of the Launceston and Tasmanian museums have presented the Royal Society of Tasmania a preliminary account of a nearly complete skeleton of a gigantic extinct monster, recenty discovered in the pleistocene beds of Tasmania. The animal was as large as the largest existing rhinoceros. The newly discovery shows clearly that it was a rhinoceros-like animal, with a skull built for aggressive warfare, and at least one powerful horn on the snout. Evidence of the gigantic battles in which this animal engaged is to be found in the complete smashing and partial mending of the collar-bone, and in the crushing and subsequent repair of the bones of the nose and snout.

Just So.

Son—Papa, what are cosmetics?

Father—Cosmetics, my son, are peach preserves.—Exchange.

Theories may work fine after you have got everybody to agree to try them out.

"What's in a Name?"

Facts about your name: its history meaning, whence it was derived, significance, your lucky day and lucky jewel

By MILDRED MARSHALL

PEARL

PEARL is undoubtedly a name of great price! Not only is it musical in sound, but it honors the exquisite translucent gem which is the symbol of purity the world over.

The Persian term for the jewel is Muryarid, meaning "child of light." Their legend of the origin of the pearl, a charming and beautiful fancy, is in accordance with the ancient idea that the oysters, rising to the surface of the water at night and opening their shells in adoration, received into their mouths drops of dew, congealed by the moonbeams into the lustrous gems which resemble the moon itself.

The pearl has always been associated with purity and sanctity. Pearls were chosen as the jewels to adorn the gates of the Celestial city and the gem has had countless uses as a symbol in the religions of all countries.

Pearl is enormously popular in England. Like Muriel and Molly and Vivian and Sibyl, it may almost be said to be one of the national feminine names. In this country it has, likewise, a widespread vogue. We have even gone further and made a diminutive, Pearley, which is popular in some sections, though a trifle provincial.

Pearl's talismanic stone is, of course, her own gem, the pearl. It promises her great charm and affability, and many friends. It will always guard her from dangers and evil and preserve her purity. Thursday is her lucky day and 2 her lucky number. The marguerite, or daisy, is her flower.

—O—

What Kind of a Day Do You Wish Yourself?

Suppose you could make a wish at the breakfast table and finally have the wish come true. Would you say,

"I want this to be a good day," or—"I am willing for this day to drag along?"

If you keep on wishing your days with the food you eat, finally the wish is likely to come true.

Grape-Nuts helps your wish for a good day. Nothing miraculous; just the natural result from right food with the right taste.

There is a charm of flavor and crispness in Grape-Nuts that is like the smile of a good friend at the breakfast table—

And Grape-Nuts, with cream or milk (fresh or tinned), is fully nourishing—feeding the tissues and glands, the bone and blood, with just those elements which Nature requires—building strength without any "heaviness."

Grape-Nuts is the perfected goodness of wheat and malted barley, scientifically developed—ready to eat from the package. A Grape-Nuts breakfast or lunch is a practical wish for good luck.

SOMETHING TO THINK ABOUT

By F. A. Walker

A CRY FOR CAPTAINS

WHAT are you doing to improve your mind, to sharpen your vision and so equip yourself that you may press onward and take your place among the leaders?

The whole world keeps calling for men and women who are qualified by patience, alertness and ability, to accept responsibilities where rewards are large and opportunities are unlimited.

Everywhere the cry goes up for more captains!

The ranks of privates are filled to repletion with grumblers, who pinch their envelope on pay day and scowl enviously and malignantly upon those energetic souls who, with seemingly small effort, earn as much in a week as the grumblers earn in a month!

These privates are becalmed in the sea of life with burning hearts. They lack stamina and resolution. In nine cases out of ten they have no one to blame for their lowly estate but themselves.

They waste their leisure hours and holidays in frivolous amusements instead of giving sober thought to the future.

Everything that tends to their elevation and betterment is studiously shunned. Their aspirations, if they have any, are smothered at birth.

In moments of depression, when a steady, trustworthy, clear visioned worker at their elbow is promoted, their lamp of hope flares out and leaves them in utter darkness.

The years roll on, but the light never brightens, and they march in darkness down the hills to the valley of despair.

* * * * *

As for this innumerable army of "ne'er do wells," it is palpably absurd to offer them advice.

Perhaps, in the evolution of things, they are intended as warning signals to the thoughtful, who, seeing their delinquencies, are spurred to greater achievements.

At any rate, the world is crowded with privates; column on column in the daily newspapers bear testimony to their helpless plight, while the stentorian voice of the world rings louder and louder in its cry for captains, more captains!

(Copyright.)

Uncommon Sense

By JOHN BLAKE

CLOTHES, CONFIDENCE

MARK TWAIN could afford to indulge his delight in unusual and fantastic clothes. He was a genius.

If John D. Rockefeller chose to walk down Broadway in a suit of blue jeans it would not affect his financial standing, although it might create surprise, for his custom is to dress himself rather neatly.

Russell Sage wore the same straw hat for 15 years, and was able at the same time to get more interest on a thousand-dollar investment than almost anybody else in Wall street.

But Sage was an exception. And when he was just out of Troy, beginning his long climb in New York, he dressed more carefully.

The importance of good clothes is the confidence they inspire, not only in the wearer but in those with whom he comes into contact.

The well-dressed man impresses others with a belief in his competence. The man in rusty coat and baggy trousers is viewed with an eye of suspicion.

"If he is able, why doesn't he dress well?" asks the world.

To the job seeker nothing is so much of an asset as a prosperous appearance.

He need not be dressed as the writer of the fashions-for-men columns would dictate, but his clothes should be whole and clean, and not three or four years behind the style.

One reason for this is that competent men usually take a pride in their personal appearance and dress well. And the world takes its impressions from custom. It is not customary for a bookkeeper or clerk to be shabby. Therefore a shabby bookkeeper or clerk is looked upon as lacking in ability.

Of course dressing too well is as bad as dressing too poorly. The flashily clad youth who wears cheap imitations of ultra-stylish garments is usually set down as a tin-horn gambler, or a horse-race follower, and stands a small chance of getting any good job.

But the youth who is careful about buying and keeping his clothes, and who looks as well as he can, will get at least consideration. After that, provided there is any job to get, whether he gets it or not, depends upon his manner. And his manner is surely to be more impressive if he is well dressed than if he is shabbily clad.

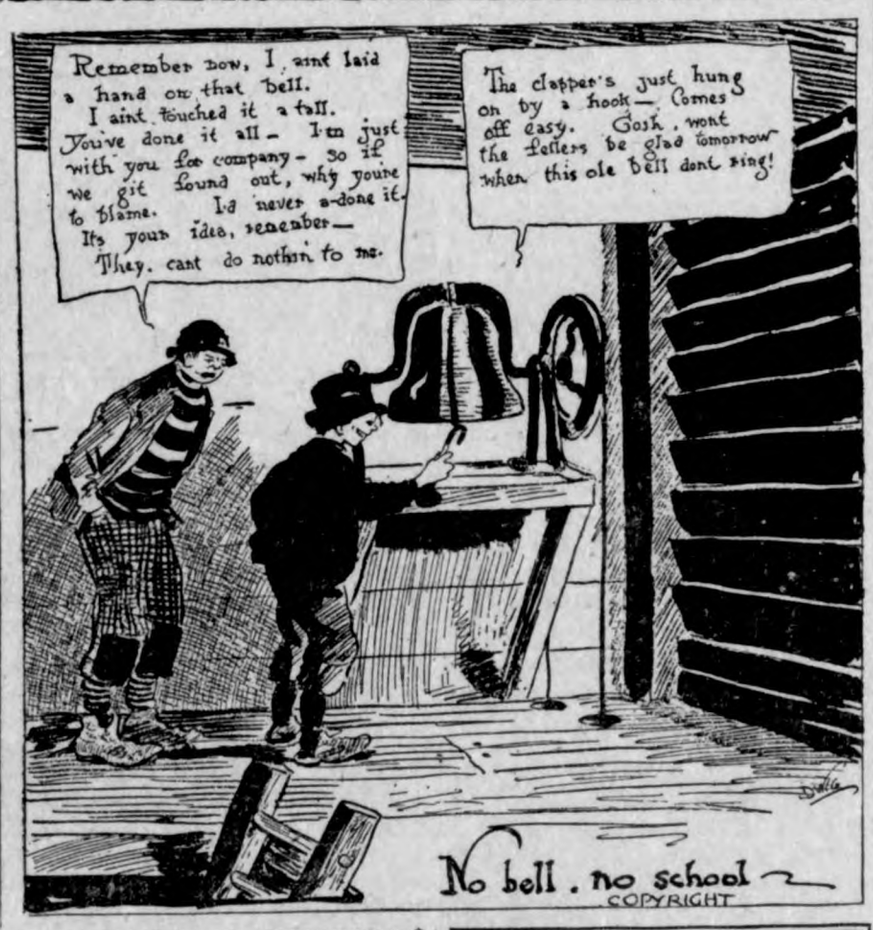
CORRECT.

The way of the transgressor is hard.

Yes; but the trouble is it is generally hard on somebody else.

SCHOOL DAYS



LYRICS OF LIFE

By DOUGLAS MALLOCH

MERRY CHRISTMAS, EVERYONE!

Merry Christmas,
Everyone!—
Rich in love and
Rich in fun,
Young and old, and sire and son!

Castle hall or
Humble cot,
Rich in wealth,
In wealth forgot,
Share the joy
The star foretold,
Make the day
A day of gold,
Sire and son, and young and old!

Everyone by
Vale or hill,
Everyone
Rejoicing still—
Young and old, what land
Or tongue,
Never old and
Ever young!

(Copyright.)

MOTHER'S COOK BOOK by Nellie Maxwell

This is the gospel of labor—ring it, ye bells of the kirk—
The Lord of Love came down from above, to live with the men who work.
This is the rose He planted here in the thorn-cursed soil—
Heaven is blest with perfect rest, but the blessing of earth is toil.
—HENRY VAN DYKE.

CHILDREN'S LUNCHEONS

THE luncheon problem affects a large per cent of the American homes. The mother wishes to furnish to her child a large amount of nourishment with the least tax upon the digestive system, as study comes so soon after the luncheon is eaten.

For the little kindergarten child the ten o'clock lunch should be very light, usually composed of fruit. A sandwich with date and apple filling, or banana and chopped nut meats is delicious.

A bunch of grapes with a sandwich, fig and walnuts chopped as sandwich filling, and a pear or apple, these are all good and suggestive of other good combinations.

By using sweet sandwiches with fruit or sweet dried fruits the child will not have such a craving for sweets. A little candy is good properly eaten at the proper time, but in the lunch baskets, usually that goes first and the appetite is spoiled for more substantial foods.

Cookies and gingerbread may take the place of sweet fruits.

A sandwich filling generally liked by children is chopped peanuts with mayonnaise; this is satisfying and will give the child a desire for a reasonable amount of water.

For the older children a more substantial and greater variety of foods is demanded.

A favorite sandwich with the growing lad is baking powder biscuit cut in three slices and put together with any of the following fillings:

Lean cooked ham put through the meat grinder, one chopped pimento, one-half teaspoonful of prepared mustard, one teaspoonful of horseradish—mix well. Cooked tongue with tomato sauce for seasoning is another well liked filling. The weather is a good guide for one who packs a lunch box. On cold days more fats and sugars are demanded because more heat must be generated. Hot milk, hot cocoa, a cake of chocolate or a handful of dates with nuts are good heat producers.

Coarse foods to keep the alimentary canal in good working order are very essential. No child can have a clear brain or do good work in school who is hampered by a badly functioning body. Often a glass of orange juice or a few figs will be all that is needed, but neglect will cause trouble which may never be remedied.

Copyright, 1921, Western Newspaper Union.

How It Started

"&," OR "AMPERSAND."

LIKE the "plus" sign, "&" is a corruption or shortening of the Latin "et," meaning "and." The term "ampersand," now seldom heard, is a derivation of the old method of reading aloud in schools, when the sign was "& per se &" to indicate that it stood alone.

ALWAYS HARD.

Mac has the hardest job of his life this summer.

Indeed. What is it? Trying to find a soft one.

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm.

THE HAND OF A DOCTOR

THE hand of a successful physician, or one who may become a successful physician, should be supple and smooth. The following are some of the traits of a good doctor as indicated in the hands:

Tact, shown by a thumb that is well "waisted," that is, indented or marked at the joint.

Kindness, shown by a Mount of Venus, or ball of the thumb, which is moderate in size.

Self-confidence, the Line of Life and the Line of the Head well apart.

Trustworthiness, a Line of the Heart that is forked at the beginning.

Popularity is indicated by a Line of Fate which rises on the Mount of Luna (at the side of the hand) and runs into the Mount of Saturn, at the base of the second finger. This shows unusual popularity, but also dependence on public caprice for success.

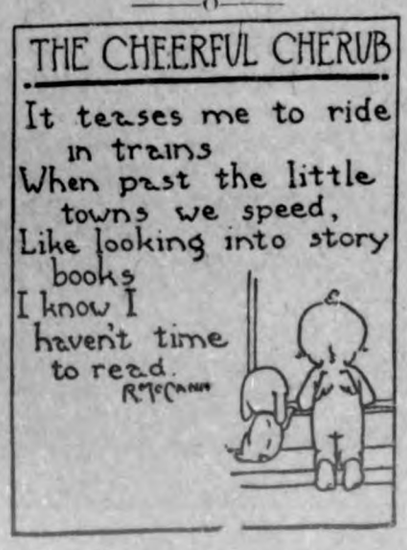
THE CHEERFUL CHERUB



ASPIRIN INTRODUCED BY "BAYER" IN 1900

Look for Name "Bayer" on the Tablets, Then You Need Never Worry.

If you want the true, world-famous Aspirin, as prescribed by physicians for over twenty-one years, you must ask for "Bayer Tablets of Aspirin."

The name "Bayer" is stamped on each tablet and appears on each package for your protection against imitations.—Advertisement.

Conversation.

"Some talk of the duke marrying a local girl." "Whose money is talking?"

MOTHER! OPEN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the sour bile, and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.—Advertisement.

If one could but swallow his words in time, he would never have to eat them.

THE SCHOOL HERO CHANGES

No Longer Does the Freshman Win Football Games Single Handed—Style Improved.

There has been a noticeable slump in the demand by boys at libraries for the school story, with the hero who always won the big football game and who knocked the home run with three on bases when, as a substitute player, he brought the baseball honors to Tushtushville prep school. Boys who have tried to go out and win football games single handed and who have sought an opportunity to make home runs at crucial moments in school baseball series, have found out what rot has been handed them in fiction. They know that boys simply don't do such things—not as "frosh," anyway.

The school hero still maintains, but he is traveling at a slower pace. Prexy does not kowtow to the gifted youth as suddenly as in the heyday of such fiction. Librarians say that the big improvement in school fiction has come through saner plots and more careful work in characterization. The author must really show his own interest in a school character if he is going to get the hero "over."—Arthur Chapman in the New York Tribune.

Less said, fewer the apologies.

SUFFERED ALL A WOMAN COULD

Mrs. Meyer Finally Found Relief and Health in Lydia E. Pinkham's Vegetable Compound

Orange, Cal.—"I always feel very grateful to you, as some twenty years ago three doctors said I had to have a serious operation. I had a tumor, and ulcers which would gather and break. I had displacement so badly that I could hardly sit down at times, and it seemed as if I suffered everytning that a woman could suffer. Then some one advised me to take Lydia E. Pinkham's Vegetable Compound, and I took it until I was cured and saved from the operation. I have told women of your wonderful medicine times without number, and I am willing that you should use these facts and my name if you like. I also used your Compound during the Change, and I can do all my own work but the heavy part, and can walk miles every day as I help my husband in the office."—Mrs. J. H. Meyer, 412 South Orange St., Orange, California.

It is quite true that such troubles as Mrs. Meyer had may reach a stage where an operation is the only resource. On the other hand, a great many women have been restored to health by Lydia E. Pinkham's Vegetable Compound.

KNEW HOLY LAND GEOGRAPHY

Insurance Man Could Do More Than Guess at the Birthplace of His Acquaintance.

An insurance man of Indianapolis, who is also a Biblical student, was recently making his usual weekly calls in Irvington, and stopped at a residence to inquire of the young woman at the door about the birthplace of her mother.

She said that it was the same name of a town mentioned in the Bible.

"Was it Jerusalem?" he asked.

"No, but I am sure it was a town near there," she said.

"Well, then," the man replied, "it must have been Antioch."

So in the evening when the mother returned home from a social function the daughter related the conversation that had taken place when the insurance man called.

"It seems strange," said the mother, "but he was right. I was born in a little town in Ohio by the name of Antioch, and nearby was another village called Jersusalem."—Indianapolis News.

Irresistible.

Dorothy—I just heard something horrid about Gladys.

Kathleen—You know I just hate gossip! What was it?

When a Federal Bureau reminds you that children should not drink coffee or tea—why not think of your own health?

The Federal Bureau of Education includes in its rules to promote health among the Nation's school children, the warning that children should not drink coffee or tea.

The reason is well known. Coffee and tea contain drugs which stimulate and often overexcite the nerves, and so upset health.

The harm is by no means confined to children, as any doctor can tell you.

If health is valuable to childhood, it is valuable always. If harm to health should be avoided until bodies grow up, is it worth taking a chance with health when bodies have grown up?

You can have that delicious and satisfying cereal beverage, Postum, with any meal, and be safe—you, and the children, too. There's charm without harm in Postum.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold by all grocers.

The road to health is a good road for anybody to follow

HERE'S THE "TEA-STRAINER'S" LIST TO DATE

Mustaches are very much in evidence in and near Klemme and up to date we have on the list fourteen who are growing a "tea-strainer" under their nose. We would have had more on the list but "Zip" McCullough became discouraged when his little mustache froze off the other day and no doubt its growth is stunted for life. Those who are doing nobly along the line and who are really making a showing with a mustache are Chas. White, Gus Baack, Carl Suckow, Levi Klotzbach Ralph Ludeke, Henry Ludeke, Paul Stille, Jake Groes, Lee Price, Joustin Lynch, Bobbie Henschen, Doc. Thomas, Albert Yahnke and ——. That's a fine list and all are doing fine. Ed. Jacobs and Henry Suckow, being unable to raise anything on their upper lips are growing "Windshields" for their ears. some call them side burns, they come in mighty fine during the cold weather as it keeps the wind from blowing into their ears. They also act as "hot air" strainers when listening to Vern Smith blow.

SECTION CAR AND AUTO COLLIDE HERE

Tom Blanks motor car on the Rock Island section and A. G. Koerner's big automobile collided on the crossing west of Lau Elevator last Friday forenoon about ten thirty o'clock. Blank's gang were coming into town from the north and were coasting in as they shut off the engine on the car a couple of hundred yards north of the crossing. Koerner was driving toward town when the motor car struck his back wheel as he was going over the crossing. The motor car was going slow as well as Koerner but they got too close together to apply the brakes and the view was obstructed. Koerner's car got out with a broken wheel and other bends and dents while the motor car received a twisted axle in the mix-up. Nobody was hurt.

MOTHER OF MRS ROY SHOEMAKER DIES WHILE VISITING HERE

Mrs. Mary Phillips, and her oldest son Louis Gennett, came last week from Riley Kansas for a visit at the home of Mr. and Mrs. Roy Shoemaker, southeast of Klemme. Mrs. Phillips is the mother of Mrs. Shoemaker who came to pay the family a ivsit. While at her daughter's home she became ill and died from the effects of heart trouble Sunday night. Funeral services were conducted at the home Tuesday by a Klemme minister and the body was then shipped from Meservey to Kansas where she will be buried.

ENGLISH METHODIST CHURCH

Services Sunday morning at the usual hour. Sunday school at 11:00 o'clock.

Special Young People's services at 6:30 P. M. All young people are invited to attend this service.

Preaching service at 7:30 P. M. Mr. Webb, of Sioux City, is acting in the capacity of pastor for the next two weeks.

NOTICE OF SPECIAL SCHOOL ELECTION

BOND PROPOSITION
MESERVEY, IOWA.

Public Notice is Hereby Given, That a special election of the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, will be held on the 12th day of January, 1922, at the City Hall, Meservey, Iowa, from one o'clock P. M. until six o'clock P. M. and that at said election there will be submitted to the voters of said Consolidated Independent School District to be by them voted upon, the following proposition:

Shall the Consolidated Independent School District of Meservey, in the counties of Cerro Gordo, Hancock, Franklin and Wright, State of Iowa, issue bonds in the sum of Sixty Thousand Dollars ($60,000) for the purpose of construcing and equipping a new school house?

At which time and place all of the voters of said Consolidated Independent School District are hereby notified to appear.

This notice is Given by Order of the Board of Directors of said Consolidated Independent School District. pursuant to a sufficient petition with the requisite signatures in accordance with Section 2820-dl et seq. of the supplement to the Code of Iowa, 1913.

Dated at Meservey, Iowa, this 7th day of December, 1921.

D-15-22 29 J 6 K. Clarence Ruigh,
Secretary, Board of Directors.

IMPROVEMENTS AT THE CREAMERY HERE

The officials at the local creamery are having the refrigerator built much larger. The object in doing this is so that they can store a great deal more butter during the hot summer months and by so doing they can ship in car load lots by freight instead of the expensive way of shipping by express on small lots They will save considerable money in this way. They have also made other improvements.

Doubles Business in Year

The Klemme Creamery are having a large increase in the amount of cream received and butter made. This increase amounts to just 100 per cent gain over the same period last year. Friday the creamery shipped 91 tubs of butter to New York.

LIBERTY TOWNSHIP NEWS

The writer wishes to thank those who were so kind to donate the log chain Sunday evening. We are accustomed to receiving our gifts personally, and we would rather had it brought to the door. Christmas gifts have started to come early this year.

Milton Schaper hailed in from Sioux City last Saturday by way of the Ford, accompanied by several school mates. He seems to think it is only a little jogg from Sioux City. From here he will depart for Cedar Falls to meet his sister, who is going to school there. They will leave from there for Illinois to spend Christmas vacation with relatives.

E. G. Beier had the misfortune to break the back axe of his cacr while on the way to church Sunday evening. Luckily no one was hurt.

Miss Drucilla Stromer came from Iowa Falls to spend Christmas vacation with her folks.

Miss Cora Fisher's sister arrived from Forest City Saturday to spend a few days here visitin school at Liberty No. 9.

A large number from about here attended Ben Katter's sale Tuesday.

Mrs. H. Stromer of Portland, Ore. visited at the Lawrence Schaefer home Tuesday.

Missionary Society of Liberty Township iwll hold a Chicken Pie Supper, in the church basement on Friday, December 30th, at seven o'clock: 35 cents for Adults and 15 cents for Children.

She's a Christmas Baby Almost

A fine baby girl was born to Mr. and Mrs. Henry C. Beier early Monday morning, the young lady arriving in time to have breakfast with the family. Henry has a fine family of ten children, seven girls now and three boys. But Henry overlooks the shortage on boys as he says the girls are fine.

(Too Late For Last Week

The young folks are busily working at their Christmas program to be given at the Liberty Twp. church.

Herman Paul and family spent Sunday at the Sorensen home near Ventura.

August Lau was a Belmond caller Saturdap.

Will Suckow and family were guests at the Carl Suckow home in Klemme Sunday.

Will Lempke and wife did some Xmas shopping in Mason City one day last week.

Charles Schmidt and family spent Sunday at Garner.

Miss Fisher, teacher in Liberty No. 9 spent the week end ivsiting friends at Garner.

Everyone working forward to Xmas. vacation.

Celia Brouwer spent Sunday at her home in VeVntura.

W. J. M. S. of the Liberty Twp. church held their monthly meeting at the church last week Wednesday.

Some corn shelling is being done in the community--even though corn is cheap and only fit for fuel, we wonder if peaple haven't decided that a half a loaf is better than none

The weather and roads were in A 1 condition 1 week ago Sunday evening, in fact it looked too favorable for the young people of Liberty Twp. to stay at home. Consequently a certain young couple ventured out for a spin. Their trail was to lead them over two different bridges, which a certain group of young "fellers" evidently knew. So they went in pursuit of the joyous riders and used one of their flivers to blockade the bridge as the said couple came along. They were finally given right of way only to be blockaded on the next bridge a few miles down the line by the same "gang" who beat them to it. By that time the joyous riders temper apparently became aroused. which could only be expected. Space will not pursuit me to give full details of the incident. However the joyriders reached home safely and the "gang" called themselves victors. "Boys will be boys."
